disease outcomes of picolinate versus gluconate or citrate. More data needed? Studies also show combining a high Zn foods with some forms of fiber or phytates (very common in virtually all packaged foods, all burgers, vegan protein powders, etc), drastically reduces the amount of Zn absorbed. Cooking causes AGEs that precipitate Zn in feces. High protein diets can cause Zn to be absorbed poorly, same for high phytate diets (unsoaked beans for example, eating lots of bread, cookies, crackers, cereals, nuts, grains, beans, lentils) and diets high in some forms of fiber or iron. Given how much Zn lowers bad cholesterol and blood glucose in some studies, if absorption is compromised, billions of people can be deficient leading to arterial plaque and diabetes. It's hypothesized that some genes predispose people to poorer absorption of Zn, leading to Zn deficiency and all kinds of related problems, as explained at ► AJHG 2002;71(1):66-73 ► "we identify a gene, SLC39A4, located in the candidate region and, in patients with AE, document mutations that likely lead to the disease. The gene encodes a histidine-rich protein, which we refer to as "hZIP4," which is a member of a large family of transmembrane proteins, some of which are known to serve as Zn-uptake proteins." AE or Acrodermatitis enteropathica without treatment is fatal, with people needing daily extra Zn and dying in 3 years sometimes. ☺

►►► POSSIBLE LETHAL effects of low Zn ►►► "In the Middle East, Zn-deficient dwarfs did not live beyond the age of 25 y, and they died because of intercurrent infections. The first case of Zn deficiency in the US was reported by Caggiano et al in 1969 in a Puerto Rican subject with dwarfism, hypogonadism, hypogamma-globulinemia, giardiasis, strongyloidosis, and schistosomiasis. Zn supplementation resulted in improved growth & development" ► AN 2013;4(2):176-90. " Zn is found in every tissue in the body, and because Zn metalloenzymes are found in every known class of enzymes, the metal has a function in every conceivable type of biochemical pathway. Symptoms resulting from Zn deficiency are as diverse as the enzymes with which the metal is associated." ► CPB 1986;4(1):94-8. ☺☺☺

►►► LONGEVITY ►►► "The risk of mortality was reduced by 27%... in subjects 55–81 y of age who received only therapeutic Zn daily" ► AN 2013;4(2):176-90.

►►► BIRTH DEFECTS ►►► AMSS 1976;593:38-49 found birth defects and infertility among women and men with low Zn, DNA repair depends on Zn. Low Zn leads to birth defects, low height and improper heart rate variability in kids. Zn is a co-factor in 300 enzymes, including alkaline phosphatase, alcohol dehydrogenase, superoxide dismutase, RNA polymerase, etc. Cadmium and Mercury are in the same group of metals, and bind to Zn sites easily sometimes due to similar structure. Zn is used for DNA synthesis and neurotransmitter release. If there is a deficiency, the brain area that suffer are hippocampus, cerebellum and the autonomous nervous system. "Zn is a cofactor in enzymes that mediate protein and nucleic acid biochemistry. Fetal Zn deficiency results in decreased brain DNA, RNA, and protein content. Importantly, IGF1 and

growth hormone receptor gene expression are regulated by Zn. Neuronally, presynaptic boutons are dependent on adequate Zn for delivery of neurotransmitters to the synaptic cleft. Behaviorally, Zn-deficient rhesus monkeys have poor short-term memory." ► AJCN 2007;85(2):614S-20S; the paper explains some neurons contain Zn actually. A great paper on brain development and Zn is NR 1985;43(5):129-37, which explains decades ago it was shown that people low on Zn grow to be shorter *and that animals become* less smart *when deprived of Zn* during early life and gestation (low Zn in mom diet). 2'-3' cyclic nucleotide 3-phosphhydrolase is involved in myelination of neuron axons and if there is no Zn, this enzyme diminishes its activity; without myelination, neurons are slower at transferring information; synthesis, repair of nucleic acids require Zn. Enzymes that degrade catecholamines require Zn; in rats without Zn, their brain catecholamines rise, leading to stress, panic, fight-flight, impaired cognition. Mothers who got Zn pills got bigger babies; mothers *low in Zn gave* birth *to babies with* malformations and birth defects, *with more and more delivery complications as Zn intake is lower and lower*. ☺☺☺

►►► Zn & IQ ◄◄◄ Zn "improved specific cognitive abilities, thereby positively influencing the academic performance of schoolchildren, even those without marginal Zn deficiency." ► BTER 2013;155(1):23-8. Other studies found the same. Those with Alzheimer have lower Zn levels, higher Hg, Cd levels. Zn, Cd, mercury are in the same transition metal group, so Zn can be displaced by these heavy metals easily. Zn prevents the formation of AGEs in the body/brain and Alzheimer patients have higher AGEs in their brain ► CEPP 2018;45:491-8. ☺☺☺

►►► DIABETES ◄◄◄ Diabetics have lower Zn levels. Free Zn concentrations in mitochondria are 0.14 pmol/L, while in the insulin-storing granules they can reach 100 µmol/L, or 0.71 billion times higher ► AN 2013;4(1):82-91; the paper explains 10% of genome is hypothesized to encode for Zn proteins. Zn lowers blood glucose significantly, high glucose impairs the brain ► "The pooled mean difference in *fasting* blood *glucose* between Zn supplemented and placebo groups was 18.13mg/dl. 2-h postprandial blood sugar also shows a similar distinct reduction in (34.87mg/dl) the Zn treated group." ► DMS 2012;4:13.

►►► FLU AND COLDS ◄◄◄ Zn types (acetate, etc) used for cold are in the antivirals section.

►►► HEART DISEASE ◄◄◄ Zn lowers blood pressure, total and LDL cholesterol ► "The pooled mean difference for *total cholesterol* between Zn supplemented and placebo groups was 32.37 mg/dl. *Low-density lipoprotein cholesterol* also showed a similar distinct reduction in the Zn treated group, the pooled mean difference from random effects analysis was 11.19 mg/dl. Studies have also shown a significant reduction in systolic and diastolic blood pressures after Zn supplementation." ► DMS 2012;4:13. ☺☺☺

►►► COGNITIVE FUNCTION ENHANCEMENT DURING PREGNANCY ◄◄◄ Maternal dietary

Zn prevents aberrant behavior in an object recognition task in mice offspring exposed to LPS toxin in early pregnancy ► BBR 2009;197(1):210-8. Zn for pregnant mice prevents spatial, object recognition memory impairments due to prenatal ethanol exposure ► BBR 2008;186(2):230-8.

►►► HAIR LOSS ◄◄◄ Those not losing hair had Zn levels 17% above the levels of those losing hair ► AD 2013;25(4):405-9. This comes to no surprise, since Zn inhibits DHT formation, and DHT leads to hair loss. DNA synthesis, repair and 300+ enzymes depend on Zn. In one study, those with hair loss, received zinc L-carnosine and all were cured partially or totally. "zinc for Zn deficiency-related alopecia may recover appropriate activities of metalloenzymes, hedgehog signaling, and immunomodulation, all of which are required for normal control of hair growth cycle." ► DT 2012;25(2):210-3. "Plasma TBARS i.e. lipid peroxidation decreased significantly… 8 weeks of Zn...(45 mg Zn gluconate) in healthy volunteers showed a reduction in plasma levels of lipid peroxidation products, DNA adducts and reduced mRNA for TNF and IL-1 compared to control groups" ► bald people have high TBARS/blood oxidative stress ► DMS 2012;4:13. ☺☺ In animals, *higher* Zn *intake meant denser fur, more* hair ► JAS 2017;95(12):5420-9.

►►► INFERTILITY ◄◄◄ Low Zn is common in infertile men and women too ► " Zn *supplementation* was found to significantly increase the *semen* volume, sperm motility and the percentage of ► *normal sperm morphology* ◄ The present study showed that the Zn level in the seminal plasma of infertile males was significantly lower than that of normal males" ► SR 2016;6:22386. Zn *'sparks' fly from egg within minutes of fertilization* ► nih.gov...n "The discovery of egg cells' massive intake and later release of Zn defines a new role for" Zn. After 220 mg $ZnSO_4$ 3 times/day for 4-8 weeks, serum Zn of infertile men rose from 1.55 to 2.35 mg/L, testosterone from 493 to 852 ng/dL, sperm count from 14.6×10^6 to 28.2×10^6 ► Lancet 1977;2 (8048):1125-6: thus, 1 male was able to conceive after 6 weeks of 267 mg Zn/day. Natural babies are way healthier than IVF, so try take Zn first. The male RDA of 11 is ultra low vs 267. 250 mg $ZnSO_4$ for 6 weeks rose Zn 1.4x, luteinizing hormone 3x, prolactin 1.3x (more breastmilk), testosterone 2x ► RF 2010;32(4):417-9, meaning ladies who're infertile need Zn too, not just men. Sadly, instead of 7$ on Zn, INFERTILE couples spend 50K on IVF and endless time to birth a sicker baby. Ignorance of nutrition is VERY expensive. Most people eat unsoaked legumes and grains via cereals, tacos, restaurant foods, bakeries, cakes, etc and this phytate blocks Zn uptake, causing infertility. " Zn deficiency reduces testosterone" ► JTEMB 2023:76:127124. "testosterone concentration decreased as serum Zn" fell ► IJU 2023;30(4):395-400. Restricting Zn (3 fold drop, from 12 mg/day to 4 mg/day) in young men for 20 weeks caused testosterone to drop almost 4 fold, from "39.9 (to) 10.6", while 30 mg Zn gluconate/day pill for deficient old men almost doubled testosterone from 8.3 to 16 nmol after 6 months (14.2 nmol at 3 months) ► Ntr 1996;12(5):344-8. If you exercise or exert physically at work or sweat a lot in saunas to detoxify of heavy metals, microplastics, etc, or eat many polyphenols (that bind to Zn) as a vegan, you get

lower minerals status as sweat eliminates them, so more Zn is needed to be healthy ► NEL 2006;27(1-2):247-52: 4 weeks of 3 mg/kg/day Zn prevent thyroid and testosterone hormone falls after heavy exercise as in NEL 2007;28(5):681-5. Too much Zn is bad, so after reaching good Zn, conception, testosterone, lower intake 3 fold if not exercising, to avoid low Cu/Fe/Mg/Ca, as the fetus will be low in IQ if Fe in pregnant mom is low.

►►► TINNITUS ◄◄◄ 2 months of 50 mg Zn daily led to less tinnitus in a small study of over 50 year olds (28 got Zn, 13 got placebo) versus placebo ► ON 2003;24(1):86-9. Zinc carnosine is used to heal a leaky gut in those who tried glutamine with poor results. ☺☺☺

►►► TESTING Zn DEFICIENCY AT *HOME* BY TASTE ◄◄◄ Premier Labs sells Zinc Assay on Amazon, which is a solution of Zn sulfate. I bought it, and tried it and it tasted pleasant, a little sweet, which meant mild Zn deficiency as explained below. My lab result from August 21, 2017 for Zn serum came at 75 µg/dL (reference range is 56 to 134), which in many studies is thought to be a mild deficiency, even if within the normal range of blood tests. So I take it as this taste test is pretty good and indeed, getting a Zn boost may be good in my case. Zn serum doesn't even always reflect actual Zn stores within the body. The interesting part is that in many studies those with Zn even in their 80s (higher than 75) in serum cured a lot of issues with Zn supplements, indicating that perhaps, in some cases at least, normal serum Zn is not a reflection of body Zn needs. A lot of markers can be "within normal range", but data shows those with lower or higher values within that normal range have dramatically lower mortality rates. This product is based on the 1984 paper published in Lancet, world's most famous medical journal. IM 2015;14(2):34-8 explains the Lancet 1984;324(8412):1162-3 test in detail "The Bryce-Smith and Simpson Zn taste test (BS-ZTT) uses 5 to 10 mL of a 0.1% Zn sulfate solution. The solution is administered orally, and the reaction of the tested individual is graded on an ordinal scale of 1 to 4 according to the subject's response to the solution. A score of 1 is given if "no specific taste or other sensation is noticed, even after the solution has been kept in the mouth for about 10 seconds"; 2 if "no immediate taste is noted, but after a few seconds a slight taste variously described as 'dry,' 'mineral,' 'furry,' or (more rarely) 'sweet' develops"; 3 if "a definite though not strongly unpleasant taste is noted almost immediately, and tends to intensify with time"; and 4 if "a strong and unpleasant taste is noted immediately." This means take a spoon orally and if you have enough Zn it tastes like very unpleasant, if you lack a little Zn it tastes somewhat unpleasant, if you have some real deficiency it tastes unpleasant after 10-15 seconds, if you have deep deficiency it tastes like water. This is a basic test, not always accurate.☺☺☺

Zn sulfate taste acuity has been correlated with levels of serum Zn throughout pregnancy (the study method employed 2 mL of a 1% solution of Zn sulfate that is retained in the mouth for 10 seconds) ► IJPP 1993;37(4):318-22 ► "Pregnant women in different trimesters of pregnancy

were divided into control (n = 58) and study (n = 104) groups. Study group subjects were given 45 mg Zn/p.o./day *(p.o. means per os or by mouth in Latin)* as 200 mg 'Zn sulfate tablets from the day of reporting till term. Body Zn status was clinically assessed by 'Zn taste test'. Blood samples were drawn at the same time and serum Zn levels measured. Zn taste test scores decreased with advancement of pregnancy and increased significantly following Zn administration. Serum Zn level declined significantly with advancement of pregnancy. Following Zn administration, serum Zn level increased significantly. Accuracy of Zn taste test in individual cases ranged between 70 and 100 percent. On the whole, Zn taste test was well correlated with serum Zn level, and provides a fair idea of Zn deficiency." However, JACM 2012;18(6):541-50 explains that this test is not very accurate always, but it can be a very cheap way for people to pretest themselves before they decide whether to do a blood test. I believe the test is very accurate for some, since it was pleasant before taking Zn daily and after taking Zn daily it became less pleasant, indicating higher Zn level. Amazon sells Zn sulfate for $6, so a solution is easy to make in water using the same ratio as the Lancet papers; or buy the Zn sulfate solution for $ 16 which has 470 mg Zn in 8 ounces of water or 237 ml or 2.08 g of Zn sulfate heptahydrate $ZnSO_{4*}7H_2O$ in 237 ml of water; it's a 1% solution, using the protocol of IJPP 1993;37(4):318-22, not the 0.1% solution protocol. Since the $6 bottle has 100 capsules, you get to make from $80 worth of this 1% solution. Use pure zinc sulfate to avoid distortion or dilution of taste via fillers.

► ► 12.4.26. SELENIUM $_{34}Se^{79}$ ◄ ◄

The RDAs in µg: 0-6 mo 15 (AI), 7-12 mo 20 (AI), 1-3 yrs 20, 4-8 30, 9-13 40, 14+ 55, pregnant 60, lactating 70. The ULs (for pills) are: 0-6 mo 45, 7-12 mo 60, 1-3 90, 4-8 150, 9-13 280, 14+ 400. I get 30 µg from food alone; multivitamin brands have 10-90 µg. Most selenium, is in the form of selenomethionine (SeMet, sulfur replaced by Se) in humans, animals and plants, except cruciferous and allium plants; that's why most Se pills are SeMet. 90% of Se in many US lentils is SeMet, etc, so taking a pill with lentils allows body to view it as food Se; we don't know the optimal level for our genome and molecular composition (*how much mercury from old fish eating and amalgam days is still taken by* Se *out of body via* glutathione*-mercury complexes, see below*) and because *food* Se *content can vary* wildly from cultivar to cultivar, from farm to farm (I eat 30 µg from food "on paper" if soils are not depleted, but it could also be 1). Several papers show antioxidant enzymes increase in the blood when we had amalgams and then they remain the same for a while, so GPx may remain high for a while due to non-mercury reasons, requiring higher Se for optimal defense against oxidative stress. In France, "Neither Se nor iodine were detected" (in the beans and lentils they examined) ► Ntr 2018;10(11):1668. In the US, FPS 2015;6:356 found lentil yield rose 42% and *Se content of lentils went up 3 times* upon treatment of leaves with Se, indicating even in plants Se may improve health and growth, by fighting oxidative stress and *that Se food levels fluctuate*. The avg US omnivore eats 105 µg Se, reaching

137 µg/L in serum ► Ath 2010;210(2):643-8. However, 137 µg/L may be too high, 90-130 may be ideal, see below. Thyroid has the highest concentration of Se in the body, so when you eat it double the usual suddenly via food or pill, you can get pimples/styes due to hormone activation. Se is part of 2 dozen selenoproteins, *the body* free radical *defense system* and deficiency can lead to male infertility and fast aging, as free radicals destroy all organs and circulatory systems. *Rats fed arsenic and* Se *recovered from arsenic much faster than rats who did not get* Se ► TAP 2013;272(1):256-62. When Se intake exceeds the body's capacity to make selenoproteins (e.g., GPX3), the remaining Se exists as useless proteins which can turn into toxic selenols, selenates that generate O_2^- radicals, leading to endoplasmic reticulum stress and renal necrosis.

Low Se increases death risk 60% for people over 65 ► ACER 2008;20(2):153-8. A study of 133,957 people showed 21% lower mortality in those with 42 µg Se/1,000 cal/day when compared to those with 16 µg/1,000cal/day Se intake ► PHN 2016;19(16):2991-8. Notice how this 105 µg/2,500 calories is higher than NIH 55 RDA, 55 which also can apply to 3,500 calories. Multivitamins often list 70 µg as the 100% of RDA, because they use slightly different RDAs than NIH. Each nutrient may shorten lifespan by 1-4 years when lacking a lot or a little. It adds up to 25 years when one has many deficiencies, explaining why many fail to reach 100. In some diets there is not even 10 µg Se/day, so vitamins are essential in that case. Tables allow us to know better, but Se level in animal foods also fluctuates, they eat plants too. AIM 2008;168(4):404-10 found those with serum Se > 130 ng/ml had 17% lower all-cause mortality (31% lower cancer mortality) than those with Se < 117 ng/ml; all disease rates were lower for Se > 130, except for stroke; those with Se > 150 ng/ml had increased mortality; this association is not necessarily causation though, it can be *reverse causation*, since when we're sick and more likely to die, the antioxidant enzymes are overproduced by the body, Se we eat is more absorbed to be cofactor for GPx; i.e. *sickness caused higher Se, not higher Se sickness*. For instance, when we get amalgams, blood Se increases, due to increased need for GPx to detoxify mercury. Thus, the ideal pill or blood Se is variable, given some weigh 130 lb, others 300, some eat stuff that needs Se to detoxify, others not, etc. Even to reach 150 ng/mL one needs to eat a lot of Se or take xxx µg pill, many *vegans* eat 60. In some cases, having Se higher is better, since otherwise, the damage would be far higher in the short term. The paper says "Se could reduce oxidative stress through antioxidant selenoproteins such as glutathione peroxidase, selenoprotein P, and thioredoxin reductase... recommendations on Se intake are based on optimizing the activity of plasma glutathione peroxidases, which is maximized at serum or plasma Se levels of 70 to 90 ng/mL". Caution is wise, so stay below UL of 400 µg.☺☺☺

Brazil nuts, the richest food source of Se, have 1917 µg Se in 100 g or 27 times the daily needs of 55 µg; before eating many Brazil nuts, check the Brazil nuts section; the same website says the µg of Se in 100 g in decreasing order is: nutritional yeast 140 µg, *chia seeds 55, sunflower seeds*

53, dried shiitake mushrooms 46, whole wheat bread 40, dried garlic powder 38, *quick or instant oats 29*, raw italian brown crimini mushrooms 26, *flaxseeds and cooked shiitake mushrooms 25*, pumpkin seeds 19, white bread 17, raw garlic 14.2, cooked brown rice 9.8, portabella mushrooms 11, white mushrooms 9.3, dry raw buckwheat 8.3 (can be soaked in water, and eaten raw by raw *vegans* unlike other grains), cooked white rice 7.5, walnuts 5, cooked pinto beans 6.2, cooked asparagus 6.1, cooked chickpeas 3.7, *cooked lentils 2.8*, raw broccoli 2.5, raw asparagus 2.3, cooked red kidney beans 1.2, bananas and spinach 1.0, kale 0.9, papaya/red cabbage 0.6, watermelon/strawberry/avocado 0.4, zucchini 0.2, tomato 0. *Avoid kidneys, giblets, livers;* livers have above UL levels of toxins, retinol, copper, Se if eaten in large amounts daily: 100 g got high Se: lamb kidney 219, pork kidney 312, beef kidney 168, chicken giblets 104, chicken liver 88, beef spleen 91, sea lion liver 693. *Se* overload can occur due to overeating high Se *fish*: tuna (sky high mercury) 60, oyster 154, octopus 90, sardine 53, tilapia 54, salmon 40, scallop 27. *Vegans* usually get < the 55 µg RDA without a vitamin. Omnivores can overdose.

Binding heavy metals with GLUTATHIONE peroxidases that use Selenium (Se) as cofactor

The name gluta-thione comes from its chemical formula Glu-Cys-Gly peptide made of glutamine, cysteine and glycine. The Cys thiol group or SH is the important part of glutathione function to scavenge free radicals inside cells, hence it's written as GSH in the reduced form and GSSG in the oxidized form. Thio=sulfur in Greek, a yellow powder, ol is alcohol, so OH/SH, both in group 6, while thione refers to the thiol group being near the ketone, not COOH group, meaning Cys is in between Gly and Glu, not at the edge. If Cys was on the edge, name would be glutathioic, like acetic acid vs acetone. That's why glycine & N-acetyl cysteine pills boost serum GSH. Glutathione peroxidase (GPx) enzymes (8 of them in humans) use Se as cofactor and utilize reduced glutathione (G-SH) to remove toxic free radicals, peroxides, heavy metals (Hg, Cd bind *to* SH *of* glutathione), that's why reduced glutathione (or "glutathione" in less scientific web articles, since in healthy cells most cellular glutathione is reduced glutathione GSH) is called the master antioxidant in all cells. Sulfur (in glutathione) has high affinity for mercury, that's why most mercury in urine is in the form of glutathione-mercury complexes. "In a resting cell, the molar GSH:GSSG ratio exceeds 100:1, while in various models of oxidative stress, this ratio has been demonstrated to decrease to values of 10:1 and even 1:1" ► OL 2012;4(6):1247-53; the lower the GSH:GSSG ratio, the more likely it is to have cancer (1 to 5 common in cancer) or some disease. "The ratio of reduced GSH to oxidized GSH (GSSG) is an indicator of cellular health, with reduced GSH constituting up to 98% of cellular GSH under normal conditions... GSH/GSSG ratio is reduced in neurodegenerative diseases, such as Parkinson's... Alzheimer's disease" ► MMB 2010;648:269-77, which makes sense since toxins (radicals/heavy metals) aren't removed by GSH, increasing brain inflammation and causing neurodegeneration. Oxidized glutathione (GSSG) is reduced back to GSH by glutathione reductase. People with Alzheimer, diabetes, cancer,

tuberculosis have a peculiar smell detected by some people even 12 years before doctors do. Parkinson people's sebum contains 3 stinky chemicals (eicosane, hippuric acid, octadecanal) that are detected via a swab test or by sniffing by hyperosmic (super smell sense) people. ☺☺☺

One study found that nutritional yeast (85% of Se in yeast is SeMet) was more effective than Na_2SeO_3, or sodium selenite (used in some multivitamins), in causing blood Se to rise and glutathione peroxidase (GPx) activity to spike ► JA 1995;16(5):441-7. However, this doesn't mean selenite (Na_2SeO_3) or selenate (Na_2SeO_4, dominant form of Se in shellfish & non cruciferous/allium veggies) used in multivitamins is useless, because Na_2SeO_3 was able to return GPx activity from 4% of normal to 100% in children ► AJCN 1985;41(4):735-47. Many livestock and human studies have found that GPx activity and blood Se is higher when one takes in organic Se (nutritional yeast, garlic or SeMet) compared to selenite or selenate. The inorganic Se (sodium selenate Na_2SeO_4) in some multivitamins is not as bioactive and doesn't reach as deeply into tissues as the organic one from garlic (73% is γ-glutamyl-Se-methyl-L selenocysteine), Brazil nuts or other seeds or pills (SeMet which is incorporated into body protein like methionine is). Selenite can cause oxidative stress faster than organic one; selenite is excreted slower, with peak selenate excretion being 6 times higher (over eons, our body got used to selenate from fish and veggies, while selenite is not found in food); selenite retained by the body was 40%, selenate 32%, *SeMet* 74% ► AJCN 1986;44(5): 659-6; the paper explains that in solution selenite becomes selenate, so if you chew selenite multivitamins with smoothies, it may covert to selenate before ileum absorption begins; most papers say selenate is less toxic if overeaten. As AJCN 2008;87(2):379-84 indicates, the 100 µg Se in Brazil nuts (just 2 nuts a day) increased GPx by 8% in 12 weeks versus placebo (decreased GPx 1%); selenomethionine (SeMet, organic easier form to absorb than Na_2SeO_4) only increased GPx by 3%, but this lower % increase is also because the SeMet group started at GPx 2.91 u/g versus 2.55 for Brazil nuts group; in other studies GPx increases are higher after Se intake when starting at lower levels). SeMet and Brazil nuts increased blood Se by 61% and 64% versus 7% for placebo. NJ 2014;13:62 explains that those with MULTIPLE SCLEROSIS have low GPx levels. A study found MULTIPLE SCLEROSIS patients have 8 times more mercury in the cerebrospinal fluid; this suggests that a possible multiple sclerosis (and all those brain disorders associated with higher mercury levels, like Alzheimer, etc) cause or risk factor is low bioavailable Se intake, and thus low GPx levels, i.e. low ability to trap mercury and get it out of the body. Garlic is hypothesized to be among the best sources of Se for detox. Weaker regulation countries garlic (any produce really), even if organic, can have higher levels of heavy metals, as some tea has 4,002 times more lead. ☺☺☺

►► 12.4.27. VITAMIN A ◄◄

JN 2011;141(10):1847-54 found 34% *of* Americans don't eat *even* the minimum RDA *for vitamin*

A; minimum, because fat soluble *vegan* vitamin A absorption increases 7-15 times with enough fat and ultra low fat meals/diets impair its absorption, as well some genes too; minimum also because from cultivar to cultivar, crop to crop, A can *vary* 40+ fold: "2.65-151.75 mg/kg (lycopene) [listed at 45 mg/kg by USDA], 0.19-9.39 mg/kg (β-carotene)" [this is a form of vitamin A that contributes 90% to the vitamin A µg RAE, listed at 3.03 mg/kg in USDA database]; this means that if β-cryptoxanthin (the other 10% of vitamin A in USDA table) is also very low, when β-carotene is, vitamin A will literally be 40-50 times lower from one watermelon to the other and, if the trend holds for other foods we eat, we get actually 16 times (0.303/0.19) less vitamin A, than we calculated using the AVERAGE USDA values, or 16 times < RDA; we can appreciate then the importance of eating more *vegan* vitamin A to give us a buffer, since there is no UL for *vegan* A; even if only 4 times < for other foods people eat, it would lead to huge errors in daily intake if those foods were the main or only vitamin A sources ► Sensors 2017;17(4):746. USDA values are averages. The RDAs in RAE µg: 0-6 mo 400 (AI), 7-12 mo 500 (AI), 1-3 yrs 300, 4-8 400, 9-13 600, 14+ men 900 women 700, pregnant 770, lactating 1300. The ULs (preformed A from pills or animal foods) in µg: 0-12 mo 600, 1-3 600, 4-8 900, 9-13 1700, 14-18 2800, 19+ 3000. From 6-28-20 to 4-9-21 I ate on average 4,029 µg RAE/day (about 4.48x RDA) from food alone if USDA table average applies, but *because it is provitamin A, it doesn't count towards the UL. The only thing that counts is* µg RAE as retinoids (acetate, retinol, palmitate) we get from pills (usually β-carotene:retinyl acetate about 1:1); multivitamins have 500-3000 µg and I got for decades usually 500 µg RAE from vitamins as preformed A, now 750+ µg. RAE is defined in detail in the next paragraph. Vitamin A is essential for kidneys, cellular communication, immune *system, reproduction,* eyes *(even to prevent* dry/red eyes), *skin*, acne control, heart, *lungs*. It helps prevent Alzheimer, cognitive decline, brain inflammation and lipid oxidation by trapping free radicals. It prevents vision degradation or even blindness (in poorest areas, millions are blind because of vitamin A deficiency, some claim over 2 million die annually due to vitamin A deficiency, more than due to HIV/AIDS. Studies argue if you take high D3 to cure some stuff, you need high A too, to avoid the liver retinoid receptors being all used up by D3 only. 18-54 y old adults received "4500 RE (short for µg RAE) (15000 IU) vitamin A/d for ≤12 y (group A) and compared with a similar group (n = 149) that received 23 RE (75 IU)/d (trace group). Mean total (pill + food) consumption of vitamin A in group A was 5583 RE (18609 IU)/d and that in the trace group was 1053 RE (3511 IU)/d. Patients in group A showed an 8% increase in mean serum retinol concentration at 5 y and an 18% increase at 12 y (years); no retinol value exceeded the upper normal limit (3.49 µmol/L, or 100 µg/dL). Mean serum retinyl esters were elevated ≈1.7-fold at 5 y and remained relatively stable thereafter. No clinical symptoms or signs of liver toxicity attributable to vitamin A excess were detected.☺☺☺ Prolonged daily consumption of <7500 RE (<25000 IU) vitamin A/d can be considered safe (ages 18-54) ► AJCN 1999;69(4):656-63. Vitamin A and D cancel each other as they compete for the same liver receptors, so high

carotene intake from carrots, kale etc was shown to cause D deficiency: "rickets could be induced by the administration of natural sources of carotene".

"Plasma or cerebrospinal fluid concentrations of vitamin A and β-carotene (beta-carotene, precursor of vitamin A) have been reported to be lower in Alzheimer patients, and these vitamins have been clinically shown to slow the progression of dementia. Vitamin A (retinol, retinal and retinoic acid) and β-carotene have been shown in *in vitro* studies to inhibit the formation, extension and destabilizing effects of β-amyloid fibrils" ► GGI 2012;12(2):180-8. This is very important to note, because high carotenoids (β-*carotene*, etc) may not be enough to prevent Alzheimer fully, *we may need high serum retinol too*. β-carotene in fruits/veggies improved cognitive function ► AIM 2007;167(20):2184-90. "*The mean serum concentrations of retinol* (preformed A) and *retinol*-binding protein were *significantly* decreased in patients with acne… *carotenoid* (provitamin A) levels did *not differ between patients and controls.*" ► BJD 1985;113(4):405-13, that's one reason why most acne creams have *retinol*, retinyl palmitate added instead of carotenoid provitamin A. 0.67 million kids under 5 were estimated in 2008 to die of vitamin A deficiency and probably billions have poor eyesight (many in the West too) due to lack of dietary lutein, vitamin A precursors, lycopene, wearing glasses and struggling to see in old age due to lack of awareness of the chemistry of vision. Millions die of Alzheimer; patients have low blood/brain levels of lutein, lycopene, carotenoids and preformed A. Carotenoids trap free radicals, preventing heart disease, cancer, brain disorders. A kid ate only junk food (chicken nuggets mostly) for 7 years, 0 vitamin A, became blind. Parents need give vitamins to kids. A kid ate French fries and potato chips mostly and he became blind due to lack of B_{12}. ☺☺☺

Conversion of carotenoid to retinoid forms of A, Blood Transport & RAE Units

Many eat 90-100% vitamin A as β-*carotene*, α-carotene, β-cryptoxanthin, which form 95+% of vitamin A from plants. The 3 are converted into preformed vitamin A (the one in animal foods) by 2 enzymes: BCO1 & 2, beta carotene oxygenases. *Cytoplasmic* BCO1 was proven to be the main (95%) producer of retinoids from carotenoids, JN 2007;137(11):2346-50, since mice and humans with normal BCO2 and T170M mutation in the BCO1 gene get A deficiency, in vitro 90% enzyme reduction observed when threonine T170 is replaced with methionine, hence T170M. BCO1 or BCMO1 or β,β-carotene-15,15'-oxygenase converts carotenes into retinal: β-*carotene* + O_2 = 2 all-trans-retinal. *Mitochondrial* BCO2 or β-carotene- 9',10'-oxygenase converts a broader range of carotenoids into β-ionone, which is turned into retinoic acid, though its main function seems to avoid over accumulation of carotenoids in mitochondria (almost any antioxidant becomes prooxidant when its level is huge). Genes mean some convert less provitamin A to preformed A. Below I explain why I still take *vegan* preformed A as all-trans retinyl palmitate, not from animals, but chemical synthesis; fish oil softgels contain cholesterol and oxidized fats,

being hard to use 'left over' later like with tablets (half a tablet). Palmitate is more stable than acetate in pills and the *most common form of A storage in our* body (liver uses oleic and linoleic esters too). Over eons, our *molecular machinery* got used to enzymes that cleave retinyl from *palmitate* (bulkier) not the tiny acetate, so it may be that in some people the absorption of vitamin A *palmitate* is higher than vitamin A *acetate*. Since A deficiency can cause dry eyes, it's good to be cautious; in 2021, I did an experiment and stopped taking multivitamins, my only source of preformed vitamin A (acetate); after 8 weeks my liver reserves of vitamin A (preformed) seemed to have depleted, since my hands skin got very dry and scaly (though that could have been due to bad sleep, worst sleep ever those 8 weeks); after a few days of dry hands I ordered separate vitamin A; as soon as I took 750 µg RAE of palmitate as separate vitamin A, the skin became *seemingly* healthier in 3 days (even on the *palm*, though some of the wrinkles still there) for 2 weeks only, more smooth without much cream than even before stopping multivitamin, suggesting that it's possible *palmitate* is superior to the smaller (as a molecule) acetate in the carotene-acetate mix of multivitamins (that didn't even indicate how much is acetate, could be only 10% preformed A). ☺☺☺

While they may be other confounding factors (sleep being # 1, skin repair happens during sleep, better sleep right when I also got palmitate A), this is worth writing about, since we *vegans* assume, wrongly so, that *carotenoids* are easily turned into retinol, but in some people it's not or we use more vitamin A due to stress, etc. Taking A *palmitate* is nice, since it allows us to take less fat (needed for carotenoid absorption), and prevent atherosclerosis, eat less β-carotene from pills that contain it (many vitamin brands do) and get more α-carotene from carrots (10 times more effective at cancer prevention than β-carotene) that we can eat more of without worrying about too much β-carotene, because *pill* β-carotene *can be 9 times more bioavailable, see below, than carrot* β-carotene. RAE = Retinol Activity Equivalent. The plant provitamin A (800 RAE µg*/ 100g in kale, carrot; plants got* β-carotene, α-carotene, β-cryptoxanthin, 50 other carotenoids, *not all 600 plant carotenoids*) becomes all trans retinol (or retinol for short), which is converted to all-trans retinyl esters and stored in the liver (*meat and dairy got the retinol and retinyl palmitate (*20 RAE µg*/100g in 2% fat* milk or cottage cheese*,* 200*+ cheese) premade, so the retinoids (mostly esters in milk, liver, not free retinol) are stored faster as* esters); "Retinol and retinyl esters are the most abundant retinoid forms present in the body" of humans and animals, retinol for transport, retinyl for local storage; 70% of dietary retinol is stored in the liver, the other 30% goes to organs which can store it as ester too with the help of lecithin retinol acyltransferase (LRAT) that transfers acyl (R-C=O) groups to retinol; when needed, retinyl esters hydrolyze to all-trans retinol, which binds to RBP (retinyl binding protein) and is released into blood, where the retinol-RBP complex binds to *transthyretin* (a protein that *trans*ports *thyroxine* and *retin*ol) and is transported to peripheral tissues, like the retina RPE (*retinal*

pigment epithelium) cells where retinol is be stored as ester and later hydrolyzed to remake all trans retinol, the alcohol, which (like other retinoids) is isomerized by enzyme RPE65 to 11-cis-retinol to later make 11-cis-retinal, the aldehyde, which travels via interphotoreceptor space to the rod cells where it binds to opsin protein to form rhodopsin (visual purple) and absorbs photons, making us see via nerve impulse, as explained in the "Mechanism of Vision", then 11-cis becomes all trans-retinal, converts back to all trans retinol and ready to start the vision cycle again. *Retinol, retinal, retinyl esters, retinoic acid are called retinoids or preformed vitamin A and they can interconvert.* Retinal can become retinol, the main blood transport form of vitamin A: retinal + NADPH + H^+ ⇌ retinol + $NADP^+$. Vitamin A can also be transported from the liver to the body as retinyl esters via LDL chylomicrons, especially in early life. Websites list the RAE µg, which is how much retinol the body can make after converting all food carotenoids into retinol.

NIH explains: 12 µg of β-carotene from food means 1 µg of RAE, on average (however, there is a wide range, for some the conversion is higher, for others "27 µg β-carotene from vegetables was equivalent to 1 µg retinol… (females with) 379V and 267S + 379V variant (BOC1) alleles showed a *69% decrease in their ability to convert* β-carotene (provitamin A) and a 240% increase in fasting plasma β-carotene concentration" (after taking high level β-carotene pills with fat) ► AJCN 2010;91(5):1468S-73S. Other SNPs, upstream of BOC1 gene, also can *reduce conversion another 50%* (used 120 mg β-carotene + yogurt fat) ► JN 2012;142(1): 161-5S. These alleles are sometimes present in 30-70% of certain ethnic groups. Such *vegans* may need eat 3 times more A (RDA*3) from *vegan* foods. Males may fare worse, as with ALA to DHA. To be certain one gets enough, in case lipid metabolism and absorption is somehow weak also, eating more than RDA from food as a vegan seems better, especially since centenarians get RDA*3 in some studies, besides eating enough fat at the meal with vegan A; carotenoids are there is no UL for *vegan* A.

Since I eat RDA*7+ from foods, even if I had a genetic lower conversion than average, I'd get more than enough vitamin A without ever eating non-vegan A; *in fact, many eye vitamins (AREDs) and multivitamins (Now Foods) today* no longer include mercury, PCB, dioxins, toxins contaminated animal vitamin A, *but only* provitamin A (the one in *vegan* foods), *since it's much safer; I wrote this to ease the anxiety of many vegans who* read the 0.001% conversion in some rare males of plant ALA into DHA the body needs *(DHA is only in vegan* algal oil *or fish),* but this is not so with vitamin A, however, a tiny % of people may have poor conversion due to thyroid or liver issues, as seen in their blood test; for those vegans who're wanting to make sure they get everything right, just in case conversion may be poor even when blood level seems OK (organ status of nutrients is not always correctly reflected by current tests for serum levels) trying to provide a little ready made vitamin A to ease liver resources to producing other stuff, they could try some vitamin A, but do avoid brands with magnesium stearate like $8/100 tablets of 1.5mg Solgar vegan preformed palmitate vitamin A or retinol 1.5mg/vegan tablet (60, so

90mg total, 18$) both 500 µg RAE/day in a 3rd of a tablet. Stearate is bad. Vegan softgel A is cheap, 3000 RAE every other day is 10000 IU 250 caps/10$, (better NY cooler) or 100 caps 5$ (hot NV oil degrades), soybean oil (far less allergy vs sunflower oil). Most A in softgels is from synthetic sources, not from fish. If it says contains fish, it's bad. Never buy A from fish oil, since they heat treat it during retinyl extraction and other things which destroy part of vitamin A and they refortify that oil with A and they will have impurities of damaged A that block the A absorption and impurities that damage the transport proteins and can wreck body via allergens, fish viruses and heavy metals, PCBs, pesticides, uranium, cesium from ocean, etc. Take fat soluble vitamins A, D, E, K with the highest fat meal. Nutricost, heavily pushed by Amazon, got 9 youtube subscribers vs 10k for NOW Foods, says their multivitamin is 100% *vegan* per email (they never answer any phone and have a phone recording 'person at extension 8710', not the professional type of voice mail, so do check up the company youtube website, phone, email, social media a little before ordering something; see typos on Nutricost multivitamins I spelled as iodine, etc; 3rd party testing, not in house, etc). Nutricost says all vitamin A is acetate. Micro Ingredients multivitamin got µg 450 RAE. NOW Foods Daily Vits got 1425 µg RAE preformed vitamin A, 75 µg β-carotene, but it contains stearic which blocks A absorption, so avoid NOW.

Dangers and symptoms of High Vitamin A

1425 µg could be high for some. High vitamin A can cause blurred vision, skin peeling, vision changes due to hypervitaminosis. 1425 is above the 900 µg RDA for adults and which, *being fat soluble, can accumulate in tissues, potentially leading to intracranial pressure,* headache, *glaucoma or even* blindness *via* high IOP or intraocular pressure. However, IOP can happen due to high BMI or general hypertension. If your BMI is <19, sodium intake < 500 mg, high IOP but no hypertension, try Micro Ingredients multivitamin. However, 20000 µg β-carotene as a pill can cause hemorrhagic stroke in alcohol addicts. Since most studies where β-carotene led to slightly higher (10-20% higher) risk of stroke, etc, used 20-50 mg, the 1 mg in the NOW Daily Vits may not be catastrophic, except perhaps for tiny vessels in the brain that may undergo silent strokes impossible to notice. You can switch to tablet for 2 months to monitor IOP/headaches to see if 1425 µg preformed A causes IOP: glaucoma is deadly, so is high IOP. It depends on blood vitamin A too, so check it out, as low preformed A causes dry eyes. Vegans don't get preformed A from diet, and some studies cured dry eyes or even *blindness* with high preformed A doses. 1425 µg may just be the right level for the lowest IOP you can get. As you know, 1 million things can cause high IOP or dry eyes, not related to preformed A intake, such as % of body fat. You can measure IOP at home today (iCARE HOME tonometer version 1 is 1450$ used, going blind when old is preventable these days), to prevent glaucoma decades before it emerges. When high (11-21 is normal), rest, lower your blood pressure, lower stress levels, do a cold eye compress, chill out. Ideal pressure is more like 16 and people with "normal" 19-20 can also develop glaucoma.

You may want to lose 10-90 lb of fat to lower your baseline blood pressure, as this lowers IOP too. IOP data also tell you when: something is wrong with your brain or *your blood pressure*. Even if you don't have glaucoma yet, it allows you to prevent strokes, since high IOP often can be a marker for brain bleeding due to high intracranial pressure caused by vitamin overdose, etc. For people with family history of glaucoma, IOP checks at home or doctor each year are needed. 10 visits is 145$ times 10, 1450 is the device price, you can use it 50 years. Vision is vital.☺☺☺

5 examples of preformed vitamin A rich multivitamin brands to avoid and why:

1). Deva vegan multivitamins never answers emails or phone messages and adds MgStearate and bad ZnO form for zinc, 100 µg toxic *cyano*cobalamin form of B_{12} to their multivitamins, the bad acetate form of vitamin A, the toxic pyridoxine form of B_3, 2 mg Mn (too much) so avoid them. Deva is the Nevis distributor of US made vitamins. They indicate no % of ingredients when 2 forms of a nutrient, use Utah (Mormon state) minerals for Deva premium. Deva doesn't tell how many µg are β-*carotene* and how much is acetate, it could be mostly β-*carotene*, which is useless, though usually these contain at least 20-40% acetate or palmitate. Deva iodine (I) is kelp, which has arsenic/heavy metals, unlike iodine of other brands, KI (70% more bioavailable).

2). Nutricost (Utah) uses the word vegetarian (never vegan on their labels), since veganism is an unholy word for them, and their vitamins are not vegan, they love inflicting pain on animals with dairy farms, like the Mormon execution of 120 innocent folks. Nutricost multivitamins got MgStearate, 1.15 mg Mn, 60 µg toxic cyano B_{12}, 1260 µg RAE vitamin A acetate (retinyl acetate, the cheaper form requiring more steps to become the retinoic form the skin uses; eyes prefer retinyl palmitate, the natural form our bodies got used to for eons), no toxic ZnO, 1.2 mg Mn. Nutricost for men has the toxic pyridoxine B_3, stearic acid, 1. 1800 µg preformed A/serving (the bad form of vitamin A, acetate, not palmitate), 340 mg mix of estrogen effect sexual arousal herbs, also used for muscle building, perhaps due to Mormon obsession with eye health diminishing sex in their theology. ☺☺*Lovingly tenderly gently kindly*☺☺ research odd herbs they add to these vitamins, since they can cause birth defects, clots. Nutricost B complex causes gas and burps, has 50 mg of toxic pyridoxine. They contaminated it with some bacteria perhaps, or may not even be vegan, only vegetarian, since label says vegetarian not vegan. Vegetarian (dairy) lactic bacteria or other components can contain viruses that cause issues, D_3 may not be vegan,☺☺☺ but made using wool lanolin. Otherwise, they would write vegan on their vitamins.

3). NOW Daily Vits capsules (discard capsule after mixing in smoothie) got no iron (ideal for many), 1425 µg retinyl palmitate (natural, most bioavailable form) vs 900 µg in tablet version, 75 µg β-*carotene*, organic zinc, no toxic cyano B_{12}, (natural methyl B_{12}), but causes gas. Daily Vits caps/tablets contain the bad pyridoxine form of B_3, known to cause paralysis and neuropathy in some people, besides stearic acid bad ingredient. On the other hand, Daily Vits tablets got, like

half vitamins out there, 150 mg $CaCO_3$, which causes gas, burps, 33.6 mL of gas CO_2 upon reaction with stomach HCl (33 burps or gas events). Daily Vits capsules got 20 mg $CaCO_3$, so only 4.5 ml gas. The 9 mg iron in the Daily Vits tablets poses iron overload and cancer/diabetes risk for most men, who have too much iron and end up living shorter because of it. Try a brand that uses Ca citrate, not carbonate, if you get gas, burps, bloating from multivitamins.

4). NOW Adam 90 softgels/19$ has 1200 µg retinyl palmitate vitamin A but has toxic pyridoxine form of B_3. 1 softgel got 80 mg palmetto oil, ≤ 40 mg beeswax, ≤ 50 mg sunflower lecithin (this causes allergies in many people), ≤ 520 mg pumpkin seed oil. This is the best multivitamin from NOW Foods, as it also has 1800 µg β-*carotene*, 15 mg zinc picolinate (the best form perhaps), iodine 225 µg (Adam's apple is thyroid, hence the name, more iodine for thyroid).Adam VITAMINS cause gas for many, especially the softgel ones, so they only work for people who don't get gas from palmetto extract and the phytosterols they use. Palmetto is a diuretic, so it may worsen dry eyes. Pumpkin seed oil fights arterial plaque from DHT. Apparently, even after years of taking finasteride or palmetto, people who do cataract surgery may have some issues if the MD is not aware, due to the intraoperative floppy iris syndrome, so if you plan to do eye surgery, it may be wise to not use the softgel form, but the dry form. There is a lot more interaction and alteration of vitamins in a continuous medium, like liquid, which could over storage time, lead to faster degradation. You can take palmetto separately if you wish, Amazon sells it organic in powder form 100% opaque (move to 100% opaque proper size bottle to avoid air/light contact) free from oils (US made, unlike NOW, mixed with oil, or palmetto from foreign sources, having this white bottle that allows light to oxidize the 320 mg palmetto and 80 mg pumpkin oil or 0.25g olive oil for the palmetto NOW version 2). Read more on proper vitamin storage here. *Dry tablets* Adam capsules have pyridoxine poison. Ntr 2020;12(5):1230 ► D_3 "*tablets and oil drops were equally efficient in raising S-25-OHD concentrations.* Only oil drops caused a reduction in antibiotic consumption in immuno-deficient patients who did not receive immunoglobulin replacement." *To prevent this, eat vitamins with some* walnuts *(crush tablets in the mouth, pour capsules in the smoothie and stir) to provide the fat to increase absorption and proper pathway metabolite creation, because when fat exists,* the pathway changes at all the enzymatic steps, new metabolites form, new forms and events of absorption occur that affect organs *and not plasma levels (plasma level doesn't equal organ* level; *99% of studies refer to* plasma*) that can cause vastly different outcomes. Biochemistry is* very *complex. That A, B_{12}, D goes thru 100s of interactions and cell transport pathways, even at the gut level, it's extremely* complex. We already know that for many nutrients, *the way you eat it determines what plasma form it takes* (equal plasma levels doesn't mean everything is equal for all nutrients) *and some plasma forms deliver better to organs*. Additionally, what we ate with vitamins has after effects that can stop absorption a meal later. The ω3 section explains how to eat softgels, and discard

the softgel, squeeze into smoothie or gradually with 20 spoons of smoothie, to avoid pneumonia from oil into lungs. Softgels in oils are less stable, oils tend to decompose over time, as molecules can mix more, so store in the fridge before and after opening and buy from iherb (180 caps/35$) or some cool storage store (iherb the best in USA), since Amazon warehouse can get hot. Wait for a cool day to ship it too from the nearest iherb warehouse (5 states), 75 or less. NOW also has Adam Amazon tablets, but these contain pyridoxine B_6, which can damage nerves, and niacin, which can cause flushing and issues, besides stearic acid that blocks the absorption of vitamins, croscarmellose that causes issues. The tablet Adam lacks preformed A. Adam softgel has animal gelatin if you swallow it, which can introduce bad bacteria that turn choline into TMAO. Adam *softgels give pimples*☺☺☺*, hives, hard stool, besides* 'trouble breathing' *(allergic reaction to palmetto)* so I had to discard them (Amazon refunded it). Since many papers are fake, their conclusions are the exact opposite of the study findings, so we have 4000 sites about palmetto or some chemical claiming one effect, when in reality, the exact opposite can be true. The simplistic websites often provide 0-5 references, not 50-900 as needed for a mini-research. So, it's better to question any claim, such as 'palmetto helps diminish asthma symptoms', or general statements that only refer to 1% of what may cause asthma, such as lung mucus, etc. Hives are ultra common after eating palmetto per 200 websites, so avoid this Adam if you get any hives *(that repeat, and confirm it's from the palmetto, not from another food you ate)*.

5). NOW female multivitamin softgels called Eve lacks preformed vitamin A, contains toxic pyridoxine, 140 mg $CaCO_3$ to cause gas. The Eve tablets have the same issues. Females need more iron than 6 mg during pregnancy and lactation, add iron supplement if using Eve. Another issue with Adam and Eve is sky high selenium.

Micro Ingredients remains the safest multivitamin brand, with 450 µg RAE vitamin A:

Taking preformed A (450 µg RAE) via Micro Ingredients Multivitamin of low Mn, no iron, no vitamin A acetate (less ideal than palmitate we're used to), zero inactive ingredients, no cyano B12, no ZnO, vegans are worry free with some extra iodine to compliment the multivitamin, since science is not capable today to answer correctly many questions and our bodies got used over eons to get some preformed A too. Since *many use multivitamins, might as well get a brand that has 'vegan' (chemical synthesis)* preformed A *in known amount, not fish oil* preformed A *or vegan with no* preformed A *% written on the label*). Read the paragraphs below on 12:1 orange fruit or butternut squash (possibly 8:1 for *pureed* butternut squash) vs 26:1 carrots/leafy greens, 21:1 *pureed* spinach vs 15:1 *pureed* carrots; when they compute RAE, they assume *vegans* eat same g fat/meal as omnivores do when eating vitamin A (foods with preformed A have fat), which is not always true; *vegans in general eat the least fat being the thinnest group*; 20 g fat at a meal increases absorption of carotenoids 3-15 times in some

studies, (yet AJCN 2007;85(4): 1041-9 found far less fat is needed for *optimal conversion, 2.4 vs 5 or 10 g fat made no difference in serum carotenoids* (provitamin A), but it's better to be safe than sorry, *since fat metabolism varies more than* provitamin A *conversion and what's true in the 2007 omnivore kids may not be in vegan adults; as we age, our body's ability to generate many nutrients declines, so kid studies don't always apply*) so low fat vegans, who eat 20g fat/day or less, may need to do what I do: eat all daily fat (walnuts, etc) with all daily provitamin A smoothie to maximize uptake. Most *vegans* (like me) eat 2000-9000 µg RAE (computed with 12:1) daily from veggies, which even if ratio would be 27:1, would provide enough of the 900 minimum RAE, if we eat nuts with greens/*carrots*; 1 IU from vitamin *retinoid or* β-carotene = 0.3 RAE or 5,000 IU as β-carotene and/or retinol, retinyl acetate = 1,500 µg RAE or 180 g carrot (900 µg RAE = male RDA, 3,000 µg is UL for preformed A; vegan provitamin A has no UL). 100 g of potato has 6 µg of β-carotene or 6/12 or 0.5 µg of RAE. ☺☺☺

BIOAVAILABILITY of Provitamin A from *vegan* foods:

12 µg of β-carotene *can mean much less than* 1 µg of RAE

The UL is 3,000 µg RAE, but it doesn't apply to carrots, as it's β-carotene. 3000 RAE is 3 big carrots of 120 g. BJN 2012;107(9):1350-66 noticed "it was estimated that the bioavailability of carrot-derived β-carotene compared with pure β-carotene (from supplements, where no adverse effects were noticed at even 2,500 µg RAE) was about 11% for raw carrots" (free paper via right widget). So one can safely eat probably 20-50 carrots, which many people do when they juice carrots in the Gerson cancer therapy. If we ingest too much preformed A (retinol, retinal, retinoic acid or retinyl ester, *since pills are usually* provitamin *A 50-100% if vegan vitamins*) from pills or certain livers (not an issue for *vegans*, since preformed A is only in animal foods), we can get sick. Pregnant moms can have birth defect babies (even skin creams with preformed A). Vit A precursors such as β-*carotene* are not damaging if ingested in huge amounts (hard *unless one eats 5-10 pounds of carrots daily*). No paper ever reported any bad side effects from eating too many carotenoids (except face, hands, skin getting an orange tint temporarily). A medium carrot of 100 g contains 8.3 mg β-carotene. AJCN 1995;62(3):598-603 found that 120 mg β-carotene supplement, equivalent to 3.2 lb of carrots (or arguably equivalent to 29 lb of carrots, if taking into account the bioavailability difference in the study above) led to no increase in blood retinol (preformed A, or retinoids), because the body only converts into retinoids what it needs. That's why provitamin A is safer, as we can never overdose and nobody knows the optimal amount of vitamin A for living to 150, as it varies with genome, diet, age, sex, etc. However, too much β-carotene from pills may be harmful, in people with impaired BOC2 enzyme (see above) that converts excess into other stuff and prevents mitochondrial oxidative stress due to carotenoid accumulation ► FASEB 2011;25(3):948-59. Food β-carotene is *safer than pills*, since body won't

absorb it if it has enough (*11% from food* absorbed vs pill, read study at the beginning of paragraph). For *vegans not eating carrots, leafy greens daily and* not taking any A pills (multivitamins have RDA usually, often as β-carotene), *the danger is vitamin A deficiency*. Low vitamin A can occur even in omnivores, since only livers, etc have a lot of vitamin A and they don't get β-carotene from plants as much. We see how many young kids get glasses today. Obviously, if pregnant moms are deficient in vitamin A, lutein, lycopene, DHA, the child will be born with permanent lifelong poor vision, impaired immunity, fertility.☺☺☺

When we add fat to a meal, carotene absorption increases 5-15 times, see Smoothies section. Not all papers agree with the NIH rule of 12 µg β-carotene = 1 µg RAE, but not all papers are high quality either, some relying on 24 hour recall for food eaten outside of the 2 main meals provided that accounted for 83-86% of vitamin A eaten. The next example illustrates how difficult it is to correctly estimate these things: AJCN 1998; 68:1058-67 found 26 µg β-carotene from carrots/spinach (kale, etc) = 1 µg RAE due to β-carotene being crystals in carrots chromoplasts that dissolve slowly or strongly attached to chloroplasts for leafy greens, 12 µg of β-carotene from orange fruits (papaya, mango, pumpkin) = 1 µg RAE, due to β-carotene being oil droplets in chromoplasts that dissolve faster; in this study, anemic kids who were fed about 700 µg RAE/day of carotenoids or vitamin A, had serum β-carotene increase 4.7 *times* from 0.14 µmol/L to 0.66 in the orange fruit group, but only 2 *times*, to 0.28 in carrot/leafy green (mostly spinach) group, *even though the carrot/greens group ate 58%* more β-carotene; while β-cryptoxanthin (more polar than β-carotene, so easier to absorb without eating fat) jumped 9 times from 0.12 to 1.08 in orange fruit group, remaining 0.12 µmol/L in carrot/leafy green group as expected since those fruits had 13 times more β-cryptoxanthin than the veggie group; *serum* lutein increased 2 times from 0.32 to 0.63 in leafy/carrot group, but only 1.2 times from 0.35 to 0.42 in the fruit group, since the veggie group ate 7 times more lutein; *serum* retinol increased 1.33 times (0.69 to 0.92 µmol/L) in the animal foods group, 1.17 times (0.71 to 0.83) in the fruit group, 1.10 times (0.73 to 0.80) in the carrot/leafy greens group. This shows food preformed A increases *serum* preformed A 33% vs 10% for leafy/carrots, confirming that to avoid vitamin A overdose it's better to avoid > 900 RAE µg/day (RDA, some pills got 3000+, > *UL*) preformed A pills (especially if omnivore or vegetarian) and instead eat more fruits/veggies or, *less ideally,* β-carotene *supplements*. In light of this and low serum retinol in acne patients (see above), vegans may need eat more pureed carrots/greens/orange fruit with enough fat to increase 7-15 fold vitamin A absorption as smoothies 1st paragraph shows. The study conclusions may be off, if some kids ate fatty foods (increasing absorption) right before or after those high vitamin A meals (their third meal outside of classroom on normal days and all 3 meals on Sundays/holidays).☺☺

AJCN 2005;82(4):821-8 was a more precise study, using deuterated veggies and vitamin A reference to compare areas under curve in serum at 10 intervals in the 13 hours after the meal

and more days afterwards; they found that 15 µg β-*carotene* from pureed carrots = 1 µg RAE, while from 21 µg β-*carotene* from pureed spinach = 1 µg RAE, due to the fact β-carotene is bound to chromoplasts in carrots and chloroplasts in spinach (and probably other leafy greens such as lettuce, kale); this 21 to 1 was also when having 25% of calories as fat in that *fiberless* 480 cal meal (13 g fat), as fat dramatically increases absorption of provitamin A, vitamin A, E, K, D (fat soluble vitamins) and *fiber* lowers *absorption further*. With fiber, without fat and pureeing, availability decreases even further; the previous paper above paper saw carrots 26:1 since they were not pureed, vs 15:1 pureed. JN 1999;129(12):2170-6 found β-carotene absorption decreased 42%, lutein/lycopene about 40% with more *pectin* (common in fruits/veggies we add to a smoothie that increase fiber of the smoothie beyond that in the food matrix of carrots/kale) *fiber* added. *Lutein and lycopene absorption decreased up to 74% with cellulose and other fibers.* Vitamin E was not much affected. That's why when we eat a salad or smoothies (salad or chewing = lower availability, no *puree*), without fat, our conversion may be 2-3 times lower than 12 to 1, meaning a 150 lb person may need to eat 100 g carrot, 100 g kale, 100 g butternut squash to get RDA of vitamin A. ☺☺☺

Some *centenarians* eat 3 times the RDA of Vegan Vitamin A:

Ntr 2016;8(9):564 examined 3 groups: LRC (103±3 years, from Bama Longevous Region), LRE (87±5 years, Bama) and NLRE (88±4 years from a Non-Longevous Region). "energy, protein, fat and cholesterol intake decreased by 20%, 27%, 38% and 54% respectively for the LRC group, and decreased by 19%, 31%, 42% and 48% respectively for the LRE group, compared with those for the NLRE group. In addition, the intake of vitamin B_6, folic acid (B_9) and magnesium in the LRC group was significantly higher than those in the LRE group". As Table 2 shows, compared to NLRE, centenarians weighed 29% less (42kg vs 59), ate 15% less sodium (1.82 g vs 2.14), 28% more magnesium (355 mg vs 277), 15% less zinc (5.4 vs 6.35mg), 3% more carbohydrates (172.6 vs 167.8), 27% less protein (38.9 vs 53.5g), 20% less calories (1220 vs 1520), 38% less fat (42.2g vs 67.9), 37% more vitamin A (1,308 µg RAE in *93* lb *centenarians* vs 956 for NLRE, when NIH says we need 700 female, 900 male, so *about 3 times more per kg than the NIH guideline for a 150* lb *female, 190* lb *male*), 70% more fiber (23.5 vs 13.8), slightly less vitamin C, E, B_1, B_2, B_3, Ca, P, Se, Mn, Zn, Fe, K, slightly more B_6, Cu, B_9 (quite a bit), cholesterol 111 vs NLRE 239. *Fingernail metal content*: lead and arsenic were half in centenarians vs NLRE *possibly due to antioxidants escorting them out*, *manganese was 8.6 times higher* (intake 13% lower), iron 2.4 times higher (dietary iron 4% lower, 14.6 vs 15.3mg), nickel 2.7 times higher, potassium 3.3 times lower (dietary intake 7% lower, 1.43 vs 1.55g), cobalt 4.3 times higher. The issues with too much *vitamin* A come from animal source preformed A, but the LRC are 100% or almost 100% vegan. Body converts only the vegan provitamin A it needs into vitamin A, so no excess storage is possible, unlike with meat, dairy, fish, high preformed A supplements.

STABILITY OF VITAMIN A

Only 7% *of the added Vitamin A was delivered from a bag (parenteral nutrition) situated close to a source of daylight* ► CN 1982;1(1):63-70. Vitamin A loss proceeded rapidly during infusion, resulting in up to 80% loss in 6 hours, even with light protection of the bag ► CN 2000; 19(5):339-42. *Skim milk in polyethylene containers (like in stores) lost* 57*% of added vitamin A in* 4 hours *of fluorescent light (200 lumens) exposure (page 432)* ► JFP 1990;53(5):430-40. Thus, store A away from light, water, heat. Solid A is more stable: "90% of the retinyl palmitate… (corn flakes) was lost in 8 weeks… (*rice* had) 85% retention of retinyl palmitate" in 6 months ► Ntr 2013;5(8):3257-71; keeping solid A away from light, oxygen helps; that's why many A pills are tablets, the tight packing avoids light/oxygen contact.

☺☺RICHEST COMMON NATURAL SOURCES OF VITAMIN A ☺☺

It is best to avoid taking with > 900 µg/day preformed A or overuse retinoid creams, cosmetics, as they can lead to hypervitaminosis A. Immortality *Nurturing* Agency could email every pregnant woman when they buy a retinoid cream, shampoo, or any food/cosmetic that has teratogenic compounds. I excluded animal livers as they're not *vegan*, sometimes expensive, dangerous to eat because, like all animal foods, contain preformed A and overdose is easy (100 g beef liver = 11 times the female RDA, 100 g turkey liver = 32 times the RDA); overdose leads to health issues in kids/adults and birth defects in offspring. NIH says "Unlike preformed vitamin A, β-carotene is not known to be teratogenic or lead to reproductive toxicity". Provitamin A is not preformed, so it doesn't contribute to UL. *All other foods highest in vitamin A are vegan. The foods below contain* the following µg of RAE/100 g *raw uncooked food (unless otherwise stated):*

1. sweet potato, cooked baked unpeeled 961. The boiled variety has only 787 of vitamin A, a little less than carrots. Sweet potato is from the Convolvulaceae family. Potatoes are alkaloid rich tubers (nightshade or Solanaceae family, like tomato) which have 961 (or 1922 if we use 0.5 µg as real) times less vitamin A than sweet potatoes, or 1 µg (rounded) according to USDA data. We get 0.5 µg RAE in potato by using conversion of β-carotene, i.e. 6 µg β-carotene divided by 12 is 0.5 µg RAE. *Sweet potatoes don't produce solanine, a poison, when exposed to light during growth*. They're much safer to eat. Carrots are easy to buy and eat as a snack. Sweet potatoes need cooking and have 160 times more vitamin A than yams (only 6 µg RAE, since 73 µg β-carotene divided by 12 is 6 µg RAE), many people confuse sweet potatoes with yams.☺☺☺ Boiling (pressure cooker boiling in water is better than boiling for most foods for nutrient retention) is much better than baking for preventing AGE formation due to dry heat, so boil them always. Choose purple ones, got anthocyanins to protect you. Entries in USDA can refer to different subspecies, so boiled may appear 787, even if that same one may give 999 if baked. Health is about avoiding AGEs, not just higher vitamin A by baking them. Microwaving is 2 times

better than baking, but boiling is safer then microwaving of course ► 3 min clip. Baking = death.

2. carrots 835 (canned carrot juice is 956, while dehydrated carrot is 3423)

2.1. *bee pollen* 833 (JAR 2008;47(2):154-61 + USDA entries lab data, 10 mg β-*carotene*). Rsre food, few eat 100 g at once, some samples may have 400 to *5,100*, depending on flowers. 2.2. tomato powder 862 something nobody ever buys, but added it here, just in case some got it.

3. canned pumpkin no salt 778 4. baby carrots 690 5. dehydrated (not dried) apricots 633 6. cooked mustard greens 618 (raw is 151) 7. turnip greens 579 (cooked is 381) 8. baked butternut squash 558 9. butternut squash 532 (boiled squash is 167 only) 10. cooked spinach 524 (raw is 469) 11. lettuce romaine 436 12. pumpkin 426 while boiled is 288 (raw pumpkin 1500 µg lutein, 2145 µg β-cryptoxanthin, canned 0 µg lutein/cryptoxanthin; for most people, who eat little cryptoxanthin and lutein, raw is healthier) 13. parsley 421 (as dried powder spice only 97) 14. cooked collard greens 380 (raw is 251) 15. lettuce green leaf 370 (raw red leaf is 375) 16. cilantro 337 17. swiss chard 306 18. kale 241 (as shown above, carotene in chloroplasts in greens is less bioavailable than that in carrot chromoplasts, so RAE units are not the best units, *as they use the average conversion factor of 12 to 1 for all carotene, without taking into account the source*) 19. thyme 238 20. chinese cabbage (pak choi) 223

Moderate Sources of Vitamin A: 21. boiled hubbard squash 200 22. celtuce 175 23. cantaloupe 169 24. sweet red bell pepper 157 25. canned apricot 146 26. apricot 96 27. persimmon 81

Poor Sources of Vitamin A: canned tomato paste 76 * hubbard squash 68 * pink/red all areas grapefruit 58 (white grapefruit 2, pink/red Florida 13, white Florida 0, white California 0) * purple cabbage 56 * mango 54 * papaya 47 * green onion (scallion) 50 * tomato 42 * tomato sauce 34 * tangerine 34 * broccoli 31 * watermelon 28

Poorest Sources of Vitamin A: * sweet green bell pepper 18 * acorn squash 18 * orange 11 * blackberry 11 * zucchini 11 * summer & Mexican squash 10 * popcorn 10 * canned tomato 9 * spaghetti squash 6 * banana 3 * blueberry 3 * pineapple 3 * oyster mushroom 2 * raspberry 2.

FOODS WITH 0 Vitamin A: * ketchup * white mushroom * onion * bread ☺☺☺

In 100 g animal foods we got: cheddar cheese 263 or 32 *times less than carrot/cal (per calorie)*, boiled egg 149 or 22 *times less than carrot/*cal, cured pork ham 0, cooked salmon 32, whole milk 3.25% fat 46, cured beef strips 0, canned sardines in oil 32 or 136 *times less than carrot/*cal.

Below are several nutrients that can be obtained from food or pills, *but are not usually present in multivitamins* (no AIs/RDAs exist, except for Mn, Cu, Mo, K, choline):

► ► 12.4.28. LYCOPENE $C_{40}H_{56}$, tomato benefits without acne/allergy LTP ◄ ◄

Lycopene (see pic) or ψ,ψ-carotene or an isomer of α and β-carotene (see pic) $C_{40}H_{56}$ as you can see from this pic of the 6 main carotenoids, they're all related and somewhat similar in free radical scavenging powers. Science is about removing natural poisons that shrink our lifespan, such as LTP proteins in tomato, to give us the 4000 year lifespan eterni foods powders. Lycopene is about 5x weaker than astaxanthin, but 100x stronger than vitamin E, 1200 times stronger than vitamin C, per ORAC values. However, it is also 4x cheaper than astaxanthin, at 2.8$/g vs 10$/gram, so same result/$ probably. Lycopene and lutein are about similar in ORAC value (Oxygen Radicals Absorbance Capacity) with lutein which you get free from 100 g kale/day, if you're not into watermelon or tomato products. This can be bought as softgels USA made 120 caps 40 mg Carlyle, sunflower oil, 16.2$ subscribed or 120 caps 30 mg VitaUp tomato extract (extracted via solvents not CO_2, box keeps light away, essential, as it's light/heat-oxygen sensitive, keep in fridge, unlike Carlyle semi-clear bottle no box, 30% off first subscribe, so 15.5$, cancel and redo each order to get 30% off, sourced from China). The safest (lowest temp extraction, least oxidation, least pesticides), seems to be 120 caps 30 mg Jiva organic (most pesticides are not removed during extraction) tomato extract, 40% off on 1st subscribe, so 10$, cancel after receipt to keep $10 each time, sourced from China via hexane (most common used and main one, as it's nonpolar like lycopene) solvent extraction. There is a Baja California Seagate farm in Mexico that claims to be organic and solvent free, low temp, 90 caps of 15 mg for 24$. Solvent extraction usually reaches 40-60°C/100-140F, while supercritical SC-CO_2 process can go to the highly toxic 70-100°C/158-212°F (even if it usually reaches 60-75°C @ 330-420 bar, point at which more extract compounds become toxic, antioxidant activity falls, via heat degradation and lycopene polymerization). Jiva is the cheapest organic or conventional one, 36g lycopene/100$ vs 10% synthetic powder 115$/34g lycopene (no oxidized oils, but more oxidation from air, plus fillers (90% can be corn starch with glyphosate pesticide) to prevent oxidation or clumping into a rock, 90% corn starch and other fillers not shown on Amazon and seen only when you get the bag, and synthetic has 96% purity, other 4% can include toxic chemicals at times). At 300 bar, moving from 80°C to 140°C increases lycopene recovery (due to higher solubility in CO_2) from 4.6% to over 84%. At 140°C, the natural all-E-lycopene turns into Z-isomers (13Z, 9Z), which are more soluble, better absorbed by the body. At 140°C, the Z-isomers (9Z especially) exhibit superior ***peroxyl radical scavenging*** antioxidant activity vs the natural all-E isomer, but high heat creates other toxic compounds in the extract. Z-isomers have greater solubility in solvents, which increases the yield, when solvent are used in the CO_2 extraction to increase profits. CO_2 acts as a selective solvent for the nonpolar tomato oleoresin (carotenoid rich) it extracts. The tomato acne or allergy (causing dry eyes) is caused by histamine and histamine liberators (LTP ► lipid-transfer protein - Sola l 3, an indigestible 9 KDa protein, like gluten, who can retain its allergenicity, as it's not broken down). The longer foods are stored or processed, the more histamine emerges. Because histamine and tomato allergen proteins (like

LTP) are polar, they're less soluble in SC-CO_2, so the extract is far less allergenic than eating tomatoes. However, if polar modifiers or solvents (ethanol) are used to increase the extraction efficiency, the extract has more of these immunoglobulin activating allergens. Thus, if we're on a low histamine/allergy or anti-acne diet, we're are better off with an extract, especially a SC-CO_2 extract void of any polar solvent. IJMS 2026;27(5):2132 has an extensive list of LTP poisons in all plants, just like hormones, antibiotics, allergens in dairy/meats. Science is about living to 4000 by finding what is nutrient and what is poison and making eterni powders of nutrients only. For example, tomatoes only have lycopene that we need, watermelon lycopene + citrulline. So, why would we cultivate all this junk, when we can get superior fibers, carbs, from synthesis? ☺☺☺

Folius is made in India and uses solvent extraction (the bad method), provides Certificate of Analysis for microbes, heavy metals. A dirty Indian city of Vapi (always click on Amazon seller to see address and google maps of company, google street view of the business name listed on Amazon, to evaluate cleanliness of street, evaluate building type) makes some lycopene 60 mg 120 caps, 19$, in India using Indian tomato powder, purity and safety unknown. 60 caps of 100 mg each (has 200 mg reishi seeds too) is 19$, same as 600 pounds of tomatoes that could cost 1200$, though half a cap is safer, given that reishi could cause liver damage at 900 mg per NIH. A 2025 paper claims reishi is safe, but do your research, as it's added to lycopene and other caps all the time. With powders read details on the company site, because some (Prescribed for Life, Bulk Supplements) don't include "synthetic" word on Amazon to deceive people (Prescribed Certificate of Analysis says 3 years old lycopene from India, so contact Amazon seller to give you certificate of analysis before you order any vitamin etc), nor show a pic of the fillers on the back of the bag, always store in the fridge, like all vitamins, in opaque bags that have all air removed, taking out only 5 g at a time you use next 3 weeks in a tiny fridge stored bottle. The tomato extract that used polar organic solvents for extraction contains alkaloids that may create leaks in the gut (tomato allergy), so read tomato section to decide what is best and discontinue if acne emerges due to tomato sourced lycopene, buying synthetic lycopene instead.

To avoid issues from carcinogenic solvents or ethanol, acetone, methanol extracting alkaloids and reacting with something or poisoning you, it's best to *contact the* Amazon seller and ensure the extraction was with low temp 40-60°C SC-CO_2 ONLY (not high temp CO_2) (without the use of ANY polar solvents or even nonpolar hexane, since CO_2 evaporates and leaves no residue, unlike solvents) *that only catches nonpolar substances, such as lycopene*, and leaves out the polar toxic alkaloids like tomatine that give acne and destroy the gut lining. Other methods use pulsed electric fields, ultrasound or even enzymes. Lycopene, the most powerful common *carotenoid* antioxidant, was found in a recent study to be 100 times more effective at scavenging free radicals than vitamin E and *other anti-oxidants* ► JAD 2013;144(1-2):165-70. It lowers risk of dementia, depression, brain inflammation, degeneration caused by free radicals, cancer,

oxidative stress, heart disease, eye problems, skin aging, macular degeneration, diabetes. Lycopene accumulates in the ciliary body and retinal pigment epithelium ► EBM 2002;227 (10):845-51. The ciliary body, iris & choroid form the uvea, the vascular middle layer of the 3 eye layers, which provides oxygen to the eyes. Lycopene protects eye lens epithelial cells from galactose induced damage in vitro ► BJN 2002;88(4):347-54, preventing diabetic cataracts in human cells as in rats. Galactose is reduced to galactitol which accumulates in the lens causing cataracts that need surgery. Watermelon has lycopene, but sugars can cause oxidative stress and arterial plaque via facial, eyelid (styes) and arterial pimples (arteries are skin that develops pimples (coronary artery pic, horrible artery acne) too due to the same P. Acnes bacteria, that little pimple can become death: see pic of carotid artery plaque).

►►► RICHEST COMMON NATURAL SOURCES OF LYCOPENE ◄◄◄

The 3 richest natural sources of lycopene contain in 100 g (raw, uncooked) the following amounts of lycopene in µg or mcg (1 mcg = 1 µg = a millionth of a gram or 1 microgram):

1. Watermelon 4532 µg 2. Tomatoes 2573 µg 3. Pink Grapefruit 1419 µg

Carrots 1 µg (ultra low, for comparison only) ☺☺☺. Some varieties of guavas, rarely available in many areas year round, contain 5203 µg in 100 g, about same as watermelon. However, when available, guavas are 6-15 times more expensive than watermelon.

ALZHEIMER:

Lycopene, the most powerful carotenoid anti-oxidant (100 times more effective at fighting free radicals than vitamin E in vitro or in a test tube), was very effective in lowering depression (probably because oxidative stress causes depression via free radicals damaging the brain) ► JAD 2013;144(1-2):165-70. Lycopene protects against Alzheimer by preventing amyloid induced mitochondrial oxidative stress ► NR 2016;41(6):1354-64. Lycopene is effective against Alzheimer β-amyloid plaque ► NL 2011;505(3):286-90. High blood levels of lycopene lower the risk of dying from Alzheimer. Oxidative stress is implicated in the pathogenesis of Alzheimer's disease. Antioxidant-rich foods reduce the risk of Alzheimer by inhibiting oxidative stress. ► DGCD 2014;37(3-4):246-56. Lycopene helps regain memories lost due to Alzheimer-like conditions ► JAD 2017;57(2):475-482. Lycopene blood levels are low in people with Alzheimer. Lycopene prevents oxidative damage, protects neurons in several Alzheimer models ► NL 2015;608:28-33.

CANCER

Lycopene prevents pancreatic cancer ► JN 2005;135(3):592-7, prostate cancer ► Medic 2015;94 (33):e1260, JNCI 2014;106(2):djt430, IJC 2005;113(6):1010-4, lung cancer ► Cancer 2011;3(2): 2333-57, breast cancer ► APJCN 2007;16 Sup 1:437-42.

HEART DISEASE

Lycopene promotes heart health ► MNFR 2012;56(2):296-303. Lycopene prevents cardiac events, lowers cardiac mortality ► EJCN 2013;12(4):377-84. Lycopene taken in doses ≥25mg daily (1,000 g of tomatoes at least, or 550 g watermelon) is effective in reducing LDL cholesterol by about 10% which is comparable to the effect of low doses of statins in patients with slightly elevated cholesterol levels ► Matur 2011;68(4):299-310. Watermelon Extract Reduces Total and LDL Cholesterol ► JACN 2016;35(6):514-520. Watermelon modulates oxidative damage ► BRI 2014:512834. Watermelon lycopene is effective in reducing the extent of cancer insurgence, cardiovascular disorders, diabetes and macular diseases. ► EJ 2014;13:650-60. Lycopene in watermelon promote skin & blood vessel health ► Ntr 2010;2(8):903-28. Rats given high cholesterol diet and tomatoes got 47% lower cholesterol than rats given just high cholesterol diet ► DMSO 2013;6:263-73. Lycopene prevents heart disease ► EBM 2002;227(10):908-13. ☺☺

KIDNEY DISEASE

Lycopene was protective for the kidney cells against streptozotocin-induced kidney injury in a mouse model ► FF 2015;6(4):1150-6.

FOOD VERSUS PILL

Traditionalists claim that it's better to get lycopene from foods than from supplements, due to synergistic effects that make foods more effective (dozens or hundreds of phytochemicals). One study found lycopene in pill form was actually harmful due to the high level of serum lycopene ► FRR 1999;30(2):141-51. Most people will get more than enough lycopene via tomatoes, grapefruit or watermelon. For details on this food vs pill lycopene issue, see youtu.be..gI. This stuff isn't always true for every phytonutrient, especially when deficient, in those cases a pill could be life-saving. Yellow tomatoes, void of lycopene, were less effective than red tomatoes in preventing cancer. Tomatoes have other far less known carotenoids besides lycopene ($C_{40}H_{56}$), like phytoene (15-cis-phytoene, $C_{40}H_{64}$ which has 8 extra hydrogens, 4 fewer double bonds), phytofluene (15-cis-phytofluene, $C_{40}H_{62}$, 3 fewer double bonds than lycopene, so 6 extra hydrogens compared to lycopene). Phytoene and phytofluene are present in most fruits and veggies and they accumulate in human organs such as skin, prostate, liver, lung, breast, colon. Phytoene is the first intermediate in the plant carotenoid biosynthesis, phytofluene being the second, after desaturation of $C_{40}H_{64}$ phytoene to $C_{40}H_{62}$ phytofluene (creation of a double bond). In some studies, the combo phytoene, phytofluene, lycopene was more effective than lycopene alone in preventing cancer, so when eating a tomato, watermelon, etc one gets more than in a lycopene pill (very few take lycopene pills though). ☺☺☺

► ► 12.4.29. LUTEIN and its *isomer* zeaxanthin, both $C_{40}H_{56}O_2$ ◄ ◄

Lutein (see pic) $C_{40}H_{56}O_2$ is α-carotene (see pic) $C_{40}H_{56}$ with H replaced by -OH on the hexadiene rings, so dihydroxy-α-carotene. Zeaxanthin (see pic) is the lutein isomer (double bond shifts one carbon) and β-carotene (see pic) with H replaced by -OH on the hexadiene rings, so dihydroxy-β-carotene. All 6 carotenoids in 1 pic helps you understand. Those eating *the least* lutein had 56% higher mortality compared to those eating *the most* ► IJE 2001;30(1):136-43. "Among 25 dietary carotenoids and nine metabolites routinely found in human serum, *mainly* (3R,3'R,6'R)-lutein, (3R,3'R)-zeaxanthin, lycopene, and their metabolites were detected in ocular tissues" ► EBM 2002;227(10):845-51. Taking *20 mg pills on top of kale*, green smoothies, per JAMAO 2016;134(12):1445-8, led to crystals in the fovea part of the macula, "crystals, reminiscent of canthaxanthin (another one to be avoided) retinopathy". Deva Premium has *1 mg lutein or 20 times more lutein than the regular Deva multivitamin with 0.05 mg, plus* bad MgStearate; avoiding lutein pills or high lutein multivitamins is safer, since body often shrinks absorption of food lutein when high and absorbs it much slower, while pills often rise blood lutein level suddenly (same for calcium pills that cause plaque crystals to form) causing crystal formation. The internet has amazing pictures showing how lutein and zeaxanthin protect the eye from blue light and AMD (macular degeneration). Those eating the least lutein had 56% higher mortality compared to those eating the most ► Lutein, (name from Latin luteus, meaning yellow) and its isomer zeaxanthin (*double bond shifted at the next C-C bond, towards the OH group*) are 2 yellow carotenoids that make 46% (lutein 34%, zeaxanthin 12%) of brain carotenoids and they prevent cognitive decline, dementia, telepathy ability decline, memory loss. AJCN 2012;96(5):1161S-5S found that adding 12 mg/day of lutein to the diet increased verbal fluency scores and that *people with cognitive decline and dementia have much lower lutein in the brain; examining* Examining centenarians, researchers also found that the more lutein is present in the eye and brain (they are related), the better is the cognitive behavior of centenarians. One can get 12 mg lutein by eating 564 g of zucchini, 4.7 kg (10 pounds) of carrots or 30 g of kale. See more on lutein and zeaxanthin effects on visual system development early in life ► CO 2007;1(1):25-35. *Lutein and zeaxanthin are the 2 main carotenoids in the human eye macula, so dietary intake is* vital for eye health. *They* prevent blue light from *damaging the eye.* The macula (5 mm diameter, gives us HD color vision, at the back of retina) is known to contain 3 yellow carotenoids, 3R,3'R-zeaxanthin, 3R,3'S(meso)-zeaxanthin, (3R,3'R,6'R)-lutein. AMD (macula degeneration) prevalence will "increase to 288 million by the year 2040" which, in late stage, makes one see faces blurry like in this picture, so one can't read/drive. 12% of those over 80 have it, so as we live longer, we need to understand lutein better, so we can see. AMD is called Alzheimer of the eye, due to B-amyloid protein and other proteins that start depositing in the macula in the initial stages. The same nutrients that prevent Alzheimer, atherosclerosis, prevent AMD – so we want fewest AGEs, and less inflammation. ☺☺☺

JAR 2013:951786 study of 78 octogenarians, 220 centenarians and 47 dead centenarians (took brain tissue samples) found that higher blood β-carotene, lutein, zeaxanthin was related to better cognition. ☺☺☺ In the octogenarians, serum lutein concentrations were significantly related to measures of global cognition, lower dementia severity, and executive function. In the centenarians, higher blood concentrations of lutein, zeaxanthin, β-carotene, and α-tocopherol were significantly related to lower dementia severity (but not to global cognition). *Brain carotenoids were significantly related to their concentrations in blood.* In the brain, they found the following 5 carotenoids: lutein 34% of the total carotenoids, zeaxanthin 12%, cryptoxanthin 26%, β-carotene 20%, lycopene 8%, α-carotene 0. In the blood, they found 6 carotenoids with their percentage of the total carotenoids as follows: β-carotene 37%, lutein 21%, cryptoxanthin 18%, lycopene 13%, α-carotene 6%, zeaxanthin 5%. Lutein makes up 59% of brain carotenoids in infants, lycopene 20%, β-carotene 20%. Pre-term infants had lower lutein than term infants. Many scientists believe lutein is involved in the neural development of infants. It might even increase IQ compared to those lacking it from breastmilk or diet ► JPGN 2014;59(5):659-65. People (ages 25 to 45) with higher levels of lutein in their brain had less cognitive decline ► FAN 2017;9:183. A study of 108 old people (77.6 ± 2.7 years) in AA 2014;43(2):271-5 found that more lutein in the brain meant better cognitive function. NNS 2008;11(2):75-83 interventional study found that giving 12 mg (the equivalent of 30 g of kale) a day to 49 women (between ages 60-80) for 4 months improved their verbal fluency. Adding 800 mg DHA to the lutein also significantly improved memory scores and rate of learning. A study of 4,453 people 50+ years old, NA 2013; 34(11):2449-56, found that lower lutein-zeaxanthin is associated with poorer performance on the mini-mental state examination, on the Montreal cognitive assessment, poorer prospective memory, longer time to complete a trail-making task, slower and more variable reaction times on a choice reaction time task. β-cryptoxanthin was significantly lower than normal in the blood of Alzheimer patients. The same lower values for Alzheimer patients were observed for the blood level of other carotenoids (β-carotene, zeaxanthin, lycopene, α-carotene), vitamin A, C, E ► ARN 2002;59(5):794-8. A study of 13,388 women found that total vegetable intake was significantly associated with less decline, those eating the most leafy greens and cruciferous veggies were better at cognition than those eating the least ► ANE 2005;57(5):713-20. ☺☺☺

Why do *vegans* have less macular degeneration? Because they eat more greens, veggies that are loaded with lutein, a carotenoid. Lutein is the eye pigment that prevents blue light from damaging the eye. Milk, cheese, meat have no *carotenoids* and no lutein. Eggs have a tiny bit of lutein, 120 times less than kale, 6 times less than zucchini. You may notice a pattern in all centenarians and old people, those who're eating more lutein-rich foods seem to have much better vision than the heavy dairy and meat eaters who don't eat veggies or fruits much. It seems lutein and vitamin A, β-carotene, etc in veggies are key to vision as we age. ☺☺ Lutein-

zeaxanthin in kale is 6260 µg, while lutein-zeaxanthin in eggs is only 331 µg. "Consumption of fruits and vegetables, especially spinach and collard greens (rich in lutein), was associated with a lower risk of age-related ocular macular degeneration" ► QJM 1999;92(9):531-44. The more fruits and veggies people ate, the *less* macular *degeneration* ► OE 2010; 17(1):58-65.

☺☺►►► RICHEST COMMON NATURAL SOURCES OF LUTEIN+ZEAXANTHIN ◄◄◄ ☺☺

USDA says in 100 g of food we get the following µg amounts of lutein+zeaxanthin:

1. raw turnip green 12,824 (12800 USDA rounding to 3 significant figures), cooked turnip 8440

2. raw spinach 12,197 (12200 new USDA rounding to 3 sig fig, see here), cooked spinach 11300

3. raw swiss chard 11000, cooked is 11000 too 4. cooked mustard greens 10400 raw 3730

5. raw kale 6260 cooked kale 4980 6. cooked collard greens 6200 raw collard 4320

7. raw romaine lettuce 2,312 8. raw zucchini 2,125

9. raw green leaf lettuce 1,730 (new USDA link removed most data) raw red leaf lettuce 1,724

10. raw pumpkin 1,500 canned pumpkin 0 11. raw broccoli 1,403 12. raw green onions 1,137

(rounded to 1140 now) 13. raw cilantro 865 14. raw persimmon 834 15. raw asparagus 710

Poor sources of lutein: carrots 256, tomatoes 123, watermelon 8, pink grapefruit 5, most fruits 0

Lutein-zeaxanthin in kale is 25 times higher than in (25x >) carrot. Some think raw carrot is enough for eyes/brain, but look at the lutein rich raw veggies for smoothies: turnip greens 50x > carrot, spinach 48x > carrot, mustard green 41x > carrot, collard 24x > carrot, romaine lettuce 9x > carrot, zukini 8x > carrot, green/red leafy lettuce 7x > carrot, broccoli 6x > carrot.☺☺☺

►► 12.4.30. CHOLINE (3% of lecithin) ◄◄

Choline is part of neurotransmitter acetylcholine that helps memories (skills or names, etc) form. Without choline, we forget everything, process info and learn more slowly, as neurons cannot communicate "memories" for recall. Via long-term potentiation, when we learn new things, acetylcholine also tells the involved neurons to physically alter their structures, strengthen their connection so that brains lock the new skill into place, making it much easier to recall it years later. The AIs (not enough data for RDAs) in mg: 0-6 mo 125, 7-12 mo 150, 1-3 yrs 200, 4-8 250, 9-13 375, 14-18 men 550 women 400, 19+ men 550 women 425, pregnant 450, lactating 550. The ULs (pill+food) in mg: 0-12 mo unknown, 1-8 1000, 9-13 2000, 14-18 3000, 19+ 3500. "90% of the US population is not meeting the choline intake recommendations of 550 ..men & 425" ► Ntr 2019;11(10):2548. Lentils got 95 mg/100 g, so if you eat 450 g raw lentils (after you cook), you

get 428 mg, ground chicken 59/100g. Contrary to claims by omnivores, you can get plenty of choline from legumes and grains and can always add extra, if you eat 1 lb raw lentils daily, you get 430 mg from lentils alone. Plasma choline rose 35% after 600 mg choline bitartrate, which is a very bioavailable choline source, almost as good as eggs, yet much faster than eggs (when eyes are dry, taken some choline, you'll see a difference, eggs are harder to eat and carry with you). In chicken, soybean choline was found to be 100% bioavailable. "Plasma choline was 45% higher (in pregnant vs nonpregnant)… (and varies) over 5-fold in infants at birth" depending on mom's choline, which is 2-3 times lower than fetus: 15.3 mM when 36.4 in fetus ► JN 2007;137(12): 2641-6; this 5 fold variation has catastrophic consequences for eye and brain development when ultra low. Bitartrate choline is absorbed faster than egg choline. Lack of choline can cause dry eyes and is associated with anxiety disorders (could be causation, not just correlation). I got 450-750mg choline/day *(750 was only half a year in 2009 or so and 2013-2015 when I ate 500 g black beans daily)* on average from food alone; from *01-01 to 7-22*-2021 got 561 mg/day (more now since I eat more lentils), 420 mg *6-28 to 12-31*-2020 due to fewer lentils. From 2-13-2018 to 7-22-2021, (started pills only in 2018), average 328 mg choline/day from 797 mg choline bitartrate, since choline is not present in multivitamins. The NIH says average US adult eats 400 mg. I eat 450 food + 328 pill =728 min < 3500 UL. Choline is $(CH_3)_3N^{(+)}$-CH_2-CH_2-OH, Bitartrate is HOOC-(R)CHOH-(R)CHOH-COO^-, choline bitartrate is a salt; bitartrate is the anion of 1,4-dicarboxylic acid of erythritol, 20$/lb, lasts years. Choline is important during pregnancy especially (hence some take 100-900 mg daily), lower in some *vegan* diets.

However, too much choline *may shorten lifespan due to promoting* atherosclerosis via TMAO. Some papers found vegans produce negligible TMAO, others found they produced about the same, the mystery may be related to how long they were vegans, if they cheated by eating dairy once a week and claiming to be vegan, or if the appendix (that holds all our microbiome in case of eating plants (mints, etc) that kill most essential bacteria for vitamin synthesis, etc) is still present to force omnivore bacteria into the system, for a few months or years of being vegan. The "useless" appendix is probably there to protect the microbiome in case of eating highly antibacterial herbs. Thus it's recommended to eat choline as phosphatidylcholine PC, since choline bitartrate raises serum TMAO in omnivores 3 fold, while PC doesn't because it is absorbed directly in the intestine entirely via bile salts and the lymphatic system. If we overeat PC, we get excess PC go to colon to form TMAO. Choline salts (choline bitartrate or chloride) pills are absorbed usually in the small intestine, but if a large bitartrate dose arrives at once, excess unabsorbed choline reaches the colon where gut bacteria convert it into TMA, which the liver turns into TMAO. α-GPC, another choline supplement, raises TMAO because it hydrolyzes in a way that can leave free choline for gut microbes to convert to TMA, but it was popular for dementia before citicoline emerged as a safer dementia alternative. Both α-GPC and citicoline

were prescription drugs for dementia 1980s-2025, but after 2010, citicoline was deemed as safer for long-term use, as no TMAO is produced to damage brain arteries. The cheapest citicoline costs 25$/60g on Walmart & 37$/60g on Amazon. It tastes a little like vit C, but far less sour than choline bitartrate, far easier to eat with a smoothie once decapsulated. Citicoline has 4 benefits:

1). Citicoline splits into cytidine and choline during small intestine absorption, bypassing microbial colon fermentation, avoiding TMAO spikes. Cytidine converts to uridine, which helps rebuild the structural membranes of damaged optic nerve axons, preventing dry eyes, brain aging and glaucoma or retinal diseases. Uridine is a DNA base used to build phosphatidylcholine and sphingomyelin, the two key components of nerve membranes that prevent neuron death. The myelin cover is key to neuron survival, and preventing multiple sclerosis.
2). When a retina nerve ending is damaged, it needs to make structural proteins to heal. Because uridine is part of RNA that makes proteins, damaged retinas need high uridine uptake. High serum uridine (from citicoline pills) allows the retinal ganglion cell nucleus to use RNA to smoothly transcribe the survival and growth genes necessary to repair its extending nerve fibers.
3). Uridine protects mitochondria, preserves cardiolipin, which is 20% of the inner mitochondrial membrane lipids. Cells starve to death if mitochondria die, so uridine helps keep the body alive.
4). Uridine downregulates high glutamate, which can overexcite neurons leading to their death. Via neuron effects, citicoline helps memory loss, retina and neurodegenerative conditions. ☺

For eyes and brain citicoline is best, while for liver, PC is best as 50% of liver cell membranes phospholipids are PC and PC helps a stressed liver to recover. If you get 500 mg choline from legumes etc, you may just need citicoline to prevent brain, ocular dryness or aging, after age 30-40. Omnivores who eat too much choline can damage their arteries via TMAO production, increasing cardiovascular disease mortality 26% ► AJCN 2016;104(1):173-80,☺☺☺ due to different microbiome than *vegans*. Some human/mice studies found no higher mortality due to high choline intake possibly due to antioxidant foods eaten that offset TMAO induced endothelial damage, thru their endothelial protective effects. There are no studies to see choline effect on mortality at high doses in *vegans*, though if no TMAO is generated, then choline is perhaps safe in larger doses. Citicoline, ubiquitous in organs, brain, an intermediate in the synthesis of phosphatidylcholine in cell membranes, is taken to boost cognition, prevent glaucoma [IJMS 2015;16(12):28401-17], eye aging. Citicoline may not be metabolized to TMAO ► TJNP 2016;6(4):242-9; "choline in citicoline is less prone to conversion to... TMAO" ► Ntr 2019;11(7):1569, though they made many claims like that before (about choline derivatives or other chemicals), only to be disproven by newer bigger studies, so do search PubMed for the latest research on claims made by youtubes. ☺☺☺

Babies are born with 3 times more choline than moms in their blood, and they really need it,

since 1 million new neuron connections per day happen in babies. Hence many papers below suggest 900 mg choline in pill form during pregnancy and less in lactation. I don't think it's a good idea to eat lecithin (a source of choline, popular with some people), due to processing and storage making the lipid part oxidize and give you atherosclerosis, but some people already use lecithin as if it's safe, so below is the stuff nobody talks about on their 2 line "internet articles" and 80 page ebooks on nutrition. *Soy lecithin, ubiquitous in many processed foods, is even more processed, so it has more arterial damage stuff.* If you have pimples *(common when stressed or "quality* deep sleep*" (restorative body repair) deprived)* I would avoid it like the plague; plus it causes gas. The 2 brands I tried cause acne breakouts, but Amazon does refund if you get sick from any of these due to toxic stuff or bioweapons (viruses, bacteria) in them, allergy, etc. I don't trust these brands much, as they're not answering emails about processing; *the food industry has no regulation for minimizing* AGEs, *toxic proteins, oxidation of lipids,* it's a complete jungle: they just treat stuff with chemicals to remove some fiber, etc, but damage the good stuff. We need really fast chemical synthesis, *to make it from scratch; proteins, lecithin, etc 100 times better than nature created.* 5 million in police, private security, spies, and military torture people to defend an inefficient redundant wasteful capitalism (instead of efficient immortalist capitalism), while we have no real food science: everyone flips burgers like a chimp, oxidizing lipids and proteins in dry heat, killing billions early; it's way healthier and faster to pressure cook at home. Where are the food chemists? Everyone *is a security guard (when with* centralized science and ethics education, peaceful music *and* culture *we need 100 times less of that) or burger flipper, how backward.* $26/lb Sunflower lecithin by micro is, the worse of the 2 brands, like all sunflower lecithin, beige in color, like sunflower seeds made into a powder with coffee grinder and they need to be eaten after mixing in a big smoothie, to avoid inhalation or the liquefied lecithin sipping into lungs *(after saliva melts it).* If you really have courage, you could buy lecithin during winter from iherb.com (5 warehouses) or places that keeps it in cool storage 75°F, not 89 in the summer. Just like olive or sunflower oil oleic acid oxidizes, so can the phosphatidyl choline derivative of oleic oxidize (most phospholipids are oleic in sunflower lecithin, others are saturated fatty acids, so very stable, since oleic has 1 double bond). ☺☺☺

Lecithin dissolves ultra fast in water too with some stirring, so some vegans use it instead of egg yolks or vegan butter for various 0 HEAT, 0 AGEs oatmeal *(gluten free) cookies with vegan nut milk or carrot-watermelon juice or smoothie from a* food processor *for eye health,* mixed with powder lecithin and rolled oats (oats are used to control blood sugar, an issue to many people, add some sugar for extra sweet taste or whole blueberry if you give them away to guests next hour, and you made one of the world's healthiest vegan cookies. This is a way to lure people (who don't get gas or allergy from sunflower lecithin) from today's ultra toxic cookies sold in the "genocide thru dry heat restaurants and supermarkets" products *of the* 'Immortality *for* All (for

None☺☺☺ currently) USA') etc that don't have too many (some heat from factory lecithin processing perhaps, but not home heat) *heat generated* AGEs; eat fresh cookies, made 2 hours before, to prevent lecithin oxidation due to light. For best health though, avoid cookies like the plague. You can also make these choline smoothies by placing bitartrate in the carrot-watermelon-rolled oats-blueberry mix and help your eyes, in case of allergy to soy or sunflower lecithin; if no smoothie around, at the very least, mix lecithin with water and then eat a lot of other foods so it doesn't linger on your throat; 1 egg yolk has about 1 g lecithin, so it's good to maybe not go above 4 g/day (2 small eggs = *200 mg choline = 500 g of cooked lentils, so we* don't *really need* eggs or soy or sunflower lecithin; can eat greens, walnuts, seeds, 900 g lentils daily, to get 550 mg RDA*; cooked soybeans got 21%* extra choline *(lecithin) vs lentils, but they provide too much* ω6 *fat and cholesterol for eggs*); soy lecithin has 33% phosphatidylcholine, while egg lecithin 72%; since we talk about cognition, it's important to eat sphingomyelin: TJON 1999; 129(7):1239-50 explains per 100g soy has 26 times, 26x, more sphingomyelin than 2% fat milk, 13x > cauliflower (but soy has 18 times more calories than cauliflower, *so cruciferous veggies can have 40% more* sphingomyelin *per calorie than eggs and soy*), 7% more than eggs, 67x > bell peppers, 89x > cucumbers, so do eat veggies like peppers and cucumbers daily, as they contain huge amounts of sphingomyelin without the ω6 and fat in soy, and you could get that way more of it than even vegetarians who eat few cucumbers, peppers. Vegans eating many veggies will get as much of it as vegetarians. It's good to eat only what our body is used to over eons, *vegan* sources of the same exact chemical compounds to avoid heart attack due to egg cholesterol. ☺

There are many lecithin brands: $10/lb Lucky Vitamin one didn't cause as much gas *(but still smelly gas,* vegan gas is odorless *unless you eat processed foods like vegan protein powders or lecithin, abnormal and stool is made very solid when eating sunflower lecithin, so not useful, as stool transit time increase leads to issues of toxic buildup in the blood)*, it's lighter in color (typical beige protein powder color) and the allergy that the Micro brand did cause was lower, due to Micro including a lot more protein that causes allergies. However, when I ate it once a day, 3 days in a row, I got huge pimples, so I trashed it after eating about 200 g; if eating only once a week, I got no pimples, since body has time to detoxify. Sunflower seeds are known to cause acne IRCMJ 2015;17(9):e16544; I avoid them, but I hoped the lecithin would not; if you eat them, discard the kernel of course, to avoid damage to your digestive tract. Generally, sunflower seeds and Micro like lecithin with tons of protein/fiber residue can cause gas, allergy in 24% of people, shortness of breath *(like algal ω3 oil with sunflower oil added),* especially if eaten with small meals without proper mixing with watery stuff to make the powder 100% dissolve in water, juice, etc; healthier and far less processed *(meaning less damage to those lipids and your arteries, so maybe avoid soy lecithin)* than soy lecithin, sunflower is non-GMO (meaning it has 10 times less pesticides, since GMO means more resistant to glyphosate and other herbicides that

give cancer); contains about 200 mg choline in a 7 g spoon sample, it's popular, so is soy lecithin, these things may be helpful for those who don't eat choline bitartrate, since they provide phosphate, though vegans who eat legumes get tons of phosphate. Normally, lecithin is only 0.3% of sunflower seeds, so taking a lot can have detrimental effects on the composition of the fatty acid groups of phospholipids in the body; people write 2-3 page articles on how amazing lecithin is, but there are always 300 problems mentioned in 300 papers that they never read about; biochemistry is so complex; if we have acne, phospholipids often lack linoleic acid; each change in fatty acids causes a change in every organ; as long as you trust the so called "natural cold pressed" method of sunflower lecithin extraction and that the stuff contains what the label claims, you can try it, the thing is they make wild statements about cold pressed, but still may have used some solvent, how can you check?, they provide no Certificate of Analysis and FDA regulates nothing in the supplements industry, for the most part: pure jungle.

DHA binds to choline to help create neuron membranes, so we need DHA, choline, B vitamins to make these as adults. Lecithin needs to be stored in a dark cool place, like oils, since the unsaturated fat degrades. If you eat 400 mg choline as 972 mg bitartrate, it's a lot cheaper, choline goes into blood way faster to help neuron building, but lecithin has some extra nutrients like phosphatidylinositol, though many B vitamins have inositol too; lecithin can help lower fatigue; it can also lower cholesterol in those with high LDL/TC Chol 2010:824813, diminish acne, dry eye, heal the cornea, eyelid skin, etc; the only issue is the oxidation during drying to get the gum and cold pressing the sunflower gum, plus store shelf heat/light oxidation; if you eat walnuts, you get the real fat and body can build what it needs, all diglycerides for phosphatidylcholine. Why phosphatidyl? Because of glycerin 3 OH groups are esterified with a phosphate group attached to choline (or other moiety) and 2 fatty acids, diglyceride, so dyl for 2 (di) acyl groups; as you recall from school, acyl group is R-(C=O)-. Easy to recall. Fish and algal oil is usually triglycerides. 100 g of bee pollen may only have about 200 mg choline and 100 g of bee pollen is not possible to eat daily; many get gas/acne at just 10 g pollen. It doesn't seem good to use softgels with olive oil and lecithin, since oil can oxidize and walnuts, etc are healthier than refined olive oil with so little ω3. Please avoid expired lecithin, the pollen section explains why. Choline bitartrate is 100% saturated, so it has many times less oxidation of tartrate that is not a big deal, while lecithin when oxidized (the fatty acid double bonds) will cause tremendous damage and arterial plaque, so gently buy the least oxidized lecithin. Tartrate is stable.☺☺☺

A large egg got 126 mg choline/100g, meats 90 mg. If you go to fdc.nal.usda.gov and type in the food name, you see choline in mg. The richest vegan choline sources have in 100 g more choline than eggs: dried shiitake mushrooms 202 mg choline, defatted soy flour 192 mg of choline and 49 g protein, soy protein isolate 191 mg choline, 81 g of protein, cereals ready to eat wheat germ 178 mg choline, Cereals ready-to-eat, QUAKER, KRETSCHMER Honey Crunch Wheat Germ 124

mg choline, 27g protein. 100 g of spinach provide 550 mg betaine (more than any food), 194 mg of folate (more than most foods), 18 mg of choline. Broccoli 19 mg of choline, purple cabbage 17, pineapple 5.5, carrot 8.8, flaxseeds 78, cooked lentils 33, cauliflower 45 choline and 57 µg of folate. Zucchini has 9.5 mg choline and 29 µg of folate. Kidney beans, broccoli, potatoes are other rich sources. Amazon sells choline bitartrate (molar mass 253), so in 1,000 mg of this there are about 411 mg choline (molar mass 104). 500 doses of 411 mg choline are just $15, it will last 3 years, for those who need 200 mg extra choline daily, so $3/year. Choline supplementation led to better memory, fewer birth defects, higher IQ, better brain performance and by extension to better telepathy. Choline is the precursor for acetylcholine neurotransmitter and plays a key role in brain development, it's also part of brain phosphatidylcholine, sphingomyelin and lipid mediators such as platelet activating factor. Phosphatidylcholine is a vital substance found in every cell of the body, not just the brain. Epi 2009;20(5):714-9 found "an odds ratio (of birth defect) of 2.4 (95% confidence interval = 1.3-4.7) associated with the lowest decile (<2.5mmol/L, 18 cases, 40 controls) and an odds ratio of 0.14 (0.02-1.0) associated with the highest decile (> 3.5mmol/L, 1 case, 40 controls), both relative to the 25th-74th percentiles of the control distribution". If we divide 2.4 by 0.14 we get 17 fold (18 versus 1) difference in the risk of NTD (neural tube defect) between the highest and lowest decile, see full paper here. One paper however found almost no link between serum choline and NTD, but choline body status may not be reflected in serum choline, as with other nutrients such as B_{12} ► AJCN 2014;100(4):1069-74; serum choline doesn't reflect choline intake accurately and is made of phosphatidylcholine mainly, whose serum concentration depends on serum lipoprotein concentration, this "weak link" may be due to not adjusting for *confounding* factors. Healthy moms had choline 2.9 mmol/L, while those with NTD kids had choline 2.8 mmol/L. Were the 2 groups so close in choline because the NTD group didn't take folate (that prevents NTD) preconception? Both studies can be true, because the 2009 study (489 women, 19.6% with NTD) had more choline serum variation than the 2014 one (285 women, 24.9% with NTD). The 2014 study says if you pick up women with choline around 2.8 mmol/L we get a different picture. The 2009 study had 489 women with a mean choline of 2.8 mmol/L for NTD cases and 3.0 mmol/L for controls, so the authors could have easily concluded that "there is no link" since the means for serum choline are very similar to the 2014 that concluded "no link" as they didn't split it in 10 deciles. We see we can look at the same data carefully (not the abstract, but whole paper) and draw different conclusions. The NIH website on choline uses the 2014 study (reference 23) as an example of study that found no link, but the study only shows the mean choline not the actual values, which would enable us to look at the deciles and draw the opposite conclusion. AJE 2004;160(2):102-9 found that moms with higher intake of choline, betaine and methionine were 6 times less likely to give birth to NTD kids; tables 4-6 show that choline intake > 500 mg/day (above RDA of 450) meant much fewer NTD cases. ☺☺☺

BD 2012;94(11):864-74 lists 25+ studies showing NTD can be prevented with higher intake of 5 cofactors of the folate one carbon metabolism (choline, B_6, B_{12}, zinc, B_2, betaine), and B_1, B_3, B_{12}, vitamin A, C, E. This confirms studies on multivitamins lowering NTD. Some studies find a weaker or stronger link, but we don't know if it's the study quality, statistics, anomalous group used, confounders, etc, so it's perhaps better to be safe than sorry and avoid being low on these important vitamins for general health. The richest sources of betaine in mg (spinach 550, canned beets 230, quinoa 630, bran 360) are at this link. EJP 2000;159(3):198-204 suggests breastfed infants get enough choline from milk. Some researchers and doctors (like Mercola) suggest taking 930 mg of choline daily during pregnancy (instead of 450 mg adequate intake), and NIH is OK with that and up to 3,500 mg for those over 19. Researchers found a decrease in cortisol of 33% (stress hormone) in babies whose moms took 930 mg of choline; cortisol drop is a positive outcome; the paper "Maternal choline intake alters the epigenetic state of fetal cortisol-regulating genes in humans" is at FASEBJ 2012;26(8):3563-74. ☺☺☺ I would never eat more than 1,000 mg from diet+pill. European women are more affected by low choline leading to more birth defects when absent. Research shows that most cases of spina bifida neural tube defect are also prevented by proper intake of folate (this methylates like choline does and is present in all multivitamins, being a B vitamin easily found in a healthy diet with greens, etc) before and during pregnancy ► nih..es. Autopsies of people who died of Alzheimer showed a lack of choline throughout the brain. Seniors with memory problems often benefit from choline supplements, indicating some memory role. Choline, betaine, folate lower concentration of homocysteine in the blood. Homocysteine is an amino acid and breakdown product of protein metabolism that, when present in high concentrations, has been linked to an increased risk of heart attacks and strokes due to plaque formation by damaging arterial walls. High homocysteine concentrations have been shown to be related to both cognitive impairments and an increased risk of Alzheimer. Better human visuomotor performance, smaller pupil were noticed after choline bitartrate pills in a placebo-controlled double-blind study ► SR 2015;5:13188. I noticed when taking a huge amount of choline too, my pupil became so small and I could see small details I rarely notice, like dirt patterns on windshield or windows, etc... Higher concurrent choline intake was related to better cognitive performance ► AJCN 2011;94(6):1584-91. Pregnant women who ate more choline had children with better visual memory and 8% higher (13% higher for males) WRAML2 score (Wide Range Assessment of Memory and Learning test) at age 7, but folate, B_{12} and betaine had no influence ► AJE 2013;177(12):1338-47. ☺☺ "Evidence is growing that optimal dietary intake of folate and choline (both involved in one-carbon transfer or methylation) is important for successful completion of fetal development... Folates are important for normal neural tube closure in early gestation, and the efficacy of diet fortification with folic acid in reducing the incidence of neural tube defects is a major success story for public health nutrition. Similarly, maternal dietary choline is important for normal

neural tube closure in the fetus and, later in gestation, for neurogenesis in the fetal hippocampus, with effects on memory that persist in adult offspring; higher choline intake is associated with enhanced memory performance" ► AJCN 2009;89(2):673S-7S. Women with higher blood choline and betaine (metabolite of choline, part of most diets) at 16 weeks of pregnancy gave birth to kids with better motor skills and cognitive score at 18 months old ► PO 2012;7(8):e43448. "Choline supplementation during this period (pregnancy of rats) increases memory capacity and precision of the young adult and appears to prevent age-related memory and attentional decline. Deprivation of choline during early development leads to compromised cognitive function and increased decline with age ► NBR 2003;27(4):385-99. In rats, prenatal choline improves memory as an adult, changes the hippocampus ► JNP 2004;91(4):1545-55. In rodents, perinatal supplementation of choline enhances memory and learning functions, changes that endure across the lifespan ► JP 2006;149(5 Suppl):S131-6. In rodents, more choline during pregnancy led to enhanced cognitive performance as adults ► NBR 2006;30(5):696-712.

► 12.4.31. Vegan omega (ω) 3 fatty acids DHA EPA (45 pages: key pill for moms) ◄

Pregnancy and ideal health require high quality EPA-DHA fish or algal oil capsules (if you eat no fish), so read on. As we age, arteries stiffen without EPA-DHA from diet, brain degrades faster, since ALA conversion to EPA-DHA slows. The δ-6-desaturase δ6d or lineloyl-CoA desaturase enzyme catalyzes the rate limiting step in the 5 step process that turns ALA (2 double, = , bonds, (18:2n-3)) (in walnuts, flax, chia) ω3 to DHA ω3 (3 = bonds). ω is the last carbon, since 1 is COOH, ω3 means the 3rd carbon from the last has the first double bond: desat, elongase 5 (elongates or makes it longer by 2 carbons, adding $-CH_2-CH_2$), desat, elongate, desat. δ6d basically removes 2 H, creating an extra double bond: linoleoyl-CoA + Acid $H_2 + O_2 \rightarrow$ γ-linolenoyl-CoA + Acid + 2 H_2O. δ5d is this. All ω3 and ω6 we need are all cis for all 2 to 6 double bonds:

ALA $CH_3-(CH_2-CH=CH)_3-(CH_2)_7-COOH$ → δ6d → SDA $CH_3-(CH_2-CH=CH)_4-(CH_2)_4-COOH$ → elongase elovl5 → ETA $CH_3-(CH_2-CH=CH)_4-(CH_2)_6-COOH$ → δ5d → EPA $CH_3-(CH_2-CH=CH)_5-(CH_2)_3-COOH$ → elovl5 → DPA $CH_3-(CH_2-CH=CH)_5-(CH_2)_5-COOH$ → δ5d → DHA $CH_3-(CH_2-CH=CH)_6-(CH_2)_2-COOH$

SDA is stearidonic, like stearic (C18) with do for double bonds. The names of these acids are better understood by reading the fatty acids mnemonic section, so you memorize nothing. CH_2-CH_2 → CH=CH during 3 desaturase (δ6d &2 δ5d) steps, CH_2-CH_2 added via 2 elongase elovl5 steps: $C_{18}H_{30}O_2$ → δ6d → $C_{18}H_{28}O_2$ → el → $C_{20}H_{32}O_2$ → δ5d → $C_{20}H_{30}O_2$ → el → $C_{22}H_{34}O_2$ → δ5d → $C_{22}H_{32}O_2$

δ6d also catalyzes the rate limiting step in the 3 step process (easier, not 5 steps as with ω3) that turns LA (39% of walnut, 52% of corn oil, 54% of soybean oil, etc) ω6 (2=) to ARA ω6 (3 =):

ω6: LA $CH_3(CH_2)_3-(CH_2-CH=CH)_2-(CH_2)_7-COOH$ → δ6d → GLA $CH_3(CH_2)_3-(CH_2-CH=CH)_3-(CH_2)_4-COOH$ → elongase → DGLA $CH_3(CH_2)_3-(CH_2-CH=CH)_3-(CH_2)_6-COOH$ → δ5d → $CH_3(CH_2)_3-(CH_2-CH=CH)_4-$

$(CH_2)_3$-COOH ARA or $C_{18}H_{32}O_2$ → δ6d → $C_{18}H_{30}O_2$ → elovl5 → $C_{20}H_{34}O_2$ → δ5d → $C_{20}H_{32}O_2$

LA is linoleic as in lean oleic (oleic is main acid in olives), being essentially a lean or trim version of oleic acid, without 2 H or 1 extra double bond. GLA is γ-LA, LA stripped of 2 H via a new double bond. The competition between the 2 pathways (LA → ARA, ALA→EPA→DHA) for the same rate limiting δ6d enzyme causes the appearance of ω3 DHA-EPA deficiency when people overeat ω6 seed oils, causing systemic inflammation (diabetes, arthritis, plaque), because ω6 ARA turns into PGE2 (prostaglandin E2), a key pain, fever, inflammation mediator. DHA integrates into cell membranes and replaces ARA, which reduces the raw materials available for producing pro-inflammatory eicosanoids (prostaglandins and leukotrienes). DHA suppresses COX-2 activity, the enzyme responsible for ARA ⍰ PGE2. DHA turns into 17S-hydroperoxy-DHA via 15-LOX (lipoxygenase, LOX, enzyme that oxygenates lipids), then into resolvin D1 RvD1, RvD2,3,4 via 5-LOX. DHA also turns into 16, 17-epoxy-protectin via 15-LOX and then onto to protectin D1. DHA turns via 12-LOX into 13S, 14S-epoxy-maresin, then maresin. The DHA derived resolvins, protectins, maresins protect the body from out of control inflammation. So, the more ω6 seed oils we eat, the less plant ALA ω3 converts to algal/fish EPA-DHA ω3 and the more deficient we become if they don't eat DHA-EPA from algal or fish oil. Hence we always hear about ω3:6 ratio being too low, 1:50 in corn, 1:8 in soybean oil, 1:300 in peanuts, instead of 1:1 in canola or 1:4 in walnut, 3:1 in chia. Relying on ALA only is death, as some males convert only 0.01% of ALA to DHA. High DHA-EPA lowers blood pressure, heart rate, clotting, extending lifespan. Japanese have 10% ω3 in blood, live longer. The optimal ω3 % in blood as % of all fatty acids is 9-15%, low is 1-5%, medium 5-8%, see yours via the omegaquant.com kit.

Fish oils have more deadly trans fats (which are not listed on any certificate of analysis) than algal oil due to the deodorization at 400-480°F (cis becomes trans), that doesn't occur with algal oil, so algal oil is always healthier, with far less trans fats, or deadly (up to 100x more lethal than cholesterol in fish oil that is absent in vegan oil) oxysterols. ☺☺☺. Concentrated fish oil is more heat treated than regular fish oil, but any fish oil goes thru 1. steam processing to remove fish solids from oil, 2. molecular distillation, 3. brief heating at 200°C (392°F) to kill all microbes, parasites, PCBs, dioxins. FDA says packaged foods and supplements containing less than 0.5 g trans fat per serving can be labeled as containing "0 g" trans fat, so if fish oil serving has 20% trans fat, or 0.2 g you won't know it. "mono-trans EPA isomers relative to the corresponding all-cis isomer ranged from 0.19 to 4.5 %... mono-trans DHA ... 0.25 to 5.9 %... a high degree of isomerization is avoidable... points to deodorization (400-480°F) of the oils as the main source of trans isomers." ► Lipids 2012;47(7):659-67: trans fats from concentrating algal oils at 230°F or concentrating fish oils at 390°F, are much lower than trans fats generated by deodorization at 400-480°F; algal oils are concentrated at much lower temps). Concentrated ω3s are distilled more, have more trans fats, so don't buy any "concentrated" fish oil, as it can have 20x more

trans fat than even concentrated algal oil. Concentrating algal oils doesn't do much damage, since the temps are 230, or 160°F lower than fish oil. ω3 oils go thru 1. molecular distillation (to remove heavy metals, PCBs, dioxins, free fatty acids) at 140-200°C (180°C max ideal for fish, but not some use 200) with algal oil using 150°C (302°F) max 2. deodorization (180°C for algal in vacuum, up to 290C for fish, though algal deodorization is optional: removes oxidation products like peroxides, aldehydes, ketones and other odor causing chemicals by steam distillation at 180-250°C, enough to create trans, concentrates oil in DHA-EPA). Igennus and many companies don't deodorize vegan ω3, so their trans will be much lower, hence eating vegan ω3 is safest, since trans % will be 0.2 not 5% in fish oils. However, if you prefer to buy fish oil, this chapter has a few links to Igennus fish oils. FDA banned trans fats for a reason: strokes, infarcts. Amazon warehouses can reach 100°F when it's 100 outside, so never buy Amazon fish oil within the warmer 3-10 months of the year (depends on state) when temps go above 75°-78°F often. ☺☺☺

The IFOS certifications show TOTOX after a 1 day air travel from California or UK to the Canadian IFOS, they don't show what happens in 3-4 weeks of truck or ship transport at 120°F (this can be 160°F even in the July-August heat waves) from Los Angeles to East Coast or UK to US states (even during mild spring and fall temps (Igennus says they ship it in the "colder" months to keep stock for summer to avoid ocean heat, but does it sit at 70°F in a warehouse? No, so order in winter only), UK to US containers can reach 110-130°F (150° in summer) inside the container routinely, meaning the fish oil goes rancid in the 4 week ocean journey). Video explains why USP label is useless for fish oils and why we need IFOS. In direct sunlight, internal ocean container temperatures can exceed ambient air by 20-40°C (36-72°F), we get deadly raw or final oils in a system run by billionaires not liable for genocide via fish/algal/food oil oxidized lipids, just as canned fish companies poison us. Most US fish oil goes to China and returns, after purification, hence those guys don't get IFOS papers, oil being lethal. This means oil reaches 120 and 140°F often for 9 months of the year, China factory to Los Angeles takes 3-6 weeks one way (it goes to China too, so 6-12 weeks total), add to that 1-3 weeks to Amazon warehouse in hot trucks, you get POISON. Fish or algal oil is the one product where you have to pick the best 0.2%, since 99% is POISON, like with US music. Buy local, support local US companies, and eat a much healthier product. Fig. 3 shows oxidized ω3 raises VLDL, LDL, non-HDL, while fresh ω3 lowers them ► BJN 2017;117(9):1291-8. Rancid oils literally kill you slowly. So always buy fish oil via 1 day ship from Walmart, NEVER EVER any food or supplement from Amazon, Amazon is almost always rancid.

Sports Research is the best algal oil brand I know of, for people who live in US. An almost identical to Testa and Igennus cheaper algal oils in contents, but double the price (same DSM oil, except it doesn't go to UK/Netherlands to be manufactured and then shipped back to US, causing more oxidation at 140F during the extra 2 months of travel) Sports Research of Los Angeles metro is the only US made raw material, US made brand with a 100% opaque bottle,

free of 1-3 months transport over oceans (raw oil to UK from California, finished oil back to USA) like UK Igennus, California Gold kd-pur or other non IFOS certified iHerb or Amazon ω3 brands. Not to mention Testa, Igennus, not sold on iHerb, sit in Amazon hot warehouse for 4 weeks sometimes. You can't trust any other brand sadly, as light deteriorates oil in the bright warehouses and US doesn't mandate 100% opaque bottles for fish oil. Just as Igennus is IFOS certified (see their values), Sports is also IFOS certified, see anisidine, etc (identical for some batches almost with Igennus as both use same DSM oil), and 100% opaque bottle (unlike the dark amber for Igennus), unlike most Amazon junk: it is kept in the Pasadena etc iherb.com 75°F warehouses, made with exactly the same Life's Omega from California farm by DSM and same Testa vitamin E, C, "pulmonary edema" rosemary oil related "rosemary extract" (is it rosemary extract or rosemary oil? a BIG difference, ask the company before using), but without the irritant carrageenan (called "seaweed extract" on other brand labels) in the softgel (which you can trash after squeezing the oil). Sports Research ω3 (San Pedro, 33 miles from iHerb) got 60 caps too (sold on Amazon too, if you want it oxidized). It *has sunflower oil (25% of humans allergic to it), carnosic acid, polyphenols*.☺☺☺ Under 1% of EPA-DHA brands have dark color plastic cap and bottle that is not see thru, white allows some light; Sports Research is one. However, people are too clueless to realize any oil containing softgel or olive oil, etc, liquid vitamin will become poison if shipped from outside of USA, due to the 1st century BC logistics that still is the rule of commerce today. Your best bet is local US algal oil (DSM made in California like Sports Research), packed by California company and shipped to Amazon warehouse in winter, weeks before you order it. Otherwise, you get JUNK and it probably cancels all benefits of taking it. You need to understand our whole "civilization" runs on scriptures that deify theft, genocide, rape and that ethics is more of a cosmetic marketing facade to get victims to buy bad products. The so called globalization meant the destruction of US industry, genocide of Americans via import of lethal poisons. See the hybrid war behind "olive oil", avocado, seed oils, coconut ads. Genocide. Read the fake commercial science papers section to understand how outsourcing APIs (advanced pharmaceutical ingredients), all raw ingredients for food is an act of national suicide and why we need to produce our own eterni powder food in house, stop all gangster imports.

Oil rancidity is measured using TOTOX, or Total Oxidation = 2 PV (peroxide value) + AV (anisidine value). PV measures peroxides, hydroperoxides formed by short-term primary oxidation, while AV (1 min clip) measures aldehydes/ketones formed by long-term secondary oxidation of peroxides to aldehydes, ketones. Anisidine (4-methoxy-aniline) reacts with C=O (aldehyde, ketone) to form Schiff bases detected at 350 nm via spectrometer: $R_1R_2C{=}O + H_2N\text{-}C_6H_4\text{-}OCH_3 = R_1R_2C{=}N\text{-}C_6H_4\text{-}OCH_3 + H_2O$. A Schiff base is $R_1R_2C{=}N\text{-}R_3$, R_3 is aryl or alkyl, but $R_{1,2}$ can be hydrogen for aldehydes like formaldehyde $H_2C{=}O$. AV max limit is 20, TOTOX 26, PV 5. It's a marketing fraud to claim what we buy from Amazon or iHerb is the same as IFOS results show, it's

genocide, especially when the IFOS is just a statement without numbers (kd-pur) and for raw material that is then shipped to USA and can reach 130-150°F over the Atlantic. Capitalism is all about conning others, with tacit puppet gov approval. The idea is you want local algal oil, made locally, shipped in the coldest of winter to Amazon warehouse (they restock each 1-4 weeks) within the same country. This banditry will only change with the 11 companies that end the aristocrats that build palaces off genocide, instead of having proper temp storage for vitamins, foods, proper packing in 100% opaque containers (not white, clear, etc). Even if you live in a colder climate, spring/fall months means ocean transport or LA to NY from company to Amazon warehouse takes 2-3 weeks, in hot trucks of 130-150°F can destroy the oil on its way to the "cool state" Amazon place. Fish oil is the one thing that's liquid (never order anything else liquid for vitamins, it's poison, it's degraded) that you need to be very picky about unless you want plaque and damaging your arteries with LDL oxidizing junk. Use 74°F iherb (5 states, CA, IL, KY, PA, TX got warehouses in USA) during the months with temps > 75°F if you failed to plan well, like their California Gold ω 800 90 caps (80% of the oil is DHA-EPA, unlike most brands that are 25%, meaning your LDL will be lower) for 72g total EPA-DHA/25$ (kd-pür® IFOS™ quality fish oil purified in Germany using supercritical CO_2 tech, with no harsh solvents or high heat, ensuring low oxidation, contaminants, unlike most junk processed in China with no IFOS (International Fish Oil Standard, like IAOS, IA(Algal)OS) test, let alone 5 star IFOS rating kd-pur often gets). Igennus made in UK is probably better than California Gold, since the German oil is shipped to California, processed in hot Pasadena, by the time it's in caps it's much more oxidized than Igennus (UK is much colder) and iHerb provides no final TOTOX, for the final product, only for the raw kd-pur oil, before shipping via hot trucks from East Coast to Los Angeles, via hot Atlantic ocean containers from EU to Los Angeles, which destroys. So, it's a scam for iHerb to claim that the final softgels are IFOS quality simply because the raw German oil is IFOS quality, so try use Igennus, ignore iHerb oil brands, Igennus is the only cheap IFOS quality brand on Amazon/Walmart, order in winter for the next year (see next page on what Igennus to order). We need EVIDENCE, too much fraud going on. Kd-pur doesn't even show us the anisidine, TOTOX, peroxide, etc values for the raw oil like Igennus does for every final softgel type, just that "it passed IFOS criteria", and iHerb Cali Gold 800 is not even cheaper/g than Igennus.

Pathetic, the reason iHerb "California Gold" doesn't have IFOS certification for final product is that it would show how terrible it is vs Igennus etc? Check out the shrimp FDA never checks for poisons, as all trillions are stolen by aristocrats, so FDA budget is infinitely small of course, like our lifespan. iHerb just deceives and brainwashes us that it's IFOS raw material, then use that to make us believe the 'final pill' is "perfect", as if we don't have brains to think and realize the big difference. Even the best brand from Amazon will be destroyed in Amazon hot warehouses in 2 weeks of 78°F weather (ship it in the coolest week), the IFOS results refer to tests done to fresh

samples companies send to cold Canada, not to fish oil siting in Amazon in hot temp or US warehouses, and then having anisidine, TOTOX, peroxide, etc 20 times higher than IFOS data, so don't imagine any fish oil from Amazon is good, unless bought in January-February coldest months. Any Amazon fish oil bought May-September is oxidized TRASH for most US, pure POISON. It's a scientific fact after 10 days at 85°F in the Amazon warehouse, quality is CATASTROPHIC: eating that is a form of slow suicide, it causes strokes, infarcts, FDA could care less, Amazon doesn't care. Most people have no clue, it's the same with any canned fish (some have zero ω3), any polyunsaturated oils you buy in clearer bottles from any online website. Don't even buy any oil, except fish or algal oil pills, the rest are usually super oxidized, only iHerb fish/algal EPA-DHA oils are safe to eat year round. US has no standards for anything (just like all other countries), except stuff to prevent instant death, but slow death via 3 million products is the rule in every country. It's the law of the jungle, you either know, or you die 20 years early. The companies hide it from the consumer. Only eat Fish/Algal vegan EPA-DHA oil that was certified by IFOS. The rest are junk, even if made by iHerb using "internationally sourced oils".

EPA lowers ApoB, without raising LDL, while DHA lowers ApoB, while raising LDL, so MDs prescribe (or people buy without prescription) the more stable (39$ after all discounts, cancel resubscribe 4 days later to order 2nd bottle if needed to bypass hot summer order/90g EPA, 101 ω3) rTG EPA or concentrated EPA-DHA ratio 2:1 (24$/101g ω3, 60g EPA, 30g DHA) to lower ApoB the most, by not raising LDL slightly with DHA (rTG form is more stable than esterified form, so it's less rancid, plus it absorbs more). However, DHA raises HDL more than EPA, so perhaps the best for some may be EPA:DHA 2:1 or 3:1 or 4:1, not the algal 1:2. It all depends on Lp(a) effects of whatever EPA:DHA ratio you chose. ω3s lower Lp-PLA2 (lipoprotein associated phospholipase A2) activity (esp at 3 g), an enzyme bound to LDL that causes vascular inflammation and plaque rupture (the cause of big or silent undetected strokes and lethal infarcts). All LDL causes plaque, it's just small LDL makes more plaque. A little DHA is fine from algal oil for the brain, etc, but essentially, to bring down ApoB, live plaque free, we need mostly EPA. ApoB needs be < 60 to minimize infarct/stroke risk. Lower ApoB and live 5-25 years longer. EPA brain half life is 22 hrs, DHA is 2.5 yrs. EPA can turn into DHA, as needed. But DHA doesn't become EPA. So, EPA is better, it protects the brain far more from inflammation too, not just the arteries, you can take 2-4 g EPA without any DHA to see what happens with ApoB, 10-20 mg/dl drop? Pregnant moms need DHA for the baby, so they need take 1 g DHA and 3-4 EPA to minimize plaque, infarcts, strokes (most strokes, 100s of them, are silent and they slowly destroy the brain). Most people buy solid vitamins, except for the ω3s. Because Amazon ships ω3 in trucks and trains that reach 150°F and damage ω3s, or in ocean containers that take 5-7 days from Los Angeles to Honolulu, extra 3 days to local islands, during this cross country journey it ruins the quality, so never buy anything liquid from Amazon. Opt for stuff without oils. The metallic container on ships (Hawaii)

or trucks (most mainland transport, East to West, etc) can get 120-150°F inside, which is deadly for any oil/liquid. This is because a gov of frauds who don't require all containers and trucks to be painted the 99.9% heat reflective white to prevent spoilage. But ω3 is an oil, so our best bet is using iHerb cool warehouses for mainland or ordering from a company that takes only 1 day to ship stock to Amazon warehouses near you, a more local manufacturer of ω3 that has some antioxidants (carob, vit E, C) inside too to prevent spoilage. Otherwise, you get oxidized deadly ω3, unless you order your next year's supplements in January when it's cool everywhere, except Pacific ship containers to Hawaii. Plan ahead. Keep all oil, vitamins in the fridge.

C_{18} ω3/6 are precursors of C_{25}-C_{38} ω3/6 called VLC-PUFAs (very long chain polyunsaturated fatty acids), which play (see their formula) a key role in retina photoreceptors and which are almost 0 in diabetic retinopathy, AMD, partially/full blind patients. Mice who got VLC-PUFAs reversed age related vision loss, but DHA did NOT help ► STM Med 2025;17(817), explained in simpler terms here. Eyes need LA ω6, ALA-DHA-EPA ω3 precursors of VLC-ω3/6, so eat vegan algal oil, flax/chia oil and walnuts. ω3 were shown to reduce aggression by 30%, so it's important to feed kids/adults well, to prevent false diagnosis of autism and giving them autism 'calming' pills that destroy brains causing more violent crime due to bipolar extremes coming from these stone age pills. ω3 also prevent diabetes and plaque, plus other inflammatory diseases of aging. ALA is plant form that turns into DHA-EPA inside us. Too much DHA-EPA from pills can cause irregular heart beats, so start small 0.25 g, then 0.5, and don't take to 4 g (unless pregnant with twins perhaps), as those high levels taken without food can screw things up in many studies, but low levels are fine. Some pills contain flaxseed oil too, besides DHA-EPA, that's fine, flaxseed oil in pill form is fine, as it doesn't oxidize each time you open the bottle. Chia oil pills or bottle are better, as there are no traces of cyanogenic glycosides. The NIH ω3 AIs (not enough data for RDAs) in g are a tiny 1.6 for adults, 1.1 for women, which everyone gets, but 1.6 is presented as OK even if all 1.6g is ALA; the 8th chapter of the 1359 page pdf gives the 2005 reasoning behind this 1.6 g and explains DHA-EPA count towards this 1.6 g; it also has some in vitro and in vivo studies where it appears *immune function (T cell function etc) is diminished after fish oil intake*; since most studies were in vitro, they could not conclude if immune suppression is universal or if UL (upper limit) for DHA-EPA can be set, but high levels of DHA-EPA in Eskimos (6.5g/day, vs 0.4 in a typical Testa pill) are associated (*no causation determined yet*) with bleeding, strokes. *If you notice more nose bleeding or infections during supplementation, you may be a minority affected by huge intakes of fish or DHA-EPA pills*. More recent (mostly mice) studies present a mixed picture: "EPA and DHA don't generally affect immune cell functions in an inhibitory manner, but rather promote pro-resolving responses." ► JLR 2013;54(4): 923-35, "ability of n-3 PUFA to perturb... structure and function in CD4+ T cells" ► EJP 2016;785:2-9, "Generally, ALA, DHA, and EPA exert an inhibitory effect on the activation of immune cells from both the innate and the

adaptive branch… specific immune functions are promoted.. phagocytosis by macrophages and neutrophils or Treg differentiation" ► IJMS 2019;20(20):5028, mixed effects on viral infections in mice ► FRBM 2020;156:190-9, "usage of *algae- or plant-based sources of EPA and DHA seems more preferable than marine or animal-based sources*… EPA and DHA …(pills) should be considered as both a supportive therapy and a *prevention* strategy in SARS-Cov-2 infection" ► FP 2020;11:752.☺ It probably depends *on every diet (if ω3:6 ratio is low, then reduce ω3; the ratio is more critical than the amount; take antioxidants rich* foods *or vitamins with* ω3*, to prevent oxidation, take ω3 pills with big antioxidant rich smoothies to* mimic *food ω3) and on every immune system*, so try 1-3 *vegan* pills and see what works best. *58 g of farmed salmon daily (or* 3 vegan pills*) would impair our immune function?* It would mean 300 million of frequent fish eaters get weak immune systems, yet in reality, Japanese live the longest.

Krill oil (by NatureBell, opaque bottle, carob protects against oxidation, not in semi transparent Micro Ingredients bags that allow light to oxidize) *with no* added olive oil *or* carob *is not a safe* fish source of DHA-EPA, due to no IFOS or any certification to show anisidine, TOTOX, peroxide, etc, even if it has 50-80% phospholipids and some of the lisophospholipids of DHA EPA cross the blood-brain barrier, unlike normal algal/fish oil, allegedly providing 50% higher uptake of DHA-EPA by the brain (with the oxidized phospholipids allegedly not making it thru the blood-brain barrier, to damage the brain). The cheapest algal, Igennus, is 88c/g, the cheapest quality fish oil is Igennus at 24c/g vs 54-60c/g for Nature Bell/Micro Ingredients/etc oxidized krill oil (krill oxidizes far faster due to phospholipids). Igennus has amazing documentation and some lots of the fish oil are as polluted as their vegan algal oils, go here and then select batch number to see anisidine, acid, peroxide, dioxins, TOTOX, PCBs, while NatureBell and most Amazon sellers got no oxidation parameters on their certificate of analysis, *most* (Nature Bell, Micro Ingredients) *don't even provide a certificate of analysis*. PCBs in Igennus algal oil for the same date of a certificate is 3-41x lower or so than the Igennus fish oil, with each newer date being lower value, indicating the company is improving its filtration tech. Igennus fish oil (EPA) 2027-8 PCBs are 15.4, 15.8, 20.5, 0.38 ppb vs Igennus algal oil 0.38, 0.17, 0.063, 0.058 vs fish oil (DHA-EPA) 5.0, 0.82, 0.78, 0.6, 0.47, 0.17, clearly showing EPA oil one is the most PCB rich and to be avoided perhaps, since the rest of parameters are about the same. However, even canned beans have 3-150 ppb PCBs and we can eat 1000 times more g of lentils a day (1400 g lentils), so lentils we eat might have 3-150 ppb×1000/0.17 or 18K to 882K times more PCBs than that 1.4 g of fish oil in a 2 cap serving. So don't worry about that PCB, the number one killing thing is the oxidized fish oil.

These PCBs are known to cause dementia and other issues. Shrimp, a small farm raised fish, causes endless issues in consumers, viruses, pesticides, antibiotics, PCBs so algal oil is safest. Getting oxidized oil across the blood brain barrier is not possible since only healthy unoxidized ω3 can cross the barrier by binding to the Mfsd2a transporter protein. Transport from South

California is done in hot trucks, except winter, so rancidity damages livers, arteries, as they become LDL. But among fish oils, krill is the least contaminated of course, before molecular distillation. Krill is at the bottom of the food chain, so it doesn't accumulate heavy metals (see FDA table, the bigger the fish, the more mercury), PCBs, etc as much as bigger fish like scallop (3 cm vs 1 cm krill), sardines (15 cm), which themselves have 400× less mercury than tuna (100-300 cm) or tilefish (125 cm). Krill is the smallest fish, so it disturbs the human quantum field the least, when they're killed, compared to big fish or even sardines. It's important to know, before using fish oil, that fish oil oxidation is higher than algal. "Krill oil contained the highest total n3 oxylipin concentration (6000 nmol/g) and the highest degree of oxidation (EPA 0.7%; DHA 1.3%), while microalgae oil (Schizochytrium sp.) showed the lowest oxidation (<0.09%)" ► JAFC 2022;70 (13):3979-98 so bad fish oil causes arterial plaque. Of the 32 ω3 pills in "New Zealand and Australia, 83, 25 and 50 % exceeded the voluntary recommended safety limits for peroxide, anisidine and TOTOX, respectively" ► JNS 2015;4:e30, Fig 2 shows vegan DHA-EPA is the least oxidized. Only buy oils that have values close to Igennus. Most fish oil is shipped to China to be distilled, so it's damaged during shipping, that's why they provide no oxidation data.

The biggest issue is that phospholipid ω3 (krill oil, etc) are less stable than triglyceride ω3 (algal), due to the polar PO_4 and groups linked to PO_4 (choline, etc if phosphocholines) that attract polar free radicals, which then attack the weakest C-H bond of the fatty acid, the allylic CH-H bond of -CH(H)-CH=CH near double bonds. This C-H is weakest in the molecule *(especially if bis-allylic, meaning if between 2 allyl groups* CH=CH-CH(H)-CH=CH, *that's a weaker CH-H bond than* CH_2 *near only 1 allyl group),* because the resulting radical -ĊH-CH=CH is stabilized by the double bond electronic cloud density (sp^2 hybrid molecular orbital). The electronegative PO_4 sucks electrons, so the CH-H bond is weaker than triglycerides, especially near the electronegative CH=CH group that also pulls electrons, leaving C-H bond with fewer electrons. This is how we die: LDL, triglycerides, etc get oxidized like that at the allylic CH_2, then form plaque, leading to infarct and stroke. So you need to find the least oxidized brand or support the rise of Immortalist Party to create 4000 year lifespans via Eterni Foods (made by the 1st National Unified company, Eterni Foods Inc) that contain this hours ago made powder that spends 1 hr max during transport (5 miles), 1 minute max at 80°F, instead of 60*24*10 = 14,400 minutes at 95-150°F in our stone age of small business fraud capitalism where 24 mg on label is 0 mg actual. In God we trust, means in Eternal Life of No Oxidation of Food We Trust. God is zero LDL oxidation via True Chemical☺☺☺ Realization of the new Periodic Table Particles that prevent electronic attack☺, the shimmering Immortal Garment of Eternal Life,☺ made of "immortalion" like particles that cancel the laws of regular physics, Beautiful☺ Clothes of The 11th National Unified company, Eternal Clothing Inc. Let's demolish all stadiums and build 1 million science labs,☺ to Bring Eternal Immortality *for* All on Earth, let's Clothe our minds (and souls☺) with the Radiant Glistening Garment of Ever Happy

Bounteous Gentle Tender Soft Kind Nurturing Loving Virtue and Hypothesis Testing Discovery. ☺

Another issue with this is 25% of the krill (or fish oil in general) oil is DHA-EPA, vs 45% for Igennus 54g ω3/48$ subscribed algal oil, so you end up eating more fats, that may be contaminated with heavy metals (even if they claim "mercury free"), raise LDL, etc. The way to get around that is to buy concentrated EPA fish oil from Igennus (39$ with 1st subscribe after all coupons, promotions clicked) or other quality brand or concentrated DHA-EPA mix that has more ω3 than even algal oil as a %, 70-95% and is actually lowering LDL, Lp(a) more than EPA-DHA mixes, if you choose high EPA type. NatureBell sells 240 capsules or 48 g ω3/27$, but adds carob which is fine for adults, but not pregnant or lactating ladies, as carob antioxidants prevent oil oxidation. The PO4 group, like benfotiamine, does the trick. Lysophosphatidylcholine DHA (LPC-DHA) or acylglycerolphosphocholine or R_1-C(=O)$OCH_2CH(OH)CH_2OP(=O)(O^-)O(CH_2)_2N^+(CH_3)_3$, where ($R_1$-C(=O)OH = DHA) is a superior carrier of DHA via the blood-brain barrier into the brain and retina. By using the Mfsd2a transporter (FASEB 2018;33(2):1554-64), LPC-DHA is more effective than fish oil in enhancing cognitive function, memory, retinal health: rats "fed radiolabeled DHA in phospholipid form exhibited 78% more DHA in the cerebellum, 140% more DHA in the hippocampus, and 69% more DHA in the remainder of the brain after 6 h". There are even companies selling LPC-DHA LPC-EPA mix made from krill oil for 10 times the price of krill DHA-EPA oil, not sure it's worth the expense. LPCs are glycerol phosphatidyl cholines where instead of 2 acyl groups as in typical phosphatidyl cholines, we have only one, DHA. Triglyceride fish oil (99% fish oil, 100% algal oil) is triacylglycerol, no PO_4, so R_1-C(=O)$OCH_2CH(O(C=O)R_2)CH_2O(C=O)R_3$. For APOE4 carriers, at high risk of Alzheimer who make up 65% of dementia patients, krill fish oil may help, if you can lab test it to make sure it's not oxidized. As we age, our ability to take DHA, EPA, etc to make various phospholipids declines, so it's a better idea until the chemical industry can get its act together and synthesize this cheaply without needing krill.☺☺

However, after taking an mRNA vaccine*, in order to build strongest immunity, it may be better to eat less* ω3 *for 3-4 weeks.* The NIH has no UL for ω3, but FDA suggests no more than 2 g EPA-DHA from pills. This section explains though that many people who convert little ALA to EPA-DPA, need EPA-DHA. In the "my daily food" section, there are formulas and food tables names for the 4 main ω3 acids: ALA, DHA, EPA, DPA and foods that contain them, besides the g of ω3 I eat daily, how I limit the intake of ω6 to just 3-8 g/day. ALA and DPA are not as important. Most people eat too much ω6 (average human eats 10 times more ω6 now than 100 years ago) and this high ω6 intake uses up the enzymes that can turn vegan ω3 ALA into ω3 DHA and ω3 EPA (they are the same elongase and desaturase enzymes that turn ω6 LA into GLA and ω6 ARA), leading to systemic inflammation and faster onset of inflammatory diseases. The best DHA, EPA is from vegan pills. DHA can boost IQ by up to 10 points in kids versus DHA deficient kids. Half life of DHA in the brain is 2.5 years. DHA, docosahexaenoic acid, is $C_{22}H_{32}O_2$, molecular mass 328.

Lancet 1992;339(8788):261-4 found that breastfeeding *(breastmilk has DHA) led to IQ score 8.3 points higher in kids at age 8, versus infant formula without DHA and that* eyesight and IQ are much better when moms get enough DHA in their diet so it is in high concentration in breastmilk. Before going into more ω3 details, it it worth mentioning that ω6 linoleic acid (LA) is usually very abundant in most diets, as it's present in vegetable oils, nuts, seeds. Circ 2014;130(15):1245-53 found that those with higher (23% of total fatty acids TFA) LA in their diet had half the non-arrhythmic cardiac mortality of those with lowest (17% of TFA) LA (LA = 39% of walnut w/w, the main ω6 in oils and soybeans). PUFAs ω6/3 replacing saturated fats increases lifespan. JCL 2017;11(4):1082-90 found serum LA, GLA ω6 are linked to 12% lower mortality, but adrenic acid, DPA with 10-12% higher mortality. Most studies suggest plant LA ω6 lowers mortality *for those with sufficient ω3 in diet or who're quite low in LA at the beginning of the study*, since too much LA increases ω6:3 ratio too much, decreasing lifespan. Some very few low fat vegans may not get the minimum LA 2.5-5 g/day or 1-2% of calories. ω3s prevent ischemic strokes by thinning the blood, call 911 if having a stroke, since you can die in 1 hr.☺☺☺

PLEFA 2009;81(2-3):179-86 *recommends pregnant moms take 900 mg of DHA/day* for the best visual acuity and IQ of the infant (0.9-1% DHA/fat in milk). Some MDs recommend adults taking 250-500 mg DHA a day ideally (Greger says 250 mg). USDA and WHO both recommend 250 mg DHA+EPA a day for adults; WHO recommends pregnant women get at least 300 mg, of which 200 mg minimum is DHA. *WHO recommendations for EPA+DHA for kids are:* 0.15% of calories *(0.7 max) for 0-6 months, 12 mg/kg for ages 0.5-2, 100-150 mg for* ages *2-4, 150-200 for 4-6, 200-250 for 6-10* ► BJN 2012;107 Sup 2:S8-22. (Table 4) EFSA recommends *100* mg *DHA* for *6-24* months (some get it from infant formula with 0.3 to 1% DHA, but no formula can bring DHA deficiency), 250 mg DHA+EPA for adults, an extra 100-200 mg DHA/day during pregnancy/lactation. *Better outcomes were seen in 1% DHA formulas* versus 0.3% DHA formulas in several studies, so some women eat 600-900 mg DHA daily to achieve that. Women eating 200+ mg *DHA* get milk with 0.3% DHA in milk fat, or *100* mg *DHA* ingested by infant. Some suggest 250 mg EPA+DHA for all kids 2 years and older, not just adults, as their brain grows way faster than that of an adult. Human milk can contain 0.78% of fatty acids as DHA, 0.2% as EPA ► Ntr 2019;11(7):1585, although other papers found the average DHA content is 0.2-0.3% ► IBJ 2016;12:7 and that taking DHA pills increased milk DHA by 53%. Cow milk contains 0.01% of fatty acids as DHA, or 100 times less than healthiest for babies human milk, if cow diet not supplemented with ω3 (flaxseed or fish oil supplementation changes cow milk % to 0.38, 38 times higher) ► AJAS 2015;28(6):796-806. This means infant formula based on soymilk or cow milk (most cows don't get ω3 supplements) without DHA-EPA added (it was not added for decades until 2000 in many countries) is very damaging to the developing brain and eyes. "Eighty percent of brain DHA is acquired from the 26th week of gestation until birth… intakes of

~300 mg of DHA per day are necessary to achieve human milk levels of 0.3%–0.35% of DHA... According to the American Academy of Ped [37], children under one year of age shouldn't be fed raw, unmodified, or unpasteurized cow's milk as a replacement for human milk or infant formula. Additionally, unmodified milk doesn't provide enough vitamin E, iron or essential fatty acids. Moreover, infants' systems can't handle the high levels of protein, sodium, and potassium of unmodified cow milk... the protein content in human milk ranges from 1.4–1.6 g/100 mL, to 0.8–1.0 g/100 mL after three to four months of lactation, to 0.7–0.8 g/100 mL after six months" ► Ntr 2016;8(5):279; the paper explains vegan and omnivore moms need 2000 IU of D3 during lactation too, to get enough D in milk, and some K after birth, as milk is not enough; the paper adds that human milk can have less than 0.1% DHA; few know that human milk, just like cow milk, can vary wildly in its DHA content from mom to mom, sometimes 20 fold (0.085 to 1.7% of fatty acids) ► EJCN 1996;50(6):352-7. ω3s help cure cancer too. ☺☺☺

Vegan moms need to take 4-5 DHA-EPA vegan pills/day during conception attempts (to build body reserves), pregnancy and lactation, because they don't eat fish to reach the 0.9-1% milk DHA/fat level. Vegans who don't eat daily enough canola oil, flaxseeds/flax oil, soy foods, chia seeds or walnuts can have low intake of ALA (9% of it becomes DHA) and low milk DHA level, if they don't eat vegan DHA pills. Eating DHA ensures vegans get the benefit of no oxidized cholesterol and better vascular health of offspring, without affecting eye, heart or brain development. Arterial plaque begins in fetus stage, so omnivore mom fetuses have 12 times the fetal aorta plaque of vegan moms sometimes before being born. 5 pills means 1.25 g of DHA, the amount in 100 g of salmon/day, not much. Why give the baby mercury in fish when you can avoid heavy metals and PCBs with vegan DHA? Plaque is bad for every organ, as blood vessels supply organs with nutrients. What fish enthusiasts don't realize is that a tuna (100-300 times more mercury than other fish) lover can give baby 9,000 times more mercury than a vegan mom, so this can have some really bad consequences if baby can't handle it. Not every baby can, so then IQ can drop 15 points. PCBs, heavy metals, oxidized cholesterol in fish increase baby oxidative stress and take body resources to fighting free radicals and toxins instead of building high IQ brain architecture. Plus, canned/cooked fish can lose 10-99% DHA.☺☺☺ Among those with stable coronary heart diseases, compared to those with blood DHA EPA below the median, those with DHA EPA at or above the median had 27% less risk of dying ► CCQO 2010;3(4):406-12. Higher DHA cut mortality risk by 57% in hemodialysis patients ► AJN 2011;33(2):105-10. A 1% increase in serum DHA/EPA (% of total fatty acids), meant a 21%/20% drop in all cause mortality ► SR 2016;6:28165. Chapter 16 has 20 studies about depression, problematic/suicidal behavior, aggression, violence linked to low ω3, high ω6. Animal studies demonstrated that DHA deficiency during pregnancy and soon after birth could not be fully corrected later in life. What happens in the womb period is so critical, so prepare well. The less DHA infants got in the womb

and first years of life, the more aggressive hostility, autism, low IQ they displayed as adults. This is consistent with interventional studies in adults (see diet and violence section) who became more *tranquil*, tender, kinder after DHA pill administration ► IRP 2006;18(2):107-18.☺☺☺

97% of ω3s and 40% of PUFAs (polyunsaturated fatty acids) in the *brain* is DHA, while EPA % is 300 times lower and ALA even lower. 93% of ω3s and 60% of all PUFAs in the retina is DHA; DHA is a key component of all cell membranes and makes up 60% of synapses, 50% of neurons' membrane. EPA has a 22 hr half life in the brain, but it has a key role in fighting inflammation in the brain. If people eat too much ω6, there is less EPA formed and the risk of Alzheimer (brain inflammation) rises. Alcohol *depletes DHA and EPA from the brain*. DHA prevents brain shrinkage. *DHA* ω3 and *ARA* ω6 make up 20% of brain's dry weight ► MEHD 2017;28 (sup1):1281916. The body converts some 2-20% of DHA into EPA. NASA created *vegan DHA/EPA* in 1985; just as people have fish allergies, some have algae allergies, so gently watch what goes on if you use *vegan* oils. Too much *ω3* can lead to bleeding and immune suppression though, so increase dose slowly. Life's DHA oil (used in 100s of DHA *vegan* pills like US made Deva) was made in late 1990s and Life's Omega oil was made in 2012 by DSM which employs 21,000 people and has a video, infographic and brochure about ω3. *Life's* omega algal oil, made in an FDA inspected facility, (550 mg *ω3/g, 300mg DHA/g, 150mg EPA/g)* is used by 100s of *vegan* ω3 sellers; an Amazon search "algal ω3 EPA DHA" gives the cheapest *vegan* brands that sell this *vegan* oil (Sports Research is the safest *vegan* DHA-EPA, the least oxidized, no EU-US 1 month ship transport at 100-140°F). As science evolves, they will make *vegan* algal oil with EPA:DHA ratio 2:1 or 1:1; now all algal *vegan* oils ratios are 1:2 or 1:35, which is not ideal for everyone, given we got used more to 1.5:1 ratio for 1 million years. It's a good idea, if you want to avoid carrageenan or other softgel chemicals, to use a knife to gently cut the softgel and pour the oil in a smoothie. This way you don't irritate the gut with softgel prions, heavy metals, oxidized gelatin proteins, you don't squeeze softgels in your mouth which can cause lipoid pneumonia. All oils present this risk, even cooking oils placed on salads we eat, even kids or people who use oil to clean their mouth can develop lipoid pneumonia, (or using oils, medicines with paraffin (mineral oil), etc for nasal inhalation, decongestion, etc, we can inhale stuff even from salads we eat, see ► IM 2002;41(6): 483-6 etc) so try not chew any oil containing softgels or vitamins in the mouth unless you already are mouthful with smoothie stuff and mix well before swallow; much safer is to swallow softgel or pour it into the smoothie *and dilute it 1 to 500 that way*.

The cheapest *vegan* oils are the vitamin E/C free ones that oxidizes faster, but on Amazon 99% of DHA-EPA (algal or fish) oils are not IFOS or IAOS certified, so they're worthless, cause we don't know the quality of GMP, oxidation, anisidine, TOTOX, acid, peroxide. If you choose one that has EPA-DHA oil only with no vitamin E/C/astaxanthin to preserve it better, only choose something that has 500-900+ sold last month, since high turn around means that they don't sit in a hot

Amazon warehouse a long time to oxidize, for example Igennus fish oil is 2K a month. The junk brand Zenwise (no IFOS/IAOS) *causes severe symptoms of short breath, or asthma like effects, typical of low quality oils or algae we're allergic to*. This happened 4 times I took it with breaks and when I reverted to Igennus, it all disappeared. A video explains that algae ingestion by shellfish can lead to toxin accumuation that damages our brains, so, bad algal contamination of the pond in California where they grow these DSM oil algae could cause toxins to move into pills and to damage our brains. Algal oil industry needs more regulation. Avoid Zenwise if you get the same breathlessness, it's usually 100 million humans who have allergy to some algae, not just one. This may be due to this not being DSM oil, but some new algae oil that causes far more allergies. If you eat more than 1 softgel of Zenwise, stool stinks/hardens, you feel out of breath (because the body can only detoxify a certain amount of crap allergens produce or contain within hours of ingestion from the blood), which doesn't happen with 1 mg astaxanthin per serving like Igennus (600 mg EPA-DHA/1344 mg Schizochytrium oil). Igennus subscription costs less than most vegan oils on Amazon, without the rosemary and sunflower allergies. Testa takes oil from California to Netherlands and then UK, oxidizing it in transport more than Igennus. Igennus explained the astaxanthin oil in 2 caps is 10.5 mg as the label says with 1 mg astaxanthin, 40 µg lutein, 20 µg zeaxanthin and some fats. With Zenwise, your stool becomes harder than with DSM Testa or Igennus oil, making defecating 5 times longer. This stool hardening is also true if you eat any spirulina, chlorella or sea algae, some common allergens and fungal organisms that change your microbiome. Fish allergy happens in about 7% of kids worldwide and it can remain for the rest of ones' life. That's why fish allergic kids need ultra concentrated EPA-DHA from Igennus, because that one removes the allergens. Fish contain EPA-DHA due to eating them from algae and they contain allergens also due to eating them from algae, though some are simply fish proteins not present in algae. Med 2021;57(1):76 says "Bronchospasm and asthma *have been reported after ingestion of fish*, … after the inhalation of fish allergens… seafood industry workers and handlers *(don't* hang *out at fish markets)* … children can easily be exposed to aerosolised proteins generated in the cooking *(thus, protect kids by always cooking fish covered in water in pressure cookers so you* don't generate 20 times more toxic AGEs*) Cooking … may increase the allergenicity of fish*". During cooking, parvalbumin *(a* protein *not present in* fish *oil)* levels in fish increase and this can lead to death. Some fish have 100 times less of this deadly allergen parvalbumin (the main one in serious cases), as Table 2 shows, though it's clear you need to research it more, since some analytical methods are not detecting stuff well: "Up to 3% of the general population is at risk of sometimes fatal allergic reactions to fish, requiring strict avoidance". *Research diligently all types of fish oils, algal oils and test them, before you stick to one, if no symptoms manifest.* Allergens can damage the body even if you don't go to the hospital or even if you feel *'nothing bad for years or months', so do your homework*. Death happens with algae too: "*Fatalities* have resulted from consumption of

fresh *Gracilaria* edulis (algae)" (JAP 2017;29(2): 949-82). *Chlorella*, a super popular product, can cause anaphylaxis (the way people can die) too: BMJCR 2020;13(11): e237054. In fact, some MDs suggest avoiding chlorella completely. Minimize issues by mixing the oil with a lot of food in a smoothie. No antioxidants in a DHA-EPA brand will mean high oxidation, high plaque, astaxanthin in Igennus is a much better fish oil preservative than vitamin C or E. Zenwise uses Nannochloropsis oceanica algae, to produce DHA-EPA via AlgaeOmega oil, different from the Schizochytrium algae used to make 98% of algal oil sold on Amazon, like DSM, the oil with the largest market share on the vegan oils market. This Nanno algae has about 500 mg DHA-EPA per 1.35 g of algal oil, or 37% (vs 57% from the DSM) DHA-EPA, *which means you eat a lot more oxidized fats just to get same DHA-EPA, not a good idea, so stay away from* Nanno*, if you're not allergic to DSM types. With Zenwise or* Igennus types*, you can test if your allergy (if any) is caused by the* Schizo*chytrium algal protein traces or* Nanno *algal oils (or Haematococcus pluvialis microalgae of* astaxanthin *complex) or by the rosemary extract, or 24 mg sunflower oil, both of which are known strong allergens added to almost all ω3 brands to increase shelf life*. After testing for 5 months Zenwise, Igennus and again Zenwise, it seems my allergy is due to rosemary extract and *sunflower oil Testa adds to DSM oil,* while hard stool due to Nanno algal oil. The vegan algal oil would be used in eterni foods until we synthesize EPA-DHA directly in 2 minutes via chemical physics reactors. NIH informs "allergens are small antigens that commonly provoke an IgE antibody response". We need a 1 million vegans study to see the 60 algal strains causing higher IgE response to mass produce the least allergy strain, be it Nanno and Schizo. ☺☺

Testa, using DSM oil, was very helpful by email, providing 10 times more info than the other companies, except Igennus: they shared by email a capsule has *834* mg oil, with *24* mg sunflower oil (used to process algal oil, so *14 mg* linoleic acid, ω6), *19 mg* ARA (arachidonic acid, ω6 in algal oil, so *33 mg total* ω6*/softgel*) 4 *mg vitamin E/C and* 3 mg rosemary extract, *min* 0.45 mg ω3, of which *minimum* 250 mg DHA, 125 mg EPA (as label shows), with the difference being DPA *(min means DHA may be 275, EPA 150, so 25-40 mg left for DPA)*, 0.015 mg carnosol (0.5%), 0.03 mg carnosic acid (1%, so 3 mg rosemary extract), 803 mg algal oil, 25 mg protein, 31 mg carbs, 181 mg saturated fat, 64 mg monounsaturated fat (oleic, etc), 530 mg polyunsaturated fats (*488* ω3, *33* mg ω6, *9* mg others). Each softgel has *803* mg algal oil with about 455 mg DHA-EPA/803=57% EPA-DHA and 33 mg DPA, *488* ω3 total, or 61% (488/803) of the DSM life's omega algal oil. Igennus got the same 57%, they also state minimum 400 mg DHA, 200 mg EPA, but in practice it's higher, plus DPA, so it ends up being 761 mg EPA-DHA (817 mg EPA-DHA-DPA, 56 mg DPA) per serving (2 softgels) of 1344 mg oil, or 380 mg EPA-DHA per capsule. Igennus said they use DSM too, made in USA (CA): labels show minimums, real is always higher. *Zenwise didn't share what oil country origin, red flag.* Zenwise label says 280 mg DHA, 140 mg EPA, those are the min due to variation from batch to batch, but the total is always 475 mg EPA-DHA min as the label

says, with extra ω3 DPA, etc to get to 525 mg ω3. This is confirmed by Zenwise and apparently many companies do that: write the minimum, so EPA+DHA is higher on the label than the sum.

The other issue with rosemary and peppermint extracts or oil, is that they may cause dry eyes by decreasing tear production. However, cheap is not always cheaper long-term due to arterial damage requiring 100,000 surgery, especially as each time I eat more capsules *(4 caps at once time after 4 days of no capsules to test the* toxicity*)* after a break in using it or even without a break, I notice 1. *disturbance of the microbiome (30 times more gas* due to *rosemary* extract or carrageenan which are famous to cause stomach upset; I got it before from rosemary and algal products; carrageenan is sulfated carbs (60 mg/capsule in Testa per their site, so maybe 0.2 mg leaks into the oil, not much... other companies use tapioca starch etc to make capsule *vegan*; as much as one sulfate group for 2 simple sugar units), so that sulfur will cause hydrogen sulfide since most people swallow the capsule, it can be bad, since it may cause digestive issues, cancer, diabetes, etc: EU banned carrageenan *from infant* formula) and 2. *shortness of breath* (this is either due to allergy to algal oil *(I got semi-sick one time from eating chlorella, the only time I did, big digestion issues, over millions of years we ate mostly fish in East EU, never algae;* some *people died eating spirulina*, so just go with fish oil (see next 4 pages for examples) if you get sick and no algal oil works*, you remain vegan, 1 softgel doesn't make you omnivore)* it causes via an ingredient or algal bacteria, improper Amazon storage leading to growth of algal bacteria or oil leaking into the lungs due to chewing the capsule (forgot to pour the oil in the smoothie as it is ideal) and causing issues), so *I don't buy Testa* anymore, they claim that *carrageenan* is "the only way to make a vegan capsule" (pretending they don't know?) but that's simply not true, there are other ways other companies use (tapioca starch etc, tapioca which is usually 100% free of cyanogenic glycosides), even if I used it 3 years not having a clue sunflower oil in it causes issues, since they add sunflower oil (some people, allegedly even up to 24% of people in some studies that are not faked, have allergy to it and *some even end up going to the emergency department due* to protein impurities, or bioweapons placed by spy agencies to blame it on sunflower based on fake articles they create, etc), rosemary extract (see below). Sunflower seeds are known to cause gas, so better gently try to not eat those in snacks if you get gas, it may damage our body. Use pure walnuts, since nut mixes often contain *large amounts of sunflowers to cause asthma*. Walnuts are far healthier than any nut combo you can buy from stores in USA, having far more of the alpha-linolenic and linoleic acids, that vegans get little of from pure veggies/fruits.☺☺☺

Peppermint oil pulegone (peppermint oil used in some brands) and trace stuff in *rosemary* oil are neurotoxins; same for E392 rosemary extract, which contains, among other things, carnosic acid + carnosol *(carnosol causes* nitric oxide synthase deregulation *in mice, so it may cause more plaque in humans if it acts in a similar way; carnosol is carnosic, except the COOH group becomes esterified, with the hypothetical OH group opposite to it (elimination of water, hence*

carnosol alcohol derivative name) on the ring, or think of it as a dehydrogenation enzyme: H of COOH and CH_2 of the ring become COO and CH) they just use "rosemary extract" *to hide exact ingredient concentrations of* some *G*enerally *R*egarded *A*s *S*afe (*GRAS*) polyphenols too; carnosic acid is thought of as super healthy, but impurities not so much. Testa DSM oil is grown in California, made by a Dutch company and packaged in Britain, so a lot of back and forth shipping to oxidize it.☺☺☺ Perhaps DSM oil sold by California pill making companies is safer, less ocean/continental shipping (can get so HOT). Histamine release from algal oil may cause dry eyes and other health issues; carrageenan releases sulfate and this is known to cause some real issues for some people, besides gas; my experience with Amazon is that if you write a long explanation for why a nonreturnable DHA-EPA oil is bad for you (say something about Amazon warehouse temp being 85 sometimes, etc, you got sick, gas, etc), they will refund it, so you may be able to find an algal/fish oil that works better for you. Testa offers a 50 euro test to see if you're ω3 deficient; Testa obviously will cause issues, since sunflower oil has oxidation compounds that we don't need and known protein impurities that cause allergies; if you use *vegan* or fish oil pills, start with 1 a day; Testa got the best packaging of any algal brand, the blisters/opaque box keep each cap away from oxygen/light better; sunflower causes severe allergy in some, so that may be the cause too. I never ate the capsule, but carrageenan can leak into the oil, so I believe the issue could be even the rosemary extract and the rotting of algal bacteria due to high Amazon warehouse temp. Rosemary extract (or oil in other products) in it may be the cause, because rosemary can cause "vomiting, spasms, pulmonary edema", besides dry eyes like all mint family oils. Companies are not required by FDA to list the ingredients on a central website for their 'extract'..., to serve We the People, serving We the Pharma owners: thus, they *use "rosemary oil, rosemary extract, rosemary oil extract" to indicate the same or different things, but* rosemary oil can be deadly...Most fish oils have lemon oil, or sometimes even peppermint oil as flavor and preservative; rosemary *extract* can contain just some polyphenols and sketchy terpenes that are then dissolved into the algal oil; the rosemary *oil* is different, containing more of the potential neurotoxins too, like all mint family plants, including pulegone in peppermint. ☺

Not everything is as the saying goes "*rosemary* is good for the brain" as some papers portray it, since it has 100s of chemicals and in the future high tech era many would be forbidden in food, there are 3000 papers at least on rosemary; peppermint has a few polyphenols and also highly toxic pulegone, is part of a lot of products, fish oil, chewing gum, etc, and also contains somewhat toxic menthone (pulegone minus a double bond), etc. Likewise, rosemary oil *extract* is a confusing word combo (may refer to e392, just saying it's soluble in oil only) on some DHA-EPA softgel labels, allowing Pharma to hide if it's polyphenols and carnosic/carnosol mostly or the more deadly stuff (rosemary oil has lots of chemicals, like eucalyptol 40%, limonene 6%,

linalool 6%, borneol, camphor 12%, α-pinene 13%, β-pinene 9%, etc but it's not the same as real *rosemary* extract of plant polyphenols). The E392 "rosemary extract" name is used for a mixture of terpenes, polyphenols: in EU got *1-33% of total weight carnosic+carnosol, ≥15* ratio of % carnosic/carnosol over % *of total volatiles ((-)-borneol, (-)-bornyl acetate, (-)-camphor, 1,8-Cineole (eucalyptol) and verbenone), ≥ 90% of* phenolic diterpenes as carnosic acid + carnosol (food preservative E392) Read more about FDA approved E392 here to see these % in detail. Testa says on their site their rosemary extract is carnosic which is *ultra* misleading, since it's a lot more chemicals and these 'rosemary extracts' are not all identical in toxicity. Companies using confusing "rosemary oil extract" etc, and FDA not requiring them to list all chemical ingredients is a form of clever expertise at deceiving the American people, like with Retaine MGD eyedrops calling a BAK component a fancy name to hide that the eye drop has toxic BAK. ☺☺☺

We got Naturalis IFOS certified rTG California made fish oil with rosemary oil as preservative. Naturalis is a sketchy company (see astaxanthin fake pills section for details), with only 1 IFOS certified product and unproven "from New Zealand" claim, uses Nannochloropsis oceanica to produce DHA-EPA via AlgaeOmega oil, not Schizochytrium algae Life's omega DSM. Avoid brands with lutein added, since that can cause eye crystals if too much lutein from food and pill. Avoid DHA only brands as those are not going to aid our brain that needs EPA far more than DHA: DHA brain half life *is 2.5 years, EPA 3 days, and you need EPA* to lower LDL and Lp(a). In the presence of oxygen, heat, light oxysterols rise 10 fold in 4 weeks ► Foods 2020;9(10):1501 so avoid ω3 as a dropper, buy capsules, sealed from oxygen. Companies (like Life Extension) don't provide % of trans fats or oxidized fatty acids in the Chile Golden Omega oil they use, but Life Extension does confirm thru some third party that they got plenty of toxins, more than Igennus: 0.2 ppb PCBs, 0.08 ppt dioxins + furans, 0.015 ppt dioxin like PCBs, 392°F heat oxidation of oil parameters (trans fats to create arterial plaque, see pic result of fish oil oxidized lipids, vegan oil is not heated like this to oxidize): Acid Value 2.86 mg, KOH/g 2.79 meq/kg, Anisidine 6.62, Oxidation 12.2; dementia causing metals: Hg < 0.0050 ppm, Pb 0.035 ppm, As < 0.050 ppm, Cd < 0.010 ppm. The quantum field of the entire human race is damaged by *the torture of fish that are far* closer *to humans than plants.* If you suffer from allergy to algal oil, your best bet is fish oil. Among fish oils, the cheapest IFOS quality is Igennus (select oil to see oxidation data), due to lower oxidation values than Life Extension. Extension is made from Chile coast anchovies, processed within hours, softgels look brown (oil is brown too, like flaxseed oil is due to lignans and olive polyphenols (company Certificate of Analysis shows 7.5 mg hydroxytyrosol, 2.25 mg verbascosides, tyrosol 1.5 mg, oleuropein 9 mg, softgel 2168 mg; 710 mg EPA, 500 mg DHA, 2 mg astaxanthin), *so the pill appears black from outside* (like endless vegan vitamins with the same brown polyphenols) *as in the Amazon video, but once you break it and swallow the oil, you will see the capsule is brown due to caramel color they use in their gelatin* maltodextrin *beeswax*

silica softgel shell) to prevent light and bottle is dark blue. Nordic Naturals is expensive and their values are sky high for PCBs, dioxins vs Igennus. Top quality products have seals from IFOS (see values for the best fish and algal oil brands), USP, NSF. 4 Life Extension softgels got 20 mg olive polyphenols (less powerful than lignans and other polyphenols to prevent plaque), 10 mg lignans from sesame seeds. Flax lignans reduce rabbit arterial plaque by 73% vs pure flax oil and give acne in some, since lignans are phytoestrogens, so if acne appears switch brands. If vegan or to avoid all toxins in fish oils, you can buy Igennus algal oil (cheapest vegan EPA-DHA on Amazon) or a safe fish oil if not vegan and get lignans from kale 63 mg/100g, broccoli 99 mg/100g which is easier than 257mg/100 g flax (see tables), a*s you can eat 100 g kale easily, but not flax).* Just 10 g broccoli gets you same 10 mg in their fish oil capsule. Life Extension has *"rosemary extract"* (company said E392) as a preservative, not rosemary oil, so it has the polyphenols and potential allergic reactions in those with rosemary sensitivity (asthma). Extension got a pricier (2$ extra) Astaxanthin 2 mg version fish oil for eye health, with 5 mg lignans, rosemary, 60 mg phospholipids. Flax/sesame/chia oil/cruciferous *lignans are phytoestrogens, which can mimic estrogen's beneficial effects on eye glands, this may cause* less dry eyes in ladies wit*h low estrogen*. A 200 g kale smoothie has 126 m lignans vs10 mg in 4 softgels per serving of this fish oil. Life extension vitamins are usually way overpriced (sometimes 10 fold vs other brands per mg of lycopene, etc), due to a many staff they have (professional in their email replies, web content, unlike most; "life extension ω3" yields many products on Amazon vs 1-2 for others). Many Amazon sellers, MDs who started 2 years ago, can't even write a correct label, 'total fat is 1.5 g, algal oil fat 1.6 g', vs 1980 started Life Extension. Life Extension pills with lutein can lead to overdose (eye crystals) if you eat kale, so read 90 papers on each ingredient before a buy. ☺

Brands to avoid are those without any of these antioxidants: vitamin E, C, annatto extract (used to color the oil capsule which many discard, not to color the oil, annatto has 5% carotenoid orange bixin, that give sit its color, that may help ocular health; can cause some allergies though, most Americans eat it without even knowing), astaxanthin (which is 500x times better than C and E combined, astaxanthin is usually made from algae, while fish sourced one maybe contaminated with viruses), "pulmonary edema" rosemary oil extract or following the best practices of avoiding light oxidation, etc). Vegan algal oil is triglyceride form, unlike the synthetic ester ω3s on the market; eye doctors recommend triglyceride ω3s, due to double (or even triple in other studies) the bioavailability (2.5 times for EPA, 2.1 times for DHA) ► Arz 1990;40(6):700-4. The % of EPA+DHA in the red blood cell membrane (also called ω3 index) increased 197% with triglycerides vs 171% with ethyl esters versus corn oil placebo after 6 months ► EJCN 2011;65(2):247-54. Triglycerides bioavailability was 124%, ethyl esters bioavailability 73% versus fish oil ► PLEFA 2010;83(3):137-41. 98% of fats in food are triglycerides; man made ω3 are ethyl ester

forms that dissolve Styrofoam fast (300+ times faster) due to being far less polar than triglycerides; Styrofoam is polystyrene, very nonpolar -[CH_2-$CH(C_6H_5)$]$_n$-, no polar OH groups. DSM oil is made in California from algae grown in closed conditions, (no antibiotics). ☺☺☺

The *vegan* ω3s are more like eterni foods. 1.1 g DHA+EPA is the same as eating *daily* 6 times a week: 142 g/day of canned pink salmon or 68 g raw Atlantic farmed salmon or 780 g of tilapia or 116 g canned sardines or 85 g raw Atlantic wild sushi salmon or 134 g coho farmed raw salmon; Atlantic farmed salmon sushi has the highest ω3, 3.8 times more than the lowest chum salmon, 2 times more than most salmon, 12.5 times more ω3 than *raw* tilapia. When you eat *cooked or raw tilapia*, not salmon or sardines, *you can* become DHA deficient. A reason to avoid fish/fish oil ω3 is PCBs, fat (*10 g fat*/1.7 g ω3 sardine, *5.5-6 g fat*/1.7 ω3 in tuna/scallop/salmon, versus *2.7 g fat*/1.7 g ω3 in algal oil pill), saturated fat + cholesterol + heavy metals absent in California algal oil. Canned or overly cooked fish ω3 can become 0 g or 2-10 times lower. ☺☺☺

Men make less DHA from dietary ALA (another ω3), so *vegans* need vegan DHA or vegan DHA-EPA, just like others take fish oil or DHA rich eggs to get the same DHA-EPA. We can't boost serum DHA-EPA by eating walnuts, because walnut linoleic acid LA competitively inhibits formation of DHA-EPA from ALA. Vegans we need to eat flaxseed oil, chia seed (3:6 ratio 4:1 or 3:1) to boost DHA_EPA, but some have allergies to flax/chia, so algal oil is the only way. Serum DHA and EPA increased 900% and 200% after eating DHA-EPA twice a week, and 0% after eating ALA from 42 g walnuts 6x/week (ALA is competitively inhibited from becoming DHA-EPA by ω6 LA in walnuts due to ratio of ω3:6 of 1:4, ALA/LA compete for the same desaturase and elongase enzymes), so ALA dietary boosting doesn't always bump DHA-EPA if we also boost dietary LA (or other ω6) ► PLEFA 2012; 87(4-5):111-7; however ALA did increase 140% in the walnut group and higher ALA was noted to lead to less heart disease ► CJC 2010;26(9):489-96. This competition for the same enzymes is why AJCN 2006;83(6 S):1483-93S suggests that "if one eats a lot of ω6, to maintain ideal health one would need to eat 3.5 g of EPA-DHA, but if one eats a little ω6, less than 2% of energy linoleic acid, one needs only 350 mg of EPA-DHA". Flaxseed oil is healthiest in terms of ω3:ω6 ratio 4:1, followed by chia oil 3:1, sacha inchi seed oil 1:1, canola oil 1:2. I never use oils, as they get oxidized, AGE enriched fast on the shelf and during industrial processing (example of 3-MCPD in all fried foods, see Table 1 with how many foods got it, refined oils, extra virgin (virgin=unrefined on paper) olive oil, much of which is mixed with refined, i.e. non-virgin, olive oil, via fraud), create many AGEs fast during cooking. PCBs, pesticides, heavy metals in fish oil raise inflammation markers, so choose vegan oil when possible, as it has less of these and no trans fats. People who eat a lot of PCBs found in animal fat also get strokes 9 times more frequently. *In infants, those fed algal vegan DHA became taller and smarter than those fed* fish DHA ► JP 2005;146(4):461-8. Fish oil has much more *EPA* than algal oil; EPA might interfere with the infant uptake of ARA and synthesis of certain prostaglandins. *Ocean contaminants may*

damage infant brain, but so could sunflower oil, rosemary *extract* etc have effects like possible human nitric oxide synthase suppression, *etc* leading to cardiovascular issues. ☺☺☺

Ntr 2011;3(5):529-54 explains the role of DHA in preventing cognitive decline, brain shrinking with age, depression (caused by hippocampus atrophy), Alzheimer, Parkinson and all kinds of brain diseases. People with deficient liver enzymes for turning dietary ALA into DHA are very likely to get Alzheimer if they get no DHA from pills ► PO 2010;5(9):e12538. They found people with Alzheimer have lower DHA than normal in the brain and liver, *and* more *EPA and DPA than* normal. NNS 2008;11(2):75-83 showed that memory and rate of learning were significantly improved when 800 mg of DHA was combined with lutein (12 mg/day). Ntr 2016;8(2):99 found that DHA is the key for preventing *cognitive* decline, not EPA or ALA. Total intake of DHA (but not EPA) was also a determinant of lower Alzheimer risk. Patients with early stage AD reportedly have lower dietary intakes of ω3s vs avg. DHA only, not EPA or placebo, improved brain blood flow. Alzheimer people also had lower ALA in the brain. DHA enhances phagocytosis (destruction of Alzheimer plaque) of Aβ42 (amyloid β peptide made of 42 amino acids) by human microglia ► JAD 2013;35(4):697-713. Alzheimer affects 4% of those over 65 and 32% of those over 85 years old. B vitamins and DHA work in tandem to reduce brain atrophy in mildly cognitive impaired patients. B vitamins may promote DHA incorporation into phospholipids, and likely have synergistic antiinflammatory effects. ApoE4 (apolipoprotein E4) is the major known genetic risk factor for AD (Alzheimer's disease). apoE4 carriers account for 65-80% of all Alzheimer cases. ROG 2008;1(4):162-9 presents the *hypothesis* that pregnant moms would benefit from taking EPA too, besides DHA because only 1-11% of DHA gets converted into EPA and EPA plays a role in allowing DHA to get to the fetus and in preventing preterm labor, etc. However, taking DHA increased EPA levels a lot ► EJCN 2006;60(3):386-92. Dietary DHA raises plasma DHA (and a modest rise in EPA) in a dose-dependent manner ► AJCN 2006;83(6 S):1467-76S. "Mental and psychomotor developmental evaluations and cord mercury (from fish oil, but not *vegan* DHA-EPA) levels were significantly negatively associated with the 36- and 48-month IQ scores. No child with a cord mercury level higher than 13 µg/L had a full IQ score greater than 100" ► ROG 2010;3(4):163-71: moms need DHA while breastfeeding and after breastfeeding, to avoid postpartum depression; higher DHA cord blood concentration was related to longer gestation, better visual acuity, mental, psychomotor skills. Higher DHA in the milk of breastfeeding women is also related to higher IQ in the child. Low ω3 intake or even high ω6 intake, *even if ω3 is fine, led to* the highest risk of preterm delivery and complications due to prostaglandins E2 [PGE2], F2α [PGF2α] made from ω6 that trigger preterm labor. EPA helps myometrial (uterine wall) relaxation thru prostaglandins PGE2, PGF2α. Women taking DHA pills delivered babies who weighed more and had larger head circumferences. ☺☺☺

Frying, high temp long oven cooking or canning fish can often remove *most* or all ω3 acids ►

"Canning *totally* destroyed *these* (EPA, DHA) fatty acids. In fried tuna, the losses of EPA and DHA were 70 and 85%, respectively." ► JFST 2010;47(2):174-81. Thus, with some canned fish, instead of healthy fats, you eat oxidized fats (5 g not 0.1g in a fish oil capsule) that will caused oxidized LDL to enter arteries and form plaque, giving you strokes and infarcts, all poison you thought was a health food, thanks to a deregulated genocidal aristocrat run food industry.☺☺☺ With 5 million companies, FDA can't test 5 million poison products, with 11 companies, we can test those 500 products 500 times better, so we eat healthy foods instead of POISON. You need 1000 times more Mass Spectrometers etc to test all POISON variants sold today by thieving gangsters. Fish is canned at 120°F and this high temp oxidizes the acids in the vegetable oil they add and in the fish, while the vegetable oil speeds the transfer of cancer causing plastic BPA from the can lining to the fish, versus fish packed in sea salt or tomato sauce, with sea salt being better, as acidic tomato cause causes more plastic to leak. With 1.2 µg/g As (arsenic), sardines are not ideal, even if this As is mostly organic nontoxic, unlike the 0.15 µg/g in rice which is inorganic toxic As. Be wary of ω3 levels listed on canned fish, or calculated (for pregnant/lactating mom needs) from cooked fish made at home, because after cooking or sitting *for 1-4 years on* shelves *ω3 can drop 9 fold and the company may list the precanning* ω3 level or the best batch of 9000. Sometimes canning temp can be raised without updating ω3 level, as they don't know ω3 drops. Canned/cooked fish can be a very *unreliable* source of ω3, when you need PRECISION. Thus, even daily (canned or fried) fish eaters may be DHA deficient if their intake of ALA ω3 and other precursors (there are a few others, less known) of DHA-EPA is low. The irony is a vegan mom, eating tons of chia seeds or oil (flaxseeds not good for pregnant moms), canola oil, algal DHA+EPA, and/or walnuts could have DHA serum/milk level 10 times higher than an omnivore mom eating canned or overly cooked fish that has destroyed all ω3, leading to severe damage to fetus brain and eyes. The vegan DHA-EPA pills are consistently at the same ω3 level (no cooking), way better than "mercury free" fish oil supplements for those few people (usually men) who can't turn ALA into DHA. Today many fish oil supplements are almost *mercury* free, but there are PCBs (higher for fish oils than algal oils even for IFOS) and other heavy metals sometimes (especially the non-IFOS brands) in fish oil, besides saturated fat and cholesterol. The animal saturated fat and cholesterol in fish (which was shown to affect the heart and vascular health of babies in the womb) and fish oil supplements are why many don't recommend fish during pregnancy or at any other time. 69% of fish oil tested lost a third or more of the ω3 acids in the SR 2015;5:7928 study where only 9% of fish oils had the ω3 amount listed on the label. This is because fish oil is heated at high temps to distill out impurities like heavy metals, etc and this causes oxidation. Since storage and light also oxidize oils, buying a brand with antioxidants (astaxanthin, vitamin C, E, rosemary, carob) helps. Due to heavy metal, ocean junk and extra heat processing to remove fish odor, fish oils have a higher oxidation rate than *vegan* algal oils (grown in clean water pools): "The tendency of n-3 LC-PUFAs to oxidize under light is also

influenced by the presence of *impurities such as protein or heavy metals* and its conjugate; *phospholipids* (fish) are more prone to oxidation *than triglycerides (vegan algal oil)*. Because peroxidation is an accelerating chain reaction, small concentrations of peroxides in the source oil, or exposure to oxidizing conditions during processing could have a large effect on the rate of oxidation" ► BRI 2013:464921 ► "it is likely that the ω3s used in many clinical trials have also been significantly oxidized (that's why some studies (using algal, not fish oil) got better results)... oxidized *lipids* may cause organ damage, inflammation, *carcinogenesis*, and advanced atherosclerosis." That's why many vegan MDs never eat oils (except the ω3 algal oil pills), *vegan* or real "cheese, mayo, milks, butter": vitamins, fats oxidize as they sit on the shelf. ☺☺☺

BJN 2002;88(4):355-63 found that in the *healthy young* men studied, *8% of* ALA (α-linolenic acid) is *converted to EPA* and *0 to 4% of* ALA *is* converted to DHA, less in *older* men. 21% of ALA in healthy young women is converted to EPA, 9% is converted to DHA ► BJN 2002;88(4):411-20. Thus, women have far fewer issues with DHA than men. Studies (HMG 2006;15(11):1745-56 and AJCN 2018;108(5):1135-44) in genetic variation for chromosome 11 genes linked to *FADS*1 and 2 (delta 5 and 6 *f*atty *a*cid *d*esaturase), showed in certain populations some SNPs are linked to much lower blood levels of DHA, so for those infants/moms we may need twice as much *DHA* in breastmilk and first 9 years of life to achieve same child development GOALS (brain, IQ, eyes, etc). PO 2011 23;6(2):e17181 found "Not being breastfed conferred an 8-9-point disadvantage in cognition among children GG homozygote for rs174468 (low FADS1 activity) but not among those with the A allele". PO 2010; 7:e11570 found "breastfed GG children performed better than their formula fed counterparts by an additional 5.8 (IQ) points". Ped 2011;128(3):e505-12 found *less infant* diseases *(infection, allergy, etc) first 6 months of life in the pregnant mom group that* got 400 mg DHA from *vegan* algal oil BEFORE *birth*. Thus, it seems better to get some DHA (the typical 250 mg/day found in most vegan DHA capsules) to be safe, especially since most women today get too little ω3 (need 3 g of ALA to make 270 mg DHA assuming 9% conversion), and too much ω6 from vegetable oils, processed foods, nuts, which compete with ω3 for prostaglandin formation leading to more inflammatory compounds. Very few men get 6 g of ALA daily (needed to make 240 mg DHA/day, assuming 4% ideal conversion), so men who eat no *algae, fish (or meat, some meats contain tiny levels of DHA), DHA rich eggs* need DHA-EPA pill even more than women (see above: *0-4% ALA into DHA versus 9% in* women*)*. Since DHA half life is 2.5 years in the brain, DHA is mostly used to keep membranes (arteries, joints) flexible, *all* membranes *use DHA*, *organs always create* cellular *membranes during cell division.*☺☺☺ Lipids 1997;32(3):341-5 explains that DHA can convert into EPA at a rate of about 9%. Many papers showed too much fish oil leads to cancer (due to PCBs and heavy metals, absent in *vegan* DHA) and that some algal vegan DHA oil has more DHA than fish oil percentage wise and is better than fish oil for a variety of reasons related to fats interfering with the fatty acids biochemical cycles in the human body

and the prostaglandin synthesis as relating to inflammation. Hyp 1999;34(2):253-60. found DHA lowers BP/HR, not EPA. Other studies found a positive role for EPA. DHA is more important as a raw material for eye/brain/arteries, as most ω3 in eyes and brain is DHA, not EPA.

AJCN 2010;92(5):1040-51 is a 4,900 people study that showed that *vegans* and fish eaters had almost the same *level of EPA and DHA in their blood* plasma, with vegans having more DHA (286 µm/l vs 271), less EPA (50 vs 64). Studies show that *when we eat less DHA, the body increases the conversion rate of ALA to DHA and makes better use of DHA*. Hence, DHA pills may only be needed for pregnant women and those males (females convert ALA to DHA much easier) who have low serum DHA, or those *vegans* who eat little ALA due to a low-fat diet to prevent heart disease or diabetes. The existence of countless centenarians who ate only meats (which have 100 times less DHA than fish) or only *vegan* food but no fish, indicates that some genomes are highly adapted to *virtually 0 DHA/fish intake (DHA half life is 2.5 years in the brain)*, having a high ALA to DHA conversion. For them, living to 100 without daily DHA is easy, while for those whose ancestors became highly dependent on *preformed* DHA, the enzymes to convert ALA to DHA are not as adaptable. But since neurogenesis happens all the time (new discovery, they thought no new neurons grow), and since, in aging, enzymes stop working as well, for *maximum cognitive function*, healthy blood pressure (no stiff arteries), some *preformed* DHA helps in most genomes, since neurons need DHA. *Algal DHA (no fish)* allows *vegans* to do what no omnivore can, i.e. to have a 5% fat intake, which has advantages, and could prolong lifespan, since some mice develop 114 times more atherosclerosis after identical fat intakes.☺☺ Stroke 2011;42(9): 2538-43 found that the Japanese (the longest mid-large size lived nation on Earth) have 2 times the EPA-DHA level in their blood compared to Americans. However, other studies found that Norwegians eat as much DHA-EPA as Japanese and have poorer heart health, probably due to eating more animal oxidized and long fatty saturated fatty acids. The Eskimo studies show that eating 4 times the DHA-EPA ω3 that Japanese eat doesn't improve heart health, since they get too much long chain saturated fatty acids. DHA may only prevent atherosclerosis when the total animal long chain saturated fat is low. The blood levels of DHA and EPA are affected by the amount of EPA, DHA and ALA ingested, smoking, diet, ω3:6 ratio, etc. Even at identical serum EPA-DHA, we can't know how much DHA is made from ALA and how much is being taken by the cells vs blood. So, while blood DHA-EPA may rise after ALA consumption, it's hard to know precisely what is going on at the cellular level, what the conversion was. ☺☺☺

12.4.29.1. Why it's healthier to avoid oils/fat (except flax-chia-DHA-EPA ω3 pill) (18 pages): new info on TC (Total Cholesterol), HDL, LDL, TG, Apo(a), ApoB, Lp(a), small size bad LDL_{3-4} & HDL_3

This section explains how you can get closer to LDL 46, TC 105, TG 65 (my values 2026, at PC desk blood pressure 93/65 due to Na/K ratio 1:22 and pulse 50 on better days, everything +4 on

worse days, hs-CRP nondetect (0.2 limit)), Hcy 6.2 (take .5-1g TMG if Hcy is > 7 + methylated B complex (more on Hcy in this section) if TMG not < 7, as TMG & $B_{6,9,12}$ lower Hcy) on a 6% fat vegan diet + supplements, without any medication. Studies (10+) show that lower LDL means fewer strokes and infarcts, with some having LDL only 14 (10x lower than average, yet healthier than most) without medicines: "28% reduction in LDL leading to an 88% reduction in coronary events" ► JCI 2015;125(10):3725-6. LDL < 50 is ideal for all.☺☺☺ To lower ApoB, reduce saturated fat to 1-2% of calories, not 15% as most people: it's been known for decades that saturated fat raises LDL, ApoB and the risk of plaque. Eterni foods will give all 4000 year lifespan, but until then, we need a transition basic knowledge to make it to 100 at least. Today, we have 2000 books and "ideal diet" celebrities who each claim their diet is the best for most people. The truth may be very different. Just look at how different the 4 blood types are: A+ sticky and clot-plaque prone, so less fat is better as fat makes blood stickier, others are more prone to cancer and high triglycerides if they eat fat or ketogenic, etc. With 4 types of blood, 4 types of liver, 4 types of kidneys, 4 types of endothelium, we get 4^4=256 types of diets that are optimal for each, and there isn't a one diet that fits all. If some have no pancreas left and need to use fats and protein only. With each decade we discover more categories, so 4^{16} = 4,294,967,296, 4 billion diets. This level of healthspan and lifespan optimization for all is only achievable thru the Eterni Powder Foods Personalized Weekly for our DNA. In the future we'll probably eat amino acids, peptides only, no proteins, to save energy wasted to split proteins. Everything in this book is a hypothesis, because most studies we rely on are false (see why). As we develop Subatomic Restore Tech, we don't eat after 25 and the diet discussion will drop, as all energy is derived mostly from the New Matter Central Being that Projects the Outer Form. In the meantime, there are phenotypes that may live longer, be healthier on a more vegan diet that is lower in fat. Semi vegan Adventists live to 88, Asians to 85 (more vegan, less junk food), Latino 80 (more legumes, corn less junk/gluten), Whites 78 (junk food), Blacks 73 (junk/fried foods, less education). The Asian data is mostly due to aristocratic status, not veganism, since few Asians came before 1900, all being uneducated more vegan: most US Asians migrated after 1900 from wealthier families with access to education, got PhD here (or best Asian Uni), so the higher income, more MD visits, mostly PhD migrants with 120+ IQ (brain drain) vs 100 avg US adds 7 years: many made millions in China by shrinking the lifespan of millions of slaves, moved to USA, becoming landlords, investors, the typical small business parasite that keeps USA backwards with 33 million vs 11 companies. Taught to be greedy, like everyone else in all *nations*, they chased the Prize: $$$, not helping the most live the longest via eterni foods, many became MDs to make 20-80x the min wage while shrinking US lifespan, being MDs is the easiest way to be millionaires. Wealthy whites/blacks also live to 85, not due to veganism, but far lower stress, better food/pills, better health insurance, air/water quality. Lifespan relates to income mostly, not to veganism, but within a given income veganism may help some, if enough supplements exist, etc.

Asian MD with LDL 168 and high carotid plaque, learned from a white MD about <10% fat calories vegan diet reversing plaque and did it, his carotid plaque vanished too, LDL dropped to 61. Why did this MD plaque vanish, while in studies using 20 mg statin or other drugs to double HDL or half LDL, plaque didn't change and they died like "no meds" controls? Because a diet change introduced 900,000 mg of other beneficial compounds vs the 20 mg statin given by the typical MD paid 20-70x min wage to kill us. Real health is possible only with pressure cookers and total control of the food industry by the 1st of the 11 companies, since 20 mg statin won't cancel the 3,000,000 mg of poisons by the Food Mafia. More on this low fat vegan diet (50x less land, 10x less water than beef, 20x more scientists to discover living to 4000) is below:

Okinawa centenarians eat 6% of calories as fat vs 35% the average American and they're the most independent and high functioning of all centenarians, due to low body fat, just as Japan is world's longest living nation, for countries over 7 million people. MD followed the no oil 4-8% fat vegan protocol and his LDL fell from 186 to 84, carotid blockage from 50% to 0%, reversing in 3 months what most MDs can't do in 50 years with 900 pills. 2 min video shows fat lady's coronary artery blockage of 85% vanish in 5 months using same 5% fat vegan diet. 15% of 22 year old US Korean war soldiers (autopsies) had 50+% coronary blockage, 77% had blockage/atherosclerosis, but only 0.5% had atherosclerosis in their medical records (99.5% were clueless of how sick they were, just like today), Table 3 ► JAMA 2012;308(24):2577-83.☺☺☺ More cases are presented in the reversing heart disease section with all arterial tests that can be done. I eat 6% fat (see diet), so on 03-17-2026: TG 65, VLDL 13, LDL 46, TC 105, CRP came nondetect (<0.2 mg/L). TC 105 is typical of vegans, some vegan MDs got TC 93. I don't take any medications. Keep HDL high, TG 40-65, TG/HDL = 0.5-1.0, LDL/TC low. JAMA 2007;298(3):309-16 Table 4 shows that the lower the TG, the lower the risk of cardiac events. MDs aim for LDL 25-55 (Dr. Lin LDL 195 -> 37) in those with plaque/high risk of death by infarct, stroke, though low LDL lowers immunity, risks sepsis/early death, causes side effects from drugs used to lower it. TC = LDL + HDL + VLDL + IDL + Lp(a) + Chylomicrons. Oddly, all or some Lp(a) is counted as part of LDL sometimes, so then the TC may appear higher, as IDL + Chylomicrons are also measured as part of the other numbers. VLDL = TG/5, if normal TG values. Clinics 2008;63(4):427-32 says that high TG/HDL (esp. >2) is the strongest predictor of CHD, death, not LDL. 117 year old HDL was 72, VLDL 6, TC 160 (4.14 mmol/l, free + esterified C in the table), LDL = 160 - 72 - 6 - IDL - Lp(a) - Chylomicrons = 60 or lower, telomeres short (cancer protection?). Her TG/HDL of 1.1 (table) is ideal, so her TG was 79. TG are lower, HDL higher if you eat 2-3 meals within 10 hrs instead of 4-5 within 15 hrs daily. In centenarians LDL is not the 35-70, but 70-130, 104 in Spain (LDL 104 lived to 105, not 117.5 as LDL 60? lady). Moderate LDL fights off bacterial infections better, giving longer life, but also shrinks life by more plaque and by more viral infections as the Table shows relative risk RR on the right (all cause mortality is 0.74 for lowest LDL even if higher LDL fights

bacterial (not viral) infections better due to the fact that "LDL particles take up toxic LPS… (made by) Gram-negative bacteria" preventing bacterial sepsis, inflammation. Centenarians had 38-75 HDL, higher HDL, LDL particle size, so eat low sugars to raise particle size. In omnivores (not vegans) LDL < 70 meant 1.7x higher death risk, while LDL 130-60 meant 10% less death risk, as LDL is a part of the immune system: this study sounds convincing, but it fails to adjust for inflammation, so when you adjust for those CRP, Hcy, TNF, etc inflammation markers, the low LDL doesn't raise noncardiac mortality. Why? Because microbial clearance, cancer tumor destruction depend primarily on cell-mediated immunity (neutrophils, macrophages, T-cells, NK cells, and the complement system), not on LDL catching toxins generated by gram negative bacteria. PCSK9 inhibition (by many supplements or pills) actually enhance anti-tumor immunity by preventing the degradation of MHC-I molecules on cancer cell membranes, allowing cytotoxic T-cells to recognize and destroy cancer cells faster. Thus, when controlling for inflammation (hs-CRP, Hcy, IL-6, TNF, LP-PLA2) and eliminating reverse causality (sick people, undiagnosed illness get low LDL) of observational studies, they found that LDL 30 doesn't increase cancer or infection risk vs LDL 100 in interventional (RCT) and genetic trials (people born with LDL 20, via loss-of-function mutations in PCSK9, HMGCR, or NPC1L1, where LDL didn't fall to 20 because of illness, but was 20 all along, so no reverse causality of "sickness caused LDL of 20-30" can exist). The small (100K, not 5 million) studies show that, when adjusting for CRP and systemic inflammation markers, LDL 30 means a longer life than any LDL > 30, the lower the LDL, the longer the life, as less plaque exists and the lower the CRP, Hcy the longer the life ► LA 2023;401(10384):1293-1301 & JAHA 2020;9(3):e013934. Low CRP, Hcy, IL-6, TNF are more protective than low LDL, but low LDL helps lower all cause mortality. The lower the Lp(a) (a deadlier LDL form defined in 2 pages), the longer the life ► AJPC 2024;21:100903. However, we need much larger studies to confirm these preliminary "findings": LDL, TC, TG, Lp(a) shorten lifespan independent of CRP, Hcy, TNF, IL-6 and vice versa, so to live longest, we need to lower all 8 via diet and medicines.

All studies are under 100K usually, so we do lack a big study (3 million) that looks at LDL and all cause mortality while adjusting for 100s of confounding factors, including CRP, Hcy, etc. People pick a study showing LDL was associated (didn't cause) with longevity, but that LDL may be a sign of their low stress, good sleep, certain diets, or other confounding factors or low LDL was caused by disease, instead of causing death (reverse causation). The U shaped LDL curve many get so excited about to feel good about their deadly blood drinking diet, is caused by reverse causation of undiagnosed illness or unaccounted for confounders: CRP, Hcy, TNF. When studies are done correctly, adjusting for the inflammatory confounders, that U shape becomes a straight slope line, the higher the LDL, the faster you die, see that in studies: supercentenarians low LDL, centenarians high LDL. Data doesn't lie, so far the high LDL camp has to prove they got a real study. Stress is a main driver of plaque and thus mortality, but no study adjusts for stress, sleep

quality, and 100s of other biomarkers to really know, beyond any doubt, the best LDL for living to 4000. We don't yet know for SURE the optimal LDL level, be it 5, 10, 25, 40 or 60 to live to 4000. At what level, LDL 4???, is immune function or brain function really so weak, that the advantage of lower plaque is canceled by infection or dementia? All we have is sketchy studies, as corruption defines all published research (more $, prestige, tenure for more junk studies published), industries due to unequal pay, all looking to sell stuff, fudge data to get a grant. A 72 yr old with LDL 450 had no arterial calcified plaque at age 72 ► Cur 2018;10(4):e2452, as MD did autopsies of sky high LDL folks with 0 CAC score/plaque, believes statins cause calcification and plaque, however CAC score doesn't measure soft plaque, which is far more lethal.

Most MDs believe in keeping LDL < 55 using supplements/diet or low mg diabetes causing statin (2.5$/month, blocks HMGCR, so less cholesterol is made in the liver) and ezetimibe (3$/month, inhibits the transport protein NPC1L1 that transports to blood the intestinal cholesterol & phytosterols, 75% from bile secretion and 25% from diet) or PCSK9 inhibitors (herbs, berberine or pills). Seniors have weak immunity and can die fast via sepsis, bacterial infections, so LDL of 10 may be too low for weak immunity seniors where g negative LPS toxins can kill them, unless they take some other protective nutrient. However, few have LDL 10, most seniors get to an LDL of 25-70 via the 3 most common pills: HMGCR, PCSK9, NPC1L1. Enzymes bromelain, nattokinase, citrulline prevent plaque without low LDL of 7 that lowers immunity. Vegan LDL, HDL, TC are 50-70% lower than omnivores. MDs lower LDL to 10-35 in those with imminent death risk. HDL, LDL, ApoB & Lp(a) particle size is more important than the value:

LDL is light, it's oilier, as oil floats in water, HDL is heavy, more protein, as meat falls into water:

1). HDL is 50% protein — High Density Lipoprotein, heavy, 1.06-1.21g/cm^3, 5-17 nm diameter

2). LDL is 5-25% protein — Low Density Lipoprotein, light, 1.02-1.06g/cm^3, 18-28 nm diameter

3). VLDL is 10% protein — very LDL, very light, 0.95-1.01g/cm^3, 30-80 nm diameter

HDL (good) does "reverse cholesterol transport", taking excess cholesterol from arteries/tissues to the liver for excretion via bile into feces, HDL acts as a vacuum cleaner, while LDL (bad) dumps lipids on arteries, delivers lipids to cells in the body. Each LDL particle has an ApoB protein wrapped around it, so the higher the ApoB is, the smaller the LDL particles and the easier for them to sneak into the artery via small holes to form plaque. Thus, ApoB is a far more accurate indicator of risk than LDL itself, with ideal ApoB < 60 mg/dL. Centenarians were 10 times more likely to have ApoB < 60 mg/dL than controls ► NRIZ 1997;34(3):202-8. LDL rises with poor or short sleep, smoking, drinking, stress, dehydration, high iron, low thyroid/estrogen, trans-fats.

What we call LDL is LDL + IDL (intermediate DL) + Lp(a). Lp(a) is well defined on Wikipedia: it is a

type of LDL particle *(LDL transports cholesterol to cells that need it, people can be healthy even with LDL 10-20, in fact, PCSK9 inhibitors and statins can lower LDL down to 5)* that has an extra protein around called Apo(a) linked to the ApoB (on every LDL) via a thioester bond that binds oxidized phospholipids OxPL via KIV-10. Apo(a) consists of repeating protein loops called Kringle IV (KIV) domains (types 1 through 10), each domain having about 80 amino acids and 3 disulfide bonds arranged in a triple loop fold. KIV-10 (like other KIV that have weaker LBS) has a pocket composed of charged amino acids (Lysine-Binding Site, LBS), that has a + charged area and a - charged area (Asp57) that locks onto the PO_4 - charged and NMe_3 + charged areas of the dual charge (-/+) phosphocholine head group of OxPL via a double lock mechanism: this was proven by the creation of Apo(a) without LBS (no Asp57), which was unable to bind OxPL. This strong bond prevents the toxic OxPL from breaking loose back into the blood while the Lp(a) transports it to the liver. "The Apo(a) component of Lp(a) contains several lysine binding sites, including a potent one on kringle IV10, that allows Apo(a) to bind to denuded endothelium and presumably deliver its cargo of cholesterol and other lipids for cell membrane repair." Lp(a) binds and carries toxic OxPL (see how) released during tissue damage, bacterial infections, clearing the blood of these toxins by dumping them into the liver; 85% of blood OxPL are bound to Lp(a) ► NEJM 2005;353 (1):46-57. OxPL-Lp(a) bind to the arteries too, causing plaque ► JACC 2015;66 (11):1236-46. Lp(a) values vary from < 0.2 to > 300 mg/dL, just like HDL can vary from 0.1 to 220, LDL from 0.1 to 2000 (extreme values are genetic, rare). Apo(a) is encoded by the LPA gene. Known "functions of Lp(a) include wound healing, promoting tissue repair and vascular remodeling… Apo(a) shows a high amino acid sequence homology to the serine protease plasminogen, and consists of a carboxy-terminal, enzymatically inactive, protease-like domain followed by a kringle-V domain and a variable kringle-IV… angiostatin, a cancer-mediated proteolytic fragment of plasminogen, is able to inhibit metastasis and neovascularization of tumors. Based on the high grade of homology between plasminogen and Apo(a), the potential anti-neoplastic (anti cancer metastasis) role of Lp(a) was… postulated" ► CRCS 2017;12(S1):31-7. Plasminogen generates plasmin protein that dissolves fibrin, other plasma proteins.

Due to similar structure to plasmin, Lp(a) competes with plasminogen for its binding sites, so it prevents fibrinolysis (the removal of clots, the lysis of fibrin, the dissolution of fibrin that makes up clots), being called a "clot favoring LDL". Lp(a) promotes secretion of PAI-1 that inhibits plasmin formation from its dormant plasminogen form, contributing again to the growth of clots and associated atherogenity. This extra hook (protein Apo(a)) allows Lp(a) to remodel tissues in ways LDL can't. Apo(a) is a double edged sword, while it helps the body heal injuries, it can also harm healthy tissues, being curly, like a hook, attaching to the arterial wall, making Lp(a) 6 times stickier to arteries than the average LDL particle. Thus, Pharma is developing drugs to lower Lp(a) 90%, but they have yet to prove that drug will lower heart events, since they tried to lower

LDL, raise HDL via pills and often got more deaths (shorter life), same heart events frequency or same lifespan, as pills come with side effects. To heal arterial injuries Lp(a) has to be able to attach to arteries easier, so they try to see what part of the mechanism is the one that we can turn off, to get only the benefits, but not the atherosclerosis. Given that those with Lp(a) 1-9 are fine, Big Pharma invests heavily in trying to develop a single shot that would lower Lp(a) 20 fold for life, without having to take daily pills or monthly injections. Lowering Lp(a) may be safer than lowering LDL has been in some trials that tried to double HDL too, only to see more fatal events. In ancient times, humans were getting many injuries from animal attacks, hunting, tripping over rocks, farming, so it was critical to clot ultra fast, to prevent bleeding to death, infections. That's why Lp(a) evolved to speed up the formation of clots and arterial plaque born of these clots that are not dissolved by plasmin fast enough. Today we don't need Lp(a), as robots do all dangerous jobs, even soldiers (high injury job), so the need for high Lp(a) will be zero for all.

A conspiracy theory (seems true?) emerged online: "statin patents of 20 years are expiring, Pharma needs revenue, so now Lp(a) is the new "evil" that sell $ trillions in Lp(a) lowering drugs to keep Big Pharma employed" instead of aiming for something more useful (eterni foods) to make us live to 4000. Academia is full of corruption: professors (like Pharma researchers) pick and choose which parameters to report (that make a drug look good), picking those that suggest a correlation is causation so they can get a grant investigating that possible causation; they omit reporting hazard ratios that would contradict the causation hypothesis, in order to get the NIH grant, upon which their tenure, higher salary, prestige, chance of becoming Dean, Uni President or Nobelist depends. Essentially, much of the literature is a mind game to get more NIH or Big Pharma grant money, which obviously corrupts scientific progress in understanding disease and how important a biomarker is for longevity, among 9,000 biomarkers. Dr. Jay, who is against all things vegan, points an example of this with Lp(a): watch his 3 minutes and the fake science section. The reason many are skeptical about LDL and Lp(a) is the fact many centenarians have high LDL of 100, yet they live to 104. What they fail to understand is that if those people had LDL 30, they may have lived to 114. Some feel a need to attack a biomarker theory (high Lp(a) is bad) that makes their genetics look "imperfect". Youtubers can be as corrupt as Big Pharma, be skeptical, talk to AI, especially if youtube contains a pitch to subscribe to their channel (monetization), do a consult, buy a product. Even youtubers who say mostly false things can say truths 30% of the time. Nobody knows everything, people of year 3000 will laugh at all experts today and their "science". As shown in 1000s of studies and in 5 places in this book, during infection with viruses, molds, fungi, bacteria or intake of heavy metals, pesticides, SOD, GPx, catalase, other protective enzymes rise, just as LDL, Lp(a) type of LDL (LDL with the tail, see pic) rise. LDL, Lp(a) rise because they FIGHT infections. "Lp(a) levels were significantly higher in COVID-19 survivors than healthy controls (double the level, until 3 months post recovery)" ► SR

2026;16:6217. A higher Lp(a) may actually help you live longer (if it prevents a cancer that could kill you) in some cases if inflammation is low (hs-CRP needs be < 0.2, via an antioxidant rich diet, ω3/6 ratio: 1:1), as Lp(a) fights cancer and other viruses better.

High insulin, obesity, high salt intake (hypertension), smoking are far deadlier than high Lp(a) for women under 55: diabetes is linked to up to 11 times higher risk (HR = 10.71) of heart disease, LPIR (lipoprotein insulin resistance) 6.4, hypertension HR 4.6, obesity 4.3, smoking 3.9, TC/HDL ratio 2.4, TG/HDL radio 2.27, # of small LDL particles 2.25, TG 2.1, ApoB 1.9, GlycA 1.84, CRP 1.76, # LDL particles 1.75, nonHDL C 1.67, # of small HDL particles 1.6, ICAM-1, BCAA, Valine, Isoleucine, sedentary & fibrinogen 1.5, LDL, TC & A1C 1.4, eGFR 1.27, Lp(a) 1.22, Hcy 1.03, ApoA1 0.7, creatinine 0.55, HDL 0.39 ► JAMAC 2021;6(4):1-11. HR for infarct was 1.5 for Lp(a) 90 mg/dL, for clot stroke at Lp(a) 121 mg/dL ► JCL 2024;18(3): e308-19 see pic HR 1.5. CHD HR was 1.25 for Lp(a) > 50 mg/dl vs < 50 ► AJPC 2024;21:100903. In other words, diabetes from high ω 6/3 ratio (seed oils, except flax, chia, canola) is (or can be) far more deadly, by about 9 times, than genetically high Lp(a): 10.71 vs 1.22. If LDL/Lp(a) is so bad how come 100K centenarians have LDL 100-140 and those with higher LDL live longer in some studies not adjusting for confounding factors ► AEPH 2020:3(1):1040? We get fixated on 1 out of 100K biomarkers, missing the big picture of obesity, hypertension, processed foods with sodium that dwarfs LDL, Lp(a) in effects. It's cheaper to buy sodium free cans, cook at home so no salt, expensive to lower Lp(a). Use KCl, hypertension is far deadlier than LDL or Lp(a). Don't panic, the paper above shows 15 things 10 times more urgent/important than Lp(a) that nobody addresses, such as TG, ApoB, TC/HDL, TG/HDL, CRP, GlycA, # total and small LDL particles, smoking, high fasting insulin, prediabetes, obesity, high salt intake that dwarf physical inactivity, Lp(a), LDL or TC. Now you understand the Big Pharma mafia, they push Lp(a) drugs 1.22, when the Elephant in the Room, diet/smoking, cutting on fat/blood drinking 4.3, smoking 3.9, sugar 11, salt 4.6, processed foods 1.8 is IGNORED. Why change what decreases lifespan if you can just test for useless LDL, TC? Lp(a) makes trillions for Palaces, low salt cans/foods are cheaper, lower profits/sales, obesity, hypertension. What's done isn't what US needs, but what makes Brit Jewish aristocrats rich! We have a Gestapo Mafia like government of frauds and bandits, thieves and killers. Must love that Jewish Bible so much now, with all these Big Pharma recommendations. ☺☺☺☺☺☺☺

Lp(a) removes bad OxPL, junk, but ruins the arterial endothelium too if we don't protect it via antioxidants, high ω3 to drive hs-CRP < 0.2 and TMG, B6,9,12 to drive Hcy < 6. Lipoprotein-Associated Phospholipase A2 or Lp-PLA2 (lower with ω3) is a blood test that measures an enzyme associated with artery inflammation to assess the risk of plaque rupture, heart attack, and stroke, walkinglab has a 320$ panel that measures all stuff doctors don't: CRP (systemic inflammation), ApoA1/ApoB, Lp(a), Lp-PLA2, small LDL, Cystatin C (better than creatinine for kidney/cardiac health), oxidized LDL, LDL-HDL-TC-TG, insulin, leptin, adiponectin. A better deal is

the 80$ finger prick from RxHomeTest, mail back dried blood: CRP, ApoA1, ApoB, Lp(a), TC, LDL, HDL, Hcy, TG. Don't be fooled by youtube MDs who claim ketogenic diet is best because they got zero plaque at age 30, because they hide the reason for low plaque is huge exercise routine nobody does (< 1%), and the use of 3-9 pills (such as berberine, nattokinase, tudca *(always take capsules, never powder, as tudca tastes horrible making us almost throw up, can buy powder, but use an empty capsule from a tasteless cap to place some and swallow or use a capsule machine to save $ on tudca as caps are pricey; tudca prevents dementia, brain aging by reducing ER stress, body inflammation (joint pain), 68$),* phospholipid DHA) known to remove plaque regardless of the diet. The heart disease section explains sedentary vegans have better heart health than active omnivore runners in general. If you eat a junk high fat vegan diet, you will have plaque. The point is one can't assume a diet is best for all, just because a guy has no plaque due to anti-plaque supplements. Let's be real, you can't feed 9 billion on a ketogenic diet, besides the fact it's highly atherogenic without pills.

Basic Info on ApoA1, ApoB, which are far more useful than LDL, HDL values:

ApoA1 is the protein on HDL that catches bad cholesterol and removes it, the higher the better. ApoA1 has higher sensitivity (85%) and specificity (93%) in detecting coronary artery disease vs HDL-C (69% and 60%, respectively), as it measures the number of active HDL particles removing cholesterol, not the amount of cholesterol in these particles. Someone with low HDL may be healthier than someone with high HDL, if his ApoA1 is much higher. HDL-P measures the number of HDL particles, HDL-C (what most people know) is the HDL concentration, so HDL-P is usually reflecting ApoA1, just as ApoB reflects LDL-P due to most ApoB being from LDL. ApoB = total ApoB concentration (mg/dL) in all bad lipids, which is = ApoB MW mg/mol × (LDL-P + VLDL-P + IDL-P (Intermediate DL) + Lp(a)-P) particle # (in mols/dL), all atherogenic particles that contain ApoB, not just LDL. Thus ApoB is a superior marker vs LDL-P for evaluating infarct/stroke risk from a given diet, etc, and far superior vs LDL-C. ApoA1 is superior to HDL-P, and far superior to HDL-C because each HDL particle has 2-5 ApoA1 proteins to catch cholesterol, each LDL particle has 1 ApoB to carry cholesterol, each Lp(a) particle has 1 Apo(a). Thus, Apo(a) in mg/dL is sort of equivalent to Lp(a)-P, sort of because Apo(a) size varies, while ApoB is always the 4536 amino acid ApoB-100 protein. However if you measure Apo(a) in mol/L, it will be same as Lp(a), as 1 mol of Apo(a) is present in 1 mol of Lp(a). Since Lp(a) is in mol/L, it is considered superior to Apo(a) in mg/L, because it's reflecting particle number, not molecular weight of protein variant. But if both Lp(a) and Apo(a) had been in mol/L, they would be the same exact number. That's why we want low small size HDL, because small size has only 2 ApoA1, big size has 3-5 ApoA1. "ApoA1 is a better risk marker than are ApoB, ApoB/ApoA1 ratio, HDL-C, and LDL-C for cardiovascular disease and mortality in elderly men." ► JGABSMS 2006;61(12):1262-6. This shows our medical system does useless tests from 1950s, as MDs spend their 40x times the min

wage salary on useless stuff, instead of on hiring researchers to implement real markers monitoring, not HDL, LDL, etc, make those tests cheaper, etc. LDL is also useless, as ApoB protein is all that matters, the lower the better. Someone with double LDL can be healthier if his ApoB is lower. So much for banditry in the system. Insurance Inc makes trillions by covering useless high profit blood tests (TC, LDL, etc) and the gov or fools pay for useless injuries to veins when drawing blood. Today vit D (mail it back), HDL, LDL, TC, TG (3 min result), etc can be measured at home (finger prick, like glucose), so you don't need go to injure veins more than once 3-5 years. Only use FDA approved ones, like CardioChek, Curo L7, Mission Control, though these are very inaccurate vs real lab finger prick. Other labs take your finger prick samples and mail it to the labs to test it the traditional way, to protect your veins and nerves from injury. Blood draws can even injure nerves, via the needle. Today, MRA without dye (MRI angiogram) is better than all blood tests for checking what happens, making blood tests outdated: you see plaque progression, etc. Due to aristocratic terrorism, the finger prick analogues for every blood test (at home) don't exist, and IR, etc methods of imaging blood passing thru wrist are just starting. One day, nobody will have to go thru such horrific vein/nerve injuries to find out these values. In immortalism, we have ETs, NPs, NDs, MDs, not just pill and vein injury (they cause recurring inflammation, clots via turbulent flow) providers. RxHomeTest (Oregon University research linked company) finger prick (use Walmart blue glucose lancets for finger prick, not the provided yellow click blades, as those make a cut 20 times bigger, meaning a line of 2mm instead of a dot of 0.1 mm, measures 9: ApoB, ApoA, Lp(a), HDL, LDL, TC, TG, hs-CRP, Hcy for only 80$ (a day to get results once they receive your sample) and many other tests (full thyroid is 80$). These 9 are the key parameters to monitor when you try optimize sleep, diet, medicines, supplements to get the perfect vascular numbers. Finger prick (0.04 mm needle, not 2 mm blade) needs the standard for all tests, but with 4 million companies, it takes 50 years to implement any change in any industry. See why we need 11 companies? Aristocrats need "companies" to justify "huge salaries"… In an ethical society there are 10-20 companies, not 33 million, because when you have 1 million instead of 1 company, the waste of admin is huge, research is 50x less. Walgreens A1C kits give 2-12 tests/kit, being as exact as Labcorp. Because US spend 1.4 trillion $ on nonsense, we can't have a real industry to test everything via blood pic thru the wrist, because millions work in trash industries making 1.4 trillion crap a year, instead of living to 4000 tech. Walking lab offers $124 hair 17 good, 22 bad metals or hair 31 bad, save $ 3000, dried urine Cd, Hg, As, Creatinine, Li, Se, I, Br, finger prick Mg, Cu, Zn, Se, Cd, Pb, Hg.☺☺☺

Low Glycemic Index Foods keep small size (lethal) LDL low and HDL higher:

LDL & HDL value is far less important, what matters is what % of that LDL is small size LDL (LDL III & IV, not big size LDL I & II) that sticks to the arterial wall. $HDL_{3a,3b,3c}$ are small and bad, $HDL_{2a,2b}$ are big, safe. The greater number 3 > 2, 3,4 > 1,2 means the smaller size, deadlier. We could have

LDL 50% bigger than X, but have 3 times less LDL3-4 and thus live longer, have no arterial plaque. If you order an NMR (nuclear magnetic resonance) lipid test via walkinglab.com (online wholesale buyer and then reseller that enables us to save up to 85% vs ordering directly from Labcorp or Quest, the test is done by Labcorp or Quest) or etc, it will tell your LDL-P value, which is the # of particles of LDL, i.e. if this is high, you got too much of the small LDL and have high risk of plaque. What foods raise deadly LDL_{3-4} & HDL_3? Added sugars (especially fructose), high glycemic index starches (white bread, bakeries, cookies), increase the production of small deadly LDL/HDL. CAR 2005;7(6):455-9 found "high glycemic index foods … (were) inversely associated with HDL (low HDL= shorter life)… *high-carb diets (if low glycemic, fiber rich) … promote weight loss, leading to reduced (small)… LDL and HDL…* more potent effects (in lowering small LDL) of weight loss over diet composition… A low glycemic index, low-fat diet has been reported to improve components of atherogenic lipoprotein (deadly LDL) phenotype", so no matter if we eat 5% or 20% calories as fat, the stronger driver of small size (deadly) LDL and HDL is body fat, see the fasting section. Stay thin to live longer. Given ketogenic diets cause more plaque long-term, the heart healthy diet may be a low glycemic diet that has low/medium 5-25% fat, 5-10% ideally for sticky non-O blood types especially, with family history of atherosclerosis. Fiber = low level of bad small size LDL/HDL. Fiberless complex/simple carbs = death. Fiber lowers glycemic index, legumes have far more fiber than grains, so they have lower GI. 100 g cooked lentils got 8 g of fiber, rice only 0.3. Rice has no protein so for vegans who want low fat, it's a death and obesity sentence to eat grains, as white rice got 26 times less fiber than lentils/100g. Brown rice got 5 times less fiber than lentils. Rice = diabetes, constipation, blood poisoning (feces don't eject daily), malnutrition. Wheat has more fiber, but the gluten irritates many. ☺☺☺

The Glycemic Index GI Table shows legumes are the lowest glycemic index foods with complex carbs, so they're the only complex carbs foods I eat. Potatoes, grains, fruit/candy snacks, cereals, pasta, noodles, ice cream, bakeries, bread, etc are deadly, since several studies show high glycemic load lowers HDL. The heart healthy diet is one without grains, sugars, etc: low glycemic kale (15) and carrots (40) suffice, low glycemic berries fine. Because most people are sedentary, most foods spike glucose too high/fast. Don't boil veggies, carrots, etc as GI rises, eat them raw. The evidence is clear, the aristocrats feed us death to amputate workers' legs via diabetes that causes infarcts, strokes and limb loss. Eat legumes, berries, kale. Blueberries have double (50) the GI of black or raspberries (far less pesticides than black or blue), so minimize blue if you eat berries or just eat purple kale (GI 15), purple cabbage (GI 17) to get the purple anthocyanidins without the sugar high that damages the arteries. Message of the day: get carotenoids from kale, not carrots, anthocyanins from purple kale/cabbage, not blueberries. Watch that HDL rise and endothelial function improve as small LDL/HDL % drops. Ginger (GI 15) and garlic (GI 20) are also good for lowering LDL, raising HDL, lowering plaque. The gov is run by nematode worm IQ

aristocrats who waste land with grains instead of legumes. The genocidal aristocrats want to build palaces, so they cultivate the foods that require min processing, min weight/calories, max blood poisoning, max colon cancer, max diabetes/plaque, because workers are disposable slaves. It's all about PROFITS: legumes are more expensive to soak to be eaten (soak=0 gas) daily like the Poison Gluten Products Jesus Loves that have high shelf life and give short limbless life. The rich can make bread and all kinds of lethal crap, by not soaking grains to remove lethal antinutrients, but for legumes, they can't make "lentil cake" like rice cake, due to too much gas from raffinose, etc. With grains, they can defraud the masses big time, poison them with antinutrients, but with legumes they can't without the 11 companies efficiency that needs the end of aristocracy & the hideous palaces of greed. Money, not Life. Live to 4000? ☺☺

Lp(a), the most lethal type of 'LDL', smaller particle than LDL, penetrates artery easier:

Lp(a) helps clots/plaque to form, so taking nattokinase (fibrinolytic enzyme that prevents clot formation), may be one way to deal with high Lp(a). 20% of humans have very high (50+) Lp(a) (which is bad, 6 times worse than LDL, LDL can be 50, but Lp(a) can be 250). "increased CVD risk actually starts as low as 25 to 30 mg/dL" ► ATVB 2016;36(11):2239-45 (Fig 1 shows 38% females & 32% males got Lp(a) > 30). Lp(a) dropped from 236 to 143 or 39% by 10 day water fasting that reprograms metabolism ► FN 2024;11: 1418705. 99.9% of MDs are clueless (as is google, who says it's 90% genetically determined), they say Lp(a) never changes, go figure. Long fasts reduce PCSK9, which breaks down LDL receptors (LDLR) that lower our LDL; by reducing PCSK9, the liver LDLR clears more LDL particles, including Lp(a). To lower Lp(a) naturally, one option is to eat PCSK9 inhibitors, since all papers (see LDL vs Lp(a) graph) show that as Lp(a) rises with LDL, as Lp(a) is "sort of an LDL type". Food PCSK9 inhibitors are: carotenoids (lycopene), berberine, K2 as MK7, ω3 etc (Ntr 2020;12(5):1440), curcumin, trans-resveratrol (50-100 mg max/day is safe for 100-200 lb folks, higher doses may cause damage, much more stomach stable/bioavailable than cis, grapes have trans, wine has 1:1 mix, cis is useless/competes with trans binding sites, cancels trans effects, so buy only trans, standardized to 99% trans, 100s of brands contain 1-20% of label as a clip explains too), flavonoids like EGCG, genistein (soy), naringin (orange), quercetin, eugenol (clove). Most supplements were tested for lowering LDL, etc for decades, not for lowering Lp(a), so it's possible that many popular LDL lowering Amazon herb, berry extracts also lower Lp(a) in some people, due to synergy with other pills unknown to science yet, so, you can try stuff known to lower LDL and see which one works: 37$/kg hawthorn berry extract (this 37$ = 10 kg dried berries per company, 15% of powder is maltodextrin to prevent polyphenol oxidation, this is a bad additive, creates small LDL if overeaten), 42$/lb 100% grape seed extract, etc to provide more antioxidants. Only in 2010 did the cardiologists realize Lp(a) is deadly and started measuring it, only in 2019 it became more mainstream and heard of and thus only after 2020, a serious attempt to see which supplements might lower Lp(a) became stronger, so the

data is 5000 times smaller for Lp(a) than for LDL effects. Mol 2025;30(17):3582 has a table of PCSK9 food inhibitors, google plant name to get the common name. Lp(a) is very sticky to the artery, oxidizes fast and 70% of people have Lp(a) > 10, which is bad, but most MDs claim if it's below 30 you're "fine", which is a lie. "26.4% of the (52,898 cardiac) patients had LPA levels >30 mg/dl (same as avg, but 4.7% had Lp(a) > 98, vs 0.3% avg)", which shows as Lp(a) rises above 50, risk of disease rises fast. About half of humanity has Lp(a) > 20, which is catastrophic given what it does. Statins raised Lp(a) "by 19.3%", up to 24% (atorvastatin) and even 47% (66 to 97 mg/dL) in the LMW apo(a) phenotype. Lower LDL has little benefit vs 47% higher Lp(a), which is far worse, so in some studies LDL lowering, HDL raising drugs increase MORTALITY. In some, statins can cause diabetes, sarcopenia, dementia, obesity (50% drop in GLP-1 ► Fig 1), blindness, heart muscle loss (statins block HMGCR used to make cholesterol, so the low cholesterol in liver cells causes a rise in liver production of LDL receptor proteins which grab blood LDL passing by the liver cell surface; HMGCR also makes CoQ10 and without CoQ10 heart muscles and muscles can't work well, as CoQ10 helps muscles generate energy, so people can lose muscles and die of heart failure without CoQ10 pills, CoQ10 is highest in the heart), diabetes. Most US eats 3.5 g Na, which is bad, <1.5 g is ideal to prevent hypertension per AHA, most take statins if LDL high, so whatever is popular (salt, statins, like satan) isn't the best. See statin pill alternatives that lower Lp(a) (and LDL) are Mg, saffron, black cumin oil, arabinoxylan, phytosterols (see sources in the hair section, over 8 pages), astaxanthin, nattokinase/bromelain, citrulline, anything google confirms via NIH papers to lower LDL "does food x lower LDL NIH"..., quercetin, hesperidin, berberine. Lp(a) injection (4x = 4 injections) drugs under development with % reduction: pelacarsen antisense oligonucleotide (ASO) 12x/year 80%, olpasiran 4x/yr (any drug ending in siran is small interfering RNA (siRNA), turns off LPA gene), 95%, zerlasiran 1x/yr 90%, lepodisiran 1x/yr 93%, Lp(a) future once/day oral pill: muvalaplin 86%. Present PCSK9 inhibitor enlicitide (oral $320/month): Lp(a) fell 60%, and LDL fell 59%, approved by FDA July 2026. The already approved (injections) are repatha monoclonal antibody 28%, praluent antibody 24%, leqvio (siRNA) 26%. Already approved pills are: niacin 35% (diabetes risk), CETP inhibitors (raise HDL too) 30%, Anti-IL6 Agents (tocilizumab, etc) 33%, estrogen and tamoxifen 30%, fibrates 20%. A new injection gene therapy lowers LDL by up to 62%, meaning one day the same may occur for Lp(a): a once a lifetime injection. The issue with many man made meds (LDL fall, HDL rise) is that they often cause shorter life than nonusers, meaning changing 1 biomarker out of 50,000, doesn't always mean living longer. Thus, it's best to research for months any synthetic chemical, before you take it. Natural compounds are often ones we're more used to by eating plants, etc.

Back to the discussion of fat % of the diet:

Using fat for energy produces more oxidative stress via free radicals (because it uses 20% more oxygen/ATP molecule and fat oxidation requires more steps in the electron transport chain in

the mitochondria) than using carbs, hence high fat diets mean shorter lives (unless having a dead pancreas, needing ketogenic diet). Eskimos eat mostly fat, and live to 50. Worldwide, centenarians eat 11% fat calories. Vascular dementia is a common effect of seed oils, as oxidized fats start the plaque, see pic. A blood types have the thickest blood and absolutely need to avoid seed oils and fat in general, to prevent lethal blood thickening. The JAN 1976;28(3):56-70 (49 references for extra details, back then science was less Big Business owned) is summarized in this first paragraph: all 3-10% fat, 10% protein, 80+% carb calories mostly whole plant vegan diets led to 0 heart disease. Some lived to 121 eating a 99% vegan (some meat once a week) diet, mostly COMPLEX carbs (grains, legumes, tubers, veggies), with most having total cholesterol TC 90-120, 0 had any plaque after autopsy, vs 99.5% of Americans. When Americans were given this native diet, they could walk 8 times longer, triglycerides dropped 4 fold at times, diabetes disappeared, etc. Plaque reversed when TC, LDL, TG became very low. When Cleveland clinic evaluated 28 year olds, they found 0.5% of those with TC 140, TG 60 had arterial closure, and 73% of those with TC 360, TG 560. The high fat diet KILLS, makes you 146 times more likely to die of stroke or heart attack. Dr. Page found TC > 140, TG > 75 means plaque starts to build fast. At 4% fat calories, monkey plaque reversed and became 0, blood flow improved 4 fold, but at 40% fat calories from vegetable oils had way more plaque. Natives with 350 mg Ca intake had 9 kids on a 10% protein cal diet, breastfeeding them until age 2-3, yet teeth and bones didn't lose density. Berkeley found high protein intake leads to 8 fold rise in loss of Ca, Mg, Zn, Fe and other minerals, so teeth, bones become weak with age. Swank noticed after a high fat meal, mice plasma oxygen went down to 68% of original, taking 3 days to return to 95%. High fat blocks muscles from taking up glucose after meals, causing insulin resistance, hyperglycemia, fatty liver, diabetes, dementia, etc. Seed oils (except canola, chia or flax) contain 4-400 more ω6 than ω3 and trigger obesity. Soybean oil damages the male mice hypothalamus genes, as End 2020; 161(2):bqz044 shows, it's not via linoleic acid or stigmasterol, but other chemicals; the oil may damage human brains too, beyond the 8:1 ω6:3 ratio that's brain damaging via high hs-CRP causing vascular dementia, brain and hypothalamus atrophy via silent strokes and plaque. Sardines, chia, flax, etc however, contain way more omega 3 than 6 (ratio 4:1 flax, 3:1 chia, 10:1 sardines), and trigger the conversion of fat into heat (feeling warm in winter). Seed oils don't just add fat to your white fat cells, but they block the conversion of fat into heat.☺☺☺

The fat causes the blockage of capillaries, as the 7 mm red blood cells stack together and have a hard time to pass thru the 5 mm capillaries, forcing the blood pressure to rise to push blood thru. This hypoxia, lack of oxygen starts cell death for all organs and can even lead to cancer if chronic, hence high fat diets lead to cancer and obesity. Not only that, but cancer can start in organ/limb X, due to plaque for a liver/kidney blood vessel that feeds the part or all of the liver/kidney detoxifying chemical Y that, for some genes, *accumulates more in organ/limb X,*

causing more free radicals and then cancer. This cancer is blamed on some 'fictional cause' instead of a high fat olive oil diet that caused the plaque. Chemotherapy doesn't treat visceral fat, fatty liver, etc, they treat the body as separate units and it just wastes your time, add 2 months of life after 190000/year in costs and endless time wasted. No good blood flow to kidney or liver = no antioxidant and oxygen delivery, no removal of toxic Y. Kidney/liver can be sick before they notice they became smaller due to nutrient starvation. Vegetable oils were at least as bad as animal fat in humans in causing hypoxia, low blood-nutrient delivery, meaning slow death. So, vegetable oils above 10% cal are harmful. This low blood flow causes asthma and death by lack of oxygen, millions of sudden unexplained deaths. Blood becomes more like sour cream, not like water, you die. Gallstones developed only in monkeys fed cholesterol rich fat, not in those fed vegan fat. If these studies are true, confirmed by FDA with larger populations and better randomization, etc, then we need to limit fat in all prepared foods (except nuts, seeds which are naturally so). Just as cig packs have cancer warning, Cancer, Death, Asthma, Diabetes, Stroke, Infarct Warnings need be placed on millions of prepared foods with more than 10% fat calories. A new health policy needs to emerge. We immortalists don't have agendas to sell olives/avocados, we're for powders that are 40x better than plants or animals, so mixes of chemicals that, like royal jelly with bees, make bees live 40x longer. We're not into games: we create 400 diets, of various % of protein, fat and carbs, all free of natural poisons, mixed and dissolved in water 1 min before eating to prevent oxidation, and we figure out which one makes us live longer, among the 400 million tested, 1 million per diet. If it's 4% fat, 84% carbs, 12% protein, that's it. Same thing before the powders, we test, we find out, and that's our national policy, we stop allowing 98% of nutrition papers being fake science, pure ads by Big Food Companies trying to sell junk or natural deadly crap to us. ☺☺☺

Cooked chickpeas got 1.11 g linoleic acid LA in 100 g or 6.8 mg/cal, so if you want extra ω6, you can eat chickpeas 1.08$/lb Amazon subscribed (cooked becomes 2.5 lb), no seeds/walnuts are needed. Lentils only have 0.137 g LA, or 1.2 mg/cal, so to eliminate the need of seeds/nuts, eat chickpeas daily. Pumpkin seeds offer 6 g of fiber for 20.7 g ω6 LA, while chickpeas offer 7.6 g fiber per 1.11 g LA. Chickpeas offer 6.85g fiber/g LA, pumpkin seeds 0.29 g fiber/g LA, or 24x less fiber/g. Walnut 0.176g fiber/g, or 39x less fiber. Given most have high LDL/glucose, they need more fiber, so soaked chickpeas are way better than nuts/seeds/oils. Oils got 0 fiber. Prep 4 lb dry chickpeas with a pressure cooker to last 6 weeks in freezer @100g cooked/day intake. Seed oil fat is already extracted from the food matrix and it hits your brain like a brick smashing your head, except this smashing is at the molecular level, the sudden rise in triglycerides causes blood clots, plaque and destroys the brain and body capillaries and vessels. Legumes on the other hand, release this fat many times slower without wrecking your body and depositing as belly fat instantly if you don't use that energy right away. Legumes give you 5 hours to spend energy and

avoid belly fat, while oils give you adipose issue so fast and that belly fat kills your brain and heart, creating systemic inflammation. Likewise, legumes release fat many times slower than nuts and seeds, being safer. So, if you ever eat nuts or seeds, or chia oil, mix it with your smoothie or legumes, etc to avoid a sudden rise in blood lipids. Better yet, limit oil to DHA-EPA pill + 2 g of chia/flax oil pill max, mix in smoothie to prevent sudden TG rise, don't eat with salads and buy ω3/vitamins from 74°F iherb storage, not the Amazon warehouses of 90°F. If 100g daily chickpeas isn't your thing, try oats, which got 2.20 g LA ω6 in 100g, or 5.8 mg/cal, enough to satisfy oats lovers. If oat/chickpea are not your thing, 100 g of boiled corn (the healthiest way to eat corn) got 0.59 g LA ω6 or 6.1 mg/cal vs 6.8 mg/cal chickpea. Corn causes no gas, since it has no soluble fiber as oats do. Read the purple corn section on how to best eat corn. Cooked quinoa got 0.97 g linoleic or 8.1 mg/cal, no gluten, but corn is cheaper. If you love to soak/cook soybeans, they offer 4.46g LA/100g or 26 mg/cal. These combos show you never need eat any nuts or seeds, except chia seeds for ALA to make EPA and algal oil pills for DHA. Thus, the richest common sources of LA ω6 are in mg/cal: walnut 58, quinoa 8.1, chickpea 6.8, corn 6.1, sorghum 6.0, oat 5.8, lentil 1.2, millet 4.0, potato 0.37, rice 0.35. (potato & white rice are useless empty calorie foods). A full list of foods with high LA is in the "Other nuts are bad" section. If you got enough fiber in your diet, you can just eat walnuts, world's best nuts, 1-2 daily, but you don't need seed oils as that will change your diet to a medium or high fat diet.

You can choose walnut, but for more fiber, you can choose legumes, grains. If you're worried about fat intake, you're trying to lower total fat intake, you eat a walnut with lentils or other high fiber foods, then walnut is the best IF you can find fresh walnuts that were frozen in November to prevent LA oxidation. The reason walnuts are the best food source for LA for those trying to eat a very low fat diet, versus all other foods, is that for other foods, you have to eat more FAT to get the same g of LA, as explained in the Walnut is the Best Nut section. However, when you eat a walnut, make sure that you don't eat it alone, but with a LOT of fiber, to prevent LDL rise. LA is critical for skin, hair, nails, cornea, eyes, and injuries of all types. Eating rancid walnuts is not a good idea, but 99% of walnuts eaten worldwide are rancid, since people have no idea you need to refrigerate them upon collection, then freeze them if not eaten in 1 month.

Most oils got way more ω6 than 3, so, given that many papers hypothesize we need EPA-DHA, not ALA ω3 for every g of ω6 LA we eat, to keep aging speed low, it is logical that one can't eat any nuts or oils, except algal oil, or if one is against that, flax oil that has 4x the ω3 vs ω6, chia oil 3x. Chia oil is safer than flax oil, because it has 0 cyanogenic glucosides, 0 phytoestrogens (chia oil is safe for conceiving, pregnant, lactating ladies). Sunflower oil often has 66 g (18:2 in USDA table) LA, while high oleic sunflower oil has only 4 g (18:2) LA, so if you do use sunflower oil, choose the HIGH OLEIC VERSIONS of any vegetable oil, as those have 15-16 times less bad ω6. Commercial high oleic safflower oil is 13g LA, VERY HIGH, so stick to 4 g LA high oleic sunflower

oil. Avoid high linoleic safflower, as that's 75g LA. All these sunflower/safflower have negligible levels of ω3, usually 250-500 times less than chia oil. Obviously, it's much better to use chia oil. If you want to live long, like Okinawa 104 year olds, they ate 6% cal from fat, so this is about 120 cal out of 2000, or 120/9.4=13 g of fat max from all food as your food table shows; in nature, about half of fat in legumes, veggies are ω3+ω6, so you can only eat about 3 g ω3 and 3 g ω6 to keep ratio 1:1. Some say ω3 is ideally DHA-EPA, not ALA, since some males convert only 0.001% of ALA into DHA-EPA and given body storage of fat, one can have a reserve for 1-6 years in body fat, before running out and suffering faster aging of brain/heart and blaming it on something else, when it was DHA, but due to a 5 year delay, they don't even check ω3 index in red blood cells. We see many 'know it all, my diet is best worldwide for all' types who drop dead at 77 and look at 77 as others look at 100, severely protein deficient as they have a crusade against plant protein even and legumes, when all data shows after 60-65, people need more legume protein each decade as their digestion efficiency falls rapidly. We need to relax, because the best diet is the one that makes you live 40x longer like a bee does with a unique diet and we're all pathetic ☺filif worm IQ☺ cats vs men of the future, like rats are versus men today, so are we today, the smartest of us, vs the lowest IQ (who live 40x longer) of the future. The best is the diet that makes you live to a trillion, made of new matter: none of us know it, we hypothesize what that diet for a pregnant mom is to increase offspring lifespan 40x if continued by the offspring, to mimic the bee larvae that before birth switch off short life genes and turn on 40x longer genes. All in this book is just hypotheses that may work well for fat people (BMI 18-40, some skinny people have lots of visceral fat) who need lose visceral fat now. Some people lived fine with only 2-5% of fat calories, but it's tough to squeeze LA, DHA, EPA in perfect ratio in such a tight range. If your goal is 4% fat, it's doable, but you need to have a food table to calculate, so LA is enough. The USDA has a nice list (right most column) of foods richest in ω3 in decreasing order. The beans section has a very easy to read list, unlike USDA, for the 6 types of beans ω3/6 content. USDA site is pathetic, they don't allow you to list by legumes or veggies, etc for components, but at least you can search by component and scan thru it fast. NIH says LA "intake at levels from 1 to 2% of total dietary calories is sufficient" to prevent deficiency. So, you can try that and see how it goes, eat more if skin/cornea issues exist. Plaque is only reversed fully @ fat intake 3-4% per some studies, can increase fat % later after removing plaque. Garlic helps too, 80% of plaque was gone after years of daily garlic (it may lower testosterone, fertility) and low-medium fat. That's why fasting helps, autophagy eats fibrous plaque. Old plaque is 80-95% protein, 0.4-4% fat (1% avg), 4-20% calcium Ca, new plaque is 20-40% fat, 1-15% Ca, 50-55% protein.

Barleans, world's freshest flax oil sealed under nitrogen, cold pressed in dark with opaque tubes, carries ALA-DHA-EPA, flax-algal mixed or flax oil. 3 g of this is fine if your food table lacks ω3. Caps of flax, 300/20$, oxidize less but these Micro Ingredients oils are not stored in nitrogen at

the manufacturer, and these zip lock style bags let light in damaging the flax, keep flax in fridge always, aim for blackest 250 caps bottles like Barleans (they got lignan free version too, 0 cyanogenics, as flaxseed particulates aren't there). You can also buy flax/chia oil extractor and make the freshest oil yourself to save 5000 over a decade, since flax residue has unwanted cyanogenic glucosides (home made oil is far fresher and less oxidized, far more artery protecting than any from Amazon, keep it in dark bottle in fridge, make 20 ml at a time in semi-dark area, fox max freshness). Chia seeds and flaxseeds can cause hard stools, so oil is the only option at times, if you want to avoid oxidized pill DHA-EPA and your blood shows DHA-EPA levels are great without DHA-EPA pills. Chia/flax caps are better than the oil bottles, less oxidation between uses, no air to touch the rest of the oil. During lactation and pregnancy, higher fat (8-16% maybe, increasing 1% each pregnancy month)/protein intake is normal to be able to produce milk, nourish the baby, etc. But after that, to maintain health, 4-8% fat seems ideal for low plaque. Okinawa diet was for centuries: 6% calories from fat, 69% calories from sweet potatoes (as much vitamin A as carrots, purple sweet potatoes have more antioxidants), 12% rice, 7% grain, legume (soy, etc) 6%, veggies 3%, rest 4%.☺☺☺ This made them live longer than most people worldwide. As soon as fat calories rose from 6% to 27% and sweet potato was replaced with lethal bread and fiberless rice, due to US influence, Okinawans started living shorter than mainland Japanese, they devolved, became obese, like US obesity tripled from 1965 to 2025 thanks to Big Junk Food Fatty Foods.

We know that people without intrinsic factor need 1000 times more B_{12} than others, same for a few other vitamins, some need 100 times more due to lacking a key chemical that carries the vitamin or helps its absorption. Not two people are the same. In mice, turning off one gene, meant 114 times more death causing arterial plaque than the other mice, at the same exact dietary fat level. Thus, while some people will live to 95 on 20% fat calories, others will require 2-3% (ω3/6 essentials), due to an inability to metabolize fat properly. Many populations ate 3% fat, 150mg sodium and has no hypertension even in their 70s. Thus, we can reasonably hypothesize, and you're free to disagree at the cost of 25 years of life from a stroke or arterial plaque causing hypoxia (then cancer), organ damage or heart attack, based on family history, blood work biomarkers, etc, that if LDL is not below 50, TC below 150, it is very risky to eat more than 10% fat, sometimes even 5%. A no oils 8% fat vegan diet had 42 times less heart attack events than the Mediterranean diet of 30% fat. See 30 studies 1927-2025 about low fat reversing heart disease. Logical? Plaque is FAT (50% of this is cholesterol), calcium and fibrin. Listen to a 61 year old MD, top of class at Stanford, Harvard, explaining low fat veganism, an MD who is way sharper and faster than 99.9% of medium and high fat diet folks of 35-90 years olds. He explains both seed oils and saturated fat are lethal. See the intestine of a rabbit after a high fat meal, BLOOD BECOMES THICK, 5 times slower, causing severe malnutrition, areas turn blue due to lack

of oxygen and nutrient delivery, this is why all get dementia, the brain is deprived of nutrients and oxygen for 10 hours after high fat meals, brain shrinks. 38% of people on 25g fat/day (10% calories) survived, while 0% survived on a normal 35% fat diet: JAMA 1960;173:884-8. Also, "hs-CRP (marker of infarct/stroke risk) were 1.51, 0.83, and 0.37 mg/L, respectively" when ω6:3 ratios were 9.5, 3.5 and 1.5, showing the effect of ω3 in flax oil ► JN 2004;134(11): 2991-7. Seed oils have high ω6:3, driving heart disease, stroke, Alzheimer globally; the only exception is high lignan (lignan prevents oxidation) flax oil in tiny amounts 3-5 g max/day, the only acceptable seed oil with 53.4% ω3, 14.2% ω6, ω3:6 ratio 3.7 to help you counteract the higher ω6 than ω3 in most vegan foods and bring ω6:3 ratio to 1.0 or 1.5 so CRP goes to 0.1-0.4, as explained in the what I eat summary, make your own food table and bring total ω3:6 ratio to one that doesn't supress immune system too much, maybe 1:1 or 1:2. Research shows that high ω3 intake, from flax, fish oil/algal oil can cause atrial fibrilation, or irregular heart beat, so start small with 0.5g algal oil DHA-EPA, if your body doesn't convert vegan chia seed ALA to DHA (check blood ω3 index) and watch heart rate. Most effects (incl 5% higher stroke risk at high 4g doses) happen in those with heart issues, fish oil has more toxins, mercury, PCBs, etc from the ocean. Don't ever start with 1,23,4 g, start at 0.25 g and if blood ω3 index is low, add more if no issues, maybe 0.5, etc. Get a heart rate monitor, the wrist watch, keep it offline, see how it goes. Studies with 1 g showed benefits, at 4 g things went down. However, flax/chia is for use on a salad or something, not for cooking, as heat creates toxic lipids in any vegetable oil. Cooking with oil is slow suicide, just as is eating high cholesterol, meaning eggs, animal foods (see images). All cooking needs to be done under water using a pressure cooker to avoid oxygen contact and the formation of AGEs. A shocking 50% of adult Americans have hypertension, a sign of undiagnosed heart disease, America's and world's number one killer. It's thus imperative to switch from a diet of 34% of fat calories (US average) to a 3-10% fat calories diet with ω3:6 ratio 1:1.5, a US diet (that insurance pays for to switch to) proven by Dr. Ornish to reverse heart disease. ☺☺☺

This low fat whole foods vegan diet is used by 1000s of MDs (tell patients to remove most fat, refined sugar, junk foods), based on the books of McDougall, Esselstyn (150 papers) & his JFC 2014;63(7):356-64 (42 times less (0.6% vs 25%) cardiac events than Lyon study Mediterranean diet, Ornish.com (his book & JAMA 1998 study), Dr. Peter Rogers (he got 1000 videos dedicates to diabetes, cancer, heart disease, dementia, low fat 0 oil no sodium diet), and others (NYC, 200 hospitals) emulating them. Cleveland Clinic, America's 2nd best hospital, has an 800$ vegan diet program to reverse heart disease via 0 vegetable oils, but this immortalist book has all info to do it for free. This plaque removal vegan diet is fat free, except DHA-EPA pills, (0-1 walnuts, 2-8 g chia seeds or flaxseeds are OK for cases of moderate plaque, but removed for 6-24 months in case of life threatening plaque). This plaque removal will provide 20-700% higher blood (thus nutrients) flow to heart, kidney, liver, legs, brain areas, organs and lower the risk of many other

top killers (dementia, stroke), not just heart disease. Comically, some MDs think you have "brain, leg, eye, pancreas, foot or liver" disease, but it is often plaque that simply starves the organ or limb of nutrients. To truly understand why you need avoid vegetable oils, except 2-4 g of flax/chia perhaps as pills or quarter spoon, watch the 74 videos on atherosclerosis by a guy who sees thousands of plaque images as part of his day job. High fat meal decreased oxygen saturation from 96% to 92.5%: JAM 1959;26(1):68-75. 5 hrs after a high fat meal, angina (heart pain) was maximum, when blood indicated max blood fat. Less oxygen means more cancer and more death, organs become starved, you age fast. No matter what type of fat you eat, oleic (olive oil), lauric (saturated fat from cheese/meat/coconut) or linoleic (seed oils), plaque increased as total fat intake did ► JAMA 1990;263(12):1646-52. "Olive (oleic mostly ω9), soybean (ω6) and palm (saturated fat) oils intake have a similar acute detrimental effect over the endothelial function... FMD (flow mediated dilation) decrease of 32.1%... increase in triglycerides (27.03%)" ► NMCD 2007;17(1):50-7. The Olive Oil Mafia doesn't like this study. They make Billions by selling Snake Oil proven to be worse than much cheaper canola oil. Olive oil doubles the cholesterol of healthy vegans, who have a healthy total cholesterol of 93 and LDL 40-45, but the 5th grade science IQ TV-radio networks only report the bloodshed loving omnivore studies, where they take omnivores with 10 times more plaque than a healthy vegan, cholesterol 2-3 times the healthy level, 200 or 300, LDL 150 (not 50 ideal) and they say olive oil lowered it by 10 points versus bacon. Sure, arsenic (unfried olive oil) is better than cyanide (Palm Oil, Bacon, fried seed oils, pure saturated fat), but that doesn't make olive oil the healthiest fat giving you no plaque, like chia seeds or a walnut. Our problem is the lowering of average IQ by these street fighter IQ TV networks, where shouting replaces civil immortalist tone and where pseudoscience (the comical presentation of 1 study about a topic by 1 professor to push fake commercial science (conclusion must be that the deadly food Big Industry produces is better for you than some far worse food, to use in ads, or else college gets no money for research from Big Industry, so 98% of nutrition, etc science papers are pure FRAUD paid for by Aristocratic Clans) or imprecise science) replaced science (the comprehensive analysis of that study in the context of 25 other papers last 20-100 years that say the opposite at times due to different study subjects, doses used, instruments, etc like a professor at the National EPA-DHA University would present instead of a professor paid millions by the Avocado, Coconut Industry to spread lies). Our society has become anti-truth, we have only 3% of STEM graduates in Congress, nobody almost includes science references in their social media. There is no ethos or requirement to provide science paper proof for one's statements, to be honest. The Immortalist Party creates a law that removes all official posts without science references, to spur the birth of a "trust but Verify, Truth and Honesty First Society of Critical Thinkers instead of easy to dupe sheep folled by the evil aristocrats". Nobody can be in Congress without college degree in stem or any any official position. Palatial Aristocrats Write Our Science: they bribe professors, who need grants,

fudge the study design to make it promote fat, gas, coal.

A vegan doctor, with total cholesterol 93, the healthiest TC of anyone online I've seen so far, explains for us all his hypothesis about why low fat vegan is better via 1000+ videos, such as 159 videos on dementia, 104 on cancer, 74 on plaque, 54 on women diseases, 51 on male diseases, 34 on automimmune diseases meat, dairy cause.☺☺☺ He presents the many theories of atherosclerosis and low fat since 1920s. LDL is a main driver of plaque. If the TV-radio networks are so good, so wise, how come under their continuous education and trash content, so inspiring, so nutrition and health oriented, so well being of the masses focused, in 1965 US obesity rate was 13% vs 42% today, CEO pay was 20 times worker pay in 1965, 389 times higher in 2021? No, TV-radio networks are greedy for profit entities who screw the USA for profit alone, working hand in hand with the aristocratic class of destroying American food supply and pushing commercial pseudoscience and deadly foods and pills upon the gullible working class. That's why we need the national University System and have real professors, not Big Industry Fake Study publishing pseudoprofessors, to present real science, complex and intelligent, instead of these 3rd grader CNN/Fox 'science' sections, 3 minutes for an article of 20 lines making a CNN article about a topic to push some bad food. Even ChatGPT and Google Answers and Fake News Networks promote Violence indirectly, the creation of a cruel apathy, of a monster who doesn't try to minimize the suffering of all sentient beings, of a soulless robot far removed from *gentle tender soft loving healing nurturing* loving kindness, a little fan of Bloodshed and Fattening Everyone by Sadistically killing Animals with No Mercy: 98% of science papers today serve CEOs and AI is often as low IQ as a Fat Rich aristocrat dying of atherosclerosis from his Bloody Fat Eating: Meat is 0.5% blood and lots of bad fat. The fake phony 0.4 million "clergy" of USA forget that just as they pretend to ask for God's mercy or kindness, so does God want us to have mercy on animals and stop the bloodshed via the science of eterni foods. These charlatan 'clergy' selling fake miracles are too busy eating blood obtained by endless suffering of animals to even give that a mere thought. Their tone of speech, the music they promote, tells you exactly what they eat: blood, like Vampires. Equally cruel are many vegans, who, in their anti-science stance, fight the end of slaughter by big agriculture machines who kill mice/etc during harvest, plowing. Vegans need to support the end of plant/animal agriculture now. Mummies☺☺☺ and digging of medieval graves showed all Demonic Aristocrats had Plaque, but Peasants, who ate no meat, mostly plants had far less plaque than the Infernal Rich. ChatGPT and other AI are what the Aristocrat Run Governments want the overweight slaves to believe. Any ethical government would prioritize eterni foods to replace animals/plant foods and give everyone a longer happier life without creating pain in any sentient beings, but with the comical Re-pub-licans, Demon-crats in power, such an Idealistic Dream of Kind Immortalism can't flourish. The China Deep Seek AI is a comedy too, they push Chinese Gov answers to everything. AI = BS. AI is used by gov to

brainwash people into trusting it, fulfilling the role of religion before, hiding that the gov controls the AI as the Italian Empire controlled Christianity. The google AI answers are like searching a human made encyclopedia of commonly believed theories in fake/real science. I asked same question slightly differently and I got opposite answers, the epitome of abysmal IQ.

Vegetable oils take a healthy brain and turn it into a sick Alzheimer brain like in this picture, so discard all oils. Many MDs recommend avoiding vegetable oils (never add them before cooking), for best heart health, even if canola contains 9.1% ALA ω3. Millions of people never use oils. It's much healthier to eat unroasted raw walnuts, ground chia seeds, ground flaxseeds instead and a *vegan* DHA oil or algal oil pill. Coconut oil (which American Heart Association deems unhealthy, too much saturated fat) is the most stable oil in terms of oxidation as shown in instable-oils.pdf, which is Table 1 in M. Erickson and N. Frey, 1994, Property-enhanced oils in food applications, Food Technology 48, page 63. However, most people use safflower, soybean, sunflower and canola oils usually, which are 23-32 times less stable than coconut oil as the picture shows, and high in ω6. However, the more stable coconut, palm oils are so high in saturated fat, they raise LDL and cause arterial plaque. Because any store bought oil has been sitting on shelves a long time, exposed to light, heat and oxygen (not refrigerated), it's already oxidized and these compounds are detrimental to human health. Not only that, but manufacturers are sometimes adding chemicals to oils to reduce oxidation and increase profits thru longer shelf life, chemicals which have been shown in some studies to weaken the immune system and cause side effects such as butylated hydroxyanisole (BHA), butylated hydroxytoluene (BHT), TBHQ, propyl gallate and ethoxyquin. Rancidity of oils is a big issue, besides oxidation during processing. Just like fruits rot, oils go rancid too, albeit much slower. Moreover, when placing oil before cooking the oxidation goes on even deeper, especially during frying. These fats react with proteins to form toxic lipoproteins and they produce free radicals after oxidation, which trigger reactions between sugars and proteins in the food, forming glycoproteins and AGEs. It's much better for retaining food nutrients to use low oxygen sealed methods, such as pressure cooking, as explained in the AGE section on cooking under water to avoid oxygen. Studies show pressure cookers retain the most nutrients. Oxidized fats, sugars (esp. oxidized cholesterol, a subclass of oxysterols, present only in animal foods) and other oxidative stress inducing chemicals induce the internal generation of oxidized cholesterol from human body made cholesterol (not dietary) and leads to atherosclerotic plaque in *vegans* and non-vegans. *Endogenous cholesterol* becomes *endogenous oxysterol* that can be 100 times more deadly and plaque forming. ☺☺☺

Most Common Vegetable Oils have negligible ω3 (except for canola, soybean) compared to walnuts, chia seeds, flaxseeds which are very rich in ω3 fatty acids, flax 103 times more ω3 than tilapia and 80 times more than tuna. Walnuts, (which have *90 times the ω3 of avocados and lentils, 45 times the ω3 of kale and 44 times the ω3 of macadamia nuts, 30 times linoleic acid of*

macadamia nuts which have 6.5:1 ω6:3 ratio, macadamia are pure trash vs walnuts), are the only healthy nuts. Restaurant or store foods have usually too much ω6 in them and if there is too much ω6, the conversion of dietary ω3 ALA (α-linolenic acid) to *brain-eye active DHA* diminishes as explained above, leading to systemic inflammation, brain damage, diabetes, rapid aging, atherosclerosis and Alzheimer. Earth is Obesity planet due to eating seed oils on an industrial scale. US obesity rate is 42%, Japan is 7.6%. In 1965 US obesity rate was 13%, CEO pay was 20 times worker pay in 1965, and 389 times higher in 2021. Coincidence? US fat intake is 34% of calories, Japan 20% of calories. Japan is the thinnest developed nation on Earth, as the chart shows, due to the lowest % of fat calories in their diet and a lot higher ω3 than 6 versus USA. Dietary fat becomes belly fat for sedentary people ultra fast, unless they're ketogenic, which is bad, since it raises LDL in the long run and worsens diabetes. The only really healthy oils sold worldwide are flaxseed/chia oils, but only if it's in capsule form as it oxidizes in 3 weeks too much if kept in an opaque bottle, in the fridge, due to air contact. Some vegans eat the dark lignan polyphenol rich flaxseed oil (ω3:6 is 4:1 way healthier than 1:1 canola oil). Flax oil is often added to pills with DHA-EPA, the key ω3s that vegans need to take if they can't convert (see blood tests, 1% of males can't convert almost any ALA to DHA) vegan ALA ω3 to bioactive ω3 DHA. Flaxseed oil as caps is fine, other vegan oils are poison, they fatten, 90% of humans are fat by immortalist standards. Omnivores beware: even canola oil, ω3:6 1:2 is better than ghee or butter, since any plant oil is better than animal oil, having less saturated fat. Vegans beware: chia oil is the best, followed by flax (due to traces of cyanide in flax oil). If you want a 2nd choice, canola is better than olive. The detailed comparison of canola phytosterols (that inhibit DHT, plaque, cardiac events) with olive oil is in the first page of the olives section (a good proof why canola wins against olive oil at preventing hair loss, stroke, infarct and plaque). ☺☺☺

It is thus better cook at home until immortalists bankrupt all these criminal entities committing genocide against USA by fining them trillions via the 11 companies reform of the Immortalist Party. The aristocrats are like illegal mexican cartel members who, even if illegal, employ illegals who're their slaves and do human traffic, except these aristocrats do human traffic of citizens, by telling them lies and fake science of TV to justify selling poisonous foods that destroy our health and brains and justify useless treatments we don't need. This genocidal class warfare against the working class needs to stop, we deserve real data, not fraud. Pressure cookers are way better for cooking foods since the oxidation of any existing unsaturated fat can be 30 times lower. It's better to always add oils after food is cooked, if one can't remove the addiction to oils. The ω3:6 ratio is 1:50 in corn oil, 1:13 in olive oil, inferior to soybean 1:8, canola 1:2, chia 3:1, flaxseed 4:1. Soybean has 6.8% ω3 by weight, canola 9.1% ω3 and olive 0.76% ω3, corn 1.1%, sunflower 0.2% (high oleic) and 0.04% (mid oleic) ω3, so olive oil 0.76% is very low in ω3 vs 57% in flax oil. Therefore, for the best ω3:6 ratio, using flax, chia, canola is OK, while DEATH IS FASTER WITH

olive, corn, sunflower, safflower, sesame, cottonseed, peanut. Cooking with oils is SUICIDE, but ☺abysmal IQ☺ folks (whose IQ is still 5th grade before chemistry classes, but make $ millions spewing garbage on TV) simply can't get it, having missed 5th grader chemistry, due to an aristocrat run TV-radio that drastically lowers average IQ of the working class. Proper cooking is done under water in water all the time. Read this AGE section to see why. The time to take America back from the Infernal Aristocrats is now, all restaurants cooking in air and oil shut down. All barbecues banned. And use Eternal Altruism Inc to replace all media.

Cooking Oils are deadly alone, as is the ☺☺☺even more genocidal idea to cook in oils. Dry heat cooking without oil or oil cooking (it's dry by definition, not covered by water) forms AGEs 90 times more as the fats in the oil mix with air and protein and form AGEs. Oil cooking needs to be banned and the people promoting it on TV fired. Most oils need to be banned, as well as their manufacturing, except for cosmetic products or those high ω3 oils used as supplements (flax or chia oil, since flaxseeds have toxic cyanogenic compounds, cause hard stools). *The ubiquitous availability of cheap oil* allows companies to add it to sweet products and cause a planetary holocaust via obesity. Most people are deficient in polyphenols, fiber, and other micronutrients that are trashed by seed processing into seed oil. Nothing is lower in IQ and more evil than trashing the healthiest longevity giving part and retaining the most toxic part of PLANTS, the unhealthy oils with the most inflammatory (heart attack, diabetes, kidney failure causing) ω3:6 ratio: 1:50 for corn (1.04% ω3, 51.9% ω6), 1:130 for safflower (0.09% ω3, 12.7% ω6), 1:15 for avocado (0.11% ω3, 1.69% ω6), 1:13 for olive (0.76% ω3, 9.76% ω6), 1:311 for sunflower (0.074% ω3, 23% ω6), instead of the MUCH HEALTHIER 1:2 in canola (9.14% ω3, 18.6% ω6), 1:4 in walnuts (9.08% ω3, 38.1% ω6) and 4:1 in flax (22.8% ω3, 5.9% ω6), 3:1 in chia (17.8% ω3, 5.84% ω6). When you eat corn you boil at home or in a can, that oil there will take 10 hours to deposit as fat, if you use fewer calories than those eaten that day, but if you eat it as oil, it can go to belly fat so easily, as fat is already there, the body doesn't have to strip fat from the food matrix. The myth of "oils, like olive oil, are the best food for you", is just marketing using fake science. You can get all olive polyphenols or similar in effects from other sources with far less fat or from walnuts, which have 222 times more ω3 than olives. Has any olive ad told you that? NO. They're liars. Stop wasting $$$ on olives, unless you want a filif gecko IQ☺☺☺ brain like the ω3 starved brains. The more oils you use (all have high ω6 except canola), the more you hinder ALA to EPA and ALA to DHA conversion, the more ☺abysmal in IQ and lifespan length you become. The brain needs EPA, DHA☺☺☺. You need DHA, the main (60%) PUFA (polyunsaturated fatty acid) in the brain, 97% of ω3 in the brain, 93% of ω3 in the retina and 40% of PUFA in the retina, not Spanish poison, olives. Stop cooking with oils. All body membranes use DHA, the heart too, you need EPA to fight brain oxidative stress. Most olives are so processed, most olive oil so lacking in polyphenols, so fattening (need eat 22 kg of olives to get same ω3 as in 100 g of walnuts) that

you only get pure junk anyway. It's the Italian, Spanish, Greek Mafias who promote it, as they own most olive oil companies. It's hybrid warfare against the American brains. There is no science. Everyone eats so much ω6 from junk food, meats, dairy, soy, that adding these ω6 oils is nothing short of genocide, as the ω3 section explains. Canola oil has bad compounds, EU limits canola oil erucic to 0.4% if used for baby formula and related products.

The walnut section explains how much healthier in shell walnuts (exported by US, Australia) are versus olives, avocados or the veggie oils (imported by US, Australia). Why are the USA/Aussie governments killing Americans, Australians? Who runs USA/Aussie? Why is the criminal US gov feeding pure poison to lower IQ of Americans, while exporting the 100 times healthier walnuts? Immortalists will ban all toxic olive, olive oil, avocado, avocado oil, non-walnut nuts, coconut imports and ban all walnut exports. Balance the trade to boost American IQ. America FIRST. Why are the American workers being poisoned? It's 1776 again? Aren't you pissed? We raise walnut prices for export 10 times and impose 1000% tariff on non-walnut nuts to protect American brains and bodies. USA is the leading exporter of walnuts on Earth, but we live shorter than many nations we export them to, since we're led by ☺infinitesimal IQ☺ buffoons. True IQ and moral leadership is forcing other nations to plant healthy walnuts instead of the poisons they export to USA, by new tariffs to protect the human quantum field from the oxidation of good walnuts during shipment overseas. We're not selfish, we just help corrupt governments do what is right for humanity. The low IQ US aristocrats can't even package and store walnuts properly, opaque, low temp, etc, instead they poison us with rotten imported junk, in clear bags to trash our brains with plaque for oxidized fats, raise LDL, and take over our country. California nuts, walnuts are being destroyed, roasted, oxidized, filled with AGEs and then a French ☺☺ clown IQ method of "walnut and other nut oil making" is poisoning America, thanks to French low IQ: watch the video of how these French poison USA with their "roasted nut oil". Time to fine "La Tourangelle Nut Oil Company" 2 trillion for genocide and have it nationalized by Eterni Foods Inc. This is genocide, like French fries. Isn't it ironic, we allow the French to poison USA with French fries and roasted oils. It's time to take our food supply back from foreign aristocratic leeches who chase profits & are 0 IQ. Crain website says "customers range from retail grocery store chains (filif cow IQ folks who store them at room temp in terrible clear bags with oxygen) to large regional bakers, bakery supply distributors, ice cream manufacturers, cereal makers, multi-national food manufacturers (these destroy the walnuts, create AGEs by heat and poison USA with genocidal processing methods)". In Los Molinos temps reach 109°F sometimes, and the walnuts are not frozen or even refrigerated properly, so the whole nation is poisoned by the in shell moldy walnuts. Rotting happens with every Amazon walnut seller, all shipping stuff far worse than even Crain. USA is run by gangsters who only chase profits, no Amazon walnut meets immortalist rancidity standards. All these☺abysmal IQ☺ aristocrats waste billions to take

healthy foods, poison them and sell them to us, when the central government can simply store nuts/seeds in freezers at 0°F as needed, invest billions in freezers/fridges to provide fresh amazing foods and locally grown vertical farm fresh kale. All these grocery chains fail to properly store nuts/seeds and many other foods. The inefficiency, astronomical profits make it impossible to provide quality foods to USA. The central eternifood.gov can have the coolest warehouses worldwide where everything is so fresh, everyone feels comfortable to do all groceries online, fully knowing there is no mold in any produce or item. All other companies like Amazon would go bankrupt due to huge fines for selling rotten food: behold the black mold. We can end the genocide of USA by aristocratic parasites, who more often than not, are illiterate ☺abysmal IQ☺ clowns without any chemistry knowledge.☺☺☺

In 1788, UK sent prisoners/dissidents, to Australia, victims of the aristocratic terror government, enslaved workers scapegoated by the unfair system. Now, they're being poisoned, the healthy walnuts ought to never be exported anywhere, and instead be fed to these former prisoners (Australians), to be fair. Let those corrupt governments (that import walnuts) wipe out those tobacco and wine millions of acres and plant their own walnuts or chia seeds, leave Australia walnuts for them, in shell, for maximum health. Let one continent become immortalist at least. Enough royalists, while 2 million Aussies were homeless at any given time last few years, thanks to aristocrats first policies. Let the Jesus genocide of 2 billion, so well deified by the Royal families and Anglican, Christian, etc Churches, via alcohol consumption, end once and forever. Give people walnuts to boost brain ω3, not Jewish alcohol to deplete brain ω3. End the terror of Australians, let all live to 130, not 83.5 today, let Aussies live much longer than UK, to show immortalism wins vs royalism. The ω3 & 6 ratios may be off slightly depending on the species of sunflower. But still very toxic. A slight variance can occur since the 18:3 numbers used to estimate ratio are not always 100% ω3, 1-2% of it can be sometimes ω6 when USDA doesn't list that number, but it won't change much the ratio, only 1-3%, as you can easily confirm with NIH papers. The high/low oleic sunflower oil, etc can have 3 times less ω3 than others. An ethical government would require the ω3 & 6% to be listed on every oil sold. A coffee grinder can turn any chia seeds into a powder easy to add to a smoothie to increase nutrient absorption 300 fold. ω3 in flax, chia is not absorbed, unless you grind them into a powder. Just chewing a little won't do anything. It's way healthier to eat the actual corn, not the deadly processed, oxidized oil. We get 90% of population obese, with so much fat (20x above normal), who're "not to be shamed", victims of a government of decentralized incompetent clowns who *think* with their buttocks, *causing millions to have* buttocks 2-8 times☺☺☺ bigger than normal. Too many are so fat due to the *addition of* Olive, etc oil *and refined sugar to 5000000* products. Why don't they ban the addition of refined sugar/oil in food? The walnut, olive, avocado sections explain fake studies.

Low fat diet effect on stool smell, toxins, cancer, amount of toilet brown residue (Aug 2025):

Colorectal cancer is a major killer. Each morning after the first meal or after waking up I defecate once and the stool is unlike when my fat intake was higher (10% instead of 5%) meaning:

1. 50 times less dirt on toilet paper on average, meaning sometimes NOTHING. Most stools of my life (and most people) were sticky and left a huge amount of brown stuff on the toilet paper needing 2 toilet papers (each folded in 2 at least if very watery), but with the new low fat diet free of walnuts, the stool leaves 100 times less brown stuff, usually NOTHING AT ALL.☺☺☺

2. LOWER COLORECTAL CANCER RISK: The sticky paste is a thing of the past, now it's much more horse like, and this means no sticky STOOL on the colon itself, that paste forming a biofilm on colon walls that causes growth of toxic substances leading to colorectal cancer (see cases of obese people who get 40 lb of feces removed from their colon, hardened feces due to this fat causing film upon film to form and create a lethal eternal poisons into blood 1 inch coating).

3. 20-70 TIMES LESS SMELL: It was always been more horse like like with many 10% fat vegans, but before, I ate 10-12% fat and it was more diarrhea like instead of horse like. Fat sticks and takes with it other components, rots them, putrefacts/ferments them and produces horrible smells that are a marker for the toxins released into the blood via the colon and intestine. The only thing is I forgot to drink a lot of water, so it's a little dehydrated at the anus end, at the beginning of defecation, the little harder balls that come out in 5 seconds for 1 inch vs 2 seconds for the rest (6-7 inches). Moral of the story: drink plenty of water or 0 caffeine tea, like chamomile. The 2, 3, 4 and 8 day fasting totally changed the colon microbiome. Bending a little downwards to make it seem like squatting makes it come out on its own so much faster. Gas is always odorless, when I was omnivore decades ago, it was ALWAYS foul smelling. Just need figure out best way to hydrate, to avoid such dry stools at the every first 1 inch. Conclusion: fat makes us stink so bad, when we defecate, when we have any gas, when we open mouth. Foul smell is likely a marker for rot and deadly bacteria growth, a marker for shorter lifespan, since high sulfur activates mTOR speeding aging and high sulfur is rotten egg smell absent in healthy vegans who avoid processed vegan foods and eat only tiny amounts of "smell causing" soy (Met-Cys are high in soy, so they make you stink like an omnivore if you overeat it).☺☺☺

► ► 12.4.32. ARACHIDONIC ACID ◄ ◄

ARA or arachidonic acid, is $C_{20}H_{32}O_2$, ω6 CH_3-$(CH_2)_4$-$(CH{=}CH$-$CH_2)_4$-$(CH_2)_2$-COOH, 20:4(n-6), made by the body from ω6 linoleic acid in oils, nuts, seeds. It's present in breastmilk in higher quantities than DHA even and they found it's very important. In 2001 many infant formulas in the US started to add DHA and ARA (arachidonic acid) to mimic the content of human milk. DHA is the most abundant fatty acid in the brain, followed closely by ARA and probably plays an important role in telepathy. The EU started to add them to infant formulas in 1994. Babies

who're fed exclusively on breastmilk at 6 months get about 169 mg ARA and 115 mg DHA daily, so if someone can't provide these amounts while the baby is under 1 or 2, they can add these to their diet or buy a formula that has these levels. Some kids are breastfed exclusively until 1-2 years old. It's important to know that cow milk is very different than human milk and far worse, from the point of view of DHA, EPA, ARA, DPA fatty acids content essential for brain development, than infant formula with added DHA and ARA as explained in Table 4. Studies have shown that DHA and ARA are very important to the IQ, psychomotor skills, cognitive abilities, birth weight, height, and health of babies. The capsule of certain "pure" DHA, ARA, EPA is often made with GELATIN that is not vegan. The coating is not good to eat due to chemicals in it of dubious nature which may increase inflammatory markers because animal GELATIN is made from animal bones, cartilage, skin and can have antibiotics, hormones and chemicals added to animal feed. Some companies use vegan gelatin. The brain is the most energy-demanding of all the human body organs, accounting for 2.3% of the total body weight but 23% of the body energy utilization in adults and 74% of the energy utilization in newborn term infants ► Ntr 2011;3(5):529-54. 20-25% of fatty acids in the brain are ARA and DHA, about 10-13% DHA and 10-12% arachidonic or ARA. Adrenic acid (22:4n-6), $C_{22}H_{36}O_2$, molecular mass 332, has 4 extra hydrogens that DHA ($C_{22}H_{32}O_2$) doesn't have. Adrenic acid is made from arachidonic acid and it is the third most abundant fatty acid in the brain. Low blood levels of DHA or ARA are found in those with Alzheimer and depression. During the last trimester, the fetus accrues about 50 to 70 mg of DHA per day. In one study funded by the U.S. National Institute of Child Health and Human Development, infants (18 months) given supplemental arachidonic acid (they got vegan one, and the same thing happens during pregnancy) for 17 weeks demonstrated significant improvements in intelligence, as measured by the Mental Development Index. This effect is further enhanced by the simultaneous supplementation of ARA with DHA.☺☺☺

ROG 2008;1(4):162-9 emphasizes the role of DHA-EPA in relationship to ARA, i.e. too much ARA is bad. It says "Specific to pregnancy, although both DHA and ARA appear to be essential to fetal CNS development, the relatively poor intake of EPA coupled with the high intake of linoleic acid (which produces ARA), may affect pregnancy outcome by altering the balance of the eicosanoids produced. A high ratio of ARA to EPA may promote untoward effects such as preterm labor and preeclampsia. A linoleic acid-rich diet produces an abundance of ARA, which serves as a precursor of the potent 2-series prostaglandins (PGs) E2 and PGF2α, and the vasoconstrictor thromboxane (TX) A2. Both PGE2 and PGF2α are closely associated with the initiation of labor and preterm labor, whereas thromboxane A2 has been associated with preeclampsia. Whereas the omega-3 fatty acid, DHA, is not usually considered to be involved with eicosanoid formation, EPA is a precursor for the 3-series of PGs and produces PGE3 and PGI3, which promote relaxation of myometrium. EPA and DHA competitively displace ARA in the membrane

phospholipids and thereby reduce production of 2-series eicosanoids. Thus, a diet that provides a closer balance of omega-3 to omega-6 fatty acids may be as important to pregnant women as the absolute individual plasma levels of these fatty acids."☺☺☺

The relatively stable content of ARA in human milk is biologically important because it provides *preformed* ARA consistently at a time when brain growth and development is most critical. The majority of ARA in human milk doesn't derive from dietary LA but rather from maternal stores of ARA in her body fat. The accretion rate of ARA is estimated to be 6.1 mg/day during the first 25 weeks of pregnancy and increases to 95.2 mg/day by 35–40 weeks gestation. The fetal accretion rate for ARA is 2-fold that of DHA "In relation to dietary ARA, many regulatory agencies have tended to assume that beyond the age of 6 months, the endogenous synthesis of ARA will meet the needs of infants and young children during this period of rapid growth and development. However, studies have shown that the endogenous synthesis of both DHA and ARA is (synthesis drops 66% if no ARA in milk formula by month 7) insufficient with evidence of blood and tissue concentrations decreasing after birth if there is not an exogenous supply" ► Ntr 2016;8(4):216. Some countries had a dietary intake of ARA at 2 years 10 times lower than Canada, as Table 1 of the paper shows. It would be interesting to do IQ studies and other similar things to see if there is any correlation between ARA intake and IQ, etc, telepathy at age 3, although estimating ARA intake or linoleic intake and its conversion to ARA is hard. In several nations, even developed, like Germany, etc, going from 100% human milk in diet to a little or 0 milk and food meant a huge drop of 5-10 times in ARA intake, with possible diminishing of IQ, as observed with DHA. If mom doesn't breastfeed much, DHA and ARA naturally need be added to juices, infant formula or whatever baby eats, if infant formula is a tiny percentage of diet and would make DHA and ARA intake dangerously low.☺☺☺ The World Health Organization (WHO) and the American Academy of Ped recommend that infants be exclusively breastfed for the first six months of life to achieve optimal growth, development and health. The median duration of breastfeeding was 18.6 months in 33 countries. In exclusively breastfed infants, the mean milk intake at 6 months was measured to be 854 g/day. Based on those data and an estimation that 4.2% of human milk is composed of fatty acids, the average ARA and DHA intakes in exclusively breastfed infants at 6 months of age are about 169 mg/day and 115 mg/day, respectively. Infant formulas typically contain levels of ARA and DHA at 140 mg/day and 100 mg/day. A 1 year supply of ARA for a baby is only 36 dollars on Amazon. However, the impact on the health of the baby may be worth 1 million dollars and those irreversible brain structures that can't be repaired after womb or first 3 years of life stage. Just like with DHA. ☺☺☺

Most moms don't know much about ARA (only 7% of American moms take even DHA supplements, far fewer know about ARA), but one day it may be seen as important, maybe not as vital as DHA, but important in the first 2-10 years of life. All mammals have ARA and DHA in

their brains and monkeys and mice supplemented with DHA and ARA became smarter too, not just humans. ARA has a critical role in immune cell growth in the thymus, and in differentiation, migration, and proliferation of immune cells. ► AJCN 2006;83(6 S):1505-19S. ARA represents an important nutrient for infant and childhood bone development and metabolism. Analysis of the phospholipid composition of skeletal muscle biopsies collected from 56 children <2 years of age indicated that ARA represented 16.5% of the total percentage of LCPUFA (Long Chain Polyunsaturated Fatty Acids) in muscle phospholipids in the heart. Placental ARA content biomagnification is independent of maternal ARA status at both delivery and at 3 months of fetus age and is found to be similar across different populations with differing diets. These findings indicate that biomagnification as a biological process seeks to achieve a uniform ARA status in infants at the expense of their mothers. The process of biomagnification suggests that a certain level of infant prenatal ARA status must be maintained for optimal infant growth. Infants with the lowest birth weights have the lowest levels of ARA, and those born earliest have the lowest levels of DHA (being born early has often times bad consequences). Rapid synthesis of brain tissue occurs during the last trimester of development of the human brain and the early postnatal weeks, so ARA and DHA are key. ☺☺☺ Fat deficiency symptoms (necrotic tail and scaly feet) appeared in all animals fed linoleic acid (LA) at less than 0.6% of calories and ARA at less than 0.25% of calories. ARA was 3-fold more effective than LA in liver incorporation and mitigating deficiency. Fat deficiency symptoms affecting the skin were not surprising. Most of the epidermal PUFA (poly unsaturated fatty acid) is ARA. ARA/LA deficiency causes skin flaking in humans, dogs, and mice, symptoms that can be restored with LA dietary therapy. LA is an ω6 essential fatty acid we get from oils and seeds, as well as veggies, etc. Flax and chia seeds have about 6 g of LA in 100 g, sunflower seeds have 23 g of linoleic acid LA in 100 g. Arachidonic acid promotes skin wound healing through induction of human MSC migration by MT3-MMP-mediated fibronectin degradation. ARA is largely released during injury, but it has not been fully studied yet how ARA modulates wound repair with stem cells. ► CDD 2015;6:e1750. ARA also enhances hair folicle survival and the growth of hair ► AD 2016;28(1):55-64. ☺

One reason conversion rates from ALA (α-linolenic acid) to DHA and from LA to ARA are so variable in different studies is also the following: if some people eat far more ALA than they need, the body only needs a certain amount of DHA, so it will naturally stop converting ALA after a while thus lowering the conversion rate, as signaling molecules will indicate they got enough. Same for ARA. Plus there is the limiting factor of the enzyme availability in the organs involved in these conversions, ENZYME SYNTHESIS which is also dependent on other raw materials such as minerals etc. So, the conversion rates are all over the place, hence some people convert ALA to EPA at about 10-20%, but LA to ARA at 0.4%. The DHA and ARA needs of the body are different for different people, since there are trillions of chemical reactions each second

influencing perception of what is needed, etc. Another very important finding was that "Increasing dietary linoleic acid LA doesn't increase tissue arachidonic acid content in adults consuming Western-type diets" (they lowered LA 10 times, increased it 6 times and no change in ARA % in tissues, as if the body knows when it's got enough ARA or the body has limited supply of delta 6 desaturase enzyme limiting LA to ARA conversion) ► NM 2011;8:36. ☺☺☺

The levels of LA in the diet required to achieve essentiality could be as low as 0.5-2.0% of energy in infants and it has been reported that tissue levels of ARA no longer respond to dietary LA intakes above 2% energy in adults. No more than 4 g of LA to reach ARA tissue saturation. To increase blood or tissue levels of ARA, one needs to take ARA, but it's not always wanted if it causes inflammation. Elevated tissue ARA levels are believed to be positively associated with eicosanoid formation and risk for a variety of chronic diseases, including cardiovascular disease, cancer, inflammation. Thus, it makes no sense to take ARA pills for most people (except kids, pregnant moms), unless they know their blood levels are very low. PLEFA 2009;81(2-3):165-70 showed that DHA and ARA are all mice need, not ALA and LA to prevent symptoms of fatty acid deficiency. Same thing may be true in humans to some degree at least, but LA may be essential for hair and skin since "We interpret these results as strong evidence for a very specific and essential function of linoleic acid in maintaining the integrity of the epidermal water permeability barrier. This function of linoleate is independent of its role as a precursor for arachidonate and eicosanoids." ► BBA 1985;834(3):357-63 (when people don't eat enough LA, they suffer from dry or scaly skin, hair loss, etc). The Δ6-fatty acid desaturase (an enzyme helping LA to become ARA) gene FADS2 was cloned in 1999. An adult human case of Δ6-fatty acid desaturase deficiency was identified and described in the literature ► JLR 2001;42(4):501-8. The patient exhibited growth retardation accompanied by skin abnormalities, corneal ulceration, and feeding intolerance. Treatment with dietary DHA and ARA restored normal growth and eliminated most of the symptoms. If someone is deficient in ARA or EPA they may develop acne. "Better motor performance was also observed in Newborn pups of Δ6-fatty acid desaturase knockout mice fed the ARA + DHA diet." ARA+DHA was superior to DHA alone in these special mice, and ARA+DHA gave them better motor skills than the wild-type mice who didn't have the genetic knockout of the enzyme converting LA into ARA. Other studies show the vital importance of ARA for mammalian brains. PR 2002;51(3):273-81 showed that monkeys fed DHA and ARA in infant formula became smarter than those fed formula without DHA and ARA. PLEFA 2011;84(1-2):63-70 found that maternal supplementation with ARA positively influences learning outcomes in rats. Amusquivar et al reported that rat pups of rats fed low ARA diet (fish oil) had smaller increases in postnatal body weight and length, and delayed body and psychomotor maturation indices than those fed olive oil (more precursors for ARA). Slower growth and brain development occurred when both dams and fetuses were fed a moderate

amount of fish oil (10%) as the only fat source. In the study, the ARA level was lower than the DHA level in brain tissue of the offspring of dams fed high n-3 fatty acid diets. The differences in postnatal development disappeared when the fish oil was supplemented with γ-linolenic acid, a precursor of ARA. The growth deficits were also eliminated by the inclusion of ARA in the diet. The studies demonstrate the importance of maintaining adequate levels of ARA during development, fish oil being insufficient if there are no ARA precursors in the diet.☺☺☺

PO 2009;4(4):e5085 showed that ARA pill was superior to DHA or DHA+ARA pills in some rat (not human) functions. AJHB 1999;11(4):457-67 showed only male preterm infants were negatively affected by formula with DHA only, while females were not, this may be due to female ability to convert DHA into EPA better. They found later that adding both ARA and DHA to preterm infant formulas also resulted in beneficial effects on visual acuity as compared with infants fed a control formula. Adding only DHA was not enough in some cases for improvements due to inhibition of ARA by DHA and inhibition of ARA by EPA made from DHA. A proper balance of DHA and ARA is needed for optimal cognitive performance as too much DHA may suppress the benefits provided by ARA. They did compare formula with DHA 0.32%, 0.64% and 0.96%, plus same ARA level of 0.64%. Lower DHA was better for certain intelligence measurements at age 3 or 5 ► AJCN 2013;98(2):403-12. Preterm infants fed formula with a 2:1 ratio of ARA:DHA had better psychomotor development compared with those fed a 1:1 ratio of ARA:DHA. Human milk has ARA:DHA about 1.5:1 (it fluctuates and can have even 2:1) ► NJ 2015;14:101. "The mean concentration of DHA in breastmilk (by weight) is 0.32 +/- 0.22% (range: 0.06-1.4%) and that of ARA is 0.47 +/- 0.13% (range: 0.24-1.0%), which indicates that the DHA concentration in breastmilk is lower than and more variable than that of ARA." based on data from 65 studies of human milk from 2474 women ► AJCN 2007;85(6):1457-64. "Infants should receive at least 0.3% DHA, with at least 0.3% ARA, in infant feedings; some clinical evidence suggests that an ARA:DHA ratio greater than 1:1 is associated with improved cognitive outcomes" ► PLEFA 2009;81(2-3):151-8. In premature infants, low levels of DHA, ARA contribute to dysregulation of immune and inflammatory responses, predisposing infants to chronic lung disease from low DHA and late-onset sepsis from low ARA. AJTMH 2015;92(4):797-804 reported that 14 days of 10 mg/kg of ARA in Schistosoma mansoni-infected schoolchildren induced moderate cure rates (50%) in children with light infection and modest cure rates (21%) in those with high infection. The cure rates associated with ARA were comparable to those produced by 40 mg/kg of praziquantel. The combination of ARA and praziquantel elicited 83% and 78% cure rates in children with light and heavy infections, respectively. Infants who consumed formula with DHA and ARA had a lower incidence of bronchiolitis, bronchitis, nasal congestion, cough and diarrhea requiring medical attention than infants fed formula without DHA and ARA ► CP 2006;45(9):850-5. Infants fed 0.32% DHA and 0.64% ARA got better visual acuity than those fed formula

without DHA+ARA. Those fed 0.64 or 0.96% DHA and same 0.64% ARA got the same benefits as the 0.32% DHA group ► AJCN 2010;91(4):848-59. By age 4, DHA and ARA pills significantly delayed time to first allergic and skin allergic illness.

The proportion of ARA in the food the placenta delivers to the fetus ranges from 14% to 20%. Infant formula for preterm infants only delivers ~0.4%–0.6% of ARA. For DHA, the placenta delivery to the fetus is ~6% whereas infant formula delivers ~0.3%. That is a 50-fold reduction in ARA and a >10-fold reduction in DHA compared with the infant's apparent physiological need. When plasma levels of ARA and DHA are followed from birth, they continue to decrease to about one third of that of the fetus. Crawford et al. argue that higher intakes of ARA and DHA are needed to correct for deficiency during the first year of life. Infants with mildly abnormal physical movements at 12 weeks of age are reported to have lower ARA content in erythrocyte membranes. This abnormality occurred when mothers took DHA alone, but was not seen when mothers took ARA+DHA during pregnancy and lactation ► PLEFA 2010;82(1):15-20. General movements in early infancy predict neuromotor development at 9 to 12 years of age ► DMCN 2005;47(11):731-8. Two epidemiological studies, Lipids 2004;39(2):117-23 and JNB 2004;15(8):467-72, have shown that individuals with learning disorders including attention deficit hyperactivity disorder (ADHD), dyslexia, poor reading ability, temper tantrums, sleep problems, and autism have lower than normal blood levels of DHA and ARA, ω3 and higher levels of saturated fat, monosaturated oleic acid (ω9), iron and vitamin C. Children with learning disorders also have low DHA-ARA in blood, not just infants or autistic adults, so this probably means, for many people, ARA-DHA may need to be supplemented for many years, not just "the first year of life by adding it to formula". Especially if they do a blood test and it comes lower than normal, indicating enzymes don't produce as much as needed from LA and ALA.☺☺☺

The effects of subnormal ARA on brain function seems to be independent of those associated with ω3 deficiency. In Japan where intakes of ω3 are relatively high, the incidence of dyslexia in children is similar to that in the West (6%). Therefore, although the Japanese consume sufficient ω3, there still may be an insufficient intake of ARA to meet the needs for normal brain function during childhood. ARA is the main LCPUFA (long chain polyunsaturated fatty acid) in the inner cell membrane lipids of muscle, heart, vascular endothelium, adrenals, kidneys, liver, placenta, almost all other organs. While DHA controls signaling membranes in the photoreceptor, brain and nervous system, ARA is indispensable in the vasculature and specific aspects of immunity. There is evidence of an RDA for preformed ARA and DHA after age 6 months. In adults, too much ARA instead of DHA-EPA led to depression ► BrBI 2013;31:48-53. ☺☺☺ JCP 2012;32(2):200-6 shows ARA addition to DHA helps those with autism by increasing signal transduction. This mirrors the studies above showing those with autism have low blood ARA and DHA. Giving ARA to mice low in ω3 has bad consequences, since ARA competes with DHA and low DHA is bad.

That's why ARA always accompanies DHA in formulas ► PLEFA 2015;95:41-5. Giving pregnant, lactating rats ARA and DHA (versus placebo) led to better outcomes for offspring, just like with humans ► APH 2013;100(2):186-96. ☺☺☺

Conclusions: ARA to DHA in ratio 1.5 (or up to 2.0) to 1 in any infant formula, smoothie given to a baby seems OK. 169 mg ARA and 115 mg DHA is what average kids (it would be more for those born bigger than average) who get human milk only at 6 months are getting per paper above, so if some kid goes off milk, it seems ideal to provide 169 mg ARA and 115 mg DHA to the kid (pour the liquid capsule into a juice) for another 1-4 years (since babies were breastfed with ARA for up to 4 years in our evolution). Many infant formulas provide 140 mg ARA and 100 mg DHA per day. Exactly as women take DHA while pregnant, they may need to take ARA too, as one study above showed. It depends on serum ARA, serum LA, since some women have more of the enzymes that turn LA into ARA. ARA can't be too high, since it sometimes causes preterm labor or low birth weight and height. ARA is high in high meat diets, but low in *vegan* diets, so vegan pregnant moms probably could seriously consider ARA pills if their conversion of LA into ARA is weak (do ARA blood test, since *vegans* eat more linoleic than non-vegans, so their ARA levels may be same as meat eaters). Ideal dietary ratio of ω3:6 is 1:1 to 1:4 maximum. ***Few studies looked at the ARA:DHA ratio for pregnant humans; m*ost studies dealt with the infant formula ARA:DHA ratio. Only in 2000 they added DHA-ARA to infant formulas to match milk level; thus, there is limited lifespan/IQ data on different DHA-ARA ratios for babies, pregnant moms.

►► 12.4.33. POLYPHENOLS or Vitamin P ◄◄

(see phenolic acids in plums & the 5 types of flavonoids (anthocyanins, flavones, flavanols, etc), the main polyphenols), RDA for K is around 4-5 g, what is RDA for vitamin P or for vitamin S?)

►►► *The richest in polyphenols foods (mg/100 g) are:* ◄◄◄

dried cloves 15188 (12500 eugenol), dried peppermint 11960 (10226 flavonoids, 1734 rosmarinic), dried turmeric 5433 (all are curcuminoids), bee pollen 4000, cocoa powder 3448, flaxseed 1528 (some cultivars), maqui berry 1560, dried sage 1207 (526 carnosic acid, 610 rosmarinic), rosemary raw 1058 (672 carnosic acid), dried rosemary 1018 (987 rosmarinic acid), dried spearmint 957 (901 rosmarinic), dried thyme 878 (rosmarinic 829), wild blueberry 836, blackcurrant 758, acai berry 607, blueberry 560, purple kale 500-682, purple cabbage 393, dark blue plum 377 (black-indigo skin deep purple inside 544, red skin light green inside 200, yellow skin 50), sweet cherry 274, blackberry 260, *purple* cauliflower 250, strawberry 235, raspberry 215, prune 194, black grape 169, *purple* onion 168, apple 136, ►►►► *white or rosé wine* 10 ◄◄◄◄ (this is *the* lowest at *the* bottom of *the table*) as seen in the table of 100 foods etc, or 1519 times less than dried cloves, *perhaps not the stuff written on most wine bottles people buy*

for 30$. That 170 g of *white or rosé wine* bought for 5$, has 56 times less polyphenols than a 2$ blueberry pack. Vodka or whiskey has 0, not even 10.☺☺☺ Is it ethical to use 1.1 million acres for wine, when people got such low polyphenol & fiber intake? *Of course it is not, since it shortens their lifespan versus eating blueberries or purple kale*. That's why, perhaps, we need centralization of nutrition education, centralization of immortality capitalism. Wine got other issues: 40% of violent crime, car accidents are done by drunk folks. The land belongs to We the People, so we can request that 0.62 million acres for wine in California, is used for blueberries, purple kale vertical farms, purple cauliflower, walnut trees. Vote for it at the next election and companies will make the same amount of money, people will have healthier arteries, brains, discover eterni food faster to live to 900, etc. Why are so many so fat and sick? They eat the deadliest junk food/wine, instead of the foods above. More importantly, we would show the world we care about health, nutrition and World Peace. If someone grew a plant like fentanyl flowers that kill people, it would be wiped out, wine is similar, just takes longer to be killed. Let's cure diseases and avoid alcohol.

►►► *The richest in polyphenols foods (mg/calorie) are:* ◄◄◄

dried cloves 47 (15188mg/323cal), dried peppermint 42 (11960/285, *avoid if you got dry eyes, it dries them more*), capers 28.4, dried turmeric 15.3 (5433/354), cacao powder 15.1 (avoid due to *miscarriage, stillbirth, heart defect, low IQ, short lifespan in offspring* causing caffeine and caffeine analogues), lowbush or "wild" blueberry 14.7 (rare except US/Canada), *purple* kale 14, bee pollen 12.7 (4000mg/314cal), *purple cabbage* 12.7, *purple cauliflower* 12, black currant (not available in most countries) 12, cactus pear 11.1, highbush blueberry 9.8, acai berry 8.7 (607mg/70cal), *(dark indigo/purple) plum* 8.2, strawberry 7.3, blackberry 6.0, spinach 5.2, cherry 4.3, *purple onion* 4.2, red raspberry 4.1, black olive 3.9 (extra virgin olive oil 0.07 only, or 56 times less), dried rosemary 3.1, flaxseed 2.9 (walnuts just 0.043 or 68 times less, all other nuts and seeds are very low), apple 2.6, black grape 2.5, green olive 2.4, broccoli 1.3, prunes 0.81, carrot 0.34. This is easy to calculate using Table 1 at EJCN (2010) 64, S112-20 for polyphenol mg of 100 g of food, the USDA for calories of 100 g of food. For *purple* cauliflower/kale/cabbage I used ASPTA 2012;11(3):239-48, IJFSN 2004;55(3):191-9 plus the cauliflower section USDA source, anthocyanidin kale source. The cactus pear data is from the cactus section. Other cactus pears (green) have less, probably two to nine times ☺☺. The darker the color, the more polyphenols. So black or very opaque blue-purple grapes more than red less opaque ones, and far more than green ones. *The more we buy colorful stuff instead of the plain green versions, the more we drive demand for crops to switch towards longevity enhancing varieties*. So when you go shopping you can buy purple, indigo or black grapes, not green/red ones, purple (not green) cabbage, purple (not green) cactus pears, purple (not white or orange) cauliflower, purple kale, not the green one, purple (not yellow) onion, red sweet pepper not the green one, purple corn or rice, not the

white/yellow one, brown (not white) chia seeds, and brown (not golden) flaxseeds.

Common polyphenols are flavonoids, phenolic acids, stilbenes, lignans. Those eating the most polyphenols cut their mortality by about 37% compared to those eating the fewest ► BMCM 2014;12:77. Men in the highest quartile of flavonol (a flavonoid class) and flavan-3-ol intake had a relative risk of 45% and 41% lower risk for ischaemic stroke, respectively, as compared with the lowest quartile. Those eating more flavanones had 45% lower cardiac death risk, 35% lower for flavones ► BJN 2008;100(4):890-5. The more flavonoids people eat, the longer their lives ► AJCN 2015;101(5):1012-20. A 7,447 people study found those with higher lignan intake (0.94 mg/day) had 40% lower mortality than those with 0.44 mg/day intake. Those eating 5.75 mg/day stilbenes got 52% lower mortality than those eating no stilbenes, even 0.48 mg/day meant 31% lower mortality ► BMCM 2014;12:77, see Table 4 for Additionally Adjusted HR (hazard ratio) for the 5th quintile 0.60 (lignan) and 0.48 (stilbenes). Lignans are found in kale, broccoli, flaxseeds.☺☺ Epi 2013;24(5):726-33, a study of 40,622 people, found that mortality was 40% lower for those eating most flavanones, 41% lower for those eating most flavonols, same for those eating more lignans. Most mortality reduction was cardiac. The more flavonoids people eat, the lower the cognitive decline ► AN 2012;72(1):135-43. Flavonoids are the most common polyphenols. Anthocyanin flavonoid benefits are covered in the anthocyanin section, with about 15 studies. The synergistic mix of the best polyphenols in 2-5 gram tablets could extend everyone's lifespan by 10-50 years, most centenarians eat a lot of polyphenols. Many polyphenols are like true semi-vitamins and semi-minerals that extend life. If we lack zinc we can die at 25. We think that "aging is natural", but a lot of it is preventable and delayable.

Some foods were shown to inhibit polyphenol blood intake via polyphenol oxidase PPO enzyme, causing apples, bananas to get brown when sliced, including stuff I never eat: potato, apple, beet greens, peach, pear, mushroom (6 times the level of gala apples, plus carcinogenic agaritine unless you cook it a lot), heart of palms, avocado, banana (22 times more than gala apples, avoid bananas in smoothies with berries), see the full list of enzyme content here. Mango has 500 times less of this enzyme than banana. Tropical fruits, common in monkey areas, also have high PPO levels, as this FBT 2012;5:2921-7 shows, so avoid that junk too. Bananas got too much sugar anyway, better get complex sugars from lentils to get vegan protein and more fiber than bananas. Bananas, pears, peaches and apples are pure sugar mostly and ought to be avoided, cultivated much less (huge waste of carbon and waste for 1 banana), eat carrots, kale, berries in a smoothie instead and you will be way healthier, add 2 g of chia seed or half walnut to increase vitamin A (fat soluble) in carrots absorption. Of course, bananas are way better than sodas and the junk cookies many eat, but we aim higher for the most nutrient dense rich foods without excessive gas or sugar spike. The myth bananas are healthy is pure nonsense, the eternis can't eat stuff that helps food rot in the digestive system, like bananas do, so in our future high tech

powder formulas the toxic starch fibers won't be there, as toxins enter the blood fast when food transit is slowed down by indigestible chemicals. Bananas are a cheap trash food that will get you as far as chimps who eat it daily in the jungle: nowhere. Lentils have protein *vegans* need, and lots of fiber, antioxidants, etc, so they're a much better food than apples, bananas, peaches, pears. Berries and greens are much healthier than most veggies and fruits, except carrots. Dairy blocks polyphenol absorption via casein reacting with polyphenols, so avoid milk in your smoothies/coffee, since you waste your money on polyphenols. ☺☺☺

►► 12.4.34. POTASSIUM | $_{19}K^{39}$ | (lowers blood pressure & pulse) ◄◄

Sky high K with low Na can cause palpitations, cardiac arrest and even death as explained in the first paragraph of the Magnesium section, dealing with high Mg foods that also have high K. When you eat a natural Na (sodium)/K ratio of 1:22 (1:20-1:24) or so like me and millions of 6% fat *vegans*, blood pressure BP drops to healthy range without medicine, so it's usually 93-99 by 62-69, heart rate HR 50-55 while working at the computer. You may need extra Mg if K doesn't do it alone. Na rises BP/HR, K lowers it. When you adopt the Immortalist Anthem ethics and listen to only eterni music, it will stay there a lot and not go to 105/72 or pulse 60 often. The lower the HR, the longer you live, turtles pulse is 17 bpm and live to 200. The AIs (insufficient data for RDAs) in mg are: 0-6 mo 400, 7-12 mo 860, 1-3 yrs 2000, 4-8 2300, 9-13 guy 2500 girl 2300, 14-18 guy 3000 girl 2300, 19+ men 3400 women 2600, pregnant 2900, lactating 2800. The ULs don't exist, since there are no issues with eating tons of K, except in people with abnormal kidney function. If you take too much K, electrolyte imbalance may cause tingling in the feet that stops when you stop eating "KCl to boost electrolytes". I get 4500+ mg/day from food alone (I add 1-4g KCl salt in water sometimes when I feel BP rises above 110/75, this brings Na:K ratio to 20 again when I eat more carrots (69mg Na/100g) which lower the ratio and thus rise HR fast, or when I sleep poorly, which rises HR). HR and BP rise in tandem in a similar %, depending on K intake, Na intake and sleep quality. Half US adults have high BP. Those eating the highest Na:K ratio have a 46% higher chance of all cause mortality (115% higher chance of ischemic heart disease death) vs the lowest Na:K ratio in a study of 12,267 ► AIM 2011;171(13):1183-91. "Physiologically the importance of K in cardiac function is described by the large number of different kinds of K ions channels found in the heart compared to channels and membrane transport mechanisms for other ions such as Na and Ca." ► ACC 2013 ;15(1):17-24. Hypertension ages the brain ► medical...9.php. The richest sources of K *(legumes/potato cooked, the others are raw)* are in order in mg of K *per* calorie: spinach 24.3, cilantro 22.7, zucchini 16.4, parsley 15.4, mushroom 14.9, radish 14.6, tomato 13.2, pumpkin 13.1, coconut water 13.0, green lettuce 12.9, cauliflower 12.1, asparagus 10.1, cucumber 9.8, broccoli 9.3, turnip green 9.1, kale 8.9, sweet green bell pepper 8.7, cantaloupe/carrot 7.9, red cabbage 7.7, beet 7.6, cabbage/sweet red bell pepper 6.8, papaya 6.5, potato 5.8, sweet potato 5.3, ginger 5.2, kiwi 5.1, cooked collard

greens 4.5, bananas/white beans 4.0, orange/watermelon 3.8, onion 3.7, grapefruit, lentils/red kidney bean/green pea 3.2, split pea 3.1, avocado/soybean/pinto bean 3.0, navy bean 2.8, black bean 2.7, milk 2.4, pineapple 2.2, tofu, apple/pumpkin seed 2.1, soy/veggie burger 1.9, chickpea 1.8, flaxseed 1.5, beef/cooked quinoa 1.4, buckwheat 1.3, oats/sunflower seed 1.1, coconut meat/Brazil nut 1.0, sesame seed 0.8, walnut 0.7, chia seed/olives 0.3, cheese 0.2.☺

Less than 2% of US adults eat 4.7 g of K, or more (the minimum "RDA" some believe *in) and more than 99.4%* eat more than the maximum allowed amount of 1.5 g of Na, while 90.7% eat more than the 2.3 g of Na ► AJCN 2012;96(3):647-57. Only 1 in 6000 Americans meets the RDA for both Na & K, RDAs which are themselves not as stringent as the ideal, so we pay *trillions in healthcare as a result*, instead of figuring how to double lifespan by eterni foods. When you take into account many are low in magnesium, only 1 in 12000 Americans meets the RDA for Mg, Na and K. When you take into account that many are deficient in other minerals and vitamins, you realize that only 1 in a million Americans get the basic nutrients required to live to 110, so only 1 American lives to 110 in 1 million people. Na intake in *vegans* is < 50% "of the omnivorous intake.. The daily intake of saturated fat in *vegans* was 21 g compared to 54 g for omnivores." so *vegans* have the lowest hypertension, heart disease rates ► Ntr 2014;6(3):1318-32. For millions of years we ate 13 times more K than Na, and nowadays most eat less K than Na. Na increases BP, K lowers it, so half of US adults have high BP, which leads to heart disease (#1 killer: 18 million/year), strokes, undetectable blood clots, blood clot induced Alzheimer, cognitive decline, increased risk of Alzheimer, shorter lifespan. If 10 people get their lifespan shortened by 5 years due to high BP causing heart attack 5 years earlier, that's 50 years of lifespan loss, or the equivalent of someone dying at 30 (if that someone had lived to 80 otherwise). Thus, high Na, low K caused high BP kill more people than wars, natural disasters and murders worldwide every year. A few companies offer the same can of veggies with half the salt or no salt, showing that you don't really have to add so much salt to extend shelf life. If more buy the low Na versions and demand lower Na in foods from politicians, we live longer. Meanwhile, choose the brands with least Na (there are tons of them, take 2 minutes to read the Na levels, keep Na under 0.7 g daily if hypertensive), or eat more produce, cook more at home, etc. Restaurant foods are very high in Na too, it sells better when it tastes saltier. K salt is as tasty. Hypotensive people can buy NaCl salt and add it to their dinner or choose saltier foods made by special brands for hypotensives while avoiding K, but most people have hypertension, needing KCl instead. Low Na isn't even a government regulation that would increase business costs, it would lower them, as less salt is used. Shelf life would not be affected much, only taste. Studies show KCl works, and only people with kidney issues need be careful. Yet no country seems to see the urgency and ban Na past certain levels in foods, as Norway banned mercury in all products. This simple move alone would add more life years to humanity than probably any other, in terms of life years

added/$, since it costs less to add 5-10 times less or zero Na, less to add some KCl, too instead of only NaCl. KCl tastes the same as NaCl, but it's more expensive due to lack of mass production. High blood pressure (hypertension) is experienced by 90% of people at some point in their life and is a major contributor to heart attacks and strokes. The WHO says that > 2 g of Na or < 3.5 g K can cause hypertension. Here is a video about Na from the CDC. About 75% of salt intake is from processed and restaurant foods. At home, cook with no salt added in a pressure cooker (healthiest method) if you're hypertensive and you can even add K salt (tastes the same, available at most supermarkets) to further lower the blood pressure. Draining the liquid in canned salty veggies can remove half the Na. Harvard School of Public Health has more salt studies. Some say we only need 200-1,200 mg of Na, depending on weight and activity levels (sweating eliminates Na). Too much Na can damage the bones. The Yanomano Indians who consume only 0.5 g of added salt daily, have a blood pressure of 100/64 at 50 (96/60 on average for all ages) ► JHH 1989;3(5):309-14, much healthier than the global average. CJC 2007;23(7):567-72 mentions the 1989 study and others on animals/humans that confirm Na kills: Finland reduced cardiac mortality a lot ► "The probability for a 30-year-old man to die of cardiovascular disease has dropped from about 30% in 1970 to 7% in 2013, and for a 30-year-old woman... from 13% to about 2%" ► GH 2016;11(2):201-5 (see 2nd page of pdf, *cardiac mortality for Finland* fell 5 fold *as Na intake was forced to drop*). Would you want to lower cardiac mortality 6.5 fold if female by eating less salt? Mothers, stop poisoning your kids and trash that NaCl, replace it with KCl, if your kids are like 95% of kids, hypertensive for their age? The gnat IQ people say kids are not hypertensive, but that's a lie, for their age, they need lower values. Arterial plaque builds from fetal stage, and vast brain vascular damage begins as a kid. Only 1% of kids are hypotensive and need NaCl, the rest are fine with no salt or KCl, depending on activity level, sweating, etc. Finland lives longer than US, why doesn't the US lower Na too, replacing it with some KCl so many are ultra deficient in? Could all *nations* do the same? The US Institute of Medicine (IOM) established an adequate intake (AI) for Na of 1.2-1.5 g/day in adults, which most people exceed. IOM advice is bad for inactive folks who need 0.2-0.5 daily. IJERPH 2017;14(11):1364 shows that *centenarians* with a salt preference (who add salt and like salty things) were less *healthy* and able to function than those without a salt preference. "The lesser frequency of hypertension in centenarians certainly depends on genetic and constitutional factors, but also their style of life and alimentary habits (low Na intake, high K, Mg intake) could also be determinant." ► BMCS 2012;12(Suppl 1):S36. Bama centenarians ate 15% less sodium ► Ntr 2016;8(9):564. ☺☺☺

►► 12.4.35. CoQ10 (the protector of heart muscle and all muscles) ◄◄

Many brands contain 0-10% of label claim, so buy from reputable brands like some this book links to. CoQ10 is a crucial cofactor for mitochondrial enzyme complexes, enabling ATP synthesis, which is vital for heart and skeletal muscle contraction. CoQ10 scavenges free radicals

to protect mitochondrial, cell membranes from damage during strenuous exercise. Statins block HMGCR used to make CoQ10/cholesterol, so statins can damage muscles, weaken seniors, cause falls via weak leg muscles, or death via heart muscle failure. Please read the smoothie section for ideal way to take CoQ10 (with some fat). The cheapest CoQ10 may be 0.50/g Bulk Supplements (100% CoQ10, no fillers, no arsenic from rice flour, comes with scoop (= 200 mg), can transfer into a bottle (small one for daily use, big one for storage, for less air exposure), easy to use, better absorption than tablets). Microingredients brand CoQ10 is not pure, even if claiming to be so, due to its sweet taste indicative of added sugar. Likewise, many capsule CoQ10 is mixed with sugar due to its sweet taste. Many brands have toxic fillers (MgStearate, silicon dioxide, etc, rice powder has lectins and arsenic, due to rice not being cooked to remove anti-nutrients) or if any there, the label is suspicious saying "CoQ10 powder, 6% ubiquinone" (and aSquare company never replying to customer questions on whether the 'CoQ10 powder' is 100% CoQ10 or 6% CoQ10). NY police found most supplements at major Walmart, GNC, Target, Walgreens stores didn't contain the ingredients listed, especially if herbs or more exotic than vitamin A, B, C. This is the gift of decentralization that keeps on poisoning billions of people: instead of 1 truly amazing future century almost brand, we got 5000 so so brands, with only 50 of them good to pass basic immortalist criteria. Immortalists want true centralization. So, you could maybe test a brand first at a lab to see if it's 100% CoQ10, if you find anything in caps that claims to be cheaper than 0.5/gram. The manufacturing of these exposes CoQ10 to air when they cap the powder with other fillers, like rice flour or Mg stearate, so you may get the same air exposure as you opening bottle 100 times for 4 seconds each time to scoop some with the end of a spoon or the provided scoop. In the factory, the exposure to air may be even longer, air-light oxidation of CoQ10 even higher during capsule making. JIPMC 2009;64:225-32 found 254 nm UV (UVC that most plastics block) can degrade CoQ10 in 2 hours about 28%, meaning that if CoQ10 is stored in sunlight areas and manufacturer used the wrong plastic, CoQ10 could be lost, as each time a pill is moved, UV seeps thru pills under. CoQ10 levels decline with age, see graph at immortals..CoQ10. They noticed a 50% reduction in mortality in some studies for those taking CoQ10. As we age we fail to make the CoQ10 we had at 20 and this can tax the heart, liver and kidneys, the organs with the highest concentration of CoQ10. Those taking CoQ10 (followed for 10 years) had half the cardiac mortality of those who didn't ► PO 2015;10(12):e0141641.

CoQ10, wikipedia...CoQ10, chemically somewhat similar to vitamin K, is found in every cell of the body (in animals and bacteria too), primarily in the mitochondria. Richest dietary sources are legumes, soybeans, sesame seeds, soybean and canola oil, cauliflower, broccoli, peanuts, walnuts, avocados, almonds. CoQ10 is the only fat-soluble antioxidant generated endogenously and was first identified in 1957. In 1961 they found cancer patients had low CoQ10, so CoQ10 is used as adjuvant therapy for cancer ► cancer.gov...q10. Peter Mitchell research about how

CoQ10 helps cells to generate energy was awarded the Nobel Prize in Chemistry in 1978 "for his contribution to the understanding of biological energy transfer through the formulation of the chemiosmotic theory", which includes the vital protonmotive role of CoQ10 in energy transfer systems. Folkers got the ACS Priestly Medal in 1986, the National Medal of Science in 1990 for his work with CoQ10. CoQ10 taking patients with heart failure had 9% cardiac mortality (10% all-cause mortality), vs 16% for placebo (18% all cause for placebo) or 44% lower cardiac and all-cause mortality ► JACCHF 2014; 2(6):641-9. The HDL rose 25% (fell 1% for placebo), TC (total cholesterol) fell 21% (13% for placebo), LDL (bad cholesterol) fell 22% (placebo fell 22% too) after 200 mg CoQ10/day for 12 weeks ► IRCMJ 2014;16(10):e16433. CoQ10 Increases cholesterol efflux, inhibits atherosclerosis thru microRNA ► ATVB 2014;34(9):1795-7. Ubiquinol, vitamin E prevent LDL oxidation. Each LDL particle has 10 molecules of vitamin E and 1 molecule of ubiquinol. This is a reason why CoQ10 lowers cardiac mortality: prevents LDL oxidation, provides energy to heart cells ► PNAS 1992;89(21):10316-20.

BIOAVAILABILITY☺☺☺

Ubiquinol, or reduced ubiquinone (CoQ10 is ubiquitous so it's called ubiquinone, every cell has it and half the heart CoQ10 production is gone by age 45, that's why those taking supplements live longer and have much lower cardiac mortality), supplements are more bioavailable than CoQ10, so it's better to take that form of CoQ10 ► JAFC 2014;62(29):7174-82. After 300 mg ubiquinol daily for 14 days, the blood level of CoQ10 became 6.5 µg/mL and after 4 weeks it rose to 7.28 µg/mL ► RTP 2007;47(1):19-28. Another study found that at 2400 mg CoQ10, the blood level became 7.25 µg/mL in 4 weeks. ► EN 2004;188(2):491-4. From these 2 studies it would appear at 300 mg doses ubiquinol can be 8 times more bioavailable than normal ubiquinone form of CoQ10, while at 100 mg several studies showed 2-3 times higher rise in blood level of CoQ10 if ubiquinol is used, possibly because after a certain level of CoQ10 ingestion takes place, no further rapid rise is possible. CoQ10 in serum remained constant at doses above 2400 mg/day, which is something nobody takes (400 mg being highest in most supplements). Ubiquinone $C_{59}H_{90}O_4$ is the ketone, CoQ10 itself; ubiquinol $C_{59}H_{92}O_4$ is the alcohol with 2 extra hydrogens. Plasma CoQ10 increased from 0.9 to 2.5 µg/mL after 4 weeks of 200 mg/day ubiquinone and increased from 0.9 to 4.3 µg/mL after 4 weeks of 200 mg/day ubiquinol ► CPDD 2014;3(1):13-7.

FERTILITY

Mean sperm concentration, sperm progressive motility, % of sperm of normal morphology rose after 12-month CoQ(10) therapy by 114%, 105%, 79%, respectively ► IUN 2012;44(3):689-700.

EFFECTS ON NEURONS

Less Parkinson disability developed in subjects assigned to CoQ10 than in those assigned to

placebo, and the benefit was greatest in subjects receiving the highest dosage ► AN 2002;59 (10):1541-50. CoQ10 "is imposed in the inner mitochondrial membrane and is essential for Complex I and II electron transfer activities during oxidative phosphorylation...ATP production. CoQ10 … (intake raises) brain mitochondrial CoQ10... CoQ10..(has) neuroprotective effects in Alzheimer and Parkinson by attenuating mitochondrial dysfunction and nullifying oxidative damage. Mitochondria are the source of 80% or more of the reactive oxygen species generated in neurons." ► ADDR 2009;61(14):1316-23. "Many neurodegenerative disorders, diabetes, cancer, muscular and cardiovascular diseases have been associated with low CoQ10 levels as well as different ataxias and encephalomyopathies." ► MS 2014;5(3-4):187-97.☺☺☺

CoQ10 takes part in aerobic cellular respiration, which generates energy in the form of ATP. 95% of the human body's energy is generated this way, so the energy-intensive organs like heart, kidney have the most CoQ10. It's almost like a vitamin. CoQ10 "is an essential compound found naturally in virtually every cell in the human body. Because of its ubiquitous presence in nature and its quinone structure, CoQ10 is also known as ubiquinone. CoQ10 is a lipid-soluble substance whose primary role is as an essential intermediate of the electron transport system in the mitochondria. Adequate amounts of CoQ10 are necessary for cellular respiration and ATP production… CoQ10 also functions as an intercellular antioxidant, and its presence was then demonstrated in all cell membranes and in blood, both in high- and in low-density lipoproteins, where it is endued with antioxidant properties. CoQ10 was also recognized to have an effect on gene expression." CoQ10 also treated several neurological disorders ► MS 2014;5(3-4):187-97. The body requires 7 vitamins and several trace minerals to make CoQ10, in a 17 step process, so it's easy to see how as we age, the CoQ10 levels drop, as enzymes in each step are harder to make. CoQ10 and cholesterol biosynthesis share some enzymes and statins (that lower cholesterol by inhibiting an enzyme) block the synthesis of CoQ10, killing us.

►► 12.4.36. ALPHA-CAROTENE (α-carotene) $C_{40}H_{56}$ ◄◄

α-carotene (see pic) is an isomer of β-carotene (see pic) with 1 double bond shifted to the next carbon. Molar mass is 537. The more β-carotene females ate, the better the life of those with asthma ► JACI 2004,113(2):S303. The chiral (R) structure of α-carotene is here & carotenoids pic has all 6 common carotenoids. People with lowest serum α-carotene (< 0.05 μM) had 46% higher mortality than those with highest α-carotene (> 0.11 μM) ► NR 2011;31(3):178-89. You can see the fully adjusted 1.46 ratio in Table 3. This is not surprising, since α-carotene is a marker for β-carotene, since carrots contain a lot of β-carotene and any food with α has β. β-carotene was shown to increase collagen production 4.4 times ► Derm 2010;221:160-71 ► "Type I procollagen mRNA levels were significantly increased to 4.4 times" in the 30 mg β-carotene pill group, not the 90 mg (sky high, not feasible from diet). Collagen is the protein of

blood vessels, heart, etc, organ matrix, brain matrix etc, so it is absolutely essential to longevity, preventing the aging of skin, vessels, cornea, eyelids, face (wrinkles form due to *low collagen, elastin synthesis* via severe antioxidant deficiency: vitamin C and carotenoids). Cardiovascular mortality was 77% higher for those with least α-carotene. Thus, instead of eating bovine collagen that has heavy metals, mad cow disease, you can eat more lentils for protein, carrots, kale and high carotenoid foods that have vitamin C also. The study of 13,292 people found no association between cardiac mortality and serum β-cryptoxanthin, lycopene, lutein+zeaxanthin. Carrots have 3,477 µg α-carotene in 100 g, compared to *0 µg for papaya, turnip greens, zucchini, watermelon, cabbage, cauliflower, kale, kiwi, lettuce, beets, apples, plums, blueberries, blackberries, strawberries, spinach and most other* things *vegans* or omnivores eat (which usually have β-carotene). The carrots section explains that BJN 2011;106(10):1562-9 found carrots led to the most reduction in cardiac mortality, among all veggies/fruits; it may be partially due to having the highest *amount of α-carotene among raw fruits/veggies*. The top common sources of α-carotene (all sources listed here at USDA, they rounded numbers recently, but below is the earlier data before they rounded to keep the public ignorant) got the µg/100 g (raw, unless stated):

1. can pumpkin 4796 raw 4020 boiled 2720 2. boiled carrot 3776 raw 3477 steamed ?3600?

3. baked butternut squash 1130 raw 834 steamed ?980? 4. boiled hubbard squash 529 raw 0

5. tomato 101, baked sweet potato 47, broccoli 25, red bell pepper 20, orange 11, grape 1.

α-carotene inhibited the proliferation of the human brain cancer cells 10 times better than β-carotene. ► JNCI 1989;81(21):1649-52. That's why Gerson cancer therapy uses 25 lb bag of carrots to make juices, as carrot juice has 4340, more than even boiled carrot. NIH covers Gerson here. Reduced mortality for those with higher serum α-carotene was seen in a study of 15318 people, AIM 2011;171(6):507-15: those with α-carotene > 9 µg/dL (0.17 µM, 90/537=0.17) got 39% less mortality than those with α-carotene < 1 µg/dL (0.019 µM). Lung cancer mortality was 3 times lower for those with highest serum α-carotene & 5 times lower for those with highest β-carotene ► CS 2003;94(1):57-63. For smokers, high β-carotene can cause issues. ☺☺☺

►► 12.4.37. BETA-CRYPTOXANTHIN (β-cryptoxanthin) ◄◄

β-cryptoxanthin (see pic) $C_{40}H_{56}O$ is β-carotene (see pic) $C_{40}H_{56}$ with an OH group, or hydroxy-β-carotene. The chiral (R) structure of β-cryptoxanthin is here & carotenoids pic has all 6 carotenoids. People with lowest serum β-cryptoxanthin had 52% higher mortality than those with highest β-cryptoxanthin ► IJE 2001;30(1):136-43. With the exception of raw pumpkin and butternut winter squash (easy to add raw to smoothies), which have far more cryptoxanthin than papaya, papaya is the richest common source of β-cryptoxanthin (109 times > green

pepper, 127 times > grapefruit, 7 times > oranges, 85 times > eggs, 10 times > watermelon, 55% > red bell pepper; most fruits-veggies lack any β-cryptoxanthin). Raw carrots have no β-cryptoxanthin in USDA list, but that is an error, since cooked carrot got 199, the instrument didn't detect it in raw due to the analytical method, but do steam it with pressure cooker to soften it and break cellular walls, as that makes bioavailability higher and possibly you absorb 200 or at least puree the carrot in a smoothie. USDA makes this error often for raw veggies, since they don't understand the compound is there, they got a poor analytical technique. You see this USDA error with other nutrients too, where the same food under different entries has 0 or high values. On a per calorie basis, papaya has 308 times more β-cryptoxanthin than the only non-vegan source, eggs. In 100 g USDA lists the following amounts of β-cryptoxanthin in µg:

1. raw butternut winter squash 3471 ☺☺☺ 2. baked butternut squash 3116

3. raw pumpkin 2145 (canned 0 if water drained) 4. boiled pumpkin if drinking the boiled water 1450 (boiled and drained is 0, you can eat it raw as a smoothie puree to get 2145)
5. raw persimmon 1450 dried 156 (avoid dried fruits, raw are healthier) 6. canned tangerine 775 7. papaya 761 8. red bell pepper 490 9. tangerine 407 10. cooked/raw(puree)/steamed carrot 199 11. pickles 271 12. kumquat 193 13. cooked corn 161 14. popcorn 160 15. canned carrot 144 16. yellow peach /nectarine 117 17. orange 116 18. apricot 104 19. watermelon 78 ☺☺☺

Those with the most serum β-cryptoxanthin got 27% less AMD, advanced macular degeneration. The highest lutein serum levels meant 41% less AMD (and 36% less for highest β-carotene compared to lowest β-carotene) ► JAMAO 2015;133(12):1415-24. β-cryptoxanthin was much lower in Alzheimer patients' blood ► ARN 2002;59(5):794-8. β-cryptoxanthin stimulates the repair of DNA oxidation damage in addition to acting as an antioxidant in human cells ► CNG 2009;30(2):308-14. β-cryptoxanthin is a free radical scavenging antioxidant that protects DNA, prevents the growth of lung/other cancers ► IJC 2006;119:2084-9.

►► 12.4.38. TAURINE (lowers HR/BP), Theanine & N-Acetyl-Cysteine ◄◄

12.4.38. is especially for 30-100 year old *vegans* who eat no *collagen* (meaning glycine, or Gly, 33% of collagen), 3 times less *cys*teine in vegan protein, no *taurine* (except a few seaweeds like red algae). To boost glutathione/collagen, *vegans* need to take 3-10 g Glycine and 600 mg N-acetyl cysteine or N-Ac-Cys or NAC (see how, avoid powder, as NAC becomes an inactive dimer after contact with oxygen and moisture from repeated openings of the bottle, keep bottle in the fridge and swallow cap, don't inhale by accident). Mice fed Gly + NAC lived 169 vs 121 weeks or 112 vs 80 years human equivalent (32 extra years), NAC benefits omnivores aged 30+ too, though doses for age 31 is lower than for 41. Gly + NAC help improve 50 biomarkers in older adults. GlyNAC benefits are noticed (read the tables) in ages 45-80 only, diabetics are helped

too. Vegans benefit more if low in Cys. After GlyNAC, mice brains glutathione level doubled, cognition doubled, inflammation halved, etc, as the mice brain graphs show. We don't need GlyNAC, since body has to split it into Gly and NAC, taking Gly + NAC is 5x cheaper. Each person has a certain amount of NAC absorption ability, if you eat 2 pills (1200 mg), some NAC won't absorb and enter the colon where bacteria use it to produce rotten egg smell gas H_2S. So take only 1 cap, 600 mg, if you notice a sudden change in gas frequency and smell, from odorless CO_2 (healthy vegan) to H_2S. If sulfur bacteria produce too much gas after you switched to 1 pill, simply eat vinegar with every meal (puree the lentils with the smoothie maker and add vinegar, etc) for 1-2 days to neutralize the overgrowth or do an enema so the gas becomes odorless again, as it should be for healthy vegans. Some use theanine amino acid found in tea, because it improves sleep, reduces brain glutamate & oxidative stress, lowers anxiety, improves cognition, Bulk Sup sells it 1c/200 mg, cheapest price online, (whole family pack, can take 400 mg max) with 0 additives. Theanine starts to decompose into glutamic acid and ethylamine, then pyrazines, changing its taste from umami to more roasted peanut butter, an indication that item was sold via amazon (super hot transport), not Walmart. L-theanine (γ-glutamylethylamide) prevents neuron death by blocking excess glutamate binding at AMPA/kainate receptors (theanine is a safe competitive antagonist of glutamate receptors), improves mobility, promotes neurogenesis and neuron repair by boosting BDNF and Slc38a1 expression (see Slc38a1 papers & wiki), quiets neuroinflammation by lower inflammatory cytokine/iNOS expression, boosts astrocyte GSH (GSH=Glu-Cys-Gly) to extend their life, improves attention, slows brain aging. S-acetyl-glutathione is the bioavailable glutathione (subscribe, get 20% off first time, then cancel subscription each time to get 20% off), though it's much more expensive than taking as Gly + NAC + Glu. Some add glutamine, Glu, since it's one of the amino acids Glu-Cys-Gly making up glutathione, GSH, the master antioxidant, when feeling tired, sleeping too much, needing extra help with headaches or brain fog. Glutamine activates mTOR and can cause insomnia or acne if taken in doses of 2-10g, so only use it seldom, 1-2 g, unless you want high heart rate, insomnia, fast metabolism and faster aging.

Taurine, $HO\text{-}S(=O)_2\text{-}CH_2\text{-}CH_2\text{-}NH_2$, is cheap to supplement, 1kg pure no fillers/16$ (16$ via coupon for subscribe, cancel subscribe later, resubscribe when time to order, lasts 2 yrs at 340mg/day for family of 4), prevents atrial fibrillation, but its levels don't decline with age. Our body can only process 1 g at a time, so to avoid kidney damage, kidney flushing minerals and taurine due to excess, limit it to 1 g/meal, and max 3 times/day. Peak "plasma taurine ... was measured at 1.5 ± 0.6 hr after administration as 86.1 ± 19.0 mg/L. Plasma elimination half-life... 1.0 ± 0.3 hr" ► JAA 2010:346237. Taurine "uptake is mediated by the taurine transporter (TauT, encoded by SLC6A6 gene, Solute Ligand Carrier, family 6 (Na & Cl dependent neurotransmitter transporters), subfamily A, member 6 (taurine), needs NaCl for uptake)... β-alanine and the cyclic P4S inhibitors

also mimic taurine, occupying the same substrate-binding site" ► NC 2026;17(1):4257, hence we can't take "exercise powders" that mix alanine with taurine, as taurine uptake is blocked. Rice flour got toxins and arsenic. As we age, blood taurine levels can decrease 5 fold in some, though other studies found it stays mostly constant in omnivores. Kindly avoid energy drinks as those contain 1-2g, can cause high pulse or death when taurine is mixed with caffeine (see death from energy drinks) and the bare minimum needed is 100 mg daily, a portion of the 1 g capsule taken at night, to stimulate GABA receptors to help you fall asleep. Taurine is absent from *vegan* diets, but made internally: it lowers blood pressure by 1-4, pulse by 4 bpm, *prevents* neuropathy, *liver disease, diabetes,* vision *loss* (retinopathy), heart *failure* (80% mortality reduction in a study with rabbits). A nonessential amino acid (not used to create proteins), taurine is β-alanine H_2N-CH_2CH_2-C=O-OH where the carboxylic COOH group is replaced by a sulfonic SO_3H group, making it a sulfonic acid H_2N-CH_2CH_2-$S(=O)_2$-OH. That's why they both bind to the same transporter. Taurine is the most abundant intracellular sulfur-containing amino acid causing some to call it one of the essential body chemicals ► MV 2012 ;18:2673-86. High taurine concentrations are found in the *heart and retina*. Omnivores eat 9-372 mg (mean 58)/day, which for *vegans* (who get 0 taurine from diet usually) costs 1 cent/day for 0.2g. Others take 1g/day, due to a study showing mice live longer: "The median lifespan increase was 10 to 12%, and life expectancy at 28 months increased by 18 to 25%" ► Sci 2023;380 (6649):eabn9257. Pottenger showed cats without taurine die fast, as cats lack the human enzyme to convert cysteine to taurine.

A diet low in taurine prevents cancer, so taurine pills are useful only for vegans, since taurine binds to bile acids and produces toxic life shortening compounds: taurine contains sulfur and it leads to hydrogen sulfide formation, a rotten egg stool smell toxic compound that causes colon cancer. While some studies claim it's safe to eat 1-2 g daily, no such long term studies exist showing safety at 1 g, with the longest study being 4 months and a study in arginine amino acid safety led to dead people after 6 months, so don't try 1 g before making sure 100-400 mg is safe for you, as too much sulfur can cause colon cancer in some. Taurine may kill people with low blood pressure during sleep or cause fatal factory/traffic accidents via dizziness, fainting, loss of consciousness, seizure. Taurine is contraindicated for people with kidney disease or failure. Take taurine only if kidneys are healthy, otherwise it builds up, as kidneys can't eliminate it and causes dizziness, loss of balance (falls can be fatal), neurological issues. For healthy kidneys, taurine is protective. High taurine intake will block liver detox enzymes, so it needs to be avoided during fasting when we detox the body via autophagy as that overloads us with toxins. Low and medium taurine intake protect the liver by trapping free radicals (by direct action or indirectly via boosting GPx, SOD) produced during toxin oxidation in the liver. However, high intake, like 3g/kg/day (same as 243mg/kg in humans, 17 g/day for 154 lb) led to microbiome and bile acid dysregulation in mice, worsening alcohol caused liver disease ► eG;4(1):e100321.

3g/kg/day led to mice "hepatic inflammation, ... perivascular immune cell infiltration... upregulation of pro-inflammatory cytokines... mediators.. alterations in lipid and bile acid homeostasis were evident as early as 5 weeks, preceding the onset of histological steatosis" ► TL 2025;414:111778. Berberine acts opposite to taurine by potently blocking several key liver detox pathways, by binding to CYP3A4, CYP2D6, CYP2E1, CYP2C9, etc. While taurine gently optimizes detox paths, berberine directly binds to and disables them, which can lead to liver damage and sky high serum levels of certain medications or pills, causing death via hemorrhagic stroke due to blood thinners, organ damage via other medications, etc. We're not mice and 3 g/kg is huge, but don't try to take 5-10 g like some crazy people do; even 1 g may be bad.

While retina, liver, kidney, brain benefit, it could damage them if we take more than 0.3-1g daily long term, so read 20 papers before taking more than what our body took from food for eons. *Feel free to* avoid brands with silica, as the silica powder, if inhaled during handling, can damage lungs. The 3.2.10. section of PubChem says taurine has a shelf life of 3 years in solid form, based on some studies, such as EU one. Always start slow with any pill, ensure everything is fine, as far as heart, with taurine. Buy only what you can use within 2-3 years. Taurine is found in every tissue, being 0.1% of human body weight, 70 g in a 70kg human. We oxygenate cysteine HS-$CH_2CH(NH_2)COOH$ to HO-S(=O)-$CH_2CH(NH_2)COOH$, decarboxylate it (removes CO_2) to hypotaurine HO-S(=O)-$CH_2CH_2NH_2$, then oxygenate hypotaurine to taurine HO-$S(=O)_2$-$CH_2CH_2NH_2$, as shown at taurine.pdf.☺ Since energy drinks are opaque cans, taurine there is very stable, almost 100% after 2 years. Taurine affects electrolyte balance, so if cramps, tingling happen, watch this clip on Na, K, Ca, Mg balance. ☺☺

► HEART FUNCTION BENEFITS

Congestive heart failure (CHF) patients improved upon taking taurine, while placebo takers did not or worsened ► CC 1985;8(5):276-82. CHF is linked to metabolic (not dietary) malnutrition, including taurine deficiency ► COCMC 2000;3(6):417-24. Taurine deficiency causes premature aging, cardiomyopathy in mice, a phenomenon mediated in part by telomere shortening, elevations in mitochondrial ROS generation, mitochondrial DNA damage and inflammation; it's not clear if true for humans ► AEMB 2015;803:555-70. Taurine transporter knockout (TauTKO) mice die prematurely, an effect attributed to premature aging. A taurine deficiency also causes severe pathology, including *cardiomyopathy* that can be fatal. Taurine cut mortality by 80% (vs controls) in rabbits with heart failure: 9 rabbits were treated with 100 mg/kg/day taurine after producing aortic regurgitation. Cumulative mortality at 8 weeks in the control group was 52% compared with 11% in the taurine group ($p < 0.05$) ► RCCPP 1984;45(2):261-70. "Myocardial *taurine* content is species dependent, with levels varying from ~*1.8* µg/g wet wt in the frog (37 beats/min) to ~*39.4* µg/g wet wt in the mouse (600 b/m)... a correlation exists between taurine

levels and heart rate, with the highest *taurine* levels found in species with the highest *heart rates*" ► JBS 2010. The more workload the heart has, the more taurine it needs. Ntr 2020; 12 (9) :2847 found taurine pills "in rabbits fed an atherogenic diet reduced... *hyperhomocysteinemia (high homocysteine)*, and reduced atherosclerosis present in the left main coronary artery". Homocysteine is high when B6, 9, 12 are low. Before taking > 0.2 g daily, check risks in this clip.

► EYE FUNCTION BENEFITS

Retinal pathologies including diminished ERGs and morphologic changes have been reported for animals and people deficient in taurine. Taurine is very present in the eyes and retinal optimal function depends on it (cats go *blind* without taurine and their hearts enlarge since they can't make it and need it from diet, that's why all *vegan* cat food has taurine added) ► BRBRR 1991; 16(2):151-69. Taurine levels in rat brains and blood is 10 times higher than in humans, so the decrease of taurine in aging rats is more life altering than humans, so the taurine pills leading to rats living equivalent of 7 years longer in humans may not work in humans.

► BRAIN FUNCTION BENEFITS

Taurine prevented cognitive decline in mice ► AA 2013;45(4):735-50, rats ► RB 2016;10:179-90. Taurine binds to β-amyloid and recovers cognitive decline ► AEMB 2017;975:233-41. Taurine induces proliferation of neural stem cells, synapse development in the developing mouse brain ► PO 2012;7(8):e42935. Taurine prevents diabetes, deafness, tinnitus, seizures, obesity. Taurine "significantly enhanced memory performance, suppressed anxiety and depression-like behavior, increased mitochondrial biogenesis/dynamics and improved mitochondrial indices (in mice given 0.25, 0.5, 1% taurine in water for 6 months)" ► BCPT 2025;136(1):e14101 ☺☺☺.

► VEGANS VERSUS OMNIVORES

Vegans got 22% less taurine in plasma and 71% less taurine in urine than omnivores in one study, since body retains taurine more when it's absent in the diet. Taurine is made from cysteine and methionine inside the body. Since in omnivores taurine deficiency can rarely develop, so can in *vegan*. Since it is so cheap, there is no risk in taking 0.2 g, especially if susceptible to heart weakness, or if doing heavy physical exertion at work. If anything, taking it might bring more awareness of how dependent on enzymes converting cysteine to taurine ► AJCN 1988;47(4):660-3. A 48 people study found plasma taurine was 76 µmol/L in *vegans*, 88 in omnivores, urine taurine 253 µmol/L in *vegans*, 636 in omnivores, breastmilk taurine 277 µmol/L in *vegans*, 427 in omnivores ► BJN 1986;56(1):17-27. Plasma/urine levels of a nutrient are not always indicative of tissue levels, as plasma level is tightly regulated; maybe that's why vegans got less heart disease, live longer ***(taurine benefits vegans more, even if only 300 mg)***.

►► 12.4.39. FIBER ◄◄ (lentil = 26x the fiber in rice, soak & eat lentils)

Eternal Foods customize the µg and type of each of the 50-9000+ types of fiber, carbs, proteins, peptides, polyphenols, vitamins, minerals, fats one ingests for max lifespan. For example, inulin can be healthy at 10g/day, but liver damaging at 30g/day, while arabinoxylan can lower LDL by 20mg/dL vs 0 for inulin. Xylan is a polymer of xylose $C_5H_{10}O_5$ simple sugar, glucan of glucose, fructan of fructose, hence arabinoxylan is a xylan with one arabinose $C_5H_{10}O_5$, (a sugar) and one polyphenol bound to an OH of arabinose. Arabinoxylan is 30-50% of corn bran, the richest food source, and since corn has no gluten, corn bran is the best source. The CVS fiber brands, Walmart are full of toxic sweeteners, food colors, heavy metals from psyllium husk (plant traps metals), etc. A 908,135 person review found eating more fiber meant mortality was 23% lower than those eating less ► AJE 2014;180(6):565-73. Eating more fiber meant 36% lower mortality ► AJE 1999; 150(3):1073-80. 97% of Americans are deficient in fiber. Vegans eat 45g/day vs 15g omnivores ► JAND 2013;113(12):1610-9. I eat 120g fiber/day. "Mortality risk was 43% lower among those consuming ≥ 25 g" fiber/day ► JN 2003;133(4):1180-5. ☺☺☺ 29.4 g fiber/day eaters had 22% lower mortality vs 12.6g ► AIM 2011;171(12):1061-8. Fiber eaters have soft stolls coming out fast, with no diverticulitis. Modified Citrus Pectin helps T cells fight cancer, by making it impossible for cancer cells to attach to healthy tissue galactin-3 using the cancer cell galactin-3 cloak they build on the outside to evade immune cells and sneak between healthy cells undetected so they can start to feed on healthy cells via nanobridges that steal nutrients to grow. To reduce defecation time to 8 seconds, like in low fat vegans, you need 100 g fiber a day or at least 60, and use a squat position, so the colon forms a 130° angle, not 90° as when sitting on toilet. Bend forward slightly if you don't want to squat while sitting on a toilet to get that 130°, as when the angle is 90°, the hard feces can scar the colon lining, form polyps and later on form *colon cancer* from that inflamed colon wall, cancer that kills you. Inulin (12% of garlic, 42% of chicory root, a fructose polymer or fructan that causes us to have gas when eating garlic) is a very useful fiber that produces SCFAs that feed the good bacteria, boosts glutathione, so garlic may heal leaky gut, colon cancer, gut dysbiosis and even acne stemming from leaky gut, GI tract issues or slow moving stool: "garlic extract inhibits cell proliferation and induces cell cycle arrest and apoptosis of (colon) cancer cells in vitro" ► Medic 2020;99(1):e18575. Inulin (from garlic, etc or Amazon) needs to be eaten raw, avoid cooking, otherwise, most benefits vanish. Garlic is half the price of chicory, provides superior plaque reduction, broader anticlotting (lethal clots), antiinflammatory, antihypertensive effects, though chicory root may lower LDL/ApoB more; raw chicory is very bitter, so many shun it. Garlic has more benefits than inulin powder/chicory root.

C. elegans worms (a 1 mm long worm with no heart, no circulatory system) a gene change in intestines helped them live 60% longer, while same gene change in muscles had no effect, as they have no heart muscles to benefit from such a mutation. Mice fed poop from centenarians

lived longer. The fiber we eat changes our microbiome and our microbes can help us, like worms, live 60% longer. Rye, wheat (often called durum, emmer, spelt, farina, farro, graham, kamut, einkorn on food labels), barley, triticale (wheat-rye hybrid), bulgur (processed wheat made more deadly by dry heat) contain deadly gluten, so avoid these unless you want a shorter/sicker lifespan. Grains fiber seems more related to mortality, possibly because this is the main source of fiber, so adding a little fruit fiber on top of the bread fiber everyone gets won't make much difference; Fig 1 shows kodo millet (no gluten) got *147 times more polyphenols and* 10 times more fiber *than white rice* (lentils got 20 times more.), 18 times more polyphenols and 3.1 times more fiber than wheat ► JFST 2014;51(6):1021-40). Wild rice (it's a very brown rice Zizania grass native to North America, but not the black rice Oryza sativa native to Asia) is the only grain with a healthy ω3:6 ratio 1:1.26, it contains 300mg ω3/377mg ω6 in 100g. All other grains have ratios of 1:10, 1:50, or in between, being useless for ω3, except white rice which has a ratio of 1:5, wholly inferior to wild rice. Wild rice though costs a fortune, 6$/lb at least, vs 1.5$ for lentils, plus little protein. Cooked lentils got 7.9 g fiber/100g vs 1.8 g for wild rice and 0.3 g for white rice. Lentil ω3:6 is 1:3.7, better than any grain, except wild rice. Lentils have glycemic index 26, vs 90 potato/rice, 55 millet, 60 sorghum, 45 quinoa, 50 buckwheat/oats, so lentils keep diabetes, HDL in range: high glycemic index mean lower particle size for LDL/HDL, which means more endothelial damage, plaque as LDL enters the artery walls and forms plaque. We get *26 times more fiber* in lentils than white rice. Rice eaters are constipated and sick, white rice is the highway to short lifespan in a world of super low fiber. Sorghum got 16 times more fiber than rice, is gluten free, 8 times more polyphenols than wheat (though 40 times less than blueberries for white sorghum, the one you can buy), so those who eat cereals daily may want sorghum which has about the same protein as wheat (i.e. 2 times more than rice), but the ω3:6 ratio is 1:14, bad. For fiber & diabetes, lentils and beans are better than grains. Soybeans have too much protein, ω6 fat and total fat to eat in large amounts, ω6 which damages heart via hs-CRP rising with higher ω6:3 ratio. Thus, lentils, with easiest digestion among legumes, win. Millet causes far less blood sugar spike vs rice/sorghum, but ω3:6 is 1:17. You can use pressure cooker, *cook a batch for a week;* I never eat cereals due to little protein/cal of low score for most cereals (vegans need more protein), too few antioxidants, except "quinoa, millet, 4x more expensive than lentils, super hard to cook, digest and soak and still way inferior to lentils nutrition wise".

Fiber is key to preventing diabetes, cancer, plaque, leaky gut, leaky blood-brain barrier. In 100 calories of raw food (c. = cooked, legume/grain = cooked) we find these g of fiber: c. turnip green 17.2, c. mustard green 13.3, mustard green 12.7, raspberry 12.5, blackberry 12.3, cilantro 12.2, c. collard green 10.8, asparagus/c. spinach 10.4, cabbage 10.1, cauliflower, turnip green/radish 10, spinach 9.6, c. broccoli 9.4, zucchini/c. asparagus 9, cactus pear 8.8, green leaf lettuce 8.7, c. carrot 8.6, green bell pepper 8.5, broccoli & chia seed 7.7, c. French bean 7.3, c. Brussels

sprout/c. kale 7.2, c. split pea 7.1, zucchini/tomato/carrot 6.9, lentil/red cabbage 6.8, red bell pepper 6.7, beet 6.6, strawberry & c. pinto bean 6.3, portabella mushroom 5.9, kidney bean 5.8, pear 5.3, orange/flaxseed 5.1, kiwi 4.9, apple/c. beet/chickpea 4.6, white mushroom/papaya 4.5, blueberry 4.3, avocado 4.2, kale 4.0, grapefruit 3.8, c. sweet potato 3.7, soybean 3.5, cucumber 3.3, plum 3.0, banana/buckwheat 2.9, pineapple/whole wheat bread 2.8, rolled oat instant oatmeal/some veggie/soyburgers 2.7, corn 2.6, quinoa 2.3, crimini mushroom/c. potato 2.2, sesame seed 2.1, French fries (bad) 2.0, sunflower seed 1.5, grape, firm tofu, watermelon 1.3, walnut 1, white rice 0.3, cheese, fish, milk/meat 0. US *Africans (& other groups) get over* 60 times more colorectal cancer than Native Africans: they eat much less fiber, way more meat ► JN 2007;137(1S):175S-82. Bama centenarians get 70% more fiber than avg ► Ntr 2016;8(9):564.

► ► **12.4.40. ASTAXANTHIN $C_{40}H_{52}O_4$** (900 Chinese (posing as local) brands listing 24 mg got 0-0.3 mg, they practice Confucian Ethics of 36 Stratagems & fake pills, a list of fakes below)◄ ◄

Astaxanthin (see pic) $C_{40}H_{52}O_4$ is β-carotene (see pic) $C_{40}H_{56}$ with an extra -OH and =O on each of the hexadiene rings, so 3,3'-dihydroxy-β,β-carotene-4,4'-dione. You can also call it the dione of zeaxanthin (lutein isomer). All 7 carotenoids are very similar, sensitive to light (store in opaque, not white) bottle, etc, as this pic shows, astaxanthin is biketone of zeaxanthin or zeaxanthin-4,4'-dione. Light stability: astaxanthin > lutein/zeaxanthin> lycopene > carotenes. Zeaxanthin is the isomer of lutein. CIMB 2024; 46(8):9215-33 says astaxanthin has "6000 times the AOX (ORAC) capacity of vitamin C, 800 times that of CoQ10, and 550 times that of vitamin E", which means astaxanthin may be 5.5 to 55 times more powerful than lycopene, since other papers say lycopene is 10-100 times stronger antioxidant than vitamin E. It begins to rapidly degrade at 140°F, so most astaxanthin from amazon that arrived from China via the ocean in hot containers probably has 0-30%, as many weeks at 150°F for hours daily means nothing is left as tests below show. Order astaxanthin from Walmart, it has cooler shipping, unlike 150°F amazon trucks. As pic shows, Lycopene is twice as good as β-carotene at trapping single oxygen radicals, due to fact there are no rings to block the free flow of electrons that gives the lycopene a much wider electronic cloud to absorb, accept easily a free electron. Likewise, α-carotene interrupts this alternating double bond even more than β-carotene on one ring, due to 2 saturated bonds between the last double bond and the other double bonds, so α will be less effective than β, but α kills cancer cells 10x better than β in some studies. Each antioxidant works in different ways, not just free radicals, that enable cancer or sick cells to proliferate. For preventing oxidation of LDL, high CRP, etc, astaxanthin is better, but the best thing is a combo, meaning eating all 7: kale (or greens with lutein/zea), carrots (carotenes, cryptoxanthin), and lycopene + astaxanthin pill that saves $ (avoid capsanthin as inactive ingredient, as it can cause eye crystals) vs taking 2 pills separately. Taken alone, astaxanthin is 28.4$/2.88g (allegedly, have not tested this brand to see if contians 100% of claim or only 20%), sunflower oil, caps, 24h ship or China sourced 75$/5.65g

powder by Texan, though powder 35% pricier than the much harder to produce pills, due to "Texan love of USA".☺☺☺ Hard to handle powder without oxidizing it. They all come from China, so June--October is a bad time to get it as it ships to your or over ocean to amazon in the summer heat (3 month journey from China to USA) heats up the oil, which, if PUFAs, will be oxidized, cause atherosclerosis. The caps with highly unstable flax oil (FO) are allegedly 21$ for 3.6g, the cheapest on Amazon. Rats fed FO + astaxanthin showed 50% reductions in LDL, 25% fall in TC, TG and 3 fold drop in IL-6 and CRP oxidative stress markers, versus the control (animal lard promoted by Health Secretary Kennedy), the graphs are mind blowing, the more you replace saturated animal fat with FO the better it gets ► LHD 2014;13:63. If too expensive, get the 4x cheaper lycopene from tomatoes or pills, or eat kale, which has 10-40 mg lutein, depending on kale subspecies, per 100 g. Kale lutein/zeaxanthin are free of cyanobacteria mycotoxins. PFHN 2011;66(4):363-9 Table 2 reports 20mg/day for 12 weeks astaxanthin offered minor H/LDL changes in obese subjects vs placebo, so in healthier people the difference will be smaller:

pla: HDL +3.2%, TC +2.2 %, TG +5 %, LDL -4.4 %, ApoB -0.4 %, SOD +2.4 %, MDA -8.3 %, ISP -10 %
ast: HDL +6.7%, TC -4.8 %, TG +0.3 %, LDL -10.4 %, ApoB -7.5 %, SOD +30 %, MDA -33 %, ISP -59 %

MDA or $(CH_2)(CH=O)_2$ is a marker of oxidative stress, ISP are isoprostanes (the "gold standard" of measuring oxidative stress and lipid peroxidation in blood or urine, all data was blood in this paper), better than MDA. SOD is a marker of antioxidant defense capacity. TAC (Total Antioxidant Capacity) was +35% in ast vs +4% in pla. In every way, astaxanthin, just like lycopene, lutein, α-carotene, β-cryptoxanthin, help improve biomarkers. The other carotenoids are cheaper. The benefits of astaxanthin are complimentary to those offered by the 6 other carotenoids. The 7 formulas show lycopenes/carotenes are purely nonpolar hydrocarbons that work better as radical scavengers for body/cell areas that welcome highly nonpolar compounds only. Lutein and zeaxanthin isomer are carotenes with 2 OH groups each, while cryptoxanthin is carotene with 1 OH group. So, polarity is: astaxanthin (2 OH, 2 C=O) > lutein/zea (2 OH) > cryptoxanthin (1 OH) > carotenes/lycopene (no O). Astaxanthin is the strongest antioxidant because it has a large nonpolar part and a large polar part, being hydrophilic and lipophilic at the same time, meaning via hydrogen bonds it will stick to the cell membrane and protect the phospholipid bilayer of cell membranes against lipid peroxidation, from oxidative stress much better than the other main 6 food carotenoids. The lipid bilayer has 2 phosphate (PO_4) heads and 2 sets of "tails" (fatty acid aliphatic part) facing each other, a lipid being $(HO)_2P(=O)$-O-CH_2-CH(-O-C(=O)-R_1)-CH_2-O-C(=O)-R_2. $R_{1,2}$ are the aliphatic chain of fatty acids, that give the 2 tails. One of the OH groups on P can be OR, where R is serine, choline, ethanolamine, as in phosphatidyl choline, etc or H as in phosphatidic acid. The magenta backbone is basically glycerol, and all phospholipids are diglycerides (see pic), not triglycerides we always hear about. This image shows the hydrophobic area is about 3-4 nm, the distance between the 2 astaxanthin OH groups

is 4 nm. The 2 astaxanthin polar rings link to the phosphate heads, acting as an antioxidant active from one head to the other. At each end of astaxanthin 2 hydrogen bonds form that increase its stability: O-H...O=P and C=O...H-O-P. Astaxanthin not only can cross the blood brain barrier, but also settle itself into this neuron bilayer and protect neurons much better than lutein, zeaxanthin, etc. That's why kids with low lutein/zea intake have lower IQ, during fetus and early life stages, because even without C=O, lutein/zea have the 2 OH, zea being astaxanthin without the extra stability and quenching given by the 2 extra C=O. This double set of hydrogen bonds vs lutein's single set, etc makes it stick there in the neurons and all membranes better and the 2 extra double bonds provide a bigger electronic cloud to absorb a free radical electron, being 13 double bonds, not 11 in lutein. Lycopene and carotenes have no polar groups so they can't stick to the polar heads of lipid bilayers of all cell membranes. For this reason it protects all cell membranes better. While melatonin is a powerful antioxidant in mitochondria, it doesn't have the perfect tail shape of astaxanthin to protect the membrane. While melatonin is possibly the most powerful antioxidant, it doesn't fit everywhere, so we need a variety of antioxidants, not just melatonin, anthocyanidins, lycopene. Lutein, zeaxanthin, cryptoxanthin are intermediate polarity free radical scavengers that work in different areas better, where astaxanthin won't fit as well in that enzymatic or protein folding area, due to it's extra two double C=O groups. Thus, it's a good idea to get some astaxanthin too, to make up for what the other 6 can't do, to get all 7, by daily carrot/kale intake. Astaxanthin is much more powerful at preventing LDL oxidation as JAT 2000 7(4):216-22 shows in Fig 2, vs the other 6 carotenoids. Hydroxycarotenes are called xanthophylls from two words: "yellow" (xanthos) and "leaf" (phyllon), since most xanthines are yellow (or brown, like leaves). Other xanthophylls (xanthins) are lutein, β-cryptoxanthin. Xanthins are not xanthines, the derivatives of yellowish xanthine, like caffeine, theobromine. It's also found in many vegan algal oil DHA EPA pills, such as Igennus. Synthetic *vegan* pills of astaxanthin improve dry eyes ► FN 2022;8:796951. Fish derived astaxanthin may contain parasite eggs, viruses, but quality amazon brands say algae on the labels.☺☺☺ There are 3 types of astaxanthin: algal (pluvialis) that's esterified & 3S,3'S 100%, algal (phaffia yeast whose side effects may be toxic in many) that's free (no lipid ester) 3R,3'R 100%, petrochemical that's free and at best SS 25%, RR 25%, RS 50%, though some papers show SS can be 17%. In studies, esterified (natural Pluvialis) SS was healthier than free SS, 14-90x more potent than free phaffia/synthetic. 90% astaxanthin online shows no source, because it's phaffia or petrochemical enantiomer mix, that gives in FFHDJ 2019;9(6):430-45 far worse results. Thus, many advocate for buying the natural 3S,3'S pluvialis safest form (grown in a closed loop, no contamination from open air) with 70+ human clinical trials such as the first four:

The safe Pluvialis (verified mg) astaxanthin brands are from cheapest to priciest per actual mg: (US: Washington AstaReal & Florida Zanthin, China: Yunnan AstaZine, Iceland: Cal Gold AstaLif):

1.80c/mg 1). HTN 12mg/120 32.36$: EVO olive/sunflower, lecithin, E, AstaZine actual 15 mg
1.81c/mg 2). NatureWise 12mg/60 13.01$: organic V coconut oil, AstaReal actual 12 mg
2.08c/mg 3). California Gold 12mg/120 29.99$: safflower oil, 0 lecithin, AstaLif actual 12 mg
2.46c/mg 4). Double Wood 12mg/60 20.65$: extra virgin olive oil, AstaReal actual 14 mg
3.49c/mg 5). NOW 10mg/60 20.92$: air, olive/sunflower, rosemary, Zanthin actual 10 mg
(actual 13 mg for NOW Foods 6.41c/mg 12 mg AstaReal not on amazon, Zanthin is 3.49c/mg)
4.13c/mg 6). Nutrex 12mg/90 44.62$: air, high oleic safflower oil, E, BioAstin actual 12 mg

The last two, 5). & 6). use open air, so they always test for microcystin contamination from blue algae, while the closed loop only has the green algae pluvialis, being free of microcystin toxin. AstaLif is better, as AstaZine from China oxidizes during shipment of 3 months from China. AstaLif uses 150°F amazon trucks where is degrades. Coconut oil in NatureWise oxidizes far less than safflower oil and sunflower oil in AstaZine/AstaLif, so stick with the best product for US users, the Walmart NatureWise, US made AstaReal astaxanthin from Washington state. A soils degrade, their degradation products oxidize astaxanthin and you're left with LDL oxidation molecules and 0 astaxanthin. When NatureWise designed product they knew about amazon, FedEx hot trucks. AstaLif goes in ocean containers to US from Iceland, reaching 150°F at times, so stick with US AstaReal. Avoid amazon, unless you order vitamins for 1 year in January and live in cold states; otherwise, your stuff will be highly degraded by the impossibly hot amazon trucks.

The cheap synthetic (verified mg) astaxanthin brands are from cheapest to priciest per actual mg: (all are most likely China made via chemical synthesis, safety in humans not established)

1.04c/mg 1). Bulk Sup 10mg/180 caps 24.42$: sunflower oil, pur. H_2O, each cap actual 13 mg
1.39c/mg 2). Deal 12mg/120 caps 19.2$: carob stops sunflower oil oxidation actual 11 mg
1.55c/mg 3). Micro Ingredient 12mg/120 caps 28$: coconut MCT stable fat oil actual 15 mg
1.63c/mg 4). Nature Bell 12mg/120 ser 21.6$: dark bottle, MCT coconut oil actual 11 mg
1.75c/mg 5). Nutricost 12mg/120 caps 25.2$: white bottle, sunflower oil, junk actual ?? mg

Obviously, Nutricost junk is 1.75 vs NatureWise 1.81c/mg far higher quality astaxanthin, or 2.08 Cal Gold from NATO Iceland to get higher quality and no allergy from sunflower lecithin in HTN. Avoid the bag ones from China (same price as Bulk) as those are shipped over 3 months from China, oxidizing the oil, while these 5 US brands are shipped as powder which is far more stable, and then made into pills in USA from Chinese powder. If buying from Walmart the same, the prices are higher (no subscribe discount), but stuck ship temp lower, so less oil/asta oxidation. Prices above reflect deepest amazon discounts, given first subscribe (cancel it to get 5+$ off again), etc. Order from amazon only in winter if living in cold states, when trucks don't get hot. Given the 5-20% off the label in many Deal Suppl brand pills, as shown in the video about fake brands having only 0.3-3 mg (not 12) actual, true for many ultra cheap China seller ones and at

NOW and Consumer Labs, it would be wise to not buy astaxanthin from Deal, even if they came at 11 out of 12 mg in ONE test and may be even 9-10 in your bottle. Divide the subscribe (+ 1st subscribe discount) price in cents by actual mg & 120/180 caps to get: (2,442/13*180=1.04) Bulk 1.04c/mg, Deal 1.45c/mg (avoid, low mg and unstable sunflower oil), Micro 1.55c/mg (white transparent bag, allows light to oxidize astaxanthin/oil), Nature Bell 1.63c/mg (safest, black bottle & MCT (medium chain triglycerides) means the least oxidation of astaxanthin and oil, Nutricost 1.75c/mg. Micro may have 15 mg not 11 mg as real in tests, but that may be because they add more astaxanthin knowing that some oxidizes in their bag and the batch they tested was the freshest one; these tests are not always reliable, and oxidized astaxanthin can have its own negative effects by binding to sites (like fake algae B_{12} prevents absorption of real B_{12}) and offering no protection. Micro never answers any question, so go with Bulk, probably same China wholesaler provided the powder. Nutricost is 68% more expensive than Bulk, but probably same quality, Nutricost has become a scam company, charging double what Bulk charges for many items. Even if Micro has more real asta, it may also have more oxidized asta than the black bottle bands like Nature, so more research is needed, but black is safer as bottle color for vitamins). Sunflower oil allergy affects some. MCT/coconut degrade 10x less than all oils via light, bag oxygen, heat, etc, due to having no double bonds, being pure saturated fat. Micro also sells 60 caps with 24 mg if you want less oil, as saturated fat can raise LDL. Oxidized sunflower oil can form plaque, though astaxanthin will generally prevent oil going rancid fast. Blood astaxanthin half life is 16-50 hrs, peak level is 10 hours, so 2 a day can keep blood level more even, as you don't need the high 24 mg peak, though fat rancid fat is not ideal. Always keep all vitamins in a cool, dark place, the fridge, as oils go rancid at room light/ temp. Select whatever science suggests maximizes lifespan, based on all pills/food you take. Some limit it to 12 mg long term, since lutein pills can cause macula issues and astaxanthin is the isomer of lutein with 2 extra ketone groups, so it could in theory accumulate in the macula. There is no long-term study showing the safety of 24 mg/day for the macula. Bioavailability is 10-50%, depending on how much fat is in the meal (more fat = more absorbed). Horbaach doesn't check for microcystin, they said. Micro also has 6 mg/240 caps if you want 6 only. Amazon sold 20K Micro/month, 2K Nature Bell, 1K Bulk (best deal), 700 Deal, 10K Double Wood, 600 NatureWise, 300 HTN, Nutrex 5K (2.5x the price, less safe than HTN), 1K NOW 5K Nutricost (same sunflower as Bulk, 70% higher price, because American math skills are # 50 worldwide). Each Micro pill weighs about 0.48g, the gelatin cap is 0.18g, so 0.3 g of MCT oil. Micro is a cheap trash company, like 99.9% in USA small business zero IQ/ethics parasite companies, who ships its vitamins in semi transparent bag/ bottle, instead of opaque that protects nutrients. Read the opacity section on how to store vitamins, create new containers to avoid 0 mg astaxanthin later.

Astaxanthin protects the brain against dementia, *the eyes* against AMD and glaucoma (the two

leading causes of blindness) ► GACEO 2012;250(2):239-45. Lycopene pills can help dry eyes too, by fighting oxidative stress, lycopene pills often come with astaxanthin. Lutein can accumulate in the macula, and is best taken as food only, but astaxanthin doesn't crystallize as lutein does. Canthaxanthin also can form crystals. Plants have 600 carotenoids, but fish have one too, astaxanthin (from the algae they eat), which is present in "non-fish" 'algal oil pills' (make sure ω3 pills say they're 100% vegan) and fish oil could in theory, if a poor processing lab, carry eye damaging parasite eggs. "Capsanthin… (in peppers raises) tear break-up time (TBUT)" ► J Food Bio 2022;46(10): e14352. 1% of astaxanthin is made from algae, (4% dry weight in the richest algae, H. pluvialis), while 99% is made from chemical synthesis (cheaper). Astaxanthin (which can cause hives or difficult breathing in those allergic to it) eye benefits are explained in references 1 & 2, MD 2020;18(5):239, OMCL 2017:1956104, EER 2020;197:108113, CO 2016;10: 813-20, CER 2016;41(11):1465-72, rev opto. Male mice given astaxanthin lived 12% longer (females didn't) at "target… of Asta in the diet was 4000 ppm, but actual... (was) 46% of that (0.18% of diet or 1800 ppm in water)" ► Geros 2024;46(1):795-816, maybe via the SOD enabling ant queens to live 10x longer. The NIH Interventions Testing Program that tests antiaging pills on mice to see if any works since 2002, found that most "famous" such supplements don't work and they use 3 US labs (Texas, Michigan Uni, Maine) to test with the same compounds 3 sets of genetically heterogeneous UM-HET3 mice: the main page says "only 15 chemicals extend lifespan in mice, 11 prescription drugs and 4 over the counter ones being glycine, astaxanthin, aspirin (found in many plant foods as salicylic derivatives) and epicatechin (a flavonoid)". This main page was not updated by 4-13-26 yet, even though their Geros 2026 study says astaxanthin (at a lower 900 ppm concentration) and meclizine don't work to extend lifespan. 1800 ppm means 0.0018x3000=54 grams in a human diet, since most people eat 3 kg food/water daily, some raw vegans even 12 lb (me sometimes back in 2018). Thus, we see that at 54 g/day human equivalent, mice live 12% longer, but at 27 g/day equivalent 0%. News agencies make headlines, but forget to mention the human equivalent dose. However, most people take 3-12 mg daily, which is 1000s of times less, so we won't live longer, but get better antioxidant status, brain function, quality of life, maybe live 1 year longer (in a few people only) if astaxanthin prevented clot formation via preventing LDL oxidation (plaque formation) that would have killed us in old age. So, continue to take it even at 6 mg daily, it will help save lives in many with pathetic diets. You know, at age 70, you can do 3-5 times more daily physical or intellectual work if your brain functions well, or you can be a "vegetable" that still can eat food. What's the point of living to 130 if between 70 and 130 all you do is eat and sleep?

ITP is a strange organization, since they concluded that mice taking 3.6 mg/kg fisetin didn't live longer and then 1000s of "experts" made videos that they quit taking fisetin, forgetting at 20 mg/kg, mice do live longer. Vit D3, Mg have zero effect at low doses and work wonders at 5x

higher doses, these puerile videos base don 1 study, instead of 100 studies read, just show how naive MDs can be to trust ITP as the universal standard for research, they have not even read carefully the doses. AKG, resveratrol were found to not increase lifespan by ITP. ITP studies show flavonoids, glycine, carotenoids are probably helpful. Thus, it looks like many pills will help improve the quality of life of mice and people by delaying age related morbidity, dementia, atherosclerosis, etc, but not extend their lives dramatically, just indirectly, by postponing when heart attacks kill you, at 105 or 91. The NIH makes a huge mistake, they waste public funds, because to see longevity effects you need to change the genes during development of the embryo into fetus until birth, most genes that turn a bee into a 50x longer lived mutant happen during "fetal stage", so that's what they need to do: you feed mice fetuses thru mother a unique diet and see how long offspring lives, that's how you make mice live 5-80 times longer, not these 2nd century methods of aspirin at "age 40 equivalent". These ITP projects are ridiculous studies no longevity experts would take seriously, you will only get 10 years max for humans, not 4000. The fundamental architecture of aging and lifespan is done in the first 3 months of human pregnancy, by then, most genetic programs are done. Carotenoids pass thru the blood-brain barrier, since they're nonpolar, fat soluble: eat with 2 g of fat to boost absorption. Astaxanthin *"is a stronger antioxidant compared to* β-carotene, vitamin E and vitamin C, respectively 54, 14 and 65 times". Encyclopedia of Microbiology, *3rd* Ed, 2009, says astaxanthin is "500 times" (Ctrl+F "500" here) better than vitamin E, *having advantages vs other carotenoids:* "more stable.., high antioxidant potential (10 times more than β-carotene and 500 times more than α-tocopherol [vitamin E]), easily cross the blood–brain barrier", prevents Alzheimer, AMD, stimulates immunity more than the other carotenoids, doesn't form macula crystals like 20 mg lutein do, boosts T-helper cell antibody production (COVID), as the link above explains. ☺☺☺

Most small Amazon supplement SELLERS are fake pill 36 stratagem or Confucian companies

Last section of astaxanthin: most Pharma ingredients used worldwide are made in China, hence China (followed by India, who takes Chinese APIs to produce drugs) provides most of the Amazon raw ingredients for pills as our gov of clowns subcontracts everything and produces nothing locally, due to waste and 33 million companies doing accounting and pretending, instead of producing all chemicals in the USA. You'll notice a trend of the "amazing contribution" of some illegal (hence 3 million got deported, many Amazon brands vanished) or legal Jewish and local green card or citizen/illegal Chinese, Asian, Black, Latino (possibly these Florida bandits selling stuff in clear bottles, so all oil decomposes in light to poison USA), claiming 10 mg but only 0.7 actual, see clear bottle, Florida wake up? etc who subcontract some US company *(often a front for the Chinese military, some Chinese owned, 90% Chinese employees, pill making company, anyone can make pills at home for 300$, buy a machine and do it, and pretend it's some fancy lab)* to package a raw product a friend or exporter ships from China, to claim "Made

in USA" and use all Caucasian pics, names on site and no physical address, no phone, fooling 99% of visitors they're some white Harvard Graduates with 3 PhDs from California, 20 quality control people, gigantic facility (fake pics of nonexistent companies in third countries they allegedly source it from to justify a higher price) in house testing, amazing certificates of analysis (all fake), who tested it 500 times and is legit, high quality, worth 10 times its actual value) and frauds selling astaxanthin, and everything under the sun. The conmen often put some Utah address, to make it sound they're all honest 'Christian' Mormons who shot dead 120 innocent people, but they're pure frauds and gangsters. A Utah brand has 4 mg actual, claims 12 mg: Research Labs 12 mg quil (1* review claims it's 30, not 60 caps/bottle), 12 mg regular. This is Sun Tzu ethics in action. Hybrid War of extermination of USA, due to a gov of fools importing any pill and food from China. Among the many Chinese etc sellers which ones might be providing a real product, with no anaphylactic shock causing microcystin? I don't know, but a video explains most brands have 10-100 times less astaxanthin than the label claims. Not to worry, obviously they sell the pills in bags so cheap, they can't be opaque to protect oils and astaxanthin from oxidation, same issues with millions of US 1 person companies selling Amazon crap (order a custom label, resell, produce nothing, waste life). This is the issue with capitalism, instead of 1 amazing product company with 1 million PhDs, 15 million employees, we get 1 million 1 peasant companies producing pure junk, see why we need 11 companies? Microalgal toxins can cause "paralysis, liver damage, cancer, and even death by employing several molecular mechanisms such as sodium channel blocking, protein phosphatase inhibition, cellular membrane disruption" ► FN 2025;12:1603843. The fake astaxanthin stuff is also common with magnesium pills: video. NOW Foods has a list of nutrients, brands that provide 0-10% of label claim, the fraud is huge, especially for astaxanthin, berberine, bromelain, etc.

The only company (out of 20 emailed) that provided a semblance to some "microcystin data" for astaxanthin (not the spirulina or blue algae) was Naturalis (20$ for 1.44g, 120 caps, 12 mg, after subscribe discount) showing an image of 3 lines, saying non detect for the cyanobacteria microcystin (Detection Limits: Microcystin-LR (MC-LR) .3 ppm; MC-RR .3 ppm; MC-YR < .17 ppm), naturalisusa.com. Name sounds hard to believe: New Zealand Astaxanthin by Naturalis Inc, Folsom, California, 1750 Prairie City Rd Suite 130 666, to make it sound more legit, he uses New Zealand. Address is a mail company on google street view, he got a PO Box there, Chinese Tim Pan, President of Naturalis since 2019, with degree in aeronautics, selling Chinese stuff, as no info exists on their "USA cGMP facility", computer geek sending .png executable file to show nondetect, to try install software maybe and spy on people's PC. Tim claimed via Amazon that "The active raw material, astaxanthin, is from AstaMAZ (a fake site with address of a laundromat, random images, etc, using violent melody in their product videos and Prince as suggested next youtube to watch, when you call number you get Puafo Limited, not AstaMaz) in

New Zealand (Whois shows registrant is Alibaba, Beijing, so it's a Chinese business using New Zealand name or fake site to sell China products sold as New Zealand ones?). The raw material is imported from New Zealand, the laundromat. It's then encapsulated (made into softgel form) and bottled in our UL cGMP certified, FDA registered facility at 13653 Central Ave. Chino, CA 91710." This is GMP Nutrition Enterprises Inc per google, though the COA (Certificate of Analysis) shows BSL as lab doing testing, a ridiculous lab site looking like designed by a 3 year old, and email with another site under construction. Tim claims Naturalis is the GMP manufacturer itself (no middleman for markup), using a PO Box in Folsom, 9 hour drive away. Cancel subscribe after receipt, resubscribe when ready to order to get the 40% discount, test it 3 times, 3 bottles, and let us know if it's free from microcystin, and still potent. Don't buy if you got allergy to even tiny amounts of sunflower oil (1 in 900 people): comes in black bottle, unlike others that allow light in (bad idea). This seems like a pure scam, hence the discount, may be less in each pill. Naturalis London for example is run by some Arab frauds and the Italy fake site claims they have offices in 30 nations. The cheapest astaxanthin online is Neviss with grape seed oil and ashwaganda, from a California seller, Shirley Truong of nevisshealth.com AI incomplete site (Chinese gal, with Viet name as 10% of Vietnam are Chinese, selling Chinese astaxanthin?), 3.6g/30$, 150 caps of 24 mg, but it has only 0.3 mg, all their Amazon items are in clear bottles, allowing oxidation and harms to consumer, showing how critical it is to do some research, get certificates of analysis, Neviss, like others on Amazon, has no clue what they're doing (or trying to poison Americans via hybrid warfare, with gummies that have sugar and no vitamins), the vitamins, ingredients they sell are all light degraded, maybe zero left of some. This is 36 stratagems. Neviss shows how foolish is to buy on impulse, without digging on google about the company, contacting them for Certificate of Analysis, and seeing if it's some Chinese grandma or spy selling Chinese pills to help China poison people on their "killing list". Neviss address at one time was an apartment owned by Ann Chan, per google. Google each company on Amazon or buy from reputable ones, otherwise, who knows what you're getting, poison? BioAstin is astaxanthin from a 40 year old 98 acre Hawaiian farm (the only verified US company), microcystin is < 0.5 ppm only for spirulina, no data for astaxanthin, grown near spirulina in open ponds, though the company claims "astaxanthin and spirulina products undergo periodic microcystin testing as a precaution... no meaningful levels have been detected in… astaxanthin due to the nature of the algae species and the production environment. For this reason, microcystin testing is done periodically… (not) with every batch."

Then you got Florida Pure type of pills, 20$ for 1.44g astaxanthin plus 3g lycopene (saves 10$ on extra lycopene pill), Pure (fake pic of customer team?) gave COA, but had no microcystin data, just mold, heavy metals data, though their website puts Miami Court house 66 W Flagler Street, Suite 900, #10703 as their address, which is shown on yelp 2.3 stars as a co-working space on some sites (coworking spaces are places where 500 fake businesses can register an address, used

by all fraud companies) and "Boundless Ec Us Llc" above address, which is some company importing from Vietnam, so it's another scam company, most people never check the addresses of these businesses and the records on company name, etc. Google says Pure is actually in 1887 Whitney Mesa Dr #3482, Henderson, Nevada and they sell polyphenol containing gummies, etc in clear bottles that degrade active ingredients, same address has a 1 star yelp company CCP (Chinese Communist Party) Concierge Compounding Pharma. Chinese Conmen Party. Zillow has it as a condo. Most Amazon sellers are "gnat IQ", they can't even make opaque bottles. May be a Chinese duo posing as 5 Caucasian customer care team, importing from Vietnam Chinese company to bypass tariffs, all Chinese often offer 40-50% discount on first subscribe. Beware buying from companies without a real website/lab, factory video, youtube channel. You might get low quality, degraded or poison. The Amazon videos can be stolen or produced via AI using white look alikes. They know nobody almost looks at these addresses, but just in case someone digs in, it's clear it's fraud. Chinese guys (most ingredients come from China today) use Caucasian pics, videos, names and vague sites that appear US, local, etc, to get more customers, it's part of the "culture", fraud is rampant in China, watch this.

Trace minerals: 12.4.41. Manganese $_{25}Mn^{55}$ 12.4.42. Molybdenum $_{42}Mo^{96}$ 12.4.43. Copper $_{29}Cu^{64}$
12.4.44. Chromium $_{24}Cr^{52}$ 12.4.45. Vanadium $_{23}V^{51}$ 12.4.46. Silicon $_{14}Si^{28}$
12.4.47. Lithium $_{3}Li^{7}$ 12.4.48. Boron $_{5}B^{11}$

These metals are healthy in small mg or µg amounts and specific ionic forms, while being very toxic in high amounts. B_{12} mass is 1355, it contains cobalt. Adult B_{12} RDA is 2.4 µg, so 0.000104 mg of cobalt. B_{12} is so essential, the question arises, what if there is a trace mineral, that helps us live to 120, and yet we don't know it, as for eons we had no idea we need *0.0001 mg cobalt (vs 18 mg iron for* vegan *males or* omnivore *pregnant moms, or 180,000 times less)*? The first 4 trace elements below are ultra studied, have pages on NIH website, while others (Si, V, etc), less common, seem to have beneficial effects. We die without Mn and Mo, the first 2, so for FDA or Immortality *Nurturing* Agency to approve *world's first complete food*, the 1st eterni food (nothing else needed to be eaten for 100 years, except water), chemists need to know Mn, Mo: ☺☺☺

►► 12.4.41. MANGANESE $_{25}Mn^{55}$ ◄◄

Best is pure, like Bulk Sup, without extra ingredients if you think soils have none or low and you're deficient based on hair, nail, serum, RBC, etc tests. You can also use a zero fillers/colors multivitamin (e.g. Micro Ingredients) for men or women that has 2 mg Mn, since some absorb little Mn due to grain/legume phytates. Mn prevents baldness and hair greying via MnSOD. The AIs (insufficient data for RDAs) in mg are: 0-6 mo 0.003, 7-12 mo 0.6, 1-3 yrs 1.2, 4-8 1.5, 9-13 guy 1.9 girl 1.6, 14-18 guy 2.2 girl 1.6, 19+ men 2.3 women 1.8, pregnant 2, lactating 2.6. The ULs in mg are: 0-12 mo no pills, 1-3 yrs 2, 4-8 3, 9-13 6, 14-18 9, 19+ 11. No toxicity was seen in high

manganese intakes from food per NIH manganese page, (they claim this is so since an ultra short 8 week study in healthy women eating between 0.8 mg and 20 mg had no effect, but what about 8 years?), but for welders/miners (chronic inhaling of Mn dust) or drinkers of high Mn water, toxicity is real. I get 5-9 mg/day from food alone like many people do too (see below). 9 mg is based on "all varieties" average, but there are so many varieties that USDA has entries for, iron (Ca, Zn, Mg also) decreases Mn absorption; some varieties contain 5 times more Mn than iron, others 2 times more iron than Mn, highest iron is 10 times the lowest iron, highest Mn is 7 times the lowest Mn. If you eat pineapple (highest Mn source) with lentils (highest source of iron for *vegans*, plus tons of C to increase iron uptake, lower Mn uptake), it lowers Mn absorption; plus the Ca, Mg, Zn in pineapple lower Mn uptake, as explained in this iron paragraph: polyphenols and phytic acid in nuts, legumes (soaking only removes 70-90%), grains lower Mn, Ca, Fe, Zn, Cu, etc absorption by 2-5 times in some cases (low vitamin C for iron), so then one can see how vegan AI/UL is probably higher, since it's absorbed Mn that matters, just like NIH states for vegans iron RDA is higher. Multivitamins got 1-4 mg. It's better to not take Mn rich multivitamins or any Mn pills if already eating 7-10 mg daily. *Check label. Many eat a lot of Zn^{2+}, Ca^{2+}, Fe^{2+}, polyphenols which diminish Mn^{2+} absorption.* The body eliminates more than 90% Mn thru feces, and absorption decreases as intake increases, like with Cu. The *vegans* who eat many legumes and purple/indigo veggies/fruits get *3-10 times higher polyphenol intake of normal omnivores* for which these male AI 2.3 (UL 11) were established. Likewise, issue becomes even more complex, if we think about absorption of Ca (5% from spinach, 41% from kale), silica (banana 2%, green beans 50%), etc. Nutrition tables list chemical content, not how much is absorbed, which changes even further (once the average absorption is known) with each meal: e.g. adding 15 g of fat can increase carotenoid absorption 15 fold. ☺☺☺

Fingernail Mn was 8.6 times higher (intake 13% lower) in vegan (or claiming to be vegan) centenarians versus normal aged, see vitamin A. Perhaps, their absorption was 9 times better? How could that be? Again, nutrition is complex, 0.1 million confounding factors at times. The cell/organ level of a nutrient is not reflected in the blood, hair, fingernail level always, so to discover how to live to 500 we need scanners (physics majors) that take pictures of every cell and calculate the exact nutrient, Mn level/deficiency in each tissue; most studies assume blood level is a good indicator, but it's not so always, so the conclusions are often wrong.☺☺☺ Very few people are deficient. Mn deficiency symptoms include menstruation issues, diabetes, white hair (losing pigment or hair occurs when too much oxidative stress exists, so naturally, when MnSOD (see next paragraph) is low, the hair folicle is starved of energy as mitochondria are screwed by radicals, so mitochondria can't produce enough energy, so hair loses it health and pigment. People who're iron deficient can absorb Mn more, so if they eat more foods with high Mn, they may absorb too much, leading to glucose metabolism issues or neurotoxicity. Men

absorb 1.3% vs women 3.6% of a 1 mg Mn meal ► ARN 2015;35:71-108; this 37 page paper has many charts/details about Mn biochemical pathways. Healthy brains got 50 µg/g Zn, 22 µg/g Cu, 1.3 µg/g Mn in some 14 brain regions they investigated, showing brain Mn is way lower than Zn or Cu ► BTER 2014;161(2):190-201.

Wny is *Manganese* essential? Mn is involved in free radical neutralization, reproduction, energy production, carbohydrate, amino acid, cholesterol metabolism, being a cofactor for glutamine synthetase, phosphoenolpyruvate decarboxylase, hydrolase, oxidoreductase, transferase, lyase, isomerase, ligase enzymes, including the 3 famous enzymes below:

1. Manganese Superoxide Dismutase (named MnSOD or SOD2): $2H^+ + 2O_2^- \rightarrow O_2 + H_2O_2$. We die without MnSOD: function discovered in 1968, turns superoxide O_2^- toxic free radicals (generated in mitochondria via respiration or the oxidative phosphorylation or electron transport chain) into less toxic O_2 + H_2O_2. Most of this section talks about this MnSOD enzyme. ☺☺☺

2. Arginase: arginine + H_2O → ornithine + urea, last step of urea cycle of turning toxic ammonia (NH_3) in the blood into urea $(NH_2)C=O$, which is excreted in urine in all ureotelic animals (mammals, some fish and amphibians), i.e. those that eliminate nitrogen as water soluble urea, not as the less toxic uric acid (uricotelic animals: birds, insects, lizards, snakes) or NH_3/NH_4^+ (ammonotelic animals: most marine animals). Ornithine becomes spermidine in each cell. ☺☺☺

3. Pyruvate Carboxylase (PC): pyruvate H-CH_2-C=O-COOH + HCO_3^-(OH-COO) + ATP → oxaloacetate HOOC-CH_2-C=O-COOH + ADP + PO_4^{3-}, it adds carboxyl (COOH) group to pyruvic acid, hence it is a carboxyl*ase*: H- replaced by HOOC-. PC was discovered in 1959. PC is a key mitochondria enzyme in bacteria, plants, animals; in humans it helps create glucose, lipids, neurotransmitters, insulin.

Too much Mn in water may cause autism, if EHP 2007;115(1):122-7 tiny study can be replicated on a vast scale; RASD 2015;18:73-82 found "among children who had the Ile/Ile genotype for GST pi 1 (GSTP1), those with BMC (blood Mn conc.) ≥ 12µg/L had about 4 times higher odds of ASD (autism) than those with BMC < 12µg/L". Autism studies are tricky, since autism is caused by 100s of contributors, so and it's hard to eliminate confounders, like birth stress, chemicals, cesarean or complication or mom listened to heavy metal music all day making kid restless and changed his music likes, so he was labeled autistic, when it was not Mn or genes, just hyper music making kid hyper, or chemicals at delivery, lack of affection due to hospital policies or mom being busy. Other studies found autistic kids have less Mn in teeth and more lead, since Pb^{2+} replaces Mn^{2+}. Thus, for infants, absorbed dietary Mn levels may be way more important to monitor, since Mn AIs in the first 6 months of brain doubling are far lower (0.003 vs 2mg) than adults. *Upper Limits for infants 0-12 months are not established, except "no Mn pills for infants".*

CuSOD (Superoxide Dismutase) may be how ant queens live 10x longer, just like MnSOD, CuSOD

help us live longer, like SOD boosting astaxanthin (+ 6 carotenoids) helps mice live 12% longer:

Low Mn for infants may irreversibly shrink lifespan and IQ, if SOD2 is low. SOD2 is MnSOD in mitochondria, SOD1 is CuZnSOD in cytoplasm, SOD3 is CuZnSOD in between cells. EG 2018; 108:92-8 found "the single most differentially expressed gene between 1-day-old queen (ant queens live 10 times longer, start with the same genes like bee queens/workers start too, gene expression only is different) and worker brains was an extra-cellular form of CuZn Superoxide Dismutase (SOD3), raising the possibility of an important role of anti-oxidant genes *in modulating* lifespan." Looking at ant queens, *vegan* centenarians (9x Mn in fingernails, previous page), it seems higher absorbed or eaten Mn extends life, at least in some diets. ☺☺☺ Superoxide O_2^- free radical would kill every cell, without MnSOD neutralizing it, so Mn is very important to longevity. *Mice without MnSOD DIE within 10 days of birth* ► NG 1995; 11(4):376-81. Pineapple is high in manganese, 0.9 mg/100g and vitamin C, no wonder those eating it win over flu easier.☺☺☺ MnSOD is cardioprotective during stress or intense exercise, because heart cells generate more energy, and mitochondria then generate more superoxide and without enough MnSOD, the heart muscle will die; this is important for athletes, they don't live to 110 ever, low Mn can contribute to the # 1 killer, heart disease. This is why in many studies strenuous exercise shortens lifespan, while walking extends it. If you eat a lot of lead, you drop dead, but if you eat it over 10 years, you live. Likewise, a lot of O_2^- in 10 hours produces vast damage, while the same total O_2^- in 10 days no damage.

This damage applies not just to heart cells, but any organ we overexercise, like eyes (no blinking, no computer breaks, intense starting at PC, etc, dry eyes that increase oxidative stress due to dirt accumulating and put more burden on the first line of defense, MnSOD when O_2^- is high) or any muscle, even the brain. People eat, heart beats faster to help digestion, then they don't meditate 5-10 minutes (like siesta is a good idea, short 10 min nap after a meal, especially for older people with heart issues), instead start exercising a lot, heart cells are stressed, some die and are never replaced, dying earlier. Cautious people live longer, in some studies, they don't go to extremes. Be gentle with self… In our world of pride, yelling, overwhelming show of force, bravado, threat, intimidation and showing off, moderation and gentleness are rare…, so is longevity as a result. Tao Te Ching "9. WITHOUT EXTREMES The cup is easier to hold, when not filled to overflowing." Take computer breaks, relax eyes, they also need to give mitochondria some rest… from O_2^-. Our brains are low on glucose, we get hungry and grab something to eat, finish in 5-10 minutes (fast food era); then, instead of relaxing/meditating with closed eyes 5-15 minutes, and allowing the brain and heart do their thing (brain controls stomach and every organ), instead of allowing brain mitochondria to produce energy after a meal, we stress the cells with exercise (OK to do it within 2-3 hours as it lowers triglycerides and glucose, just not RIGHT AFTER) or even cognitive stuff and guess what happens, too much O_2^- and faster aging of

brain and organs as a result, poorer decisions by the brain too. There are choices we can make, as a collective, that once made, enable all to live to 200 starting in 20 years, but they don't happen, we don't think deeply, since many are suffering from some sort of "rushing like madmen and never relaxing or meditating" cultural syndrome "if we don't do this now, the world ends", so we repeat the same patterns far more, as creative thinking goes to 0 when O_2^- *fries brain cells*, we don't think, we just act like robots as our highly "intelligent" educational systems program us to. The info on how to live to 200 is there for the taking, but *we can't find it*, as we're in the panic, fight and flight mode so much, this *shuts down* creative brain discovery inventiveness areas 90%. Everything first (our cars, gadgets, phones, computer, house, toilet, sink), except the most basic daily brain health maintenance: meditation. Just like eyes get red, dry, damaged by no computer breaks, brains get damaged by no relaxation. The brain is the master controller of all organ aging processes, so to live long we need our brains. This paragraph suggests that nutrition is often, less of a longevity factor than culture, tone, music, ethics. ☺☺☺

► ► 12.4.42. MOLYBDENUM $_{42}Mo^{96}$ ◄ ◄

The AIs and RDAs in µg are: 0-6 mo 2 (AI), 7-12 mo 3 (AI), 1-3 yrs 17, 4-8 22, 9-13 34, 14-18 43, 19+ 45, pregnant/lactating 50. The ULs are 0-12 mo no pills, 1-3 yrs 300, 4-8 600, 9-13 1100, 14-18 1700, 19+ 2000. The UL is derived from rat studies (causes infertility, birth defects), by extrapolation, as no human studies exist to show the best UL. USDA doesn't list Mo, so intake is harder to estimate. Beans, lentils, then cruciferous veggies are the richest sources, most men get 109 µg, women 76, plus 23 from vitamins, so deficiency is rare. *I & many vegans probably get more Mo than many, due to lentil, kale, cabbage intake daily*. Mo binds to molybdopterin ligands (SH can become SR for different enzymes) to create molybdenum cofactor for four enzymes: sulfite oxidase (SO_3^{2-} → SO_4^{2-}, yes we die without it, imagine.), xanthine oxidase, (R-H → R-OH or =CR-H → -CR=O), aldehyde oxidase (CH=O → COOH), mitochondrial amidoxime reducing component or mARC (amidoxime → amidine or R_1-C(=N-OH)-NR_2R_3 → R_1-C(=N-H)-NR_2R_3). The first 3 enzymes add 1 O being oxidases, while mARC removes 1 O, being a reductase. Adults absorb 40-100% of the Mo dietary intake. Almost nobody is deficient, except people with a genetic disorder that prevent synthesis of molybdopterin, which makes sulfite oxidase not work, so kids can die within 9 days of birth like this CSHMCS 2020;6(1):a004705. The average untreated kid survives 4 years only with autosomal recessive disorder MoCD Type A, treated kids may live to 10, so it's pretty traumatic for parents to know baby may not live to even 20. This shows how important is to test parental DNA for such disorder probabilities, as thousands of known such diseases exist, and probably 100,000 unknown to medicine.

► ► 12.4.43. COPPER $_{29}Cu^{64}$ (essential for blood, collagen, joints) ◄ ◄

"half of the adult population consumes less than the amount recommended in the" EU & UK ►

JTEMB 2011;25(4):204-12, so maybe that's why all 50+ have grey hair and joint issues. NIH says "no biomarkers that accurately and reliably assess copper status have been identified". Cooper glycinate is the most bioavailable form in pills, with CDC saying adult Cu uptake varies from 12 to 71%, with ladies absorbing more copper and thus getting less grey hair at 50, and preterm infants having lower copper than healthy full term ones. Cu uptake was 12% at 7.5 mg Cu/day, 55% at 0.8 mg/d, body adjusts how much it takes. Glycinate *(45% avg absorption, vs 12% for inorganic (oxide, sulfate, etc), 33% for* ultra cheap Bulk gluconate *(breaks down in stomach acid), which is bad as more in colon means wiping out good bacteria causing vascular dementia, brain disorders, stroke, infarct, plaque, colon cancer, IBS, colitis, never use inorganic)* brands include 15$/90×3mg Nutri (arsenic rich 0.22 g rice flour contains phytate that lowers Cu uptake), lentils got 10-25x less arsenic than rice, so 0.22g rice is like 4 g of lentils worth of arsenic, 7$/90×3mg NOW (stearic filler that blocks absorption slightly, tightly packed tablet with veggie powder/vit C can delay absorption by new hydrogen bonds forming), 13$/60×2mg Pure (#1 bestseller, 10K/month vs 1K for NOW) (Pure = safest brand for Cu, cellulose as filler), 9$/100×2 Solaray (rice arsenic, phytate issues), 19$/60×2mg Thorne (priciest, has more toxic microcrystalline cellulose, more free radicals generating due to processing, and mTOR activating leucine added as binder and stabilizer of glycinate) and the rest (Mg stearate that blocks absorption a lot more than stearic, like 4$/60×2mg Vitacost (black pepper deactivates liver detox enzymes, mg stearate). Mg stearate can wrap the particles of glycinate better, causing weaker absorption and more damage to the microbiome in colon, as 45% becomes 20% blood absorption. In a cap of 500 mg, you can get 2-3 mg Mg^{2+}, which is a competitive inhibitor for 2-3 mg Cu^{2+} absorption, so best is to take Cu separately from Zn, Mn, Mg or Mg stearate pills. Cu-glycinate is a strong stable chelation bond, unlike the ionic weak Mg-stearate bond, so Mg may be the first to be absorbed in the stomach and upper intestine, diminishing Cu absorption, because they both are absorbed to some degree in the stomach and the upper intestine. Chimps are too busy with alcohol, sports, 33 million companies and waste to design real studies on copper, mineral, etc bioavailability in the presence of Mg stearate, so google gives answer that "Mg stearate is safe because a company using it as filler said so in the first AI hit by google". Don't trust google AI or ChatGPT answer for everything, they just read whatever article on a topic they find. They give wrong answers to many science questions. Excess Zn raises production of metallothionein that traps Cu in intestinal cells, blocking Cu absorption, causing anemia (low RBC count, as we need Cu to make RBC), leukopenia (low leukocytes (a name for WBC, leuko=white in Greek, cytes=cell like cytosol), poor ability to fight infections, low WBC), neutropenia (neutrophil deficiency, penia is Greek for deficiency, neutrophils make up 50+% of WBCs) ► Gastroenterology 1988;94:508-12, excess Zn can take months/years to remove and only Cu injections of 10 mg sometimes reversed Zn caused Cu deficiency, after 2 months of failed oral pills. This low Cu status can lead to even low HDL. A Zn saturated body has 30-40x more Zn than Cu, vs 20x average (2g/0.1g). That's why

all say “high Zn suppresses immunity”. Limit Zn from pills to 20 mg/day☺☺☺ if you don’t take 1-2 mg Cu via multivitamin. The body adjusts its Cu uptake from 12 to 71% depending on its needs, but oysters got 182 mg Zn/100g (RDA 8 for women), & even at 60 mg Zn intake, Cu deficiency emerges in some cases: we see how eating some foods can create Cu deficiency and why we need eterni foods to measure exactly what we eat and never have to worry about calculating exactly, especially since for many animals, and plants especially, there is a range, meaning some watermelons have 300 times more citrulline than others, etc, nobody has the $ to test each fruit, plus soils deplete. High vit C & Fe dramatically lower Cu uptake, so take Fe only if deficient.

Eye doctors formulated AREDS with 80 mg Zn, 2 mg Cu as CuO, which damages the microbiome as it is absorbed way less than other forms of Cu, like even CuSO4, destroying all organs to “cure the eye”, welcome to Reality: when eye doctors make formulations and zero training in nutrition, as 15 year educated NDs, with higher IQ than MDs, longer training, education than MD, would need to have to approve any formulation any loonie creates today because they have an MD. Today, the gastroenterologist and optometrist can screw each other’s work on a patient, no central communication and role for ND, nutrition doctor, etc. Skin, nail, joint issues can be due to low Cu, because some take too much Mg, Zn: thus, we need avoid Zn^{2+}, Mn^{2+}, Fe^{2+}, Ca^{2+}, etc pills with Cu^{2+}. “combined administration of AA and Cu^{2+} resulted in systemic oxidative stress and renal cell injury” ► Biom 2023;13(1):143, so NOW Foods may damage kidneys by AA + Cu in 2022 product (before paper), in the hope of boosting collagen and uptake of Cu to cells by low AA. NOW Foods adds AA maybe due to a 1991 study saying AA is “known to antagonize the intestinal absorption of copper… both positive and negative regulatory functions for ascorbate in copper metabolism” ► AJCN 1991;54(6):1193-7S. Avoid taking 500+mg vit C/day or 80+ zinc, as it can cause Cu deficiency if no Cu is taken via multivitamin or shiitake mushrooms (5.2 mg Cu/100g). More details on Cu vs vit C are here and via google search, ChatGPT, etc. ☺☺☺

The normal Cu blood range is 70-140 µg/dL. Lack of Cu causes grey hair since copper dependent enzyme tyrosinase helps make the two melanin variants of hair pigments (brown, red/blonde), and CuSOD fights hair follicle free radicals. RDAs in mg are: 0-12 mo 0.2 (AI), 1-3 yrs 0.34, 4-8 0.44, 9-13 0.7, 14-18 0.89, 19+ 0.9, pregnant 1, lactating 1.3. The ULs (food+pill) are 0-12 mo no pills, 1-3 yrs 1, 4-8 3, 9-13 5, 14-18 8, 19+ 10. For foods high in copper, see last column mg Cu/100g food. I got 4.3 mg/day (July-Sept 2020 average) from food alone. NIH explains Cu absorption is 75% when we eat 0.4 mg/day and 12% when we eat 7.5 mg, like with many nutrients, the body tries to take in only what it needs. Many *vegans eat 10x polyphenols and/or 3x phytic acid, so the absorbed amount is lower, hence the personalized RDA/UL for minerals may be higher, like NIH says vegans need 180% RDA for* iron. 100 g of veal liver has 12 mg, wild mollusks 7.6 mg, shiitake mushroom 5.2, canned mollusk 4.5, so don’t eat these *daily, high Cu damages liver/digestive tract,* especially since mollusks got high selenium. Cu^{2+} competes with

Fe^{2+}, Zn^{2+}, Ca^{2+} so eye vitamins with 80 mg Zn also have 2 mg Cu to prevent Cu deficiency which leads to frequent infections, grey hair, neuropathy (neurons lose myelin causing fatigue, numbness/tingling in hands, feet), organ damage due to low CuSOD. Cu is part of key cuproenzymes involved in iron metabolism, wound healing, preventing lipid oxidation (less plaque), neurotransmitter/collagen synthesis (joints, skin), energy production, fighting oxidative stress (like MnSOD or SOD2 above, thru copper SuperOxide Dismutase CuSOD or SOD1 that neutralizes SuperOxide O_2^-), immunity, neurohormone homeostasis, neuropeptide activation, angiogenesis (birth of new blood vessels, key for new neurons, wound healing), brain growth. Low Cu causes reduced cytochrome c oxidase activity (mitochondria, brain neuron energy), impaired myelination, cognitive decline, and increased amyloid-β accumulation. Too much Cu is prooxidant, like Fe is. Like MnSOD, CuSOD is very protective during sudden mental/physical stress. Mice without CuSOD had a shorter life, like mice without MnSOD died within 10 days, so make sure Cu is not <10% of zinc intake. PO 2015;10(6):e0126339 found blood CuSOD increases 60+% (see Fig 2) due to mercury fillings, as the body tries to fight oxidative stress caused by mercury, aluminum. Cu is a cofactor for lysyl oxidase that catalyzes the cross-linking of collagen, elastin fibers by lysine/hydroxylysine oxidation, which provides structural integrity, strength, elasticity to joints, bones, skin. Cu was used to kill mold, microbes, fungi for 4000 years. $CuSO_4$ was used by organic agriculture for 150 years to kill fungi, in homes to kill mold, so never take inorganic as a pill, since it kills the microbiome good bacteria, as most is not absorbed.

►► 12.4.44. CHROMIUM $_{24}Cr^{52}$ ◄◄

The 1989 RDAs were ranges of 10-60 for 0-12 mo, 20-80 for 1-3 yrs, 30-120 4-6 yrs, ***50-200 µg for ages 7+***. In 2001 they updated them to AIs (not enough data for RDA) in µg: 0-6 mo 0.2 (AI), 7-12 mo 5.5 (AI), 1-3 yrs 11, 4-8 15 9-13 boy 25 girl 21, 14-18 boy 35 girl 24, 19-50 men 35 women 25, 51+ men 30 women 20, pregnant 30 lactating 45. The ULs don't exist, since no adverse effects were seen, but those with liver or kidney issues, are advised by NIH to not take 300+ µg chromium pills, since the 30-200 µg in multivitamins is hypothesized to be enough for the most chromium deficient diets. Food intake is hard to determine, as USDA doesn't list chromium (search pubmed for common foods to calculate averages from 10 papers for each food). Cr^{3+} is beneficial in ***lowering blood glucose and eliminating diabetes symptoms***☺☺☺ in many people not using IV. Cr^{6+} however is toxic and is regulated by EPA in drinking water, since when we drink water we don't eat antioxidants to convert 6+ to 3+. A 798 page NIH book explains more about Cr and other nutrients; the web version of Cr chapter says most plant food Cr is actually Cr^{3+} and even if we eat some Cr^{6+}, the antioxidants in our stomach will convert it to the more stable Cr^{3+} quickly, even 5000 µg toxic 6+ was converted fast to healthy 3+ with 1 liter of orange juice. Most people eat only 10-100 µg Cr per most studies, so the amount of Cr^{6+} in food would be tiny (not 5000) and immediately oxidized by a *vegan* diet rich in fruits and veggies. So, don't be scared

about papers about some Cr^{6+} in foods. I may eat *300* µg Cr^{3+} daily from my 750 g lentils, based on legume data: J FCA 2011;24(8):1147-52 shows in Table 3 that legumes have the most Cr of any food, this may explain why some studies found most centenarians eat legumes, soy (Asia) or beans, lentils elsewhere. Supercentenarians have superior glucose control, maybe mom ate more Cr^{3+} while pregnant? BTER 1992;32:105-7 found cow milk had half (0.83 µg/L) the Cr^{3+} of human milk (1.56) and the milk section explains infants fed cow milk have much higher diabetes incidence. 22 years later, EFSAJ 2014;12(10):3845 reported some human milk can have chromium at 10.8 µg/L (13 times more than cow milk), raising questions about diabetes incidence in kids whose moms got low chromium status during pregnancy and lactation (some mom milk was 0.14 only.). Low Cr in pregnancy led to mice offspring glucose intolerance ► PO 2017;12(1): e0169889.☺☺☺ Cr doesn't have exactly known biochemical functions (for now, same was true for many now essential minerals in 1920s), unlike Zn (part of 300+ enzymes and 1,000+ transcription factors), Mo (part of 4 enzymes) or Mn (part of SOD2, arginase, etc). While we die without Zn, Mo, Mn, since enzymes don't work, without Cr we may survive for decades; parenteral patients *(3 main routes: IV (intravenous), IM (intramuscular), SC (subcutaneous); mnemonics,* parent-era*, the era of eating from mom via umbilical cord, not mouth)* had their diabetes symptoms (weight loss, neuropathy, etc) disappear in 1977 once Cr^{3+} was added, since then Cr^{3+} is always added to parenteral nutrition and vitamin brands started adding Cr^{3+} too. "150 µg of chromium per day reversed the glucose intolerance, reduced insulin requirements, and resulted in weight gain and the disappearance of encephalopathy." ► JAMA 1979;241(5): 496-8. "Plasma chromium level was 0.1 µg/dl (lab reference interval: 1.8-3.8 µg/dl). Fourteen days of supplemental intravenous $CrCl_3$ (200 µg/day) allowed complete withdrawal of exogenous insulin with no further hyperglycemia or glycosuria." ► DDS 1986;31(6):661-4.

We absorb only 0.4-2.5% of the ingested Cr, less if diet is rich in simple sugars, more if high vitamin C *or* B_3. Stress, infections, pregnancy, intense exercise can deplete body Cr. As seen from above, the current AI may be insufficient for some to reach age 900. JCPH 2014;39(3):292-306 found that Cr pill raised HDL by 4.64 mg/dl on average, while some got it 8.5 mg/dl higher; they found adding biotin to the pill didn't raise HDL; Cr picolinate (in most multivitamins) dropped TG by up to 38.7 mg/dl. Triglycerides, TC also fell in most studies (high glucose raises TG), such as MNFR 2018;62(1):1-41 which saw a drop of up to 18.4 mg/dl. If you struggle with low HDL or high TG/TC, you may want to use a multivitamin with Cr (Micro Ingredients has no extra fillers and some LDL lowering herbs, the cheap way to get Cu, Mn, Cr, etc you missed vs 3+ bottles, though they contain selenocitrate which is not ideal, as it could damage kidneys if more than the body can use, RDA 55, they add 200) or a Cr pill free of Mg stearate that may diminish uptake, though rice flour has arsenic and phytates, so a men or women multivitamin is better, as long as you don't exceed B_6 or B_9 limits if taking B complex. The only issue with multivitamins is the 100

mg vitamin C blocks proper Cu absorption and may damage kidneys. Because Cr is transported through the blood by the Fe-transport protein transferrin, high levels of Fe (iron) can compete for these binding sites, leading to decreased Cr uptake, so perhaps, take the pill with a small meal (legume free, as legumes are Fe rich). The largest Cr pill TG, HDL, TC changes are seen in those with diabetes or insulin resistance, not in healthy people. The main brands of Cr with only 1 filler (rice flour) are, after subscribe, NOW 200 µg/240 caps 10$ and Bulk 200 µg/365 caps 14$.

►► 12.4.45. VANADIUM $_{23}V^{51}$ ◄◄

We eat about 20 µg from foods daily, most being eliminated (some forms of ☺☺☺ V are very toxic, this paragraph refers to the forms that extend lifespan). 50-100 mg/day vanadyl sulfate $VOSO_4$ (vanadyl VO^{2+} is possibly the most stable diatomic ion, so very safe as it won't easily become some of the V forms that are somewhat toxic) lowered diabetic fasting glucose 36%, from 238 to 152 mg/dL (AIM 2013;16(7):408-11), an 86 points drop, huge for diabetics or prediabetics (many centenarians).☺☺☺ 0.1 ppm or 10 µg V/100 g food (as trisodium vanadate, otherwise known as sodium orthovanadate, Na_3VO_4) increased rat growth by 40+% ► Sci 1971;174(4007):426-8. Diabetic rats insulin requirement decreased 75% after intake of $VOSO_4$ ► MCB 1998;188(1-2):73-80. For more on the nontoxic forms of V see BTER 2019;188(1):68-98. Eterni foods will enable us to take that 20 µg V we eat now, but in the healthiest forms, there are about 10,000 papers on V health effects. Walmart multivitamin Equate often contains V.☺☺

►► 12.4.46. SILICON $_{14}Si^{28}$ ◄◄

Its benefits are presented in the silica detox section, for aluminum detox, see also FPS 2015;6:994. It also helps with bone health ► IJE 2013:316783. We eat about 12 mg/day, but our knowledge of its biochemistry is limited. "Silicon performs an important role in connective tissue... Silicon's primary effect in bone and cartilage appears to be on formation of the organic matrix. Bone and cartilage abnormalities are associated with a reduction in matrix components, resulting in the establishment of a requirement for silicon in collagen and glycosaminoglycan (GAG) formation" ► STE 1988;73(1-2):95-106.☺☺☺ Since collagen is 35% of body protein; glycosaminoglycans binding to collagen play a role in heart muscle aging and our longevity. Thus, some forms of silicon can prolong lifespan. The all famous hyaluronic (in eyedrops, hand creams, our eyes, skin, brain ECM) acid is a GAG. Hyaluronic is used for neural stem cell generation (JBMRA 2019;107(4):704-18) in biomedical engineering and also by the body as the brain is formed. "Synthesized by both neurons and glial cells, the brain's ECM (20% of brain by volume, between neurons and glia) is primarily composed of glycosaminoglycans (e.g., hyaluronan), proteoglycans (e.g., neurocan, brevican, versican and aggrecan), glycoproteins (e.g., tenascin-R), and low levels of fibrous proteins (e.g. collagen, fibronectin, and vitronectin)" ► SR 2019;9:4159.

►► 12.4.47. LITHIUM | $_3Li^7$ | higher IQ, longer life, better memory ◄◄

"The available experimental evidence now appears to be sufficient to accept lithium as essential; a provisional RDA for a 70 kg adult of 1 mg/day is suggested" ► JACN 2002;21(1):14-21. Lithium prevents anxiety and Alzheimer and is used to halt brain damage done by COVID19 and COVID19 vaccine spike protein hanging around. Lithium is highest (see graph) in leafy vegetables: 9.4 mg/kg vs 0.03 in meats or 313 times more, 10 mg/kg in soybeans, 6.7 mg/kg in fruits, 1.9 mg/kg in lentils or 63 times more than meat, vegans save their brain ► Foods 2024;13(4):592. People think we don't need lithium, but goat studies show catastrophic effects of low lithium, not just higher chance of violent crime, dementia: "41% of the lithium-deficient goats and 7% of the control animals died during the first year… skin lesions occurred (in humans Li cured herpes virus and seborrheic dermatitis)… significantly worse rate of conception (infertility)… increased abortion rate (miscarriage)… produced 20% less milk (offspring had lower IQ, growth, health)… the kids of lithium deficient goats had 9% lower birth weight (= lower IQ, shorter health lifespan, more health issues in humans)… gave birth to significantly more female kids… (the more lithium in tap water, the lower the human) psychosis, neurosis, schizophrenia and personality problems… suicide, homicide and rape were significantly higher in counties whose drinking water supplies contain little lithium" ► BTER 2005;16:169-76. We need to consider Lithium addition to water supplies and to vitamins for violent inmates. This likely explains why the standard American diet, which provide 10-20 times less lithium, causes so many violent crimes in the modern world, people eat no leafy greens, fruits and veggies. Alzheimer patients have lower lithium in the brain. Lithium is protective, especially for the 2% of population that has 2 copies (both mom and dad, so 5 times less likely to be a centenarian, as ApoE gene is hypothesized to be the most important to longevity) of the ApoE4 gene, which means 10-15 times higher chance of Alzheimer vs ApoE3 (75% of people). There is no need to take 5 mg a day if you're a healthy (eats leafy greens daily) vegan unless there is a clear sign of deficiency, since most vegans eat 3-5 mg from food (if food is not from depleted soils), while an omnivore may only get 0.3 mg. 5 mg (Amazon) is a typical dose of lithium orotate (rotate, like in a circle or o, o-rotate, easy to recall, insight comes full circle, violence is caused by malnutrition in 50% of cases). Orotate is the best lithium form that doesn't bind to amyloid, though due to possible side effects (irregular heartbeat, tremors, acne, confusion) at even 5 mg, it is wise to start with 1 mg or stay at 1 mg for years (meaning you use 20% of a capsule/day if you think it boosts cognition/prevents dementia). Since vegans eat way more lithium, they can adjust easier to 1 or even 2 mg. It's no wonder that long-term vegans have 3 times less Alzheimer than omnivores (average vegans 2.2 times less) ► NE 1993;12(1):28-36. This explains why "sages" noted vegan people are more peaceful, meat eaters more aggressive, so India came up with sattvic foods term: foods that keep people serene, peaceful and 10 times less likely to commit suicide or any violent crime,

meat being the fuel for murder, as it is logical for several reasons. The brain-diet section explains junk foods diets (low in ω3/lithium) are highly linked to violent crime. Imagine how many parents and cops waste trillions on Earth, when it would cost 1 billion to prevent those violent crimes and behaviors that are misdiagnosed as autism, ADHD, personality issues, etc. The real issue is GREED, the feeding of junk food to 90% of people. Before taking lithium orotate, watch your thyroid hormone levels and then again after 6 months, to make sure you're not one of the sensitive people whose lithium intake causes hypothyroidism (TSH rises). Lithium inhibits GSK3 enzyme that blocks brain autophagy, so Li allows the clearance of brain waste in people with a weak ability to clear waste due to lifestyle, diet, genetics, past damage to the body, etc. GSK3 inhibition also blocks the rapid aging mTOR pathway and activates the AMPK rejuvenation. Li also boosts BDNF that helps neurons to survive. You can spend 12$ (subscribe, then cancel, get 10% coupon too) to buy lithium or 2500$: 12$ if you buy 130 mg caps and you use 4% of a cap each time to get 5 mg (5 mg is what many vegans get from food☺☺☺) or 2500$ if you buy 5 mg bottles each 6 months to make pigs rich. Lithium orotate lasts for decades. Or 10$ if you buy it from Walmart and use their 5$ off code for quality long reviews you make (free ship if order is 35.01$, even if charge is 30.01 due to 5$ off). Don't take more than 5 mg, as that's too much. Pregnant ladies and kids are advised to avoid lithium pills, as high lithium can cause birth defects and possibly even heart palpitations (100 bpm) via WPW disease that can kill kids or adults.

►► 12.4.48. BORON | $_5B^{11}$ ◄◄

There is no RDA, there is an UL of 20 mg. Boron lowers excretion of calcium and magnesium, extends the activity of vitamin D (which itself keeps calcium higher in the blood so more calcium goes to the bone) and stimulates in vitro the development of osteoblasts, the cells of bone tissue, so many MDs claim it will help built boned nodules. The only problem with that is that for those with arthritis this can mean the growth of bone nodules in finger joints or others can accelerate if boron is too high, so maybe start with 3 mg and see what happens, instead of doing 10 mg. Bone and boron share Bon, easy to recall. The pills are cheap, only 17$ for 3 year supply, a 10 mg capsule every 2 days (half capsule a day), from Bulk Supplements with zero extra ingredients. Taking too much can cause digestive issues. B is known to lower inflammation (hs-CRP halved in some studies, it's one of the top 5 biomarkers for infarct risk), thereby protecting us from the number one killer worldwide, heart disease. IM 2015;14(4):35-48 reports many brain and antioxidant enzymes benefits of B (key to Mg and Ca absorption too) and that after a week of $_5B^{11}$ at 6 mg/d, they found a rise "in free testosterone, (11.83 to 15.18 pg/mL)... significant decreases in E2" (estradiol, 42.33 to 25.81 pg/mL). … IL-6 1.55 to 0.87 pg/mL; hs-CRP 1460 to 795 ng/mL, TNF-α, 12.32 to 9.97 pg/mL. DHT rose 1%, cortisol rose 27% (since cortisol rises in the morning after waking up, B needs to be taken midday, not when waking up, to avoid a cortisol spike on top of the natural morning spike that shrinks the hippocampus; testosterone

is also higher when waking up, so taking B 6-8 hours after waking up is better), 7.93 to 10.10 (Table 3), D_3 rose 7.1%. For men with an ultra low testosterone, this is a good thing, though a cortisol rise is beneficial in those with very low levels. A retrospective study of 369 women and 494 men aged 62, EJN 2024;63(3):987-93 found "higher plasma B concentrations were associated with a higher risk of all-cause mortality in women, but not in men", possibly due to B lowering estradiol levels to areas of the U shape mortality-estradiol curve where it's bad. In some studies lower estradiol increases female lifespan, it's complex. The NIH short page on boron says low B reduces mental alertness and capacity to decide. In males who need to conceive or cure dry eyes due to low testosterone, B would help. "low dietary B (0.25 mg, vs 3.25) resulted in significantly poorer performance ($p < 0.05$) on tasks emphasizing manual dexterity; eye-hand☺ coordination; attention; perception; encoding and short-term memory; and long-term memory" ► EHP 1994; 102 Suppl 7:65-72. CRP fell 37-60% after 1.5-3 mg $_5B^{11}$, angina fell 49% ► BTER 2015;172:277-81. LDL fell 9.3%, HDL rose 5.2% with 3 mg in group 3, 112 mg calcium fructoborate, CF, $(C_6H_{10}O_6)_2B)_2•4H_2O$ found in produce ► Ntr 2013;29(1):178-83 (Table 3), while Table 2 shows a 40% drop in hs-CRP in the B group vs 24.6% in the resveratrol group. B prevents prostate, breast, colon, brain, lung cancer, arthritis, by lowering inflammation ► FB 2011;3(1):205-15, CJ 2021; 23(4):429-34, JTEMB 2022; 70: 126923, JKNS 2021;64(6):864-72. B is a "crucial weapon in anticancer research due to its significant intervention in cell proliferation" ► PT 2023;251: 108548. Knee discomfort fell after B intake ► CIA 2014;9:895-9.

B diminished hospital time for wound healing by almost 3 fold from 55 days to 20. " B derivatives have been reported to promote bone and teeth growth in vivo (meaning cavities remission if small cavity was reported in many papers)… B enhances odontogenic and osteogenic differentiation of human tooth germ stem cells" ► BTER 2013;153(1-3):419-27. B prevents (and reverses small) cavities and forms stronger enamel and dentin: "fluorine (F) and B are mainly concentrated in the teeth and bones… The level of B and F of non-carious teeth was higher than that of carious teeth… increasing the level of B in the diet increased the concentration of B in the mineral composition of the teeth and had positive effects on the alveolar bone around the teeth... B (has) an important role in the growth and development of teeth after eruption… The *incorporation of B in dental materials was demonstrated to limit the progression of dental caries*, more precisely, a level of B in dental composites, namely concentrations of 1%, 5% and 10% (w/w) as sodium pentaborate pentahydrate has an antibacterial effect on S. mutans (the main bacteria causing cavities)… (a B compound) has antibacterial and anti-inflammatory properties in vitro against the bacteria Prevotella intermedia, P. gingivalis, Eubacterium nodatum and Treponema denticola that are associated with periodontal disease" ► RJME 2022;63(3):477-83. B helps teeth to return to the white of age 20, given you eat more D3 (5000 IU at least) and 1-2 mg K2 to facilitate calcium move from arteries to teeth, plus Mg to stabilize

enamel repair, avoid the translucent yellow tint. "The highest microhardness (strength of enamel, ability to remain white, tonot become translucent, which makes teeth the yellow dentin color) was observed in the 15% boron group": BMC 2024; 24:1419. "Borate ions… protect the tooth structure against acid attacks… promote remineralization" ► SR 2021;11:15734.

►► 12.4.49. CREATINE ◄◄ (only 0.5 g seems safe for all daily for decades)

If you don't get Homocysteine or Hcy < 6 via B6-B9-B12 + TMG which clear, recycle, convert Hcy that was already produced by the body, you can lower the synthesis of Hcy itself too by taking creatine. Our bodies contain 100-200 g creatine depending on weight, so when we start taking creatine, we no longer need to use arginine, glycine, methionine to make creatine. To make 1-2 g of creatine daily, we use S-adenosylmethionine (40-70% of our daily methylation capacity), the body's primary CH_3 donor, which donates a CH_3 to make creatine and S-adenosylHcy, which later turns into Hcy. Creatine pill intake shrinks creatine synthesis, reducing Hcy generation. With age, global DNA methylation tends to decline, leading to failure to repair DNA, to keep chromosomes healthy (methylation keeps heterochromatin intact, preventing aberrant gene expression). Epigenetic clocks measure CH_3 DNA patterns to determine biological age, a better health predictor than real age. Once made in the liver and kidneys, 95% of creatine goes to muscles, and 5% to the brain. The brain relies heavily on creatine for quick energy (ATP recycling) during high cognitive tasks. Creatine prevents dementia (neuron DNA damage via low methylation) and multiple sclerosis, since methylation is key to myelin sheath synthesis. In some studies, creatine didn't lower Hcy in those with advanced kidney disease or other illnesses. Try take 1 g (the amount omnivores get from meat daily) creatine to see if it lowers Hcy. High Hcy causes heart disease. Creatine helps muscles retain water, and cells too, so your face may be puffier, weight may rise (via water retention, 1-4 lb) if you eat more than 1 g. Our body makes 1 g of creatine on its own, but omnivores get another 1 g from meat. The brain level of creatine is identical in both vegans and omnivores and supplementing it doesn't raise the brain level unless you take 20+ g which damages several organs or use guanidinoacetic acid creatine precursor which can get a little more into the brain; *vegans* have 25% less creatine in muscles. The brain makes its own creatine, unlike muscles; the brain and blood concentration of many nutrients is very tightly controlled. When exercising or going thru 10-30 bpm higher pulse periods in life, spies/soldiers raising pulse, 1 g creatine may help the heart muscle. Usually creatine is used by those interested in gaining muscle mass or preventing fasting or age related muscle loss (ages 50-100). CRO 2019;10(3):374-8 reports retinal detachment (in a 39 yr man with preexisting retinal distrophy) at "loading phase for muscle building" creatine intake level (20 g/day, 20 times the omnivore diet). Lancet 1998;351(9111): 1252-3 reports kidney dysfunction at 2-5 g daily, so it's safer to stick to 1 g max (the natural omnivore dose) if a *vegan*, since the only long kidney safety study is under 3 years. NJ 2014;13:115, a 1 week study without placebo control, found 21 g

creatine can increase Hcy when it's normal (VM 2009;14(3):239-48), decrease Hcy when it's high. Studies (3-20g) without placebo controls, few people (<70) or short duration (1-3 weeks) are hard to trust. NA 2008;29(9):1404-11 reported mice fed creatine had 9% longer healthy lifespan. Creatine (20$/kg) is at much lower levels in the *vegans'* muscles: vegans benefit the most from creatine for heart/general muscles (preventing sarcopenia). So, if you got a weak heart or leg muscles, take 0.5-1 g of creatine. Low doses are safe long term, anything above 1 g can be risky. Creatine 2025 38 men 12 week study found creatine doesn't raise DHT at all, unlike the 2009 20 men 3 week study that saw 56% rise in DHT. DHT can cause atherosclerosis and hair loss, besides extra sebum and acne. It's unclear since both studies are small or maybe influenced by industry funds or bias. But if you get acne, lose hair, get bloated, dehydrated, puffy faced, confused due to brain fog, poor sleep, restlessness, stop taking creatine or cut intake 2-5 fold until issue vanishes, so you don't create any issue. AJOCR 2021;23:101128 found 5g creatine led to central retinal vein clot/blockage (this could cause blindness over time), dehydration (dry eyes if lacrimal and meibomian glands don't get blood nutrients via a shrunk artery). Thus creatine needs lots of water drinking, 0.2-0.5 g doses for A+ blood that is prone to clot, blood that is thicker and thus more prone to cause brain fog via poor nutrient/oxygen/blood flow and white matter silent strokes, small strokes due to tiny clots. If water in blood goes to edema around lower legs, you end up with thick blood, stroke, infarct.

►► 12.4.50. MELATONIN: the master mitochondria antioxidant ◄◄

(is in all lifeforms, mitochondria's strongest antioxidant, traps 10 free radicals vs 1 for others)

Melatonin (the key mitochondria antioxidant found in all bacteria, animals, etc) is produced by lowering blue light before bed and sleeping in darkness. Its cell level in old age is 10% of the peak at age 15, so we need to sleep much better after 20, in a dark room, to produce melatonin or simply add 0.3-1 mg to our multivitamin regimen to live to 500☺☺☺. Melatonin reduces oxidative stress induced by ochratoxin A (mycotoxin produced by black/grey mold in buildings, baths) in rat liver and kidney. It reverses the oxidative damage caused by food mold (aflatoxins) too ► Antio 2024;13(12):1528. Melatonin helps lowers inflammation (MDA, IL-6, TNF, CRP), LDL, TC, WHR, raises HDL, TAC ► Ntr 2025;18(1):134. Melatonin helps women get pregnant, improves egg quality, fertility and egg number even in aged animals. Some lady (with 900+ melatonin facebook posts) takes 2-3 g melatonin daily, though most people take 0.3-5 mg. Another youtuber takes 1 g, claims 1 g doesn't make you sleepy, but 10 mg does, Italian MD used 1 g in terminal cancer cases. Amazon sells 1kg/135$ (subscribe, then cancel). MD Peavler explains melatonin anti-cancer effects, anti-Warburg effect. Melatonin taken orally is mostly destroyed by the liver, helping the liver to fight free radicals. 95% of melatonin is made in every cell of the body in the mitochondria, while blood melatonin spikes at night due to pineal gland release.

Cancer growth stops at night, since melatonin is higher. But to get better effects, some take it as a suppository, though those pills are expensive, so powder is 170x cheaper. Seems like some mix it with some water and chia oil (10 drops maybe) and insert it into anus to repair the brain (guy went from 9 seizures/day to 0 by melatonin 200mg), see full video here. Melatonin is needed in the first 8 months of pregnancy (since it can cause contractions in the last month), for optimal offspring lifespan/health. We absorb 10% of oral melatonin and 36% of colon melatonin. Digestive issues can mean that you can use 50 ml distilled water with melatonin during enema, after you did several enemas to remove the feces, to heal your colon and kill colon cancer and all diseases of the colon. Melatonin is the strongest antioxidant for humans. Melatonin exists in every species, from bacteria to humans, see a 2 hr lecture by a melatonin professor. Some believe their low aging speed is due to melatonin. The common and rare side-effects of melatonin need to be watched out for, especially heart failure risk double if taken daily for 12 months in a study (this study is not reliable, as this video explains the nonmelatonin group included people with OTC melatonin☺☺☺ and this is an observational study, not an interventional study (correlation is not causation, reverse causation: insomnia causes heart disease, not melatonin). Stop taking it or lower dose 2-5 fold, if bad effects occur. Most melatonin pills do contain what is listed on the label, due to the ultra low price of 5 mg, so you can buy a 20 mg pill that you like, like Nutricost, minimum fillers, to get 0.28mg/cent, which is far cheaper than most pills costing 1-9 cents/mg. You can use part of the pill, though 20 mg is fine, given many take 200-3000 mg daily for years.

Studies show melatonin helps with most diseases, even US President got the melatonin when he got COVID19. Those 20+ who have a hard time sleeping deeply may sleep much better (0 bath trips too) by taking melatonin (a super powerful antioxidant) 3-7 mg/day pills or capsules (or take 10-30% of a 20mg capsule by pouring it over a spoon of water right before bed, to save money and intake of inactive ingredients (if you buy 2 mg pills you take 10 times more inactive ingredients), so buy 13$/240 caps without magnesium stearate of 20 mg to last for 2 years at 7 mg/night, store in fridge). Once I took 7 mg I noticed a deeper sleep not happening at 4 mg. First time I took 7 mg I slept better than in years, me being an ultra light sleeper waking up ultra easily and tossing. Never in a million years would I have believed anyone that melatonin makes a huge difference, until I took it myself. Better sleep, better antioxidant power may actually add 9 years to your lifespan and 50% to your quality of cognition during the day. "Taking melatonin was associated with a decreased risk of developing AMD (the leading cause of blindness)" ► JAMAO 2024;142(7):648-54. *What helps eyes helps every organ. AMD is a disease of oxidative stress, so melatonin helps fight that stress during sleep body repair.* Melatonin and its metabolites both scavenge free radicals, so melatonin can neutralize 10 free radicals per molecule (most antioxidants only scavenge 1 free radical per molecule), being thus a far stronger

antioxidant than vitamin C, E or even glutathione, the main cellular antioxidant, helping mitochondria as we age, neutralizing the OH radical far better than glutathione (found mainly in the cytosol, due to its hydrophilic nature and inability to cross cellular barriers). Melatonin is both hydrophilic and lipophilic, so it can pass and reach all cellular organelles and areas, protecting all cells far more than glutathione. Energy is produced in the mitochondria, where most chemical reactions (free radical formation) take place: that's where melatonin accumulates, to protect every cell. That's why avoiding blue light before bed and sleeping in darkness is important. Melatonin helps prevent dry eyes in rats ► iSci 2024; 27(7):110367. ☺☺☺

►► 12.4.51. SPERMIDINE $H_2N-(CH_2)_3-NH-(CH_2)_4-NH_2$ ◄◄

(in each plant/animal/human cell, declines in humans after 50, except those who live past 90)

Spermidine "stimulates cytoprotective macroautophagy/autophagy… supplementation of spermidine extends lifespan and health span.. in yeast, nematodes, flies and mice" ► Autop 2018;15(1):165-8. Spermidine, with 15K papers on pubmed, a component of plants, animals, humans, sperm, "increased ... superoxide dismutase and catalase activities". Spermidine has longevity effects in animals, people (PO 2011;6(7):e22564), with youtubers claiming it reverses grey hair, as shown in SR 2022;12:14478. Spermidine prevents infertility and improves egg quality in older mice ► NA 2023;3:1372-86. It may fuel cancer growth though. Spermidine promotes autophagy (NCB 2024;26:1571-84, blocking spermidine generation cancels longevity effects of fasting; fasting produces spermidine; spermidine may give us some fasting benefits without the damage fasting can do) and thus clears the brain/body of waste (and amyloid, hence arginine is used to treat Alzheimer, as it converts to ornithine, then spermidine, immune cells use arginine), boosting cognition ► JAMA 2022;5(5):e2213875, so anything that helps hair helps you live longer too: the grey or thin hair tells you you're aging too fast. The cheapest gluten free spermidine pills are the Uarcool (China made) 11$ for 60 caps of 100 mg spermidine, or 6 g total, in theory, since in practice, each capsule weighs 360 mg not the 2025 mg it should per the label, so spermidine may be 1 g total/bottle. Because it contains alpha lipoic acid, a very strong throat irritant, you need to swallow the caps and not open caps to pour it in a smoothie or juice. The thing is in China, where 0.01% families own 58% of wealth while claiming it's communism, fraud in labeling is huge as the astaxanthin section explains too. But even at 6 times less, this pill is offering amazing discount, if listed ingredients are there, but I would not take 12 capsules to get to the "daily serving" of 4050 mg, because you don't know how safe it is to suddenly eat so much of those senolytics (fisetin, spermidine are powerful autophagy promoters, and all those senescent cells dying can cause a lot of gas, as well known for fisetin at 2g intakes). NAD, resveratrol, spermidine (200-300 mg) in the Uarcool 4050 mg "serving" can cause gas too, making things even worse (you would be drowning in smelly gas if you were to take 12 caps to

reach 4050 mg dose), so don't do it as liver may be overloaded with toxins from senescent cells killed by fisetin and spermidine. EBM 2018;36:18-28 found fisetin to be the most effective flavonoid (found in plants, like quercetin) at killing almost dead cells that poison the nearby healthy cells. Fisetin 100g/60$ is the #1 senolytic, followed by quercetin 60$/500g, both present in Uarcool. 1 cap is more than enough to avoid resveratrol issues, though we don't know if it contains all stated ingredients divided by 6 or it's a scam. Given the huge lie about quantity, we can't trust quality of ingredients much either, of if even all ingredients are present, or if the stuff is contaminated with viruses as in hybrid warfare. However, they may be genuine, just ask Amazon to give refund, and they won't require shipping back, saying it is far less than stated, at least you get to try free pills with fake labels and if enough people, 5000 request refund for all 90,000 fraud brands that state 20-500% higher on label than actual, the Chinese will start to be honest. Meanwhile, happy buying and free refunds on all types of Chinese supplements that you can tell are fraud, since 4000 mg can't fit in 2 regular caps. Thank You 0.01% for giving us free pills to try, with 0 mg (24 label) astaxanthin or 0 quercetin. Amazon is not checking anything, but they do refund obvious fraudulent products. Send it to a lab and let me/us/Amazon reviews know. Amazon search for spermidine fisetin quercetin will give you 200 brands that have the 3 autophagy boosting senolytics (kill senescent cells). Avoid senolytics if taking berberine or piperine liver detox enzymes blockers: when removing dead cells, toxins are excreted. ☺☺☺

Another spermidine brand is Nurafuse (Vietnam) 14$ for 150 caps of 10 mg Spermidine x3 HCl, or 1.5 g total, with 9 other polyphenols (fisetin, quercetin, resveratrol) or spices (Nurafuse is a company in Vietnam's capital, probably owned by Chinese who moved to Vietnam to avoid tariffs), which is also way more helpful for antioxidants than plain spermidine. Some spermidine is packed in California by Gyumolics, 1.8g/25$ and contains a urolithin A polyphenol alleged to cause autophagy in bad mitochondria, resveratrol and NAD, so US packed brands may have more testing for extra ingredients, for mycotoxins in those milk thistle extract, turmeric, elderberry, ginger and other spices the Chinese Nurafuse and Uracool (also on ebay) brands use. Most spermidine 3 HCl sold in USA comes from China, but you pay 20-50$ for 1.2 g spermidine (or 8-20 times more) for fraudulent label "made in USA" (Amazon is a clown company, most made in USA is not, powder from China put in caps in USA), it's sometimes packed in caps in US garages of predatory aristocratic leeches whose contribution to USA to sell and resell, because this is what is left of US innovation and manufacturing after rich tax rate moved from 95% to 30%, CEO pay rose to 400x worker pay in 2021 from 20x when Kennedy was assassinated likely due to asking Congress to lower aristocrat tax rate from 95% to 65%. We build palaces and stadiums instead of products to triple human lifespan. Today, rat IQ dominates☺☺☺ as only 30% of college grads are in STEM instead of 95%. For US made spermidine, try the pricier (20$ for 1.2 g: 120 caps of 10 mg) ones with opaque bottles. Peakpury Viet company (Chinese

probably) makes spermidine from wheat extract (7.5 g spermidine total, resveratrol, ginger, NAD, etc included, 16$), which is full of gluten, which may sicken people with celiac disease and give offspring *diabetes, autism,* schizophrenia, *mental illness we see in wheat eating nations*.

Those with dry eyes need to avoid spermidine if eyes become dry or headaches emerge, due to its ability to inhibit diamine oxidase (DAO), the key enzyme that degrades histamine. As DAO degrades putrescine, cadaverine, spermidine, it can't degrade histamine and this causes headaches and dry eyes. Histamine is what our mast cells release during strong immune response to mold, mycotoxins, eye drop allergens, eye/body inflammation, food/air allergens/bacteria. Cooked foods left in the fridge 20+ hours are poison, store foods in the freezer if not eaten next 20 hrs: bacteria multiply and they release allergens even at fridge temperatures, food bacteria double each 20 minutes at room temperature, and soak legumes grains in hot water, as explained here to prevent histamine release, since cold room temp water allows allergens to be overproduced). If it stays elevated, histamine inflames the lacrimal and meibomian glands, causing dry eyes and even headaches. Avoid rotten meats, fermented foods (natto, miso, veggie, meat, cheese), as they contain putrescine, foods putrefy during fermentation. Putrid flesh smells like putrescine (high in wine, beer, tuna, sardines canned fish). Putrescine $H_2N(CH_2)_4NH_2$ causes histamine like effects, due to competing with histamine for Dao enzyme, and keeping histamine high. Cadaverine $H_2N(CH_2)_5NH_2$ (cadaver smell) is putrescine with one extra CH_2. As meat rots, lysine $H_2N(CH_2)_4CH(NH_2)COOH$ loses CO_2 and becomes cadaverine. High putrescine causes cancer tumor growth, so avoid fermented foods if cancer exists. Our body uses putrescine to make spermidine via the spermidine synthase catalyzed reaction:

$H\text{-}NH\text{-}(CH_2)_4\text{-}NH_2$ (putrescine) + $H_2N\text{-}(CH_2)_3\text{-}(H_3C)S^+\text{-}$Ribose-Adenine (S-adenosylmethionineamine) ⇌ $H_2N\text{-}(CH_2)_3\text{-}NH\text{-}(CH_2)_4\text{-}NH_2$ (spermidine) + H^+ + (H$_3$C)S-Ribose-Adenine (methylthioadenosine)

MTA = methylthioadenosine, dc-SAM = decarboxylated S-adenosylmethionine = S-adenosyl MethionineAmine. In biochemistry SAM is S-adenosylmethionine. SAM is the primary methyl group donor in cellular metabolism, essential for transferring methyl groups to DNA, RNA, proteins, and lipids. Synthesized from methionine and ATP, it serves as a critical co-substrate for methyltransferase enzymes, regulating gene expression and acting as a therapeutic agent. While putrescine is essential to the human body, excess intake from foods can be damaging for some. Putrescine is used in efferocytosis (getting rid of dead cells), cellular growth, division, etc.

The backbone (black hole) of US economy are small useless businesses that produce nothing, they just buy and resell. Gluten is not that safe, could wreck our gut lining, causing IBS, and colon cancer. Spermidine helps the heart via angiogenesis, increased blood flow, cardiac mitochondria creation, improved arterial flexibility, heart mitochondria boost ► SR 2023;13: 8338. Spermidine, produced in every human cell, "declines with age... for most... Those who live

beyond the age of 90 don't experience this decline and have spermidine levels similar to middle-aged adults". That's why people who masturbate/have sex often for many years will get grey hair, same for women who have sex outside of pro-creation, they lose nutrients. Sperm contains B_{12}, Zn, Mg, catalase, SOD, GPx, spermidine, all essential for hair color, growth. Female fluid surrounding eggs (that keep eggs healthy) is full of spermidine and female reproductive liquids contain it too. Sex is designed for pro-creation only, so we use brain nutrients to invent 1 billion times faster synthesis. ☺☺☺ Synthetic spermidine trichloride (NR 2024;132:1-14) 40 mg/day doesn't change blood levels, so spermidine is converted to spermine before uptake. Spermine can be converted to spermidine by the body as needed. Soybean/chlorella spermidine extract 15 mg/day didn't raise blood spermidine, we get 10-15 mg/day from diet ► Ntr 2023; 15(8):1852. "spermidine is the polyamine most readily absorbed from human gut without intestinal metabolism (40–80%)" ► AJCN 2018;108(2):371-80, though this paper just claims so based on some other older book or reference that may be off. It's clear this is a new area of research and since Pharma can't patent it, it will be decades before we understand what goes on. However, the few human studies so far are observational studies mostly, where spermidine higher intake via healthy whole foods is associated with lower blood pressure and other benefits, indicating the spermidine may be a marker for intake of high potassium and healthy whole foods rich in ***antioxidants that cause the better outcomes, not so much the spermidine itself***. So, given these, it's unclear if spermidine pills would have any major effect on longevity in humans outside hair color and 1 month increase in lifespan, better gut health, etc. However, as we age, if spermidine is essential, we might benefit more (since making spermidine from spermine is easier than from L-ornithine), especially as spermidine acts in beneficial ways on stomach and intestine before conversion to spermine, which some papers claim happens for most spermidine, not just 20-60% in 2018 paper. So, before you buy spermidine, do more research to see if any real digestive benefits at least, though mice studies (GM 2020;12(1):1832857, etc) suggest humans get gut barrier/microbiota benefits (since it didn't convert to spermine yet) after we weakened the stomach, intestine lining during fasting to lose 30-150 lb. We're not mice, but we do get some of the benefits mice get too if we can boost spermidine synthesis or take it orally or as a suppository. Semen has 0.03 mg/ml and it helps eggs stay young, so it's useful preconception.

►► 12.4.52. GLYCINE (Gly) cures acne, weak joints, skin issues, uric arthritis, high A1C, weak immunity, Proline is 15% of collagen, Glycine 33%, both help vegans ◄◄

Cheap and good quality brands include 10$/lb Hoorbach, 12$/2lb or 45$/5lb Pure. Endogenous glycine (Gly, the main collagen amino acid) synthesis declines with age, just like collagen does. To boost collagen synthesis and prevent skin thinning, muscle loss, heart muscle shrinking, joint cartilage loss, weak blood vessels (they're like skin, they thin), rough cornea, people take 4-9 g glycine daily from food and/or powder. 33% of collagen is glycine, low glycine=acne, arthritis.

15% of collagen is proline (Pro) (and hydroxyproline (Hyp) derivative), 9% is alanine (Ala), both of which are low in some vegan diets (25 g of legume protein got 1 g Ala, 25 g of beef protein got 2 g Ala), so many vegans (esp. after age 40, when collagen production falls) and athletes buy Pro, Ala too with Gly to recover from skin, joint injuries or to boost heart muscle or prevent muscle loss after 50. Pro, like Gly, is said to aid sleep quality, just like tryptophan. Ala deficiency is rare, so you can start with Gly, then add Pro if needed, then Ala, especially if serum Ala is low. 8% of collagen is arginine, which is raised best by citrulline intake, so take 2 g of that if Gly, Pro, Ala fail to improve skin quality, acne scars and acne. Vegans eat more arginine than omnivores usually. Pro, Ala and Glycine can be eaten before meals, as they help repair the gut lining, which is skin or collagen, preventing toxins from entering the blood and poisoning the organs, brain, and skin with acne (skin is used to eliminate these toxins). Digestive enzymes are essential too, as they break down dietary protein into amino acids used to build collagen. High Pro can cause diabetes ► RDS 2016;13(1):66-78, so limit it to 3-4 g/140 lb weight, which is doable for vegans who eat legumes as their main source of carbs/protein, 1150 g of cooked lentils spread over 3 meals = 5 g of proline. However, not all vegans eat so many legumes, so those guys will develop real acne, joint, hair, vascular, heart issues as Pro is very low in the diet, most of it coming from meat, dairy and legumes. While grains have Pro, they get people obese really fast. Soaked legumes at least provide you with all protein needed. Pro is very stable at high temps (so it's safe to buy from amazon), it's made industrially by fermentation, so it will be a pretty safe high purity amino acid, taken usually at 2 g/day, 3$/month. The cheapest brand is Bulk Supplements if bought 1-5kg: 5 kg 233$, 1kg 46.5$. Pro is sweet, while glycine is even sweeter. Any vegan above 50 will probably benefit from a little glycine (even if only 1 g before bed) and Pro (even if only 1-2 g), as vegans don't eat collagen and all humans make less after 40, especially 50.

I started taking 6-12 g glycine/day on 1-18-2026 and all acne breakouts vanished after 2 days, if you're a vegan, you absolutely need Gly if you don't eat 100 g protein daily and are 25+ (collagen production drops after 25). Skin started to improve dramatically on the forehead (where old acne emerged) on its own, before nothing was working (collagen, ceramides creams, exfoliation, red light, etc). What happens inside happens outside, so imagine what happens with the heart and arteries when low in Gly... Bad, same for cornea, it's pure skin. Acne bacteria can actually cause plaque. All other supplements, vitamins I tried for 10 years failed to cure the acne breakouts. The skin needs protein to repair itself and create strong structures unable to be attacked by the bacteria, which started a few weeks after a 2016 toe injury that forced all immune system cells to go to the fracture site, leaving the face unprotected against P. acnes bacteria attacks. "Patients treated with glycine (5g/3 months) had a significant decrease in A1C (high sugar levels cause acne, a known fact, avoid sugars) and in proinflammatory cytokines... Treatment with glycine is likely to have a beneficial effect on innate and adaptive immune

responses and may help prevent tissue damage (acne scars) caused by chronic inflammation… There was a decrease of 38% in the interferon IFN-γ level of the group treated with placebo, whereas that of the group treated with glycine (IFN-γ) increased up to 43%" ► JEI 2008;31(8):694-9. 7g/day glycine allowed my immune system to work better for the first time in 10 years within 3 days and finally overrun the bacteria. IFN-γ activates macrophages, T cells, NK cells, turning them into potent killers of infected (with P. acnes bacteria) or cancerous cells. IFN-γ boosts antigen presentation meaning it increases molecules on cell surfaces (MHC-II) that present foreign invaders, making them visible to T cells so they can be wiped out, recycled as I saw old pimple scars started to be wiped out fast without my intervention, whereas before I would wait forever for a scar to vanish. Simply unbelievable, the stuff of science fiction, total change in scar healing speed (30x faster) overnight after glycine. IFN-γ arms cells to fight bacteria, fungi, and parasites. IJO 2023;47(10):1023-6 found "studies demonstrated inverse associations of Gly with obesity, cardiovascular disease (CVD) and diabetes…", low glycine being linked to high BCAA (branch chain amino acids intake), HOMA-IR (insulin resistance), IL-6 (inflammation), visceral fat, adiponectin. Low Gly = obesity. Glycine blocks lethal AGEs formation by boosting aortic glyoxalase-1 (Glo1) activity, a glyoxalase system enzyme that degrades methylglyoxal (MG), the major precursor of AGEs. In MG-treated endothelial cells, glycine restored Glo1 function, suppressed the AGE/RAGE signaling pathway, inhibited the generation of free radicals ► OMCL 2019:4628962. Gly uses up methionine, especially in vegans who eat 3 times less of it via vegan protein that has 3 times less methionine, so it can cause issues with undermethylation, as it is a methyl acceptor. In some people, taking Gly can cause serum homocysteine (Hcy) to rise slightly (0.1g/kg glycine "raised the plasma … Hcy" by 5%, as MDA (marker of oxidative stress, the lower the better) fell 10%: SR 2025;15: 36433, lowered TG by 12%), even if in general Gly causes post meal Hcy spike to shrink inside cells. Gly cancels the sharp rise in Hcy after meals and Hcy's negative effects on endothelium, so take Gly with each big meal. You can take TMG trimethylglycine (betaine, in beets), methylated B_6-B_9-B_{12} vitamins to bring Hcy down, when Gly fails to lower serum Hcy. Gly can lower serum baseline Hcy slightly in some. Gly lowers post meal Hcy spike in all. Undermethylation (histamine that causes dry eyes > 70 ng/ml, dry eye vegans who eat little methionine rich soy) and overmethylation (histamine < 40) videos explain more. 0.4 g TMG lowers Hcy and thus helps prevent dementia. However, TMG can raise TC at a ≥ 4g dose. Thus 0.4 g TMG is safer, to prevent a rise in ApoB, TC, LDL. Acetyl-L-carnitine and creatine are two Hcy lowering supplements that don't raise LDL, ApoB. "every 5 µmol/L increase in the plasma Hcy level was associated with a 9% increased risk of dementia and a 12% increased risk of AD" ► FAN 2021;13:665114. Hyperbaric oxygen lowers Hcy ► AJTR 2023;15(3):1897-904. Youtubers claim their Hcy dropped 40% by hyperbaric O_2. How lasting this 40% Hcy change is, remains to be seen. But it's another method to take Hcy to 4-6, the ideal range when $B_{6,9,12}$, TMG, creatine, ALC fail.

Millions with severe infections would prevented death or amputation if they received proper doses of vitamin D 40,000 IU/day☺☺☺, C 2g, MK7 0.3 mg, E 400 IU, A 10000 IU & GLYCINE (20 g/day), but vitamins are too cheap, hospitals make no money by selling 5$ supplements, only via expensive drugs, $20,000 angiograms for Infernal Aristocratic Palaces. Who would waste time with cheap pills (list here) in natural foods to help a dying sepsis patient? Acne (plaque, dry eye too) is often an infectious disease that weak immunity can't cure, as RDAs/ULs are too low. It was shown dry eyes are often caused by the overgrowth of staph and P. acnes bacteria in the eyelid lipid glands, which prevents the tears from having a strong lipid layer that prevents evaporation of the aqueous layer of tears, causing dry eyes. Not only that, but the P. acnes is known to cause plaque, to reside in arterial plaque, via arterial pimples (see pic @58) that become plaque origin, so you can get ANGINA from lack of GLYCINE, vitamin D, etc, as immunity can't kill P. acnes/Staph bacteria that also initiate Plaque, since it's not just Lp(a) that starts plaque via Apo(a) hook protein that is 6 times stickier than bad small size LDL ApoB protein that helps LDL enter the endothelium. Without glycine (33% of collagen, the main protein of arteries), due to low proteolytic enzymes (that MDs never check for to see if you can make glycine, because the food industry is run by the Palace Aristocratic Mafia (the "fruit fly IQ" bourgeoisie, the "fecal bacteria IQ" small business owners who have 0 PhDs on staff vs 1 million for one of the 11 companies), "geniuses" who don't know about the 8 classes of compounds, especially proteolytic enzyme inhibitors, in unsoaked legumes and grains 99% of humans eat) as we age, we have no collagen repair ability for every endothelial injury, so every injury becomes a plaque formation (LDL, TC, TG look ideal, but plaque is actually 500 times higher than normal) that kills our brain via vascular dementia in no time and also gives heart disease 40 years early. The plaque gives us issues, described in the reversal of heart disease section, with CCTA scans.

Endless people get pills without the real cause, glycine or blocked artery to an organ, even being addressed. Due to low vitamin D, half humans live in a state of sepsis most of their life, living to 80 instead of 4000. The medical industry treats nutritional deficiency caused diseases with toxic artificial pills that attack a symptom, without addressing the cause (lack of certain nutrients), while damaging all organs via side effects, all to make it look "good" or "less symptoms". The causes are not addressed: the 2 to 50 nutrient deficiencies in the person. That's why we need the Healthcare Reform: you go see the ND, Nutrition Doctor, to measure 500 nutrients first. Thus, glycine and all these vitamins can help your immune cells to recolonize the arteries, organs, eyelids and lacrimal glands and kick out the staph and other bacteria that moved after a major foot or other injury that the neutrophils rushed to. D_3 defends the brain and optic nerve against all degenerative diseases, the immunity defends the brain against dementia, glaucoma, etc. Dust mite poop allergens, molds, etc can downgrade vitamin D receptor (VDR) 50 fold (especially for VDR SNPs that favor glaucoma), so you need 20,000 IU D3, not 400 IU, to fight

them and function normally. So, without D_3, without glycine, you're a vegetable and shadow of your former self. I got my dry eyes 1 year after this 2016 injury, starting to use drops often (red eyes drops from RiteAid first) in 2017, getting worse each year. D_3 can't work well without high A, when D is high to boost immunity, A needs be high to prevent A going too low due to liver competition with D. Thus, when taking glycine to wage all out war on P. acnes bacteria, you need to try 1 g C, 20,000-40,000 IU/day D_3 and 0.4 mg MK7 too, to drive P. acnes out, to enable the recolonization by the immune system of the area the bacteria took over on your face for 1-40 years. Once the immune cells took over (no acne breakouts for 2 weeks 1st time ever), you can lower vitamin levels to more normal levels of 5000 IU D_3. You need to wage all out chemical warfare against bacteria with high dose vitamins, glycine, magnesium (to potentiate D immune activation), iodine (150-300 µg, not too much, crucial for skin cell regeneration (all those pesky old acne scars) and regulating metabolism, low iodine may cause decreased sweating and slower regeneration, leading to dry, dull skin, prone to acne; iodine helps decrease histamine, a compound that can contribute to inflammation, dry eyes and acne; avoid histamine rich foods, as they lower iodine uptake, causing acne and dry eyes). As we age or due to DNA, we can't split proteins as well due to a lack of proteolytic enzymes, so we end up being deficient in 1-2 amino acids, even if omnivores. Melatonin peaks at 14, T cells at 23, digestive enzymes for protein at 20, stomach acid to digest protein properly at 22, etc. Telomeres start to shrink at 19, unless we take radical steps to reverse that, etc. That's why with each decade, deficiencies reach beyond minerals, vitamins, into amino acids, fats, etc, even if 100% carnivore. The MDs are often just salesmen for deadly pills ignoring the 100 ultra critical nutrient deficiencies, hence the Immortalists propose a total reform of the criminal gangster medical system to create 4 "doctor" professions, not just MDs, with MDs at the bottom: ETs, NPs, NDs, MDs, RNs.

Most take 2-7 g glycine or Gly powder to also help lower blood pressure☺☺☺, boost sleep depth. There are 100s of papers about the dangers of taking amino acid supplements, and it is best to do a lot of research before deciding to take more than half a gram of any amino acid. Even 1 g of creatine or Gly could cause serious issues (kidney stones from Gly, etc), the body is complex, creatine could cause kidney problems even at 0.3 g daily. The other issue is the impurities, degradation during storage, contamination with other poisons. Gly is a glutathione (GSH) precursor (GSH is Glu-Cys-Gly tripeptide), so taking Gly boosts GSH level to that of 20 year olds, improves many biomarkers and wellbeing ► TJOG 2023;78(1):75-89. GSH is the master cell antioxidant present in all cells. Gly is sweet, hence the name like glucose (glukus=sweet in Greek) and helps us sleep better. It also dissolves uric acid crystals, those pesky crystals causing needle sensations in joints during uric acid gout attacks (soak legumes and grains to diminish uric acid). Glutathione, collagen synthesis decrease after age 35 causing joint pain. Dual is a company selling glycine cheap 13/lb (5.5lb 73$) that sent a USP certification and Certificate of

Analysis (heavy metals 10 ppm), etc, got it from the Japanese company Ajinomoto in North Carolina, which claims to get the "highest quality Gly (obtained by chloroacetic safe method) from USA". However, it does smell horribly like ammonia NH_3 (fish), so I trashed it and they refunded my the money. It shows why you need to order from a real company, not these "Dual" fools (2 students made a company). For example, Carlyle (founded 1971) sells an odorless Horbaach glycine, 3lb/30$, so 10$/lb, which probably was made using chloroacetic method (cheaper, safer), given how cheap it is and that it's the main method of synthesis for food grade glycine. Most US companies pack it in USA, but import most glycine from 1. India, 2. China, 3. Japan which use the chloroacetic acid method. When buying caps, pour 10 caps in a spoon, smell as 10 imitate a larger amount of Gly from a powder brand. Dual warehouse for storage is allegedly at 70°F year round, but the Gly decomposed into NH_3 as it does due to heat or bacteria. Many companies don't pack Gly under vacuum or nitrogen, so oxidation is easy during storage. Low quality brands smell like rotten fish. Avoid brands that add the bad inactive compounds.

In the presence of aerobic bacteria, the strong ammonia NH_3 (rotten fish) odor is released into the sealed ziploc bag via this equation☺☺☺: $H_2N\text{-}CH_2\text{-}COOH$ (glycine) + 4Hfolate + NAD^+ = N^5N^{10}-methylene-4hfloate + NADH + CO_2 + H^+ + NH_4^+ (which can decompose into NH_3). Glycine can decompose like $H_2N\text{-}CH_2\text{-}COOH$ = $H_2N\text{-}CH_3$ (methylamine, smells like rotten fish or ammonia) + CO_2 in certain bacterial conditions. In the presence of anaerobic bacteria, glycine releases ammonia gas: $4H_2N\text{-}CH_2\text{-}COOH + 2H_2O = 3CH_4 + 4NH_3 + 5CO_2$

All other companies contacted don't want to tell how Gly is made or the chloroacetic method Gly they sell is not made in USA, but China or India with poor QC or mixed with other ingredients in capsules (from China made Gly) at 5 times > price than Dual/Carlyle. Now Foods sells China made chloroacetic method Gly 17$/lb. Gly is made in 2 ways:

1). Most food grade glycine is made by the amination of chloroacetic acid: $2NH_3 + Cl\text{-}CH_2\text{-}COOH$ (chloroacetic) = $H_2N\text{-}CH_2\text{-}COOH$ (glycine or aminoacetic acid) + NH_4Cl, which is far safer than # 2:

2). Cyanide Strecker method: $HCN + H\text{-}CH{=}O + H_2O + HCl + NH_3 = H_2N\text{-}CH_2\text{-}COOH + NH_4Cl$ which can leave cyanide residues in the product. It's actually 2 reactions, but the above is the merged equation, they make aminoacetonitrile first: $HCN + H\text{-}CH{=}O + NH_3 = H_2N\text{-}CH_2\text{-}CN + H_2O$, then they hydrolyze the nitrile with HCl to finalize it: $H_2N\text{-}CH_2\text{-}CN + 2H_2O + HCl = H_2N\text{-}CH_2\text{-}COOH + NH_4Cl$. As google correctly says, Strecker can lead to cyanide in the glycine. I wrote to 15 Amazon sellers via the 'Ask a question' button and only 3 told me what method they use, the rest hide it due to fear of lawsuits over cyanide poisoning. Research the industrial chemical reaction used to make it before ordering a Gly, or etc. This is critical for amino acids and nitrogen containing chemicals, as cyanide (CN) can provide nitrogen. Double Wood uses the chloroacetic method, but they sell it at 5.5 times higher price than Carlyle, or 55$/lb, in capsules, sourced from India (low quality),

add the absorption blocking magnesium stearate, SiO_2, cellulose to each *bovine gelatin nonvegan (heavy metals, prions, viruses) capsule*, SiO_2 can cause lung damage if silicosis (white lung pneumonia, die 10 years earlier) develops due to discarding capsule (people who discard caps to ingest powder in a smoothie or spoon etc) or regurgitating and inhaling silicon or getting dry mouth during a nap that makes silicon throat traces taken before nap travel into the lungs. Toniiq sells Chinese Gly packed in USA at 73$/lb with subscribe, same price Carlyle has for 7.3 lb. If a brand is contaminated with cyanide, the body will react by increasing the pulse and even blood pressure in order to compensate for the lack of oxygen consumed by the cyanide binding to here iron instead of oxygen, so if upon buying glycine you notice pulse rise each time without other possible explanations, it can simply be a bad brand, discard the bottle or test it for cyanide. Most glycine on Amazon is made in China, so you have to trust the QC. Millions of Amazon frauds write made in USA at times on their bottles, but the caps or bottle and testing of final product are made in USA not the powder. Ask them where the powder is made, not the caps. Glutamine pills (which shouldn't be used by those with cancer as cancer can feed on it) are used for boosting cellular gluta-thione (the master antioxidant in all cells), but glutamine is free of cyanide, since it's made by C. glutamicum fermentation. Glukus means sweet in Greek, glucose fattens, hence glutton. Cyanide binds to hemoglobin iron, prevents oxygen transport, so skin turns BLUE, or Cyan, hence the name Cyanide. Blueberries gave anthocyanins the name. Gly is often converted to glycolic acid via enzymatic steps, which can cause (in a few) calcium oxalate kidney stones: H_2N-CH_2-COOH + H_2O = HO-CH_2-COOH (glycolic acid) + NH_3. Then, HO-CH_2-COOH is oxidized to oxalic acid HOOC-COOH, which becomes kidney stones $Ca(COO)_2$. Monitor urine quality if taking magnesium glycinate or any Gly, to avoid death by kidney failure, especially if you have Primary Hyperoxaluria Type 1 or renal tubular defects. In most people, small or moderate Gly intake is kidney protective, but in larger doses, the risks rise. High Gly can also cause distortions in metabolisms of other amino acids, so be increase dose slowly.

► ► 12.4.53. α-LIPOIC ACID ALA (nerve repair, neuropathy, brain protection) ◄ ◄

Some labels have only 10% or less of label claim, so don't buy from odd companies, use established ones. Only the R-enantiomer (sold on Amazon) is biologically active in humans, and present in diet of 1 billion years of human ancestors and humans, so it's safer to eat only R to prevent the S doing unintended damage the body can't handle well. ALA is produced in the liver, heart, testis for use by mitochondrial enzymes. ALA endogenous synthesis declines with age, as with many other compounds. Most dietary ALA comes from meat, spinach, broccoli, tomato, but the body produces most of it. ALA was used in 1966 to treat diabetic neuropathy☺☺☺ and liver cirrhosis, due to noticing low serum ALA levels; later it was used for heavy metal detox, for preventing glaucoma. If you buy pills, the powder is very throat irritating, so mix it in a smoothie (not mouth), to dilute its corrosive effects and then eat other foods after, or much safer, swallow

a capsule or take 100 mg out of a 600 mg cap and place in a tiny cap from another thing you used that day to swallow if you don't want to use 600 mg. Lipoic *causes gas above 40 mg intake.* It can lower blood glucose too much for some, leading to fainting, unconsciousness or death during sleep, etc, so only take tiny amounts if blood sugar is ever low, maybe 50 mg. Low blood sugar can lead to dry eyes too, and organ damage, due to depriving lacrimal cells of fuel, so be careful with doses, since during sleep we get 8-14 hours or no eating sometimes, and it can get really low glucose impairing the normal body repair. Spinach, tomatoes, and especially broccoli contain ALA, which chelates lead, mercury, cadmium, arsenic. ALA is the great antioxidant recycler that becomes DHLA (dihydro lipoic acid), which then takes oxidized vitamin C, E, CoQ10, thioredoxin, glutathione and produces their reduced forms which can then trap specific free radicals. This reduces the need for 1g vitamin C intakes (for eliminating heavy metals from blood). DHLA goes back to ALA and produces cysteine, used to generate new glutathione (the limiting amino acid for GSH synthesis); ALA thus restores former GSH, creates new GSH ► BBRC 1995;207(1):258-64; GSH is reduced glutathione. ☺☺☺

GS/GSH is so important (the 'master antioxidant' in cells), its cell concentration is equal to that of glucose and potassium. At high doses ALA becomes prooxidant, so it may be better to take 150 mg max, unless neuropathy is severe and you can't walk due to leg pain, as we see MDs use 600 mg/day for neuropathy. AMR 2002;7(6):456-71 talks about ALA and mercury-glutathione complexes being the primary way the body eliminates mercury via urine and bile (feces), and how kidney ALA chelated heavy metals (that we try to eliminate after eating) can *move to heart, lung, liver, muscles, brain* (thus ALA is not ideal for frequent or high mercury fish eaters and people with amalgam). Since ALA binds a lot more than toxic metals and redistributes them from high concentration organs to the rest of the body, so it may cause local or global mineral deficiency (Zn, Fe, Mn are critical to life/longevity), and toxic rerouting away from urine-feces path back into the body, that cancel the benefits and can do more *damage* than not taking ALA ► "the tissues that concentrated the metal (blood, spleen, and kidneys in the case of methylmercury) had reduced concentrations, while other tissues appeared to have a greater concentration". This explains why sometimes ALA pills don't give great results and why it may be better to read more papers before deciding if and how much to take. Many eat 30-50 mg iron daily, 30-40 mg Zn, 10 mg Mn, etc, so when we take a lot of ALA, we bind these and become deficient or move them where they're doing damage. ☺☺☺

Mercury we ate from fish prior to being vegan or when having amalgam got stuck to proteins somewhere, the sulfur or Se usually, and damaged some cells. Now, those cells are damaged or dead, and will be so for decades. ALA can take mercury, lead, cadmium from there where it doesn't damage anything anymore (bones, teeth if amalgam fillings (or left over mercury after removal, though that is usually 10,000 times less exposure than eating fish, since it's not in

contact with blood and the white filling covers it, 10,000 times less exposure than the vapor we inhale daily when having mercury fillings) exist or fish is eaten), and damage/kill billions of new healthy cells (neurons, retinal nerve endings causing glaucoma or even blindness, etc, though usually ALA helps with glaucoma, *it may not* always *be so*), while excreting only part of mercury (DMPS lowered blood lead 15 times more than ALA in a study the paper discusses). I have not seen a study of 50,000 heavy amalgam and fish eaters who took ALA and had optic (easiest image to take, the only part of the central nervous system a doctor can see easily, after pupil dilation) and other nerve images taken before and after to see if ALA damages the optic nerve and retinal ganglions. Thus ALA can actually do more damage than good in a few people. In the *bone or teeth left over (after amalgam removed), mercury and lead are 'somewhat'* harmless in senescent cells, but in the eyes, heart or brain, they can create a catastrophe if newly arriving there (from kidney if we eat fish, from bones or other areas where it got stuck, etc if we don't). Mercury, *10 times more toxic than lead for neurons*, and lead become far more *toxic, due to synergy,* when combined and can cause sudden cardiac death not just glaucoma (which is fine, many lived to 100 and had glaucoma). Taking ALA is not a joke, since any fat soluble vitamin can be deadly if we overdose, so taking ALA would require taking less *vitamin* E and less CoQ10 (fat soluble), etc (ALA recycles E and CoQ10: high E can cause internal hemorrhage, high CoQ10 recycling can cause prooxidant effects, etc C and GSH can go into urine, E, CoQ10 not so much). That's why DMPS and DMSA are used clinically for mercury detox more in extreme poisoning or long-term accumulation cases: 86% rabbit renal mercury removed in 3 hours with DMPS. ☺☺☺

600 mg ALA pills led to ALA-iron complexes and "could trigger a condition of *iron deficiency anemia*" ► NH 2014;31(2):883-9. However, ALA can remove iron from the body, when it's dangerously high ► IJMS 2019;20(3):609. Let's say we have $Fe_2[DHLA]_4$ complex, so for 112 mg iron we got 832 mg dihydro ALA. To bind all iron from diet is not possible, unless eating ALA with every meal. To bind a lot of absorbed iron, say 5 mg/day would require only 40 mg ALA. ALA can deplete iron from serum ferritin, leading to low serum iron reserves or longer lifespan from lower ferritin, since iron can cause cancer, dementia when it accumulates. Now, compare 40 mg ALA with 600-1200 mg some people take without much thought for years, without doing many blood tests before and after, etc. No wonder a minority proposes only 20 mg ALA/day, not the popular 300-900 mg. Zinc deficiency is catastrophic, some live only up to 25 because of it. If making it to 70, we can get diabetes in no time from low zinc, fast aging too, as 300 enzymes depend on zinc, DNA repair, etc. Too little or too much ALA (and many nutrients) kills us 5-50 years early, each person needs a different amount, if any, to reach max possible lifespan. Very extensive research into one's vitamin/food intake is needed to arrive at a really informed dosage, and only if there is no better alternative chemical to do what you or an MD want to achieve with ALA. For fish eaters, N-acetyl-cysteine, the GSH precursor, or liposomal GSH (to

survive stomach acid) are safer than ALA. L-cysteine mercury complexes are another way body removes mercury that may be safer than ALA. ALA is used in treating, alleviating diabetes or high blood glucose, Alzheimer, cancer, cognitive decline, down syndrome: DMS 2014;6:80; BBA 2009; 1790(10):1149-60 says ALA is "a common ingredient in multivitamin formulas (Deva Premium, 15 mg ALA), *anti-aging supplements, and even pet food*. It's well-defined as a therapy for preventing diabetic polyneuropathies, and scavenges free radicals, chelates metals, and restores intracellular glutathione levels which otherwise decline with age... *In vitro studies show that ALA preferentially binds to Cu^{2+}, Zn^{2+} and Pb^{2+}, but can't chelate Fe^{3+}, while dihydro lipoic acid (DHLA) forms complexes with Cu^{2+}, Zn^{2+}, Pb^{2+}, Hg^{2+} and Fe^{3+}".* ALA taken without meals is absorbed better than with meals. Apparently, some got better results with DHLA, due to a higher affinity for mercury perhaps, but the in vivo literature for DHLA is not extensive. When we eat ALA, some of it becomes DHLA in the body. VO1995;111(4):6-8 shows DHLA helped improve visual function; other studies by the authors got better eye results with 150 mg vs 75 mg ALA. CEPP 2020;47(12):1883-90 presents studies on how ALA prevents dry eye, eye aging, retinopathy, glaucoma. TJEM 2016;240(3):209-14 shows ALA improves AMD (eye) patients' quality of life. Mice retina showed less thinning with early ALA intake ► JNI 2018;15(1):71. ALA decomposes at room temp, so try iherb.com and store in the fridge. Many papers (1, 2) say cyclodextrins medium carbs delay ALA decomposition. However, cyclodextrins were linked to odd side effects, so read 20 PubMed papers on each ingredient. ☺☺

►► 12.4.54. Acetyl-L-Carnitine (ALC): IQ boost, neuropathy, remyelination ◄◄

Some brands contain only 25% of label claim, so choose reputable ones. The body makes 10-35 mg (it declines with age) of carnitine daily and a part of it is turned into ALC in the brain. OVS 2009;86(2):E132-8 found dry eye patients tears had 3.27 µmol/L L-carnitine vs 8.94 in healthy tears, that's why Refresh Optive and other brands of artificial tears contain carnitine. "Hcy (homocysteine) was observed to induce ER (endoplasmic reticulum) stress, produce ROS and lead to cell death... ALCAR prevented these effects to a significant degree... ALCAR as an anti-cataract agent" MMR 2015;12(1):1145-50. Hcy causes cataracts. Neuropathy MDs give patients 1.5 g acetyl carnitine pills and 3 mg MeB_{12}, since MeB_{12} with carnitine promoted "cerebral mass growth, increased neocortical layers thickness, pyramidal neurons volume,... normal structure of neocortex" ► ZNPISSK 1989;89(2):82-7. Carnitine can produce TMAO in omnivores, but much less in vegans, so it is best to only take 0.5 g initially and monitor for plaque, since the official carnitine (studies done with the far less effective carnitine, not acetyl-carnitine, hence the poor results) NIH page has some warnings about a few studies in which LDL, TC, plaque rose, while in others LDL, TC, etc fell; omnivore need about it, since they already get enough from meat, only vegans usually benefit without the endothelium destruction of TMAO: even vegans need be careful since not all bodies react the same and we really don't know exactly if all vegans are

benefited by this. ALC is used to aid nerve repair after injuries and to prevent nerve issues, Alzheimer, vascular dementia, cognitive impairment, Parkinson, etc. The reason we use ALC and not plain carnitine is that carnitine is polar, while ALC is less polar and better absorbed by the gut. The nonpolar nature of ALC enables it to easily cross the blood-brain barrier to heal damaged neurons and boost IQ. The acetyl group makes it less polar and allows it to heal brain neurons fast. The NIH even has a special page dedicated to carnitine, if you want to learn more and add it to your vitamin set to boost IQ, slow brain shrinkage with age. Carnitine is found in meat and its name comes from the Latin word for flesh, carnis, same root as carnivore (meat eating animals), vorare to devour, voracious appetite (carnivore means flesh eater), etc. ALC remyelinates and regenerates neurons, acts as precursor for lipid synthesis needed for myelin sheath formation, increases myelinated nerve fiber density, improves nerve function. ALC boosts IQ because as we age☺☺☺, the myelin sheath, the fatty insulation around neurons,☺☺☺ thins thereby slowing down nerve signal transmission, reducing white matter integrity, slows cognition and processing speed, memory, and attention, making us "score lower on IQ tests". Amazon has many brands of ALC powder (cheaper than capsules) that you can scoop to get 0.5-1 g/day to regenerate neurons. Due to its positive effects on retinal cells (retina is an extension of the optic nerve), ALC can prevent glaucoma (blindness): "restores erythrocyte function... mitigating RGC (retina ganglion cell) apoptosis (death) and improving visual outcomes in glaucoma models" ► IOVS 2025;66(8):3457. In people with AMD, carnitine "improved four parameters of visual function, including visual field mean defect, visual acuity, foveal sensitivity and ocular fundus alterations... highest (carnitine) concentrations reported in the iris, ciliary body and the choroid-retina" ► DRD 2008:9 Suppl 1:3-14, the authors explained how carnitine helps dry eyes, leading Allergan to add levocarnitine to its dry eye Refresh Optive Mega-3 in 2017 for the first time ever. Perhaps, in the future, with the advent of the 13 types of Multivitamins based on decade of life, ALC will be added for all in higher amounts, if vegan and not eating meat, to help boost nerve health. ☺☺☺

► ► 12.4.55. 3 proteases: Nattokinase, Bromelain, Serrapeptase: dissolve clots ◄ ◄

Enzymes are heat sensitive, so when you order stuff from Bulk Supplements direct ship (not Walmart/Amazon local ship) in the summer, it loads on a truck of a carrier (FedEx/Amazon truck) that can reach 150°F for an hour (110°F common in Reno, NV, so inside trucks it gets far hotter, even 160°F) and render all nattokinase inert and useless, leading to science studies showing "it doesn't work" because of partial or total damage, plus 50,000 people dead as the nattokinase, etc didn't prevent a lethal clot, as MD promised them, all due to Jeff Bezos and the Amazon aristocracy. Utah Nutricost bromelain can reach 150°F during shipment by amazon, and it takes 2 hours at 150°F, 1 hot day of 90°F for the truck to get hot in the 1 week journey, so using Walmart for enzymes is advised as Walmart trucks run much cooler 120°F max and trips

last 2-3 times shorter. During a 3 week shipping and exposure to sun from LA to NYC or Miami, even in milder weather, exposure to 130°F for hours daily can essentially make it inactive 100%. Proteases are enzymes, as all enzymes end in ases, and prote means protein, enzymes that split proteins. Nattokinase is a serine protease, so it splits proteins near serine. Lipases are enzymes that split lipids, so bacterial lipases degrade tear lipids causing natural tears to evaporate in dry eyes. FCM 2022;9:964977 found "1,062 participants… safety at the dose of 10,800 FU/day after 12 months of oral… significant reduction in the thickness of the carotid artery intima-media (from 1.33 to 1.04 mm on average, or 22%) and the size of the carotid plaque (from 25 mm^2 to 16, 36%) was observed (see Table 4). No noticeable adverse effects". Nattokinase (NK) didn't change LDL, HDL, TC or plaque with 3,600 FU/day as Table 6 shows (most Amazon pills are 2000-4000, so use 275 mg of this powder to reach 11,000 FU (lasts 365 days) and see real effects). The pills have 5-10 times more rice powder, plus extra silica, magnesium stearate (that blocks NK absorption) and cost far more for 4 million FU units/year. At 10,800 NK, after 12 months, on average, NK raised HDL-C 16%, lowered LDL 18%, TC 16%, TG 15%. The carotid plaque size (CPS) fell in 66.5% of participants, common carotid artery intima-media thickness (CCA-IMT) fell in 78%, HDL rose in 89%, TC fell in 95.4%, LDL fell in 84%, TG fell in 85% (see these % in Table 3). Those taking vitamin K_2 got even better results for plaque reduction (Table 11), since K_2 prevents calcium buildup in arteries. Those who did > 5000 steps a day got better numbers than < 5000 (Table 7). Taking aspirin (or probably any blood thinner, like bromelain, omega 3s, garlic, cloves, flavonoids, polyphenols, ginger, etc) led to less plaque (Table 12), as thin blood clots less and plaque starts as a clot or thrombotic event usually. However, eating too many blood thinners can lead to hemorrhagic strokes, nattokinase/bromelain thin the blood and could cause strokes, so make sure (before taking these with some low protein food to act as cushion on your GI tract), that you have plaque to dissolve, so you don't destroy GI tract needlessly. There is no long-term study showing before and after video of colonoscopy, stomachoscopy and intestinoscopy that nattokinase on empty stomach doesn't injure the lining of the GI tract if taken as youtube MDs suggest. MDs often get excited, like we all do, neglecting potential side effects. Nothing comes without side effects, you just weigh the pros and cons, if plaque kills you, take it, but first take pic of the plaque via MRA or etc. Taking these proteases on an empty stomach as MDs suggest on youtube may damage the lining of the stomach, intestines and cause ulcers and ultimately cancer, as cancer develops from small injuries at times. They can also cause bleeding, a common side effect. A paper found daily garlic eaters removed 80% of plaque after 5 years (though garlic may damage the testes and fertility, lowering testosterone, in 100 g (big bulb) we get 181 mg Ca, 6.4 g protein of amino acid score 84, 31 mg vitamin C, 2.1 g fiber vs 4 mg C in apple). If smell an issue use NK + aged garlic pills (0% odor) or garlic powder (4 times less odor). Faster clot dissolution happens in this order (matches protein shell thickness around RBCs): O > B+ > A+ > AB+ > B- > A- > AB- ► SR 2026;16:7690. ☺☺

Plaque is the # 1 killer, it's how all organs die due to lack of blood flow that brings nutrients, oxygen and removes toxins. MD explains that he uses 20,000 FU (fibrin units) NK on an empty stomach for 12 months and 10,000 FU after that for maintenance for those over 45, to dissolve existing plaque and prevent new plaque. The issue today is people take NK with food and it simply cleaves the protein we eat, not the arterial plaque and they take 2,000 FU daily, 10 times less. ZYXZZ 2017; 97(26):2038-42 study of 76 people, showed NK 6000 FU removed 3 times more plaque in 6 months than 20 mg statins (simvastatin) (36.6% vs 11.5%), without the statin side effects: blindness, diabetes, 50% drop in GLP-1 see Fig 1, lowest right diagram, causing weight gain, poor glycemic control, muscle pain due to "> 30% loss of skeletal muscle mitochondrial oxidative phosphorylation capacity.. atorvastatin (i.e., 10 nM).. sufficient to inhibit (mitochondria) complex IV by > 50%" (incl heart muscle probably, thus weak heart, heart failure, brain damage via mitochondria damage). NK alone was able to raise HDL. The NK group CPS fell from 25 mm^2 to 16, 36%, CCA-IMT fell from 1.13 to 1.01 mm. The statin group CPS fell only 11.5%, not 36%. The 1st study above had a 21.8% CCA-IMT drop @ 10,800 FU/12 months vs 2nd study's 10.6% drop @ 6,000 FU/6 months. Statins have a real issue, they cause memory problems in seniors, that vanish once people stop statins and return once they use statins again: "Both statin and nonstatin LLDs were strongly associated with acute memory loss in the first 30 days ... in users compared with nonusers" ► JAMA 2015;175(8):1399-1405. This confirms that to achieve results, you need at least 10,000 FU and many MDs use 20,000 FU. Some papers praise red yeast rice, but if contaminated with mold, it's deadly and kidney/liver/muscle destroying, potentially causing death via sepsis if you get mycotoxin citrinin. There are 100s of ways to raise HDL and thin the blood without yeast/fungi which killed many people, damaged their kidneys. Red yeast rice contain monacolin K which is lovastatin, one of the fat soluble statins (like atorvastatin, simvastatin (methyl-lovastatin) that is far more dangerous than water soluble statins (rosuvastatin known to cause muscle wasting and diabetes like other statins, pravastatin), because it lowers brain cholesterol. Yes, a natural compound is one of the statins. 25% of the brain is cholesterol on a dry weight basis, so when lowering its brain endogenous production we can cause dementia, low IQ, 9000+ brain diseases, blindness via optic nerve.

NK is a dietary ACE inhibitor that splits into peptides that inhibit the angiotensin-I-converting enzyme (ACE), which lowers blood pressure (BP). Today, many people take BP pills ending in pril, that inhibit ACE. When heated or digested NK produces fragments that inhibit ACE, with some research showing up to 87% inhibition in a lab ► FF 2012;3(6):674-8. Non-O blood types have a thicker blood that clots faster. One way to dissolve clots that formed or prevent clotting is NK (a serine protease) present in the Japanese fermented soy called natto. The pineapple section already presented the bromelain enzyme present in unheated raw pineapple (absent in canned pineapple) and its benefits for dissolving amyloid protein entering blood from liver and then

trying to cross into the brain. Dementia is prevented by the bromelain (a cysteine protease) ability to splice amyloid protein before it gets to the brain. NK is a stronger and more targeted fibrinolytic (anticlotting) enzyme than bromelain, it's a protease that breaks down fibrin (the clot forming protein) better than the body's own protease called plasmin. MDs sell nattokinase and bromelain together sometimes, but on Amazon you find each much cheaper. NK is better at clot prevention than ginseng, garlic and bromelain, while bromelain is better at reducing inflammation. NK directly targets fibrin being a fibrinolytic, whereas bromelain acts more broadly as a general proteolytic enzyme that simply helps us digest protein faster, splits blood inflammatory proteins (amyloid, etc). Pills often combine the two proteases for maximum fibrinolytic support, especially in those with heavy plaque. NK and bromelain are used for anti-spike protein pills in those with long COVID. The 320 papers on spike protein damage are shocking. See Mol 2022;27(17):5405 on how NK destroys the COVID19 spike protein☺☺☺ and the nattokinase video on how it dissolves old clots and doesn't prevent new clot formation. NK lowers the shear rate of blood, which causes arterial injuries, regardless of LDL level. Cholesterol doesn't cause plaque, but the sharpness of the erythrocytes and blood itself. Beware the few fraudulent companies that have zero enzyme in their NK pills. The cheapest safe bromelain (no heat to inactivate it) is Walmart 227g/32$, lasts 2 yrs at 333 mg/day to boost protein digestion, lower inflammation, achieve all goals of the pineapple fruit, without the calories, sugars. Some bromelain sellers contain 0-10% of label claim, as this list shows. The cheapest NK is one of the powder forms, like Bulk Supplements 100g of 40,000 FU/g so 4 million FU total (NK expires in 2 years, so this lasts about 1 year at 12000 FU/day is 365×11,000 = 4.015 million FU, fibrin units or fibrinolytic units) or 250g of 20,000 FU/g so 5 million total FU. To get 11,000 FU as in the paper above, we need 275 mg of this powder of 40,000 FU/g. Do more research before using it, ask a few MDs, especially if you have any heart disease, as it may thin the blood too much and cause bleeding. NK works better than statins at removing plaque. If non-A blood type you may need a lower than 11,000 dose if any bleeding occurs, maybe 7,000. Some pills mix NK, bromelain, serrapeptase (serrapeptase is like bromelain, not targeting fibrin specifically, but amyloid, scar tissue, arterial/body/brain scar tissue, proteins: 60$/2yr). However, bromelain is better at reducing arterial inflammation than serrapeptase, so bromelain + NK seems enough for most, though MDs sell NK+serrapeptase (at prices 3-4 times higher than if you buy powders yourself). A video explains how aspirin is ineffective at dissolving atrial fibrillation (AF) clots, how ginger, nattokinase, garlic, natural blood thinners (weaker than aspirin, drugs that target AF clots) are less effective than drugs for those with high clot risk who need more blood thinning. If a heart attack, stroke happens you need to chew a 325 mg aspirin, drink it as powder in water, to dissolve clot in 5 min or you die in 20 min: in a crisis eating nattokinase, ginger won't help. ☺

► ► 12.4.56. Citrulline (arginine precursor): make NO, lower blood pressure ◄ ◄

Among all watermelon types, citrulline content varies 300 fold (see next paragraph). Unlike beets, kale and other nitrate rich veggie nitric oxide NO boosters, citrulline bypasses the mouth, the liver, being converted to arginine in the kidneys, which is then used by endothelial cells to make NO via NO synthase: 2 H_2N-C(=NH)-$(CH_2)_3$-CH(NH_2)COOH (L-arginine) + 3 NADPH + 3 H^+ + 4 O_2 ⇌ 2 H_2N-C(=O)-$(CH_2)_3$-CH(NH_2)COOH (citrulline) +2 NO + 4 H_2O + 3 $NADP^+$. Thus, citrulline is recycled and keeps helping our brain/body, as the NO is used to relax, dilate blood vessels, lower blood pressure, improve microvascular circulation, prevent stroke, neuropathy, brain aging, organ failure. In the nitrate rich veggie pathway, NO production stops once out of nitrate, it's not sustainable as with citrulline. So, you don't need to worry about mouthwash that is strong and kills NO bacteria. If mouth NO bacteria die, nitrates from beets, kale can't convert to NO, since NO_3^- nitrate needs to become NO_2^- nitrite first with the aid of nitrate reductase produced by the tongue bacteria Veillonella, Actinomyces, Rothia, so it can then become NO in the stomach via acidic pH: 2NO_2^- + 2H^+ ⇌ NO + NO_2 + H_2O and 2NO_2^- + 2H^+ + Ascorbate (vitamin C) ⇌ 2NO + 2H_2O + DeHydroAscorbate. Nitrites immediately become nitrous acid NO_2^- + H^+ ⇌ HNO_2, which reacts with vitamin C, so you can also write 2 HNO_2 + Asc ⇌ 2NO + 2H_2O + DeHAsc. The NO rise from kale, beets, etc is pathetic and negligible. Keep your teeth healthy. Most use such strong mouthwashes, that kale doesn't matter. If hypertensive, some eat 2 g citrulline/day (32$/kg, lasts 2 yr at 1.35g/day). Citrulline works better if taken before meals on an empty stomach. NO endogenous production is 100% @ age 25, 50% @ 40, 35% @ 50, 15-25% @ 60, 15% @ 65+ etc so the 13 vitamin formulas for the 13 age brackets need to raise citrulline level.

Amazon citrulline pills are 1.5 to 3 g. 3 g is equivalent to eating 1-66 lb of red pulp watermelon (or 300 lb for some yellow pulp cultivars) depending on subspecies. I did eat 12 lb/day rarely, though usually 3-7 lb daily for years. Citrulline is only for people with high blood pressure BP; the hypotensive people may enter coma from low BP; eat less when BP is fine. Watermelon red flesh is the richest fresh source of citrulline, with 1 g of citrulline being found in 0.6 to 4 lb of watermelon pulp, in a 2005 US study: 1.8 mg/g on average for seeded and 2.4 mg/g for seedless (Table 1), with 1.9 mg given as global average in the abstract☺☺☺ ► JCA 2005; 1078(1-2):196-200; the seeded ranged from 0.5 in tender sweet orange to 3.6 in summer gold, 3.1 Jamboree; seedless ranged from 0.7 Trix 313 to 3.0 Orange Sunshine Summer Sweet 7167 & 3.5 Solid Gold & Hazera SW1. Table 2 shows the red flesh watermelon had only 1 mg/g, yellow flesh 3.5 and orange flesh 1.8. JAST 2025;27(3):145-56 reports on page 150 that they created 55 hybrid watermelons and some had 0.3 mg/g citrulline, while others 6.1 mg, so the variation may be even more dramatic, i.e. to get just 3 g of citrulline in an Amazon pill, you need 22 lb/10kg of 0.3 citrulline watermelon daily. Moreover, Farma 2020:68(4):679-86 found that the citrulline in yellow flesh watermelon (page 684, Table VI) varieties (last 2 of the table) CLRS 0.11 mg/g, CLRL 0.02 mg/g and the red flesh CLLM (Lamezia Terme, Italy) variety 0.1, so 30kg/66lb daily needed

for 3 g citrulline. If you ate CLRL yellow, you need eat 150kg/330lb daily. So you see how you can go from 0.02 to 6 mg/g, a wild difference that shows once again, how unreliable foods are for nutrient intake and why we need eterni powder foods.☺☺☺ Unless you send it to a lab, you can't know. That's why the Immortalist Party, riding on the healing waves of the Immortalist Anthem of Infinite Compassion for All, will centralize all into 11 companies enabling us to replace all watermelon cultivars in 90 days with the one with highest lycopene and citrulline to help all get the 2 key nutrients with only 300 g watermelon, not 300 kg, by a wonderful hybridization program, that's the power of Eterni Foods Inc Unity. Later on, when all foods become powder Eterni Foods, all get the best nutrition ever without agriculture, to enjoy a happy 4000 year lifespan in the transition to the Resplendent Magnificent Bounteous Radiance of Eternal Immortality *for* All☺☺☺. Citrulline is much more easily absorbed as powder than watermelon and avoids us overdosing on sugars, a big no for diabetics. When I ate 4-12 lb of watermelon daily (I did that for 14 years), the circulation was better and blood pressure was lower than when eating only 1-3 lb (5 years), but today, citrulline powder allows you to avoid fructose overload (causes belly fat, etc). Citrulline is pure gold, most people don't realize how much it impacts circulation and body aging, since 80% of blood vessels are capillaries and they feed various areas of the body, and brain. Stiff tight vessels provide less nutrition and shorter lifespan. You literally die faster without citrulline as you starve cells of nutrients and oxygen.

Citrulline created NO prevents platelet aggregation (clot formation), so it prevents stickiness. NO relaxes the smooth muscles in artery walls, widening them to increase blood flow, oxygen, and nutrient delivery. People have tried to reduce blood stickiness, clots, plaque created by the COVID spike protein in natural ways, with *vitamin E, ω3, garlic (even 1 lb of garlic every 3 days has no impact vs citrulline) natural blood thinners*, but none of these natural "blood thinners" come even close to citrulline, in ending blood stickiness and dramatically improving micro circulation (legs, head, etc). Covid19 vaccine spike proteins increase blood clotting and damage the body (320 papers on that), so it's good to eat citrulline. Nattokinase is another spike protein effect killer, it's a protease that splits the spike proteins. A super strong immune system (D3) doesn't need endless vaccines every 6-12 months for COVID/flu. Queen bees live to 4000 human equivalent by better nutrition, and so can humans, you just need to figure out the best way to avoid the aging of the immune system, etc… If you're healthy, you never get sick from the flu for decades, as we age, immunity shrinks, since we don't eat D_3, etc. Likewise, we would all be healthy until age 2000 (equivalent of 40 today). It's impossible to eat 5-10 lb of watermelon daily without some negative long-term effects on insulin resistance, but easy to take 1-3 g of citrulline. One of the best natural compounds for preventing plaque is citrulline☺☺☺, which is metabolized to arginine to produce nitric oxide N=O in the blood vessels to relax them, leading to lower blood pressure, less plaque from stiff arteries (that get crushed by high BP: BP causes

small injuries that start clot events and the formation of plaque). NO boosts immunity because it's a chemical weapon (besides free radicals) neutrophils use to kill microbes that can start arterial plaque: for example P. acnes creates arterial pimples that develop into plaque (see pic of acne on coronary artery) and much arterial plaque contains staph and P. acnes bacteria, so the stronger the neutrophils and immunity, the faster they disinfect the blood of all proteins and microbes, fungi, molds, etc that start plaque. Neutrophil NADPH oxidase generates superoxide O_2^-, etc to kill pathogens: NADPH + $2O_2$ ⇌ $NADP^+ + 2O_2^- + H^+$. Neutrophils express inducible nitric oxide synthase (iNOS) when activated, which produces N=O, which reacts with superoxide $O{-}{-}O^-$ (O_2^- from NADPH oxidase) to form peroxynitrite: N=O + O_2^- ⇌ O=N-O-O^-, a highly toxic Reactive Nitrogen Species (RNS) that damages bacteria. NO regulates neutrophil functions like apoptosis, NETosis (Neutrophil Extracellular Trap formation), where neutrophils release DNA nets (extracellular fibers made of mostly DNA, plus some fibrin, histones, platelets, coagulation factors) dotted with antimicrobial proteins to trap and kill bacteria. There is an issue with too much NO being produced, that could start killing healthy cells by killing mitochondria, so if you feel tired, etc, lower citrulline intake to see if anything changes. Myeloperoxidase (MPO) is another neutrophil killing agent that generates HOCl ($H_2O_2 + Cl^- ⇌ HOCl + HO^-$) and tyrosyl (from tyrosine units of proteins) radicals to kill pathogens and can use NO too. NO can potentiate the killing effects of hydrogen peroxide H_2O_2 and hypochlorous acid HOCl. The highest natural source of citrulline is watermelon. The pill citrulline is made mostly by biochemical or chemical synthesis in big labs, not from watermelon. However, you need to eat too much fructose (which causes dementia) from melon to get 2 g citrulline. Arginine itself is degraded in the gut before absorption, while citrulline is not degraded much at all, makes it to the kidneys where it is converted to arginine to later produce more sustained NO levels and thereby more flexible arteries. Thus, citrulline is superior to arginine. Citrulline is found on many cardio pills the more aware (not brainwashed by Big Pharma) MDs market, to help the vascular system and the brain too, to prevent strokes, infarcts. By the time arginine gets to the endothelial cells, it's catabolized into other stuff, that doesn't happen to citrulline. Citrulline also helps restore leaky gut caused by high stress or intense exercise which activate the fight-flight response and the move of blood to arms and legs, instead of the gut ► MSSE 2014;46(11):2039-46. When the gut gets no blood, it fails to protect the blood from toxins and microbes. Citrulline thus is a must for those who don't soak grains, legumes they eat, which are not soaked if bought, it aids the gut healing damaged by legume/grain lectins, together with the glutamine, especially after long fasts. Stress makes some throw up, sick in the stomach, develop ulcers due to this lack of blood flow to repair the gut lining, stress thus can kill slowly the entire digestive system, cause dementia via blood brain barrier damage by the toxins, microbes the gut allows in the blood.☺☺

►► 12.4.57. PQQ (a 'B vitamin' making new mitochondria, reducing violence) ◄◄

PQQ, the "relative" of CoQ10 used to repair rescue cells with dying mitochondria

Like lithium, boron, ω3, theanine, B1-12, D3, Mg, Zn (neurons need it), PQQ lowers oxidative stress, arterial plaque (K2, etc) and brain inflammation, boosts ATP production in mitochondria so neurons can work so anger never emerges, boosts brain blood flow via less plaque (no more blockages like this pic leading to endless family fights), leading to less violent crime. Violent behavior is often caused by malnutrition causing brain malfunction, not just "celebrity music, movies, melody, lyrics and concerts fueling 90% of violent crime since music defines civilization, emotion, ethics" by destroying all ethics in society. Now parents know why kids can be violent, no ADHD, but mere malnutrition due to a spoiled generation of vanity who spends 2 trillion/year on junk and ignores child and preconception and child acoustic nutrition, poisoning kids in fetus stage with infernal music, supporting genocidal singers and "artists" instead of real reform of the 11 companies granting all serene ethical music. Honest people take criticism, reform self, are rewarded by the universe. PQQ helps create new mitochondria, lowering CRP, plaque formation, LDL. It's more present in the adrenal glands. As new mitochondria form, cells can survive longer. "> or = 1000 ng PQQ/g diet had 8 pups/litter compared with 4-5 pups/litter ..< or = 300 ng PQQ/g diet. Of the pups surviving to weaning, 8 of 10 survived when PQQ was added to the diet (> or = 300 ng PQQ/g diet) compared with 4 of 10 in the PQQ/deficient group (<100ng)." ► JN 1994;124(5):744-53. Similar results were found in other studies, like 2003. A Nature paper proposed PQQ as a new "B vitamin" (helps the brain). "When PQQ is omitted from a chemically defined diet fed to mice and rats, various systemic responses are observed including growth impairment, immune dysfunction,☺☺☺ decreased reproductive performance, and reduced respiratory quotient." ► BBB 2016b;80:13-22. "Broilers (chicks) fed 0.2 mg PQQ.Na_2/kg diet gained more carcasses at day 42, and had lower lipid peroxide malondialdehyde (MDA) content and higher total antioxidant power in plasma. The results indicated that dietary PQQ.Na_2 (0.2 mg/kg diet) had the potential to act as a growth promoter comparable to antibiotic in broiler chicks." ► Ani 2015;9(3):409-16 (without poisoning people with antibiotics that cause immune collapse, gut dysbiosis, antibiotic resistance). Low MDA is the goal.

"Mice fed a chemically defined diet devoid of PQQ grew poorly, failed to reproduce, and became osteoarthyritic. Moreover, severely affected mice had friable skin, skin collagen that was readily extractable into neutral salt solutions, and decreased lysyl oxidase...PQQ plays a fundamental role as a growth factor or vitamin...PQQ deprivation caused a net decrease in lysyl oxidase to 10 to 30% of the normal values for skin.. About 20 to 30% of mice, for which no PQQ was detectable in food or excreta, had ... friable skin, mild alopecia, and a hunched posture...Of a total of 40 mice assigned to PQQ deficient diets (maternal dams plus the offspring in four separate litters), eight died by week 8 of deprivation. Three of these deaths were due to an aortic aneurysm or abdominal hemorrhages. Diverticuli were also common in the deficient

animals. In contrast, only one of the mice in PQQ supplemented groups (33 total) died during the course of the experiments... attempts to breed young female mice, which were fed the PQQ deficient diet for 8 to 9 weeks, resulted in either no litters or in pups that were immediately cannibalized at birth. Such responses or behaviors were not observed for female mice fed the supplemented diet (so PQQ helps brain mitochondria and human parents to be less mean to kids, add PQQ to violent crime offender multivitamin)" ► Sci 1989;245(4920):850-2. CoQ10 aids old mitochondria, while PQQ helps create new ones. CoQ10 is made by our body, PQQ is not, so PQQ needs to be present in diet or multivitamin for optimal health. PQQ lowers serum PCSK9, similar to pharmaceutical inhibitors, by downregulating PCSK9 expression and reducing LDL cholesterol, triglyceride, and VLDL levels by keeping LDL liver receptors alive. If we read chapters 11, 12, we realize many IVF procedures, maybe 95% of them, would not happen, if lazy parents would take some extra nutrients to boost health of child to be born, and by extension, their fertility. Egoism is rewarded by God with 10% dead kids, since IVF kids are a little dead from the start, if embryo is not fresh, but frozen. Nutrition cures anything almost, and can give you even 4000 year lifespans, but devils only know heavy metal, classic rock and other sewer rap/pop music. Last year PubMed published many PQQ benefits papers, since mitochondria are part of every cell: PQQ may prevent AMD, glaucoma, dry eye.☺☺☺

►► 12.4.58. Berberine (lowers LDL/Lp(a), is a PCSK9 inhibitor) ◄◄

Berberine is extracted from barberries: "5.2-7.7 % berberine was detected" in barberries, popular in the Middle East and local Middle East stores. It can lower LDL by 20-50 mg/dl (LDL goes from 90 to 50 etc). It tastes horrible, so it's better to buy caps or order dried barberries. It's used to treat acne, since it lowers blood glucose as much as the #1 diabetic prescription, metformin, without the side effects. Acne is often caused by eating too many high glycemic index foods, like watermelon, so berberine brings glucose down, ending the acne; I did an experiment to stop berberine for a few days (since I started taking it Feb 15th 2026 to see effect on LDL: it does lower LDL a LOT, in combination with other LDL lowering natural plant supplements) and I had the biggest forehead acne breakout in 5 years at the start of May 2026 (possibly due to a hat worn during tree trimming that rubbed against my forehead), though I also took less zinc, 225 µg iodine (instead of 1500 µg the weeks before) and no B_5 at the time first time in 2026, so it could have been the lack of B5 (500 mg), suddenly lower zinc (50 mg instead of 120 before) intake that caused or contributed 50% to the acne. I stopped taking it in June, due to HDL going down too much, not just the LDL. Acne can be caused even by eating too many lentils (or any protein source) which turns on mTOR, which produces more sebum and causes pimples, so don't overeat protein during major exercising to trim trees around the house, etc, if you're prone to acne. It's a bitter taste, yellow-orange powder that can cause gas first 2 weeks if > 1 g. Many brands have 0-10% of label, see clip too. Berberine inhibits AGE formation

► EJP;654(3):320-5. NEU1 is a lysosomal sialidase that helps break down even brain amyloid proteins. Berberine is a NEU inhibitor that extended the lifespan of chemotherapy treated mice 52% and naturally aged mice 17% ► AC 2019;19(1):e13060. Millions take berberine 200$/kg to lower lipids: TG fell 35%, TC 29%, LDL 25% after 90 days of 0.5g twice daily via a unique mechanism, different from its anti-flu effect. By lowering PCSK9 levels (that attacks LDL receptors), berberine increases the number of LDL receptors on liver cells, improving the removal of LDL. A "NEU1 inhibitor (neuraminidase1 inhibitor, like flu medicines, in this case the known 2-deoxy-2,3-didehydro- N-acetylneuraminic acid (DANA) that prevents the degradation of extra cellular matrix made of collagen) extended lifespan by up to 17% in ...mice" ► NA 2025;5:2380-98. Perhaps the NEU inhibitors extend lifespan of people too. Likewise, 4-40 master regulators, may change genes of fetus so the new human lives 50x longer to 4000. However, berberine inhibits the CYP3A4, CYP2D6, and CYP2C9 liver enzymes, which are responsible for metabolizing most prescription drugs, acting like black pepper used to increase curcumin absorption 20x. Bergamot also inhibits these detox enzymes and bergamot can lower LDL by up to 55 mg/dl in some studies, more than berberine. If berberine taste is bad, try barberries at the store. Artichokes also lower LDL, so give them a try. Berberine is sometimes paired with piperine (black pepper) to further amplify this liver detox enzyme inhibition, slowing down berberine's breakdown and increasing its systemic presence. Thus, it is not a good idea to take berberine in doses of 500+ mg for long periods, always take a break, like 1-2 weeks without berberine or berberine 500 mg every 2 days to give the live time to detoxify medicines or any other compounds. For example red rice yeast contains lovastatin naturally, a statin drug and all foods we eat contain things we need to detoxify, eliminate via the liver, even excess of some vitamins etc. Thus, if you overdo berberine, you may end up accumulating toxins you don't want there, so be very careful with berberine and definitely sty away from piperine, as that only makes the inhibition of liver detox enzymes by berberine even stronger. The reason many got liver damage from turmeric was often due to using piperine and blocking the activity of some enzymes. The liver is the most important organ almost, without it you die fast.

►► 12.4.59. Thymoquinone (lowers LDL/Lp(a)) ◄◄

It's a very simple quinone (6 ring), see structure, obtained by the reduction of hydroxy-thymol to a biketone. The black cumin oil active ingredient that lowers LDL, prevents cancer is TQ thymoquinone. In people getting 200 mg of 5% TQ oil (10x what you buy from cold pressed Amazon caps of 0.5%), LDL dropped from 114 to 95. Thus, one cap of 1 g, you may see half the effects, maybe a 8 mg/dl drop in LDL. This oil is best bought in a pitch black bottle, softgels (not liquid, as oxygen ruins it with each opening) to prevent oxidation, being the main concentrated source of TQ. The oil contains 60% LA (essential ω6 we get from walnuts, etc), 25% OA, 11% palmitic, 2% stearic, 3% others. TQ is also concentrated 60:1 by supercritical CO_2 extraction (40-

50°C max so TQ is not oxidized), to yield a 20% super concentrated dry cap of 20% TQ (25 mg in 125 mg capsule), free of oxidized oils, that you can eat with your own ω3 pills (fat soluble, need some fat with it to absorb) or walnuts to avoid oxidation, or you could even replace walnuts with this for LA and some chia oil for ω3 ALA. The 0.5% oil cap of 500 mg will have only 2.5 mg, 60 caps, this one has 120 caps of 25 mg each, so you get 20x more TQ if label is accurate. TQ is a candidate for Eterni Foods powder formula for living to 4000. TQ inhibits NF-kB (nuclear factor kappa-light-chain-enhancer of activated B cells) pathway that normally raises LDL/macrophage foam cell formation, plaque formation/rupture, stroke/infarct risk. TQ does this by suppressing IkBα kinase (IKK) activation (first step of NF-kB pathway), preventing p65 subunit phosphorylation and nuclear translocation keeping NF-kB in an inactive state in the cytoplasm. In other words, TQ prevents p65 from binding to DNA of the promoter regions of target genes, from activating transcription of pro-inflammatory and anti-apoptotic genes. This action blocks pro-inflammatory cytokine expression (TNF, IL-1,6, etc) and induces apoptosis in cancer cells, explaining TQ antiinflammatory, anticancer effects. TQ inhibits angio genesis (which helps cancer tumors and plaques to grow), induces apoptosis by downregulating downstream proteins like VEGF, Bcl-2, and c-Myc. TQ also activates the Nrf2/HO-1 antioxidant pathway to combat inflammation. TQ triggers the PPAR mechanism to fuel LDL liver catabolism, lowers VLDL synthesis, reduces small dense LDL/ApoB. TQ is a HMG-CoA reductase inhibitor, like statins, so make sure you get CoQ10 pills if using TQ since CoQ10 synthesis will fall, as CoQ10 is critical for mitochondria and staying alive (heart concentrates CoQ10). TQ has effects similar to fibrate drugs used to lower LDL, acting as a peroxisome proliferator-activated receptor (PPAR) agonist. While fibrates are strong, selective PPAR agonists, TQ seems to be a mild, multi-PPAR modulator (PPAR-α, PPAR-γ), offering LDL reduction and antiinflammatory, antidiabetic effects. ☺☺☺

Why is Nrf2 important, we always hear about it in papers and articles? Nrf2 (Nuclear factor erythroid 2-related factor 2) is a master transcription factor regulating cellular defense against oxidative stress, inflammation, and metabolic dysfunction. Under stress, Nrf2 detaches from its inhibitor, Keap1, moves to the nucleus, and activates Antioxidant Response Elements (ARE), upregulating Heme Oxygenase-1 (HO-1). HO-1 degrades heme, producing antioxidants (bilirubin, CO) that protect cells. ARE are cis-acting DNA promoter sequences (5'-TGACnnnGC-3') that regulate the expression of cytoprotective, antioxidant, and phase II detoxification enzymes. Nrf2 protects healthy cells by activating detoxifying and antioxidant genes (e.g., glutathione). Nrf2 the primary regulator of redox homeostasis, inducing enzymes that neutralize free radicals. It reduces inflammation by inhibiting inflammatory markers (e.g., IL-6, TNF) in colitis, encephalitis. Nrf2 helps protect nerves, brain cells, making it a target for Alzheimer's and Parkinson's disease research. Nrf2 boosts detoxification enzymes to protect cells from harmful electrophiles. Nrf2 is activated by phenolic acids/polyphenols, sulforaphane, ω3, exercise, and calorie restriction.

►► 12.4.60. Quercetin or Q (lowers LDL/Lp(a), is a PCSK9 inhibitor) ◄◄

Quercetin, or Q in science papers, is 3,3',4',5,7-pentahydroxy flavone (3,3'-dihydroxyapigenin), a well known greenish tasteless flavonoid and senolytic compound that kills senescent (dying cells) that pollute healthy cells with deadly chemicals. However, it is not as good a senolytic as fisetin 66$/100g, the #1 senolytic. The research is more nuanced, some say too much senolytic can kill good cells that extend life. Quercetin is 5 times cheaper than fisetin: 57$/500g. Both quercetin and fisetin formulas, scientific names, general class, food content, etc are in the AGE flavonoid section. It's a good antiviral: Inhibits Influenza A virus (IAV) entry☺☺☺ ► Vir 2016;8(1):6 & SWJ 2004;4:811-37 (radish). Quercetin/100g is in canned capper 173 mg, radish leaves 70 mg, purple onion 39 mg (hence onion for cold/flu), kale 23 mg, apple juice 0.04-2.7 mg. It inhibits rhinovirus (common cold) replication in vitro/vivo AR 2012;94(3):258-71, kills coxsackievirus B5/poliovirus 1 viruses (fresh *apple juice has quercetin glycosides in the tannins and these kill the viruses, store juice has no quercetin (degrades with heat/light) so it doesn't work*) ► AEM 1978;36(6):798-801. All polyphenols need to be away from light and heat to preserve efficacy. Due to aiding body repair and having a relaxing effect, it may be better to take it before bed, though some may find it too stimulating. It's one of the most well known polyphenols, added to a million supplement formulations. Avoid quercetin brands that got less than stated, the powder that is worth taking if you don't eat much produce. Most US quercetin is made in China from Sophora japonica flower bud, Bulk Suppl process diagram shows 10 steps: grinding, solvent extraction via alkaline H_2O, acidification, crystallization, filtration, drying, rutoside trihydrate, hydrolysis, filtration, drying. Quercetin, the most abundant dietary flavonol, found in cabbage, onion, cauliflower, lowers blood pressure ► JN 2007;137(11):2405-11. Cactus pear quercetin, (+) dihydroquercetin, and quercetin 3-methyl ether protect neurons *against oxidative damage* ► BR 2003;965(1-2):130-6. Quercetin, isoquercetin, rutin (quercetin-3-O-rutinoside, quercetin with 2 sugars) in capers kill avian flu viruses, reducing virus load by 68%, 80% and 73% at just 1 ng/mL ► NPR 2013;27(22):2149-53. The Phenol Explorer database shows quercetin food content. Quercetin has an anti-allergic immune response. Like all polyphenols, it lowers the gut lining permeability, preventing toxins from entering the blood/ brain.

►► 12.4.61. β-alanine (absent in vegan diets), the component of carnosine ◄◄

Carnosine is an antiaging dipeptide, β-alanyl-L-histidine, made internally by merging β-alanine and histidine via carnosine synthase. We eat histidine via food proteins, but β-alanine is not found in any omnivore proteins or any vegan foods. So, to create carnosine, we need β-alanine. A little β-alanine is made by transaminase: α-alanine CH_3-CH(NH_2)-COOH + toxic O=CH-CH_2-COOH ⇌ β-alanine H_2N-CH_2-CH_2-COOH + CH_3-C(=O)-COOH pyruvate. Since the liver has to get rid of lethal AGE forming aldehydes like O=CH-CH_2-COOH, it uses α-alanine to turn the aldehyde into

nontoxic pyruvate and β-alanine. Most β-alanine is made in the liver by degrading cytosine and uracil RNA nucleotides. Some is made during exercise when carnosine is degraded into β-alanine. Carnosine acts as an acid buffer in muscles, to maintain pH when lactic acid is produced during physical tasks. No foods contain β-alanine proteins, only animal foods contain β-alanine dipeptides: carnosine, anserine (methylated carnosine that is way more stable and used in human studies to gauge carnosine effects in a 3:1 ratio, 750 mg anserine, 250 mg carnosine) and other dipeptides in muscles. β-alanine doesn't activate the mTOR pathway like leucine binding to intracellular sensors (Sestrin2 etc) to directly activate mTORC1. Carnosine defends the vessels from oxidative stress, protecting every organ, slows cognitive decline, lengthens telomeres in vitro, extends Hayflick (Cell division) limit in fibroblasts in vitro (extending life?). Carnosine dissolves Alzheimer plaque (like β-alanine does by allegedly binding tau/amyloid), protects brain microvessels (to stop vascular dementia). 2.4 g β-alanine improved cognition. Those with higher serum β-alanine had half the risk of dementia & Alzheimer ► AJE 2019;188(9):1637-45. After age 55, carnosine helps to prevent falls, by decreasing neuromuscular fatigue by 29%. That's why exercise fanatics eat β-alanine before exercising. Some eat it before any exertion as it will help you to get tired later and finish the job without exhausting your heart muscles, ☺☺☺. Taking it when old can make a difference between living and dying during physical exertion ► IJMS 2025; 26(6):2608. Higher serum β-alanine prevents sarcopenia (the loss of muscles and heart muscles that causes earlier death) ► JISSN 2018;15:32.

Because when we eat carnosine 99% splits into β-alanine and histidine fast before it enters the blood, with carnosine blood half life of 2 minutes for the 1% that gets in, carnosine can't get to the brain to do its work or anywhere, so it's useless to take carnosine pills. Thus, to boost endogenous carnosine synthesis we eat enough protein (for histidine) and then add the β-alanine not found in proteins. Pill β-alanine raises the age declining carnosine levels, thereby delaying the brain, muscle aging process and preventing deadly falls that can shrink lifespan by 5-20 years. Since histidine is in all protein sources, we only need buy β-alanine, which is much cheaper than carnosine (144/kg) vs β-alanine 27$/kg (with redeem + subscribe, lasts 3 years, can cancel later, stable during 150°F weather and transport, etc, so β-alanine can be bought from Amazon, it's very sweet, like sugar almost, sweeter than glycine). Take only 0.5g/day first, as more may cause skin tingling in healthy nerves and pain in old injury sites where the nerve is still slightly damaged, then raise it to 1 g after a week and only go to 2 g after 2 weeks if no tingling. You can get all benefits of 1 g carnosine from 0.4 g β-alanine, since histidine is in the food. While carnosine soothes nerves, high β-alanine irritates damaged ones, though the carnosine that is later made will help the nerves. Heart or any muscle benefits more from β-alanine. If pain repeats, half the dose, take 0.3 g or discontinue and use carnosine instead. Most people should have no issue with 0.4 g. Tingling is evident at 2-3 g β-alanine, which is 10 times more than in a

typical carnosine pill. Heart cells use carnosine synthase, which takes β-alanine and histidine to manufacture fresh carnosine directly inside the cardiac tissue. If diet is low in histidine, buy histidine too, 62$/kg (redeem + subscribe). However, 99.9% of vegans and omnivores eat enough histidine, so we only need β-alanine. Taking carnosine makes little sense as body wastes energy to split it into alanine, histidine, then remakes carnosine. Some take zinc carnosine (18$/150 caps) to heal the stomach and intestine in case of leaky gut, ulcers etc, since zinc carnosine is far more stable than carnosine. Alanine comes from aldehyde of acetic acid (how it was first made) and nine as in many amine endings. Carnosine comes from carnis (meat in Latin), like carnivore or carnitine, ine being amine ending.

CONCLUSION

The NUTRITION effect on health is FAR GREATER than exercise. 2 times Nobel Laureate Linus Pauling (Chemistry and Peace) said that most early chronic diseases are due to nutritional deficiencies. Lack of physical exercise is 1 factor that also raises mortality by 40% or so, in some studies, but people can be low in many nutrients (each raising mortality by 40%) leading to 400% higher mortality than from being sedentary. On top of that, lack of good nutrients during fetal stage can mean a loss of any chance to live to 4000. ☺☺☺

12.5. MERCURY (Hg)

Many people have no idea that most processed junk foods have high fructose corn syrup, which contains Hg. This is a gift from aristocrats trying to poison the working class. The toxic brain effects of dental Hg "silvery" amalgams have been known for decades (Sweden and Norway already banned amalgam and all Hg products, like all countries could). Hg is the most toxic non-radioactive element. This 8 minute video shows how toxic Hg vapor comes out of "silver amalgam" fillings all the time, especially during eating. This goes against the claim of amalgam fans that it doesn't leak. Doctors were OK with lead in dental fillings 150 years ago and today they're OK with Hg (half the dentists are OK) in people's mouths, even if there is evidence mouth bacteria can convert inhaled Hg from amalgams into methylHg (many people became paralyzed, etc as their body can't eliminate ingested Hg and gave testimony in Congress, google it), contradicting the claim of amalgam fans that "elemental Hg is harmless". As JCD 2008;11(3):99-107 explains, over 27 years, a half a gram Hg amalgam filling (they usually have about 50% Hg) can lose all its Hg, and this goes in urine (for those lucky to eliminate Hg well) and also into the brains, hearts, kidneys, stomachs, etc of people as shown at autopsies (the more fillings, the more Hg at autopsy) and it causes Parkinson, Alzheimer, low IQ, dementia, paralysis ► "a 500-mg amalgam restoration contains approximately 200-250 mg of Hg, and the entire quantity of Hg would be lost in 10,000 days if the Hg was released at the rate of 25 µg/day." Eating high Hg

fish daily has similar effects. Imagine if someone has 10 fillings, they will get probably 1,000 times more Hg than from eating lowest Hg fish. Dr. Mercola is one of the MDs against dental amalgams. Elemental Hg is toxic ► IT 2012;24(10):652-8.

The video above with Hg vapor also shows how *within 29 days of sheep getting* Hg fillings, Hg was observed in many organs (brain, kidney, stomach, etc), with highest concentration being pituitary gland in the brain as explained in the 1989 paper ► FASEB 1989; 3(14):2641-6. The author paper Vimy co-founded the IAOMT.org in 1984 to advocate for Hg free dentistry. To remove Hg, go to a biological dentist certified by IAOMT, like Gammal the author of "The Garbage Collector", as the IAOMT trains all its dentists to do a very careful job at removing all Hg and extracting it properly with a suction machine (breathing it would be bad for you), unlike the average dentist ☺infinitesimal IQ☺ buffoon, who is not believing or saying Hg is toxic (if they did, they would not use it, but they're greedy bastards, who place profits above people's health), so the typical dentist is not careful in removing all Hg, as they rush to date some bitch at lunch, even when you request it and he says "it's fine, amalgam is harmless". The lack of centralization and universal Dentistry Standard Operating Procedures invites total banditry and vast harm of the Americans by the dentist hooligans. Why is USA so backwards, Norway banned amalgam in all people in 2008: thank the anti-science Re-thug-lican Party. The Republican bandits are only interested in profits for the genocidal aristocrats. The pituitary, where most Hg deposits in the brain, is the master gland and amalgam may thus cause breast cancer, dry eyes and anything related to hormones. During 2011-6, 66% of those aged 15+ in USA still had at least one amalgam filling, due to universal corruption, whereby high numbers of greedy ☺low IQ☺ folks become doctors/dentists ► JPHD 2021;81(4):327-30. Studies saw similar rapid movement of Hg from amalgam fillings to organs in monkeys ► FASEBJ 1990;4(14):3256-60, sheep ► BTER 1997;56(2):143-52. It took Fred (see a 4 minute video of him) 50 years to convince FDA to ban trans fats. He was the Chemistry Professor who sued the FDA at 98, helped FDA to ban trans-fats, wrote a free paper at 98 ► AJCD 2013;3(1):17-26, died at 102. We banned trans-fats, now we can ban Hg, high AGEs foods. In 1845 the American Association of Dental Surgeons banned the use of Hg for fillings, but ADA, founded in 1859, supported Hg. Lead..ml explains that in 1909, 3 EU countries banned white lead based paint, followed by the League of Nations in 1922, and many other EU countries next 25 years. US only banned lead in paint (above 600 ppm) in 1978, and above 90 ppm in 2009 ► EHP 2014;122(4):A96-103. In 1980, 77.8% of US kids had blood lead above 10 µg/dL, while in 2002 only 1.6% had lead above 10 µg/dL as a result of the paint ban and moving away from leaded gasoline ► CFP 2010;56(6):531-5. In 1999, 9.9% of Americans had lead above 5 µg/dL, while in 2014 only 0.5% ► AJM 2016;129(11):1213-8. The ADA (American Dental Association) is run by pro-amalgam genocidal aristocrats, but half the US dentists or so don't even use the amalgam or agree with the ADA official position.

►►►►►Norway banned Hg in all products in Jan 2008◄◄◄◄◄, while ►►►►►Sweden banned Hg in all products in Jun 2009◄◄◄◄◄ as explained seen at the links, including Hg dental amalgams, because end-point control of the pollution of the environment is very difficult compared to outright ban. Denmark also banned amalgams. "Human activities have nearly tripled the amount of Hg in the atmosphere and the atmospheric burden is increasing 1.5 percent per year", this is a grave threat to the future generations as Hg destroys our DNA ► JPMPH 2014;47(2):74-83. In 1999 Sweden stopped covering dental amalgams with health insurance and as a result only 2-5% of fillings were amalgam in 2009 when the ban went into effect. 40% of Hg flowing into municipal water treatment plants begins in dentist offices; those plants are not set up to remove it, so it ends up in your fish, then your brain, heart, etc. The EU agreed to ban amalgam dental fillings starting July 2018 for kids under 15 and pregnant, nursing women. In 2019, males and non-pregnant ladies above 15 can get amalgam only if Hg is encapsulated and they plan to completely ban amalgam by 2030 as the PDF explains. The new law is basically preparing everyone for the complete ban, like Sweden did in 1999 before the 2009 total ban. *EU countries banned lead paints 69 years before US*, will the banning of Hg products in US also occur in 2077, 69 years after 2008 (when the first EU country banned it)? The ad industry knows that a lie (fake study) repeated 900 times becomes a fact.☺☺

Oral bacteria can turn Hg vapor into Hg ion Hg^{2+} and then into methylmercury, see SJDR 1983;91(2):150-2 "Methylation of Hg from dental amalgam and $HgCl_2$ by oral streptococci in vitro". Many amalgam fans among dentists are not aware of this, and are even telling people that Hg in fillings is never becoming Hg-CH_3, see their websites. CR 2001;35(3):163-6 found that the more amalgam fillings you have, the more inorganic and organic Hg you have in your saliva, as the oral bacteria are doing their job at converting Hg into Hg-CH_3 and we ingest 1 quart or liter of saliva every day. AJFMP 2006;27(1):42-5 found that people with > 12 amalgam fillings have over 10 times higher Hg levels in several tissues (brain, etc), compared to individuals with only 0-3 amalgam fillings as JOMT 2011;6:2 explains also. "It is concluded that the *cause of the association between* amalgam *load and* accumulation *of* Hg *in* tissues *is the release of* Hg vapor from amalgam fillings" ► SDJ 1987;11(5):179-87. On top of that "Hg vapor is 10 times more toxic to neurons than lead" and "autopsy studies which found 2-12 times more Hg in body tissues of individuals with dental amalgam" ► JOMT 2011;6:2. This paper mentions the 2006 autopsy paper above and the finding that "*The average Hg level in the brain of EU citizens with more than 12 amalgam fillings was 300 ng Hg/g brain tissue, which is well above Hg levels proven to be toxic in vitro on neurons (0.02-36 ng Hg/g)*". At 20 ng Hg/g or 20 ppb, they noticed neurons are destroyed partially ► NR 2001;12(4):733-7. The technical stuff in this paper is explained in simpler terms in this 5 min video from the University of Calgary about the destruction of neurons by 20 ppb Hg ☺☺☺(one more reason to stay away from fish, but more

importantly, stay away from Hg silver amalgam fillings, which are far more toxic than fish). *The video explains how in 1987 a team of research scientists demonstrated that Hg vapor inhalation by animals causes a molecular lesion in brain protein metabolism which was similar to a lesion seen in 80% of Alzheimer patients*. The video shows Hg in concentration of 10^{-7} M, 0.0000001 moles/liter, (0.0000001 moles/L × 201 g/mole = 0.00002 g/L or 20 µg/L or 20 ppb. 1 L is 1,000 g, so 20 µg/1,000 g is 20 ng/gram. To reach pathological levels of Hg in the brain we only need to get to 20 ng/gram (a very conservative number, in vitro neurons can be partially destroyed at even 0.02 ng/gram, which is 1,000 times lower, but in vivo it may be different), which means for a brain of 1,400 g (typical), we only need 28 mg of the amalgam to get to the brain to reach 20 ng/g. If you have 10 fillings each leaking 20 µg a day, you leak 200 µg a day. If 10% of this goes to the brain, 20 µg a day goes to the brain, so you get to pathological levels of 28 mg of Hg in the brain in just 3.8 years. Drinking water safe level for Hg is 2 ppb, flu vaccines Hg safe level = 50,000 ppb (parts per billion). Not safe, even if it gets diluted from 0.5 mL to 5 liters of blood, or 5,000 mL once injected in a short time frame. 0.5 mL in 5,000 mL is a 10,000 fold dilution, meaning Hg will be at 5 ppb, higher than safe level for Hg in drinking water. A flu vaccine can contain 25 µg of Hg and this gets diluted into 5 liters of blood, resulting in 5 ppb. When Hg reaches 20 ppb in the brain, it destroys neurons. Nerves are all over the body where blood goes too. Blood homogenization of this 25 µg Hg takes time, so Hg has enough time to bind to neurons and destroy a lot of neurons meanwhile, potentially starting Parkinson and other diseases seen in people with higher blood Hg, see studies below. If you're very pro-vaccination, it's good to avoid thimerosal and aluminum at least, and *ask your doctor/nurse to provide Hg free vaccines (single dose)*. Even so, one study found it took infants 30 days (a long time to do damage) to return to normal levels of Hg in their blood after a thimerosal containing vaccine ► Ped 2008;121(2):e208-14. Thimerosal damages not only neurons, but also many other cells, such as endothelial cells lining up our arteries (the study specifically used thimerosal, and 2 other compounds, thus Hg can initiate cardiovascular disease) ► IJT 2007;26(1):57-69. Eliminating Hg thru feces/urine requires reduced glutathione, other cellular antioxidants. At 200 ppb (local concentrations after a vaccine are much higher) thimerosal (50% Hg, so 100 ppb Hg) is toxic to cultured human peripheral blood lymphocytes ► TIV 2008;22(4):927-34. ☺☺

If someone eats a lot of high Hg fish, they will get about the same level of Hg intake as having many big amalgam fillings. That is why FDA has a table with fish to avoid during *pregnancy*, anything but the very lowest. It's much safer to eat the lowest possible Hg fish types. The lowest Hg fish, scallop, has 0.003 ppm Hg on average, while the highest Hg fish, *tilefish has 1.123 ppm*, or *374 times more* Hg. Eating *100 g of tilefish,* you get 112 µg of Hg, same as from several big amalgam fillings with 500 mg of Hg *in each leaking into the mouth as explained above*. Most people don't eat 100 g of tilefish daily or 700g weekly, but some types of commonly eaten fish,

like tuna, can reach 1 ppm easily even if the average is 0.4. Many people eat 700 g of fish weekly; they may find this table life saving if their body has a bad metal elimination mechanism. Many autistic kids were treated successfully with chelation therapy to remove heavy metals from the brain. People used chelation therapy and Alzheimer, Multiple Sclerosis, etc symptoms diminished. Hg Free Dentists are listed at iaomt.org. It's good to remove amalgam fillings using a dentist certified in SMART, Safe Hg Amalgam Removal Technique. It's good karma to do all your dental work at "Hg Free dental offices" that never use Hg, since those who use Hg pollute the environment, as there is no regulation about proper disposal of amalgam fillings. Not to mention, that if someone used a drill to remove fillings and some particles get into your mouth and you swallow them, because he's not using SMART method, you can get poisoned really well since you send into blood stream a high level of Hg that can't be cleared by glutathione peroxidase and other enzymes (most Hg in urine is bound to glutathione). Even if the dentist doesn't make a mistake like that (very common, people sometimes swallow stuff thinking it's "just some material"), many dentists have 50 times the normal blood Hg level since their whole office area has Hg contamination and you may inhale some Hg from the air (especially if he removed someone's amalgam and some particles are in the air), since the Hg dust from all their removals and placings of amalgams is there; these dentists are not aware of the toxicity of these amalgams, no wonder many dentists have high suicide rate (especially true for those with high Hg). This EPA webpage explains that American dentists discharge approximately 5.1 tons of Hg each year to publicly owned treatment works (POTWs); most of this Hg is subsequently released to the environment. *Only in 2020, the EPA forced every dental office to use a filter to catch and recycle big particles of Hg, not all particles of course*. "Hg-containing amalgam wastes may find their way into the environment when new fillings are placed or old Hg-containing fillings are drilled out and waste amalgam materials that are flushed into chair-side drains enter the wastewater stream. Hg entering POTWs frequently partitions into the sludge, the solid material that remains after wastewater is treated. Hg from waste amalgam therefore can make its way into the environment from the POTW through the incineration, landfilling, or land application of sludge or through surface water discharge"☺

In 2015 Obama administration blocked the FDA proposal to limit the use of Hg amalgams. Blacks choosing to poison blacks, where is the Black Lives Matter protest about this genocide via amalgam by a Black President? The proposal, approved by top FDA folks in 2011, would have told dentists they can't use Hg fillings in cavities in pregnant/nursing women, kids under 6 and people with Hg allergies, kidney diseases or neurological problems. It also urged dentists to avoid using fillings that contain Hg compounds in any patient, where possible. SDJJ 1989;13(6):235-43 found that dentists had 35 times more Hg in pituitary than avg (815 for dentists on average, versus 23 for the controls). Over 450 people died after the use of methylmercury

fungicide to treat grain ► PMJ 1980;56(651):1-10. WHY would we care about Hg level tripling in our atmosphere recently? This is not due only to coal fired plants, but also to amalgam entering water supplies, cremation of amalgam, etc, air, fish, crops, etc. Inhaled Hg vapor from fillings is fat-soluble, allowing its passage *into the blood through the alveolar membranes of the lungs and then into the brain thru the* blood-brain barrier. In the brain, Hg is transformed into the ion, Hg^{2+} which can no longer diffuse easily and remains stuck in the brain, accumulating there and causing many brain diseases, even for people who don't have amalgams, ***but inhale coal fired pollution carried by wind from other countries***. Saliva can turn elemental Hg into Hg^{2+} and methylHg and using retrograde axonal transport, toxic metals, "shampoo/cream" toxins, aluminum, Hg^{2+}, methylHg from food (fish) or amalgams can reach the central nervous system without even using the blood-brain barrier. Wikipedia explains retrograde axonal transport. The axonal transport speed is 10–20 cm/day ► NA 2003;2:2-5. All are affected, even if they don't have dental amalgams. One more reason to support wind and solar power instead of coal.☺☺☺

cha..540.html explains that the ADA (American Dental Association, like similar groups in other countries did) has: "Argued against FDA safety warnings about Hg fillings for pregnant women and small children. Imposed a gag rule barring member dentists, including those specializing in the safe removal of Hg fillings, from telling patients the compounds could harm their health. Lobbied to ensure that the international treaty signed by 129 countries would call for a phase-down of Hg uses worldwide, not a phase-out that eventually would ban dentists' use of Hg fillings. Cut a deal in the final days of George W. Bush's presidency that put off the issuance of regulations requiring dentists to install Hg "separators," so they can properly dispose of their Hg debris, in favor of a voluntary approach." Lots of people got rid of depression, tinnitus and other health issues by removing amalgam fillings and doing chelation therapy to remove heavy metals from the body (this can be done naturally too, but it takes a lot of effort to eat chlorella (spirulina or anything green that has chlorophyll), cilantro and citrus pith daily for many months or other chelating foods like garlic, etc). Chelation means eating something that binds or chelates heavy metals. Here is the official amalgam warning of the FDA, as they know it's bad. Dr. Mark Geier addressed the UN on the danger of Hg based thimerosal preservative and Hg amalgams (plus other pharmaceuticals). Mark R. Geier, MD, PhD, a founding director of the non-profit 501(c)3 Coalition for Hg-free Drugs (CoMeD), Inc., addressed the third session of the Intergovernmental Negotiating Committee (INC3) of the United Nations Environment Program (UNEP) in Nairobi, Kenya. The INC is currently negotiating a global Hg treaty intended to protect health and the environment. We already have Hg-free vaccine preservatives such as phenoxyethanol, and Hg free dental filling materials. Why do we poison billions of people globally with THIMEROSAL and silver amalgam fillings? A study found phenoxyethanol to be 72 times less toxic to human neuroblastoma cells *(but it does kill ocular meibomian glands cells, see*

preservatives in eyedrops *section: is that why so many kids, 42% have MGD, due to multidose vaccines that need preservative like phenoxyethanol that gives 1 billion people drier eyes and poorer eye health?*) than thimerosal, you know anything will be less toxic than Hg ► MSM 2010;16(5):SR21-7. ► "The observed relative toxicity indices (human neuroblastoma cells/bacterial cells) were 2-phenoxyethanol (4.6-fold) < phenol (12.2-fold) < Thimerosal (>330-fold). None of the compounds commonly used as preservatives in US licensed vaccine biological preparations can be considered an ideal preservative, and their ability to fully comply with the requirements of the US Code of Federal Regulations (CFR) for preservatives is in doubt. Future formulations of US licensed vaccines/biologics should be produced in aseptic manufacturing plants as single dose preparations, eliminating the need for preservatives and an unnecessary risk to patients." Phenoxyethanol is used at 0.5% in the polio vaccine called Ipol that the FDA approved, so *probably it's not that common or a major cause of MGD, but it's not so clear, since some sites claim phenoxyethanol is common*. This single dose switch may cost $300 million per year globally, but benefits may be much bigger in avoided health care costs. Spend $90 billion on Olympic stadiums sitting empty while people get sick?

"Flu vaccines in multi-dose vials contain thimerosal to safeguard against contamination of the vial. Most single-dose vials and pre-filled syringes of flu shot and the nasal spray flu vaccine don't contain a preservative because they're intended to be used once" as explained at cdc.gov...thimerosal. From 5 vaccines to 184 vaccines is a huge leap. ☺☺☺ Nobody has done any clinical human trial on the *toxic side effects of so many vaccines at once on the human body*. We know toxins can create synergy, e.g., lead and Hg. JOMT 2011;6:2 has some more frightening information about Hg for those ready "a) Hg is the only metal representing a volatile gas at room temperature, which is readily absorbed (80%) by the respiratory system. b) Hg vapors from amalgam penetrate into tissues with great ease, because of its monopolar atomic configuration. c) Once inside the cells, Hg vapor is oxidized to Hg^{2+}, the very toxic form of Hg which binds covalently to thiol groups of proteins inhibiting their biological activity. d) Hg^{2+} is more toxic than Pb^{2+}(lead), Cadmium (Cd^{2+}) and other metals because it has a higher affinity due to "covalent bond" formation with thiol groups (cysteines in proteins) causing irreversible inhibition. Other metals form reversible bonds with proteins and are therefore less toxic. f) Chelating agents, like EDTA, which normally inhibit the toxic effect of heavy metals like lead, have no inhibitory effect on the toxicity of Hg or may even increase it..." SYNERGY OF TOXINS (pesticides, heavy metals, vaccine adjuvants, etc) "it has been proven that the combination of the Lethal Dose 1% of Hg (LD1Hg) together with the LD1 of lead (LD1Pb) results in the death of all animals." ☺☺☺

This 4 min video shows an FDA hearing on amalgam. Hundreds of studies show Hg containing thimerosal is linked to brain disorders, see the autism thimerosal link section and also FN 2010;48(4):258-69, TS 2014;139(2):452-65. Low-level methylHg exposure causes immune T-cells

to die ► ER 1998;77(2):149-59. Dental amalgam may be a risk factor in some patients with AUTOIMMUNE disease ► NEL 2003;24(1-2):65-7. Removal of Hg-containing dental amalgam in patients with Hg hypersensitivity may contribute to successful treatment of AUTOIMMUNE thyroiditis ► NEL 2006;27 Suppl1:25-30. Removing amalgams improved the health of people with AUTOIMMUNE diseases like systemic lupus, multiple sclerosis, autoimmune thyroiditis or atopic eczema ► NEL 2004;25(3):211-8. Person recovered from ALS after amalgam removal ► IJRSM 1994;4(3):229-36. Hg caused PARKINSON ► NNP 2003;37 Suppl 5:31-8. PARKINSON patients were found to be far likely to have high Hg in blood compared to healthy subjects ► JOEM 2006;48(7):656. Those with highest blood Hg level (among the tertiles) were 21 times more likely to have Parkinson (19 times if urine Hg) ► Nep 1989;8(3):128-41. PARKINSON improved after chelation therapy to lower Hg ► NT 1996;17(1):291-5. ☺☺☺ Seepage of *ionic* Hg *from root canal or* amalgam *fillings* inserted many years previously may lead to MULTIPLE SCLEROSIS in middle age ► AJJFMP 1983;4(1):55-61. Multiple Sclerosis patients had 7.5 times more Hg in the cerebrospinal fluid than healthy people ► Swe J Biol Med 1989;1:6-7. Multiple Sclerosis patients with amalgams had poorer mental health (more depression, hostility, psychotism) than those with amalgams removed ► PR 1992;70(3 Pt 2):1139-51.

Women who were exposed to amalgam fillings were 1.132 times more likely to have Alzheimer's disease than were their non-exposed counterparts. ► ART 2015;7:65. "In vitro models showed that inorganic Hg reproduces all pathological changes seen in ALZHEIMER, and in animal models inorganic Hg produced changes that are similar to those seen in ALZHEIMER. As the single most effective public health primary preventive measure, industrial, and medical usage of Hg should be eliminated as soon as possible." ► JAD 2010;22(2):357-74. Findings "suggest a decisive role for inorganic Hg in the etiology (cause) of ALZHEIMER disease" ► NEL 2004; 25(5):331-9. ☺☺☺ Hg induces cell cytotoxicity, oxidative stress, increases β-amyloid secretion, tau phosphorylation in SHSY5Y neuroblastoma cells. ALZHEIMER patients also have elevated Hg levels, more β-amyloid, tau phosphorylation ► JNC 2000;74(1):231-6. NRS 2002;113(4):849-55 confirms β-amyloid secretion increase due to Hg. Hg exposure, even at low doses, affects endothelial and cardiovascular function, so the reference values defining the limits for the absence of danger are better if lowered ► JBB 2012: 949048. Hg exposure could have a long-lasting effect on cardiac parasympathetic activity and some evidence has shown that Hg exposure might affect HEART RATE variability, particularly early exposures in children. The exposure to Hg increases the production of FREE RADICALS ► IJERPH 2017;14(1):74. Hg may promote ATHEROSCLEROSIS and hence it may increase the risk of acute coronary events. Hg stimulates the production of free radicals, binds to sulfhydryl groups of enzymes and forms an insoluble complex with selenium. ► PL 2006;63 Suppl 7:84-7. Hg levels were 22,300 TIMES HIGHER IN HEART TISSUES with a form of heart insufficiency ► JACC 1999;33(6): 1578-83. Those with high Hg were 2.9x more likely to

die from infarct, more hair Hg meant 32% more plaque on carotid artery after 4 years ► Ath 2000;148(2):265-73; moms who eat fish often, have cord blood Hg 10 times higher and give birth to kids with hypertension at age 7 (diastolic 14+, systolic, 15+) or 47% less heart rate variability ► Epi 1999;10(4):370-5. Breast CANCER tissue has abnormal levels of Hg ► NEL 2006;27 Suppl 1:36-9. Hg released from dental "silver" fillings provokes an increase in Hg and antibiotic resistant bacteria in oral and intestinal floras of primates ► AAC 1993;37(4):825-34. Exposure to Hg might be a specific driving force for the acquisition and maintenance of mobile antibiotic resistance gene carriage ► JMM 2010; 59(Pt 7):804-7. People with amalgams have more KIDNEY DAMAGE than those without, more Hg in urine and blood; the more amalgams the more damage. The higher the blood Hg the higher the markers of kidney damage such as albumin, NAG, and gamma-GT ► JN 2002;15(2):171-6. Those with amalgam are 2.5x more likely to smoke; Hg decreases brain dopamine, serotonin, norepinephrine, acetylcholine, and nicotine increases these neurotransmitters ► TL 1993;68(3):307-10. Those with ≥ 6 amalgams were 3.2x more likely to be diagnosed with severe vs mild autism than subjects with ≤ 5 amalgams ► ANE 2009 ;69(2): 189-97. AUTISTIC kids excreted 3.1x more urine Hg. Autism severity is higher when heavy metal load is higher ► see section 1 of JT 2009:532640. Those who can't eliminate Hg well may develop AUTISM ► IJMR 2008;128(4):383-411. Autistic kids using DMSA to chelate/ remove heavy metals have lessened their autism behaviors ► Maedi 2012; 7(3):214-21. The twin who got autism had higher lead and less Zn/Mn in his baby teeth layers corresponding to lead intake since birth; autism starts in the womb, the authors say, with the lead kids get from their mom via placenta ► NC 2017;8:15493 and neurosci. ☺☺☺

Thousands of dentists believe that gutta percha is much safer than paraformaldehyde (or Sargenti paste or N2, RC2B, or RC2W as it is called at times) for root canal filling material. Some dentists still use the paraformaldehyde material. The FDA has banned interstate marketing of Sargenti-type pastes (and ADA and dental schools advise against it), but pharmacists can legally prepare them for local use (as long as they don't have heavy metals like Hg in them). I'm not sure what happens in other countries, but it's good to ask a dentist what materials they use, since some US dentists may still use N2 from a local pharmacy, and scarier still, others (not necessarily in the US) may use formulations of N2 with Hg traces in them. Another article estimates 30,000 dentists worldwide are still using N2. If a mistake is made and it gets past the root tip, lots of problems can occur, one lady had over 40 surgeries. Since some dentists lie about it and falsify records, as Edwin Zinman, DDS, explained on some websites, you can even ask to see the box that says "gutta percha" (this is a natural material from a plant). Obviously, the ideal way is to regrow tooth using your own adult stem cells, etc, but that is many years or decades away from becoming standard practice. All materials that are man made are having side effects but N2 seems to have more. N2 powder contains 65% zinc oxide and 6% formaldehyde,

when mixed with equal part of liquid (eugenol and other oils) to form cement the formaldehyde becomes 3%. Gutta percha cones also have 65% zinc oxide, but also 20% gutta percha. These cones are used with a sealer to totally fill the canal. ☺☺☺

12.6. LEAD

Many aluminum pots or even pressure cooker pots made in China, India, South Asia are leaching lead, as this US government table shows. Avoid aluminum cookware, aluminum is not healthy either, choose higher quality stainless steel, like this MegaChef, the only kitchen appliance anyone needs to be healthy. Some teas have too much caffeine, which can cause a series of issues in people with certain heart conditions or who're trying to conceive or avid miscarriage if pregnant. *Some tea brands got 4,002 times more lead than others,* imagine if some of the produce from one country has 40 or 400 or 4,000 times more lead or other heavy metals than the produce from another country. Table 2, page 2238, at FRI 2010;43:2234-52 shows that some teas have 240.1 mg/kg lead, while others have 0.06 mg/kg. 240.1/0.06 = 4,002 times. Chinese tea is the most contaminated in heavy metals, due to heavy coal burning and the use of leaded gasoline that was banned only in 2000 in China ► EP 2006;139(1):125-32 ► the abstract you can read states "Lead concentrations in 1,225 tea samples varied from <0.2 to 97.9 mg kg(-1) dry weight (DW)". 97.9/0.2 = 489 times more lead. Less than 0.2 can mean that some have 0.02 lead levels, *so the worst tea might have 5,000 times more lead than the best.* BECT 2008;80(3):300-4 says that "This study showed the total content of arsenic and heavy metals in green tea, oolong tea, and black tea produced in Taiwan was 0.11, 5.61, and 10.11 microg/g (mg/kg)," meaning Taiwanese black tea had 92 times more arsenic and heavy metals than Taiwanese green tea (10.11/0.11=92). It seems green tea is the least oxidized and processed, with the lowest level of lead. The Chinese garlic may be grown in sewage sometimes or use human sewage as fertilizer. Read the label. Some land can have 400 times more lead and whatever grows there may be lead rich. Some spices, like cinnamon, can have high levels of lead. Half of NYC eggs had lead at levels of 0.010 to 0.167 ppm ► EGH 2014;36(4): 633-49. Lead levels in fish were found to be 0.72 ppm on average or 70 times the level in the *vegan* nutritional yeast brands that had any lead (most did not) ► FC 2015;179:331-5. Lead in veggies was from 0 to 0.58 ppm, in fruits it was from 0.013 to 0.144 ppm in Poland, Europe's most polluted nation ► RPZH 1993;44(4):331-46. Other studies showed no lead in some fruits and veggies. In comparison, most nutritional yeast has no lead or if any, just 0.010-0.021 ppm. Dr. Greger found "lead in samples of Frontier Coop (0.021), KAL (0.011 ppm), and Whole Foods (0.012 ppm) brand nutritional yeast, but the lead levels were so low that they all comply with the exceedingly (and justifiably) strict California Prop 65 standards. Still, I advise pregnant women who eat more than a third of a cup a day on a regular basis choose a different brand. No detectable (< 0.010 pm, but it depends on detection limit DL, since it could be just below the instrument DL) lead levels were found in Bob's Red Mill, Bragg,

Dr. Fuhrman, Red Star, or NOW Foods brand nutritional yeast."

Home Depot has a $10 lead check that allows you to see if your toys, cookware, glassware, decorations, Christmas trees contain lead or not. eBay sells used portable x-ray fluorescence spectrometers for $4,000-10,000 which one can use to measure lead in objects. But these can be rented also for a few hours. PCH 2005;10(4):215-20 mentions "Of the 95 pieces of children's jewelry that were tested, more than two-thirds contained greater than 50% lead *(500,000 ppm)." This is beyond* UNBELIEVABLE. NT 2002;24(6):711-7 found that teens found guilty of crimes *had 7.3 times* more lead in their bones, this holding true regardless of race. High lead means not just lower IQ, shorter height, poorer health, higher mortality, etc, but more crime too. Society pays the cost. ☺☺☺ "Considering all U.S. counties where lead pollution has been recorded by the EPA, rates of violent crime are about 56% higher if silicofluorides are used in water treatment" ► gov..pdf. "For every age/race group, there was a consistently significant association of SiF treated community water and elevated blood lead." ► NT 2000;21(6):1091-100. Silicofluorides increase lead absorption and are used in 90% of water fluoridation. Violent criminals have much higher hair cadmium and lead ► PR 1990;66(3 Pt 1):839-44. Sci Am reports that areas using H_2SiF_6 or $NaSiF_6$ have more crime, alcohol, drug use than those using NaF or no fluoride. The lead exposure is not overcome yet, since many imported products (toys using lead paint) are full of lead if they come from China or other countries without strong lead regulations. EHP 2008;116(10):1285-93 says *"A study of toy jewelry found lead concentrations ≥ 50% in 40% of samples (Maas et al. 2005); when wiped, 70% of these samples released at least 1.0 µg lead, enough to cause high exposure with little handling."* and lifelong potential disability (or iq lower by 20 points for life) if a kid swallows such an imported toy piece. The scary thing is a kid ingests it or rubs it a lot or licks it, lead goes to the organs and brain thru the skin, causes autism symptoms within months of "unknown to parents toy piece ingestion or interaction with a toy piece", parents go to do blood tests and blood level can be OK even when organ/brain level of heavy metals is high, and then kid is placed on depression and side effect causing medication because of being "autistic" (lead, Hg, etc poisoned), because doctor did not do a test using DMSO or other chelators to test organ levels of heavy metals (just a routine blood test) via the DMSO chelated heavy metals in urine. Imported candy, coca cola bottles, chocolate and foods can contain very high lead levels. Even American vinyl lunchboxes, herbal supplements or other supplements can have lead, as FDA doesn't test these routinely. India has a big problem with lead due to PVC pipes. China banned lead in PVC for water pipes in 2006. vinylplus.eu..6.pdf explains all lead stabilizers are out in the EU for new PVC, but old pipes installed before 2016 still have those lead additives until they're replaced with new PVC. "Lead is used in 95% of PVC pipe in India, 86% percent in the Middle East and Africa, and 61% in South America... In Europe, 29% of all PVC pipe systems use lead, while in North America, the figure is less than 1%, because

nearly 100% of vinyl pipe systems use tin as a stabilizer." The "lead free" 2014 US *standard* means *less* than *0.25* % lead *in* water PVC pipes, so lead can *still leak* ► buildinggreen.com..1. America is not using calcium stabilizers a lot or organic based stabilizers, which are way safer than tin, hopefully tin is banned soon, even if it's way safer than cadmium or lead. ☺☺☺

However, PVC is in more products than pipes, so a lot of Christmas stuff and toys still may have huge lead levels, if the manufacturer did not use Ca, Zn, Sn stabilizer for PVC. PVC made Christmas trees (made in China mostly), wreaths (youtube...8) degrade and after 9 years, the lead exposure can be huge according to one paper, so maybe you test it each few years. Even Christmas lights can have lead in them ► youtu.be...c. ☺☺☺ "In the worst-case scenarios a substantial health risk to young children is quite possible" from Christmas PVC trees ► JEH 2004; 67(5):20-4, 32. Other things can leak lead too, made from PVC. Candle wicks, synthetic turf can leak lead too. Leaded crystal glass contains 22.8–29.7% lead or 228,000-297,000 ppm lead, 297,000 ppm is 3,300 times above the 90 ppm maximum lead allowed in paint since 2009 in USA (first paint ban was 1978 at 600 ppm). Crystal glass makes a long sound when tapped with a spoon: youtube.A. Imported dinnerware, ceramic pottery from Mexico containing lead glazes can be high in lead too ► EHP 2008;116(10):1285-93. The National Academy of Sciences says that our blood lead increased 300 times ► nih.gov...53/ in the last 200 years (to find where it says that, use Ctrl-F 300). ☺☺☺ tam...mugs explains which mug brands are lead free, to avoid lead poisoning of the brain or other organs; lead free brands from Amazon are Anchor Hocking 16-oz Glass Mugs, Libbey 15-1/2-oz Tapered Mugs, Libbey 13 oz Robusta Classic Coffee Mug, Luminarc Lead-Free Jumbo Mugs, Bodum Bistro Glass Coffee Mugs (only $2.5). A couple was hospitalized due to drinking coffee each morning from a mug that had a very high lead content. Symptoms disappeared after they trashed the mug that poisoned them with lead. For a list of the astronomical lead levels in some of the common plates, mugs, etc see tam...leadedmugs. The paint is only allowed 90 ppm and kids don't lick paint as much as a plate, but pottery and dishware can have glazing with a lead level that is 1,500 times higher, crystal glasses can have 3,300 times the lead concentration allowed in paints, see pottery. JMT 2013; 9(1):16-20 found that "The leachable lead-positive items were up to 40-fold the acceptable FDA levels... In 1971, the FDA established specific action levels for lead leaching over 24 h from ceramics, starting at 7 ppm. The acetic acid FDA lead-leaching limits of 3.0 ppm for flatware, 2.0 ppm for small hollowware, 1.0 ppm for large hollowware, and 0.5 ppm for pitchers, mugs, and cups. The impetus for such regulatory mandates arose when a family of six was lead poisoned after purchasing a lead-glazed ceramic pitcher from Mexico." Even in southwestern USA, the paper says, some people use lead for pottery, so it's a global issue. Sometimes, with these mom and dad shop imported pottery, the risk taken is death as explained in this paper about the death of a child due to lead ► NEJM 1970;283(13):669-72. We could have a global ban on lead in

ceramics, dinnerware, PVC, toys. STE 1999;234(1-3):233-7 explains that some imported ceramic plates leaked lead at level of 2,000 µg/mL using the acid test (FDA acetic acid test like), which is 670 times above FDA leaching limit for flatware (3 ppm). AECT 1996;31(4):581-4 found that Mexican ceramic can leach 1,000 times the FDA leaching limit ► "The results of the USFDA extraction test were highly variable with levels ranging from 200 to more than 2,000 ppm (regulatory level for rejection is 2 ppm)." The California Environmental Health Coalition has traced 15% of its child lead poisoning cases to lead-contaminated candy and about 15% to paint. Tests found lead concentrations of 21,000 ppm in the tamarind Bolirindo lollipops' wrappers (lead paint has 90 ppm max since 2009). California and FDA officials found lead in chili powder. In 2004 California sued Mexican candy manufacturers/distributors ► EHP 2004;112(14):A803.

The problem is a lot of imported cheap dollar store and even Walmart mugs and glasses, can have 1% lead, that's 10,000 ppm lead, or more. Coffee, tea, sodas, some juices are acidic; when hot, they can leach more lead from the glass/mug, far more than room temperature water or neutral pH liquids or juices. Imagine saving $5 on a cooking pot or mug, but getting Alzheimer or autism instead, costing insurance company $1 million over 20 years of living with Alzheimer and costing yourself $0.1 million too. Heavy metals increase oxidative stress, which is a risk factor that may just tip the balance over in favor of triggering 400 common diseases. ☺☺☺ There is a lot of work on biodegradable heavy metal free plastics, so, hopefully one day all the toxic heavy metals will be banned globally from all plastics. Germans found bacteria that eat plastic, Americans found some too in wastewater, and Mexico found a new method to make plastic (60% is avocado seed that is usually trashed) that biodegrades in 8 months. PVC is the third most produced synthetic plastic, and there is no global ban (only EU ban) on using lead stabilizers in all PVC. America uses tin stabilizers for water PVC pipes and autistic kids had twice the tin levels in their urine in this study ► BTER 2013;151(2):171-80. However, most of the global tin exposure comes from tin canned foods and from certain foods, not the drinking water ► w..tin.pdf. Nobody knows how much tin damages the developing brain and at what level, as well as how much tin is in the most contaminated water in the US, since tin was much less studied compared to lead, etc. The WHO pdf says "Vomiting, diarrhea, fatigue and headache were often observed following the consumption of canned products (tin concentrations as low as 150 mg/kg in canned beverages and 250 mg/kg in other canned foods) (JECFA, 1982)". FS 1981;46(6):1751-4 shows that using lacquered cans prevents iron and tin from leaking into foods. Too much iron, tin end up in Alzheimer plaques in the brain.

Lead air concentrations dropped 96% between *1980* and 2005 as a result of banning lead in gasoline and other products. Regulations can help save the public health. The same could happen with Hg as a result of global ban on Hg products and Hg emissions from any power plant (coal plants spew half of Hg in the air and many don't filter Hg) ► usa...N.htm. In 1887 there

were studies showing lead is toxic in the US, yet it *took* 91 years for a *ban* to occur. In the last 200 years we have been increasing our Hg blood levels thru industrialization (we breathe coal fired plant Hg, dental amalgams vapor, CFL lightbulbs vapor, we inject thimerosal Hg containing preservative in single dose flu shots etc). We often assume our IQ tests reveal true progress, i.e. if IQ goes up, it's always good, but IQ doesn't measure a LOT of forms of intelligence, such as gentleness, ESP, telepathy, empathy, ability to read body language (the stuff that autistic people, often times with 3 times the Hg and aluminum in their hair, can't do very well), tenderness, self-control, emotional stability, tranquility, peace making ability, non-violence bringing ability, emotional intelligence, etc. The increase of certain pollutants in our blood may lower some important intelligence aspects, even if IQ, SAT, school exams, etc tests don't measure them. ☺☺☺ A 2016 CNN Report explains that they found that *at* least 5,300 water systems have high lead levels, *because* utilities test lowest lead houses under slow running water so values come out lower. This is at least 18 million people in the US alone. If we add the exposure from dinner plates and glassware and ceramic pots, mugs and cookware, we get more lead exposure. Hence, having a Brita or Pure water filter may be very useful in some areas.

USP, NSF, UL certifications are only present in very few supplements, USP in 140 out of 90,000 supplements. USP certifies no dangerous lead levels exist in the dietary supplement, etc, being the most expensive certification. FDA warned that in 2016 two people might have died due to lead in dietary supplements (which FDA doesn't test usually). Here is the list of USP certified supplements. Among vitamins, most *USP* certified ones are of the NatureMade and the Costco Kirkland (Costco got transparent bottles, not ideal). ☺☺☺ A 2013 study found that 33% of pills *did not match the label, often using cheap substitutes*. There are ayurvedic supplements which have toxic *lead* levels too. Fidget *spinners* can contain *41,000* ppm lead, compared to 90 ppm maximum legal level in paint. See some of the spinner testing in this video. Dr Mercola cooking pan glaze got 14,900 ppm lead. You can google "rent an xrf handheld analyzer or spectrometer" and you will find ways to rent these to test everything in your house for heavy metals. pioneer2 is a short video about testing lead levels in a Walmart Brand of Glasses called Pioneer Woman. For Dishes by the same Pioneer Woman brand see pioneer1, some have 700 ppm. Walmart crock-pots are at crockpots. Anchor and Libby lead free glass is about $1 each. For Walmart Clear Glasses, see walmart4, the Instant Pot pressure cooker instant-pot. These pressure cookers sometimes have parts that have high heavy metal levels, like one had a cord with 11,000 ppm lead. The problem with aged dishware and cookware, is that even if they pass FDA leaching test brand new, they can crack and leach a lot more heavy metals later on. FDA doesn't test every dinnerware, so it makes more sense to buy brands that have 0 lead. It's strange enough that we allow lead in cookware. *A child was lead poisoned because he ate from the same bowl that was 52,000 ppm.* The older the dish gets, the worse things get. Some brand new dishes have 100,000

ppm lead, and it's just shocking that these things are legal to sell, since cracks and acidic foods would allow future leaching well above the leaching for a brand new dish. Usually the safest ones are the dishes without any decorative glazes added, like a typical cheap white or off white dish as the ladies explain in their video about testing dishes. The glaze colors often come from heavy metals. EHP 2009;117(8):1195-201 explains that lead industry officials tried to convince the EPA that lead is "an essential mineral required for optimum growth and development". Lead was detected in 20% of baby food samples, one more reason to embrace making raw *vegan* smoothies from fresh fruits and veggies grown in *less* polluted countries. A 0.46 µg/dL elevation in lead in the blood decreases IQ by 0.38 points. ☺☺☺

Other less known sources of lead exposure are *indoor shooting ranges, chicken skin, cartilage,* bone broth, hunted animals, ayurvedic supplements, etc as explained in the 6 minute video by *vegan* MD Greger who also mentions the huge lead exposure at the 18,000 indoor shooting ranges in the US alone. Oregon Live found that some of these ranges did not even have the filters and ventilation working, with the lead going in kitchen, day care, gym, nearby public places and kids areas, being at 60-100+ times over the safe limit. A worker poisoned his 1 year old child by coming home and not changing his clothes (washing them and washing his hands). We still live in the Dinosaur age of lead bullets which are not banned yet. It's ironic that people who're supposed to bring World Peace and local peace, to be the most peaceful, tender, healing, mentally stable, get contaminated with lead known to make people more restless, aggressive and impair mental function. Hunting and eating the wild game afterwards is insane, if using lead bullets, since up to a half of the lead can pulverize in small particles inside the meat, leading to even possible death, if not lifelong brain damage for the cruel hunters who sometimes eat the fowl they shoot. Perhaps, the law of karma acts as a self-correcting design of the universe, since evolution favors the nicer and more altruistic people. California, is a few decades ahead of the nation in environmental regulations (has half of all electric cars too), and banned all lead bullets for hunting starting in 2019. At the Oregon investigation link above, out of 400 armories with high lead levels, only 0.25% (1) were in California, even if California is 12% of the population (that means 48 times less per capita). California regulates more than the rest.

12.7. CADMIUM & Arsenic

Cadmium

Ntr 2015;7(1):552-71 shows the cadmium levels in rice have increased 2.5 times in some areas of China between 1987 and 2006. Just like lead inside humans increased 300 times, it seems like due to the wide use of cadmium we're setting ourselves up for some heavy decontamination work in the future and a new set of diseases, just like many other new diseases created by

industrialization (sodium triggered hypertension, ω6 overload leading to more diabetes and brain inflammation, lead poisoning and neurological disorders from leaded gasoline and paint, pipes, brain disorders from mercury in amalgam fillings, etc.)

Arsenic

Arsenic is another heavy metal that is present in some foods. Rice is the most arsenic contaminated *vegan* food (even if organic). One study found IQ was 10 points lower for kids exposed to high arsenic ► EHP 2007;115(4):643-47. The study also found that fluoride intake is linked to lower height. 55% of toxic inorganic arsenic in the diet of kids between four and 24 months old came from cereal ► IHEPH 2016;13(4):361. Infant formula provided 9%. This arsenic exposure and IQ lowering can happen even during womb time (not just during lactation or early years of eating formula or instant cereal loaded with arsenic), as mom eats cookies, cereals, cereal bars, pancakes and things made with rice. I avoid all rice. Arsenic is high also in beers and wine, as well as other products or juices (grape juice, etc) that are filtered with diatomaceous earth as explained at JFP 2017;80(6):892-902 ► these filters leak lead and arsenic into apple, grape and other juices, so it is better to eat fruits and veggies with fiber than buy juices or filtered vinegar enriched with arsenic and lead. NJ 2013;12:149 found that Brussels sprouts, fish, also have higher arsenic and amazingly, toenail arsenic levels can be 30% higher in beer wine drinkers and seafood eaters, but not so much in rice eaters due to the fact seafood arsenic is incorporated into toenails more, but this doesn't mean rice arsenic doesn't do its damage, just that seafood arsenic is very absorbed into toenails; the paper also explains other studies found alcohol drinkers have higher arsenic levels, possibly due to alcohol impairing body's ability to eliminate arsenic. One more reason to give up alcohol, especially since spices like rosemary got 400 times more antioxidants than wine (ORAC score). Arsenic causes many diseases, infections, cancers, etc and can kill in 1 hour at 100 mg. Lentils and beans have much less arsenic and they got more fiber, 4 times more protein, much more complete protein, etc than rice. dr.. explains that protein powders sometimes have a lot of arsenic, as they use rice protein as source. ☺☺☺

For those into scientific details of arsenic damaging effects at low levels, see also tu.be...34. For a list of the rice with lowest arsenic, see youtu.be..Q8. However, given that lentils have no arsenic, much more fiber, 3 times more protein than rice, more complete protein, etc. I would not waste my time ever making rice, making lentils instead using the same rice cooker or a pressure cooker (automatic cooking 20 minutes you're done). For 72 years people used these arsenic drugs in the US in poultry, contaminating every chicken eating American with arsenic until 2016 when they banned it. The manure used on some *vegan* crops contaminated the soil because it came from the arsenic poisoned chicken, since not everyone uses *vegan* fertilizer. Decontaminating soils is very hard, but doable. New bacteria are engineered to do things like

that as AMB 2017; 101:5749-63 explains: phys.org...tion.html. Arsenic is also found in fish, wine and dairy, as well as poultry in countries that have not banned arsenic drugs like the EU and US did and even the US feed may contain arsenic due to contaminated soils from old manure used on the soil. Unfortunately, arsenic in soil from manure killed the rice plants, so the GMO guys came up with arsenic resistant rice that will accumulate arsenic and pass it to people with no problem, see more about this in youtu.be..w. They came up with GMO glyphosate resistant corn that can be sprayed with 10 times the glyphosate and leads to a corn vastly different in pesticide content (over 10 times sometimes) and other parameters. Pesticides can cause infertility, Alzheimer, *cognitive decline*. Why corn? Meat eating needs 10 times the land, so they need all corn to feed to cows (increase yield via GMO due to lack of land), so people eat cancer causing beef and poison the food of *vegans* too with glyphosate and arsenic, from arsenic containing drugs given to chicken to grow faster and resist infections in the ultra crowded factory farms where chicken get sick a lot faster due to crowding and feces, and give us new H_1N_1 and other flu viruses (bird and swine flu). Carcinogenic glyphosate is in all cotton clothing and all food products using the GMOs resistant to glyphosate. Companies claim it's a negligible effect on health. An ad I saw said thimerosal mercury in vaccines increases IQ (but it does the opposite). Not all GMOs are bad, but we could all go *vegan* or eterni and no longer eat the bad GMOs. ☺☺

12.8. ALUMINUM ($^{27}Al_{13}$)

Blood Al *was up to 3 times higher in* those with Alzheimer, 0.66 µmol/l or 18 µg/l *vs healthy volunteers* 0.21 µmol/l or 5.6 µg/l ► J Inorg Bioch 1998;69(3):171-6. This could be reverse causation, meaning the Alzheimer caused a leaky blood brain barrier, which caused aluminum buildup in the brain. However, as Epid 2015:25(6):769-73 reports, just because antacids with 1-4 g aluminum don't seem to be associated with Alzheimer, it doesn't mean Al doesn't cause it in others not covered by the studies of the 2015 review, simply due to the possibility of Al absorption blockers, or brain uptake blockers in the diets of those people, or even their protective DNA. Not everyone was followed for 50 years to see effects, and we know Al causes biological entropy, DNA damage, besides other brain disorders. The "effect of endogenous Al accumulation is proven neurotoxicity, *increased* inflammation, *and oxidative stress*" ► Ntr 2023; 15(9):2221. Al "induces central nervous system impairment": EES 2023;264:115401. Since 2000, heart disease deaths fell 14% (they removed coronary artery plaque, but not the carotid artery plaque that causes Alzheimer, see pic), but Alzheimer deaths increased 89%. A vegan MD wrote a long article explaining, via a 100+ year timeline, how aluminum causes Alzheimer. "Foci of aluminum were detected within the nuclear region of a high percentage of neurons containing neurofibrillary tangles (Alzheimer proteins). The adjacent normal-appearing neurons… were virtually free of detectable aluminum" ► Sci 1980:208 (4441):297-9. A 74 pg paper explains Al causes dementia (if link expires, go to doi to get pdf). Al chelator removed Al, delayed dementia

progression ► TDM 1993;15(6):602-7. “aluminum binds selectively to PHF tau, induces PHF tau to aggregate, and retards the in vivo proteolysis of PHF tau… aluminum could serve as cofactor in the formation of NFTs by interacting with PHF tau.“ ► HH 1995;10 (4):969-78, so Al injection caused tangles in the brain: bad proteins could not be split, removed.

Could Al have contributed to this rise as people ate more processed baked goods (full of Al), HFCS (high fructose corn syrup in soda and 1000s of processed foods, fructose is associated with dementia JPAD 2023;10(2):186-92, HFCS possibly causes fat deposition on arteries causing starvation of brain and inability to clear brain of amyloid proteins, see picture of Alzheimer carotid artery, Al causes plaque too due to lowering blood biological entropy, so avoid all bakeries and dairy that has industrial levels of Al added at times) cheese, got more phone WiFi, tablet, laptop RF destroy their brains, and also became more obese (obesity a risk factor)? Knowing the Alzheimer risk factors and mitigating them seems like an urgency, since what causes Alzheimer causes non-lethal outcomes like low IQ, brain problems. Brain gray-matter Al in people who died of a *neurologic* syndrome of unknown cause was *25 ppm as compared with 2.2 ppm* in control subjects, about *11 times higher* ► NEJM 1976;294(4):184-8. Autistic kids had *3.5 times more* Al in their hair, 59.2 ppm, compared to healthy kids level of 16.8 ppm. They also had 60% more lead (3.31 vs 2.06 ppm) and 56% more mercury in their hair (0.39 vs 0.25 ppm) ► BN 2015:545674. Avoid any cream, body wash, antiperspirant, shampoo with Al colors or dubious ingredients, as the Al/toxins can get to the brain via retrograde axonal transport, leading to Alzheimer or other brain problems, even atherosclerosis. Al increases entropy in biological systems, so a “texture” Al ingredient may cause a stroke. The 2015 CDC report on US lifespan explains that in 2015 US lifespan dropped for the first time in 20 years, due to a rapid increase in Alzheimer deaths. The 2016 CDC report found a 2016 decline, the first time in 54 years we had a 2 consecutive year decline in lifespan. Alzheimer deaths increased the most in 2015 "From 2014 to 2015, the rate increased 0.9% for heart disease, 2.7% for chronic lower respiratory diseases, 6.7% for unintentional injuries, 3.0% for stroke, 15.7% for Alzheimer’s disease, 1.9% for diabetes, 1.5% for kidney disease". From 2016 to 2015, it increased 3.1% for Alzheimer, while decreasing for heart disease and cancer.

☺☺☺ALUMINUM TOXICITY:☺☺☺

Before 1820s, when Al mining began, there was hardly any exposure to Al. Spring waters, etc have very low Al levels compared to many vitamins, pills and some foods. Today, however, many foods, vitamins, medicines, cosmetics have Al hydroxide, Al Lake colors or other Al compounds. After reading studies about what Al does (especially in people who don't eliminate it well, including infants and kids), you might have a higher motivation to read the ingredients of shampoo, cream, sunscreen, lipstick, makeup, vitamins, foods to avoid Al. "Al appears to

therefore drive ALZHEIMER relevant amyloidogenic pathology directly, by aggregation of Aβ42 peptide monomers into higher order structures that subsequently form into senile plaque cores" ► FN 2014;5:167. Those chronically exposed to Al were 71% more likely to develop ALZHEIMER in this study of 10567 people ► NL 2016;610:200-6. Al-uminum gives Al-zheimer. Easy to recall. Al Hydroxide in vaccines linked to ►►...► NEURON DEATH ◄...◄◄ and Gulf War Syndrome ► NM 2007;9(1):83-100. Al diminished hippocampal neurogenesis ► JVS 2016;17(1):13-20. Al Hydroxide, used in many vaccines, leads to motor deficits and ...neuron degeneration., as well as symptoms like ALS, dementia, ALZHEIMER ► JIB 2009; 103(11): 1555☺☺ "Given that the neurofibrillary tangles we observed in human neurons always developed in conjunction with cytoplasmic Al, we hypothesize that Al plays an important role in their formation and should therefore be reconsidered as a causative factor for ALZHEIMER." ► Neurot 2006;27(3):385-94. Al speeds up NEUROBLASTOMA CELL DEATH: at 200 µM Al(mal)3, only 22% of cells were viable at 48 h and no significant cell death was observed upon treatment with its respective maltol control. At 400 µM it was worse ► PO 2014;9(5): e98409. Vaccines with Al hydroxide ($Al(OH)_3$) seem to be causing AUTISM like behaviors in mice ► JIB 2013;128: 237-44. Number of Al-containing vaccines kids get is associated with the number of AUTISM cases. Mice injected with $Al(OH)_3$ experienced memory loss, loss of neurons in the spinal cord/motor cortex ► IR 2013;56(2-3):304-16. The more frequently women shaved their underarm while using Al antiperspirants the earlier (sometimes by 20 years) they were diagnosed with breast CANCER ► EJCP 2003;12(6):479-85. Breast area Al levels at 268 µg/l in breast CANCER patients, more than double the 131 µg/l concentration in healthy subjects' breasts. ► JIB 2011;105(11):1484-8. A woman with Al toxicity symptoms had them disappear right after stopping using underarm antiperspirants with Al (vegan label sticks are usually Al/paraben free, as the container indicates) ► AJM 2004; 117 (12):956-9. Those who shave their underarm and then apply Al rich antiperspirants increase their Al concentration 6 times more than those who don't shave. The breast cancer location in the upper arm quadrant (near antiperspirants use area) became twice as common in recent years as Al antiperspirants became the norm. There is nothing good Al does for us, why is it legal to add to any food? "Al disrupts biological self-ordering, energy transduction, and signaling systems, thus increasing biosemiotic entropy. Beginning with the biophysics of water, disruption progresses through the macromolecules that are crucial to living processes (DNAs, RNAs, proteoglycans, and proteins). It INJURES CELLS, circuits, and subsystems and can cause catastrophic failures ending in DEATH." ► JT 2014:491316. "Given that the toxicity of Al has been widely recognized and that Al is not a physiological component in human tissues, reducing the concentration of this metal in antiperspirants is a matter of urgency." ► JTEMB 2014;28(2):147-50. Thru retrograde axonal transport (transport via axons of neurons) even if we eat only raw produce without Al, we can get toxic brain levels of Al via cosmetics, shampoos, skin being in contact with neurons and indirectly the brain. ☺☺☺

ALUMINUM (Al) Detoxification using CILANTRO, silica or silicon dioxide (inactive ingredient in vitamin pills, used to avoid clumping of solids in capsules) rich water, SILICIC acid rich foods:

Cilantro is used often to get rid of Hg, Ca, Pb, but it also takes out Al to some degree. The most common method to remove Al stored in the body is silicic acid $[SiO_x(OH)_{4-2x}]n$ (silica dissolves in water 0.1%, some forming H_4SiO_4 < 100 ppm (0.01%) ► FEBSJ 2012;279(10):1710-20; silicic acids are present in most mineral waters wik..Silicic_acid) ► ACLS 1996;26(3):227-33. This method is used in Alzheimer patients with high levels of Al ► JAD 2006;10(1):17-24; discussion 29-31. ☺☺☺ Silicic acid in potable waters has been associated with lower Alzheimer rates ► AJCN 2005;81:897-902; the study also found that those drinking water with Al > 0.1 mg/l had twice the risk of Alzheimer (0.1 mg/l is < the present EPA/FDA limit of 0.2 mg/l which may need to be lowered), while those with Alzheimer were 2.7 times more likely to have a low silica intake < 4 mg/day. Too much nano silica may be bad for some people, causing IBD, inflammation, ulcers via intestinal mucosa dendritic cell (they filter junk) cytokine release: JN 2016;14: 44.☺☺☺

Bananas have the most silicon (in the form of silicic acid) of any common produce 5.5 mg Si/100 g, but only about 2% is absorbed compared to about 50% from mineral waters (which have 0.5 to 2 mg/100 g) or green beans (2.5 mg Si/100 g). However, this doesn't mean this silicic acid can't remove Al, since the amounts in the body are small. Some *vegans* eat 10-20 bananas daily, meaning a lot of silicic acid. The silicic in the banana would probably prevent the absorption of Al from other foods, antacids or pills people might take, even if it is not absorbed, since the study found eating silicon rich foods prevents absorption of Al. Green beans may thus be more effective at heart and brain Al detoxification, as green bean silicic acid is 25 times more absorbable than banana silicic acid. For more on green beans and other high silicic acid foods, see ► AJCN 2002;75(5):887-93. The authors wrote BJN 2005;94(5): 804-12 with a list of 100+ common foods silicon content, and BJN 2009;102(6):825-34 with urine levels of silicon (used to measure absorption rates), which can be as high as 11% of silicon intake from bananas and as low as 22% from green beans, with averages of about 10 times *higher* from green beans, indicating that perhaps bananas have a higher number of monomers in its *polymeric* form of silicic acid, *harder* to hydrolyze in the gut and to *absorb*. *Monomeric* silicic acids are more absorbed ► CPB 1979;27(8):1733-9, since they're smaller than polymeric forms, passing thru the 4 Å radius lipoid membrane pore (page 7).

COMMON SOURCES OF ALUMINUM (Al) EXPOSURE:

The highest levels of Al in pills probably come from antacids, as seen at this CDC website ► "Antacids have 300-600 mg Al hydroxide (approx 104–208 mg of Al) per tablet, capsule, or 5 mL liquid dose. Buffered aspirin may contain 10–20 mg of Al per tablet. Vaccines may contain small

amounts of Al compounds, no greater than 0.85 mg/dose." Vaccine absorption can be 133 times higher than antacid or food one (40% versus 0.3% per one study). PT 2001;88(4):159-67 suggests *most vaccine Al is absorbed, compared to 0.3% from food, that would mean 300 times more from vaccines.* Given the rapid growth of the brain in the first year of life and studies showing neuron death due to Al, giving Al adjuvant containing vaccines that provide 4 mg of Al over a period seems like a real gamble. Using Al foil during cooking or Al cooking ware doesn't seem like a good idea. "The amount of leaching of Al was found to be high... the obtained values can be considered to be unacceptable" ► IJES 6(2011):222-30. All carbonated beverages in Al cans have acidic pH and this makes Al leeching into the can easier over time. Baking powder, some pancake/waffle mixes and frozen products, and ready-to-eat pancakes provided the most Al of the foods tested; up to 180 mg/serving ► FAC 2005;22(3):234-44. ☺☺☺

Many cake mixes, cheeseburgers, cheese products, baked goods, processed foods (even some of the organic juices and more "healthy drinks, foods and products") have sodium Al phosphate (SALP) approved food additive emulsifying agent. FCT 2008;46(6):2261-6 suggests most Al we absorb comes from food, not from the alum-treated tap water ► "Basic SALP is permitted by the FDA up to 3% in pasteurized process cheese (21CFR133.169)". This means if you eat 100 g of cheese you can get a maximum of 3,000 mg of this Al compound ($Na_{15}Al_3(PO_4)_8$ for example) or 205 mg of Al. If they use other variants of this class of compounds, you may get more Al. Thankfully, *vegans* don't eat cheese. The paper says that "some process cheeses were reported to contain 695 (Gormican, 1970), 411 (Pennington, 1989), 320 (Pennington and Schoen, 1995), 1,440 (Greger, 1985), and 470 mg Al/kg (Saiyed and Yokel, 2005)". That's 32 to 144 mg of Al in 100 g of cheese, a huge amount. The article explains 1911 papers came out about the possible dangers of alum baking powder; some non-profits asked FDA to remove the GRAS classification for these Al compounds. GRAS means that FDA doesn't test for safe tolerance levels. If you eat cheese, it is better to eat it unprocessed, or better yet, home made *vegan* ► youtube. Wikipedia entry for sodium Al phosphate explains that "The acidic sodium Al phosphates are used as acids for baking powders for the chemical leavening of baked goods. Upon heating, sodium Al phosphate combines with the baking soda to give carbon dioxide." That's why being *vegan* won't protect someone from Al caused Alzheimer (especially if other risk factors are high and elimination is not good), unless they avoid baked goods that contain this compound (sometimes listed on the bread ingredients, but often times not). I never eat bread/bakeries. Raw *vegans* noticed sometimes a vast improvement in health or curing of diseases that were present as processed food *vegans*, maybe they ate too many toxins or Al? Synergistic toxicity? Healthy folks blood Al is 0.006 ppm, Alzheimer folks blood Al is 0.018 in the study mentioned above, but in Alzheimer brains Al is 2-10 ppm. "The concentrations of Al in amyloid fibers in senile plaques located in both the hippocampus and in the temporal lobe ranged from approximately 35–50

ppm" (page 1581) ► JIB 2009;103(11):1579-84. This 35-50 ppm is also mentioned at IJAD 2011:276393 (end of section 3.2). *A 10 ppm average brain level only requires about 0.01 g of Al to get into the brain,* from the 1,000 g many people eat every decade. This is VERY possible and the numbers would alarm anyone who is aware that an infant gets at least 4 mg Al from vaccines and if much of it goes to their brain (body is small versus brain for infants), you can reach 0.2-1 ppm in theory thru vaccines alone triggering autism, if the kid can't eliminate it well, which often it can't because kidneys are not fully functional in 2-5 month old babies. Mercury destroys neurons in vitro at just 0.02 ppm for example and the study above shows 10.8 ppm Al levels make unviable half of neuroblastoma cells in vitro within 24 hours, 78% within 48 hours at 5.4 ppm (200 micromolar). Vaccine Al is 100-300 times more absorbable than the 7 mg they may get from infant formula in 6 months. *The numbers above show that the blood level of a metal, much lower than the brain level, never indicates exactly how much* Al *someone has in their brain, a little bit added each day thru capillaries and it builds up.* Al levels over 20 times higher than those of a middle-aged group were found in a brain autopsy study of elderly (Alzheimer) persons, roughly correlating over the age period with densities of senile plaques and neurofibrillary tangles... Clinical intervention to lower brain Al by chelation has slowed the progression of Alzheimer ► JAD 2001;3(6):541-9. ☺☺☺

At very high Al blood concentrations, even if temporary, the blood can coagulate, especially in capillaries of the brain. These blood clots can cause Alzheimer's Disease ► EG 2011; 46(4):225-32 and can inhibit learning. PO 2013;8(12):e82561 found that in rats with Al trichloride induced Alzheimer, blood viscosity and β-amyloid plaque were significantly higher. Al also facilitates stress fractures as it displaces calcium in bones. Food, vitamin, drinks, medicine colors in their Al "lake" form are a source too. “Slightly > 90% of plasma Al is associated with transferrin (Tf), ~ 7 to 8% with citrate, and < 1% with phosphate and hydroxide. Normal plasma Al concentration is believed to be 1 to 2 µg/L. Normal tissue Al concentrations are greater in lung (due to entrapment of particles from the environment) than bone than soft tissues… 60, 25, 10, 3 and 1% of the Al body burden is in the bone, lung, muscle, liver and brain, respectively.” ► JTEHBCR 2007;10(Suppl 1):1-269. We certainly need to fine Big Food/Pharma trillions for dumping millions of tons of aluminum in cheese and bakeries, antacids, etc. The evidence is clear: it is GENOCIDE to improve texture or other Vanity Properties to Kill Millions via Alzheimer. The only solution is the takeover by the gov, via the 11 companies of all these GENOCIDAL Phony Companies, who install their ☺abysmal IQ☺ clowns/puppets at the FDA to self-regulate their GENOCIDE. These same criminals then build 8 million palaces to congratulate these MASS MURDERERS. Vegan Cornell Univ. Professor, at age 85, explains that NIH low IQ folks got 29 institutes of health, and none of them deal with nutrition, when we know from bees, diet can make you live 40 times longer. NIH health professional pages for various nutrients (ω3 or Mg)

are pathetic, like made by 7th graders. They list foods under Sources in cups, half cup, 3 cups, 1 spoon, 1 ounce, 3 ounces, so you can never tell per 100g like at the USDA last column website. Also they need to rank them from highest to lowest, like USDA can, per 100g, separate vegan from the rest to encourage vegan diets known to prevent heart disease, the top killer. You know, these criminals don't just ignore☺☺☺ nutrition, since a nutrition program can make hospitals only 2K instead of 100K for a coronary bypass surgery, they fight it at every step thru the Genocidal Health care System that prioritizes pills and surgeries. Millions avoided surgeries by switching to a low fat vegan diet. The NIH pages on nutrients are like those made by 8th graders. If nutrition is advanced, all diseases are postponed by 3000 years, but ☺infinitesimal IQ ☺ buffoons can't comprehend that. Our pathetic gov of Jesus fraud Promoters can't even make a 200-900 page html or pdf on the most important 25 nutrients. But Jesus miracles get deified on 400000 churches' websites promoting fake miracles & Genocide/Slavery/Rape. Sports and useless stadiums get 50000 more money than the nutrition pages of NIH. Such low IQ.

12.9. DETOX with C, garlic, α-lipoic, glutathione, B_1, B_6, Zn, Ca, Fe, etc

NATURAL METHODS OF MERCURY, CADMIUM, ALUMINUM, LEAD REMOVAL

Some of the most popular chelation methods that have been tested in actual science studies (most of them are done on animals though) include α-lipoic acid (present in tomatoes, spinach, broccoli), garlic, vitamin C rich foods, vitamin B_1/B_6 rich foods, cilantro, onion, tomato, watermelon (due to lycopene), grapes and other flavonoid rich foods, chlorella, strawberries, the white pith of citrus fruits which contains pectin.

VITAMIN C RICH FOODS

1,000 mg of vitamin C lowered blood levels of lead by 81% within 1 week, while 200 mg of vitamin C had no effect; urine levels of lead showed little change, so the lead might have been eliminated in the feces. The best effects of vitamin C in many health studies were noticed from food vitamin C, not pill. One study tried 1,000 mg of vitamin C, got no results or it took much longer and the results were milder (due to higher levels of lead orthomolecularorg...4.pdf), so this may not work so fast and well in every case, as the mechanism thru which vitamin C does it may be highly dependent on other factors such as overall glutathione levels, oxidative stress from other sources such as AGEs, etc. However, eating vitamin rich foods is always a great idea and other studies show vitamin C reduces damage done by oxidative stress from many sources, not just mercury, lead or cadmium. With all this being said, we still can say that we live in the stone age, as far as our understanding of the safest heavy metal removal methods (and how not everyone is going to benefit the most from the same method). Just like in the 1850s we had no plumbing or sanitation and we defecated near our kitchens, creating a pool of infections leading

to huge infant mortality. Yet, arguably the most useful studies in humans indicate usually how eating food x leads to lower blood level of certain toxic metals due to higher excretion of heavy metals via urine. However, not all studies measure the amount of lead in the diet, urine AND feces, which poses a real problem, because in mice they noticed giving α-lipoic acid lowered the level of mercury in kidneys but moved this mercury in other parts of the body, like the brain. So, one can be easily excited that "blood level went down", but do we know for sure, 100%, that it went out of body and blood instead of going from the blood to another organ involved in recycling old red blood cells? Also, lowering blood levels of a metal doesn't mean we even began to remove 1% of the heavy metal in the brain. We need to have better brain scanners for heavy metals and to monitor in real time, daily, the lead level in each organ after taking "chelating food x" to know what is going on. Since such tech is non-existent, the only really useful studies are those measuring metals in both feces and urine, besides blood, as a result of an intervention compared to a placebo control group in a diet known to be VERY low in the toxic metals, so we can compute the net outflow of those toxic metals (lead, mercury, etc) from the body correctly. As you will see, such studies are VERY rare, perhaps less than 10 total, if any. Moreover, just because there is a net outflow of lead from the body as a result of eating "chelating food x", it doesn't mean that some of the lead, or mercury from one organ is not moved to the brain, in the process of detoxification. Without knowing what is going on, we can't come up with the least destructive and the least "partially reabsorbing" methods of heavy metal removal. Hence, we need more science, not stadiums, world cups, more physics and chemistry, from 1st grade, etc. ☺

CITRUS PECTIN IN CITRUS FRUITS

Modified citrus pectin is citrus peel pectin extracted from the peels and was effective at removing 74% of heavy metals in this study ► FK 2007;14(6):358-64. 100s of papers (JHM 2008;157(1):8-17 has human studies) have been published about using citrus peels to purify wastewater from heavy metals contamination. We get heavy metals from water and air too. That's why it's best to try to detox naturally by eating more pectin from fruits that have pectin. We never know how much lead our diet has today, since we can't measure blood lead daily. Apples, carrots, bananas have pectin too. ATHM 2008;14(4):34-8, is a human study showing how effective modified citrus pectin is in removing lead. This study showed a 161% average decrease in lead serum and a 132% increase in 24-hour urine lead. Carrots, oranges, bananas, apples are cheap high sources of pectin as this USDA link explains.

GARLIC (may cause infertility, low testosterone, testicular damage)

Garlic removed heavy metals in rats very well ► YMJJ 1999;40(5):483-9. Garlic protects rats poisoned with cadmium, ethylmercury and methylmercury; the effect was much stronger when garlic concentration was higher ► JKMS 1987;2(4):213-24.☺☺☺ 3 capsules of 400 mg powdered

garlic tablets daily (hypothesized to be equivalent to 1.2 mg or 1200 µg allicin wikipedia..Allicin so 3.6 mg allicin daily, how much you might get from eating 6 g of raw garlic) were found to be effective in lowering blood lead levels by 8 µg/dL from 43 to 35 in mildly poisoned people in ONLY 1 month. Anything above 5 µg/dL is considered bad. Garlic enzyme alliinase turns alliin into allicin as shown with formulas in the onion section, in a smoothie, but eating it doesn't, unless you chew it super well. Alliin was as effective as insulin in controlling blood glucose in rats; lower glucose spikes may be also why Ntr 2019;11(7):1504 found garlic eaters live longer. Garlic makes liver cancer less likely, logical since it binds the heavy metals and toxins in the detoxification organ, the liver, plus stimulates Gpx. Allicin, Amazon...M, is present in many garlic products which can also remove several toxic metals ► BCPT 2012;110(5):476-81. Allicin has 2 sulfur atoms; thus, it binds mercury easily. Garlic contains a lot of sulfur-hydryl groups that oxidize heavy metals making them water soluble. The garlic selenium Se (14 times > bananas, 35 times > watermelon, 140-400 times > apples, 28 times > oranges) helps trap mercury also.☺ "garlic appears to enhance the functioning of the immune system by stimulating certain cell types, such as macrophages, lymphocytes, natural killer (NK) cells, dendritic cells, and eosinophils" ► JIR 2015:401630. It seems ideal to avoid eating garlic 3 hours before going to bed, unless you enjoy burping all night. Too much garlic causes gas due to fructans. The Se can detoxify and cause acne, not something to eat before a big event, or any detox food.

GINGER

Ginger diminished the toxic effects of lead in rats by enhancing the levels of reduced glutathione, glutathione peroxidase, glutathione-s-transferase and catalase ► JFST 2014;51(5):908-14. Mercury-glutathione complexes are the main way we eliminate mercury via urine/bile ► AMR 2002;7(6):456-71. All sulfur rich foods are helpful too, like cruciferous ones, because mercury binds to sulfur (and selenium) easily. ☺☺☺

CILANTRO

Cilantro was hypothesized to very effective at removing heavy metals (especially from the brain) based on results in AER 1995;20(3-4):195-229 and AER 1996;21(2):133-60. Cilantro chelates lead ► JEP 2001;77(2-3):203-8. See also the chelation paper SWJ 2013:219840.

Several papers suggest using fruit or other types of insoluble fiber to remove heavy metals or to aid chelation via other methods to prevent any partial enterohepatic recirculation of the heavy metals chelated via whatever method back into the body. Liver makes bile acids from cholesterol and the bile contains waste products that the body wants to get rid of also. Bile salts are solubilizing the fats and fat-soluble vitamins A, D, E, K in the small intestine, enabling their digestion. The bile (which is further concentrated by the gallbladder up to 5 times by removing

water, during fasting periods) is released in the duodenum (the 12 inch first part of the small intestine). 500 mg of cholesterol are converted into bile acids daily (humans secrete 400-800 ml of bile daily), to help digest fats, vitamins. If we eat cilantro to detoxify, it pulls mercury from the brain and the bile eliminates it and if there is nothing in small intestine to trap the mercury (certain fibers and sulfur rich foods) beyond the usual very low amount of fiber, some of the mercury is reabsorbed into the bloodstream and body via enterohepatic recirculation (the process thru which for example a bile salt is reused 20 times by the body, since the venous blood in the ileum reabsorbs most bile salts). The small intestine is made of 3 sections, 1st is duodenum (1 foot long) which breaks down food via enzymes; 2nd is jejunum (2.5 meters) which absorbs most nutrients via enterocytes lining up its walls for transport via portal vein to the liver; 3rd is ileum (3.5 m) which finalizes enzymatic breakdown of carbs and proteins and absorbs B_{12}, bile salts and other nutrients. Once nutrients were absorbed, the hepatic venous system will take all nutrients and send them to the liver for processing, before they're distributed to various organs. JAFC 1999;47(11):4714-7 presents wheat bran fiber method of mercury chelation used in animals (probably humans too in other studies). ☺☺

THIAMINE OR VITAMIN B_1 as B complex supplement or foods

See the studies on heavy metal removal above in the vitamin B_1 section that talks of thiamin and other fat-soluble forms of B_1. Furlsultiamine is a synthetic allithiamine like the one found in garlic. The fat-soluble B_1 in garlic takes much longer to eliminate than the water soluble 24 hours thiamin in vitamin pills. This fat-soluble B_1 crosses the blood brain barrier much easier, enabling the removal of heavy metals in the brain. Autistic kids often have low vitamin B_1, and higher metal load, indicating metals may lower B_1. The fact that autism symptoms improve while heavy metals elimination increase upon taking one of the many fat-soluble B_1 forms (autism symptoms improve even after a water soluble vitamin pill BMCP 2011;11:111), such as garlic B_1 or others, indicates that B_1 may be one of the mechanisms thru which garlic removes heavy metals in the brain and body, especially since allithiamine has 2 sulfur atoms like allicin does.

VITAMIN B_6 ► IH 1987; 25, 93-97 explains how B_6 can chelate lead in rats.☺☺☺

TOMATO

Ntr 2015;7(1):552-71 covers a few of the popular heavy metal detox methods such as tomatoes ►"tomato has been reported to produce metal chelating proteins and phytochelatins when exposed to heavy metal ions [86,87]. In fact the oral administration of tomato has been shown to significantly reduce the accumulation of heavy metals (Cd, Pb and Hg) in the liver of rats [88]." Tomato and watermelon have a lot of lycopene, another antioxidant that is going to help the body fight oxidative stress, freeing some resources and more glutathione perhaps to bind

mercury and take it out of the body. Anything very rich in AGEs inhibitors will reduce oxidative stress and make the work of glutathione peroxidase and other detox enzymes easier.

ZINC, CALCIUM, IRON

Ntr 2015;7(1):552-71 explains more about taking zinc, calcium, iron rich supplements or foods. Zinc, Cadmium and Mercury are in the same group having very similar chemical properties as you recall from high school chemistry. This competition for the same enzyme sites makes it easier to displace cadmium and mercury or at least prevent them from doing too much damage while the detox goes on using vitamins, foods, etc.

☺☺☺CHLORELLA, STRAWBERRIES☺☺☺

Chlorella removed mercury in mice brains and other organs ► JTS 2011;36(1):121-6. Mike Adams reported he trapped the following % of mercury in a gastric simulation environment: Clean Chlorella: 99%, Hemp Protein: 98%, Peanut Butter: 96%, Strawberries: 95%, Cilantro Leaf: 95%, Raspberries: 92% Cacao Powder: 91% Wheat Grass: 90% Coconut Granola Cereal: 89% Barley Grass: 89% Acai Berries: 88% Wheat Flour: 86% Nori Powder: 85% Hawaiian Spirulina: 83% Blueberries: 83%. These Mike percentages are assumed by him to work in removing mercury you eat (fish and even fruits and veggies with traces of mercury) by adding mercury trapping foods like strawberries, etc. They don't mean that if you got mercury in some tissue, eating strawberry will remove 95% of it. Removing deeply deposited mercury is much more complicated and often times requires some strong chemical chelating agent, from a man made or natural source (like cilantro), as some of the papers above explain. The ideal strategy is to avoid depositing mercury in tissues by avoiding amalgams especially, since getting it out is far harder and often times impossible from certain locations that the chelating agent can't reach. Cilantro alone can cause heavy metals to come out via bile secretion into the intestine, but then it is re-absorbed if you did not eat MERCURY and heavy metals absorbing foods like pectin which trap the mercury in the intestine. Cilantro mobilizes heavy metals in bones and the central nervous system, including mercury stored in the intracellular space (attached to mitochondria, tubulin, liposomes etc) and in the nucleus of the cell (reversing DNA damage of mercury). Cilantro mobilizes more mercury from tissues than it can trap in the intestine, so to avoid re-absorption in less safe areas of the body, one needs to eat with cilantro a lot more mercury trapping things. Cilantro causes the gallbladder to dump bile with heavy metals into the small intestine. The bile-release occurs naturally as we're eating and is much enhanced by cilantro. If no pectin, strawberry insoluble fiber, or chlorella or other trappers of heavy metals are eaten with cilantro, the heavy metals are partially re-absorbed. One can also make a smoothie of cilantro alone, add alcohol and use this tincture to rub the joints to stimulate the removal of mercury. The wrists have dense autonomic nervous system endings (axonal uptake of cilantro)

and are crossed by main lymphatic channels (lymphatic uptake). Garlic protects the white/red blood cells from oxidative damage from heavy metals entering the blood as a result of cilantro enhanced bile secretions of heavy metals, so try to add garlic to the smoothie of cilantro, pectin fruits plus chlorella (cleanchlorella brand has no heavy metals, unlike others) or strawberries.

☺SELENIUM RICH FOODS☺

Se is under sulfur in the periodic table, having high affinity for mercury. Because of this, bioactive selenium reaches deep into the body where mercury is stored. Nutritional yeast has 140 µg of Selenium in 100 g, and 50 g of protein, being the richest source of selenium after Brazil nuts. Brazil nuts have 1917 µg of Selenium in 100 g, or about 20,000-50,000 more than apples, more than any other food on Earth. You only need 2 Brazil nuts (see the Selenium section above) or about 4 g to get the daily needs of 70 µg of Selenium. For more on selenium trapping heavy metals and best foods containing it, see the selenium section.☺☺☺

If you read many papers and websites on the mercury removal topic, you will see that chelating foods work best in combos, for example cilantro can pull stuff out of the body, but can't get it out well, so chlorella helps with that or humic acid or maybe strawberries or peanut butter. So, one can make a smoothie with pectin rich fruits or veggies (apples, oranges, bananas, citrus, carrots) and then add to the smoothie cilantro and strawberries (the insoluble fiber to trap the mercury cilantro pulls), etc. Or eat a little cilantro daily and your normal fruits and veggies. There are not many papers on some of these combos, but if you know someone who can do urine testing for free, you can see which combos draw the most mercury into your urine out. Since every person is different biochemically, what works best for one doesn't always work for all, so listening to intuition or spirit telepathy may help in eating the right foods to drive out all aluminum and heavy metals that can easily be pulled naturally over a period of 30-150 days or so, depending on how much has accumulated.☺

PFHN 1989;39(3):279-86 explains that even spices, dried fruits, nuts, ginger can have heavy metals in them such as cadmium ► "Mixed spices generally exhibited higher value for trace metals specially lead (6.6-9.2 µg/g), cadmium (0.65-1.34 µg/g), iron (142.3-285.0 µg/g) and zinc (64.2-65.8 µg/g). Dry fruits contained relatively lesser amounts of heavy metals than plant nuts. Almonds contained higher levels of lead (1.02 µg/g) and cadmium (0.24 µg/g) than other nuts and dry fruits." This shows how important is to detoxify with cilantro etc once a year or 6 months, since heavy metals accumulate in the brain, nervous system too and can cause Alzheimer, lower IQ, etc. 1,000 g of ginger can have about 1 mg of Cadmium ► Sprin 2015;4:107, 1,000 g (2.2 lb) of almonds can have 1 mg of lead. If the enzymes that normally do the detox are not working properly in some people, they increase their risk of neurological degeneration, Alzheimer, etc dramatically if they don't use detoxifying foods.☺☺☺

12.10. AIR VITAMIN- NEGATIVE IONS (kill dust mites, bacteria, reduce anxiety, heart rate, blood pressure, asthma, allergies, flu mortality, car accidents, typos, aggression, depression, improve IQ, clarity, cognition, happiness, mice died within 2 weeks of no ions in air)

Negative ions reduced headaches by 78% and improved cognitive performance (telepathy probably too) by 40% in some studies below. Mice die in 2 weeks when there are no negative ions, rats in 3 weeks. Negative ion generators usually use 1 watt of power, very little. Hundreds of studies show the benefits of negative ions and the harmful effects of positive ions. Negative ions lower the heart rate, blood pressure, body temperature, depression, work turnover rate, unhappiness. In Japan they know about it: in any building with air cooling and heating they got *built in* negative ion generators to prevent negative ion count to go to 0.

Cognitive performance increases 15-40+% in those exposed to negative ion generators (visual memory over 40%) versus when exposed to dummy (placebo control) ion generators that emit no negative ions ► IJP 1992;34(3):253-9.

Six of nine sub tests of a cognitive performance test were solved better, three of them statistically significant (verbal factor, reasoning, and perceptual speed), in the room with higher ion concentration 2,194/cm^3 vs. 1,038/cm^3 (many ionizers produce 3-10 times more than 2,194 and many effects on physiology appear only at higher levels as shown below, so cognitive effects differences probably also become much deeper at wider ion count differences. ► IJERPH 2015;12(11):14301-11. Headaches disappear in 78% of subjects with negative ions ► continuitycentral.com/HealthyBuildings.pdf or LH Hawkins & Barker, 'Air Ions & Human Performance' ERGONOMICS 1978;21(4):273-8. ☺☺☺

Positive ions increase Fight or Flight catecholamine called norepinephrine in exposures of mice up to 1 day wik...Norepinephrine or noradrenaline, hormone which increases anxiety, restlessness, blood pressure, heart rate, aging, uses up cellular resources etc. After exposure to 3-10 days, the mice became exhausted as norepinephrine became low and they could not mobilize the energy resources of the body. No such effects of sudden rise and then fall in catecholamines were observed with the negative ions in which we evolved over billions of years. ► ZBMHB 1982;176(1):72-8. Studies found that the people who live in offices with high positive ions have a much higher turnover and job dissatisfaction rate: they feel panic, stress, exhaustion perhaps. Maybe it is not the company, but the positive ions? A very cheap fix if true. ► gs.pdf

It's not just work performance and happiness, but even relationship at home with your family that will be affected by higher catecholamines that send people into panic and exhaustion. 78%

of people with acute anxiety and neurosis achieved complete relief in one Argentina study with negative ions alone. Many other studies showed benefits for computer fatigue, asthma, bronchitis, cough, sore throat, breathing difficulty, emphysema, hay fever, sore eyes, etc for 40-80% of those trying negative ions depending on their age (easier to notice for young people) ► continuitycentral.com/HealthyBuildings.pdf. NASA wrote in September 1978 that "negative ionization is associated with a significant increase in performance" ► ntrs.nasa.gov/..554.pdf

In 1933 Alex Chizhevsky, the builder of the first negative ion generator, exposed mice to an environment that is wholly unnatural, void of ions, and they died within 2 weeks, even if air was very well ventilated. It's well known that a sudden release of catecholamines can lead to sudden death, so maybe no negative ions lead to no good regulation of noradrenaline. ► Alex L. Chizhevsky, in On the Shore of the Universe. Unexplainable Pheno (Mysl', Moscow, 1995), 41-73 and Transaction of Central Lab Scientific Research on Ionification (The Commune, Voronej, 1933) ☺☺☺. In 1990s, scientists have repeated these animal experiments and animals died in the absence of negative ions (but slight presence of positive ions at 80 ions/ml) in 16 days for mice, 23 days for rats. The mice started to have eye problems, refuse to eat as usual, lose hair, act disoriented, many of their organs no longer working normally ► ZN 1997;52c,396-404.

continuitycentral.com/HealthyBuildings.pdf reports that Hawkins noted the effect of air ions on the ability of students performing high concentration psychomotor tasks; negative ions provided up to 29% improvement over normal indoor conditions. (Hawkins L, Barker, T. 'Air ions and human performance,' Ergonomics,1978;21(4):273-8). The pdf also explains that researchers in Hungary recorded a 20% reduction in road traffic accidents when ionizers were fitted in public service vehicles (Gy. Biro MD, CAND and F Scab Medicor, News 1970, Budapest) and that bankers in South Africa reported an 80% reduction in data entry error rate after their offices were equipped with ionizers. (Standard Bank of South Africa, Johannesburgh)

Rectal temperature in the pajamas with negative air ions tended to fall more significantly during the night-time. Salivary IgA (immunoglobulinA which is low in people with immunodeficiency) tended to be higher on waking when wearing pajamas with negative air ions ► IJOMEH 2004;17(2):295-8. ☺☺☺ Mice respiratory disease mortality increases in the presence of positive ions. Mice influenza mortality increases when air ion count decreases (regardless of charge), possibly because ions kill bacteria and viruses. Mice and rats display a charge-related metabolic response to air ions; this phenomenon also occurs in humans ► Sci 1976;193(4259):1209-13. Negative ions kill bacteria in the air ► BMCM 2016;16:173. Negative ions kill dust mites ► APJTB 2012;2(2):156-8. Thorax 1983;38(8):584-8 found that exercise-induced asthma was significantly attenuated by exposure to negatively ionized air. Negative ions inhibit the growth of microorganisms ► Proceedings of the 11th International Conference on Indoor Air Quality and

Climate; 2008. Installing negative ion generators in an intensive care unit led to a drop in Acinetobacter infection cases of 82%, from 11 to 2 ► ICM 2006;32(2):315-7.☺☺ Diastolic blood pressure values during the recovery period were significantly lower in the presence of negative ions than in their absence ► IJB 1998;41(3):132-6. Exposing humans with proper circulatory indicators six hours a day for a few days to negative air-ions in concentrations of 10,000 ions/cm^3 results in drops in systolic pressure in the 7-15 mm Hg every day and lower for diastolic. This effect works until both pressures reach a stable level, which probably can be considered optimal for a given person. However, exposing people to positive air-ions in concentrations of 25,000 ions/cm^3 results in destabilization of the circulatory indicators ► PJES 2014;23(2):521-531. Water generated negative ions (like ions in air near waterfalls) prevent cancer in mice ► CL 2006; 239 (2):190-7. Negative ions reduce heart rate and rectal temperature after exercise ► JHE 1993;22(1):1-9. Depression score improvement was 53.7% for bright light and 51.1% for high-density negative ions v. 17.0% for low-density ions. Remission rates were 50%, 50% and 0% respectively. ► PM 2005;35(7):945-55. Early in the 20th century, the proportion of positive and negative air ions on the earth was 1 to 1.2. Today the proportion is reversed 1.2 to 1 due to pollution and human activity ► SR 2016;6:26055. Ionized waterfall aerosol helps to improve pediatric allergic asthma symptoms and markers ► JA 2012;49(8):830-8. Negative ions lower depression ► BMCP 2013;13: 29. In light of this, it would be worth taking the air negative ion concentration in all the blue zones where centenarians live, known and less known (Bama, China, Aciarolli, Italy, etc) and seeing if there is a relationship. Bama and many India and China centenarian towns are in the mountains where negative ions are very high. Could this add years to human lifespan? One mechanism brain get happy and performance increases, accidents decrease could be thru the uptake of ionized oxygen by the brain when air has more negative ions. Everything in the biochemical processes is electric and based on electrons, ions, etc. Given how easy it is to design a study to measure mice longevity or worm longevity at different concentrations of positive or negative ions, given all else constant, diet, etc, I see no reason why this is not done soon, since it's so important for longevity probably given how cheap it is. It might lead to a discovery about brain oxygen uptake electron transport. Probably one day they will regulate how many positive ions a device can produce.☺☺☺ Here is a free paper with general information about negative ions. Here is another amazing paper for those interested in doing more research into the best type of ion generator, since some produce O_2^- ions, while others don't and the hypothesis is that those with O_2^- are better. Already studies show those producing more ions are better, since at low levels, no big effects are seen. Interestingly, another paper found that negative ions from water shearing were much more effective at doing certain things than those from corona discharge ► Negative air ions created by water shearing improve erythrocyte deformability and aerobic metabolism ► free paper ► IA 2004;14(4):293-7 ☺☺☺ The Japanese, world's longest living nation, are ahead of everyone on negative ion

products, having them everywhere. Wikipedia says some AC units reportedly incorporate tourmaline to provide negative ions ► "*The air conditioner main body employs a tourmaline-coated sheet. The sheet generates negative ions around the clock.* Even when the air conditioner is not running, it generates as many negative ions (2,500- 3,000/cc, 1 cc = 1 ml) as in a forest, stream or fall does, allowing you to experience them without incurring any electrical charges." "There are now patches TRMX-2i that the Chinese have developed to detoxify the body. They're made with 60% Tourmaline and "emits negative ions on average of 1300 ion/cm^3" You can even buy wall paint, transparent, that emits negative ions. Some studies above were done in rooms with such paint. Ion-Miracle book explains "Hospital burn victims have been treated successfully with negative ions. People living near natural water falls, a highly concentrated negative ion environment, live healthier and longer lives. Asthma and allergies are alleviated even cured in atmospheres rich in negative ions. Athletes have progressed more rapidly when training in environments high in negative ion. Negative ion generators have helped car drivers to stay more alert, feel less fatigued and have better reflexes. Women menstrual cycles are more regular and sexual capacities are enhanced in a negative ion atmosphere."☺☺☺

12.11.4. How cell towers and home-school-univ WiFi commit genocide and cause 100s of types of cancers, disease, infertility, miscarriage, memory loss, brain fog, headache, short life
12.11.5. How phones and WiFi routers completely destroy your brain, lower IQ, give Alzheimer

Intro: Phones & all wearables *(watches, smart glasses, fitness)* like Apple, Meta (see Jewish plan for USA, Jewish Meta CEO 2300 acres estate + mansions in many states/nations, spying on all via Meta glasses), Samsung (CIA/PLA), etc are used to spy/torture/kill via "invisible" methods: WiFi detects your location, breathing rate, etc, phones were made by militaries to spy on everyone and foreign spies love them (*hence China* banned all foreign phones, France banned iPhone 12 for too much radiation, I tested G310 5G Nokia (G10, C32 are even lower) in idle mode, when you just keep it in your pocket and the peaks/maximums are 100 times smaller than Samsung (9 vs 900 mW/m^2), and Apple, Google, T-mobile Revvl are worse than Samsung; we need fine these 5 trillion to build wired connections in all schools, hotels, houses, universities, ban WiFi (as bad as phones) worldwide unless emergency needs it. N. Korea executes those using Chinese phones. Having a cell phone before 13 means mental illness due to kids being more damaged by RF. You could use Nokia, *the lowest RF of any major brand; the* spies use US made Librem phone: US electronics, except WiFi card nobody uses due to security threats, Pure OS with 90000000

times fewer viruses + it has laptop and phone hardware kill switches; see how many trillions they spend to upgrade phones, they don't make any device to increase lifespan that all have, monitors arterial plaque and 100 biomarkers, only aristocracy police state devices; these soulless mobile phone companies never have World Peace in 3 months on phones, only trash apps). You see how USA outsourced manufacturing overseas, but this has huge risks, because every monitor, fridge, electronic device can be turned into a spying machine (like ESP 32 2$ chip in 1 billion devices, TP-Link routers) and into a weapon of brain writing and reading, to do the bidding of the exporting nation, parts look alike placed in big TVs to exterminate slowly 25 nearby apartments. Unplug all hotel TVs, electronic devices, use your own, nobody can monitor every supply chain activity as those factories give their modified military espionage dual use products to the big Samsung or Apple factory. USA has 25K soldiers in Korea, they're busy on bases. USA has no clue into what 75 million Koreans do via secret activities with exported phones, monitors. If you want a country in 9 years, you *need ban imports of all electricity using items*, and USB cables that spy on us. In 2025, the murderous aristocratic parasites kill slowly everyone with phones in an unbelievable GENOCIDE, as explained below, create endless bad phones/cell networks, wasting everyone's time with unlocked, locked phones you can't use on other networks. In a car, due to being a semi Faraday cage, the 1-10 GHz toxic radiation increases to compensate for the car metal frame blocking the signal, so people are destroyed as phone is way too close. We don't need cell phones and WiFi all the time, the radiation in most cities is toxic and needless; if people knew what phones and WiFi do to their blood, brain and every organ, they would use them 100000 times less, only for emergencies. Use LiFi if you absolutely need it for nonemergency. Everything ought to be wired or LiFi (WiFi or cell for emergency only), for public health, national security, brain health of citizen, sanity of the nation. Hackers and thieves use wireless, as it's a million times easier to hack. The 11 immortalist companies who care about workers would create a plush, comfy, rain and shock resistant phone holder near the license plate (right under it for example), outside the car, so that the driver seat radiation from the phone would be 1000 times lower and the phone would plug into a headphone jack whose wire goes to the driver's console, so if there is a need to receive phone calls or make calls, the driver and passengers won't be killed by microwaves, as the phone signal can't go towards them due to the metal at the back. The car antenna could be placed in the same place (slightly below the license plate or above it) to diminish car radiation. The 0 IQ companies today, made by ruthless aristocrats, simply don't care and encourage all to wear these deadly phones near them all the time, causing an epidemic of neurological disease, cancer, diabetes and every known disease, which is made worse by oxidative stress from microwaves. Perhaps, phones can act as instant torture devices, as weapons for aristocratic microwave and other invisible rays "beatings" of any worker they want, so they hide how lethal the phones are. They praise the Bible of slavery, beatings, genocide. After 90 million needless deaths, USA put a

scary warning on packs of cigarettes, but nothing on phones: it's genocide. The interior of oil or electric modern cars is truly toxic unless you turn off all connected services, as deadly as being 4 feet from a phone or WiFi router. Disconnecting is not even possible on some cars without calling the manufacturer. Thru the Immortality Party, we fine all car and phone companies trillions and merge them into World's Healthiest Phone and Car brands, Eternal Phones of the Eternal Utility Inc, and Eternal Motors of Eternal Travel Inc, two of the world's future only 11 companies. Kids who damage brains with phone or WiFi suffer from aggression, anxiety, low self-esteem. Iran hinted Jewish Facebook uses WhatsApp to kill all who don't like the Genocidal Jewish Bible. Phones are used by Mossad/spy agencies to kill slowly (via RF, location tracking) any Bible critic of the 25 cannibalism, genocide, rape quotes that 2 billion are brainwashed to believe as the Word of God. Spies are lethal, use phones only for emergencies: always off. Same for "google/meta glasses", ear pieces, they destroy brain/eyes even more than phones. Brain, breast, lung, blood cancer cells (not all get full cancer) develop in to all having phones/WiFi on. All "healthy" adults have cancer cells inside, only some get to full tumor. ☺☺☺

12.11.1. How to Protect Yourself from WiFi, car and cell phone radiation

Below are 16 pages everyone needs to read to save their life. Keep phones in airplane mode 99.999% of time (use them only for emergency calls or downloading an app or banking), turn off WiFi at home. Save all e-books, science papers as PDFs or files on phone before you go to work, if you want to read interesting stuff in your work breaks on your phone while in airplane mode. Microwaves create dry heat that produces carcinogenic acrylamide and AGEs, beside leaking huge levels of toxic microwaves that damage cells in many ways, such as neuron mitochondria death shown in the vitamin B2 section. Millions of people use cables and adapters to prevent WiFi from devices/phones. The back seat of Tesla cars is under the GPS/cellular antenna that is installed within the back window, so you will get a LOT of radio frequency there due to the glass roof too (some cars got antenna on top of the metallic roof that blocks that signal), as much mW/m^2 as when talking to some phones from 5-15 inches away: 30-100. More on some electric or gas cars with strong GPS antennas being as deadly as phones is in this EV section, that explains EVs have 100-200 times more kWh electricity (12 V battery in gas cars is 1.26 kWh capacity vs 200 kWh for big trucks) to read-write thoughts, emotions, movements and damage organs... to power extermination covert hidden world war devices. That is why you need research EV radio waves before buying a 50000 car with some 120$ GQ EMF-390 or other meter. We can't replace chemical smog with RF smog and create endless death. Some EVs radiate 100000 times less RF than Tesla when I'm in the back seat, car is on and idle, at least for 10 MHz-10 GHz frequencies GQ EMF-390 meter detected. 120$ GQ EMF-390 only records 0.001-9999 mW/m^2, 190$ TriField 0.001-20 mW/m^2 (total waste of money, costs 70$ more than GQ, and provides 100 times less information, graphs, etc, not letting you know which GHz the signal

comes from, etc, yet Amazon masses are fooled and order 1000 of TriField junk a month, while not ordering the way more useful and wider range GQ 390; I ordered it and it doesn't pick up a lot of stuff GQ picks up and returned it next day), while 375$ 200 MHz-8 GHz Safe Sound 0.000005-3180 mW/m^2 (ideal for lowest RF cars (see their site)/phone GPS systems used in airplane mode to minimize RF). Safe Sound says safe level is < 0.0001 mW/m^2. TriField is popular, but complete trash. GQ got RF browser, spy camera signal detection, etc. a lot more options than the other 2. GQ, made in USA, also about the same signals as Safe Sound (when you watch GQ, the values change every second or half a second, those are peaks every 500 ms or more; on the Safe Sound the same peaks are on the 1st line, 10 peaks per second, a lot more than GQ. Safe Sound also averages the peaks within 1000 ms, or 1 second, to give a lower value if you want to compare averages from other instruments. Safe Sound is much more useful, it allows you to see averages and how they triple when you connect an ethernet cable to your laptop ethernet to USB-C adapter, due to you bringing RF from the wireless router (that has WiFi turned on, that's why you always want to turn WiFi off on your router) thru the copper line even from 100 feet away. With GQ 390, you only see higher peaks, which you can also see on Safe Sound, but it's sometimes hard to know how much higher the average is since GQ doesn't average or display the lower values, only the highest peaks. The peaks are events that happen every 50-100 ms, other times it's nothing, but our eyes can't perceive 1000 values a second to see so many 0s and they don't list the 0s, only the peak values. GQ doesn't offer averages, only the peak every half a second or so, and the "Max" (second line) on Safe Sound is the same as "peak" on the top of the GQ screen. Safe Sound picks up higher intensities (3 when GQ picks 1 mW) than GQ at times, and vice versa.☺☺☺ You can do therefore everything without GQ, just by using Safe Sound. However, with GQ you can't measure a lot of lower intensity peaks (0.5 mW that GQ doesn't even display as a number), can't get average, so it will be impossible to accurately average the peak yourself, as it changes so much and you simply don't have the time to write down all values in 3 minutes to compare one area or setup with the other. GQ is better for some signals maybe that Safe may miss (GQ misses a lot more signals Safe picks than the other way around), hence someone stole my GQ to maybe find spy cameras and I may need order another one. Obviously CIA has devices 90000 times more sensitive (for tiny RF cameras that only send signals rarely and need to be detected in an area of high background RF) than these toys for everyday gigantic level RF devices (phones, etc), even yourself can order expensive meters online for 9000$. Safe Sound can be useful for Faraday cage, low RF areas or seeing average too, so it's a better device, can be charged via USB directly from laptop or via 2 alkaline batteries. Turn sound off to triple battery life. However, the Safe Sound can detect some high intensities more often, reaching 3180 maximum, while the GQ never goes beyond 1400 mW. However, for detective work of spy devices, etc and health, in RF minimal areas, the GQ and Sound are useful, as Safe Sound can detect stuff 1000 times less noisy than GQ, so for spy cameras and other stuff

in certain low RF buildings, Safe Sound is better. However, the best value for the money is GQ for most situations, as most people don't have places with such low values if using WiFi or in busy areas with WiFi from neighbors, cell towers, etc. If you have little time, you can jump directly to the paragraph explaining how to reduce radiation 1 million fold to background level (our bodies are used to and became optimized for over 4 billion years of evolution) when making calls from your phone and ensure the highest privacy as you use your cell phone as your router via a USB C wire to tablet/laptop, not a landlord or hotel WiFi or ethernet that he can spy on so easily. They too thought you can "evolve to adapt to lead or cyanide", same with 1-500 mW/m^2 WiFi, same lies. *tenderly gently kindly*☺☺ listen to music on mp3 players, never on phones to prevent losing 8 years of lifespan, 90 years of healthy lifespan. NEVER GET WIRELESS INTERNET from T-Mobile, Verizon, etc, 5G, always get *cable* one and turn off WiFi in your house, use only fiber, DSL, cable. Wireless give a house 100 times more RF than neighbors with wire connection and kills your family's health. *T-mobile, Verizon, all wireless internet without cable need to be fined to* create Eternal Utility Inc with the money, and wireless internet routers outlawed.☺☺☺

BASICS OF PHONES, CARS, COMPUTERS, TABLETS, LAPTOPS, DESKTOPS, watches, etc turned into WEAPONS OF GENOCIDE via microwaves: A phone (Nokia far less than major brands) emits about 3-5000 mW/m^2 at half inch on a routine basis, every few seconds while not in airplane mode, but 0.001 mW/m^2 (*or background, if in a healthy RF area, not modern cities that can have 10 on an entire block*) RF in airplane mode of course if no GPS background app is in use. GPS (using mostly 1.2 and 1.6 GHz) is not turned off in airplane mode as that frequency doesn't interfere with airplanes. CIA uses some GPS frequencies and maybe that's why these meters don't pick up GPS from phone well? Likewise, BT is not turned off from emitting when you enable airplane mode, so to get no RF, you need turn off BT, GPS/Location (maps apps) and WiFi. Some RF meters on Amazon etc don't measure all frequencies, like 1.2 or 1.6 GHz, so you won't see GPS and how it destroys your body (causes headache). Satellite and other weapons can also be used, using the nice receivers and glass roof that allows RF thru. With 46 antennas in Model S, we get all soaked in unknown weapon systems RF baths. Keep laptop 5 inches away from you, the edge of the laptop closest to you ought to be at lest 5 inches away, to prevent WiFi damaging you. Use Ethernet adapters, don't use WiFi, turn router WiFi off.

Australia, EU plan social media ban for under 16 to protect them from the evil music, evil ideas and content on facebook, tiktok and other trash sites. What we need is the banning of all phones for under 18 globally (under 12 a must as they become obese, depressed), due to radiation and giving people a small device the size of a watch or something that can be pressed to call emergency help and locate the person if attacked, until we execute all NEW (not those who did crimes before the end of the 6 month TV takeover, after the 20 hour a day education on all TV-radio for 6 months about basic ethics of nonviolence) violent criminals in the 10 year

global emergency state. LiFi needs replace WiFi to ensure biological safety, before we allow phones for young developing brains. Please don't microwave plastic, as it releases deadly plastic particles into baby or adult food. See 26 g 22$ mp3 players that emit no RF. youtu.be..I shows the measurement of RF radiation near a cell phone tower (800 mV/m), in a classroom full of WiFi laptops (800 mV/m), in front of a WiFi laptop a child who absorbs far more radiation (2,857 mV/m) and the background radiation in nature or in nearby places of the town (11 mV/m). Signal strength of 2,857 mV/m means a power flux density of 2,165 nW/cm^2 or 21.651 mW/m^2 or 21,651 µW/m^2, because V/m = √ (W/m^2 x 377) or W/m^2 = (V/m)^2/377 you can also convert the two automatically on some websites. W/m^2 is power density in watts per square meter.☺☺☺ 377 = 120*3.14 = 120π ohms = the characteristic impedance of free space. Power density P (measured in W/m^2) is field strength E (measured V/m) squared divided by 377. P=E^2/Z. Z is impedance. Away from towers in nature, it was 11 mV/m or 0.00032 mW/m^2 or 0.032 nW/cm^2. You can use 100s of devices, like this GQ EMF-390 reading 10 MHz-10GHz, giving good RF, electric and magnetic field readings, ultra useful for devices that vibrate to avoid birth defects, ocular damage, etc, like electric razors, toothbrushes (see values here), vibrators (avoid at all costs), etc. One thing to keep in mind is to never hold the GQ EMD-390 meter with your fingers/hand as manual says, since we're bioelectrical beings and can form circuits and cause readings to move from 2 V/m to 50 V/m in certain cases where metal from the table, aluminum nearby used to block RF, tall desk lamps, even when not turned on (plugged in) sometimes, etc form a circuit with the body near the socket where desktop is. Hold the meter from the little leash it has attached to it or for testing various areas without entering it, simply use a stick that holds the meter by the lace. Never allow hands to touch the meter. Never sit close to your laptop or monitor or desktop wiring that has V/m above 10, unless it's just 1 minute; or just sit like a yogi on 2 comforters and a pillow to raise yourself 6" or some small stool or inflatable, then place a box on the crossed legs, the keyboard and mouse pad on the box, no metal parts table, just a big box or tiny short desk for the monitor kept 3 feet away, in some area that has 30 times less RF than the minimum background city level in least polluted areas (can make this in a small bedroom or huge closet to protect yourself, especially if living in an insane area near a cell tower); check if the feet and knee areas have ≤ 3 V/m; 50 V/m is like under power lines, so measure the field where your hands type and mouse is and make sure it is below 3 V/m, otherwise, it will conduct this electrical field damaged blood from the hands to all organs and damage them, to your brain and give headaches and maybe cancer in 10 years. So, when not tying or mousing, take hands off them to diminish biological effects. Australia blushwood tree berry derived compound EBC46 worked in 2014 when injected to cure a lady's upper arm cancer. Nature explains it's a diterpenoid. The guardian also reported on it, while a mouse cancer paper is here. Stanford University then made EBC46 in the lab, since extracting tigilanol tiglate from berries is expensive and not feasible, as the berries only grow in a tiny area of Australia.☺☺☺

Wired mice have no RF, no unusual EF (electrical field, other than typical background 2-3 V/m on the palm side, though they do have 2-20V/m near the wire where we click with the fingers, so maybe get a slim flat mouse to have more space), no MF (typical 0.7 mGauss) usually, if they're a simple 3 button mouse with no LEDs, no fancy anything, like 100s of 3 button mice on Amazon. Some mice may have 40V/m. I use 10 ft HDMI and 4 USB cables to extend mouse, keyboard, printer and 3.5 mm extender for headphones (trrs, 3 black rings, choose the shortest possible to get to desktop as longer means higher resistance and signal loss: 8ft or 10ft); this way, the desktop is 10 feet away to avoid the EF pollution and the huge video card graphics card fan noise *(desktops are noisy, I use a corner and boxes with stuff, and blankets, etc to block the sound, then cover it all in some purple cloth to make it look nice)*. If airtube headsets (1V/m at ear/head level, 0.5 mGauss, but 3 mGauss at the speaker on the chest) are not good enough for online chats, you could buy a Sennheiser (4 V/m, 0.8 average mGauss for both USB or 3.5) that allows you to use 3.5 mm, if you chat over the internet a lot and need high quality mic; low (background level) 2 V/m are also 5$ headphones from Walmart or $ store, Amazon, etc, so always listen to music, video using 3.5 mm headphones, not the USB; or to chat online or make phone calls like I do to avoid RF, or try find a headset that uses 3.5 mm and use that only if EF pollution is lower; for music listening, an airtube with extender cord if desktop far away makes far more sense, to save your ears, you only got one pair of ears, keep volume low to prevent damage too; for listening to phone music on tiny 2$ earphones wired from $ store, it's fine, since the MF is 0.5 mGauss and EF just 1 V/m for earpiece, while for the expensive 5-10$ earphones with diameter 10 times bigger, the MF goes to 4-7 times bigger than tiny earphones, so you get to destroy your ears a lot faster (as we age, ears wear out, just like eyes etc if we listen to high MF and sound) to get a sound that really is not far better on desktop or phone or mp3 player: it's not like you will live 40 years extra☺☺☺ if you listen to big headphones or bring World Peace in 3 months, the big ones prevent you from wearing some 100% aluminum inside anti RF protection hat, since caps are not as good, RF clothing is poor, etc; it all depends on how sensitive you're to RF-EF too, how many headaches you get, but you can still ruin the brain without feeling anything, since only 1 to 3% of people get huge instant headaches from EF, wires, laptops, or RF, phones used just 3 minutes; phones generate 20-50 V/m within 0.5 inch of phone center, so keep phones in aluminum foil, taped with clear tape, in a cover you create for 2 cents, aluminum is much better than the Amazon phone cases, to neutralize all EF and RF.

12.11.2. The next 2.5 pages cover mp3 players (<28$) that bring World Peace, reduce RF radiation 1 billion fold & violent crime 1 billion fold too (if meditative music)

The best way to avoid extra RF is to buy some mp3 player to *listen* to music, as mp3 has 0 RF, negligible EF, ***0.5-2 mGauss MF***. They got various types, colors, they last 20-70 hrs on earphones, got: 40$ lavender 4.2x1.9", huge 81 g or 2.9 oz (very low vol speaker: 6 holes), OK speaker: WiFi

(browser) to avoid using phone for browsing, 40$ blue (3.07x2.28x0.33", 71g, *heavy*, 7 holes, 7 inch^2), good HD speakers (30 speaker back holes, so volume will be normal for meditative tracks, helps a LOT): pink/blk, HD spk (295g, 17x7cm or 7"x3", *smallest CD player replacement*, 2200 mAh, uses 1.5 watt (vs 0.8 watt big mp3 next paragraph), keep it plugged in 24-7 to use it as living room background music player; emits no MF, RF, EF, unlike the next paragraph big one; its sound is better at high volume for clips that have a lot of bass such as meditative tracks, etc). This one is portable and can be taken outside to play with dogs and kids and ensure a peaceful sound background, unlike the big one that needs to be plugged in, having no battery. ytmp3.cc, tomp3.cc and/or other sites/apps allow us to convert gentle youtubes to mp3 to listen offline (*edit the mp3 with "sound editor" from Microsoft Windows* or this one from the web or c*hrome extensions etc to cut 8 hours to 5-30 min, use repeat mode, to save space on mp3, player*):☺☺☺

My *favorite* and the 1st earphone mp3 player I ever liked is the 22$ (20% coupon, May 4th 2023) white/black with HD speaker. *I had many mp3s and this is* by far the *best, you* won't *find anything that light, thin, small, 0* EF, *0* MF, able to *play FM radio,* movies, *ebooks, pics, alarm,* record *voice*; sound is better than the 40-60 ones with no HD speaker, designed in Germany (sold on Amazon since 8-23-2022), can never turn on by itself, since on-off is a toggle button on the side that is impossible to move in the pocket (plus you need to press for 3 seconds the play/pause ⏯ button after that), 3.5x1.5x0.31" or 90x39x8mm (I got the white to see dirt, clean more often, since it has soft plastic (comfy, not cold or hot) that can catch dirt easier than metal. The recorder function is SO GOOD, for such a cheap device. Weighing ~*~ 26g ~*~, it is lighter than my *Nissan* Leaf *32g* key fob, *3-4 times lighter than most mp3 players*, 10 times lighter than a phone+case. Your toes won't be crushed if it ever falls, phones jump to new songs as you move if you have no screen lock. It's made of soft plastic, will never drop because the earphones will keep in hanging until you catch it, the plastic absorbs the shock way better than metal if it ever drops, sound quality is excellent, 5 star review, got music playing within 2 minutes of trying 1st time, easy to upload music from Windows 10 via the provided USB cable (PC sees it as USB drive, so drag 50 mp3s from desktop onto USB), read the booklet, Vol press for 3 seconds accesses Volume that can be moved up or down using ⏭ or ⏮, otherwise, it's the ultra useful "Back" when pressed once. I have only 20 songs I like a lot, so I never messed with the SD card which can hold 5000 songs, it came with, since some users reported issues with new SD cards. Just use the existing one, don't take it out. This is the best electronic device purchase ever. Carrying a brick (phone) just to listen to music and wasting so much power is unkind, this one lasts 1-2 weeks on one charge (turn brightness, idle *shutdown,* screen saver *to the minimum*, to save power; first week, until you learn how to use menus, buttons, the screen will use a lot of power). Phones need daily charging, so mp3 saves time. Upload your World Peace in 3 months songs and save the world. Get a C5 and drop 4 million such mp3s for free in areas where nobody

has Internet or mp3s. Be selfless. Allows alarm clock, ebook, video, so we can upload this book, immortality movies, books, music. It has real (no touch) buttons, so less chance of turning on by mistake in the pocket, loud vol, smallest square inch (5.3) total area of all; lasts 25h on earphone (not 70 as advertised, but that's true for most Amazon ones, they overstate the runtime), 300 mAh battery, 3.7 V, not 5V, so least EMF of all (nothing above background with earphone, while the heavy ones, 80g got 2 mGauss, unhealthy to sit near heart like that, 26g is so light, lighter than many earphones, go light, save your body *from dangerous fields),* most mp3s got 500 mAh; easiest to change songs without taking it out of pocket (simply press ▶▶I 2-3 times), has real buttons for play, next, when bored of a song, move to the other 20 (many listen to just their favorite 20 songs, you can rename them to start with digits, 1 thru 30, so the first 5 are the ones you listen to 90% of the time, that have the most eterni tone or melody to make it easy to switch tracks by pressing previous or next fewest times); the others *need to be removed from the pocket to change tracks* which is very annoying for wired earphones; touch screens break fast; this *one is the least likely to break if it drops*, due to being the lightest smallest, softest material for player. The wire will make its fall impossible: simply place the wire behind your shirt collar to prevent earpieces or player from falling; the player is so light it will never disconnect from the 3.5 mm connected wire, so it gives you plenty of time to respond if it ever falls, so you catch it. It's the easiest to charge multiple times from a tablet with USB port, in case all electricity, electric car battery, phone, TV signal are gone during EMP or nuke attack when FM radio helps; a phone lasts very little 12 hrs and uses 10 times the electricity of this player that lasts 70 hrs and allows you to listen to music to feel better in a worst case scenario of WW3.☺☺☺ You can also try the bulkier, bigger, 3 times heavier 33$ silver or blk HD spk 70g (metal case) 1.7"x3.6". All (except 22$ one) have 3 year protection plan option, though these last years before breaking. For a serene atmosphere in your living room, kitchen, bedroom try the amazing 6.5x6.5x1.18" $36 (May 4th 2023) world's greenest (0.8 watts usage at all volume levels, measured with a P3 meter) CD-mp3 player with remote control, SD (TF), USB; the Amazon description says "10 watt speaker", 10 watt refers to using some amplifier connected to it, playing the loudest track at max level, the maximum power it can consume then. It sometimes is listed as 55$, but a 20$ coupon if you click, so click and get it for 35. With the meditative tracks at max, all I get is 0.8 watt, this is 30 to 100 times lower than most CD players that are bulky, useless and space wasting: we want soft music. Because this has remote, it's by far the best of all mp3 players, also it uses no battery, like the pink one of the previous paragraph, so it will last longer. Press the moon button to turn off the lights. However, if you just always play the same track as background for weeks, the remote is not essential and a smaller unit may be better (like the pink one above), since this one does emit V/m 20-70 within 1 feet in front of it, less on the sides. Goes to 2 (normal) at 18", so don't sleep or work with CD player closer than 1.5 feet. I never use its CD or USB function, only the mp3 (CD paper never removed). The mp3-CD removes the need

of small mp3 player around the house, so the mp3 3”x1.5” player battery will last 1-3 weeks if you recall to press ⏯ to turn it off after use. I keep one CD-mp3 on my printer near my desktop monitor, plays while I sleep too. The 2nd CD-mp3 plays in the kitchen and sound goes into living and dining rooms which are the same huge room as kitchen as in most USA houses. I have *earphones* for desktop phone calls (no RF that way, wired internet) and for online videos, etc. Both play 24-7 the most serene clips on Earth: Oneness, OBE, etc; if you get a unit that makes odd static sound, simply initiate Amazon replacement and in 1 day they deliver the new one (drop the old 1 to UPS, no label). The big mp3 is for soft background music. The tiny mp3 is good at night when listening to vocal songs (unlike instrumental, vocal can be heard more thru walls if on speaker and can make too much noise) or when shopping, cleaning, gardening. ☺☺☺

TO MINIMIZE RF, dirty EMF, choose those tiny computers, even fanless ones, build your desktop from Dell, the Micro Form Factor OptiPlex are the smallest with the tiniest EMF, can go for TDP 35W not 65W for CPU i7 or i9 processor if you really want low EMF, place this tiny 7 by 7 by 1.4” “desktop” 10 ft away using extension cables for keyboard and monitor, these tiny desktops are 2.5 lb. Recall to export your browser bookmarks to an html file (Settings, Export/Import) on a flash drive, and import that file on a new computer browser, so you have your bookmarks there. Avoid turning on sync, you can accidentally erase all 900 bookmarks (since new PC has none) and then you need to go to the bookmarks.bak at C:\Users\bliss\AppData\Local\Google \Chrome\User Data\Default (backup of your bookmarks done daily) file and rename it to bookmarks, after you renamed bookmarks to bookmarks2 (in Windows 10, in Windows 11 this bak rename doesn’t work, so export your old PC bookmarks first). For custom dictionaries (with 5000 words you added for the specific technical language in your scientific field, etc), they're in some text files called standard.dic usually and found in the directory specific for that software (google it, LiBreOffice is C:\Users\bliss\AppData\Roaming\LibreOffice\4\user\wordbook), same way, copy and paste to flash and new computer. Dell is the best company for desktops and choose No Wireless Card for 0 RF when building it on the Dell page, so you can use ethernet adapter or simply the phone with a cable as your modem, placed at 10 ft distance or more. If you want to make a vegan food table, or write your own Immortality *for* All book of 2500 pages, you need a better PC that opens large files fast. Get a computer with Class 50 SSD, as it makes booting 25 times faster and many computer activities (word processing, web browsing) faster too. A 3.1 cheap (for newbies who don’t want to customize and take it apart, install new processor, DDR5 RAM or Class 50 SSD) lb desktop is the HP Mini, 849$, 35W TDP for i7-13700T processor..., way faster than the laptop i7-1355u processors (laptops are 3 lb too) or i7-870. HP is for simple users, Dell for advanced who want fast 2 day delivery for free. HP has a good i9-13900H 64GB 2x2TB (can do RAID 0 for fast boot and large files upload) for 1600$, for simple users who don’t need the i9-13900 desktop processor speed available in the Dell Micro, or the

Class 50 type of 12.4 Gbps 5.0 SSD for 2 TB drives (vs the cheaper 3-5 Gbps in many laptops). Go to Control Panel, System settings, power, advanced power settings, and change reserve, critical, low battery level from the default 2%, 4%, 6% to 39%, 40%, 41%, since you want to recharge before those levels get there: lithium ion batteries last longest if you use them 40-80%. This includes electric cars, phones, computers. Get a battery management software to stop charging after 80% of battery is full (most manufacturers have built in utilities software that allow you to set 70-90% as the desired max charge, since 100% ruins the battery). The Immortality *Nurturing* Agency☺☺☺ will require all computer operating systems to limit battery charging for mobile devices, laptops etc to 80% to prevent explosions that injure or kill people, start fires, etc, right now the utilities manufacturers use to limit charging to 80% for those who opt for that are not always in every laptop. If slow, you can always update your SSD, but it's too much of a hassle. For most people this laptop can be their desktop, that they use to connect monitor to, while turning off laptop monitor and also be a laptop for travel. While 13700T uses 35W for the base mode of 1.4 GHz, the 13700 uses 65W for the 2.1 GHz base and can reach 5.2 GHz max, not 4.9 GHz. 13700 is 11 times better than an older i7-870 people still have in old Dells in 2024, while 13700T 8 times better, i9-13900 14.4 times better. Use these sites to determine what processor to take, the more power, the louder it can get with the fan too, the heavier the PC too, 5 lb, not 3. Always get a mini, to save space and transport it easily, you support a green economy, all those materials, 7 times the weight, trashed... Dell XPS 8100 is 22 lb, while Dell Micro 7010 is 2.5 lb, BIG DIFFERENCE. Try gently go for higher class SSD, 40 is double the read speed of 35, so you can open large files twice as fast. Try RAID 0, instead of no RAID or RAID1, to double your speed (just make copies of important files since RAID 0 may fail easier, all data lost if one drive fails) by having 2 SSD drives of 256, 512 or 1 TB (they have to be identical drives, same class). A 2 TB SSD with read/write speed of Class 50 (up to up to 7,400/7,000Mbps) is 120$ from Crucial, i.e. 4.5 times cheaper than if you upgrade to the slower Class 40 2TB on the Dell configure your 7010 page. So, you can order it with minimum SSD, 256GB, to save 1212$ (price for 2 M.2 of 2TB each, 549 and 663 on the Dell page extras) - 200$=1012$, then get two M.2 2280 (22mm width, 80 mm length) SSDs of 100$ each, or 120$ 2TB Class 50 Acer 2280, or Lexar 2280 for 129$, 1 day delivery, or Silicon 99$, 1 day, to get a truly instant boot and loading of large files. For ultra fast SSD, try Generation 5, 2280 by Crucial, up to 12.4 GB/s instead of 7.4 GB/s Lexar Gen 4; you will replace the native SSD M.2 2230 (more square) with the longer 80mm one. The screw keeps the SSD in place, hence that semicircle on the opposite end. Knowing these basic things allows you to upgrade any computer in the future easily. Dell makes money by the customization. RAID0 or RAID1 require 2 identical SSD drives, see this easy to configure 2.5 lb OptiPlex Micro 7010 Dell. You can also get no RAID and then do it later with software, once you buy from Crucial 2 identical 2 TB Class 50 SSD. RAID1 speed is same as a single drive, it backs all data on both drives. Try DDR5 which is 4 times faster than DDR3, see the SSD location with screw on the

Micro 7010 Plus, see Micro 7010 2 tabs to press on to expose RAM slots, Amazon allows you to buy 64GB (2x32GB) slots for 144$, to get 64 GB, instead of having Dell charge you 285$ to give you only 32 GB vs 8 GB free option. This is like saving 300$, so with 1012 for SSD, it's 1312$ saved to do the upgrades yourself and get a PC blazing fast in 2024, a big deal for poor people, more than the price of the basic Micro Plus 7010 with i7-13700 CPU. The 7010 Manual shows which parts of the Dell can be replaced by yourself without voiding the 3 year warranty. See 14 sec video on replacing processor with new one, since Amazon has cheaper prices than Dell config for these upgrades, when time comes to boost your 7010 micro (ultra small form factor, USFF or micro). Dell sells for 609$ a cheap DDR4 desktop that you can upgrade to have more stuff as you get more money, still weighing about 2.5 lb. Buy the minimum config for DDR5 and SSD, just get their tiny case and etc to save 1700$ (basic system is 990 for Micro Plus, 3200 with all add-ons).

Both Micro and Micro Plus 7010 OptiPlex got 2 slots of SSD and RAM and can be upgraded to DDR5 2x32GB or 2x2TB (so you get RAID0 double speed). The 7010 Micro Plus got Display Ports only, 3 of them, while 7010 Micro got I Display Port and 1 HDMI, so you need an adapter to connect your HDMI port monitor to the display port of your Micro Plus 7010. Changing the processor voids the warranty, so you can do that if you feel confident, the 3 year warranty. It's easy to upgrade to *4 TB SSD and 64 GB RAM yourself, takes minutes, RAM is truly super easy*, SSD more complex, but you can. Adding 2 TB SSD to your 256 GB SSD (cheapest on Dell page ☺☺☺) is 1 minute long, replacing the existing SSD to a 2 set of 2TB Class 50 from Crucial is harder as your OS is there, etc. See video on replacing 256 GB to 2 TB for Microsoft Surface, it's different for different size SSDs. Apple doesn't allow you to upgrade SSD on iPAD and iMAC. See a video on Surface 1.7 lb, low EMF laptop SSD upgrade. Dell allows more complex configuration of desktops, so they sell more desktops than HP. Go to dell.com, choose micro computers to save the planet. They weigh 10x less than big towers, for roughly equal performance. A processor that is 12 years old, can be poor performance, see an example, so compare CPU. HP PCs are cheaper, but less powerful, hp.com and dell.com are cheaper than Amazon and far more secure as it's manufacturer direct ship, not a third party installing spyware. For desktops, go with Dell as they shrink them to 2.5 lb vs 3-5 lb HP, for laptops HP makes them lighter, so HP is OK. Dell allows customization of micro desktops lighter than laptops, HP doesn't for 3-5 lb units. Microsoft Surface Go or Pro is 1.7 lb, lighter than most laptops, so it may be best if desktop is good. Upgrade to Windows 11 and upgrade SSD and RAM to 64 GB and 2 TB.

Phone companies are unethical and turn phone on while in airplane mode, location, Bluetooth too in many background apps, etc, *so can spies, hackers trying to kill you or your womb baby with microwaves*, so best it to keep phone in aluminum wrap at all times, to protect body, blood from EF and RF; use phone only rarely to make a call once a week, send a text maybe if you can't access the wired desktop to send texts, desktop for all other calls. Please always use wired

headphone, since phone speaker produces high magnetic field even at a big distance of 1 inch from the body; GQ EMF-390 meter had a poor time to detect this phone electric field that oscillates, so GQ is best for RF, TriField for EF-MF; TriField is bad for RF, since it can only measure up to 20 mW/m^2, vs 9999 mW/m^2 for GQ. The tiny earphones with no MF can get MF increase 5 times if you go to max volume against the manufacturer recommendation, so not only do you destroy the ears, but you damage the blood and everything nearby by such high MF for hours a day, so keep volume low in the blue, never the red, for clips that are loud; if a clip is low volume, going beyond max won't boost MF, but the moment audible volume is loud, MF is high due to higher current; they got airtube headsets and headphones for phones (phone chat to prevent RF to ear and head) and desktop (airtube earphones provide better sound, like in real life, due to 9 times more air between ear and speaker), laptop too for 0 RF or EF to the ear/brain: Amazon 15$, 1 day ship, the very best for desktop (not for moving) since it has an extra ear 'leg' support to make it fall 80 times less than all other circular shape headphone without the leg, for moving, shopping, jogging, chores the curly tube above ear ones may work, but for me the 1 ear 8$ one fell super easily maybe try 11$ double ear, or @ebay 10$, gold $24, or cheaper 20+ models 8+$ (return easily), set of 3 Amazon 14$, 1 day ship, @ Walmart for $15 (set of 4, two week ship) or see google shopping for individual choices, for 4$, though having one for phone and one for desktop and a backup for when it breaks may be better; normal $ store cheap tiny wired earphones have high 15 V/m pollution if you measure it incorrectly in an area with metal and wires all around, make sure that you remove all metal etc and it should be 1 V/m, very safe; airtubes have the speaker far away, so that area of the speaker where the 2 tubes join is where the magnetic field needs to be measured to make sure it is safe, so you don't damage your heart or other areas. Since speakers are far away, you will need raise the phone volume higher to get the same volume at ear level, since the tube causes a huge loss of sound, but makes it more real life like since in real life our ears are not near the speaker; however, raising the volume leads to more magnetic field at the speaker, so make sure it's safe, since the joint speaker area, or the 2 mini speakers are close to the body, some have the 2 speakers merged, others have them separate, separate seems better for less EMF, though united as in the heart shaped 1st airtube is way better as it lets you know where it is and how to bend your clothing to raise it 2" above the body to prevent any damage using a 2" sponge attached to the heart shape of the joint speakers or some other trick of your clothing (using a tie clip to bend it away from the body, a clip to your outermost garment or sponge during summer days of one cloth only or etc) to raise it 2"; these airtube reduce phone RF to the head/ear by 1500 times, brain cancer risk by 500 times, headaches, EF with USB headsets; or, for more cash, maybe higher quality: $28, or 30$ (USA). ☺

Some websites say they found mice with low V/m, but I tested them and they're as polluting as other mice from Amazon that are 10 times more silent, so search for "silent wired mice your

favorite color"; nothing really works to reduce the wire electrical field or battery wireless EF, unless you use some grounding wire or EF blocking mesh shield, see more at lowemfoffice.com explains all mice will cause V/m 50 due to wire and filteremf.com mouse with low EMF allegedly and lessemf.com, keyboard shield. (see lessemf.com for EF shielding fabrics, not RF shielding only, since what is best for EF may not be best for RF). When measuring mice or any keyboard, place GQ EMF-390 or any meter on the device and remove hands from the meter, making sure there are no metal parts under or in the table, no sockets, huge electrical fields nearby, etc. Bad mice can produce 400 V/m. The more buttons, the more pollution in general. I think that even your favorite shape and lovely colorful one you see on Amazon has 20 V/m. If any odd V/m, use a computer desk without any metal in it and don't have aluminum around the work station as it can extend electric field from socket to the whole table. You can also try a mouse that is ultra slim silent, so you can hold hand 1 inch extra above it to avoid blood poisoning by EMF, always wired for keyboards and mice, since wireless has extra RF on top of the EMF. Some wireless mice emit 100 times more RF as a video shows. A normal wireless mouse emits a lot of RF, so I would not try it, the further you're from the desktop or laptop, the more RF emitted, so 20 times more RF (100 instead of 5 mW/m^2) for the same mouse if mouse is far from the USB nanoreceiver; it can emit 3 times more than the laptop example above (worse than cell phone towers) so 1 guy got 9 $\mu W/cm^2$ or $90mW/m^2$, a level absolutely insane that you only see near the most toxic cell towers that give cancer and endless diseases☺☺☺. Silent mice are covered in the section on LibreOffice and mice. I never used wireless mice or keyboards, avoid LEDs on mice, as that adds EMF, unless you find a brand that has no EMF extra from lights. Wireless disconnect way more often than wired and are heavier. A small Apple Magic keyboard is only 2 V/m electric field in the center, but 20-70 V/m in other areas, so typical of all keyboards, 0 RF of course; some claim some keyboards are low EMF, a website claims Microsoft Optical mouse has the lowest EMF of any optical one, but I tested it and was as polluting as all regular 8$ mice from Amazon, the basic 3 button (and probably also the 4-5 buttons) all produce the same level roughly. Most keyboards got 30-70V/m. Don't rest hands on the keyboard; my data was confirmed by lessemfoffice.com which explains all mice produce around 20 V/m EF around the wire where we press. ☺☺☺

Only touch keyboard when typing a little daily or get a mesh to protect it if you're really worried; wireless headphones are also a huge risk for all, not just Bluetooth phone earpieces, since they got a ton of RF on top of the EF. When the phone goes from silent to music without headphone, *mGauss goes from 0.6 to almost 300 mGauss on the lower half of the phone, which is 150 times above EPA safe levels and if you wear this near the body without some sponge it could do damage and cause shorter lifespan, same for any device that produces sound,* the MF goes *up to 300 mGauss even for a small amplifier teachers use to talk and people use for listening to music: 1*-3 sponges maybe to cushion you in case you press against something when moving, better

than anything solid, just tape them with some colorful decorative tape that matches the color of your hoodie or jacket, to make it less obvious if it's visible, to create a safe 1-3" *(2.5-7.5 cm) distance between phone and body, decrease body MF to 8 mGauss.* Wireless headphones are doubly deadly, as they flood you with 500 times background level RF, your head and body, leading to blood brain barrier and brain destruction, as much as sitting in front of a cell phone tower or laptop with WiFi. Mice exposed to 9 times less than what we get from far away wireless mice and same as the safest wireless headphones, or 1,053 nW/cm^2 became infertile after 3 generations ► Bioel 1997;18(6):455-61. The idea *is that kids get exposed to* about 3 times higher radiation *than the one that made mice infertile just by using laptop with WiFi in a classroom,* so in 100 years most may be brain damaged, infertile too, as the classrooms are soaked in these waves (it all depends on how high signal is near genitals too and brain to determine the cancer risk). So yes, a little tiny device, like a nanoreceiver for mouse or keyboard, could shorten lifespan of people by 25 years, and render an entire nation infertile in 90 years as everyone is excited about wireless, WiFi; so yes, some spy could kill all people slowly by plugging a dirty electricity causing phone charger into a socket of a house or shipping one and people who don't check it would be screwed, or ship a nanoreceiver or wireless device that creates 40 times above normal RF: so check your gadgets? ☺☺☺

The Styria Provincial Gov, Dept 8B, Provincial Public Health Office, Graz/Austria, commissioned an epidemiologist to conduct a study and he found that those nearest the cell phone tower, who experienced RF power flux density above 1,000 µW/m^2 (1,000 is 21 times *lower* than the level a kid *experiences* in a classroom in front of a *laptop*) had 121 times higher risk of BRAIN CANCER, 23 times higher risk of breast cancer, 5 to 8 times higher risk for any cancer. A study from Israel found that females exposed to above 5,300 µW/m^2, have 10 times the cancer rate of those further away from the cell tower ► IJCP 2004;1(2):123-8.☺☺☺ In preschool through 2nd grade in Israel WiFi is forbidden, in third and fourth grade class internet is restricted to 3 hours per week. Table 1 from a paper from 2015 says that China, Italy, Switzerland, Russia have the limit 100 times lower than US. Even so, the US limit of 10 million µW/m^2, used in most countries, is reportedly 10 trillion times above the background cosmic RF radiation we evolved with ► exposure, this link has a super shocking list of what happens at each level of RF power density per reports, levels that are way below the allowed level in any country on Earth. If they knew their kids at school get more radiation, 3 times more than in front of a cell tower *(studies below show near a cell phone tower you develop far more diseases, another youtu.be..c video explains sometimes a cell tower can have just 200 mV/m at 50 meters)*, simply because the school has not wired the classroom and uses WiFi laptops, the parents would request wiring laptops (they got adapters now, of many types, for laptops without ethernet port, of USB and the small USB C type, with one (15$), or cheaper $6 one or up to 4 ($14) USB c connections, USB c has 20x higher

data transfer (USB 4.0 high speeds are only made as USB C) and can charge larger electronics, so it will become the standard and replace USB) parents could be moving to a wired school *(or one using powerline connections cnet.com..WiFi that use the building wiring as ethernet cable, just need a connector for every laptop),* especially after reading this whole chapter on the effects of this radiation on plants, fruit flies, bees, insects, mice, bats, birds, pigs, rabbits, deer, cattle, humans. What's odd is that the much safer LiFi, which is 100 times faster than WiFi, could be used in classrooms that don't want to be wired. Telegraph article explains frequent cell phone (smartphone or the old type) use causes a 5 fold increase in brain cancer risk for those who started using the phone before age 20: IJO 2011;38(5):1465-74. LiFi can replace all cell phone towers, since laser lights from Light towers (replacing cell towers) can beam on solar roofs, which act as receivers of the Light tower signal as explained at youtu.be..E. Laser light can travel 600 meters, they already use it in car lights, since LED car lights can only go to 300 meters. We can have 24-7 daylight using various ionosphere techs some day, so people will get used to light and not notice much, plus no more night driving annoyance due to laser lights from new cars and more car accidents happening at night due to low visibility. 5G wants to be much closer than that and irradiate houses with deadly RF. They have IR solar cells, IR invisible LiFi for night time. That way, nobody needs to use cellular networks that mess up the human body by creating free radicals and speeding up every known major disease, cancer, Alzheimer, atherosclerosis. ☺☺☺

The national guidelines for RF radiation vary widely, by a factor of 100,000, believe it or not ► youtu.be...dc. ☺☺☺ This would be unthinkable for a chemical. Around microwave ovens, while they run, the radiation is huge too (like having a WiFi laptop on your lap or talking on the cell phone with it close to the head), it depends on the brand too etc; ovens use the 2.4-2.5 GHz of WiFi routers, that's why they interfere with Internet if too close to the router. It's better thus to move away from the microwave, while it is on. For workers in restaurants with microwaves on all the time, this becomes a real health hazard as they get exposed 9 h/day; this is incompatible with a Civilization of Immortals.☺☺ Also inside homes there is less RF than outside (in most cities, not rural areas), as walls block it. In a 2 story home, downstairs has less RF, since more 1 level houses and obstacles exist and the towers emit it from higher altitudes. At 8 ft, on most streets in cities, levels are 5-10 higher than at ground 1 inch level. At 15-20 ft in some locations it can be 40 times higher as no obstacle exists. Around cities, it's usually 0.05-0.2 mW/m^2, while near WiFi cameras, routers, cell towers, shopping centers it goes to toxic 2-80 mW/m^2, within 1-3 feet or within 60 ft for big business. A lower bed offers less RF than a higher bed. Houses surrounded by big brick walls or houses got less RF. In between houses, ground level is 0.001-0.005 mW/m^2, the level in houses at 1 inch height. EPA may require builders to prove indoor RF at all windows/walls is < 0.02 mW/m^2. This is easy to achieve with $100 of aluminum foil (5000 ft^2) inside walls to block most RF. Many new cars with adaptive cruise control, etc have 1-2

radars using 70-90 GHz band, to ruin our health. Even Tesla is adding some radars back to its self-driving system. All these radars from 100s of cars beaming into the people will cause cancers. Nokia best selling phones emit less RF radiation than Samsung, Google, Motorola, Apple, which you can easily confirm with the Safe & Sound 425$ RF meter, to see how peaks are 200 mW/m^2 for Samsung in idle mode and only 1 mW/m^2 for Nokia, Maximums 100 times lower for Nokia. Samsung phones cause severe headache due to intense radiation, cause severe forms of cancer, blood poisoning and whole organ destruction, lifespan shortening, so if you don't like Nokia (designed in Finland, made in one of 8 countries), try Motorola, as they got less radiation than Apple (highest), Google (second highest), T-mobile Revvl (third highest, WAY deadlier than Samsung, STAY AWAY). You only need to watch the meter go to Extreme on Samsung in idle mode when you do nothing (imagine what happens when you do search), Nokia is far cheaper (3-10 times cheaper) than these fancier phones that destroy you totally, every cell in your body as blood circulates and poisons everything. Samsung, like all big 'private' (on paper) companies, is state owned (Samsung related companies are 20% of South Korea GDP) and feeding all data to Korean government, which may secretly cooperate with North Korea and China, since, as the South Korean music indicates, their vibes are not the eterni ones and some think of themselves as little China, with North Korea always saying USA will be annihilated by Korea this century, check out the fate of North Korea kids… and no laugh for 11 days… living in the 8th century or homeless in the capital, seeking food at night only to avoid being sent to labor camp. Paris Olympics called South Korea North in order to let all know Samsung etc phones, etc are possibly accessed by North Korea. Please switch away from Samsung *immediately*, don't put your life at risk. South Korea plays a double game, like most countries, saying they work for peace, but allowing the most anti-peace music 'Gangnam rhythm' concerts jumping (instead of helping rebuild the Gangnam district shacks) to flourish (while others live in shacks, dance Gangnam baby, because sports are fine while others are homeless and energyless to build, as city doesn't allow? *S Korea slum folks could be* recruited by China and North Korea, *to steal Samsung servers data, your phone data, that data can be stolen probably with invisible* tiny air drones (fruit fly size or bee size) too from iPhone, Apple, Samsung *and all phone companies:* underwater drones or cable maintenance companies can intercept all internet undersea cable data (1400 cables in 2023), *no phone app is safe*) and even eating live animals who suffer and live octopus.

Empress Gi (a Korean) was part of the Mongol empire rulers *(spent time in Beijing, as a little China Korean would,* Yuan, the Chinese currency, is also the name of Mongol led Yuan dynasty in Chinese history*; using yuan is an easy to fix mistake (yuan means round coin in Chinese), since it's associated with killing 5+% of humanity: change it to xian, the Chinese for IMMORTAL; they, like USA, need an immortalist government or at least Chinese communism with immortalist characteristics),* so, like all other nations, Koreans have contributed to the Mongol actions (5-

10% of humanity killed during their invasions), with or without choice (brainwashing, etc). Koreans built an estimated 900 to 5000 boats for Mongols to invade Japan and made up almost half of the soldiers, but kamikaze (divine winds, cyclones, typhoons) made the Korean-Mongol invasion (15000 Koreans joined, most soldiers were Chinese and Koreans, Mongols just the top leaders) fail (though Koreans were forced to join the Mongol army and produce ships, so some may have sabotaged the invasion too, hoping to undermine the Mongol empire perhaps). Given the tone of many in North Korea and South Korea musicians, the torture Koreans subject many nationalities to as part of CIA and other spy agencies, it is wise to not trust Samsung or Koreans 100% until an immortalist government rules a unified Korea. Same distrust applies to every other nationality, since current governments are not immortalist and they can brainwash people and companies to do evil things (torture, injury, etc) via their products. Kia can read (and write?) your emotions/thoughts? China, aware of the Korean risks, suggests those under 18 to spend only 2 hours on the phone a day, while I'm using phones about 3 hours a month usually, mostly WiFi, since wired desktop is how I make phone calls to prevent brain damage. ☺☺☺

It's a great idea, as phones damage our bodies with microwaves and offer poor ability to do scientific research to triple human lifespan, all science stuff requires big monitors, big instruments, etc, chemistry and physics can't be done on a tiny phone and without physical chemistry, we're dead as a species. Lab work is tedious, it can't be done on a phone. Phones can be great tools for some projects, in airplane mode, to aid science in service to World Peace in 3 months and Immortality for All, but overuse while on the cellular or WiFi leads to brain damage. Check out US Senator alleged heart attack in South Korea (heart attack weapons are often deployed by South Koreans in USA to harass locals). However, while some die due to choking while eating octopus, other nations also eat live animals, see Chinese live seafood, fish mouth has to move 2 min, which explains how far they're from eterni ethics. North Korea may get access to everything on your Samsung phones, so could China. You can ☺☺*lovingly tenderly gently kindly*☺☺ look at the studies done recently, showing foreigner perception in various countries, like South Korea. Koreans are just like everyone else who works for CIA, they torture people for money too, as boss tells them to, so then your data would be used for their goals with the same "love", so only phones made by your country, or your allies, with your country/allies components are safe. These phones (like any other brand) can be used as weapons to distract, deceive, damage the brain, etc, to enhance the CIA-PLA-KGB-Korean torture: keep in mind, on our planet of "cannibals" no brand is made to prevent torture via the phone: all brands are done by MILITARY MINDS. Keep in mind, the Economist ranks South Korea as 2-3 times the suicide rate of the global average depending on age group, or # 1 worldwide, due to rigid Confucian expectations *(hierarchy, caste like system, like the language, many forms of politeness depending on rank in society, 7 forms of verbs makes it hard to talk to other classes*

honestly, to express one's real emotions) perhaps and maybe being introvert and not explaining how they feel. Telepathy is jammed by too much RF pollution, the brain can be destroyed too.

South Korea, Samsung (state owned really, private on paper) needs to focus on World Peace in 3 months… not being world's # 8 exporter of killing weapons that prolong wars, since Gangnam music rules. Just when people thought they're different, they're the same as the top 7: US, Russia, France, China, UK, Germany, Italy.☺☺☺ They aim to become # 5, so much for peaceful Samsung phones. Israel is the largest 2022 exporter of weapons per capita, 4 times S. Korea, 83 times China, no surprise there at all, given the "scripture". In 1990 data, Israel # 1 too. In 2022, France #2, US # 3, Russia 4. Who knew Israel & France are the top most death promoting nations per capita? *Netherlands is 1.4% of total, but 17 million folks, so more per capita than Korea,* 28 times more than China. *S. Korea 19 times* more per capita *than China, pretty impressive. Love that Samsung phone?* S Korea is afraid of North Korea 2 million strong army, aided by China, due to Russia-China vs USA Korea divide, so due to external imposition of 2 states, the weapon production went up 90 fold, so it's not like out of the blue Koreans started making weapons. Since Korea exports $14 billion in weapons in 2022, all weapon exports need be replaced with simple health promoting devices to help their economy once the global moratorium on exports and imports takes place on Eternal Universal Peace starting day, like arterial plaque, biomarker monitoring, eterni foods, etc, things that give life not death. Love decency ('God'), not violence ('Satan'). In practice, not empty slogans of 'human rights', while they torture millions. *All phones need to have the* World Peace *in 3 months app group, not Google or Samsung only: App #1: Peace news, App # 2: peace singing, App # 3: health, App # 4:* Eternal Universal Peace *chatting with fellow* immortalists, Immortality *for* All *shopping apps. On the sides* of every cell phone there needs to be written "Eternal Universal Peace in 3 months is possible", "Immortality *for* All",☺☺ *Gentle Tender Grace for All*: this is truly divine behavior, not the evil Bible worship. More ideas are here. Let us bring Peace, decent Anthems this lifetime, not when Jesus never comes back, in a trillion centuries. All miracles were faked. Young people, ☺☺*lovingly tenderly gently* ☺ stop wasting time watching phone screens & evil music for so long. ☺☺☺

Today we worry about mercury in air, etc, but in the future it will probably be MICROWAVES. Before you buy a phone, google "SAR and phone brand and model" to see which ones have lowest SARs (specific absorption rate (SAR) in w/kg). The FCC gives links to each manufacturer where you can check the RF radiation watt/kg of each phone model. All you need is to go to Settings, and scroll down to About Phone and get the FCC ID, sometimes by clicking Status on some phone, and enter it here. In 2023, SAR (EU) for these Samsung is 1.4 body and 0.2 head, while Nokia got 0.3 head, Motorola 0.8 head, others got head 0.4 or even 1.1 (the pricier ones, *A50 0.27 head*), Wiko (French, affordable) is 0.4 head 1.2 body while body SAR (EU) is about 1 to 1.4 for almost all brands except A3 which is 0.55, the lowest but the head SAR is 0.39 for A3, *yet*

some may care more about body when holding it in hand (the hand gets the body SAR value more, the back of the phone, since the head SAR is the display direction) if they rarely talk on the phone and use it for data apps, etc, just below 1.6 FCC limit. These SAR limits are pointless, as they refer to radiation when taling on the phone. What matters the most is what your meter shows in the IDLE state of a phone, as you keep it in your pocket… that's when you see the GIGANTIC DIFFERENCE BETWEEN NOKIA and the rest. The Nokia site can compare SAR for unique Nokia phones (select country to get the correct data): for example, in the USA versions, Nokia G310 5G is bad among Nokias: 1.40 W/kg per 1 g touching the head, 1.28 W/kg over 1g body at 1 cm and probably 1.8 body per 10 g at 0.5 cm, Nokia C32 is 0.54 to 0.77 W/kg per 1 g head SAR and 0.46-0.65 head per 10 g, 0.96 to 1.02 body at 1 cm and 1.38 to 1.58 body per 10 g at 0.5 cm (select the correct version to see FCC data, 129$ on Amazon, unlocked, among Nokia's lower SARs, for carriers using T-mobile mostly), Nokia G10 (Android 13) is 0.7 to 1.07 head 1 g, 0.46 head 10 g and 1.51 per 10 g body at 0.5 cm, 0.71 to 1.0 body SAR 1 cm away depending if you use LTE 7 or CDMA or other details – see website (only 89$, purple, on Amazon, brand new, unlocked, for carriers using T-mobile, any GSM network). Nokia G10 is a low SAR phone, vs most out there and some C32s are more SAR than some G10s and vice versa, you can see this by meter tests too. Due to the fact G10 is cheaper, has lower download speed (7 times lower, to be exact, your health is 1 trillion times more valuable than download speed), etc, it's safe to say it generally has lower overall radiation when using it for maps in car, etc, so less headaches and damage to body for you. If your G10 is new, it may ship with Android 11, so go to Settings, System, System Update, Check for updates, one of the updates will be Android 13, 2.0 GB, so slow over mobile if you got no WiFi to protect your family. Install it and be set. For older phones, Android 13 update is not available by a few taps, you need do it yourself, so G10 is nice. G10, C2, etc come with a clear case from the phone box itself, so no need to spend extra money on a 10$ phone case. Phones that are fast at downloading emit much more radiation, so G310 Nokia emits a lot more than Nokia G10, since it downloads 59 times faster. You need to be real, if you're like me, keeping phone off 99% of time and airplane mode 0.99% of time and on 0.01% of the time, you don't need G310, but the purple G10 or the C2 2nd edition. If you don't mind Android 11 and updating to 13 on your own (search youtube for videos) in more complex steps that click system update, then C2 2nd edition has very low radiation, possibly the LOWEST of any US phone: 0.52 W/kg (vs 1.37 for Nokia C210 or 1.16 for Nokia G100, 1.03 Nokia C100) 1g head, 0.68 body 1 cm (C100 is 1.35 @ 1.5 cm) over 1 g, 0.42 per 10 g head, 1.14 per 10 g body @ 0.5 cm. As you can imagine, with my meters, C2 2nd edition, released in 2022, is truly quiet, it spikes to 30-50 mW/m^2 every 3 minutes when you're 20 inches away, while Samsung phones go to 3000-5000 mW/m^2 every 5 seconds in idle mode, so you end up getting destroyed by microwaves with Samsung and most fancy phones. *Nokia C2 is the safest smartphone I ever measured*. Nokia ships them with phone case inside the box, so if you get a brand new C2 from

Amazon, and there are plenty of those, it will come with a clear case. ☺☺☺

Phones track you, torture you, write your brain, poison you, stay away from them. Spies almost never use smartphones, as you will find out, due to their dangers. Google Pixel 7 Pro (the most amazing phone case, with cloth on the inside to prevent heat transfer from plastic to the phone, and with white reflective color to prevent phone overheating while held on the windshield, etc, the smoothest plastic cover) and higher have dual band GPS, are made in USA, and have half the price used of dual band GPS iPhone 14 pro: dual band allows you to get better google maps etc in cities with tall buildings and mountains, you can use maps in airplane mode once you uploaded directions. Pixel 7 pro starts phone in 2 seconds versus 80 seconds for the Nokia G10, so most will prefer Google if using it rarely only, and mostly in airplane mode, due to microwaves. Google Pixel has Android, so Google Maps, which is superior to any other map app, works better on Android, both being made by Google. If navigation is key to you, due to turning off all car connectivity to prevent Microwave Blasts, Pixel is better. Google Pixel and iPhone are the only unlocked phones that are designed in USA and have higher security, being thus slightly more secure from foreign spies. They can poison people and destroy your brain, confuse you, that antenna can be dual use: weapon to wipe out memories or just phone call maker. Drive fast, die fast, download fast, die fast, the eternal rule of life: health first means sacrificing conveniences (lethal WiFi) you don't need. You only get directions once and then move to airplane mode while driving, as GPS works in airplane mode, so you only expose yourself for 4 seconds while you download directions. But for banking etc you do need a phone in normal mode, so you do need the lowest radiation phone and G10 delivers. So, if you want, try G10, like I did, you won't regret it and you will see it's lower than RF of your phone now, using the meters, get a 6$ clear case, to avoid damage, and see thru the clear case the wonderful purple color. Astound.com Internet is 40$/month incl taxes/fees, uses T-mobile network, 300 MB/s and free unlimited data, talk, text for 1st year that costs 80$ with other carriers, for 1st year and then they jack it up to 20-40/month (but you can call Astound 800-427-8686 to get a 1 year of 10/month (call yearly when they bump price, as you get that email notification), and tell them usmobile.com has a 96/year plan (8 a month) that you will switch to if Astound doesn't offer $8-10/month, negotiate and you get 10 a month plan with unlimited, which with US Mobile costs 15-25/month or 30 with Metro/AT&T, for minimal plan that's needed for sane people who realize smartphones are weapons of mass cancer, disease and destruction. You can always call Astound or etc when they jack up the wired Internet price too much saying you quit service if they don't give discount (say you found another carrier offering half the monthly price, etc), like Charter used to add 5$ a year, becoming 3x the competitor price in 10 years. I called Astound and they moved my total from 62$ to 39$, plus I get 10$ off for autopay, so 29$/month total in 2025 for 300 MB/s fast unlimited wired internet and unlimited data, text, calls mobile service

using T-mobile network. If not in your state, there is always a similar provider, just avoid the Big Names, as those charge you 3-5 times the price to fund aristocratic palaces.

For car insurance, the cheapest is found by googling "cheapest liability insurance in my area" 300-800/year depending on car year. If you drive little, metromile.com, mileauto.com, Mile Wise (of All State), Smart Miles (Nationwide), etc, pay as you go, pay per mile, offer cheapest rates, though many triple A linked providers beat the cheapest regular insurance (Geico.com is usually cheapest) by 300 a year or more, so something like CSAA or 33 other AAA providers (no need to be AAA member to use one of their 34 motor club insurance programs) could beat pay as you go in some states. Use the RF meter to measure if any of the modules you plug in with metromile, etc cause much pollution or not. 100s of companies give you 100-200/year discount if you use the phone to download an app (you'll get a text), so they can evaluate how your driving habits are when you happen to have phone with you in the car, which for many folks is only once a month, due to RF sensitivity. The danger with pay as you go is hackers of insurance companies or your PC can know where you go and wait to attack you. Nobody can force us to get cancer and wear phone while driving always. To prevent brain damage, you can create an aluminum foil enclosure for the phone, place phone in the trunk and have the app on and airplane mode off, as this wrap around the phone reduce radiation in your driving seat 1000 fold, but it will still record the trip at a radiation level of 50 $\mu W/m^2$, which is 1000x < 50 mW/m^2 without the aluminum enclosure. Make sure you disconnected your car from the cell network and all WiFi, to reduce radiation 1000 fold, so your background is the city background, when inside the car. Use the RF meter Safe Sound as that one picks up the slightest changes, mine rose from 20 $\mu W/m^2$ to about 65 $\mu W/m^2$ after wrapping phone entirely in aluminum and setting in the trunk under the trunk floor. You can say it's for pleasure and you drive car 1-2 times/month, nobody cares, focus on the 11 companies. They're genocidal pigs, because we the sober people pay triple insurance rates due to the people who drive drunk and cause 30 million car accidents a year. It's not fair, it's extortion. Alcohol needs to be banned globally. On top of that, insurance companies charge higher due to them being 1500 companies, so aristocrats build palaces, so why should we subsidize their cell towers that give cancer and endless disease to workers and the palaces that shorten everyone's life by not using that for longevity and health research? Drive with phone in the car once a month max, don't stress to turn phone on more than once a month, the whole thing is a big scam, we need no 1500 insurance companies, one is enough, Eternal Travel Inc, the freedom of the working class. Never use phone when not needed, turn it off once at home or use airplane mode 99.9% of time, aristocrats use phones/google glass to spy on you and to fry your brain, take 20 years off your lifespan by microwaving you with WiFi/cell 24-7. With 0 aristocrats, royal families and leeches, with one language and 11 companies worldwide, we have no more states but one country, no more 20000 city codes and city laws but one law for all, 0

taxes for all, one police department for all USA with all cars connected and none can enter a car to drive unless they pass the video identification test to make sure only owner (no car jacking/theft possible) drives, the Eterni Bank test (the card that only legal residents have), the speech test to measure awareness, the wheel pic to measure 5000 molecules (takes pic of blood passing thru fingers) to measure awareness in the future and triple human lifespan. This ensures nobody can drive tired or drunk/drugged, so insurance rates will drop 10 fold.

Lifeline gives free phone, so you could use their SIM into your Amazon G10 89$ Nokia. In 2024 Motorola SAR (USA) values for most phones are lower than Samsung, it's time to switch. Nokia is ultra low SAR too, body SAR (USA, USA measures per 1 g of tissue, EU averages 10 g of tissue) is 0.3-0.5 for *Nokia* vs 1.5 for Apple, 0.8-1.1 for Motorola, 1.-1.2 for Samsung, so Nokia is by far the safest in USA. The head SAR (USA) is 0.8 for *NOKIA*, 1.1 for Samsung/Motorola, 1.4 for some Samsung and Google. So *Nokia* beats in USA all brands *for both body and head SAR*. Apple SAR head levels are 1 or almost 5 times more than Samsung, so definitely avoid iPhone if not talking much, using it for data in your hand. Some SAR values are EU, others USA standard. Some Samsung phones have high head SAR, to be safe, always check devicespecifications.com before buying a phone. Any free phone some get from government programs may have high head SAR, so you can always go to that company, call to move your free service to the lowest SAR phone you can get (*well, many companies government chooses for free phones and plans don't allow changing phone from low quality one to some decent one usable on intensive applications, like maps, so much for decentralized government programs with free crap for all, with centralization, you eliminate redundancy, and offer better phones to those needing it for certain apps, more R&D staff, less marketing*), that they're compatible with, google the head SAR level, for the phone model listed in About Phone etc. Galaxy Note 8, body SAR is 1.01, head SAR is 0.34 w/kg, < iPhone 7 SAR 1.14 head, 1.12 body. The lawsuits have started ► rfsafe.com. ☺☺☺

Due to millions of people getting headache and brain cancer damage from phones, Mudita made a phone with lowest head SAR of 0.06, or, about 17 times less than Apple phones, whose CEO Steve Jobs died of cancer. It's just for calling, not a smartphone, but it helps those who need a phone only and use wired desktop for all browsing to protect their testicles, ovaries, brains. The same thing happens with WiFi routers, laptop wireless cards in schools, some have an SAR 10 times higher than others. *I got a new router from Spectrum in 2023 and it produced 100 times less radiation at about 5 feet if I placed a lot of aluminum foil around it to reduce the radiation,* though the speed was the same as before modem install (for 5G phone, A13 Samsung, Amazon sells any phone at 30%-50% of price if used for a few months, just buy it unlocked and you can bring it to the cheapest carrier in your country that has limited offers, it's a good phone, sold 50 million, best selling phone in a 6 month period ever, 5G speed was 330 Mbps vs 40 Mbps for 4G in the same location via the speedtest app), *even at 1 foot it was about 10 times lower. If you*

get to AirBnB, always use your ethernet cable and stay away from the router or put some aluminum barrier there if you're close, to prevent too much RF damage. Or simply turn your modem into a router with a 15 ft USB-C to USB or USB-C connector. It's crazy to think all these people killed early by cell phone towers would not die if equipment would be better, *but hey,* we need more stadiums. What priorities. As soon as I removed aluminum, radiation became high as before it was with aluminum on. This shows how a simple upgrade from Assembled in Vietnam (with possibly cheap Chinese components) Ubee (Taiwanese company) DDW36C1 DOCSIS 3.0 to the Made in Indonesia (Made in means everything) EU2251 Hitron (Taiwanese company) DOCSIS 3.1 can do: 3.1 is the standard that allows up to 10 Gbps, vs 0.35 Gbps max for old modem. This 3.1 one has modem and router separate and connected with Ethernet. ***Change modem-router and sleep better, live longer.*** This is true for phone chargers and electrical devices too, cheap components lead to 1000 times more dirty electricity that ruins every organ, like microwaves. That's why parents switching schools can mean in some cases that symptoms of doubling heart rate disappear, since the radiation at one school can be far lower than at others if there is a cell tower nearby. This heart rate doubling was observed in kids: 4 min video and adults: 6 min video; see the free paper on doubling of the heart rate with WiFi being turned on. 1% of the safe US limit causes heart rate doubling headaches, thirst in some. ☺☺☺

Many people use special paints inside or outside the house to block EMF from cell phone towers nearby, neighbors' WiFi routers, etc, paints which act as a Faraday cage (like aluminum (Al) foil wrap of a cell phone blocking the signal 100%). The cheapest method for renters is to buy from $ store some white foam board and tape on one side aluminum foil, cover it in tape and then use it to block wall areas (or to create a sort of cubicle around your desk and bed (where you spend most of the time) if your room is big and you don't want to use so much Al, tape, boards) where cell tower signal is strongest, being white, it will match wall color and you don't need paint anything, since landlord won't allow it usually. If you sleep in multi-family places, always create a some barrier, partial one at least, with foam board with aluminum on one side, near your bed area, facing neighbor, since you don't know if they will place there some WiFi router, phone, device to damage your brain – you *can't take RF measurements hourly, but definitely make a good RF block to reduce RF 50x if his router is there and you detect high levels always*.

I made aluminum foil taped in clear tape barriers and RF came down 20 times in my sleeping area. You can also create aluminum foil taped 'blankets' using some flexible materials, etc, to tape it to, and 'body armor' type of clear taped aluminum pieces to diminish internal organ damage during phone use in the car, outside, etc, whenever you may use it. Some foam pieces can be taped slightly in some areas to the wall with clear tape too, so it's very discreet. Get a free google voice number and ***use only wired internet at home, turn off WiFi, and use desktop voice app with a comfy headset***, like Sennheiser SC 75, (3.5 mm and USB for both phone (eterni

tone) and desktop instead of phone to be social and text. Synthetic leather earphones keep cool and are 300x easier to clean. You can have microphone go *mute each time you wake PC from sleep, after listening to youtube or music and making laptop VoIP phone calls (google voice, etc)*; fix it by going to 1. Control Panel, 2. Hardware and Sound, 3. Sound, 4. for both Playback and the next Recording Tab do this: 5. Headphone, Properties, 6. Levels tab, 2nd tab, set to 100 and sound on (not off, off=a line across, click on it and the Sennheiser headset light turns on when this button is off) and Microphone Boost to Max dB 7. Advanced tab, uncheck 'allow apps to take exclusive control of this', check "Enable audio enhancements" for Recording Tab. If that doesn't fix it, try this. The faster way is to simply right click on the volume taskbar icon and then click on the mic (it's off). However, this faster way needs to be repeated, if you plug and unplug your headphone. However, if you want to listen to your normal speakers or monitor speakers, you don't need to unplug the headphones, you right click the volume icon, select Speaker as output device instead of the headset. That way, the input always remains on for making calls, etc and you don't damage your USB port or 3.5 mm port by always plugging it in and out to alternate.

12.11.3. *Reducing* body RADIATION a MILLION FOLD with PdaNet & Ethernet Adapter:

The next 8 pages show simple ways to reduce radiation between 100 to 1 million fold, depending on your goals. If you're pregnant or frequently attacked, for 1$ each, a space blanket can block microwaves from city cell phone towers like this 52"x 84" 10 pack, or deflect various lasers used by spies trying to destroy you or your baby). You need to wrap the front and back of your baby, from the vagina to your neck for a better protection. Besides using ethernet at home (to make calls from desktop via ethernet as shown in the paragraph above) and turning off WiFi for your house (supporting global ban on WiFi in hotels, schools, and everywhere unless absolutely needed for emergencies, nobody needs it, use phone as wired modem or WiFi Hotspot as shown in this paragraph), use airplane mode all the time, and turn WiFi off while in airplane mode too, since with it on, it will check for things on many phones and flood you with RF (proven with meter), just like some apps still have GPS working for driving☺☺☺, while airplane mode is ON (need turn off those apps for navigation) and all signal was meant to be gone. *Don't use phones for browsing or making phone calls* (unless it is an emergency), as the microwaves are often 500 mW/m^2 and the blood in your hand that holds the phone will be wiped out, damaged, poisoning every organ, not just destroying the hand, which is pure insanity, like a nuclear attack on every cell in your body; *instead, make the call from the tablet connected via wire to the phone*. Simply use a 15 ft cable (USB to USB C or USB to micro USB (outer pins, older phones) depending on what ports your phone has (PdaNet only works with USA old style, the gigantic USB A 3.2 (5 Gbps) for example or Thunderbolt 4.0 that can transfer at 40 Gbps, so if you have a tablet, laptop with small USB C port only, you need to buy a USB-C to normal USB adapter and plug the phone USB A to USB C cable into that female USB A.

Otherwise, PdaNet won't work. This is fine, since for 22$, you get 5 Gbps USB-C to ethernet and also to 3 female USB As, (my favorite, white shows dirt and you can clean it, see insects, fleas, ants in AirBnB, etc, since it's easier to fix in place under an object to prevent damage to USB-C by the movement of cables from keyboard, mouse, headset, Phone-as-Wired-Modem cable via PdaNet. If you can't use a 15 ft cord, just use a 6ft one or a 2.5 ft one that comes standard with a new phone, then use some aluminum foil between the room and the phone, to block most microwaves from coming towards you, so that phone gets the window signal but doesn't push them towards you, like place it on a window, facing outside the home, this technique will lower RF 10 fold vs using the 6 ft cable alone, and the aluminum piece can be only 2 by 1 ft. This means in areas with high RF (meaning 0.5 mW/m^2 as in many hotels with strong WiFi), this setup of 6 ft won't be above background, as your meter can confirm and *can be 20 times lower than using WiFi from hotel* or whatever: 0.5 mW/m^2 with the 6 ft cable and aluminum and sometimes 10 mW/m^2 with WiFi turned on on your laptop. Always turn off WiFi, it's not even that secure. USB-A is the ancient one that will disappear in 20 years when PdaNet will upgrade to support it. They got USB-C to ethernet adapter, for wired laptop use at home and wired tablet use at home, to reduce load 1 million fold. The USB cable has to be very tight fitting on your laptop or tablet, otherwise, the static electricity can cause the screen to go blank and then you need press the laptop power button 30 seconds to drain all static electricity. Get a new USB cable if screen goes blank during use. Amazon sells some really bad USB cables, brand new ones. At home, use ethernet cable, wired, to connect to your laptop or desktop, and on the road, use the USB A to USB C on the phone cable to get internet that is secure, unlike wireless from a Starbucks. They got USB A or C (adapter to swap between tablets or laptops without USB-A) to "1 Gbps Ethernet, 3 extra USB A" to make your laptop have more options to be a desktop and save the environment, or USB A to "5 Gbps Ethernet, 3 USB A, 1 USB C". When connecting the adapter into the USB-C port of a laptop, change the power saving USB setting that disconnects the internet by disconnecting the adapter: Control Panel, Devices & Printers, Device Manager, scroll all the way to "Universal Serial Bus controllers", double-click on each USB hub, go to the "Power Management" tab, uncheck "Allow the computer to turn off this device to save power". ☺☺☺

USB A is sturdier, so many prefer to have that as the only place to anchor a hub for "ethernet plus other USBs". Many people use laptops as desktops, with the laptop HDMI or Display port to connect a monitor and a USB-C to 3-4 USB-A adapters to connect wired mice, keyboards, etc, to avoid having 2 things: laptop and desktop, and have only 1 good laptop with 64GB RAM, i9 or i7. USB C is the wide, micro USB is the smaller USB C type and they help you turn *your phone into a wired modem* and *use a headset connected to your tablet to make calls from google voice, to avoid brain cancer*. To turn your phone into a modem while away from ethernet cables at home or if renting an AirBnB without ethernet, you need to install a secure tethering app

(pdanet.co/install for example, 8$ for full version if you ever get interrupted in free version for too much data download, lifetime access) to enable you to create a *10-15 foot distance between your phone and your laptop or desktop*, when you travel, *so that you have a radiation* where you're 1 *million* times lower than near the phone. Click Hide Tether, to avoid being charged a tethering plan, so you can still pay only 30$ for Metro (*disable the MetroZone app in Settings, Apps and turn off notification for any app that annoys you on your phone or disable it, if you get the annoying popup, since Metro PCS got the cheapest USA unlimited data and your phone is much more secure than Hotel WiFi that anyone can hack*) or 0 even with the Affordable discount for low incomes. It only costs 10$ to buy a 15 ft USB A to USB C CABLE (flat is better as you can close car door or window almost entirely when cold or hot during a vacation when you want to call and not destroy your kids nearby, simply use tablet and headset and don't use that weapon of mass destruction called phone anywhere within 5 feet of any human being) and you can do that browsing in the car too, put phone far away and tether it to your tablet to avoid destroying yourself in the car where signal gets stronger due to the cage effect of the metal. After you download PdaNet on both phone and tablet, laptop, desktop, you need to go into about section of your phone and tap 7 times the Build Number. Be aware that this is for random browsing on a 2nd phone, since enabling USB debugging exposes your phone to hacker attacks. This adds a new menu on Settings at the bottom called Developer Options. Click on 'Developer Options' and enable USB debugging. After this, in PdaNet on the phone click on USB tether, the first option and install PdaNet on your computer, before you connect it to the phone. Then connect the phone when prompted so by the software. Finally, click on 'Always allow USB debugging' when the phone prompts you to and then it will connect. Now, you have an ethernet like connection with only 0.001 mW/m^2 at the hotel, instead of 500 mW/m^2. This half a million fold will protect your kids, your testicles, ovaries and every organ. What if you want to use your phone and keep phone 10 feet away while talking on the phone? It's possible, there are apps to see phone on desktop or you can simply get a 3.5 mm jack 5-10 ft cord that plugs into the phone and then you use the phone in an aluminized cubicle *(make it in 4 hours:* foam boards 50x20"x30"/65$*, are taped with* 12"x150ft aluminum tape*, joined, aluminum covered in* 8"x435ft clear tape*)* 5 ft away or at a desk 10 feet away. They got air tube headsets and you can place an aluminum taped foam barrier between you and the phone if you didn't create a cubicle.

When all things are constant and you change cables USB to USB C, things can change depending on CIA hacks of your phones or real differences in phones. Metro by T-mobile costs 50$/month for unlimited data and doesn't lower speed if you tether. Metro shows speeds of 140 Mbps (megabits per second) on a Samsung phone itself (no tether) and 180 for a Nokia 310 5G, the device you tether may get 70 Mbps with a good cable from Amazon or that comes with a newer phone and 1 Mbps with a bad cable. T-mobile gets 260 Mbps on the Revvl phone itself for T-

mobile network using their special Revvl 7 designed for their T-mobile network, but when you tether it, you get far lower, 0.5 Mbps. In some locations, like near a mall, etc, I got Nokia 180 on metro and 40 Revvl on T-mobile. T-mobile customers get priority and metro use the same network, but get lower speeds if congested and you use same phone same location. However, if you switch to T-mobile, you pay 50 plus taxes and fees if prepaid plan on autopay, so extra 4$, but tethering speed is lower on T-mobile so T-mobile is only useful for suicidal people who want to use the phone to browse and get cancer and endless diseases. Its radiation levels are far higher than *Nokia G310, or Nokia G10, Nokia C32 which are also Android 13 and are even lower than G310*. The USB-USB-C tethering cord matters, the longer it is, the cheaper it is, the lower the speed. T-mobile, tested with 2 cables (a 6 ft one from Amazon and the one that came with the phone) inside a hotel, has the same low speed of 1 Mbps on a tethered laptop, while metro has 1 MB with a bad cable and 70 with the T-mobile cable, *indicating T-mobile makes all tethering speeds 3 G as they state if you use their cable, so stay away from T-mobile phones provided cables for tethering*. Outside on the street, the white cable that gave 1 Mbps on Samsung inside the hotel (due to weaker signal as too much aluminum was blocking it) gave 170 Mbps tethering speed, same white 6 ft cable from Amazon that gave outside 0.5 Mbps or 340 times slower speed with a Revvl 7 (Revvl 7 pro was sent back, no longer available in stores, due to some issues, so you may be better off with Motorola headquarters in USA and more control than Samsung of Revvl, vs Revvl made by TCL in China by US design), while the T-mobile 2.5 ft black cable that gave 70 inside hotel gave 20 on the same spot the white 6 ft cable gave 170, very erratic behavior of these cables using the same Samsung A 13 phone. *You need to test new cables and find one that gives triple the speed*. Revvl is hard to use, its interface is not like the easy to use Nokia or Samsung. Use other USB-c to USB-A cables not designed to lower the speed, if you have T-mobile, since T-mobile cables are designed to lower speed of tethering data. So, don't buy t-mobile plans, go with metro by t-mobile for unlimited internet for your laptop on the go. You save on taxes and get 3-70 times higher tethering speed. The Immortality *Nurturing* Agency needs to charge T-mobile a 50 billion dollar fine, *for setting tethering speeds* to 3G levels as they state on their sites, since this destroys people's health by exposing them to unhealthy radiation from modems and other junk they're forced to buy to connect to the internet while on the move or at home (if no wired option exists) in ADDITION to the lethal radiation from the phone. Metro gives you a free case too (e.g. white with gold glitter), for your Nokia, with nice designs, not just the black type that absorbs all heat in the car and overheats the phone in a car.

The banning of WiFi in hotels and all public buildings is a must, like smoking is banned today in all decent hotels and cities, since *WiFi is as deadly as smoking, an act of genocide*. Let people use their phone, we don't need 24-7 WiFi blasting from routers and cameras. All *WiFi* cameras need to be banned and replaced with wired cameras *(becomes WiFi only for an hour to record*

only if cable is cut) or LiFi by government decree of the Immortalist Party. Wired is 1000 times safer too, so no criminal/foreign spy hackers can hack cameras from 5 or 9000 miles away. Hotels and some city areas are concentration camps with 20-90 mW/m^2 WiFi cameras, *more deadly than a cell tower*. This is genocide. The government could actually require all phone companies, before Eternal Utility Inc becomes the main company for all phones, to offer these free tiny tablets and the 7 to 10 ft cable as fine for fraudulent genocide of billions of people for 30 years of mobile phone marketing when they knew it's bad and they bribed government officials to set limits ultra low. All phone companies will be required to explain the mW/m^2 at 5-10ft and noted biological effects as explained on utility.gov, the new website for the free United States. All workplaces could have these 20 cents aluminum foil little boxes where you place your phone, to avoid destroying self and others. For emergencies, family or etc can use the company landline to ask you to call from cell phone. Otherwise, cell phone companies destroy all human beings, their sperm and eggs and are liable for 50000 trillion in damages. Phones were not made to help the people, but to spy on them at all times, to track their very movement with the cancer causing GPS frequencies, so they can also torture them, place objects in their path, stage "incidents". Wired internet ought to be required in all businesses in every nation.☺☺☺

Today we see how often Jewish billionaires push deadly WiFi and cell phones on all, while Israel bans WiFi for kids under 6 due to knowing its lethal effects. The wealthy Jews don't live near cell phone towers, as they know those are highly effective in exterminating gentiles slowly. The closer you're to a cell phone tower, the shorter you live, thanks to a government of criminals who hides all this. Is this a USA for Jews or for all? It's odd how all kids are being destroyed by Apple, Google phones, Samsung, etc, all adults too, while a minority of nations or municipalities take pathetic actions to limit what is far more destructive than smoking even. Only Los Angeles County has a wireless radiation limit 10,000 times lower than the criminal FCC, a conman organization run by the present gangster USA government who destroys millions of kids and adults via hotels and housing units with insane levels of microwaves which cause birth defects that will harm USA for 5 millennia. *The phone companies have turned the entire USA into a concentration camp*, every major city has a huge amount of deadly radiation areas that wipe out human progress for millennia via birth defects. Will USA vote the Immortalist Party and ban all WiFi in all schools, hotels and in every building with kids? Can Immortality Building Inc maintain all buildings and make sure Wireless radiation is 10,000 times below FCC standards? Why are we wasting so much taxpayer money on deadly WiFi to destroy the American youth *and entire human species?* Why need so much money if all can learn with wired ethernet at home/school? Only labs require physical presence in the centralized education system of the Immortalists. ☺☺

The present government saves *2 million by using wireless in classes or labs, but will spend 2000 trillion in future healthcare expenses next 5 millennia*. Is that a government of ☺abysmal IQ☺

clowns? This same gangster government allows the criminal tobacco companies and alcohol industry to entice Americans via ads and such to spend 100 billion/year on alcohol and 80 billion on smoking. This costs USA about 0.85 trillion a year (600 billion smoking, 250 billion alcohol abuse). The tobacco industry is allowed to spend 2 billion a year on ads to brainwash people and kill all by 2nd hand smoke. All hotels you go to you run into insane levels of smoke in nonsmoking rooms, that destroy the healthy people, and sometimes WiFi radiation 100 times above the Los Angeles County school limit, which is itself TOO HIGH, even if 10,000 times below federal criminal limit. It's the same criminal system with cell phones and other super dangerous devices advertised without any worry, as with smoking products when doctors said smoking is healthy 50 years ago, inducing millions of Americans to an early death due to the MD addiction to smoking, as the same doctors today are addicted to their cell phone, WiFi and deadly wireless devices. The federal Affordable Connectivity Program wastes a ton of money to give people connected tablets that destroy health. If they get a free phone, they only need a USB cable from phone to a free tablet they get and thus reduce radiation of the tablet 1 million fold. What happens instead, California gives people both a free phone and a free tablet, both with low connection speeds, instead of only the phone being connected to internet and the tablet without modem, without WiFi, so it connects via wire from 5-10 feet away and is bigger, having no connectivity. Don't waste time with cellular modem on tablet, make a nicer bigger tablet instead that can have even a detachable keyboard, like Surface Microsoft one, so it can be turned into a Windows laptop that can run nice scientific applications, like ChemDraw, etc and allow all equal access to the centralized education of the immortality capitalism, nice tablet, 14-22 inch. With this Eternia tablet brand made by Eternal Utility Inc, all with US components and assembly we will make everyone able to use all science apps that are made for Windows mostly, not android, and reduce the need for wasting resources to create tablets AND laptops, since the tablet can be huge screen, 17" like the biggest laptops and the keyboard can be like Apple Magic one, easy to place far away from the tablet, even 2 feet away (unlike Surface), for more flexibility, ergonomics and simulating a desktop, so that we become the people who replace tablet-laptop-desktop trio with one ultra thin tablet and an amazing keyboard for maximum silence (no fans of desktops) and maximum efficiency. Instead of 3000 devices and useless brands, we create one mind blowing tablet that can do more than the 15 lb desktop today. Even better is to give people a USB cable that connects the cellular modem (1 cubic inch) to the phone or tablet (saves electricity to not power up a phone just to connect table from 5-10 feet away) or laptop (where fiber optic is too expensive to run), so that those who don't want to carry a big tablet, can simply carry phone and a cable and relax in nature while placing the modem 10 feet away and not destroy the body. We have created an anti-life lethal culture of convenience. Anyone with brains left at Google, Samsung, Apple etc? All that microwave has fried everyone's brains. Or are they intentionally doing this to the working class? Is this class warfare?☺☺☺

Turn phone on only when absolutely needed due to emergency or an appointment where desktop is not around *(if using an app to see info, take a screenshot and then turn on airplane mode, to avoid holding phone while airplane mode is off, as that can increase exposure 1000 fold for high data apps; holding the phone is really bad for you, if high data app is on, place it on something 2 feet away from you at least; once done with the info on screenshot, can delete it and turn airplane mode off and relaunch app if frozen due to lost Internet*; you can make using aluminum foil covered in clear tape a little pouch for your phone, like I did, to block all signal- since phones can emit RF during airplane mode in certain apps, GPS still works, I saw it myself; plus phone can be hacked, new app installed that uses existing RF equipment to slowly kill, dual use components activated only when a special app is installed by a spy agency*)*; you get some delay, but you live 8 years longer, get more time to reply later after people's rage has cooled off ☺☺☺, and don't pass mutated genes to offspring and contribute to 700 trillion in healthcare expenses next 2 centuries until government regulates cell phone companies better; Harvard professor told USA lead in gasoline is deadly and will sicken millions 100 years ago, but nobody listened, same thing with RF today, 100s of professors say it's deadly, nobody listens. In 2022, 7.3 billion used cell phones and after reading this chapter you will agree with me that if they used it 50x less, by doing wired Internet etc, instead of phone searches, WiFi searches, etc they would possibly live 1 year extra; this is 7 billion lifespan years lost. To put this into perspective, during Hiroshima we got 70K dead, an average age of say 35, so each lost 45 years, which is 3.2 million lifespan years. Add to that those who were living shorter due to radiation (260K people roughly in town that day, 70K died, so maybe 200K nearby folks lost 9 years on average), we get 1.8 million lifespan years, for a total of 5 million vs 7 billion from cell phones. People say that can't be true, but the brain damage (read next pages) from RF will create such low IQ, cognition, etc that it will cause a dramatic reduction in ability to take care of inventions, changes that need to be done to extend lifespan and deal with the issues of aging.

Today, governments, spies no longer need concentration camps, they can exterminate people with the people's own phone, WiFi router, WiFi devices, car GPS, radio antenna and cellular connection, destroy them, mind control them to make mistakes while driving or operating risky devices, give cancer, endless diseases, create vast brain blood barrier leakage, read below. Nowadays, torturing, slow killing, and exterminating millions is a million times easier than ever before. It's also best to use electric car console to mirror an app and keep phone far away from you, so you get less radiation, Tesla has several apps that mirror android and apple apps, or both with TeslaMirror. We need EV companies to allow us to use GPS and ride sharing apps without turning the phone on and these mirroring apps, to reduce brain and body damage, since even when placing my phone in the trunk, as far away from me as possible, the RF pollution is huge, almost same as with phone stuck on the windshield, just 30% smaller. The 100x better way is to

turn off the phone while going to a location, and use built-in (in every car since 2010) car GPS (or a windshield or dashboard mounted GPS that you tested to emit less RF) which damages body 100 times less than phone mirroring to car console, so turn on airplane mode after you got your address to go to, since GPS still works in airplane mode (or save directions as screenshot on your phone if you know area well, or use GPS from the car built in system console, because it will prevent you from looking too much at the phone, which may cause issues, as you're meant to look at the road, not at the phone), and type that address on your older or newer car console (all used EVs have that) and go there, while phone is in airplane mode; save your testicles or ovaries, or you will spend years to take care of your kid's health issues. You can turn phone back in normal mode if "Waiting for location" beep happens in Google Maps, in poor GPS reception areas, for just a second if an area with many changes in direction, in case you do use phone for directions and not the car GPS, which makes more signals that could be ruin you and even be detected by enemy radar leading to automated drone strike. Phone GPS is harder to detect during war when enemies shoot at everything that moves suspecting weapon deliveries.☺☺☺

Pregnant women or sensitive people wear EMF blocking garments, but for those who can't afford those garments, they got cheaper fabrics fabric.htm, $1 space blankets like this 52"x 84" 10 pk to wrap around from neck to vagina. Youtube has videos on how to use a cheap 30$ sewing machine to make such clothing. You could also take aluminum foil, tape it in clear tape on both sides and use it, but it gets hot and it creates gaps after a while, needing recreation to protect against 400 Ghz lasers that penetrate in submilimeter gaps. Fabrics can be used to make a t-shirt using a 6$ sewing machine from $ store (video; to insert the thread thru the hook before the needle, the simplest (much faster than the video method) way is using a 7$ pair of tiny tweezers like these or even a $ store 1$ tweezers); the much easier to use foot pedal one, that frees one hand used to press the on button, 24$, video here will lead to a much higher quality job, as you can guide it straight and have 50 times better control over the direction, since you got 2 hands to guide it, instead of one. A sewing machine can help make nice clothes for your kids with letters of a different colors with qualities you want the kid to recall (while wearing EMF protecting clothes since it reduces oxidative stress), embody such as 'gentle', nurturing, healing, conscious breathing, kind, serene, witnessing, watching, 'silent kindness' (quiet people appear smarter, waste less energy) smiles) - these can be done with a printing device too, but those tend to wash away fast; buy purple or lavender and use purple or gold letters; for the ultra poor, even a 5 cent piece of Al foil (or thin aluminum covered cabinet shelf wrap) can work as shield when going to high EMF places, just place it around the fetus, after taping 100% of exposed Al with tape to avoid toxic aluminum particle inhalation, as they did with the frogs that had 21x higher survival rate, to insulate them from the deadly cell tower radiation 140 m away. I wrapped the Safe Sound meter in a cloth and I got 0.089 $\mu W/m^2$.☺☺☺

When baby sleeps, use these EMF blankets you buy or you make and make the nursery the most EMF free zone in the house, same for the place where parents sleep, since breastmilk is changed by EMF into poison; for just 5$ worth of fabric you can make a long t-shirt to protect the baby (avoid belly bands, as those offer incomplete baby protection, a t-shirt is much better), but the thing is EMF poisons mom's blood when blood circulates, so mom has to be in an EMF free zone all the time, not just wear an EMF reducing t-shirt and avoiding cell phones, wireless devices. Here is a good article on parents creating a school union to force teachers to ban WiFi and all wireless devices, to prevent the grandkids of the kids to become infertile and shorter lived, with 2 million new diseases never seen before in the human quantum field. EMF T-shirts need to be worn ideally in between a t-shirt and a shirt, to avoid getting it too dirty (because the more you wash it, the less effective it becomes). Examples: TechniCOT 33% silver, 67% cotton, strong RF protection, 45-55dB 10MHz-4GHz, 110g/m^2, 19$ for 5 ft^2, is hypoallergenic due to having silver only as metal, cotton only as fabric (comfiest too) not copper or iron (stainless steel, which can actually oxidize, however the issue with silver cloth is silver can react with sulfur, fluoride, etc in water and lose efficacy fast and most of the silver ones can't be washed in a machine with strong oxidizing detergents, so you're very limited); silver is more inert chemically, and the price difference is tiny vs copper/steel, so buy only silver fabrics like: ArgenMesh (55% silver, 45% nylon, strong almost *50* dB 100 MHz-3GHz RF protection, 23$/5.3 ft^2), Safety Silk (65% silver, 35% silk, 10 kHz to 4 GHz 40 dB (10000 fold reduction, 4 Ghz -10 Ghz 30-38 dB, so still very good), 43 g/m^2, $18/5$Ft^2$), Soft&Safe Pink (strongest 50+ dB 10 kHz-40 GHz, click “Shielding Specs” to see the dB graph, and how for 10 kHz-10MHz it’s 80 dB, 50 dB meaning 99.999+% or 100,000+ fold drop in microwave power, since attenuation is 10*log(input power/out power) RF protection, 135g/m^2, you can make clothes worn under normal clothes *(to avoid getting it dirty if worn as last garment, overwashing, damaging fibers)*, $28/5$ft^2$, 70% bamboo, 25.5% nylon, 4.5% silver); this is also available in black for better UV block, though you can simply get your favorite dark purple/blue dye too on the light pink, for UV block, to get a purple/blue that blocks as much UV as black, but *absorbs* less heat *in high temp. They* also got stainless steel that is less prone to damage by chlorinated water, and is cheaper: Hertzcloth 15.5$/5$ft^2$, very light grey, 180g/$m^2$, 30-35 dB up to 40 GHz, 70% cotton 30% stainless steel, one side cotton mostly, can be worn directly on the skin and washed using a machine unlike some of the other ones, Staticot 15$/5$ft^2$, 230g/$m^2$, shields 40 dB (99.99%, 10,000 fold drop) up to 40 GHz. Silver reacts fast with bleach alternatives in the detergent and the description on the site for most silver based ones say hand wash not machine, so most people dislike that. Thus, never use strong or bleach alternative detergent or bleach on RF fabrics, due to their propensity to damage RF shielding properties, do a test as they say to measure resistance after 30 min in tap water to see if you need DI water for that garment, or try TexCare brand lessemf.com sells (choose 1 kg, or 2.2 lb powder, as it’s same 20$ price as a liter, but allows you to wash 5x more times, so may last 5 years for 3 t-shirts that

use tiny amounts of powder each week) – just use it only on your 2-4 RF clothes since it's more expensive on the delicate cycle to avoid damage. ☺☺☺

These can be used for baby underwear too, as the website explains, since eggs are sitting there for 25 years or 30 before being used. It's nice to consider that the return on investment for these fabrics, in lifespan years gained/$ spent, may be highest of any product we buy, especially for fetus if mom wears it. fertility.html has at the bottom of the page even some 50 dollar router pouches and guards (you can make the same for 3 cents using aluminum foil, just don't seal it completely to allow cooling and signal to come out), and it explains there that you get about same signal even if radiation decreases 10 to 100 times. I noticed this too when I used aluminum for a test. This just shows how much safer these routers and cell towers could get, yet, they don't care because the industry regulates itself basically. To protect oneself, one can also turn cell phone to airplane mode most of the time, and use texting more than calling, wired desktop/laptop 900 times more than WiFi tablets, laptops, phones for Internet research, etc.

12.11.4. Animal/Plant/Human Studies: GENOCIDAL Effects of Cell/WiFi/Car RF

WiFi can be used to see every human's location, their breathing rate, etc. Another reason to turn it off. See how animals behave very strangely and get very sick around cell phone towers ► youtu.be..0M. Europe's foremost mold researcher did experiments, shown at youtu.be...Zs, showing that the mold in ambient lab radio frequencies secreted 600 times more biotoxins than mold in a Faraday cage (no radio frequencies, same thing when you cover your phone in aluminum foil and block all signals and even when phone is called, there is no EMF with the meter). The mold/bacteria inside of us that can cause Lyme disease and all kinds of diseases (some cancers are caused by viruses), also multiply more and in the last decades, the ambient radio frequencies went up millions of times, and this may be one of the other contributing factors to the emergence of new superbugs, autoimmune and weak immune system diseases. This 2 min video shows the typical clumping of red blood cells in the presence of WiFi, cell phone, RF radiation. Anyone with a 1000x microscope can see how clumped their red blood cells are, by using a glucose prick (200 sell for 2 dollars or so) to place a drop of blood on the microscope plates. Bees exposed to cell phone radiation get very confused and unable to return to the hive, frog eggs exposed to cell phone radiation become deformed, die or become much slower and sicker than those developing in a low EMF environment, 90% (typical city RF pollution, 140 meter from a cell tower) versus 4% (no cell tower radiation) mortality ► vimeo..28 and "Mobile Phone Mast Effects on Common Frog (Rana temporaria) Tadpoles: The City Turned into a Laboratory,"☺☺ ► EBM 2010;29(1-2):31-5 ► Abstract: An experiment has been made exposing eggs and tadpoles of the common frog (Rana temporaria) to electromagnetic radiation from several mobile (cell) phone antennae located at a distance of

140 meters. The experiment lasted two months, from the egg phase until an advanced phase of tadpole prior to metamorphosis. Measurements of electric field intensity (radio frequencies and microwaves) in V/m obtained with three different devices were 1.8 to 3.5 V/m. In the exposed group (n ¼ 70), low coordination of movements, an asynchronous growth, resulting in both big and small tadpoles, and a high mortality (90%) was observed. Regarding the control group (n ¼ 70) under the same conditions but inside a Faraday cage, the coordination of movements was normal, the development was synchronous, and a mortality of 4.2% was obtained. For more such effects on animals of all sorts, see this pdf. ☺☺☺

4 months old mice exposed to 970 MHz for 2 hours daily, had twice the mortality of the control mice, at 28 months ► IEEE Transac on Microwave Theory and Tech Vol 57 (10), Oct 2009.

"Chicken embryos were exposed to EMF from GSM mobile phone during the embryonic development (21 days)... the embryo mortality rate in the incubation period increased to 75% (vs 16% in control group)." ► RBR 2003;43(5):541-3. That is 4.7 TIMES HIGHER MORTALITY. A 1998 study by Lebecq JC and others in France, Université Montpellier I, found that chicken embryo mortality was 72% for exposed and 12% for unexposed. A similar study found electrical fields caused 92% of chicken embryos to develop birth defects, compared to 11% in unexposed embryos. That's 8 times higher birth defect rate. ► Dev 1992, 114: 985-96 ☺☺☺

"12 nests (40%) located within than 200m of antennae never had chicks, while only one (3.3%) located further than 300m had no chicks." Being 100 meters closer to a cell tower increased infertility 12 times in these white storks (40/3.3=12) ► EBM;24:109-19.

The higher the 1 MHz-3 GHz wave range pollution, the lower the density of the house sparrow ► EBM 2007;26(2):141-51 ► free paper is at this pdf. Cell Towers are setup to lower birth rates of the working class, aristocrats don't live near cell towers. A similar pattern was noticed in another study ► EBM 2007;26(1):63-72. 1 MHz = 1 million Hertz. frequency = light speed divided by wavelength, 1,000,000 oscillations/second = 300,000,000 m/s divided by wavelength, so wavelength is 300 meters. 3 GHz wavelength is 0.1 meter. Power lines disrupt the natural north-south geomagnetic alignment of the body axis of cattle & deer ► PNAS 2009;106(14):5708-13. ☺

12.11.5. MICROWAVES WIPE OUT MEMORY OF INSECTS, ANIMALS AND HUMANS:

The next 7 pages will blow your mind away. Ants lost all they memorized in a few hours after 900 MHz cell phone radiation exposure ► EBM 2012;31(2):151-65. Cell phones near beehives induce bees to make the sounds signaling a disturbance or of swarming ► ApiD 2011;42:270-9. 4 Beehives (each with 8,000 bees) exposed to 1.9 GHz radiation (typical cordless phone) produced 21% less honey than the 4 unexposed beehives. Exposed bees were very confused (like ants and other animals), their memory partially erased probably, making it impossible or far less likely to

return to the hive within 45 minutes as usual. Colony 5 (exposed to 1.9 GHz) had no bee capable to return within 45 minutes. You can find the free paper by googling "Can Electromagnetic Exposure Cause a Change in Behavior? Studying Possible Non-Thermal Influences on Honey Bees- An Approach within the Framework of Educational Informatics" AS- IIAS Int J, 2006; VI(1):1-6. A study by the same 3 authors found "39.7% of the non-irradiated bees came back compared to 7.3% of the irradiated ones". A similar study showed worker bees failed to return to the hive even after 10 days, and the exposed (just 10 minutes for 10 days) hive was left with the queen bee and hive bound immature worker bees. The queen fertility dropped 4 times too, after only 10 minutes/day of mobile phone for 10 days. This is why the author believes the bees are being wiped out by cell phone towers, among other things ► IJES, 1(5),2011. A fourth study, exposing bees to 60 minutes of cell phone a week for about 12 weeks, found that queen bee fertility and brood area (future bee colony size) both plunged 2.6 times, honey stores plunged 8 times. "At the end of the experiment there was neither honey, nor pollen or brood and bees in the colony resulting in complete loss of the colony. Similar conditions have been observed by other workers in case of honeybees under the influence of high tension line. Beehives located near high voltage power lines in fields as low as 4 KV/m produced less honey, had high mortality rates… Colonies exposed to strong electric fields produce less honey" ► CS 98(10):1376-8. Einstein said that "If honey bees become extinct, human society will follow in four years." ☺☺☺

Reproductive capacity of fruit fly decreased 50-60% during cell phone speaking and 15-20% during cell phone use (not talking) ► EBM 23:29-43. This sort of confirms what I and others noticed: talking on the phone causes a much bigger headache than texting. 900 MHz typical cell phone radiation 2hr/day, 45 days raised free radicals in the mice brains ► EBM 2011;30(4):219-34. This happens in all animals, meaning RF speeds up the development of virtually every major human disease known to be affected by more free radical damage, such as Alzheimer, neurological diseases, atherosclerosis, diabetes, infertility. ABB 2011;164(4):546-59 is another free radical study. IJEB 2010;48(10):987-92 found sperm count became 2 times lower in exposed mice. A progressive decrease in the number of newborns per dam was observed, which ended in irreversible infertility in a location with RF power densities of only 168 to 1053 nW/cm^2. Mice exposed to 168 nW/cm^2 became sterile after five generations, while *those exposed to 1053 nW/cm^2 became sterile after only three generations* ► Bioel 1997;18(6):455-61. Like ants and bees, rats also have memory partially or fully erased (Alzheimer like) as a result of cell phone radiation ► Bioel 2008;29(3):219-32. Like ants and bees, exposure to 50 missed calls/day (vibe mode, no rings, 900/1800 MHz) for 4 weeks led rats to taking 3 times longer to reach a target, due to poorer spatial memory ► Clinics 2009;64(3): 231-4. Bats avoid radar installations ► PO 2(3):e297. Robins (birds) were disoriented when exposed to a vertically aligned broadband (0.1-10 MHz) or a single-frequency (7-MHz) field ► Nat 2004; 429(6988):177-80. ☺☺☺

Nerve cell damage in mammalian brain after exposure to microwaves from GSM mobile phones. ► EHP 2003;111(7):881-3. Many studies reported that one 2 hour exposure to cell phone radiation will result in pathological leakage of the blood-brain barrier in rats. The effect occurs immediately and is still seen at 14 days and at 50 days post-exposure at only 0.00012 W/Kg to 0.12 W/Kg. For details see "Increased blood-brain barrier permeability in mammalian brain 7 days after exposure to the radiation from a GSM-900 mobile phone." ► Patho 2009;16(2-3):103-12. Dr. Salford, the paper author, explains his research in this video. In rats, the maximum blood brain barrier leakage didn't happen at high SAR levels, but at much lower SAR levels. i.e. not W/kg but mW/kg, not near the phone but 1.8 m away. These studies show neuron death (brain cells) at SARs of only 0.00012 W/Kg. Bluetooth devices are worn for hours at a time. A Bluetooth device which radiates at a higher intensity than some cell phones that are still risky in terms of SAR, worn for more hours than a cell phone is typically used, would not be a healthy choice. Radiation Dramatically Increases In A Car, so it's best to talk outside of the car ► The RF waves are reflected back at you from the metal of the car. The cell phone has a hard time sending its signal out of the car because of the metal, and increases its transmitting strength (user radiation overload) to compensate as you travel making new connections to different cell towers.☺☺☺

Before going deeper into human studies, here is 1 page on effects on plants and molds, fungi:

DEADLY EFFECTS OF MICROWAVE RADIATION ON PLANTS:

p..8.pdf presents tree destruction by the main beam of cell phone towers. Plants don't germinate or die near WiFi routers quite often, birth defects and deformations after cell antennas installed are seen in plants, animals ► g...7. Aspen trees exposed to normal very low rural background RF radiation (field intensity ranged from −117 dBm to −87 dBm at frequencies from 1 to 1,000 MHz, for those curious dBm = 10 Log (Power in milliwatts)) became very sick compared to aspen trees surrounded by a Faraday cage that removed most RF, see the dramatic pictures at ► IJFR, 2010, ID 836278 (can download the PDF too at the link). This study is trying to explain why aspen trees start to die very fast since 2004. Like with bee colony collapse, there is an increase in tree colony collapse. The paper explains "These human-made RF sources create a background noise (as differentiated from signal) level generally 10 to 100 times stronger than the naturally occurring background of galactic noise and atmospheric noise at frequencies below 30 MHz. Human-generated signal intensities in large regions of the RF spectrum are in the range of 1,000 to 1,000,000 times stronger than the naturally occurring RF background in urban areas. Globally, the highest field strengths occur in central Europe, the eastern United States, and in China (Figure 9). Forest decline was first recognized and defined based on observed events in central Europe and the eastern US, and China, at this time, is experiencing rapid desertification... mortality rates of all dominant tree species in the western United States have been doubling

every 17-29 years in old growth forests, and that recruitment of new trees is now occurring at a lower rate than mortality". "static magnetic-field effect on a fundamental cellular process, cell division." ► PNAS 1998;95(25):14729-32. ☺☺☺

EFFECTS of Radio Frequencies on MOLDS, FUNGI, BACTERIA:

Dr. Klinghardt, a mold researcher in EU/US, found that molds emit 600 times more biotoxins in the presence of WiFi ► youtu.be..s. We have so many bacteria inside our digestive tract, no wonder some people get relief from digestive issues once removing RF pollution. Bacteria develop antibiotic resistance after WiFi exposure ► DR 2017;15(1):1559325816688527. Even ionizing radiation led to a 2.5 times increase in black molds ► Figure 6a ► PO 2(5):e457. 41 MHz radiation led to 7-15% growth of fungi ► MZ 2004;66(3):51-7. 341 GHz led to significant growth of fungi ► PMB 2002;47(21):3831-9. ☺☺☺

THIRTY FIVE HUMAN Radio Frequency (RF) Effects STUDIES:

A 3 min video with Los Angeles Unified School District teacher saying that WiFi made students and teachers sick is interesting. Our "always on lifestyle" needs better healthier technologies, LiFi could replace WiFi ► thenextweb.com...led. Indian government already tested it in 2018. Cell phones have caused brain cancer tumors the shape of the phone antenna at the exact location where phone was held against head by the person. So, it's good to try to always use speaker mode or a wired headset (some have air) to minimize RF to the head. ☺☺☺ Bluetooth is unhealthy too at current SAR levels. CNN gives some tips on minimizing RF exposure. Bluetooth devices that fit in or around the ear typically radiate at 0.23 watts per kilogram (W/Kg), i.e. 10 to 100 times higher than the RF exposure levels shown to make the blood-brain barrier pathologically leaky, allowing toxins to cross the blood-brain barrier and damage or fully destroy neurons. Did WiFi kill kid in 10 months after he slept with tablet under pillow?

Study Finds Significant Decrease in Sperm Activity After Cell Phone Exposure ► IJFS 2015;9(1): 129-36. DNA fragmentation was double in sperm exposed 2 hours to cell phone signals ► see Figure 4 from CEJU 2014;67(1):65-71. Imagine that today the eggs of girls get cumulative exposure of years sometimes, due to WiFi at school, home, etc... and cell phone use by the age they get pregnant. This has never happened before. *What will be the impacts? We won't know until* 25-50 years from now. CJIM 2017;23(5):345-349. found being 100 meters from cell phone tower increases risk of miscarriage ► Similar miscarriages were seen in pigs (section 2.2.3) 50-100 m away ► Patho 16 (2009) 191-9. In the first 100 days of pregnancy, the eggs of the grandchild are made and these egg cells are very immature and far more vulnerable to WiFi and cell phones. Women who want to get pregnant are safest if they stay at least 5 feet away from cell phones that are on and WiFi laptops, tablets, devices or routers most of the time after the

procreation act, to prevent the sperm destruction or damage (birth defects in theory), as it swims 1 to 72 hours towards the egg in the Fallopian tube. Given that animal studies above show 21 times higher mortality for exposed frog eggs and embryos and 5-6 times more for chicken embryos (8 times more birth defects), one can only guess what happens with human eggs and embryos that get exposed. Thankfully, females can create new eggs. Use an air headset and/or move cell phone away when talking (speaker mode), without touching it. ☺☺☺ Better is to use desktop and wired connection and turn off WiFi even in the router. Likewise, months before procreation, men are safest if they minimize cell phone and WiFi usage. Since miscarriage or birth defects can occur, pregnant women would need to minimize WiFi and cell usage. In the first 100 days of pregnancy, the eggs that will become the grandchild are being formed and they're damaged by WiFi/cell phones ► re...er.html and youtube...M. Females may create new eggs, but many times the kid comes from eggs formed during the fetus period. See a 2 min video on insects becoming slow after WiFi exposure, just like kids become slower in thinking after WiFi.

Cancer tumors appear at RF levels ►►► well ☺☺☺ below ◄◄◄ FCC limits ☺☺☺ ► sciencedir (some phones have SAR very close to the FCC limit). The damaging effects of RF are also explained at fcc..11.pdf. The ►more you use a cell phone, the lower are your grades ► mercola. The closer you're to CELL towers, the more health issues you have ► PB 2002;50(6): 369-73. Governments are limiting ☺ or banning WiFi in schools ► parents...html. France ►►► banned WiFi in daycares and limited wireless infrastructure; in schools for children up to 11 years, WiFi routers are not allowed on when not in use for pedagogic purposes. ► ehtrust.org, takeback; Israel banned WiFi for ages < 6. Dr. David O Carpenter, Harvard-trained Public Health Physician says WiFi is not good in schools. ► youtu.be...A. IARC classifies RF as possible carcinogen, class 2 B. ► iarc.fr...E.pdf. The 481 pages 2012 IARC monograph explains why RF is a 2B carcinogen ► monographs.iarc...2.pdf. wifiinschools.com explains that kids are far more damaged than adults, fetuses even more. 3 min video shows laptop WiFi radiation can be higher than cell phone radiation. This guy turned off his WiFi at home as a result. If you want to know how to turn off a WiFi router wireless network, you can watch youtu.be..XM; login into admin panel of the router and turn it off. Teachers may be liable for exposing kids to WiFi radiation. “Smart” appliances today come with RF transmitters that pollute the house 24-7. You can have the company disable it for you, but you will get it from nearby houses, routers, so it sounds better to paint bedroom in RF shielding paint or use an RF canopy. Those “with excessive smartphone use are more likely to experience hearing, tinnitus, balance, falling, and anxiety problems than those who use smartphones less frequently” ► WKW 2025;137:520-6. “Histopathological observations clearly depicted the neural degeneration” ► JCN 2019;102: 101684. “headache (21.6%), sleep disturbance (4.%), tension (3.9%), fatigue (3%) and dizziness (2.4%)” ► SMJ 2004;25(6):732-6.

LIST OF 16 STUDIES PROVING CELL PHONES CAN CAUSE CANCER when used too much, indicating current SAR levels are far too high:☺☺☺

7 BRAIN Cancer Studies:

1) The 13 country IARC Interphone study IJE 2010;39(3):675-94 found that cell phone use > 1,640 hours increased the risk of meningiomas 4.8 times and gliomas 3.8 times (Table 3, see > 1,640 h, start of phone use 1-4 years before reference date). Tumors were more likely to form on the side of the head where a cell phone was held.

2) Patho 2013;20(2):85-110 found for ipsilateral cell phone cumulative use > 1,640 hours, acoustic neuroma risk was 2.5 times higher, glioma risk was 2.3 times higher.

3) OEM 2014;71(7):514-22 found heavy phone users were 2.9 times more likely to get brain gliomas and 2.6 times more likely to get meningiomas.

4) IJE 2013;42(3):792-802 study of 0.8 million women found that those who used cell phones for 10+ years had 2.5 times higher risk of developing an acoustic neuroma vs those never using cell phones. The longer the women used the phones, the higher their risk. ☺☺

5) Epi 2004;15(6):653-9 found that acoustic neuromas are 3.9 times more likely on the side of the head one holds the phone on usually. ☺☺☺

6) EH 2013;12(1):60 found that those using 3G phones the most (4th quartile) had 7.3 times higher incidence of meningiomas.

7) IJO 2009;35(1):5-17 found that astrocytoma risk for ipsilateral mobile phone use in the >10 year latency group was 3.3 times higher and for cordless phone use 5.0 times higher. The risk was highest for cases with first use <20 years age, for mobile phone 5.2 times.

9 STUDIES Show Wireless Radiation from Cell Phones Can Cause pituitary, thyroid, stem cell, oral, parotid, lymph node, breast, blood, prostate and eye cancers:

1) The 4th study above (0.8 million women) found pituitary gland cancer was 2.3 times higher in women using cell phones for less than 5 years. (see Table 3, duration of use < 5 years)

2) AJE 2002;155(12):1096-103 found 2.2 times higher incidence of leukemia when within 6 km of a radio tower. Incidence decreased with the distance from the tower.☺☺☺

3) AJE 2008;167(4):457-67 found a link between parotid gland cancer and cell phone use. For ipsilateral use, risk of cancer was 1.6 times higher for heaviest users.

4) Parotid gland cancers have increased in prevalence 4 times in Israel between 1970 & 2006,

which scientists link to increased mobile phone use ► Epi 2011;22(1):130-1.

5) JEPTO 1994;13(1):33-7 found that those who lives close to a radio tower in Hawaii were more likely to have leukemia. ☺☺☺

6) IAOEH 2005;78(8):625-32 found an association between lymphoma and cell phone use.

7) CRM 2013:354682 found that 4 women (21-39) got breast cancer exactly under *where they were wearing their* cell phone 10 hours a day. They had no family history of breast cancer, tested negative for BRCA1/2, and had no other known breast cancer risks.

8) Epi 2001;12(1):7-12 found uveal melanoma (eye cancer) was 4.2 times higher in those using cell phones and 3 times higher in those using RF devices.

9) STE 2011;409(19):3649-65 found higher cancer deaths near cell phone towers in a big town in Brazil. Most deaths happened closest to the towers. Within 100 meters radius = 3,569 deaths; Within 200 m = 3,569 +1,408= 4,977 deaths; Within 300 m = 4,977 + 973= 5,950 deaths; Within 400 m = 5,950 + 482= 6,432 deaths; Within 500 m = 6,432 + 292= 6,724 deaths. Within 1,000 meters = 6724 +320=7044. Beyond 1,000 m = 147 deaths. Total = 7,191 deaths. 93.5% deaths happened within 500 m, 98.0% deaths within 1,000 meters. ☺☺☺

The next 16 studies show that WiFi wrecks our health just as cell phones do (same RF radiation). The papers listed are only those where exposures were 16 V/m or below. Someone using a WiFi-enabled tablet computer can be exposed to electromagnetic fields up to 16 V/m.

1. Immunohistopathologic demonstration of deleterious effects on growing rat testes of radiofrequency waves emitted from conventional WiFi devices ► JPU 9(2):223-9.

2. Use of laptop computers connected to internet through WiFi decreases human sperm motility and increases sperm DNA fragmentation ► FS 97(1):39-45. ☺☺☺

16. Türker Y. et al., 2011. Selenium and L-carnitine reduce oxidative stress in the heart of rat induced by 2.45-GHz radiation from wireless devices ► BTER 143(3):1640-50.

JCS 2009;20(5):1556-60 found that those who kept their phone in their pocket got the bone near cell phone become 6.5% less dense than the other bone. The side with the cell phone got softer. As entropy increases, the crystalline lattice structure loses order and becomes less tight and rigid and less stable, making the hydroxyapatite (that makes half the bone) softer. Trans fats were a cheap way to increase profits by increasing shelf life, yet they *killed millions*. Today, instead of making phones with lower SAR levels, the same higher profit margin thinking leads to millions of people dying early, and people blaming it always on "chemical pollution" or "aging", when it can be actually electromagnetic, from cell phones, tablets, laptops, connected devices, always on devices near bedroom, cell phone towers, etc.☺☺☺

12.12. PESTICIDES are toxic, human sprayers are replaced by robot lasers

Workers are being replaced by UV laser combine 80 ft wide, other robots do 70 acres/night. Soak produce 15 min in 5 g baking soda/L, alkaline $NaHCO_3$ will degrade the acidic pesticides.

►►► IQ LOWER BY 7 POINTS ◄◄◄ 7 year old kids whose mom's pesticide levels were higher while pregnant got lower IQ ► EHP 2011;119(8):1189-95 & poor motor skills ► SciD

►►► DOUBLE THE RISK OF AUTISM ◄◄◄ Ped 2010;125(6):e1270-7 measured urine levels of organophosphate pesticide metabolite dimethylalkulphosphate for 1139 kids age 8-15.

►►► 2.5 TIMES THE RISK OF PARKINSON ◄◄◄ nih.gov..se ► EHP 2011;119:866-72 (paraquat pesticide is similar to a compound that gave people in their 20s overnight Parkinson by attacking a region of the brain controlling movement, see IJEemiol 2024;53(1):dyae004)

►►► 4.2 TIMES HIGHER RISK OF ALZHEIMER ◄◄◄ for those with highest DDE pesticide blood levels, DDE was 3.8 times higher in those with Alzheimer, DDE blood levels were correlated to brain levels and exposing human neuroblastoma cells to DDT or DDE increased levels of amyloid precursor protein ►JAMAN 2014;71(3):284-90),

►►► TWICE THE RISK OF DIABETES ◄◄◄ with high exposure to gamma HCH pesticide ► IJERPH 2014;11(9):8984-95, 60% higher risk of diabetes from other pesticides ► EI 2016;91:60-8,

►►► 3.2 TIMES THE RISK OF PARKINSON ◄◄◄ in this Taiwan study on paraquat and other pesticides ► Neu 48(6):1583-8,

►►► DOUBLE THE RISK OF ADHD ◄◄◄ for kids with 3-phenoxybenzoic acid (3-PBA) in urine above the limit of detection compared to kids with 3-PBA below the limit of detection. Hyperactive-impulsive symptoms increased by 50 % for every 10-fold increase in 3-PBA levels. ► EH 2015;14:44. 3-PBA is a synthetic pyrethroid (not pyrethrin derived from the chrysanthemum flowers, see citybugs.tamu.edu..3/ for a more detailed explanation if curious),

►►► DOUBLE TO TRIPLE THE RISK OF ADHD ►►► for kids with higher urine levels of dimethylphosphate ► And 2016;4(4):695-705. (over 200 kids in this study),

►►► DOUBLE THE RISK OF LEUKEMIA ◄◄◄ for kids whose moms were exposed to residential pesticides during pregnancy ► EI 2011;37(1):280-91.

There are 7 other studies which have found some worrisome associations between pesticide exposure and certain diseases, although it's hard to prove correlation is 100% causation:

1. Second half of pregnancy and early childhood increases in pesticide metabolite in the urine were linked to double the risk of asthma like symptoms ► EHP 2015;123(2):179-85.

2. Pregnancy exposure to PCBs (from fish for example) is related to cognitive impairments as a

child and lower IQ ► EHP 2009;117(1):7-16.☺☺☺

3. Prenatal & postnatal organophosphate pesticide exposure were significantly associated with increased risk of being developmentally delayed ► EHP 2016;124(10):1637-43.

4. Pregnancy exposure to pesticides was associated with lower birth weight and shorter pregnancy (these are always unwanted outcomes) ► EHP 2012;120(7):1055-60.

5. Exposure in childhood to organophosphorus pesticides and perhaps to carbamate insecticides in combination with a reduced ability to detoxify these pesticides may be associated with childhood brain tumors ► EHP 2010;118(1):144-9

6. Higher pregnancy glyphosate and thiocarbamate pesticide exposure led to almost double the risk of miscarriage, for a farm population ► EHP 2001; 109(8):851-7.

7. Men who ate the most low-to-moderate-pesticide fruits and vegetables (≥2.8 servings/d) had a 169% higher total sperm count and a 173% higher sperm concentration than men who ate the least of those fruits and veggies (most omnivores don't eat a lot of low-moderate fruits-veggies) ► JN 2016;146(5):1084-92. The researchers found that eating high pesticide "dirty 12 list" produce in addition to low-moderate pesticide fruits/veggies canceled out the good effects and resulted in no semen quality improvement. This same thing was found in other studies, such as HR 2015;30(6):1342-51 which found that men eating the highest pesticide fruits and veggies had 49 % lower sperm count and 32 % lower percentage of normal sperm than men who ate the least of those fruits-veggies and instead ate the "clean 15" or other fruits which can be almost as clean conventional as organic versions.

One issue in 100s of similar studies looking for causation is that it is assumed that pesticide exposure is correctly represented by certain metabolite urine or blood concentrations, but apparently, this urine metabolite level doesn't indicate if pesticides came from food or spraying around the house-garden (different formulations, etc) and how much came from real pesticide in food as opposed to other chemicals in food, etc and also ignores the different body capabilities to process pesticides and eliminate them through urine differently. Some studies do note the genes of some people seem to affect these urine levels or the effects of pesticides. BRI 2014:179691 explains that the formulations of pesticides used are often times 300-600 times (one was 1056x) more toxic to human cells than the active principle, and our safe limits are based on the active principle not on the formulations (with adjuvants, etc) they use in the field. This was, however, an in vitro (test tube) study, not in vivo (inside humans). Synergy in toxicity? It's possible that exposure to strong stomach acid reduces this toxicity a lot, if one eats an apple or item with pesticides on the peel (hard to remove by washing, actually impossible, since it's in the peel itself too, not just on the peel, and fruit itself, but 90% of pesticides and also good

phytonutrients and antioxidants are often in the peel for many fruits and veggies). ☺☺☺

An interesting thing about the lower IQ study is that if kids had more pesticides after birth in their blood, this did not mean their IQ was lower. But if the mom had more pesticides while pregnant, they got lower IQ, indicating that fetus development period is perhaps much more sensitive to pesticides than any other period. It makes sense to try to cut pesticide exposure by 70-90% by simply eating the clean 15 and none of the dirty 12 fruits or veggies (see the list of the pesticide levels in 50 fruits and veggies at e.list.php, ideally eat the ones that are in the cleanest 25 and avoid the dirtiest 25) when pregnant or even when the kids are small, but even for adults effects exist, even if they show up decades later as Alzheimer. Eating organic costs about double, so maybe 300 a month if you spend 150 now. Organic produce might have 5 times more biophotons than conventional one if the age is the same, as explained in the biophoton section. Cooked foods don't have many biophotons (semi cooked may have 1% left or more), and cancer tissues lack biophotons, this may be why many cured cancer with a raw vegan diet: they provided biophotons for cellular communication and dissolving the tumor. When people moved from a conventional diet (> 80% conventional) to an organic one (> 80% organic), urine levels of organophosphate pesticides dropped 10 times in 7 days ► ER 2014;132:105-11.

About 90% of corn, soy are fed to livestock. Because of the need to get more of some of these crops that take so much arable land, industrial pesticide use is needed. If we would all be vegan, we would not need to use pesticides. You can feed 10 times more people at least if all are vegan with the current arable land. With vertical farming, you can eliminate all pesticides and feed even more people. One more reason to go vegan, care about millions of people dying early from Alzheimer, diabetes, Parkinson, car accidents due to brain not working that well as pesticides cloud thinking (lower IQ), heart disease, etc triggered by pesticides. *The dirty 12 clean 15 lists mentioned above* are used by some to decide when to buy organic. Many people have no clue, that if you go to the right store that has more in vegan and/or organic stuff like Sprouts or Costco, you can find those items cheaper in organic form than conventional produce at many supermarkets (Costco produce section is cold, it's good quality).

► Problem: lowering our IQ and slowly killing ourselves with pesticides. ◄ (Just like we used to put lead in our dental fillings and doctors said it was OK)☺☺☺

► Solution: vertical indoor farming works for many produce items and doesn't use any pesticides (greens are usually among the most contaminated with pesticides and they all can be grown in vertical farms). For the stuff that can't be grown in vertical farms that use 100 times less land and 20 times less water, where there is a will there is a way to increase crop yields without pesticides, for example:

1. **SOUND**. youtu.be/pwaZttlPoZg is a great video about increasing plant nutrient uptake by up to 700%. More details are in the first part of Chapter 7 and the Chapter 7 Sonic Bloom section.

2. **BIOPHOTON** rich irrigation water has led to produce 3 times bigger, all they did was pass water thru a device that increases biophotons in water ► hexahedron999.com..water.

3. **LASERS**, see this 2 min video about using Blue Light to remove weeds, 99% kill rate with huge UV laser combine 80 ft wide and 70 acres/night, naturezap.com might replace glyphosate and glyphosate resistant GMOs that lead to 13 times higher glyphosate (carcinogen) content in things we eat and wear (yes, even cotton has glyphosate). This is an ultra primitive application of this idea (imagine if we spent $1 billion to develop such technologies), one could use drones that scan for some things and use an array of frequencies to selectively wipe out weeds, insects, etc.

4. **DIFFERENT CHEMICAL CONTENT OF TOOLS** (sounds funny but it works). ☺☺☺ ► kup...english explains the advantages of using copper tools in agriculture, instead of iron; there was a real difference in crop yields. Viktor Schauberger, a great inventor, realized that the use of iron garden/plowing tools reduces the fertility of the soil. Simply said, Viktor saw rust in water or soil as life destroying. That's why he turned to using copper. Viktor and his Son Walter both received multiple patents for tilling tools made from copper, which leads to increasing yields by many times in some cases. Victor Schauberger was a genius who discovered this and many other things related to saucers, water quality, agriculture, the healing effect of round or oval living spaces (instead of the rectangular box type), which was found to also induce astral awareness faster, etc. Here is a review of Victor's work ► merlib.org/node/1101. ☺☺☺

5. **HIGH PERFORMANCE AGRICULTURE**. An Amish farmer (poor house gone) increases yield 6-8 times, which pesticides can never do (max 40%): "John Kempf, an Amish farmer, is one of the leaders in the field of high-performance agriculture. He's the founder and CEO of Advancing Eco Agriculture,1 and runs an organic, high-performance farm in Ohio. "You have to have different expectations and you have to begin managing your crops differently. For example, when you're expecting to produce 60 to 70 pounds of tomatoes per plant, you no longer plant the plants 12 inches apart. That doesn't work logistically. You have to begin spacing tomato plants two and a half to three feet apart. But all of a sudden, you only need three tomato plants instead of 36.""

6. **Much safer chemicals that help plants defend themselves** (this would be a last resort, when all the 5 methods above fail, and probably would never have to be used if science served our best interests instead of Pesticide Companies stock price ► sciencedaily.com...05.htm. Chemicals that make plants defend themselves could replace the harmful pesticides used today, pesticides known to damage the environment and to have bad effects on human health. This idea is presented in more detail at BMCL 2015;25(23):5601

The stone age did not end because of a lack of stones. ***The pesticide age won't end because of a lack of pesticide making ability. Just like lead for dental fillings did not end because of a shortage of lead.*** **Maybe some geniuses will come up with several methods to motivate pesticide making companies to research these alternatives and become major players in these healthier more benign industries of the future agriculture using more biophysics. Conventional farming uses 900 man made pesticides. Organic uses 25 man made chemicals, including hydrogen peroxide, alcohols, copper sulfate. Among the 25 are a few pesticides, all of which don't have an EPA tolerance (being much safer than many synthetic pesticides used in conventional farms) except for spinosad. Rotenone, a natural pesticide, is banned in the US, and contrary to what many articles say, it's no longer used by any organic or conventional farm. See more details about conventional farms using more copper sulfate at gmo...organic. "organic rules require that approved synthetic pesticides be used only as a last resort." Benbrook, former research professor at Washington State University, who has done extensive work on pesticide residues in organic foods, says: "When you compare organic versus conventional food, it is absolutely inarguable that organic food reduces dietary exposure to pesticides by 98%." Not sure how true that is when third party testing is done, but it may be true in some cases. Benbrook wrote a long article at wsu..6.pdf about the benefits of organic foods with lots of science papers highlighting the nutritional benefits of organic foods, especially during pregnancy, first years of life to prevent birth defects, low IQ, autism. h...3.html states "Genetically, Darnell (a frog) is male. But after being raised in water contaminated with the herbicide atrazine at a level of 2.5 parts per billion — slightly less than what's allowed in our drinking water — he developed a female body, inside and out. He's also the mother of his children, having successfully mated with other males and spawned clutches of eggs." This, if a true and reproducible effect (some allege it was not reproduced), shows how low levels of pesticides, within safe levels, can have dramatic effects on animals, see more on this frog at Mother Jones. 17 million Americans have atrazine in their drinking water above this frog changing level. Atrazine is also suspected to cause breast cancer. Huffington piece also states "The EPA has estimated that between 10,000 and 20,000 pesticide poisonings occur annually among agriculture workers in the U.S. and over the years some have died as a result. That's not the case with those folks who labor on organic farms". There are always 100 studies for and 100 against something that is pretty popular and controversial. ☺☺☺**

Skeptics often times argue that organic is having higher E Coli contamination based on a 2004 study, JFP 2004;67(5):894-900. As if the whole science about this is based on a single study of 40 farmers in Minnesota, when you would need to have many studies to draw a conclusion. But when you read the study (the whole paper) in detail you realize 25% only of organic farms in the study were certified. The rest just used "organic practices". And For every 4 organic farms, there was one conventional one, making the error in the conventional farm group bigger. The

coliforms contamination for some produce items like onion, bok choi, zucchini was higher in the conventional farms, and the skeptics don't report this. The Table on E Coli in certified farms shows they perform WAY better than noncertified farms, having no E Coli at all, except for 3 veggies, while non-certified having E Coli for 9. Leafy greens from conventional were having E Coli at a rate of 25%, lettuce 17% while certified organic 0% for both leafy and lettuce. I noticed this in several skeptic articles, they talk of something bad, like rotenone, but it's no longer in use. Or they mention only studies that fit their narrative, totally ignoring studies that found the exact opposite or vastly different results. When a study finds something they disagree with, they attack that study's weakness but ignore the weaknesses of the studies they believe in. It's typical confirmation bias, intentional or unconscious. So, without reading the full papers, one can barely understand what goes on, as abstracts say only a tiny bit. Using animal fecal matter as fertilizer is not the best, especially where they don't wait at least 12 months before application or they don't compost it at high temp. This is where a lot of E Coli comes from, and Salmonella. Farms that used manure younger than 12 months had a prevalence of E. coli 19 times greater than that of farms that used older manure. If so, they could probably ban the bad practice of using young manure in any farm. The paper says "Among organic farms, the percentage of those that had at least one positive sample for E. coli were 12 and 59% for certified and noncertified growers, respectively." That's a 5 fold difference. So, when a study reports noncertified and someone mentions a study and makes people think it's one of those USDA sticker type of farm, it provides the wrong impression, very misleading but OK with skeptics. LAM 2001;33(6):434-9 found that organic produce contamination was 1.5% at retail level, compared to 9.7% in the field (you are far more likely to see contamination in the field) in this 2004 study with 75% of organic farms uncertified. Nutrition 2001;16:647-94 found that 8.3% of conventional produce was contaminated with E Coli (not just 1.6% as in the 2004 study skeptics always quote, pick and choose studies and you can argue for anything). A restaurant survey found 25% of conventional lettuce was E Coli contaminated. Anyway, another unclear issue is which strain of E Coli causes more food illness, how many organic veggies caused a food illness versus conventional. In a study that included 3,200 organic retail vegetables, no E Coli was found ► IJFM 77:199-204. This just shows how complex things get. Another misleading thing skeptics do is that they quote the study and ignore the main finding of the study which was that "The results of the present study don't support allegations that organic produce poses a substantially greater risk of pathogen contamination than does conventional produce." They only picked the negative thing in the study, that E Coli for organic came at 9.7% (4.3% for certified organic), higher than conventional. ☺☺☺ When they had "E Coli outbreaks" blamed on veggies, it was usually impossible to find E Coli on the veggies themselves. It's usually conventional stuff that gets blamed.

The skeptics will say that correlation of diseases and pesticides is not causation and there might

be other *confounding* factors or things that contribute to these results, but it's not just one or two papers showing the same relationships. In the future, by doing cognitive tests and having people eat more of clean 15 and more of dirty 12 or something similar, one can see effects on mental performance, Alzheimer and Parkinson and cancer markers in the blood in interventional studies. By comparing diets (that people have without intervention) and eliminating all *confounding* factors, it will be possible to also add more data to prove beyond any doubt the causation. ☺☺☺ They did not have a lot of perfect studies to prove smoking is bad for you (since it's unethical to force people to smoke to see what happens) and yet the Surgeon General did say smoking is bad. It's like we have hundreds of studies showing higher blood pesticide levels are linked to a host of cancers and brain diseases, but many still want more solid proof of causation. Others believe in causation, but they believe only those spraying with pesticides are in real danger, not the average person eating them. There are many hypotheses about how bad pesticides are, but for any disease, there are many risk factors and pesticides are just one of many. So, it's understandable why some are skeptical about the organic vs conventional etc. especially when you read articles like the Slate one which presents the hypothesis that the organic vs conventional is not important, but eating more fruits and veggies is important, yet the article doesn't talk about synergistic toxicity of formulations, not only are EPA limits referring to individual pesticides, and not formulations, but there is no safety test for a combo of formulations (which can be 1,000 times more toxic than the main active principle), the combination of several formulations may be a million times more toxic, and then the numbers in her article become less of a strong argument to ignore organic versus conventional. ☺☺☺

On the other hand, her stating that rotenone is more toxic than many synthetic pesticides is valid. But rotenone is no longer in use. Anyway, reading her article too is good, since you get to appreciate how many toxins are in everything we eat. "Americans consume about 1,500 mg of natural toxins from plants a day, which is approximately 16,000 times more than the 0.09 mg of synthetic pesticides we get from food every day" ► PNAS 1990;87:7777-81; the paper argues that conventional is as safe as organic, because all fruits and veggies have tons of toxins. Yes, but vitamin B_{12} daily dose is 2 µg or 0.002 mg and without it people can get really sick. So, 0.09 mg or 90 µg (45 times the weight of B_{12} daily dose) of synthetic pesticides could have a similar harmful effect in some people at least. Assuming it is beneficial is hard to swallow, especially when human cell lines die in the presence of some of these pesticides at very low levels. The burden of proof about safety is on pesticide makers, as the doctors would say about a medicine. However, JT 2011:589674, does explain that even Winter, a skeptic who believes conventional produce is harmless, found that organic produce has 3-5 times fewer pesticides than conventional, so instead of 90 µg a day, the average person would get 20 µg or even less per other studies. Winter believes the dirty dozen and clean 15 is a meaningless ranking since the

synthetic pesticides are in such low quantities as to be all harmless and also because of other aspects of the EWG method of ranking. The disbelievers argue that given the toxicity of many other compounds we eat daily, the exposure to synthetic pesticides is negligible (16,000 times lower by weight) and a waste of time to even talk about. They might be right, yet other studies contradict their optimism, even if some of the most anti-pesticide study results were from people who sprayed pesticides, not normal people who eat produce. Many of those studies about 2-4 times the risk of Parkinson, lower IQ, etc were from people who lived near a farm that used pesticides or that sprayed pesticides. So, it may be that the average person doesn't have to worry, especially if they don't use pesticides around their home. Who is to say? Perhaps, some people are more allergic to synthetic pesticides than others, but the data on autism, ADHD, etc is from normal average people, not pesticide spraying professionals. Talking about toxicity, if a person inhales 2 mg of a naturally occurring lectin called ricin, they die, so it's not about weight so much as about how toxic the "toxic" compounds are. So, we live in a toxic universe, with tons of little toxins everywhere, so adding a few man made toxins won't make any difference the argument goes. The skeptics might be right. You never know. We're mortals, with imperfect knowledge. Even with 3 trillion studies proving something, there can still be an error in all those studies that gives a false causation instead of correlation. Many die from allergic reaction to natural compounds in asparagus, fish, meat, nuts, beans. If people read more things from both pro and con camps of an issue (e.g. organic versus non-organic), they can make better and more informed decisions and appreciate the infinite complexity of every single issue out there. ☺☺☺

The usefulness of this is at least in understanding that a cause of allergies could be synthetic and even natural (used by organic farmers) pesticides. Just like hormones in our bodies or vitamins have a HUGE EFFECT in tiny microgram amounts, it could be that synthetic pesticides can have a truly outsized effect at levels that EPA thought were safe, in certain individuals whose immune system go into a wild response. If this is so, then the argument of skeptics becomes much weaker. Yet, given that every second 10 million trillion chemical reactions happen in our bodies, it's not easy to assess the exact impact of each pesticide or formulation (which may be even more toxic, see synergy of toxins above) or combo of formulations, etc. Even now, after all these studies, I'm not 100% sure what is best, even if naturally we would all want to avoid pesticides and I'm all for alternatives, perhaps some people would benefit a lot from organic or partially organic diets, if they're ultra sensitive to certain natural or man made pesticides, or perhaps ideally all would benefit, but it's not doable in the short term due to inertia. If people get too scared of "man made pesticides", they might avoid fruits and veggies, but there are far worse poisons in meat and dairy and processed foods in much larger quantities too (and meat and dairy have antibiotics, etc in addition to pesticides). That's why I don't want to be too one sided. Perhaps the real danger may be not eating enough fruits and vegetables, more than eating 0.1

mg of "conventional or organic pesticides" a day. Without vitamins, biophotons, and other phytonutrients, we would run into problems a lot faster. ☺☺☺ I assume if we all went raw vegan 100% or 70-90% we would be healthier even if conventional and not organic.

It may be that someone who smiles more, does more meditation, good sleep, eating raw fruits and veggies with enough nutrients, peaceful music, more conscious breathing, exercise (even if just chores or some volunteering etc), etc and eats conventional produce is way healthier than someone who eats organic, but doesn't practice those other things much. After all, this pesticide exposure is one of many risk factors for overall mortality. Perhaps one of 50 risks, and then what really matters is the other 49 too. It's possible that bad sleep or irregular sleep or too little sleep alone can probably be 10 times or 5 times more damaging than eating 0.1 mg of pesticides a day, given that we eat 1500 mg of all kinds of toxic things in plants alone (stuff made by plants to defend themselves, sort of natural pesticides), not to mention processed foods tons of synthetic chemicals and junk that has toxic side effects and meat with fat, cholesterol, nitrosamine, antibiotics and the list is ULTRA LONG. Just eating too much fat is probably causing far more diabetes, Alzheimer, etc than pesticides, unless one works as pesticides sprayer and inhales not 0.1 mg like normal, but 100 times that or 20 times that. The lectins we eat in bread, donuts, all cereal products (and all legumes and most nuts and seeds) may do far more damage than the pesticides, and we don't know it since nobody studied populations with or without these lectins in detail to assess impact on β-amyloid plaque, Alzheimer, IQ, etc... the red kidney bean lectin kills people if not cooked and eaten raw, it coagulates blood. Ricin, a lectin in castor bean, takes 2 mg to kill someone, VERY little. But pesticides are cumulative, so even if their lethal dose is not 2 mg, if you eat 0.1 mg daily and you can only eliminate a part of it, over 3 years you accumulate a lot of stuff that may affect certain brains and give them autism, even if they're not farm workers being exposed to 20-50 times the level of us normal people who eat dairy, meats, fruits and veggies contaminated with pesticides. All organic meats, dairy and produce have pesticides, just natural ones (that conventional fruits don't have) and a few synthetic approved by USDA. It's evident though that pesticides like anything can cause issues, it's just hard to give a general answer as to which risk factor contributes more to what disease. ☺☺☺

If one wants to be very cautious, it makes sense to go organic, especially during lactation and pregnancy, but I know in some areas some produce is hard to come by and organic versions cost 5-10 times more than the produce at the 1$ store in California, making going organic prohibitive economically. Perhaps, when all is done with indoor vertical farming or some sort of enclosed system requiring no pesticides, plants will evolve to no longer produce any harmful chemicals (no predators in a vertical farm) and our foods will be better or some new mutations will ensue due to sound, biophotonic enriching of water, etc that will make the plants more human friendly. ☺ Although these days, instead of waiting for plants to evolve to no longer produce

lethal toxins (like raw kidney beans or asparagus, etc), genetic engineers are working on versions of plants that don't have the lethal or highly toxic things in them that evolution gave them: potatoes without 200 ppm in toxic glycoalkaloids (tomatoes have just about 20 times less), and nuts without the proteins which cause allergic reactions in most people, asparagus without the chemical that can cause death in some people thru anaphylactic shock, legumes and grains without lectins that cause tears in the intestinal walls, etc. Is that the right approach? GMO fans will say yes, while the opponents will say no. Anyway, there might be safer biophysics methods to "steer evolution of plants away from producing so many human harming chemicals" or to just create eterni foods, add biophotons, abandon agriculture. EWG list shows the top 50 most common produce items, in ascending order of the pesticide levels, from 1 to 50. Google EWG list 2024 or earlier years for older lists as it changes. In 2024-5 blueberries were in the DIRTY DOZEN, but in 2020 they were number 22, so it changes. Anaphylactic shock or hives can occur due to streptomycin in blueberries or produce, or due to another pesticide used, so always try an organic version to see if hives or allergy vanishes and then change to a different supplier if organic too pricey, since not all use that pesticide.

12.13. Dirty Electricity: why we need avoid solar tiles (last 5x less than panels), efficient panels, dimmable LEDs, cheap/micro solar inverters, use 300W panels to create passive cooling by covering 80% of roof to create shade to halve AC use

The next 15 pages explain how stray voltages can cause premature death and chronic disease and what type of wiring to install in a new house to survive nuclear EMP attack, solar storms and other events that can otherwise fry your off-grid solar system and leave you without power. The EV RF Safety section explains in the first paragraph the car issue of high frequency dirty electricity, 2-100 kHz high frequency harmonics transients (dimmer switches and fluorescent lights especially, see it on meter) that travel on 60 Hz AC wiring (watch an engineer explain it in 1 minute) when electrical devices or light bulbs lack a 2$ filter to eliminate them, and cause cancer, short-term memory loss, seizures of kids, blood vessel rupture, chronic fatigue, diabetes, asthma, amputations, blindness, heart disease. Oscilloscope shows how Stetzer filter reduces voltage changes 1% at 60 Hz (most current), 50% at 200 Hz, 80% at 0.4 or 1 kHz and 1 MHz, 98% at 10 kHz & 100 kHz, how the utility brings it dirty electricity when all breakers are off, except the main one for the whole house. See how rises in stray voltage cause weight gain, high blood sugar and waking up in the middle of the night, or even muscle spasms in animals (and people), how baby calves die due to dirty electricity, as human fetuses die or are born with incomplete lung development too, kids whose heart doesn't work and went to ICU upon birth and died at 18 months old while in the hospital, cows didn't produce enough milk and immunity collapsed, cows getting sick and never recovering, chronic fatigue and short-term memory (lady 1) loss that

disappeared (lady 2) when they installed Stetzer filters of dirty electricity. Profits above safety mean genocides. In immortalism profits don't exist, everything is by and for We the People, via the 11 companies. GS is the unit to measure dirty electricity. 1 GS = 24V/s. See more about this in this video and in Dirty Electricity by Samuel Milham. Car seats that get heated may generate too much heat and lead to infertility via heat and also, via EMF from the heat mechanism. The same can be true for heated steering wheels, they may generate EMF that causes arthritis, so try get a soft cloth cover. Some speculate DC fast charging will replace J1772 Level 2 slow charging by 2050-2100 even in homes, to minimize loss of electricity during solar DC to AC conversion and back to DC when changing car batteries that need DC. California may mandate that to be the case, even if DC charging is as fast as Level 2 charging, based on efficiency and health arguments, not speed. We certainly don't want a new set of health issues emerging that nobody investigated well, if you slow charge car via AC 12 hours daily while you sleep, causing 4000 new cancers. That's why it's ideal to measure dirty electricity with the Stetzer meter and to realize most meters don't catch everything and to be ultra safe, you can fast charge outside at Tesla superchargers, if your sleep is disturbed. Recall that many new techs, like leaded gasoline, did huge damage for 100 years before they were banned. Same thing could happen with these AC chargers in homes while we sleep, they may be banned in favor of DC charging, fast or slow, if they can't make AC-DC inverters and house wiring that eliminated dirty electricity high frequency stray currents, etc. Our devices may move to DC mostly in 150 years due to less lifespan shrinking via AC EMF. ***Inverters AC to DC, or DC to AC, if built cheaply, generate too much dirty electricity***.☺☺☺ Use same GQ EMF-390 + TriField meters from 12.11; USB to socket adapters/chargers can create huge pollution, as most on Amazon do except Samsung or OEM from big name companies; Dollar Tree got e-circuit swishtech 1$ USB-plug adapters that produce no Stetzer meter high frequency dirty currents, so that's the best deal for the price, others on Amazon cost 10$, pollute 900 times more when used 24-7 for a small USB fan, battery pack charging, etc. For electric soap dispensers drawing electricity 1 second each 3 hours, it's not going to pollute much, but it can pollute. While the fact DC current is more friendly (in terms of invisible wireless effects, ambient house EMF pollution) than AC circuits for human biology has been disputed a lot, the dirty electricity effects caused by various devices (even if all devices use AC) are less controversial. DC is way more energy efficient too, see video. That's why it helps to know a little about it, so that coal and gasoline chemical smog is not replaced by eletromagnetic smog, just as toxic and more dangerous, since it is 100% invisible (car smog can be seen and smelled). The RF section details RF from power lines, cell phones, WiFi, but there is a pollution we can't avoid even if we don't use WiFi or cell phone, the dirty electricity from the grid, from neighbors' houses. To avoid this, and its biological effects, we need to measure it and find the ***lightbulbs*** (see my tests of LEDs for EMF at the end of this section, how bad all ***CFLs*** are vs clean ***LEDs***), chargers (cheap chargers of phones, tablets, with 90 times more stray voltage), that cause

it and/or install filters that reduce the dirty electricity from the grid and neighbors.

There are many meters of dirty electricity, like $40 Stetzer (US design, made in China, it is a 20 µF (micro farads) 250 VAC CBB61 motor capacitor that prevents voltage changes and costs 9$ in other places, see the 1 min video, placed in a plastic box, so the capacitor dies, like any capacitor on an AC compressor, so you need buy them again, paying 40$ for 9$) the original company UL approved, $37 Greenwave got UL label in the latest versions sold in USA (see their youtube) and has a 25 µF 330 VAC capacitor (higher capacity, so it reduces more than Stetzer as most youtubes show), plus two blue 220 pF (pico, 10^{-12}) capacitors, one 100 kOhm discharge resistor to prevent electric shock when you plug or unplug if hands are on the 2 prongs, hear story of headache and ultrasound heard by kids), $180 (overpriced?, the interior of this is more complex, not just one 9$ capacitor, how they make it in USA, their youtube has some aggressive videos that raise doubts about company ethics, may just be almost same protection) Satic, advanced $300-1600 DNA.☺☺☺ One youtuber found using Alpha Lab EMI Line voltage meter, that Greenwave reduces voltage to 52, 670, 370, while Stetzer, for same sockets to 70, 870, 470 mV, so at least from one point of view, Greenwave is better, due to 25, not 20 µF capacitor. You only need about 3-4 filters for a small room. Youtube explains how many made their own dirty electricity filters, using 1-3 capacitors with a total capacity of 25 µF capacitors using a 4$ box to house the capacitors and the discharge resistors. One capacitor is best, as no extra work and if one dies, you don't get the best filtration. If using generators, it's safest to temporarily remove the filters. It's not clear if *these can act as dual use devices that also raise your heart rate (notice the sarcastic heart rate graph design on the Stetzer socket units, recall it's made in China, never know what satellite spyware and download capability it has..., most of these ☺0 IQ☺ aristocrats in USA design locally and trust the Chinese to make it always per the plan, which is foolish; they play sports, instead of making stuff here)* as a form of torture by spies using "products' remotely activated second function" to harass people (just as they can use any electronic device that plugs in, not just these, waking people in the middle of the night etc). Silimar torture could occur with other devices, such as plug in USB Q-link or other anti-EMF products that are least suspect to be military purpose ones: *basic rule* is military spy stuff often disguises itself as "health products, vegan and spiritual *stuff"* to not raise suspicion. *Anything electronic made outside of US or even inside, can be used for torture*. Washing machines generate dirty electricity while turned off, so do other appliances. It may be 150 years before EPA enforces and regulates manufacturers to minimize dirty electricity, since it's the cheapest devices that generate the dirtiest stuff, since it's expensive to filter noise. Until then, you need to be more careful, since some cheap chargers can generate 100 times more. Even fridges, when making the hum noise, may generate dirty electricity (make sure nobody else in another room in the house plugs a charger that causes the spike, leading to the wrong conclusion); electric car charging (not sure how much every brand,

need testing of on board and home chargers), electric saunas, dimmer switches (I avoid those, all dimmer switches (can use dimmable LEDs on non-dimmer lamps though with no effects, since many stores sell most LEDs dimmable now to increase sales), lamps, switches, CFLs to keep your house clean of dirty electricity, this is the advice of many researchers) too. ☺☺

Even gas cars are so computerized these days, some probably are unhealthy; combustion may produce unhealthy undiscovered energies (magnetic fields are high in all cars for driver, equal gas/EVs). Dirty electricity is like RF, too much can cause miscarriage, birth defects, cancer, shorter life etc. The scariest thing is cheap electric car charging ports (cheap manufacturers), which use a far higher electrical power than computers and fridges, so if that thing is charging for 12 hours every night, as dad commutes a lot, it could flood the whole house in toxic waves and cause birth defects, insomnia☺☺☺, cancer, brain fog, diabetes, etc. I have a Stetzerizer microsurge meter to measure the dirty electricity (10 Khz to 100 Khz, 1 unit is 24V/second, official meter used by Khazakhstan) of every lightbulb, lamp, device, electric car, etc. Details are at US patent 6,914,435. I was shocked how some phone socket to USB chargers create dirty electricity when plugged in that is measured at every house socket, while other cheap wall USB chargers (all made in China I bought from Amazon, many models, single, dual, triple, quadruple, sextuple USB chargers) create dirty electricity only on one or two sockets if a Stretzer dirty electricity neutralizing device is in that socket. Chargers that did not create dirty electricity among those I tried are the made in Vietnam Amazon 9$ Samsung fast charger (which is identical to my current Samsung phone fast charger, and which can be used as socket to USB wall charger of 100s of USB devices too, even soap dispensers, etc) and my made in China Samsung identical almost charger from my Samsung Galaxy Mega) and the Tech & Go dual wall charger (I didn't test single, they come in many colors, white, blue, black, red, etc) made in Vietnam from home depot. A lot of Amazon sellers sell junk made by cheap component startups, so you may save 4$ but get headaches from dirty electricity for as long as you use that device. (Greenwave measures from 3 KHz to 10,000 KHz (more higher harmonics of the 60 Hz oscillations; 10-100 KHz disappearing via Stetzer meter using one filter or better appliance usually means the other currents are also down). It's worth mentioning that tankless electric water heaters can use 200 times more power than a 0.1 Kw desktop (which itself causes tons of dirty electricity without Stetzer filter, I sometimes used 3 filters in my bedroom, and even a q-link, though the q-link and other "green anti-polution" devices may be a cover for some form of mind control, torture, sleep sperm emissions inducing device, not RF (radio frequency) damage eliminator – may be an aid for ultrasound or other projection of dream content by the military mind control researchers, so often times, electronic devices are not what they claim to be, beware of what car you drive) and about 10 times more than a typical electric car (3.3 Kw), so it can generate for 30 minute of a shower so much dirty electricity, that it could cause birth defects

in many nearby houses for pregnant women or even DNA damage in any adults, and we would not know for 200 years; it only takes 30 min to ruin DNA permanently. The hard core killers who're soldiers, can sometimes use a cover of "green/environmental" or even "vegan", "anti-EMF, anti-RF to push products that have nothing to do with the lowering of RF damage, but Nazi experiments on unwilling gullible guinea pigs they use to perfect mind control weapons.☺☺☺

The Cleanest Inverter for on/offgrid is Outback GS4048A-01 4KW, the gold standard for low-EMI (electromagnetic interference) and low GS unit output. Tesla is deadly, like 90% of solar companies: Tesla uses junk inverters that produce high GS. Not only that, but Tesla Roof Tiles, like most solar shingles, are going to lack the 6 inch gap between panels and roof (thru which wind cools the panel underbelly and the house roof via wind and panel shadow) and cause a dramatic overheating of your roof vs solar panels that offset that heat, keeping your house or offgrid studio far cooler, free of any need for AC. Let's face it, most Earth is so hot in the summer, that solar tiles make sense only in the coldest climates. Solar panels air gap cooling maintains the 6 kW rating for 30 years, while solar tiles are mounted flush against roofs, causing excessive heat underneath, degrading and burning solar cells far quicker. You end up paying more in the long run. Solar panels covering your studio or tiny home are better than shingles for roof water catchment *(fewer ceramic micro particles, roof junk (that sticks 50x easier to shingles vs shiny panels) end up in the rainwater to damage the filter/you)* and solar panels keep the studio roof 45°F degrees cooler in the summer vs solar tiles, requiring less EMF producing AC tobe on. Outback inverters use massive, old-school low-frequency toroidal transformers. Cheap, modern, lightweight inverters use high-frequency digital switching to mimic AC waves, which spikes the GS to 1500-4500. Outback utilizes heavy physical copper coils to smooth out the wave naturally, keeping baseline dirty electricity incredibly low (often under 30 to 50 GS units straight out of the box). The EMP Bonus: Low-frequency transformer-based inverters like Outback are physically rugged. Their heavy internal copper coils are vastly more resilient against voltage spikes and EMP surges than the fragile, microscopic micro-processors found in cheap, high-frequency digital string inverters. The 2nd best choice is Victron Energy (MultiPlus-II) top-tier brand highly favored by off-grid engineers who track power quality. Like Outback, the Victron MultiPlus-II is a low-frequency, heavy-transformer inverter. It produces a remarkably clean, true pure sine wave. On a Stetzer meter, a well-grounded Victron system typically hovers in the safe/acceptable 40 to 60 GS range before any external filtering is applied. Avoid Cheap All-In-One Units, cheap, high-frequency, all-in-one import inverters (standard Growatt, MPP Solar, or budget kits). Because these units rely on ultra-fast digital switching power supplies to save on manufacturing costs, they leak massive amounts of electrical noise back into your studio's house wiring, 800-1,600 GS. To bring GS to 5 or so, install Shielded Metal Conduit (MC Cable): don't let your contractor use standard plastic Romex wiring inside your house walls. Ask them to run all

electrical wires inside armored metal clad (MC) conduit. The continuous aluminum or steel jacket around the wires acts as a physical Faraday shield, capturing any high-frequency noise traveling down the copper and dumping it safely into the ground rod before it can radiate into your house. To fully wire a 400 sq ft studio, you will need about 250 ft of wire or $262.50. Place your main electrical breaker panel on the furthest exterior wall of your studio or house, inside a utility closet or right next to the front door, not on the wall directly behind your bed, headboard, or desk where you sit for hours. Install Dedicated Stetzerizer Filters: Mount 3 Stetzerizer Filters directly into the electrical outlets closest to your subpanel so GS drops to 5, 50x lower than most offices. These filters act as electrical sponges, absorbing the remaining high-frequency harmonics (10-100 kHz) of the solar inverter. 90% of solar inverters sold are cheap junk giving us diseases thru 900+ GS currents, and that's why they cost much less than nuclear strike proof versions.

Choosing low-watt/efficiency panels to spread a massive "solar parasol" shield over 357 ft^2 of the 400 ft^2 studio is a passive climate design that keeps all roof 45°F degrees cooler, removes a need for AC install, costs less than expensive high efficiency panels. Instead of using 14 premium, high-power 430W panels (which leave half your roof exposed to the sun), use 20×300W Mission Solar (or Aptos Solar equivalents, 160$ each from Res Supply): rugged, heavy-duty US-built panels with a 25-year structural warranty and perform well in high-wind zones. A 300W panel is 5.5×3.25', 17.87 ft^2, 20 panels is 357.4 ft^2 of direct sunlight blocked from warming the roof. For a 400 ft^2 tiny studio/home this is a huge deal, it prevents most direct heat transfer. You need eaves too, so total roof may be 576 ft^2 if it's 24×24, in order to shield the building from rain and catch water easily if off-grid, ready for solar storm/EMP attack when all systems fail. Besides the 3200$ panels, we need IronRidge Aluminum Roof Mounting Rails & Clamps $650 + Henry 287 Solar-Flex Ultra White Elastomeric Roof Coating, $188 for two 5 gal pails from Home Depot. 1 gal/100ft^2 per coat, so 2 pails for 2-coat highly reflective shield on 576 ft^2 roofs.

The "Net-Zero" Wiring Trick (Cancelation): to ensure MC cables don't create stray magnetic fields throughout your walls, ask your electrician to execute perfect circuit balancing. A magnetic field is only created if the hot wire and the neutral wire are physically separated. When running MC cable, the hot and neutral wires are twisted tightly together inside the armor. The magnetic field of the hot wire automatically mirrors and completely cancels out the magnetic field of the neutral wire, resulting in a net-zero magnetic field radiation across your walls. Ban "Stray Currents" on Pipes by connecting a water catchment tank to a house using PEX (plastic) plumbing pipes, not metal pipes. Metal pipes can accidentally pick up stray return currents from your electrical system, causing the entire plumbing grid of the house to radiate a high magnetic field. Plastic pipes can't carry electricity, locking the fields out completely. Use all PVC to prevent any mGauss from reaching unhealthy levels. If an appliance (water heater) has a slight, normal grounding leak, the electrical current will take a shortcut and travel down metal plumbing lines

instead of staying inside your copper wiring. When electricity travels down a water pipe, it creates a massive, un-balanced loop. Because there is no return wire twisted next to it to cancel the signal out, the entire length of your metal plumbing pipes will radiate a continuous magnetic field (5 to 15 mGauss) straight through your floor and walls. EPA max limit is 2 mGauss. Using plastic pipes between the rain water tank and house is smart. If lightning strikes the tank, the plastic pipe will shatter, but it won't conduct the massive electrical current down the water line into your bathroom sinks where it can electrocute you or shower where you're standing. Drive an 8-foot copper grounding rod deep into the soil directly next to the metal rings of your catchment tank, tying them together with thick bare copper wire. This forces the lightning bolt to shoot straight into the ground rather than trying to follow the plumbing into your home. Because a solar array sits at the highest point of a roof, it is the most vulnerable target during lightning. To prevent frying, the aluminum racking holding our solar panels must be connected via an un-cut, thick #6 gauge bare copper wire that runs straight down the exterior side of our house into its own dedicated 8-ft grounding rod in the earth. This creates an easy, low-resistance path for the lightning to travel down outside your walls. Have solar contractor install a MidNite Solar Surge Protective Device (SPD) directly between the roof panels and low-frequency OutBack inverter. If a lightning strike hits the solar panels, the SPD instantly sacrifices itself, clamping the voltage down and dumping the massive surge into the ground rod before it can reach the internal breaker panel or fry your appliances. The OutBack inverter massive, thick copper internal transformers act as a heavy physical barrier, absorbing massive induction surges from nearby lightning strikes that would instantly melt a cheap, digital all-in-one inverter. To guarantee that a pipe break (lightning) can't drain the water tank, install a heavy-duty Flexible EPDM Rubber Connector Hose or a Brass Ball Valve Shut-Off directly at the tank's bottom exit nozzle before transitioning to the PVC pipe grid. If a lightning strike hits the line further down, the rubber hose or solid brass valve serves as a mechanical firewall. It absorbs the shock, keeps the main tank nozzle sealed, allows you to easily walk outside, turn a manual handle to lock the tank, replace the broken $10 piece of plastic PVC pipe in 10 min.

To support a 6 kW rooftop solar array, use the OutBack 4 kW Inverter/Charger GS4048A-01, 2700$. While it seems counterintuitive to use a 4 kW inverter for a 6 kW array, this is ideal off-grid engineering for dry warm climates. The solar panel rating (DC power) should always be oversized compared to your inverter rating (AC power). This is called the DC-to-AC ratio. A 6 kW:4 kW is an optimal 1.5 ratio. Solar panels will produce their peak 6,000 watts for only a brief window around noon. During the early morning and late afternoon, or when clouds pass over, a 4 kW inverter is much more sensitive. It forces the system to run at a higher efficiency, capturing weak ambient daylight and converting it into battery storage far better than an oversized, power-hungry 8 kW inverter could. RES Supply sells it at $2700. Others charge even 3500. For

faster safer installation, order OutBack FLEXpower ONE System (Model: FP1 FXR4048A-01) $5,700 which arrives completely pre-wired from the factory on a heavy-duty powder-coated aluminum backplate. 30% federal tax credit. It includes the 2.7K inverter, the clean low-frequency toroidal transformer, a FLEXmax 80-amp charge controller, bypass breakers, and factory-integrated surge protectors. Because it is pre-wired and sealed at the factory, electricians don't have to splice wires on-site: you eliminate local installation errors that leak electrical noise, guaranteeing you hit that safe 30 GS level. Unlike the 3KW inverter 120V only, the 4KW FPR-4048A-01 outputs both 120V and 240V power seamlessly. 240V is necessary to run heavy water catchment filtration pumps, high-efficiency tools, split-AC compressor without causing unbalanced neutral loops that spike the magnetic fields inside a tiny 400 sq ft studio.

Sadly, we have a government of "fruit fly IQ folks" who think only mold, lead, car smog are deadly, when EMF smog from dirty electricity or WiFi, cell towers, can be as bad. The immortalists will ban all bad inverters and require all solar companies to retroactively pay 500 trillion in fines and replace all inverters with safe ones, being thus bankrupt and acquired by Eternal Utility Inc, world's largest utility to free us from aristocratic subjugation. These inverters can shrink lifespan by 5-10 years, leading to grave national security threats via 1 trillion dollars in extra healthcare expenses and preventable chronic diseases. The solar companies know, but they do nothing about it. They chase profits and market share. Pigs worthy of lifetime labor in a lithium mine, doing same as a Holocaust in lifespan years. OutBack Radian 8kW Inverter/Charger (GS8048A) costs $6,000 including the required OutBack FLEXmax charge controllers, mating breaker panels, digital system controllers. That's heavy internal copper filtering, thick military-grade casing, and structural isolation from electrical noise. We also have the issue of cold water in the tankless lines that in the summer leads to explosive legionella bacteria growth, which can't happen in electric tank heaters set to be at 130-140°F; the temp in the tankless can reach optimal for bacteria growth in the summer and ruin the health of people, so I believe tank water heaters are safer. Before they create all car chargers and etc they could make sure they also minimize dirty electricity and upgrade city codes to prepare the cities for electric heaters, stoves, cars which means built in filters (not us having to buy them like today) in all new devices, appliances or houses by federal law, as with lead < 90 ppm in paints, etc. PubMed papers explain the issues with legionella and other bacteria are usually with electric tank heaters and tankless, not gas water heaters set to a healthy 125-140°F because people don't know for electric you need set temperature higher to prevent the bottom from getting cold. PubMed explains the cold water in a tank heater that is electric falls to the bottom and the heating element is not a plate on the bottom of the tank that is very hot in a gas heater, but just made of 2 elements, one lower and one upper, so bacteria can grow in the colder water on the bottom and lead to lung issues (not our 1st wish in COVID19 age).☺☺☺ So they need redesign electric tank heaters to

make the bottom with a heated plate to prevent tank bottom sediment bacteria from multiplying (tank heaters have less electric fire risk and blow fewer transformers: California requires in some counties all new water heaters to be electric by Jan 1st 2027, New York, Los Angeles, and Victoria Australia state in 2024, 50+ California cities since 2021 require new buildings to be all electric, no gas "stove, oven, dryer, heater").

UK requires all new homes to come with electric car charger; in 2021 already, 25 countries planned to ban oil cars in 2025-2040, Norway already got 70% of car sales EVs, 15% plugin hybrids. This is all great news, since smog kills billions of people early and gas poisons ground water systems, and I don't think tank water heaters generate dirty electricity, since oil heaters actually lower dirty electricity; as long as you get a higher quality heater it will be fine; however, tankless are a whole different story. However, if you raise temp of an electric tank heater, the bottom water can get warmer than a gas heater with a lower temp setting, but high temp increases corrosion and wear of all plumbing, so it's better to go with nonmetal Marathon Rheem tank electric heater, the last tank you'll ever buy – lasts 100 years – see the official page – the only tank that can't corrode, to prevent rust formation. Just recall to also set your heater to 160°F periodically for 1 hour to kill all microbes, and to flush it, since sediment can protect bacteria and help them multiply; for 6 people in a house and 500 TDS (total dissolved solids), we may need to fllush our tank electric or gas heater 12 times more often (full tank drain, so 80 PSI water can blast the bottom of the tank where sediment is) than a single person house with 250 TDS water (TDS is not always linear with sediment, but can be indicative of it). All tanks corrode, except Marathon, whether gas or electric, and they have anode rods to prevent corrosion of the tank (mostly) and pipes; in practice though almost nobody replaces anode rods every 1-2 years, unless they're some dedicated plumber and virtually nobody will flush water heater every 3 months as is the most ideal to do even in clean water systems (low sediment city water that most say 'flush every year'). Anodes need replacing every 2 years to keep corrosive chemicals from destroying pipes, heater or skin – and magnesium anodes present advantages over Marathon by removing harsh chemicals in water due to high reactivity, but it can also decrease the antibacterial action of chlorine on the pipes, shower heads. ☺☺☺

Anodes of Mg are usually 17$ each (Rheem at least, but when I got the Rheem original replacement part SP11309T anode rod, from rheem.parts.com, for my Made in Mexico water heater Rheem basic model, it said "*it may contain a maximum weighted average of up to 2500 ppm lead or 0.25% lead*", not sure if that's a joke, but it's scary to think these anodes add lead to hot shower water; so always use a shower *filter*, and never cook with warm water, if you're not sure if your anode rod or company has it, because some may have it too, even if no label exists; Bradford White replied by email and said their anode rod are lead free, so maybe get that one, since those cost just 100$ extra being made in USA; so in that case, perhaps, Marathon remains

the best among Rheem models – no anode and just copper and titanium elements. The issue is more complex, since Bradford White and many AO Smith do stir sediment, so these stir models will (in the name of extending water heater lifespan, at the expense of our lungs, eyes, nose, etc) bring more city pipe and nearby house water heater bacteria (stuck to sediment that goes to your eyelash base, getting into your eyes, as tiny drops always get in the shower, and gives eye infections), heavy metals into your shower water, and that sediment could have as much or more lead as it leaks from the Rheem anode rod that doesn't stir sediment, requiring home owner to flush water heater more often, leaving sediment in nature instead of your eyes; so, depending on what Rheem model you get and if the factory anodes are still having lead, you may be better off; however, only progressive less religious California, where I live, requires lead labeling, so if you're in another state, they won't state that, thanks to religion above science. The good news is that anodes often get covered in lime 100%, so they can't leach heavy metals into the water anymore; if water heaters are used a lot first year, the lime sediment will saturate the water in calcium carbonate and form a protective layer of thick carbonate in the weak points (welded areas), of the tank and enable it to resist corrosion as much as you replacing anode every 4 years; it all depends on what happens inside; sometimes, if anode was not replaced for 8 years, it's so full of white lime that removing it will chip off the ceramic that lines the tank and expose the steel, starting the rusting process, hence some water heaters last 20 years without anode change, while others last 8 with 2 anodes changed. So, anodes may be less of a worry, maybe get the LabTech water kit from home depot and do a test I did, which showed copper was 0.3 ppm, iron 0.2 ppm, chlorine 1.5 ppm, hardness 250, alkalinity 240, pH 7, nitrate-nitrite 0. ☺☺☺ They also explain on the instructions paper that iron bacteria are easy to test by placing water in a clear or white jar or jug and see if fluffy orange rust deposits on the bottom; if dust deposits, there are not iron bacteria, if fluffy stuff deposits, then there are bacterial if nothing deposits, the brown color of your water from the drain valve during flushing is simply mud from the city pipes and years of not flushing with the 80 PSI water hitting the empty tank bottom.

Like most people, *I didn't know you have to flush water heaters* until year 5, and to replace anode, so I haven't replaced anode yet on mine since I bought it in 2013, since now it's all white, covered in lime so no more lead can leach into water, if Rheem anodes indeed have high lead. I tried to replace a Rhem anode 4 times, but it was so hard, the lime makes it immovable, so I gave up. People who don't like replacing anode often will buy a $150 electric Corro Protec titanium (far less reactive than Al, Mg, Zn) powered anode (12V adapter, 0.015 A, so 0.18 watts) that kills many bacteria thru the electron release and removes in 24 hours water smells some bacteria cause when all flushes and anode replacements failed to remove the smell; this also prevents lime formation and is only replaced every 20-30 years (hence corro protec has 20 year warranty), but needs a plug, yet eliminates the need to always check or replace cheap Mg/Al

anodes for corrosion or lime buildup; *they also are much better at killing bacteria than metal rods without power.* However, there may be risks related to plumbing corrosion due to electrical charges or electrocution etc due to lightning strikes while taking showers or baths and water is running, so I'm skeptical about these, since everyone would use them by default if they were that much safer, better, etc, though Home Depot Canada sells it. Powered anodes don't protect your skin much from harsh chemicals that react with Mg, they simply protect the tank, so they have their own disadvantages. Mg reacts with many things and can prevent biofilms in copper piping better, so you need studies on 10,000 water heaters using Mg vs powered anodes to see which ones creates more biofilms, bacteria and which one is producing higher quality water short-term and long-term, after biofilm creation. It's not so easy, since companies always say theirs is the best tech and state only the pros, without the cons. The Mg anodes are more reactive than Zinc or aluminum, so they protect tank, water, skin etc more. ☺☺☺

Bradford White tanks are preferred by professional installers (besides, they're made in Michigan, like stated on every webpage on the bottom right, not outside like many Rheem/AO Smith, though initially most AO Smith/Rheem were made in the US), because they make replacing anode rods much easier (they have to do that on commercial and big condo units etc apartments more often) due to the Mg anode being attached to a 3 or 5 inch nipple made of a harder metal that sticks out (unlike Rheem or AO Smith brands), making it far easier to remove, since you just need a wrench (see youtube), the top of anode being above the tank as opposed to buried under its top as for most brands; with the other brands, you need to use a hex wrench and, due to top being soft Mg, it can ruin threads easily (especially on all Rheem models and all AO Smith models in stock at Lowes; plumbers confirmed Rheem is the hardest to get anode out of, due to lowest depth (2 mm) the hex socket (connected to your ratchet or impact wrench) can go below the anode top on average (same depth for most Lowes AO Smith unfortunately, so same headache), unlike the pricier AO Smith models not available at Lowes, which have a higher depth (10-30 mm below anode hex top, *making it impossible to slip or damage the threads, though Mg could break if lower part is more stuck than upper, so be prepared to replace tank if using Rheem or AO Smith, notorious for anode getting stuck forever*), but still very hard to get out vs Bradford) due to little space for the hex socket connected to the impact (see video) wrench causing the impact or normal hex wrench to slip and move up, damaging the threads, etc; normal hex sockets have a 2-3 mm concave area on each of the 6 sides, so this facilitates easy slip due to extremely low depth (2 mm) and also extremely thin anode top, 3-4 mm, insufficient to provide a good grab and power; the anode top would need be twice as thick, 6-8 mm; the depth where the hex socket can go below the anode top needs to be 5 mm at least; very poor design by Rheem and AO Smith; it's also hard because Mg is soft and Mg anode threads corrode fast so it gets very stuck, fused, melt to the tank threads, while Bradford anode

has nipple threads that are not soft, not Mg, so it comes out a lot easier, they don't melt/fuse/corrode like Mg, etc; so I would avoid any Lowes/Home Depot water heater and stick to Bradford from Ferguson.com or other stores or plumbers (plumbers prefer Bradford because it causes fewest issues, since those are built for more commercial stuff, apartments, having to be more reliable than a less used residential), to make anode swap easier and get hydrojet feature in all Bradford that prevents biofilms, feature not available on most Rheem at Home depot.☺☺

So, since replacing anode is ideal (to prevent bacteria film developing in rusty places caused by spent anode), and can be done using flexible Eastman from home Depot too, when space above the water heater is too small to use a one piece anode rod like the 51" 35$ OEM 224-47776-19, or 35$ here, or $60 on Bradford site (pricier), Bradford brand is better for DIY types or homeowners who do replace anodes (very few) - you can trim the old anode as you get it out with a saw and then bend it, if too long when coming out for the space you're in, then replace it with flexible Mg one (never use Al-Zn to replace Mg OEM, as those are protecting tank less, always use flexible Mg, not flexible Al-Zn). Penetrating soft oil can sometimes help get stuck anodes out, but truly melt, fused anodes will be hard to get out. If you buy electric heater made of metal (not the Marathon nonmetallic one from Rheem above *which may come with anode rod for bacteria zapping in future models*, since now it has no anode rod since there is nothing to corrode), *if you believe in powered anodes, you could* get the installer to replace the factory temporary Mg anode with an electric permanent one that never corrodes etc and never needs to be checked every 6-12 months (can check thru pressure valve hole with a bright small flashlight, no need take it out each time) and replaced; look thru the pressure relief valve hole, if you take that one out to clean it of lime, and check the anode, I did that for my Rheem tank. So, yes, *when some change their tank next time they may* go electric Marathon – see 3 minute video - (nothing to corrode in tank except the copper upper heating element and the titanium lower element, those got 6 year warranty, keeps water fully chlorinated to disinfect pipes while Mg anodes react with chlorine fast (though Mg reducing chlorine and tiny HCl levels may prevent biofilms coming from chlorine attacking copper piping, so Mg anode may offer superior anti bacteria protection to anode free Marathon); lifetime warranty on the plastic tank), *it has no anode rode to replace or take care of every year* (just heating element replaced every 10 years if needed, the upper one probably, since titanium lasts a lot longer iwth good flush habits), *it has lifetime warranty (not 6 years), it has much better efficiency than normal electric tanks so it will kill fewer people thru emissions from coal plants that produce dirty electricity, and set temp to 140°F, so that the bottom of the tank never gets below 130°F*, since bottom is where cold water settles and heat comes from 5 inches above, not the bottom; this way, the tank will last for 100 years in top shape as long as there is flushing done often to remove bacteria, not just 6-10 years and save society from wasting time to swap tanks to produce 10 tanks instead of one, recycle 9

tanks, etc. If you get metallic tanks, get also at install an *electric anode* (save tons of hours to replace and check 10 anodes over 10-20 years) *to protect pipes and kill as many bacteria as possible, and one* with sediment stir like Bradford White hydrojet, or AO Smith equivalent stirring the water thru cold pipe holes like Bradford White does or Rheem paddle types called 'self-cleaning' that agitate sediment and prevent it from falling to the bottom of the tank where bacteria multiply in electric water heaters since bottom is not heated yet in current models. ☺☺ Tank electric heaters without metal may offer unsurpassed protection of a plumbing system, since the rust doesn't travel to form biofilms with various bacteria thru the shower head filters. However, the Mg anode will make water less harsh for the skin, so it may be safer than Marathon, since biofilms can form because of a lot more reasons (harsh chemicals, that in non-Marathon heaters react with Mg and protect the pipes from forming biofilm) than rust alone; thus, a Bradford with Mg anode replaced often is better for immunocompromised people, who're afraid of cold water settling on the bottom of electric heaters that don't heat the bottom as gas ones do, that area can cause new bacteria buildup. Unfortunately, even heat pump water heaters don't heat the bottom well, even if better than typical electric heaters due to the condenser touching the bottom slightly, so the same cold water bacteria issue can exist, besides the huge noise of the fan; however, in 2030s, electric or heat pump heaters may upgrade design to overcome these issues. Today most California requires ultra low NOx gas water heaters.

WHO suggests 140°F for storage of water, to prevent the growth of many types of bacteria, but most people set it to 110-130°F, with 131-135 eliminating most risks, 140 almost all risk. Perhaps we need more safety studies (study birth defects in millions and see who had what tankless electric units, what furnace (variable speed), AC, electric car & charger make/model before we have every house overloaded with dirty electricity of 10-70 times higher than ever before, even if for only 30 minutes of showering on tankless electric units. When leaded gasoline came, all were for it, except a few Harvard professors, now we know it's bad. Will electrification of appliances, cars, transport, internet of things, 5G without filters of RF pollution, dirty electricity, etc be similar to leaded gasoline, a disaster? Perhaps only future decades will know, but there is a market for devices that claim to reduce 10-99% of the impacts of gadgets, such as the Q link devices (their research studies, if genuine, are convincing, if validated by 3rd parties without interest in selling products, see shopqlink.com...research) or earthcalm.com devices (some of their research is convincing if done properly). ☺☺☺

There are now 100s of companies making little things you attach to your cell phone, computer, appliance to diminish RF pollution effects, but whether they work (outside placebo) is hard to say, q-link and earthcalm seem to have been around since 1990s, so they're not newbie companies. However, since 1960s they published papers about power lines and things like that, so it's good to know about it, and avoid hanging out near electrical panels (some people may

sleep foot from a panel, not a good idea) and electrical infrastructure or cell towers when pregnant especially or trying to conceive. Not every company and book, out of the 20,000 on the topic is full of “hot air” and “nonsense”, there is some truth to these things, even if we can't know, like in 1800s people didn’t know lead in dental fillings is so bad, what is the effect of some “modern” (primitive in 200 years) techs. We lack 25 years of full time research, 3 PhDs (biophysics, electrical engineering, electronics) to get a real grasp of what goes on, the $ to do the vast research needed to figure out which devices work best, what is placebo, a sales pitch. While many think this is nonsense, at least they can see that any professional meter, like the ones I used for lightbulbs, can measure the magnetic fields and prove to skeptics that if you're near a lamp with a bad lightbulb and sit too close, it may be above EPA ideal level. So, it’s not all nonsense, even though, the websites by some of these naturopaths etc are unprofessional at times, this doesn’t mean that the hypotheses they present may not be proven to hard core skeptics as real in 100 years when full effects of dirty electricity are as clear as that of other pollutants today (lead). I'm no expert in RF engineering, but I know cell phones are bad when overused (but can't prove it to skeptics), due to headaches experienced and then the studies proved it to skeptics, see the RF chapter. Same thing with buildings: we enter them, we may feel something off, it may just be some dirty electricity. Obviously, we can’t be naive and imagine these cheap or placebo devices would always or ever be effective against professional devices used by governments and spy agencies, with billions of $ to develop laser and all kinds of weapons of the dirty electricity, RF type for brain influencing or fake miracles/coincidences or for torture, brainwashing, memory erasal, mind control, brain fog, sleep deprivation and other nefarious purposes. These cheap devices are usually made by small companies for the public (not for top secret agents), or sometimes individuals who build a placebo useless device that does nothing; they can't match the $ of governments. Who is behind these companies, if they really have those PhD credentials, etc and who uses them as a front for whatever research is not known, but we can't know the physics of year 3000.

With that being said, below is an example of me measuring *dirty* electricity, *RF pollution*, *magnetic* and *electric* fields from different gadgets, phone, *lightbulbs* so you get an idea: not all LEDs are the same. 800 lumens (*60W incandescent equivalent*) *EcoSmart (7.5 W) is better than* 800 lumens *Philips (8.5W) for desk lamps that are close by, because, magnetic field is 10 times lower at 1.5 inches, 10 (Eco) vs 100 (Philips) mGauss*, and the same (1 mGauss) only at 10 inches. At anything closer than 10 inches, *EcoSmart is better than Philips*, more so as you get closer and closer to your lamp, well, *it uses 7.5W, not 8.5W to deliver same lumens, so it saves money, wires and dirty electricity*. It's advised to never sit closer than 10 inches to any lightbulb however, as it may stress your eyes and make them dry or red, aside from magnetic pollution from *cheap lamps* or bulbs. Since 2015, a few LEDs were on sale, matching CFL prices. These LEDs

use less electricity than CFLs (CFLs use far less than halogen or incandescents) leading to savings of thousands of $ over time. CFLs have toxic mercury and when it breaks it is a real hazard; they cause *mercury* pollution, since people often trash them in the garbage. CFLs generate more EMF pollution. CFLs can emit mercury vapors (when broken, or even when intact due to manufacturing defects) which cause memory loss, Alzheimer, Parkinson, paralysis. *Don't use fluorescent or halogen bulbs,* as they emit more UV than LED/incandescents. *LEDs emit the least UV, much less than incandescents which produce a tiny bit of UVA.*☺☺☺

Below are the 4 TESTS for LED, Incadescent, CFL light bulbs (and RF/dirty electricity for some phone, smart meter and appliances) using a Trifield meter and Stetzerizer meter*:* in May 2015 I bought 26 LED Philips 2700K lightbulbs (and replaced all CFLs) for only $2.5 each from Home Depot, 800 lumens, 8.5W. Later I bought some EcoSmart LEDs. In 2015 I didn't know EcoSmart is better for lamps (all 26 were for ceiling and far away sources, so it did not matter, since at 10" Philips and EcoSmart are the same magnetic field 1 mGauss, even if same price almost today, Philips were on sale, in 2015 LEDs were expensive). All my lightbulbs are LEDs of 2700K, for reasons covered in the dry eyes and sleep sections. These incandescent look alikes resemble exactly (EcoSmart) or almost exactly (Philips) incandescent bulbs from the outside, but they're LEDs and use a lot less electricity, produce no UV (unlike CFLs who produce a lot of it ► youtube...Q), and far less dirty electricity than CFLs (many CFLs cost $2.5). I tested the LEDs above, a normal CFL by EcoSmart (CFLs by Philips, etc may be worse per youtube) and all CFL brands are far worse than clean, LEDs that are not using dimmer switches), a normal incandescent. Don't use a dimmer LED lamp/switch, as they ruin houses with dirty electricity; dimmable LEDs don't produce dirty electricity without the dimmer switch/lamp.☺☺☺

1. Dirty Electricity: *Incandescent* and many *LEDs* produce no extra GS units 1 GS = 24V/s rise in the plug. Dirty electricity is higher with Philips LED bulbs (Dutch design by Dutch company, not US design as EcoSmart, a US company: can't compare a 340 million nation with 17 million nation). On a regular circuit, Chinese Neporal full spectrum bulbs add 1000 times more V/s fluctuations to wreck our body than bulbs from Philips or other brands: +1500 GS units vs +1.5 GS for Philips 8.5 W 2700K regular or +25 GS for GE full spectrum (both the soft light regular shape and daylight flood lamp type full spectrum GE bulbs got 25). MegaLight 2700K LED +3 GS *if a Stetzer is on 2 sockets away and you start at 68 GS and* 0 GS *if you start really high at 200 GS + no Stetzer filter*, GE LEDs +1-2 if you start at low 68 GS with Stetzer on the same circuit but 2 sockets away, and -6 GS (lower by 6, minus) if you start at 200 GS, Sylvania 2 piece plastic bulb LEDs +12 when you start at 68 GS with a Stetzer filter 2 sockets away (however, if no Stetzer, so if you start at very toxic levels of 250 etc, the effect is negligible, it can even decrease 5 GS), Sylvania one piece milky glass bulb +120 GS if you start at a lotw of 68 GS, with Stetzer 2 sockets away, but no efect, 0 GS if you start at high values 200 GS and no Stetzer filter in the home. *Well,*

we only care about values when it is closer to the maximum ideal of 50, not when it is sky high. So, in those cases the best is Bluestar > Philips > GE > MegaLight >> Sylvania > CFL. Bright Green CFLs +150 GS (*this* 150 GS *increase happens in all cases, whether you start at 65 GS or 220 GS, or if you have a Stetzer filter 2 sockets away or not, indicating CFLs are a disaster, far worse than any LED almost*). The best LEDs are Bluestar ones, they actually lower the GS by about 10 when it is 500. Phillips makes the safest bulbs among more known brands. HP Envy laptop charger 100 GS without the Stetzer filter plugged in 2 sockets away (Same circuit) and 400-700 GS extra if Stetzer filter is on 2 sockets away, while charging. Without filter, most EVs charging cables 2000 GS, drops to 300 if filter is used. Oddly sometimes the filter decreases dirty electricity 85% on one socket, but raises it on nearby ones, so use it near you. Bad 3$ phone charging cables 1800 GS. ASUS monitor *40* GS, due to *that transformer probably, cheap trash,* avoid ASUS *and* HP. Light bulbs could be used to alter the physiological parameters, heart rate or many other things. EcoSmart *CFLs (bad vs LEDs)* I tested (due to finding some around) in 2015 produce a huge surge in dirty electricity of about *100 GS units* (ideal is no rise in GS units when turning on a lamp, or at worst 2-3 GS units). *Having headaches, low energy, cancer, health issues?* Could be the CFL lights at home, fluorescent lights at work or dirty appliances that mess up with your electrical fields in your house, even plumbing can cause sometimes unhealthy EMF fields and there are ways to measure and mitigate that. Thanks to the immortalist party, we can have every device that plugs in rate the GS units, via the Eternal Utility Inc commitment to product safety and Immortality *for* All, verified by the Nurturing branch of the US government, Immortality *Nurturing* Agency. ☺☺

2. Magnetic Field: *Incandescent had background* levels at any distance. *Philips LED* produces 1.2 mGauss at 10 inches (10”), 3-6 mGauss at 5”, 20-40 mGauss at 2”, 50-100 mGauss at 1.5” (depending on how you orient the meter). *EcoSmart LED* produces only 10 mGauss at 1.5 inch, 1.2 mGauss at 5”, 2 mGauss at 2” and 10 mGauss at 2” from the base of the bulb, not the bulb itself, i.e. closer to the bulb). *Always use the same lamp or fixture to compare CFLs and different LEDs since each fixture and lamp generates its own magnetic stuff independent of the bulb contribution, so follow the same rotations around the lightbulb to find the maximum and average mGauss for all those tested for consistency. The meter near the bulb leads in all cases to much higher max reading, but most people never get that close to the part closest to the screwed in part of the LED (I am talking about incandescent like LEDs known to have the lowest pollution, not dimmer switches or lamps which are bad). EcoSmart CFLs* produce 1.3 mGauss at 10 inches (10”), 3-6 mGauss at 5 inches, 20- mGauss at 2 inches, 50-100 at 1 inch. *Conclusion*: Philips dirty LEDs, CFLs (of all types, per youtube tests of dozens of others) produce roughly the same magnetic fields (EPA safe level < 2 mGauss). *EcoSmart* cleaner LEDs are way better than EcoSmart *CFLs*, producing way lower magnetic fields.

3. RF (Radio Frequency Field) ► *Incandescent* and *LEDs* produce no RF at any distance, so a lot of

youtube videos testing other brands must have gotten really bad LEDs from 2000-2015. *CFLs* emit 0.2 mW/cm^2 at 0.5", but negligible (background) at 1". One more reason to avoid CFLs. ☺☺

A phone cellular modem emits about 90-1300 mW/m^2 at half inch on a routine basis even when GPS, Bluetooth, WiFi are off, location off. To turn that off, airplane mode is needed.The smart meter on my house emits far less RF than many smart meters and far, far less than a phone (surprised to see that), the pulse to the substation occurs far less often than the cell signal to the cell tower, about about 100 times less often. *When such a signal is made by the smart meter, I got about 15 times lower RF signal. So contrary to what some say, some smart meters are not that bad as far as RF*. Some studies claim some smart meters cause 100+ times more cumulative whole body EMF exposure than cell phones. Some pay to get the "smart" meter replaced with an analogue meter or ask the utility company to remove the meter or to make safe "smart" meters, others shield the meter. Many estimate that 15% of all childhood cancers are caused by residential power lines, so stay away from electric panels, transmission lines. But there is a very strong magnetic field around a smart meter, so never put it near a bedroom, always near garage or somewhere 4 feet from a living space, since many people who slept near their electrical panel got brain cancer. The WiFi router emits a VERY STRONG RF FIELD going off scale all the time, every second, so WiFi routers are a really bad idea, emit far more RF than cell phones, so stay 3 feet away from any router. *When I turned off WiFi at http://192.168.0.1/ I got no RF pollution almost.* So, if you got wired internet, you can go in your browser to 192.168.0.1, login with your username/password (change password to make network secure, don't leave the factory default) and turn off WiFi. I strongly suggest you turn off WiFi since it was shown to affect people's brain function, unless you rent rooms and they want WiFi. The WiFi router was more than 100 times stronger than the smart meter. Try turn off WiFi routers in the house and all public buildings and use wired connections and avoid public WiFi if you want to avoid frying your brain, but if it's on, stay 3 feet from it at all times, or maybe even 4. WiFi is WHY FRY your brain. If you're a teacher, feel free to be against WiFi, ask for wired connections, the students' health and performance will be better, and you will be seen as a more competent teacher. LiFi is much safer.

4. Electric Field: *CFLs* 30 V/m at 12", 1000 V/m at 10", *off scale* at 8". *LED* nothing at 12" or even 5", at 1" about 5-20 V/m, which is very little, since harmful effects start at about 500 V/m. *Incandescent* had background levels at any distance. *Conclusion*: AVOID CFLs, they emit an electric field far too strong at 10". That's why off-scale on dirty meters (#1). Workplace and store fluorescent tube balasts bring dirty EMF, causing headaches perhaps in some.☺☺☺ The only advantage of the incandescent is that it has no magnetic fields, but you have to be really close to a Philips LED to get that mGauss, 5" away for 6 hours a day for a year or more. For an EcoSmart LED, you have to be so close, 1" for hours daily for any detrimental effects, which is impossible. Nobody is that close to an LED or any type of bulb usually, even if you use a desk lamp. You

often get more magnetic field from a monitor anyway. Please don't sit closer than a foot from a monitor as the magnetic field is getting to 1-2 mGauss. My monitor emits 1.5 mGauss at 6", but background at 12". It's good to be 2-3 feet from a desktop monitor ideally. Some electrical appliances can emit very strong magnetic fields when they're turned off, but plugged in, if you're within 5" of them. However, with small CFLs, they produce dirty electricity that contaminate your whole house and *the fluorescent long tubes are a complete disaster, their magnetic fields at 2-3 feet at 3 mGauss, which is too high and they produce even more dirty electricity.* So, never use fluorescent tubes at home. At work, be 3-4 feet away from them. I started using LEDs in the kitchen, since the fluorescent tubes are bad. Given that LED offer far cheaper electricity costs, lower dirty electricity that we can't detect yet fully, since they use 5-15 times more electricity, last 5-20 times longer, there is no reason to use incandescents anymore, since they cost the same now *(basic EcoSmart LEDs which emits 10 times less dirty electricity than fancy useless dimmable LEDs connected to a dimmer switch/lamp (not a normal switch or lamp) that often cost 3-10 times more).* The screw in, incandescent like shaped EcoSmart LED is so much superior to many polluting LEDs. They're even better than Philips somewhat clean (except for magnetic field within 5") LEDs. EcoSmart for LEDs; other researchers createhealthyhomes.com do too.

7 advantages of LEDs versus CFLs are: **1. LEDs can use 50-70% of the energy of a CFL to produce same lumens. 2. LED lasts up to 10 times longer than a CFL. A high rate of on-off cycling drastically shortens the life span of a CFL. An LED on the other hand is unaffected by on/off cycling (that's why LED devices are preferred for traffic lights). 3. LED lighting generates less heat than a CFL. 4. LEDs don't contain mercury or heavy metals that can leak, or need to be disposed in very special ways to avoid contamination of landfills, etc. 5. CFL lamps take long to achieve full brightness. An LED bulb on the other hand achieves full brightness at the flick of a button. 6. UV light attracts insects. With virtually no UV emissions, LEDs don't attract bugs, insects. UV from CFLs causes eye damage, skin cancer. In 2020 I did some tests on appliances and found out house heaters (oil type) and electric stoves (coil type) diminish dirty electricity detected by Stetzer meters by 10-20%, while desktops, laptops increase it. AC condensers, lamps have no effect, but the furnace motor of the fan does increase a tiny bit. These things have been noticed by many who measured dirty electricity from appliances. Washing machines pollute even while idle and plugged in. Fridges are quiet 95% of the time, but when they make noise, they emit quite a bit of dirt. A lot of fancy options for devices, like dimmer lamps/switches, variable speed motors for furnaces, etc increase the dirty electricity 500% versus the "normal version", so feel free to test your appliances in store if possible or after purchase, so you can return them if they're a disaster for your house. Even the solar inverters (DC to AC) can cause EMF if they're designed badly, mine is fine, Stetzer meter saw no change after solar panel install. Nissan Leaf charging (Nissan 120V charger) causes a spike in dirty electricity, 2000+ GSI.**

GLOBAL MITIGATION OF EMF: AC causes interference with our bodies, if we all go off-grid, use DC (like Thomas Edison proposed) or batteries, it is hypothesized to be much healthier than Tesla's AC. AC won over DC in the fight of currents because it was much cheaper to transmit power over long distances, but with many microgrids☺☺☺, the birth of democratic decentralized power via solar panels, AC doesn't even make sense anymore, so over time Edison tech may be resurrected, after the science gets obvious that runaway Global EMF "Climate Change" by huge increases in EMF pollution can be almost as catastrophic to humanity as Climate Change caused by CO_2 and CH_4 (methane). Our appliances need to be switched to DC for minimal problems. DC from solar panels and batteries are known to produce negligible EMF. Individual mitigation: switching off devices doesn't eliminate AC electric fields. EMFs are still present in any plugged in device, even if it's switched off. Using batteries is better as it's DC.

CHAPTER 13 – *Immortality* & PEACE (no fake war, no violence/killing)

13.1. World Peace is imminent when enough folks think it is, so let's have happy thoughts ☺☺☺

13.2. Becoming the 1st planetary Civilization of Immortals via Compassion via Gentleness ☺☺☺

13.3. Diplomats who bring World Peace 13.4. Why World Peace in 3 months is possible ☺☺☺

13.5. World Peace is easier thru conscious breathing, meditation, focused planning/intent ☺☺☺

13.6. Why violence won't bring Eternal World Peace; Immortality Peace Alliance/Treaty ☺☺☺

13.7. Valuing the art of peace, altruism, gentle soft trust, kind honesty, not of deception ☺☺☺

13.8. Speech and Telepathy hypothetical patterns in a peaceful civilization of Immortals ☺☺☺

13.9. Quantum noise from various material objects that delay the arrival of World Peace ☺☺☺

13.10. Which planets get what telepathy? 13.11. Do bad thoughts ruin civilizations? ☺☺☺

13.12. A quadrillion ways to World Peace without any violence, threat, intimidation, lies ☺☺☺

13.13. Does God support or tolerate war? 13.14. The cons of violence & violent Judaism ☺☺☺

13.15. The downsides of lies 13.16. Stick versus carrot methods 13.17. Why violence and war, threats, rushing, stress and forcefulness are a waste of energy and a slowing of progress ☺☺☺

13.18. Science increased letter sending speed & lifespan shortening speed a million times in 200 years. Why not increase lifespan lengthening capacity a million times too by a new ethos? ☺☺☺

13.19. Infinity and Immortality ► Infinity (inner and outer space, infinite land, infinite food) and Immortality, concepts easier to understand today, unknown to chimpy early men killing men for land (*they thought of as limited, not realizing via telescopes there is infinite land*) and food (*they thought of as limited, not realizing via science that there is infinite food, since planets can be terraformed and with chemistry all garbage/feces can become food*), allow infinite space for development for All without having to kill, torture, enslave, destroy others; to reach Huge lifespans there is no need to subvert anyone; attacking, enslaving, destroying, torturing only delays huge lifespans by trillions of years.☺☺☺ We can evolve beyond tiger/chimp logic (short-term addictive impulsive OCD desire to acquire food/land/etc that SEEMS FINITE by any violent covert/overt means) to become Angelic Immortals who only use positive methods to build Permanent Peace and expand it to more areas? War $ for longevity instead? ☺☺☺

13.20.1. Immortality Symbols 13.20.2. All Earth uses only 1 language 13.20.3. Special Tones 13.20.4. Easier Grammar/Pronunciation Phonetic English 13.20.5. Merger of 20 East EU nations

13.1 World Peace is imminent if enough people think it is imminent

The peace within arising from being gentle with self, leads to the World Peace without, being gentle with others. But how can peace arise when people don't relax with eyes closed even 5 minutes after the 3 main meals, to rest their brain and eyes from being glued to PC/phone? The Content of Speech chapter explains the advantages of healing inspiring words in defusing conflict, of positive words as in the sentence "Immortal Souls, perhaps older then this physical universe, let us recall God or the *universes* unseen have infinite knowledge and intelligence, or trillions of ways to bring permanent peace on Earth using only positive *gentle tender soft* sweet soothing honest methods that heal, uplift, transform, ennoble, bring wellbeing, bliss, compassion". This sentence sounds amazing when compared to "dude, there are trillions of ways to bring permanent peace without any war, torture, threat, intimidation, lies". However, some readers may not fully understand the elegant longer sentence, so sometimes we use shorter sentences that bring negative words out to make sure the other understands exactly what we mean. Since I want to make this chapter more uplifting, I will explain in this first paragraph that whenever I write "only positive or wellbeing inducing or *gentle tender soft* healing methods" I mean no "war, threat, intimidation, lies, torture, sarcasm, harassment", so that I don't repeat these negative words too often (because it can subtly inadvertently bring the energies/emotions associated with them in our brains to the surface, as explained in the paragraph before the Anthem of the Civilization of Immortals, which could emerge in America). Since 1982, September 21 is the International Day of Peace or World Peace Day un.org...day, inaugurated at the UN NYC with the ringing of the peace bell donated by Japan in 1952. World Peace is possible/imminent thru "acting as if it already happened", focused intent (thoughts create reality, what we accept as possible/imminent is more likely to become real), focused action backed "World Peace in 3 months" expectations/planning, 20 telepathy habits, Immortalist Anthem values. As we visualize/feel in joy that "World Peace is Imminent", World Peace becomes true. On 9-21-2005, the UN Secretary-General called for *all nations* to abide by a 22-hr ceasefire. Imagine if next year, *all nations* agree to a permanent ceasefire, 0 war, 0 human-human war exercises, with a removal of all violence from TV-radio, literature, movies, songs. ☺

Imagine if we all entertained this thought daily:

World Peace IS IMMINENT

The Eternal Grace of every Immortal Soul coming to learn/teach on Earth descends on all. ☺☺☺ The Grace Light in every soul is the formless divine spark, all are children of God, if all have a soul created by God; thus, it is logical for people to be kind, sweet, gentle, and World Peace to arrive really fast. One would not bomb or kill God or God's children and all world leaders would immediately agree to an immediate cessation of all hostilities just like we have climate

agreements. It may be that every soul who lives on Earth shimmers with the brilliance of 1,000 Galaxies of the universal grids, since every soul is a spark of God (or All That Is if atheist). These poetic lines are just a way to entertain a unique perception, since World Peace is only just a shift in perception ultimately, World Peace is enabled when we perceive World Peace IS imminent & possible here and now, or about to arrive. Perception-expectation manifests reality. Everyone knows it, but we all forget to pay attention to this simplest truth of life.☺☺☺ Thoughts create reality, a great way to start the day in *all nations*, (thru global agreement to do so like Climate Talks, agree on a Positive Shift in Media/Content Globally to see what happens) in all schools, worship places, TV programs, News releases, Movies, Books, etc, companies status meetings, etc is to Talk, Write About, Celebrate, Visualize, Thank, Repeat (at the start of the movie, book, song, etc) and Feel the Joy of the Ever Radiant Beautiful Reality that

World Peace IS IMMINENT

THUS CREATING THAT REALITY OF World Peace.

To serve God (or humanity if you're atheist) can include starting the day with the Thought "World Peace IS IMMINENT" and then Feeling it, acting it, repeating the 4 words 500 times a day even. Everything physical is shaped by thought, absolutely EVERYTHING in our CIVILIZATION.☺☺☺ To Smile is to Feel, Thank, Acknowledge the Arrival of World Peace, IN JOYOUS EXPECTATION OF THE COSMIC MIRACLE, It's to Live in the Best Timeline ahead of the Timeline so to speak. Imagine what a Paradise World of Peace and nonkilling would emerge if all people (of all faiths or atheists) wished, intended or prayed more often something along the lines:

"Gentle Tender *Soft* Healing *Nurturing* Eternally Infinitely Forgiving Boundlessly Compassionate Limitlessly Merciful Sweet Grace of Peace, Bless all Human Beings with the Remembrance of their Immortal Lightbeing shimmering nature aiding them to birth the World of Immortality and Peace. Sweetly and gently remove thru Thy Infinite Intelligence and Grace the desire to Publish Violence-killing calls filled scriptures (unedited), to create violence (this includes speech tones lacking *gentle tender softness*, scary faces, threats, intimidation) filled movies and songs, the desire to kill and harm other human beings, to revenge, punish, be mean. Kindly descend in every cell of our bodies and transform the violence filled movies, songs, literature, scriptures, into that which is truly Reflecting of Thy Infinite Tender Sweetness and Infinitely Forgiving Nature, filling all with the HOLY DESIRE Typical of Infinite Forgiveness-Healing-Tender-Gentle-Grace that God is, the Holy Desire TO ONLY HEAL, TO ONLY SWEETEN, TO ONLY BLESS, TO ONLY FORGIVE, TO ONLY UPLIFT, TO ONLY NURTURE EVERY HUMAN BEING so a true Culture can emerge as part of a Civilization of Immortals with really advanced science and technology."

In every human soul, at least according to believers in God or in the interconnectedness of the

universe, is a spark, infinitely small indeed, of the Most Ancient Immortal Energy that has always existed and will always exist, which some people call God, the Immortal Lord of Ascending Immortality, The Self-Effulgent Transcendent Radiance of a Quadrillion *universes*, the Most Tender Gentlest Softest Loving Grace in existence, the Wisest Being in all *universes*, the Consciousness of All That Exists, etc. With this in mind, if in every human being is a spark of this dazzling being able to dematerialize our universe in a second, perhaps it would be easier to conceptualize a world where nobody wants to harm or kill other human beings, since we would not do that to God, not because we don't want to only, but also because it would be futile since God can't be killed. So, perhaps, if there is a gradual global agreement to diminish violence in speech, words, movies, etc and to focus on the Immortal Soul in all humans, agreement that *all nations* implement at the same time, to prevent some from saying they're put at a disadvantage; it will be a lot easier to move later on to a world of eternal peace among humans, where the only thing armies do is train against possible alien attack or asteroids. The thing is if God is in every incoming soul, every new baby comes with fresh insight from Heaven on how to bring World Peace, ☺, and you can see they smile 400 times daily, as opposed to 20 times daily for adults. Every kid is like a spark of the Immortal Lord of World Peace, of the Immortal Lord of the Heavenly Earth. If you think about this, like they often say every person is God in disguise, it becomes very difficult to be mean, or even sarcastic with the iridescent brilliance of 10 trillion *universes* totally hidden in another human, let alone to bomb them, you would want to give everyone gentle soothing music, healing so they join the world of Immortality and Peace. But literally, every human being is like a Trillion Year Immortal Lord of World Peace in disguise. ☺☺

When we think of God, of God's Infinite Eternal nature, we can't help but get a little amazed at how much older God is than a 1 trillion-year-old Immortal who was maybe assigned to create a few baby *universes*, such as ours. Conceptually, trying to understand God's Infinity is harder than imagining the wisdom and knowledge, the *gentle tender softness* of a being who is 1 billion or trillion years old. So, in seeing that God's Infinite Grace can bring peace thru gentleness (gentlest = strongest) and peacefulness, we're relieved of the fear that paralyzes us at times and can more effectively make free will choices in freedom from fear, with the knowledge that the most tender and smartest Immortals and God are on the side of those filling the world with the energy of Immortal *nurturing* universal loving kindness. God's limitless grace is capable of turning enemies into friends and bringing World Peace. ☺ Also, the most amazing thing seems to be that we have the knowledge of a 1-minute old baby compared to a 1 billion-year-old Immortal, so anything I say is by default based on ultra limited knowledge of a 1-minute old baby so to speak. I never take my beliefs too seriously, but I'm optimistic peace is possible soon, even if many call me a naive guy. Since we're all quantumly entangled via subtle soul to soul telepathy, perhaps, the more we think of peace, the more peace manifests. Since on the

timescale of Telepathic Immortals "imminent" can mean in the next 500 years, to believe, sing, say, think World Peace IS IMMINENT" is to say a truth and to help the conscious mind to believe it and bring it into reality faster. This can also help us to time travel to that beatific shimmering Paradise of World Peace, where every backyard is filled with the most mind-blowing collection of thousands of multicolored flowers, and trees with the most enchanting smells and music (plants that sing and shimmer with rainbow colors). This future world is one of total grace *gentle tender softness* where the Telepathic-Empathic nature of humanity prevails, enabling a world of sweet *nurturing* grace where everyone treats everyone as a mom treats her 1 minute old baby, tenderly and with unconditional love. Filled with the joy of having overcome natural disasters, wars, diseases, we can live much longer and on our way to a world of Ascending Immortality, living more centuries each generation until we discover translation into other *universes*. ☺☺☺

The Imminent nature of World Peace can be felt by everyone who tunes into the infinite possibilities. For example the last 50 years humanity has experienced a huge amount of "first time when this and that happened", such as: first time when we were able to see on a computer screen, in 10 windows, live feeds of what happens in 10 countries, to see how others are in conflict, and how we all are humans with similar aspirations for peace and a world free from the fear of being killed in wars or some violence; the first time in history we can use skype, facetime or video chat to talk with friends or strangers who're 7,000 miles away; first time in history we know the human genome or most of it anyway; first time in history when we helped make worms live 10 times longer (see Chapter 3), when we grew the legs of an animal (frogs) that can't naturally regrow them as salamanders can as shown in Chapter 3, when we have cured so many diseases, etc. As the internet helps us become one global village, it's more and more clear that another first can happen soon, and that being World Peace. Before, we had no way to know when war was in one side of the planet, there were no news networks. Humanity is becoming far more fluid in its intelligence every day, so World Peace will be easier to achieve. ☺☺☺ The nature of God (The Immortal Lord of Ascending Immortality who is infinite intelligence) and Telepathic Immortals by definition is infinitely fluid intelligence that knows 700 trillion quadrillion infinities of ways to World Peace without any threats, lies, war, intimidation, violence, killing. God or Immortals are not narrow minded cult members who think the “only way to move from city A to city B is by horses or the only way to peace is thru military force or deception or torture”, as humans often do due to lacking the knowledge someone octillion times older has. Exactly as with longevity, human simulations at molecular level might give us clues into living 3-20 times longer, simulations of world events on a macroscale and people could give us ideas about the most healing, gentlest, softest, most tender nonviolent nonthreatening nonintimidating ways to bring World Peace. Since God is Infinite intelligence, God is Infinite Grace, Tact, Subtlety, Gentleness Softness Tenderness Kindness in doing one of the 10^{30} ways to

World Peace/9,000 year lifespan. Here is the power of shared confirmation bias, when the majority believes the same (like in groupthink), and they fight the minority who tries to escape the group belief system (historical inertia belief system). Since our media is by default full of violence and war, it's an automatic confirmation bias reinforcer (peaceful methods don't work) to program everybody almost that World Peace is "not" possible via peaceful healing methods employing honesty, trust and compassionate gentle tender grace. Sometimes imagination is more important than knowledge. History is the human past knowledge of how to solve issues, so in short, history is knowledge. But imagination allows us to transcend history/knowledge and create/discover the new "knowledge", that which has never been, outside the bounds of the "self-created historical matrix". Many people have been deceived by whatever force of history to believe, with arduous devotion and loyalty, that war is the way to bring World Peace, justified murder in war that is packaged into a rosy beautiful thing easier to sell, but still murder. It's like people used to believe there is no protein in plants or lead is good in dental fillings etc. It's a little bit like a collective misperception. It's obvious that if bad aliens exist, they want a civil war on earth, short lives and low IQ. They don't want the vision of the Civilization of Immortals to come true, since they imagine everyone is like them, so they imagine everyone will "kill them" if they become more advanced than them; to prevent that, they try destroy others, just like humans tried to destroy other humans for eons in their bid to "become the best". They don't want 9,000 year old Immortals on earth to expand in space and threaten their empire if any nearby. What we earthlings are not realizing is that World Peace would speed up planetary defense capability in the event of an alien attack. A country in civil war or planet in a covert or overt civil war is much easier to enslave. Humans have the tendency to easily believe in war as a good solution to issues. But if you think about Infinite intelligence of God, the opposite may be true: God is Infinite Fluid intelligence that gives us 9 trillion quadrillion peaceful ways to achieve World Peace. We could even speculate that civilizations fall due to a rigid way of thinking (no fluid intelligence), a fossilization of world perception and incapacity to adapt to the new threats, to see them, and then they collapse, as original thinking is frowned upon. Many believe "war is at least sometimes a good way to peace" when in reality, the science of the future might prove the exact opposite, just as science showed the earth is not the center of the universe. ☺☺

Galileo Galilei proved millions of learned people wrong, the leaders and kings of the time who banned his writings for 200 years. In the future (or far future), when physics makes quantum noise from killings more quantifiable, it may be proven by another Galileo that war never ever brings permanent peace, it only temporarily brings an end to fighting if done well. Right now, our science is too primitive to measure the quantum effects of war on future generations living in the war zone (energetic impressions that get infused into the people which then diffuse them into mass consciousness) and diffusing the telepathy globally by random or "nearest circle of

friends propagation" entanglement. Perhaps, this future genius will prove that gentlest tender softest sweetest kindness is one of the 9 trillion quadrillion ways to bring peace without killing, as an Intelligent God would definitely be able to come up with and prayerful people who listen to God too (instead of telling him what to do) would brainstorm, think, in every school, town, family on ways to bring peace without killing. Chapter 2 explains God's ideas are infinitely more complex than any 500 or 500 trillion page book would be able to describe. People have always driven chariots and when cars or airplanes came they were surprised they didn't think about it before, etc, but the same thing will occur with peaceful methods, people will be surprised they didn't think about it before. Governments invest in painful or harmful methods science, like Big Oil in oil cars, but as more $ is in EVs or nonviolent methods science, World Peace comes true. ☺ ☺☺ If 1,000 nice gentle soft healers pray for an angry guy and send healing, he will heal a little or more, as shown in studies; healing requests in the news could stimulate people's exercising healing vibrations radiation instead of bad thoughts, emotions radiations news often trigger.

13.2. The Value of Compassion in an Immortal Civilization

How a Nation can become the Most Compassionate, Subtlest, Gentlest, Softest, Kindest and most World Peace Bringing in the world... and the first Civilization of Immortals.

Compassion for others means understanding others have egos and a need to always be the first and think "we did it, we saved the world". Aware of this truth and honoring others' need to feel important or "the most important", the wise person, the wise compassionate nation emulates the way of the gentle humble tender soft Tao, as Tao Te Ching explains, and becomes the Leader from Behind that teaches by silent living tender gentle soft kind peaceful example, instead of by words. The best leader is unknown to those whom he leads, as Lao Tze explains, so there is no need for The Most World Peace Bringing Nation to ever tell any nation "We lead the world" or "we are the leaders", the wise leader is ultra humble, unassuming and leads from behind while other nations say "we did it all by ourselves, we did achieve World Peace by ourselves, we're the leaders, etc". This is the way of the compassionate humble sage, who is lying low, leading from behind, needing no praise and pumping his chest that "We are world's greatest country, the world teacher, let's be proud". After the pride comes the fall? Other nations might know who the greatest country is by tourism, youtube videos of towns, looking online statistics of crime/longevity, the tone/content of movies/news and even if they don't know who the real Leader is, who the most Compassionate Nation is, who the main World Peace Bringer is, it doesn't matter if they know or not, the goal is to bring World Peace not to get recognition as the World Peace Bringer. Subtlety, gentleness, tenderness, nonviolence, nonkilling, humility, softness, grace and intelligence can increase these days in Earth politics. Compassion (with its sister qualities of tenderness gentleness softness kindness forgiveness mercy) is arguably one of

the most potent forces in transforming a nation into the most Effective World Peace Bringer (known or unknown) and into a Civilization of Immortals. One of the ways this compassion can express is thru its treatment of animals, people and the environment. The many reasons I and millions of others are *vegan* or have been for many years are presented in Chapter 11.4. As technology advances, we won't eat plants or animals, but an eterni diet.

A Compassionate Nation also cares about the carcinogenic smog that cars, trucks, ships, airplanes emit in the air, the carcinogenic smog from coal-fired plants (they generate most mercury and arsenic humans put in the air) that sickens all inhabitants. This means that a kind nation will move to 100% renewable energy and all-electric transportation immediately. A Compassionate Nation remembers the wise saying of Tao Te Ching (The Way of the Sage, or the Virtuous Way), which says that "Heaven arms with Compassion those it would not see destroyed". The most powerful ally in building a Civilization of Immortals☺☺☺ can be said to be compassion and its many relatives (mercy, forgiveness, altruism). It's compassion for others that leads to frugality and placing humanity above temporary goals of "a bigger car, bigger house, bigger yacht". By doing this, the moral strength of a nation prevents its decline. By forgetting true compassion all the empires of yore or big countries shrank quickly. Compassion is not the stuff we see in a lot of music and movies today. To have compassion for fellow humans is not to encourage a high crime rate and low IQ by such media content. People are impressionable at all ages, especially before 25. Whatever they see, they tend to emulate.

Compassion also means abstaining from the temptation to destroy/harm others who can be easily destroyed. This is very difficult, but it's worth trying more and more each year to shift towards a more compassionate (for all humanity, not just one person, doing what leads to the best outcome for the largest amount of people) transformative take, even when it may seem to the ego like a disadvantage to do so initially. Wars are very costly and turn public opinion of invaded or attacked countries against a war starting nation, so it makes sense to try the ultimate thing, the unified field potential, stronger than the 4 forces of physics, to bring about sweet change for the better without any human injured or dead. When the compassion is super-strong in a nation, that nation can protect itself via the transforming grace of gentleness-awareness and positive healing methods (good spirits help trust to build, healing to take place between former foes; astral travel with spirits and telepathy from noble spirits, or simply tuning into infinite knowledge if one doesn't believe in spirits, also aid these goals), without any conflict or negative methods. Most theists and atheists accept the 3rd law of classical mechanics, as you sow you reap, action force = reaction force. Since this universe can perhaps be called a dimensional school for the soul, where absolute proof of the soul may be hard to come by thru design, it's irrelevant whether one believes or not in the existence of spirits and their ability to astral travel or telepathize with us. Leaving aside what may happen spiritually as a result of war (haunting by

the spirits released from bodies during a war, spirits who can reverse any victory over a period of 5-200 years, as explained below, not necessarily because they want to undermine the "empire" who tortured them, since some would be evolved, not care about stuff in this virtual classroom dimension, and go to such heavenly spheres that the thought of "revenge" or getting even would be out of their soul mind, but they would help the noblest first, help more the more loving civilization which brings the empire down as good spirits cease helping the empire), when a country is the first to use the sword, it may set itself up by physics law to being victim of the sword in some future, 5-700 years from now. "Those who raise their sword first, die by the sword" may mean that the only just war is one where we defend and there is no alternative method to prevent the war, after we tried really hard to change speech tone, culture, agreements, etc globally and many other peaceful positive methods. Leaders are human like the rest, losing patience and moving in a direction that is less peaceful. To err is human, nobody is perfect. Thomas Edison tried many times before he got it, so it may be with World Peace, it won't work first, but by enshrining such ideals in daily plans, movies, songs, literature, constitutions, political platforms, we're more likely to reach World Peace as a planet.☺☺☺

Compassion is that quality that allows the most powerful nation (possibly say 900 times more powerful militarily), to send its delegates and explain the suffering of war to others, the tragedy of war or even of 1 killing, with pictures, videos of past wars and a true empathy that the coldest hardest heart of the worst dictator could relate to, lowering themselves to almost beg the other country to move into a peaceful direction and build mutual trust, so no human being dies, trying to find the common ground that averts war, even when it would take that big country 1-2 days to change the government in that country by force. By not following the impulsive wish to overthrow the government by covert or overt action, and instead working to bring a common desire for World Peace and peaceful transition to a better future, a new alliance can be established and war avoided, with more assistance given by the beings in charge of the universe to the peace cultivating nation who just avoided using overwhelming force covertly or overtly. History suggests that by choosing the (sometimes longer-taking and seemingly harder) path of transforming the fear-paranoia inside others into Immortal universal loving kindness for all beings, the Peacebuilding Nation is possibly earning assistance from the most evolved Civilizations of Immortals of the trillions of heavens and physical *universes* that may be out there, an assistance unseen, but present and able to help The World Peace Bringing Nation to become a Civilization of Immortals and find new ways to build *Permanent Peace and expand it to more areas* in a positive loop that gives The World Peace Bringing Nation more money, time for science, afterlife research, ESP, healthcare and World Peace. At our present level of evolution (Alfred Russel Wallace published the theory of biological evolution at the same time with Charles Darwin; he believed we have a soul that evolves independently of biological evolution)

the proof for afterlife may not be as essential, if life on Earth is also a test of one's behavior in the absence of knowledge of an afterlife, how would one behave if one thought life ends at death, which is more indicative of how one would behave in an afterlife world too. Therefore, it doesn't seem critical to convince others that afterlife exists or afterlife is one way, since if they don't conclude it exists this may be part of their way of learning what they came to learn in this dimension. But discussing the possibility of afterlife and the benefits of World Peace even in the absence of an afterlife, depending on whom we talk to, makes sense. ☺☺☺

As a result of the Peace Building Nation avoiding using war, the people of that small nation admire the 900 times more powerful Peace Focused Nation, thank the Big nation for using its geniuses, diplomats to bring a peaceful transition to a better future. Perhaps the spirit world will send its best spirits to guide and as new human beings to the country who practices the most compassion and World Peace building, tortures none and kills the least amount of people in its efforts of *Permanent Peace Building and Its Expansion to more areas*. Maybe spirits can't help the leaders of a country, if the earth leaders think they know everything about the Universe, including whether the soul/telepathy/karma/etc exists or not, etc. The humble person doesn't know anything almost so to speak and is aware of this inability of the human brain to know almost anything, compared to what is there to know. If the leaders are humble, they realize there is more to life than what appears to be, that truth is infinitely complex and ultimately way beyond the human brain's capacity to understand, and the leaders are likely to try more complex, more sophisticated ways to build *Permanent Peace and expand it to more areas* than threats and the typical shows of force done today for intimidation. The more a Nation chooses Peace Building, nonkilling, Non-violence and Compassion, the more evolved souls will immigrate to it or be born there as sent by the Heaven spirit worlds, so as to help that Nation be the Light of Peace it can be, according to its already stated intent, reflected in Its Constitution, Anthem (see paragraph before anthem too), politics, culture, music. Intimidation doesn't seem not a good strategy in foreign affairs, leading to more harm than good. Intimidation may be a result of fear and weakness, but it is always easy to use, far easier than trying to talk to the other country and their leaders in gentle kind ways. Intimidation can often be thought of as anti-World Peace, and it's very difficult for people to not retaliate with intimidation when they're themselves intimidated by another nation, since they think they will prevent a war by making sure that other guy knows "they will be destroyed if they do this or that". A strong wise nation doesn't resort to intimidation, but to positive healing inspiration, knowing fully that gentleness and kindness are the real strength and the ultimate armor of protection of Civilizations of Immortals that tap into the infinite mercy 0 point energy field and the assistance of noble spirits to defend against any aggressor nation who starts a war that leads to total self-destruction of that war starting nation. Words can do more damage than a million bombs sometimes and thus the wise

Peace Building Nation has a real program in Conflict and Tension Deflation using Sagely Behavior, Words, Tone, to prevent making a fool of itself on the world stage by lowering itself to the use of techniques used by people on Earth for eons to unconsciously perpetuate war on Earth. The World Peace Building Nation is fully aware of the power of intent to build a world of peace and of daily communication of that intent, so there is no need to use threats, as threats dissolve trust and only lead to military build up; intimidation enrages a war-loving country and leads to ever more military build up within the war-loving country, more cunning, less trust, less chance to heal those leaders so they begin loving peace instead of war. Intimidation seems a direct violation of the Golden Rule of "Do unto others as you want them to do unto you".☺

Our planet can build many universities, primary, middle and high schools dedicated to preventing war and crime. To be a global leader of Peace, to be the Force or a Force of Peace that heaven relies upon on this planet, World's Most Peace Bringing Nation can implement a real culture of *Permanent Peace Building and Its Expansion to more areas*, and train people in the Arts of Peace from the 1st grade, using even simple things like Telepathic Remote Healing classes from 1st grade to turn an angry person into a happy one, astral travel, humility, non-reactivity, compassion, tranquility, serenity, positivity, the 20 telepathy habits, etc. The Cosmic Peace Bringing Nation can implement these programs via the media to promote non-violence and a life of helping others, instead of selfishness (parties, smoking, drinking, daily sex), violence (movies) and materialism (having as many things, cars, houses as possible). When people don't meditate, don't study anything about afterlife, consciousness, etc, when they're not content with the eternal 0 point energy field or the bliss of conscious breathing (see Chapter 10.1), they seek happiness in getting more cars, more money, more houses, more girls, more sexual orgies, more titles, more praise, more illusionary fleeting apparent (not real) "worldly power", and this then creates a lot of tension that can lead ultimately to war, as the society becomes more selfish, and thus more divided, with fewer people caring World Peace.☺☺☺

13.3. DIPLOMATS who're empathic, telepathic and bring World Peace:

By cultivating compassion, diplomats become more empathetic, more able to read the souls, hearts, feelings, thoughts of "Believers in War, Killing and Violence" and understand where their unhappiness (and desire to kill to "bring peace") comes from at a deeper level, so as to find perhaps the way to World Peace, nonkilling and Harmony. The human being is complex, and assuming people have a soul history, sometimes they may do things because of a past life obsession or experience in a spiritual world they lived in before being a human being. By developing the talent to read the souls of others thru *gentle tender soft* compassion in action and tireless dedication to the Values of Non-Violence and nonkilling, The Peace Building Nation can better relate to foreign leaders, by reading (with the help of the most advanced ultra gentle

spirits in charge of the nearby galaxies or solar system, whatever the case may be) in diplomatic affairs and encounters the most internalized secrets of people they never told anyone, even dreams or astral travels they had they never told anyone.☺☺ For example when a foreign leader is grieving his dead aunt, the wise diplomat, filled with *the Holy Immortality for All Spirit* of gentleness tenderness softness and grace so to speak, the ultimate empath and soul reader diplomat, is kindly sharing with the foreign leader about his spiritual encounter with an angel of universal kindness and compassion and seeing a spirit (describing his aunt) and saying things only the foreign leader knew from a dream with the aunt where they went on a ship. The foreign leader is deeply moved and realizes from what was said by the aunt spirit thru the diplomat that she's alive and loves him, forgives him and he's very happy and wants to deeply thank the Peace Building Nation diplomat. People are sharing such things more today in the media, helping people to be more motivated to work for peace. Of course, these things are not possible for the average diplomat, only for a truly spiritual and holy person, with real spiritual ability, not for a phony person. And the occurrence of such events is up to the spirits who oversee the diplomat's journey towards a more peaceful world, where we stop slaughtering each other and instead start helping each other. ☺☺☺ Thru deep reflection, huge steps can be made to start the process of building friendship, trust and amity leading to a world of tranquility and peace. In certain circumstances, when the foreign leader is more open minded, the political discourses, press conferences, discussion, dinners can even mention karma and how we're supposed to not kill anyone (due to consequences in the afterlife (regardless if they may be in a future spiritual or physical life)), have peace, treat all with kindness, how it makes more sense to be best friends than enemies, doing our best together for World Peace and 900+ year lifespans.

By always talking of tenderness gentleness *softness* compassion nonkilling afterlife proof, telepathy, ESP, the lives of saints who prevented wars, by all these spiritual events and healing encounters with the Greater Reality, and by also living coherently with eterni speech, intent and emotion for decades and emanating such holy intent vibrations, vocal tones that match one's words, the Peace Building Nation diplomat (and all major officials who abstain from threats, intimidation, etc) is perceived as the spiritually aware friend (since people have a built-in "tall tale detector" thru eons able to discern phonies from really kind people) who only wants peace and good for all human beings, and this helps others to heal and to also join in the Vision of World Peace. By repeated such actions, the most peace Building Nation becomes a or the unspoken unknown hope/leader of *all nations* and everyone loves this World Peace Building Nation, a nation filled with humility and without a need to always brag "we are the greatest country on Earth, we're the leaders in this and that". Thru emulating the examples humble folks, the World Peace Building Nation becomes a mediator of choice that many nations invite, as they mind their own business and fix their own faults first before lecturing others to live this or that

way. People have statistics available and they know how each nation is doing. Saying "We are the best or our way is the best" doesn't accomplish anything, except increase the dislike in other nations, who sense the lack of humility and self-control, which are the qualities of the "best" so to speak. "When the ruler is a sage, they never tire of him" means just that, when a nation and her leaders become like a saint, like the sage of Tao Te Ching or other scriptures, the whole world trusts That Nation and allows That Nation to lead them from behind into the future, without “one single shot, intimidation, fear, saber rattling and displays of force”. ☺☺

Diplomacy can bring World Peace. Diplomacy is also a way to increase the harmonization with the peaceful field of advanced spirits who can aid us via telepathy to usher World Peace. A skilled diplomat or leader can save 1 million lives, so it makes sense to invest more in inoffensive speech, healing deescalatory communication and diplomacy education for all leaders and public officials. In extreme cases, a diplomat or leader can save 4 billion lives. What makes a good diplomat? We can answer that in 1 trillion ways, here is one way: A good diplomat may be a person who is very compassionate and can feel the suffering of billions of people, a person who is so gentle and kind (yet passionate about World Peace), that he can't imagine eating meat (from factory farms where animals are mistreated, or animals that did not die naturally and were killed for food) or wasting time with smoking, alcohol, etc. He even can think or find a way to say in a diplomatic way that "while this wine or beer or drink was made over 10 days, 200,000 people died of starvation, and 800,000 died because of heart disease, diabetes, cancer and aging. Because wine is not a need for life, it's ok to not drink it and use my energy to aid the cause of World Peace, so we can have money for curing diseases, fight climate change, eliminate rape, pollution, hunger, natural disaster deaths, instead of for slaughtering each other." Perhaps the more compassionate a diplomat/leader is, the more spirits are revealing, when wise to do so, information to the diplomat about the person in front of him, so that gently, little by little, with each encounter a friendliness and amity are building up, loving kindness for all beings is magnified, until all realize that The Diplomat is an Angel of World Peace so to speak, wanting only the best for all people. When one can live in a holy manner emulating the saints and ascetics, monks and shamans, the spirits can bilocate him and he can meet with others astrally and the trust is building at subtler soul levels and one's words are not taken as empty promises and shows, but heartfelt and magnetically taken inside as the words from the encounter with an angel of World Peace visiting the planet of war.☺☺☺ With this Ethos, with this big planet size heart so to speak, the compassionate feminine gentle tender diplomat uses the grace of loving kindness for all beings to heal and soothe the souls that have never felt a lot of compassionate healing soft gentle *nurturing* kindness before, and helps the planet move towards World Peace. Being soft and gentle is not a weakness, it is really the way to turn all into lovers of World Peace and nonkilling, saving lives and a few trillion dollars too. Even the "so-called least loving" leaders

will eventually feel the love, since the angelic spirits will hover more, from Immortal Civilizations and higher spirit planes, around the diplomat or leader (can be even a general or military leader) who is working to Bring World Peace. The compassionate effective diplomat, after decades of training in eterni speech, is like a sponge of universal loving warm kindness, forgiving mercy and compassion that helps trust to emerge and war to end. So, with this new era dawning, with the new Compassion Diplomacy Schools emerging, The Peace Building Nation gains the telepaths, the empaths that have the real insight into the suffering in other human beings, even those who still live in fear and still desperately cling to lies, deception, paranoia, and desire to kill, bomb, destroy, wage war, in direct violation of the ideals of happy Immortality, no "war, killings".

The angelic diplomat, who has developed coherently since infancy and built the most coherent vibe, tone of speech and body language, has a magnetic presence that is vastly different than that of ordinary men, 1 in a million. Due to his training for coherent intent, gentleness, tenderness, healing and vocal tone, his energy is different and when he interacts with people, and says something he's far more likely to be trusted. Then, as other officials confirm the diplomats words, the trust increases even more. The trust means that others are more genuine in the angelic diplomat's presence and therefore, the honest kind diplomat is better able to read others, while someone telling lots of lies daily, with incoherent emotions and actions, won't be able to correctly read others, because others detect subconsciously someone who is playing games (one day a friend, next day a foe, one day a friend, next day making a threat, total incoherence) and they automatically put a facade without even realizing it consciously, to protect themselves. So, when diplomats honestly express their wish for a world without violence and honestly work towards world friendliness and World Peace, they're going to succeed in healing the wounds of centuries between nations in the most subtle healing sweet and effective way that honors the healing process of other human beings they talk to. Certain people lie more due to a lack of acceptance ultimately, due to a deep insecurity that somehow, if an earthling or group of earthlings knew, the entire humanity and universe can't really be on our side because we chose to be honest and stop saying several lies each day (some studies found that many college students even say several lies each day). One can abstain from revealing things or admit "I don't know" (do we ever really know anything for sure?), but the thing is with lies, a deep habit is formed and it leads to less trust, more paranoia, and ultimately, to war. The hardest thing to overcome probably is the human tendency in certain people to lie a lot, out of habit or fear, etc. Obviously, this process of being a living example of honesty to help the enemy to also be honest takes time, since others don't learn from our words but from our actions and honesty habits (or dishonesty habits), an unspoken learning from our emotional coherence. Kids emulate parents' actions, not words. Same for peers. We're influenced by peers and emulate others' actions, not words. Those who lie a lot are human beings too, and like

anyone, they learn from living example, not from words. Actions speak louder than words, so for diplomacy to work, all branches of the government of Peace Building Nation would agree with the diplomat, otherwise, there is less chance the foreign leader becomes a friend of the World Peace Idea if he immediately sees no promise is kept and the diplomat is just a decoration of sorts, a way to say "we try to talk to that country, but he doesn't want to choose peace".☺☺

The strength of compassion and Peace Building and World Peace creation is depending on how many people in the leadership of a nation have the patience and tranquility (helped by meditation, contemplation, peaceful music) to listen to the wise counsel of the more evolved and peaceful spirits, who, in their sophisticated approach, present a possible way to avert war that is far cheaper than just "invading" or "using killings to overthrow a government", or whatever methods people have used to prevent bigger wars. There is a lower IQ (misinformed, less aware, less humble “i know it all”) less kind more aggressive overwhelming force show-off noisy expensive way to achieve an end and a smart gentle quiet minimal force (or 0 force and just gentle healing) kind cheap "enlisting help from the universe via telepathy and prayer" way, and life has always taught humanity that acting rushed on impulse is not smart, and often times a solution exists to the most challenging issue, if leaders can disconnect from all previous concepts for a while, meditate, take a shower perhaps, have a walk and see a new way of looking at that situation that could somehow prevent any violence. Perhaps we can say that it is like when we're a kid trying to learn some skill, say biking. We try many times, 30 times, or 200 before we get a good grasp. The same thing with this, one tries many times to use positive loving kind ways; eventually, a Peace art and science is developed, and World Peace arrives.☺ When others perceive only good intent from the Diplomats or Leaders of a World Peace Building nation, trust will grow, no bloodshed will exist on Earth as the angelic diplomats or leaders or generals succeed in defusing conflicts and being living examples of *gentle tender soft* compassion. It's doable. ☺ Just like people went to the moon, humans can reach World Peace. John F Kennedy did not have a clue about the complicated math, physics and engineering of getting to the moon, but America got there after the President set the goal. In the same way, a Peace Building Nation can set a new goal, World Peace, and get there, and teach this way to all allies, so peace spreads and the whole world becomes one paradise. ☺ The most spiritual and psychic civilization is the most intellectual, altruistic and technologically advanced too, and able to become the expression of compassion that heals a planet of wars. Instead of partying, the "party" is the eternal service to humanity, the fun of helping end the suffering of others who live in war-ravaged areas, and this makes World Peace possible.☺☺☺ Initially, the first computer was very big and slow, and in 50 years the computational power increased a million times and size decreased 1,000 times. In the same way, at first, the Art and Science of Peace may not lead to the most mind-blowing results, but those who have patience and persevere in this vision

could succeed soon and be the leaders of the future, just like that saying of Jesus "*The meek will inherit the Earth*" or Lao Tze "Heaven gifts with compassion those it would not see *destroyed*".

13.4. Why World Peace in 3 months is much easier than imagined, if All people (*military*, civilian) JUST *focus on it*, as we did with *climate targets* ☺☺☺

The *next* 30+ pages *explain* that if humanity is to *survive*, everyone needs to gently work to make ~*~Eternal Universal Peace~*~ true immediately, to avoid a decade long nuclear winter (10-20 degrees below 0 in formerly warm climates) that starves 5-7 billion people to death. Russia wants to double kid military traning and include 5th graders, even if 7 year olds already take part in mujahedin like training, showing that there is an urgent need for peace before a WW3 can erupt. In case of such catastrophic war, the only nations that might survive intact may be Australia, Argentina, and anything really South, while the rest may only have 1-10% of inhabitants survive. However, if quantum war breaks, all continents will die, except 1 million people in a capsule. Thus, if nuclear war breaks, being already in South Australia, New Zealand, South Chile (the southern most country in the world), South Argentina, South Africa, may be the move that saves your life and helps you bring the Immortalist Anthem to reality. USA people are at high risk, see safer areas map, with most estimates saying 75% of Americans would die after a first strike. All schools need Immortality *for* All Classes *(that cover* Eternal Universal Peace *(the health of the human species, war is like autoimmune disease, the body of humans attacking itself), Health, Longevity, Immortality too)* from kindergarten to PhD. *This educates people to value Life, not war and being cannon fodder slave to be disposed of* by palace dwelling aristocrats in *wars of theft*. World Peace is Possible in 3 months, as this 1 min song says, even if some think it's science fiction. Ukraine is Nuke-Rain, where WW3 may start in 25 years if this book is not implemented ultra fast, see Russian general claiming Ukraine war is the start of war to 'liberate Eastern Europe' via attack on NATO that starts WW3.☺☺☺ This is a war with 7-8 billion dead, 5+ million survivors. Ukraine gave up nuclear weapons in exchange for Russia's promise to not invade. This is no coincidence. Almost all nations seem to have gone insane, even China, watch alleged real (not faked by CIA using American Chinese) video of kids preparing for killing all Americans, Japanese and WW3? Chinese asylum requests went up 13 fold in 2023, Chinese illegals (soldiers in disguise) went up 50 fold in 2024, vs 2021. Kids were told to say (fake video?, note the nose cue, big nose=lie in folklore, told to lie?) "Japanese are bad", due to the WW2 actions (real/fake pics?): one, video1, video2, video 3 Korea (Japan revenged for when Korea tried invade Japan with the odd Mongols), torture unit 731. Venezuela wanted to invade USA territory Puerto Rico. China is building its own Pentagon, just 10 times bigger, made a life size replica of Taiwan presidential office area in the desert so soldiers memorize the palace area. A youtube video explains the 3 Gorges Dam could be bombed by Taiwan or any enemy in a

conflict and cause 40% of China's GDP to become 0 for 1 year in 1 day, plus 4 million dead from the floods. That's why Peace is Needed. India will flood with water of the 3 times bigger Himalaya dam, when China decides to. China is ultra vulnerable to attack of its soon to be *120 nuclear reactors, which are way more numerous than any nation or* Taiwan's single *reactor,* so it's in China's interest to have Eternal World Peace in 3 months. All countries need *gentle tender soft nurturing* loving kindness compassionate *graceful* sweetness, instead of machoness. Taiwan can win war with China by *hypersonic missiles* hitting all dams and nuclear reactors, making China abandon its invasion in 24 hours. The Communists can be defeated by Kuomintang in hours due to the modern vulnerabilities of the Chinese energy system. Taiwan can do the dams first if attacked: show their 50000 hypersonic missiles ready to bring China to a halt in 10 minutes, if blowing all Chinese ships with anti-ship missiles (5 million of them) doesn't halt the invasion. 3 Gorges first as a kind request *to cease killing or torturing any human ever in the future*. That's why we need that quantum scanner, to make sure nobody does any torture or their dams and nuke plants can be attacked to bring all factories to a standstill. Criminal terrorists ought to not govern any nation. Humanity deserves a world free of torture. Any other nation harassed by another can do the same, just have a small nation supplied with hypersonics which act as a "mutually assured reversal to the Stone Age" mechanism of deterrence. Hence all nations need off-grid single family housing, with solar power and battery storage for all to prevent such blackmail from ever occuring by small, medium or big powers. A video explains NATO knows everything China does. Since most of the medicines in USA, Africa, etc are made in India with Chinese APIs, the US can't attack China in reality, as it would have no medicines, rare earth minerals, lots of stuff. The Taiwan stuff is theatre only, as China doesn't want war either. It's a mere geopolitics show.

For 3 decades since the staged 1989-1991 "fall" of USSR (watch video) (with *7000 nuclear bomb* arsenal on paper, 45000 in 1988, maybe *90000* now), USA has prepared for WW3, schools got covers for inner doors, shutters for all windows, safe rooms come out of whiteboards, needed in case of a nuclear explosion: film to prevent window shattering due to small debris the size of a bullet from allowing radioactive dust from coming in, *window* shutters *to prevent broken window collapse due to high temp melting the film, prevent big* radioactive debris *brought by the shock wave of* nuclear *blasts*, plus, the 3rd layer of *NUKE BLAST PROTECTION*: the safe room that pops out to stop debris way better than the shutters: the shutters also allow all USA schools to avoid eye retina damage of kids who stare at the nuclear blast, since *the military will inform all schools (all* TV-radio stations *broadcast the news at once,* FEMA sends a message to all cell phones*, TVs as in the National* Nuclear Armageddon FEMA practice, Oct 2023) 900 nuclear *missiles (each has 10 nukes)* were *launched from* Russia or N Korea, giving USA only *5 minutes* to activate the "active shooter" system for ALL OUT NUCLEAR WAR, as *all major cities activate*

sirens *via a* button *at the Pentagon* and *are told* *on* *TV-radio-phones* *8-15 minutes left until* impact. Only a tiny % of ICBMs can be intercepted and prevented from killing *100* million *people* in 50 seconds, unless the USA developed sci fi tech. *Since not all schools have huge* **bunkers***, it's a cheap solution*. **Officially, the windowless 'gender neutral' baths (sort of bomb shelter, anti-radiation room) are for LGBTQ, 'safe rooms' for shootings (all mass shootings are fake per some websites, militaries stage 1000s of fake shootings, riots, false flags), but in reality, *it's* NUKE BLAST *preparation*. WW2 created 17 million new jobs, (137 million folks vs 334 in 2023): even ladies made bullets. Take cover, where 2 walls exist between you & outside, not near windows, face down** on the **floor**, eyes **closed**:

►►►►►► ~*~ https://ready.gov/radiation ~*~ ◄◄◄◄◄◄

Oddly, we got very evil, very Hitler, WW2 like music in 100+ nations, as if almost NOTHING was learned from WW2, by US, Germany, UK, France, Russia, Japan and 100+ nations. Kids, adults, youth learn behavior from the lyrics, tone and rhythm of music. See Aussie video on WW3. China newspaper calls for people's war against USA and China joins Iran in the fight against Israel, since they need Iran oil and they don't like Israel US ally. However, China plays many double games, since they dislike Iran's religion. China can role play being against USA too, though some youtube claims China exports more weapons to Russia than Ukraine. *CNN shows Russia* prepares all school kids for WW3. A 2023 video explains *allegedly* real changes in Chinese ICBMs, food hoarding, loans, nationalization during war laws that "indicate" Taiwan invasion may occur (*disinfo?*) in 2025 as one general from USA claimed (*disinfo*? another fake war?). Check out why USA uses the democracy nonsense card to talk crap about China: because US has no democracy, it's a military-police state of aristocratic terror, with the masses of USA and other nations as mere cannon fodder and useful slaves for the rich, and because China's economy has risen and now may become a real rival in 2050. Why does USA not protect basic human rights, and acts as a depreaved nation wasting all government taxes, while 50 million live homeless or in terrible housing? Bandits rule. In 2023, US-China trade hit the lowest % in 20 years, with Mexico becoming # 1 US trading partner, not China, so something is happening: China shifts their trading partners? No, it was just Trump tariffs on China applied in 2018 caused China to lose to lower priced nations. In May 2025, China promoted stall (shops that are unaffected by bombing buildings) economy, using stalls (easy to move, unlike fixed shops) to sell stuff, which means being ready for WW3, *when* stores *are bombed*. The Forbes article shows a dramatic fall of China's share of US imports from 45% to 4.5% for many products and from 40% to 20% for others. This is because US wants to decouple from China. Even if only some conventional wars happen, next few months, it's a catastrophe, when you realize what war is like: see food shoppers killed/injured (allegedly, since wounded people can be faked, see here how) in a savage blast (empty building and fast pic swap to make it seem real people were nearby? Russia

claimed it was Ukraine, errant Buk missile, and vice versa) using (if Ukraine S-300 story is true) a quite imprecise S-300, with a high CEP – target hit radius, though both countries have S-300, not sure if false flag and if a Russian posing as Ukrainian captain ordered to rogue attack on Ukraine from Ukraine land, though USA would see it, and that Russian guy would be dead. To understand the SAVAGERY OF WAR, a 155 mm artillery has a CEP of 267 meters, so 50% of time, it lands within 267 meters of the target, very imprecise, 6% of the time within 3 times the CEP, or 801 meters, so civilian casualties are astronomical, if your house is 900 meters (yards) from a military site, HIMARS, artillery piece, soldier, or tank or any equipment enemy wants to strike, you could be dead, hence everyone is told to evacuate *and needs to*. Only US expensive Excalibur missiles have CEP < 10 m. How can any decent human being, KNOWING WHAT ARTILLERY CEP IS, support any war, or start invading a country like Putin did for no legitimate reason*????* Some missile CEP is 400-500 meters, so *6% will land within 1500 meters*, or a *mile away*, and you *could* be *dead*.

This is what the nicest small war is: pure horror, a war that doesn't use nuclear weapons; imagine what nuclear war is: *a million times worse*. In the spring-summer of 2023, Canada man made fires (biggest since 1989 when communism fell), have created a blocking of satellite pictures over much of Canada and USA, in order to enable the preparation *for WW3* of the US-Canada possibly. Tornado on Canada National Day, July 1st, also blocked views from space. China's desertification: *lost 25% of green cover in 4 decades*, though some claim since 2000 they stopped it and reversed some of it. Check out China ground water extraction and coal mining, geothermal causing sinkholes, for more China videos, see this youtube (disinfo mostly, but China teaches espionage to all). China is allegedly honest when in public it claims 90000 square km (90% the size of South Korea) (now part of India) as its own. Not clear if a real claim or just a way to pretend they're India's enemy, while spying on other things going on inside the planet's tallest mountains (ideal place for UFOs). Tourists visiting China dropped from 3.7 million in 2019 first quarter to 52K in 2023 1st quarter, a 71 fold drop, due to COVID shutdown. See China's cities and how CIA disinfo works, pretend enmity with China to keep all enslaved? Was the Cuban missile crisis real or simply a way to increase arms sales, use arms (or phones, cars, everyday gadgets) to remotely mind control soldiers, civilians, foreign governments the foreign military controls? Are the crises/wars fake sometimes? China built endless trains, subways (can be bomb shelters): WW3 preparation? 95% news is fake. June 2023 saw 10% of normal airplane traffic in China to avoid global warming? Of course, when you're one with the Tao, you need no travel, you soul travel. Was COVID19 from Wuhan rehearsal for WW3, with bad air quality, chemical, biological, nuclear attacks, save your face shield/mask? China possibly wants to take over Antartica and Arctic too, to increase its land mass by 289%, to essentially quadruple its land. It may be their long term goal, like 100 year plan, using the South China sea tactics. The Chinese

never talk about World Peace in 3 months, they spend billions to make museums about the "glory of the Chinese emperors" and other imperial historical periods, when 2000 concoubines were killed in one strike at the order of an emperor, or when people had no rights and wars of conquest were the norm. So, no, it's not as peaceful as one might think. If allowed, they would happily take over Greenland (see tweets with fake quotes attributed to Denmark, as China wants to take over Greenland), all Arctic and Antarctica: see, they never work for World Peace in 3 months, you never see that in every TV program, on the sides of the screen, in every anthem, in every song, like with a truly immortalist government of Peace. It's all about Empire Building, check out Chinese state owned builder causes grief among Australians, check out China's secret plan to retake lands lost to Russia in the 1800s: use 'Taiwan invasion' as a cover for militarization, when this military buildup is aimed at invading Russia. China makes fentanyl and nitazines, 50 times worse than fentanyl, and ships it worldwide, causing possibly millions of deaths equivalent over 20 years, due to lifespan shortening or deaths. Some in China try to be peaceful, yet China ships poisons worldwide, which end up in counterfeit pharmaceuticals (valium, oxycontin) or vape products. It's a holy war against non-Chinese worldwide. Let's hope this is all fake news and these dealers are only trying to catch who wants to buy it.

Quantum weapons that don't damage anything and kill only people, may mean big cities are top targets, so small cities are safest, since unlike nukes that people dislike using, the new ones have no environmental cons. The music today hints to the future awaiting much of the world. At laowhy86, we see jokes presented as facts with 0 evidence. 1986 is Chernobyl nuclear explosion in Ukraine. There is always a chance for all out nuke war, SO WE may ONLY HAVE years to avert the end, listen to peaceful music to change the future. Funny how people can waste their entire life to be a sports commentator while the planet can blow up any time, while others watch that garbage. Perhaps, picking veggies and fruits in the scorching sun would educate them about the need for science and eterni food. ☺☺☺ UK King bought 10 houses in an area shielded by mountains with no big cities, in Romania, the only one in Eastern Europe perhaps (except for the Balkan mountains), that is safe in case of Russia nuking UK, France. The backup UK King, Prince Harry (like *hair*), in case Charles/William got nuked, moved to Santa Barbara, US, in a sign the Royals believe WW3 may happen. Russia joked in 2022 that they can flood UK with 500 m high tsunami, so maybe that's why the Royals have a backup plan for the UK, after the flood. Aristocrats don't fight in wars, so they don't care about World Peace in 3 months, they live in gated mansions with many security staff around, so they don't care about violent crime going down 1 billion fold in 10 years. Look at their 8.5 million mansions. They fake their rise from "poor" to billionaire, from "random soldier" to general, etc, the general that is not disposable (two types of generals, 2nd class, or slaves, and 1st class, aristocrat), etc. But we the poor people care. We the People of the world need to take the fate of the world in our hands, since

aristocrats won't do anything. One idea is to declare a state of emergency in the European Union, due to the war in Ukraine on the border of the EU. This allows the European Commission, President, Parliament, etc to start tackling the root causes of violence and wars in the world: aristocratic terror and inefficiency leading to horrible living conditions, lack of universal free education, violent movies, violent scriptures (daily TV presentation of the 1500 Bible quotes that expose Jesus, Mohamed, Moses for who they were, not who clergy claimed they were), violent music, violent novels and TV programs, violent tone of speech, etc. God can be defined in many ways, see here, we don't need these fake prophets to believe in God, nor fake miracles. We need a unifying Immortalist Anthem to bring Immortality for all Americans and Europeans and humans interested. In this state of emergency, sweeping reforms happen to the United States of Europe, for the elimination of all violent crime and jails within 10 years. Reforms unlike any in world history: lifetime labor for any violent crime and for selling alcohol (endless car crashes, domestic violence incidents because of it, 3 million dead), nicotine (6 million dead), vape products, violent literature or movies, music, sex outside pro-creation literature (CIA, FBI etc commit millions of electronic "rapes" yearly, using tech to cause emissions during sleep, so they're destroying humanity, so the EU, China, Russia, Muslims need to unite to stop these terrorism acts by various sadistic spy agencies) etc. The torture done by USA agencies is so great, as detailed here, that it begs the question: is Russia justified in military action against CIA, USA puppet Ukraine government if they use Ukraine robotic sleep deprived people to commit acts of genocide, slow killing, destruction of millions of people in Ukraine prior to invasion? If they did stuff to natiralized citizens, imagine what they did to Russians, Eastern Europeans… It's odd how the news (military, spy agencies control "press" in all nations) reports Russia as the only aggressor against 100% "innocent Ukraine", ignoring the hidden genocides via torture USA does yearly, in perfect sync with the "democracy tour" bombings after 1945 atomic bombings planned probably in 1930s when they got the bomb in secret. Not to mention the endless destruction and killings of people who could help other nations develop, the endless theft of intellectual property of others, etc. Why can't EU, China, Russia etc unite to create the nonkilling Alliance and leave USA to bomb itself? ***When will China or Russia have enough of it to start thermonuclear war? When will USA rape of all nations stop?*** All Europe uses one language for education eventually, created or adopted, for maximum efficiency, to provide the same FREE Universal Education for All up to PhD and Single Family Housing for All thru the implementation of EFFICIENCY LIKE NEVER BEFORE IN EUROPE PROGRAMS.

Skeptics say using English in Eternia or even EU as a common EU language (the eterni version perhaps, simpler, more logical, easier writing, etc, as described here) is a bad idea, as Americans have no noble intentions for Europeans, except turning them into slaves. This is not a surprise, the gun violence rate in USA is 23 times higher, and homicide rate 6 times higher, it reflects the

general violence of the military too, the military being a mirror of the population. To achieve World Peace, we need fewer languages. But even if USA only wants to enslave all nations, including "allies", knowing English is good as most science papers are in English and knowing the main international language allows you to understand everyone much better and know what goes on in the world. Plus, with English, we Europeans can more easily travel to USA and settle there, for a week, month, year or more and transform USA from within, into the immortalist nation it can be. However, one doesn't need to travel to USA at all to spread immortalism, simply creating immortalism in Europe and defending our EU against the eternal sabotage by the USA, is enough, for when we live to 500 we don't need the trash tech and culture of USA today. USA people will want to come to EU in the future, as we will have a real culture, of peace and immortality, not one of hooliganism. The biggest mistake EU youth makes is to go to USA where USA will destroy them or use them to make new techs or weapons that destroy the human species. The promise of the American dream is a fake one, all immigrants are simply slaves of the aristocrats. Knowing the language of your enemy, of international diplomacy and science, or of your "alleged" *NATO friend (who sabotages you behind your back and destroys your own industries and people)*, are both very useful, regardless. The easiest way to transform your enemy into a decent human, is to know his language, and that after all, he's only interested in enslaving all Europeans, torturing them, destroying their brains, eyes, ears, fingers, toes, knees, feet, ankles, hearts, etc, so as to install puppet governments in every EU nation to suck the blood out of their nation. All a Brit or Irish needs do is to employ a Jew (who loves to torture Europeans) within the US military to destroy Europeans with pure enthusiasm, like they bomb Arabs into the stone age (Kaganovich helped kill 5 million Ukrainians). USA preaches human rights, but tramples all human rights, US terrorizes tens of millions, yet accuses fake groups it created of "terrorism", US claims China tortures people (no doubt they copy USA), but US does the same. Recall that native Americans were wiped out by Brits in many ways and so can native Europeans be wiped out by the Brits in UK and USA. Don't be fooled, USA is like a caste or highly feudal society in reality, where slaves are one caste and aristocrats (Brits, etc) are another caste, or class. So, *Europeans are always second class serfs within NATO, simple rats US experiments on, to perfect its torture weapons*. Presenting themselves as friends, Americans only come to Europe as spies to install new devices, feed new spy networks, build more military bases disguises as "private" corporations, "churches" or whatever, destroy EU culture, turn Europeans into savage brutes and dogs, ready to kill, mere cannon fodder with no concept of a trillion ways to peace without war, violence, pain, torture and the psychopathy of the US military and CIA, etc. Let all Europeans know English, become spies if needed to bring World Peace in 3 months by going to US, UK, Canada, Australia, New Zealand virtually, or if bold, physically (not a good idea, you may become a vegetable after torture), to bring Immortalism, so they can create a nicer English, more eterni and a new culture, 100 times gentler, softer, more tender and nurturing,

100% nontorture, 100% nonkilling, way kinder than the blowing by gun or democracy tour English culture. China and India use a lot of English, in government and street signs, to get tourists, etc, even though they both are enemies of US-UK in many ways, due to historical wars, China sea, blowing by gun, etc. EU can even have speakers with better tone for officials. US secret plan may be to bomb into the stone age all EU, to destroy its industry, with the generous help of a staged NATO-Russia war, so Europeans must awaken to the possibility. Recall the US plot to destroy Europe in WW2 and how it came to be with USA hidden support, covert support.

The American and British spies disguised as national leaders want EU nations to be divided and duplicate stuff so as to achieve nothing except empty talk everyone ignores. Using English, our educational materials, classes, etc that unify the EU will be adopted by Canada, USA, UK if they lead to a 0 violent crime, 0 jails, 100 times more science progress. We see today the difference between English speaking nations, it is huge, some are so backwards, some are so advanced, its not the language that matters, but all other educational choices, etc. Nobody cares what language a nation speaks, as long as they live to 900 each, but in this world context English has more advantages for world unification, especially as the English world (500 million native speakers) is so happy when others know their language. The USA is the number one producer of violent music, followed by EU. This needs to change. The leaders calling for sovereign nations, less EU power are making EU nations less sovereign. Sovereign means you're efficient, do research instead of "translating, admin jobs and 20000 companies in every field when one would suffice" to enable American aristocratic frauds to dominate every industry. In the end it's not about US vs EU, since NATO will become one country one day most likely, but the quality of our products, healthcare tech and longevity. EU needs 100 times more high tech jobs to be sovereign, not more separation of policies, ministries. English can be a tool to help all nations choose immortalism, since everyone knows English. When all Europeans know it, it can be easy to improve it, make it twice easier to learn, 20 times easier than any EU language with their uselessly complex grammar, verb conjugation. Let's be honest, mathematical, efficient. What better way than to show English speakers a way out of the insanity of today? We're all humans, slaves of the aristocrats, and if we don't unite, we can't get rid of aristocracy and increase human lifespan 10 fold. All EU nations must unite and centralize into one super state that brings the energy of World Peace and inspires others to do the same to end all wars in 3 months. The destruction of all nations by USA and a few other Bible printing nations, via the promotion of mass rape, genocide and global looting promoting Bible, is something nobody has the basic moral courage or civic duty to talk about in the world, due to the genocidal torture used to destroy freedom of speech, all while telling endless lies to the world that USA promotes freedom of religion and expression... Any really peaceful religion has no chance to ever become dominant in US, where all are slaves, living like a coward in sheer fear. The EU leaders seem

equally dishonest, pretending they don't know the bad quotes of the Bible that kids are brainwashed are the word of God, which makes us question whom they serve? Mossad? Regardless, the workers can stop being used by aristocrats to kill other workers in war. If citizens refuse to fight or kill other humans, then aristocrats can't start wars only slaves fight. A global awakening of the 8 billion slaves needs to happen, so the serial killer aristocrats can't wage and start eternal wars among workers to keep us enslaved forever. The mind control starts since early life, with toy guns aristocrat bloodsuckers sell to precondition workers to kill other workers. Then comes the violent tone music, violent movies, war movies, etc, the list is huge. The time has come for the enslaved masses to demand Eternal World Peace in 3 months.

China pretends they got enough empty homes for 1.4 billion, as a way to disuade a first or too massive US retaliatory nuclear strike (to a small nuclear attack by China against Japan or Australia), since China can do 2nd strike and then still relocate people, though 1st or 2nd strike could take out the empty mega cities too: *they figured that few want all out nuclear winter, meaning bombing all cities, so the more empty cities the better for a long war with nearby enemies.* The empty cities indicate they might get ready for a long conventional war with Japan or South Korea and/or that they're also afraid of desertification or natural disasters forcing millions to the south areas, though many cities are in the north near desert areas. The empty homes are probably only able to hold 300 million people max with some 3-4 per apartment on average. China always tends to inflate positive news, though this has been a millennia long strategy of 100s of nations, to appear 40 times stronger than one is, so that no strong enemy attacks when you're really weak. Are they getting ready for war or just goofing around? Probably goofing around, just to deceive everyone: Sun Tzu: when you want peace, *fake* you get ready for war, so they send *100 airplanes near Taiwan every month to make all believe a real war may start*. Psychological warfare of total deception on the enemy mind, so enemies don't know what to expect. This drains the enemy, so when the attack happens, enemy is surprised, though they may not attack for decades, just messing with Muslim enemies about their cosmic might. They copy US Russia "*problem**, *solution**" bully tactics, i.e. strong military muscle, even if it is all noise and mere show, it gives them lucrative contracts, arm sales *(big boogie out there, we will protect you, the world is a jungle, we made it so via fake "bad groups/regimes*" we created, so you buy our weapons*, etc)*. From arm sales comes mind control of foreign soldiers using Chinese weapons, new infrastructure loan projects to control nations, *car (gas or electric), solar panel, phones, any electronic or WiFi enabled device, etc sales to control all civilians in foreign countries* (the panel messes your mind, via hidden devices, or is a spy station delivering data to Chinese satellites) and turn them into unconscious slaves, unwilling enslaved spies or willing spies of the Chinese army, etc. *When you know what goes on, you want to use only products made in your country.* This prevents foreigners from torturing people using devices or brain

writing tech placed in the car, phone, etc. Therefore, to protect the human quantum field from torture vibes, buy local (unless you know your gov is far more evil than another one), it saves the planet too, no more shipping from far away, *buy made in 'your country', don't let evil soldiers terrorize and* never listen to any government who employed torture during any interaction with you, work with God to vote out that government and replace it with an immortalist (the Immortalist Party, etc) or nonviolent one. Those *employing torture* (torture is genocide waiting to manifest later) are all demon posessed, or, if you're atheist, they're subhuman rats or annoying fleas. The day will come when all torture will vanish, with the help of immortalists and their friends. Until then, realize that 100+ governments torture their 'cop, spy, soldier' trainees or dissidents in brutal subhuman ways that make Satan look like an angel in comparison. Their years long torture is doing far more damage to human quantum field than if they killed innocent people, but because they got the power, the genocide of humanity continues unabated. The evil 2023 US government will be long gone then. Many buy *AIR FILTERS, AC motors, blower, fan motors*, water bottles (tap water is radioactive), scissors, *can openers*. Only *food in* 1). sealed *plastic pack/thick paper jug* (need *scissors to open) &* 2). cans *are safe* after a nuke war. *Some nations* prepare for *nuclear holocaust 9000 times worse than* Hiroshima. We can bring Peace now, don't let negativity win, always recall all humans combined are like an ant, compared to an Immortal, so when many immortalists unite with the IQ of the Immortals, they bring Eternal Universal Peace fast. The issue is few know about immortalists and Immortality *for* All, so kindly consider gently giving this PDF or happyImmortals.com to others.

If some Alien who is a trillion to the power of a trillion told you he can give you tech to live to a trillion, then would you still support wars and violence? The only thing that would end our lives would be war in that case, a war that could be WW3, nuclear causing 8 billion deaths by starvation since no sun may rise for 2 years? So, is anything more important than life itself? Then why not live to a trillion? To kill anyone is to increase chances of being dead oneself, so Peace becomes the number one goal. What can we do to convince the rest of people that Peace is the most important thing? Forget about how nature kills us, think about how war killed 80 million in 1940s. The alien or God is trying to give us that tech, but the entire society is focused on war, spying and destroying others. How can any real ruler (all military generals) hear the telepathy if all they do is torture others? All humans who care about their fellow human, all those with compassion in their being care about Peace, because World Peace gives ALL, THE MOST basic human right, that of life, without which, no other right matters since you're dead, and can't live to 70 even, let alone a trillion. People complain about many rights, others got their house in ruin and all siblings, parents killed by an errant missile, entire neighborhood and CITY GONE. Does the tragedy of a person who died or who lost arms and legs due to missiles, who lost their house and family, city, take a lower priority or lower right than the right of some to practice their

shouting staged miracles 'religion', spread fake miracles, violent quotes, get rich by religion fraud or yell in war imagery nuclear blast songs that bring more war and aggression into the human quantum field? Can we ☺☺*lovingly tenderly gently kindly*☺☺ be honest, kind, compassionate? How are these Syria and Ukraine ruins compatible with "we defend human rights", how are they as symbols of our empathy or so called 'Islamic, Christian, democratic, communist, etc" values? Have we become so inhuman to not care? ☺☺☺

All talk of ethics or human rights is a mere fraud without daily effort to bring World Peace in 3 months, *yet in our world* Eternal Universal Peace in 3 months *is not even talked about (since* all is ruled by military officers *controlling all governments from behind),* let alone acted towards with a real sense of urgency. On every phone made on Earth, on the sides of the screen it needs to say in your favorite colors, "*Eternal* Universal Peace in 3 months is possible" or something related at the very minimum, and possibly also: "Immortality *for* All", "Gentle Tender Soft Grace", etc. on all TVs, monitors, laptops, computers – TV programs, etc as explained in the SPORTS section on the gradual replacement of targets until all jails and violent crime are gone. To achieve a goal, you need all citizens to know about it, not just 2 politicians: World Peace is not easy. And all phones, gadgets need to have the Eternal Universal Peace built in, unremovable, until we achieve it, until there have been 100 years without any war. All nations need to *tenderly gently* sign "The Nonkilling nonviolence nonshouting media deal" to ban (like CFCs) any depiction of any torture, violence, yelling against any human, not just killing, in any movie, literature, scripture, music etc *unless it is a manual for "*World Peace *in 3 months"*. We can evolve beyond baboon stage and we need to. The demonic music (30%) made today must be banned immediately, as well as the mean and violent one by eterni standards (the other 68%) as much of it fuels the evil energies and genocidal actions of WW2. Only 1-2% of today's music lyrics, rhythm, tone has the energy to stop the vast diabolical historical inertia and stop wars, and only 0.1%-1% of that 1% has the energy to create ETERNAL Peace, not just a temporary World Peace. Because of that, the number one priority is to create the new music that replaces the 68% until all violent crime disappears within 20 years and Peace has been real for 20 years. Just talking nonsense, while doing nothing won't work. When your legs, arms, etc are *gone*, family and city (see it) are wiped out, you don't really care about *gay rights, hijab rights, casino rights, gambling rights,* loud music past 9 pm *rights,* alcohol to cause 3 million dead a year, smoking rights to kill 6 million a year, you just crawl to find some water or food in the garbage bin; the concern with all kinds of "rights to shout and incite to aggression emotions via music or religion services" seems comical, at best, and *genocidal at worst*.☺☺☺ The selfishness, cruelty, depravity, callousness (disguised as kindness) and hypocrisy of our societies have reached apocalyptic levels; behold human sacrifice ritual simulations by Republicans, as Wikipedia calls burning kids alive?, while cities are wiped out. It's called "freedom" to worship Satan, eternal

human sacrifice thru war perhaps, or “freedom of religion”, the genocidal type of religion, the "holy" right to remove everyone’s rights to anything, even life itself, see the quotes.

To work for World Peace in 3 months daily is arguably to be the noblest, most spiritual and most honest version of oneself, because war brings the worst side of humans to surface. To achieve World Peace in 3 months is essential to the survival of humans too, as we're near the 10 seconds extinction of all humans moment. To achieve World Peace in 3 months is to encourage positive quotes on clothing, less weather coverage (unless it’s going to be very hot, cold or storms that threaten lifespan, the focus needs to be on World Peace, not weather and sports), to require all journalists, musicians, singers, movie producers, politicians, TV hosts, globally, in every nation, to mention Peace every 5-10 minutes at least once in a kind tone, until it comes about, with the ENTHUSIASTIC universal *gentle tender soft nurturing* loving kindness *and calm dedication to the Most Basic Human Right,* World Peace *in 3 months, and all other* HUMAN RIGHTS of the greatest persons humanity produced. For those politicians who still want human civilization to be around in a few decades, some somewhat focused choices will need to be made, to catalyze global dedication to 0 violence and *reducing violent crime 10 billion fold. Few seem serious about* World Peace*, they have not banned landmines even.* Russia, China, India, Pakistan, Egypt, USA and others are so “democratic”, that they did not sign the Ottawa convention for the ban of landmines that maimed 10 million folks already, leaving them without legs, etc. USA stopped making and placing landmines outside Korean peninsula during the Biden and Obama administrations, but didn't officially sign the treaty, since during Republican administrations, when those presidents always reverse the ban, they can place and produce them, so that’s when big wars start. It’s more of a scam to appear democratic since they plan big wars during Republican Presidents. Because many nations didn’t sign it, Poland/Baltics now want to use landmines on their border with Russia and Belarus, to protect their border against the use of landmines by its huge neighbor Russia, to deter an invasion. Poland wants to exit the treaty too, and mine their border heavily, to prevent a fast advance of Russian troops.

World Peace in 3 months enables the peacefully religious to bring Heaven on earth, the spiritual to graduate to a higher dimension as a soul due to creating a Civilization of Immortals, and the atheists *(who believe in enjoying this ‘only life we have’)* to enjoy the *most* amazing & beautiful ☺☺☺ *world* with 0 war, 0 violence, 0 jails, 0 fear and plenty of kindness and help for all; World Peace in 3 months makes sense for all. For atheists, the ‘only life we have’ could easily become 5 trillion year lifespan with more science: so let the fun last forever, don’t let the pessimists (or vampires who love war to loot and enslave others) spread their gloom based on fake miracle religions. World Peace in 3 months means *World Agreement on 0* torture *in 3 months by all government agencies worldwide*. World Peace in 3 months refers to *permanent* World Peace, and that only happens if violent crime is reduced to 0 within 10-40 years of this ceasefire.

Torture is a form of warfare, violence on the human quantum field, so World Peace by definition is the *end* of torture *(a form of violent crime) too in any country.* World Peace *maintenance needs violent* crime to go *down* from *billions/year* (depending on how wide your definition is, since slapping, parents, teachers hitting kids, etc, spies torturing millions during 'training' are all adding billions to official 0.5 billion incidents that don't even include unreported incidents) to *0/year*. This means *crime* needs to go *down 5 billion fold*. *Later on, 0* torture/violent crime needs verification mechanisms using quantum devices that *scan the entire solar* system *for any human pain*, so Eternia citizens won't just believe that "all is well, human rights are respected, human quantum field is not degraded by psychos", they will verify it and free humanity forever. Any slap, physical punishment by parents, torture by spies, cops, military is violent crime, so the actual number is far higher than the half a billion low value. We have created, due to genocidal scriptures, a society of such violence, that people consider it normal. You can gently read an opinion on the unethical nature of circumcision, for those who're against pain too. ☺☺☺

We see how backward our societies are, a 2023 survey found a 3rd of German males thought physical violence is acceptable in an argument with their female partner (however, a 3rd of German nationals males are not German, but from 120 nations). In the USA, the statistics are scary too: "1 in 3 women and 1 in 4 men have experienced some form (slap, push, shove) of physical violence by an intimate partner". This is no surprise given the attacks the military does with hidden gadgets on US citizens. They may seem nonphysical to outsiders, but they're totally physical, they use microwaves, infrasound, electromagnetic direct energy weapons to physically beat the body. *We're talking of billions of violent crimes by military/spy agencies worldwide alone.* It's these conmen at the top who swear on the Word of Limitless Violence, the Bible, who act as role models for yelling, shouting and depravity. When you add these, if one partner has such a gadget, without the other knowing, or even with the other knowing, but now knowing how to stop it, etc, the numbers are even higher, but only spies, cops and soldiers have access to these torture high tech devices. Then you add all actions towards other people, who're not a spouse, etc and the numbers become astronomical.

While many think Peace is science fiction, due to daily programming by the news controlled by the militaries, can however gently remember that in 1900 people thought it's science *fiction and impossible to travel from Tokyo to London in* less than a day*, like today* we think about time travel or World Peace. But today with airplanes *we can do it*. 20 years ago there were *20,000* fewer electric cars, and then we started writing/talking about electrification and climate change more and more each year on radio-TV-Internet etc. Likewise, we need to first write/talk all day in music, literature, news, youtube, political/military speeches about World Peace in 3 months *WP3* to prevent *WW3 that* ends *humanity* and how to achieve it, in order to get to the point of actually doing it and achieve a *10,000* fold reduction in war and violence; make a 3 month (or 12

for pessimists) plan, with verifiable reductions, like with emissions. Same with achieving 0 violence, 0 prisons, etc. Peace is possible soon with daily TV-radio programs on how to achieve peace in 1 year, broadcast in *all nations* by the ☺☺☺ United Nations Global TV☺☺☺ called "Immortality *for* All", World Peace in 1 year", songs about World Peace is Imminent, the Age of Nonviolence is possible, the Era of *Kindness* is Imminent (no prisons, only healing centers), daily talk of the international agreements to end all killings and wars, to remove violence in media content and tone, from scriptures, etc. Instead of rituals, fake miracles, that have never given us World Peace, etc, we may need to focus on real kindness, spirituality, i.e on the end of war, overt and covert, killings (fast, overt or covert, slow), violence, prisons, crime. When 2 decades passed without any war and violent crime went to almost 0, they can start the new count, this is day one of our civilization when we attained the 1st grade or whatever, so say it is 2050, then it becomes year 1, since all know Jesus was made up. So year *0 is when we finally attained the most basic level of humanity, no killing, no violence, when we* have finally become human, from wild violent animalistic bipedal hyenas. His alleged birth on year 1 AD is of no importance, it's just when Italian or Jewish spies decided to make up a Jesus story for world conquest. AD began to be used in the 9th century and widely used in Europe in the 15th century, even if it was made up in 525 AD. 2000 would be 30 BP, or 30 years before the start of Eternal Universal Peace. It's then, say years after World Peace was achieved and maintained, that the world agrees to a common Anthem that depicts the core values of all nations to bring Immortality *for* All some century via maintaining Eternal Universal Peace forever. That year is the start of our journey towards culture, civilization and spirituality. 2030 is optimistic, it depends on our wishes. Science has proven all the miracles were faked for world subjugation purposes, so Peace will arrive soon.

What kind of *spirituality* is that where people kill each other? *None*. Nonkilling, no war, nonviolence is the most minimal level of *spirituality*, yet after practicing these religions by 1-2 billion people for centuries we didn't get there and their services never talk about 'World Peace *within 3 months being possible* if they do this and that etc", the services never provide a roadmap or 'way to manifest' or get to World Peace; it's as if the purpose is more militaristic expansion of influence of a religion originating country than World Peace, just like the communists started wars that led to millions dead, such as (Russia-China backed) North Korea invasion of South leading to 3 million dead in 1950s, Soviet invasion of Afghanistan, Stalinists killing millions in purges, etc, what kind of communist 'religion' and superior 'ethics' is that, that kills millions of proletariat members, the poor innocent civilians, how does maiming millions of workers fit into the 'help workers' slogan? To survive, we humans probably need to evolve from a hyena like animal to a civil like animal who doesn't kill its own species, and then to an angelic Immortal; one way to diminish our egos is to realize or admit that we have not even achieved civil animal stage, like 500+ mammal species did, that don't kill their own; hyenas, wolves etc

are sharing one thing with humans: we kill adults in the highest proportion on average among all mammal species, though in some areas this percentage is 100 times lower than the human average, as people learned to be kinder. We need more honesty☺☺☺ about our egoism, evilness, depravity: we talk about all nonsense and crime in music, induce restlessness, aggression (see worst parts of this) via music concerts in the youth *(50x more aggressive than anything prior to 1989 in Eastern EU, area which also got 10,000 times more drug use vs 1989, so not all changes were good, yet ethical music, 0 drug use are possible via immortalism, as youth moves into altruistic immortalist activities vs violent concerts),* but never talk about World Peace in 3 months; this arrogance means every big power, or small nation or empire in history engaging in wars will end fast, as it unleashes and perpetuates the same historical inertia that has ended all other empires, so if any country *wants to last a long time, 1 billion years, it needs an* immortalist culture, plus working 24-7 to bring World Peace within a year goals and progress in every area, even music (*and 0 violent crime shortly after that, then 0 prisons, 0 mini torture or mistreatment, since those things can lead to World Peace crumbling) in order to* change the historical inertia from enemy into friend; among online articles 500 billion times more talk about condoms, most useful sex positions, climate change, etc, how to wage war, how to spy and undermine other countries, thriller crime novels, killings nonstop, versus World Peace in 1 year; we have become so evil, so negative in our outlook, so brainwashed by the dictatorial military industrial complex, that it's considered evil ("betraying our country, don't talk of peace, we need to be prepared for war and manifest war for eons") to be good and talk about Peace☺☺☺ and verifiable (like START Treaty for nukes or electric cars, etc) international agreements to talk about peace and build it, in a peaceful gentle tender healing *nurturing* tone, eterni tone, that takes 50 times the level of rest, cognitive awareness and effort to achieve.

The human quantum field will only favor the nation that is using the least violence to advance humans, because in the long run, maximum *gentle tender soft nurturing* graceful *universal* loving kindness *invites 100x less attacks on the species.* Looking at the US actions, (the razing to the ground of Syria cities, or Ukraine, when it's not needed, there are a trillion peaceful ways to same World Peace goal) words, vibe it's evident USA, Russia will vanish without a dramatic change into Eternium. Thermonuclear weapons are like swords vs other weapons we will discover, so only now US, Russia bully the entire planet into Eternal Bombing Wars that destroy the human DNA matrix, delay 500 year lifespans so important to space travel and thus species survival. US Jews, Russian Jews meet up and help the game. That's why small nations need to be careful, if they want their nicer vibe to survive, on the choices of alignment, since the quantum field is smart. So, to attract the super intelligence of the human superorganism, mid size nations need to ☺☺*lovingly tenderly gently kindly*☺☺ promote World Peace in 3 months. Yet, with somewhat eterni in tone youtubes after 2004 when youtube become real and lots of unknown

music became known to 200 nations, so rare that TV-radio almost never have such tones, we can improve tone and bring Peace; since 2020, via internet, we can see how bad the tone is on all TV-radio stations globally and how we all create the wars, not just one or several countries, we can't be lied to by politicians trying to foment war anymore. We can take the destiny of humanity in a new direction, of a peaceful eternal tone. Why is it so hard to achieve such a tone? Perhaps because on average, we humans lack the civil animal brain structure, being a more violent mammal animal type for now, but animals can evolve fast, within 2 generations or less, to survive and we may need to evolve fast to survive the inevitable disappearance of our species given our trajectory now. Why is World Peace now, in 12 months, never talked about on CNN, TV, radio? ☺☺☺ Is that what Godliness, Freedom, Religious Regimes, Democracy and Communism have all become to be about? No church/mosque/temple requires their spiritual services to talk about World Peace in 1 year to free the planet from the risk of all humans dying in 10 seconds soon; and within years as of today, if all out war breaks; the Pope, Russian Patriarch don't talk about World Peace in 2 months either in every speech; far worse than that, the Pope takes sides in the Ukraine war, Russian Patriarch too, nuke threats happen; the Vatican takes sides again like they did for millennia (when it fits Italy's interests, they criticize a war of aggression), inciting people to killing and war indirectly; why can't spiritual leaders adopt nonkilling as ethics, per the 5th commandment, 'Don't kill', they preach? It seems many churches are more of a paramilitary organization, taking sides in every war.

Italy, Russia, Iran, China, Turkey, Germany, Greece, Japan, UK, and another 400 nations that exist or don't exist even anymore etc via their respective 'empires', all invaded and did mass killings of civilians via swords (bombs today) and atrocities, some even did mass ethnic cleansings (1945) as USSR did in 1930-1952 and Russia in 2022, but in the past centuries of imperialism we had hundreds, thousands or millions dead, today 8 billion humans can disappear in a few years due to nuke exchange and ensuing chaos, famine, wars over water, nonirradiated land, etc.☺☺☺ We hear this back and forth about how Ukraine belonged to many empires, etc and was theirs first, and etc. Lands have changed from one nation to another 10 over 80 millennia, it's pointless to argue that 'back when this was our land', since anyone can find an earlier point in history when Russia or any nation was 10% of its current size, so let's be real, if you go back deep in time, no nation is as it is today, not even close, so how can we decide which millennium or century was the true map? There is no evidence even of the maps of former empires before writing, you need find all bones of all people that are still around to prove one group was there, good luck with that digging after all landslides, floods, etc. Initial groups in prehistory were smaller so they will be even harder to trace and prove they were there first. So real justice can't be done for those adherents to 'historical truth', so what is the point of claiming this and that was Ukraine or Russia, if it doesn't bring World Peace now? Are we going

to have any civility like animals that don't kill their own or play games to kill others? What was tolerable back then or last century is no longer OK today when we can destroy the planet in minutes and make it unlivable; we either stop all wars or none, can't pick and choose which war is OK; all are killings and terror. Everything is caused by the collective, any war is caused by *all nations* actions over last 100 millennia, we need to stop all scapegoating, stop all trade with any nation that doesn't agree to World Peace in 1 month or year and that's it, stop trade if they break the ceasefire too; let the ceasefire last a trillion years. Perhaps, earthlings create a planetary army etc and have it enforce the peace and 0 violence, so no more wars. We can make international agreements to solve outstanding differences of opinion over who controls what sea area, without violence. With 7,000 languages, the risk of war, misunderstanding and inefficiency is huge.☺☺☺ So, we need to talk daily on radio-TV about moving towards fewer languages or creating one world eterni language that is the easiest gentle kind tone writing language to learn, that replaces all others in 35 years, so we increase the efficiency and also the peace stability, i.e the peace lasts 5 trillion years not 5 weeks. So, we need a more loving vibe, in our speeches, actions, emotions, recordings for public, use echo, meditative background music, uplifting tone, healing younger voices, a nicer vibe, like that of the most loving mom for her infant baby whom she loves gently, tenderly, unconditionally, versus older children who're loved less tenderly. Have we extirpated all honesty and humanity in us to not care about those maimed, made homeless and killed by endless war, all medical progress being delayed by resources going to war? Can we adopt Immortalism, | Immortality *for* All |, try something new?

Some have become so negative in their thinking, brainwashed by the media and politicians, to say easily, to think easily 'this or that war in Iraq, Syria, etc will last 10 years': Ukraine (Bakhmut buildings), Marinka 100% gone, and artillery fire. We watch the news and we hear UK Foreign Secretary *(who lasted 6 weeks as prime minister Liz Truss and said she would use nukes, as any hidden world leader is "trained to do" (the military who remotely controls civilians leaders, civilians make no such decisions of course), if needed for retaliation, without saying World Peace in 3 months is possible as all politicians could say, besides nukes for asteroids only to build the World of Nonkilling)* say in 2022 "We need to be prepared for the long haul, for a years long Ukraine war" (*so, in other words, "Peace is not worth, no plans for Peace, no effort for Peace, no preparation for Peace in 3 months, war will last for a few years is OK to say, 'World Peace can come in 3 months' is never said as if it is ILLEGAL TO SAY, everyone get ready to kill please, don't think of Peace in 1 month, tempt people to do evil, to wage war for years, without talking of Good, of the Way of God☺☺"*), without saying in the same sentence "but there are a trillion peaceful ways to World Peace within 1 month or year if we're slow or lower IQ, that we could discover (just like under pressure they discovered nukes in World War 2), if we had the strong desire for peace, the seriousness (reflected in the content of BBC, TV-radio, music exported by

UK (Black Sabbath, Zeppelin, etc) to other countries, etc) to *want to* respect human rights and democratic principles *strongly enough so as to give every human being the decency of not being killed by missilles that land a little away from a military target,* etc". It's become habitual for all politicians to talk in terms of how long the war will go on, what weapons they will deliver, etc but never giving the democratic right of humanity to think in a different way, like to have the freedom to think in a new way, to think that "World Peace is possible in 1 month or 1 year, if we had more intelligence", to be able to free themselves from the terrorism of negative thought and historical inertia, that thru repetition becomes expected outcome and manifest reality: a lie repeated 1000 times becomes a fact for the masses. Perhaps, politicians can choose to be more honest, to show humanity the truth, of what is possible, and not present opinions or military planning or wishes as established facts. We hear Chinese leaders saying that "we will work for peaceful reunification with Taiwan, but we will use force in the future if that's the only way to achieve it", this is also a very negative thought, they have been brainwashed, without realizing, by their enemy, the Brits, by the British Foreign Secretary apparently too (while claiming to be very different), since there exist a trillion ways to peace, to reunification without any violence, that await the great China's discovery. The Chinese took the bait, they fell into the same trap as the Brits, Americans, Russians, etc. We heard Putin saying in Feb 2022 that the only way to solve issues in Ukraine is thru violent military operations and raining Ukraine with endless bombs (while allowing the bad lyrics, tone of IC3peak), but this reduces democracy to nothing, as it eliminates the freedom of the Russian people to visualize a different possibility like "there are a trillion ways to get Russian in Ukraine feel happy without war". ☺☺☺

The Russian TV even made threats of nuclear war and World War, a threat of 500 m tsunami wave over UK, showing visual strikes on Western Europe capitals with nukes, which is not really positive thinking, but downright lies (since their nukes don't work) and anti-Immortality *for* All; it's not even wise, since in 500 years some tiny country that was threatened or invaded could discover dematerialization or etc tech to turn all weapons into a gel, and render the nuke advantage obsolete; journalists and TV hosts could try to promote peace, instead of making tensions rise; maybe they would make a deal to no longer say "this war will last for years" or "threats to use nukes" (use them against asteroids or aliens, but not humans) as that is mental smog (like CO_2), conditioning the collective unconscious of humanity to manifest that and destroys all progress towards immortal lifespans. Make a binding targets agreement, like CO_2 emissions, to reduce mental smog, negative war talk, nuclear threats, war threats and increase talk of World Peace within 1 year, like increase of electric vs oil cars. The list of politicians saying ultra negative things goes on forever, the whole world has become victim to the collective subconscious belief, where everyone is a parrot repeating the same ideas of war, war, war will last years, etc, a self-induced collective hypnotic trance belief, that only war will bring the best

outcome and they repeat, without ever thinking it's insane to do so, negative statements, suggestive statements that create hell by brain programming of all world citizens, not realizing they turn the world into a 10 principles like North Korea, where the only acceptable thought is "war is here forever, and we will wage it for 10 or 20 to get rid of some bad guys and that's the way of life"; this is a complete dictatorship of the military-industrial complex that strangulates the freedom☺☺☺ of humanity to think that "World Peace is possible☺☺☺ within 1 year if we, as a humanity were serious enough to want it, to have the compassion to end the slaughter, maiming and insanity going on forever for a million years, so we can become a civil animal, first, before living to 900, an animal that doesn't kill or injure intentionally its own species." How can anyone live to 500 if missiles kill people at 5, where is the human right to live to 500?". This is terror, not "democracy, religious regime, communism, socialism", etc, every time we watch the TV we see war and violence and not once a talk about a realistic or optimistic plan to get World Peace in 1 year and no violent crime in 5-10 years☺☺☺, not once, not ever, but 1 trillion times we hear people on 50,000 TV-radio stations and 2 million websites talking about violence and war. It's a forced brainwashing of the 'free' people of Earth, to believe, the only way forward is thru eternal war and violence that keeps us savage, primitive and low tech, especially short lived, for millennia, we have lived max to 120, and after so much progress, we live max to 120 still. So much for our democratic progress, to think freely in peaceful ways, how can there be such a freedom when our leaders talk of war all the time and World Peace within 1 year never? It's like in 1950s London, a smog so thick, you could not see more than 20 yards sometimes, we need to reduce this 'war talk smog', 'violence smog' 50 fold before it ends our species forever.

We hear a lot of tit for tat talk, whenever a country bombs or whatever, they say, like in World War II (both sides) many generals did, "we will revenge, we won't forgive" and "bomb them even more than they did", etc; this talk, while it's meant to deter, often makes things worse, as all sides go into all out war mode; imagine if instead of a Manhattan project to discover nukes, or *destructive deterrence*, they would have made one to discover *constructive deterrence*, the trillion peaceful ways to peace, to ending aggression by a country without any injury or war. Imagine if all *soldiers* obey the All Loving God (or future human ethics of the World of Peace, for atheists) who loves all human beings more than the *most loving mom* loves her small helpless clueless baby, instead of obeying orders to kill other humans under various pretexts; no *generals* could *wage* any *war* if *immortalism* was strong, if *ethics of* nonkilling was strong; war happens because of the planetary depravity in our music and cultures, that never talk about "☺☺☺ World Peace in 2 months, about nonkilling, nonviolence, forgiveness, compassion, kind gentle tender soft grace in every song", as it would be needed to save humans, to educate and elevate the human goals, emotions and political speeches; think about the cold speeches we hear often, about this and that lethal weapon delivery (sounding like Satan's (or bad alien) lieutenants'

updates on how to commit more genocide, murder, human sacrifice via war and destruction of human quantum field via injury, simulated violence (false flags, nobody dies, just panic creation) or real one, media violence, fear, negative emotion on TV, torture, fake or real killings), without any talk of World Peace in 2 months and ending all violent crime in 10 years, etc to be able to sustain that peace via the qualities of Immortals; the contents and tone of too many political speeches sound (if you pay attention and compare it with the gentlest of these youtube vocals) so cold, tired, stressed, mentally enslaved, tortured, robotic and lifeless (as if the speakers were tortured 27 years by a global military dictatorship who programs everything we believe and brainwashes us that World Peace in 3 months is not possible), when it could be so *warm*, loving, *alive*, *genuine*, *honest*, affectionate, *healing*, *musical*, angelic, *gentle*, soft and sweet, making listeners super infused with loving kindness for all instead of stressed or angry, spoken using peaceful instrumental music in the background, with echo perhaps, by a younger angel voice spokesperson with far better ability to convey eterni tone due to younger bigger brain, more control over the tone-emotion-stress hypothalamus axis, able to induce younger brain patterns in all audience to youth everyone's brain and brain to vocal neuronal connections, to delay aging, in a state of grace, after 2 days of good rest to not contaminate the masses with their emotional garbage, to not damage the quantum field via that negative emotion being replayed in 4 billion brains, with Immortality *for* All, Eternal Universal Peace posters in the background, while using words like☺☺☺ universal *gentle tender soft nurturing* loving kindness compassionate *grace for All* once every 3 sentences *to heal uplift, and inspire* (a "seemingly mentally insane unbalanced humanity close to ending itself in WW III in 10 seconds"), *instead of incite to genocide, war, revenge and hate for generations in subtle or ultra obvious ways*.

Big powers claim they're the victim and a few lethal weapons will be fine, one last war perhaps, since World Peace will come in 4 trillion years, and they're on the right side of history, defending historical borders, minorities, languages only sometimes, i.e when it suits 'their interests'. Zelensky piano with penis playing Ukraine President could replace his *"we will never forget, we won't forgive, we will revenge. We invite countries to give us their weapons so we can test them in real world combat"* (and disturb humanity's field of life, testing them on Russian and mercenaries hired by Russians guinea pig soldiers who will die young and bring thus down the ENTIRE HUMANITY) and other Ukraine officials saying "*Russia will pay for generations for each of these missile attacks*", etc with something like ☺☺☺ "*We want* World Peace *within 3 to 12 months, and we believe, if all nations are serious about it, it's doable even sooner. Why not create a loving kind nurturing world of infinite tender compassion for all humans?* We invite all countries to give Ukraine their nonkilling noninjuring devices (not weapons), techs of peace that bring peace without any pain, torture, death or damage to human quantum entanglement field. All citizens who don't want to fight, due to lack of nonkilling weapons and tech, can just run

away to safer areas of Ukraine, save your life first since any injury to you or any Russian soldier will damage the quantum field; many immortalists have migrated when their country was occupied by invaders, so as to not kill any human being and disturb the quantum field more than it was disturbed by the invasion that killed innocents or soldiers; the immortalist ethos is to wait until the right chance arises for peace to emerge via peaceful means, if currently no tech exists to bring peace without killing; so, those who so lovingly and wholeheartedly wish for peace will discover the techs, ways to bring it, and talk 24-7 on TV in nations, areas they migrated to, about the need of World Peace in 3 months, and also, until Peace arrives, the need of nonkilling noninjuring devices (self-defense gadgets, not weapons) that save humanity from suffering and short lifespan brought by a sudden aggression by adepts of killing methods; let us become the champions of a new way, of peace, and not be brainwashed by those who choose to kill in a dispute, i.e. to wage war.☺☺☺ Our whole planet has gone a little mad, has become so selfish, we waste 99% of TV-radio on all kinds of things and not even 0.01% is dedicated to nonkilling noninjuring ways to bring peace and end all wars and violence within 1 year or even 3 months. We need to convey to *all nations* the need to make war illegal, to accept only the way of nonkilling. We're sorry the Russian government, like endless governments before who chose war, has elected, decided to disturb the quantum entanglement field of the human species (and *thus to* bring down the entire humanity and Russia *with it too*) by having people die suddenly way before their time, innocent civilians die (unless they use only expensive Excalibur precise shells that replace 10-50 unguided shells that kill tons of civilians), innocent Ukraine soldiers die, they didn't attack Russia, in a war that is not needed to achieve 500 year lifespans for Russian speakers in Ukraine, who now have poor infrastructure and shorter life expectancy due to wholesale destruction. Is the Kremlin protecting Russians or war reconstruction companies?"

Zelensky could continue: "We want to save *the Russian speakers and the entire world community and media from the dictatorship* of a regime and mainstream worldwide thought and way of thinking who believes God or long lived aliens (for atheists who don't believe in God) have ultra limited knowledge like humans, and use war to bring an outcome, when God and Godly people (our descendants) know trillions of peaceful ways to Peace, to Immortality *for* All, without any bomb, any injury, since they got trillions of times more knowledge than us. While saying they believe in God, they don't consider that God could be wholly different than imagined by some clergy,☺☺☺ that God is anti-war and knows a trillion ways to peace without war, to Immortality *for* All people on Earth without war. If God is Infinite Love, loving kindness, all All Merciful as some religions call God, how can he support a war to injure and kill people, terrorize people with demolished buildings? Even if nobody died and all deaths are fake in a war (they empty buildings etc before hits), it is a brain damage from stress and trauma that shortens the lifespan of all humans seeing this and losing sleep over it, instead of elevating the vibe to

wishing 1 trillion year lifespan to all and etc. *We will forgive, we will* envelop *all humans in healing nurturing gentle tender soft* grace *and love, we will never revenge, we will heal the enemy instead, grant them* knowledge of happiness, *if possible,* physical immortality so they can evolve their souls, and work to grant 900 year lifespans even, if we can, to all Russians, even those who bombed us due to being robotic brainwashed slaves of an 'in need of healing' leadership repeating patterns of historical inertia. Recall how 'low IQ' humans were in the 1st century, imagine if we had the knowledge of people 900 years from the future, we would never need any bomb or violence to prevent any war and violence. Likewise, God (or the universe made up of aliens who, in some areas, live trillions of years too) knows way more than humans will 3 millennia in the future, so imagine all the resources to bring peace without any torture and violence. God, if real, lived so long that became, with respect to humans, infinite in *Goodness*, Kindness, *Gentleness*, Tenderness, Sweetness, and has infinite resources, to heal and to pacify, 'denazify' without violence. Thus, NATO or ☺☺☺ Eternia ☺☺☺ and Ukraine will work to bring | Immortality *for* All |, including all alleged war criminals, within our means, 20,000 year or billion year physical immortality, so all can evolve, become angelic before they die, to free the world from the disease of eternal war, to help us all get along and become civilized. Humans eradicated polio and various plagues, why not war? We shall not punish, as that is scapegoating, we shall heal all, for all people worldwide create the few bad people who create wars, thru their daily choices, tone, thoughts, music choices, actions. We want to heal the world and bring inner peace to all, so nobody is afraid of being killed or tortured, overtly or covertly. ☺☺☺ We will defend our country while trying to kill/injure nobody who bombs us, we will use nonlethal noninjuring pleasant comforting methods, like Eternia President talked about 1 year before World Peace, and we invite Russians to convince their government to withdraw all troops from Ukraine and work with us to bring longer, not shorter lifespan, for all people in Ukraine and worldwide, so much longer than 72 year lifespan Russia has today versus 83 for many countries with different religions. We invite all Russian soldiers to surrender, listen to the loving God, not the killing generals who disturb the quantum field via orders of 'war waging via killing methods'. We will treat all those who surrender with more respect, kindness, gentleness, etc than their superiors ever did, 900 times more, more love than their friends and relatives, since we want to redefine what a military is like, with help from Eternia, of which we want to be a part. This gentle healing *nurturing* attitude of Eternia will increase voluntary surrenders 900 times versus tough speaking threatening militaries. Many Russian soldiers don't want to fight, so to encourage surrender and a fast end of war, we need to talk and be like the most angelic people on Earth. We will help them reach states of infinite bliss and happiness, to relax and rest for the first time in their life for many, so they can see who is the enemy and who is the friend of humanity. We have to defend ourselves without killing, to keep the flame of hope of Immortality *for* All alive, the hope of eternal World Peace, where *all nations* help each other live

centuries extra, instead of maiming each other in senseless wars. We want to help humans reach the stage of civil animal, like 500+ mammals that don't kill their own species. ☺☺☺ There are infinite planets to terraform or colonize if life friendly, so why are these people shortening their lifespan by killing other humans, ruining the quantum field of the entire humanity, Russians included?☺☺☺ We hear reports the war is all fake, since most USA companies are still in Russia (see how wars are faked), perhaps we can end psychological terror via negative news too, so please no more empty buildings being bombed to scare the planet. We know every human tortured, killed or injured in combat brings the entire humanity's quantum information field down, since we're all resonating the same way, tuning forks of the same type, with almost identical DNA, so we will do everything to end war once and for all, with help from Eternia and immortality capitalism. We ask *all nations* to help us test new nonlethal noninjuring weapons to stop the madness, to transport brainwashed soldiers' minds into the space of infinite bliss of Immortality for All, etc. If you got stuck in an area Russians invaded, recall to help them to become a world of Immortals who will love all and torture none, so you can be faithful to them and become even high level official that brings a nicer smiley☺☺☺ vibe there, there is no point in negativity and destructive resistance that risks shortening your and others' lifespan, the ideal of immortalists is least suffering for all sides, so then it is better to have constructive transformation of hyena enemy into angelic friend. Heroism is lowest IQ if it means anyone dying, when, with intelligence, one achieves the same outcome without any pain or small injury even, let alone deaths in fights. We defend the human quantum field, not a nation, we defend *all nations*, not a country, we defend humanity, its ethics and vibe. God is on our side, so while short term it may seem we lost, in the long run we're victory itself. Amen, may our religions evolve too, so no clergy supports a war. Peace to all."☺☺

Perhaps, if we may write so, if they want peace indeed, humans (who work for spy, police, military agencies worldwide) need to gently, *lovingly*, *healingly*, stop covertly trying to enslave, degrade, lower IQ (via education, music, etc), torture, destroy other people or countries, and that needs to be talked about in public, and how to stop it, they need to realize that destroying other humans disturbs the quantum entanglement field of the human species and will bring the whole humanity down, not only an 'enemy country'; we need to educate, thru international agreement and verifiable mechanisms, that all teach their kids/adults to wish all human in *all nations* to live to a trillion as a happy Immortal; the centralization of immortality capitalism makes this verification more achievable; stuff like the Protocols (tip of the iceberg, 0.1% of methods used by all spy agencies) and 1000 times more complex stuff can't exist if we want World Peace, yet it's modus operandi of spies of many governments who create/foment/incite wars; this disturbance of the field of all humans, the quantum field, is better explained in the speech of the World Peace Alliance President, 1 year before World Peace manifests; spies

hallucinate only enemies will be affected by covert torture, enslavement, warfare on a group of humans, but physics says otherwise: the entire humanity regresses; not only that, but the entire humanity is being literally destroyed, degraded, the quantum field is trashed, by the mass forced brainwashing of millions of soldiers who simulate in training the killing of so many humans; they can do war exercises against aliens, not humans; stop inciting other nations to war; kids are brainwashed "military is great, they save people from natural disasters, etc" - this is a lie, military colleges teach how to terrorize other nations, create terror groups, terrorist attacks, etc - it's all online, anyone can read the US/etc military manuals, docs, see them in google searches.

The militaries (and the leaders they remotely control) *preach about human rights* to other countries in a very or somewhat bellicose, yelling, anti-eterni and rude tone, lacking any humility and empathy for the killed in former wars, lacking *gentle tender soft nurturing* loving kindness tone/content to heal the damage they did to human quantum entanglement field as any responsible Peace Building Agency would require all its public speakers and generals to abide by, any remorse for the war crimes they did, any remorse for using killing techs in war. They preach human rights after *bombing millions* of innocent civilians (Iraq for example, but more than that, see *BOMBING* list of the World Democracy Tour by Zhao, the tweet jpeg is here in case twitter removes it. That *bombing was often in response to special forces doing violent things or North Korea invading South per Stalin request, etc, like Ukraine invasion was in response to the 2014 violent coup, which was in response to Russian invasions of 980 years. All need to forgive all and focus on* World Peace *in 3 months, to* stop inciting others via brain gadgets to war in order to enslave them. Zhao has a point, US is as barbarian at times as Hitler himself, but doesn't seem to like to face reality, to commit to *nonviolence*, to ask all to commit to that, to build a world of nonkilling in 5 years, to create, talk 24-7 about an *international rules based* order (or *agreement*, to be shorter than 4 words) of nonkilling nontorture ethics (0 terror, 0 rape, 0 sabotage, etc) by *UN nations* ending all trade within weeks with any aggressor country like Iraq invading Kuwait to avoid any 1991 war as corrective action. Even better is the specific goal: World Peace *in 3 months, 0 violence/torture in 15 years, gentle tender soft healing grace in 50 years* (no more jails, only healing centers, since this ensures 0 violent crime sustains itself). The other major issue with this "order" is that it is *implemented selectively*, when it fits interests of big powers. This then leads to the rest feeling like cannon fodder rats, victims of a hypocritical order. No kind government promotes fake or real violent protests in any country, or uses torture. Let everyone fix their issues first, eliminate all violence, jails, riots, torture during training, etc; then they can preach all day about rules of peaceful coexistence, after they have it in their own country.

The vague, abstract "*international rules based* order" has all neutral words, doesn't define any quality that imbues this order, it could mean an order imposed by eternal *bombing* genocide: notice how not one word implies any *nurturing* graceful *gentle tender soft healing* loving

kindness. The *gentle* peaceful Immortality *for* All *Treaty or ethos* calls us to prevent all wars, riots, violence by new music, TV-radio tone, etc; this ethos, treaty etc means nonkilling, nonviolence to show an intent for Immortality *for* All, is one of 5 trillion better phrases where the only neutral word is ethos, the rest are specific qualities of this ethos, order, etc. UN can replace war with economic pressure, no more exports to an aggressor nation, etc, *realizing present teachings in military colleges on peace keeping could be* 99.9% *false, like* alchemy *is 99.9% false today* due to chemistry discoveries (some preps and things were true, by chance, i.e. mixing this and that gave that, but not the correct explanation), realizing that eterni music may be 1 billion times more effective at creating and maintaining World Peace for a trillion years than any war, etc. It's the UN ethos, etc to create Immortality for All capitalism (all world countries have different forms of capitalism, even so called 'communist' ones) and to act for World Peace in 3 months to a year and talk about World Peace roadmap nonstop, how to maintain Peace a trillion years once achieved nonstop, etc. It's funny how militaries only accuses others of war crimes or torture, while they do them all the time too, on their own citizens even. This type of double standard makes it hard to achieve Peace. We need *all nations*, from the weakest to the strongest, to stop torture. An immortalist military would talk in public about World Peace in 3 months and ending all killings in 2 years, all violent crime in 10 years. For those believing in spirits, we can argue that all military, police, spy people are possessed by bad spirits to some degree if they operate in a country without an | Immortality *for* All | culture that forbids torture, injury of any human, in any situation, even for so called 'training' designed by bad generals who destroy the human species and keep it caged in war and ignorance. Thus, to do the "devil's work" partially (depending on what is done) may be to work for militaries that are in countries that don't have a truly eterni culture, i.e. most/all on Earth?☺☺☺ Only when the tone in every TV-radio speech is truly eterni, content truly eterni, etc, can a truly ethical military, police, spy agency emerge; the torture and sleep deprivation ruins the quantum field of humanity, alters tone and makes war eternal, so don't sell your life to be a slave of cruel generals, do something noble for peace, like here. The work of God is different, but the truth is most have no idea they're doing evil, so the afterlife, if real, may only mean minimal rectifying 'educational healing activities' of only 1 to 1000 years Earth time via interdimensional service or reincarnation, since most are mind controlled via brainwashing (including brain writing) and forced into it by a global terror system run by military generals. This is because Immortals or old spirits if you believe in spirits are 1 trillion times kinder than humans.

Why not call themselves "Department of Eternal Universal Peace"☺ instead of the old 'defense department' name that implies attack will occur and is so like all other departments worldwide, that worship killing as a legitimate way to win wars; it would be a fresh break from the past of insanity and killings and remove suspicion among religious people that the US military is a nest

of satanists who adore killing. They can be upfront: "We are ultra low IQ, like ants compared to the future Immortal humans, our descendants of the far future, have ultra low IQ techs that kill, without capability to take out the tank, airplane, etc only, so we appeal to the American people to help us discover nonkilling tech to free the world from war by deactivating all enemy weapon systems so all killings and wars stop in 3 months, or 12 max. We also ask all to stop watching Sex and the City, sports and other low IQ things and instead help us build, like habitat for humanity does, 10 million houses in the "Immortality for All" megalopolis made of 5 cities of 10 million each, to house 50 million temporary 1 year eterni visa holders, becoming thus world's most visited city yearly, who want a temporary break from war or low IQ regimes and want to learn English and how to build eterni cultures in their nation. For those passing certain tests, they can renew the visa to get more education in other areas of Immortality for All, be it chemistry of immortality, gentleness, kindness, eterni tone of speech, etc. This can also be the city surrounding Eternal Universal Peace City, where the United Nations is relocated from NY. This makes diplomats feel very loved, they can experience eterni bliss, and become a fan of being ☺☺lovingly gently kinder☺☺ to all. Or using this model, they create a new nice weather city, with 5,000 inhabitants only initially (but expandable to a bigger size, where many can visit year round for amazing holidays and bliss experiencing in nonexportable meditation tech areas (unless part of Eternia Alliance), with checkpoints that approve only special device cars from entering *(makes diplomats feel ultra safe, with electronic billboards that present eterni quotes the person likes, images, colors, as his car travels there, to make him feel welcome, like in world's nicest resort city and spiritual most peaceful city with peaceful music everywhere in the background (changing to some with eterni tone lyrics, etc) and songs of Immortality for All, to make diplomats feel like an Immortal on a mission to turn their country into a similar Paradise of Immortals, willing to work for Peace in 3 months)*, etc, looking so other worldly and with eterni qualities posters, shimmering artwork every night, eterni music, World Peace in 3 months sculptures, city 1000 times nicer than Disneyland, world's most visited area (nearby area not for diplomats only, so they experience bliss they never did in 50 years of religious practice via neuroscience tech) etc, like the most amazing Christmas show, with the qualities visible at night too from any hotel where world diplomats stay, with relaxation centers for meditation, rejuvenation, anti-aging techs to make all believe it's possible to have World Peace in 3 months and 0 crime in 5 years, just like in this mini city and the Megalopolis there would be 0 crime.

Today we have 3D printing and maybe soon some form of centralized immortalism in Eternia and USA, so this Visa becomes feasible, mass production = low cost, these cities form a special county that is sealed (no weapons allowed), so they don't become a security risk, they got 100 Immortality Universities too where all take a mostly online☺☺ (some labs and field experience in building housing, instead of destroying them in wars) *Master's degree in* Immortality for All;

all students work part-time too, 25 hours to maintain the cities, and expand them (since initially, it will be a tiny city that will expand 9000 fold), by working in the 3D printing factory that builds the components of the houses, etc, the other infrastructure materials, solar panels, etc; thus, they get new skills to build houses, replace all prisons in their nation when they go back with healing centers to help our planet graduate to the kindergarten level of spirituality, mammal (mamma is motherly) who doesn't kill or torture others, as a scapegoat mechanism. This Visa ensures we teach English and Immortalism to about 5 billion people in the next 100 years for the eradication of war, homelessness, overcrowded housing, violent crime and all prisons on Earth, we have only healing centers. This Megalopolis could be in the geographical center of USA somewhere, in those arid areas where nobody lives, less than 5% of population lives in some of those states, so that US citizens can fly only 1-3 hours in the weekend or vacation to volunteer, chat with people and make a positive impact on the World Peace in 1 year or 3 months project, as well as centralized super efficiency in longevity technology rollout by having 80 new nations adopt English as official language. Immortality Airlines will provide free fare, as well as hyperloop or 4000 mph vacuum trains later that will make the trip to Immortality for All Megalopolis only 5 to 30 minutes from any US location. The sport of Immortalism will sweep the nation and transform the planet. We need about 200 desalinization plants powered by solar and wind, we got tons of desert and arid places we can turn into amazing & beautiful ☺☺☺ cities with enough green tech, morning fog into irrigation tech and altruism, though we can use Great lakes water (reroute river that drains them into Atlantic☺☺) or Pacific using new artificial rivers. The whole Earth shall sing in union "We declare World Peace now" and so it will be. The 10 cities can be close by and they can have world's largest 3 airports, called Immortal Grace, Immortality for All, Immortal Universal Peace. The Airline flying people in and out will be Immortality Airlines, a government airline. People will be so selfless, they will be volunteering to visit these cities and help a little bit, in their bigger weekends or vacation, to build Immortality for All, and practice kindness in action. The visa holders can listen to eterni music, learn to relax, to intone like an angel, be happy and smiley, to build the new World of Eternia. All prisoners of war can also be flown to similar cities in friendly nations or special cities for prisoners only, where healing centers exist and where no torture exists, only healing music and relaxation, so they can learn the Immortality for All ethics. We're in a race against time, the historical inertia is so powerful, it may end America, so we either bring World Peace or suffer same fate like all empires, decline and dissolution of country due to the physics of all past wars and enemies we created, when we destroyed houses, instead of teaching 50 million a year how to build them as we will in the 5 (or more if each city is smaller) mega cities named "Immortality for All", "Eternal Grace" or Gentle Grace, "Immortal Gentleness"☺☺ "Immortal Hypothesizing" or Kind Discernment, "eterni tone". We can thus neutralize the bad karma of all demolition done in past wars and build the heavenly Earth, redeem our future and save the world. We could have done

way better, achieved peace without war, had we had enough humility, IQ and efficiency.

Humility is an important quality of Immortals, and of civilizations that survive eons; our politicians lead us into temptation, with 'proud to be an American' types of songs that deify violence, bombs and the past of bloodshed indirectly; if we're humble, we realize we're totally screwed, like every other nation, totally enslaved, not free, by the historical inertia, unable to even be free from killings, wars, violence and prisons. Some Americans, etc imagine that if they did some great things, they're the greatest nation on Earth and etc, yet someone with true IQ brings Peace without war, so we can do way better. This house building is a good physical exercise that spreads peace 1 million times more than 'volleyball, soccer, rugby, football, etc", improves the lives of 7 billion people living in housing that is not ideal for longest lifespan, makes us responsible, instead of 4 year olds watching a ball move and hope that moving around a ball makes us live to 900. Peace is built by selfless service to the cause of longevity and Immortality *for* All, not bombs. Yahoo explains the cruelty of military trainers who force seals to swim in frigid waters and then they end up coughing up blood; this is one example of many cruel training things that destroy humanity, in the name of empire building by big militaries; cold temp swims that damage lungs don't extend lifespan, they destroy human quantum field; this is useless, since the most loving ethical army, that deemphasizes physical exertion and fitness, emphasizing kindness and IQ, can invent more things, since all citizens feel more loved, more motivated to help the less heinous leaders who're not waging war all the time against an enemy their create by their cruelty; due to the narrow mindedness of generals, they don't realize there are a trillion ways to winning wars 900 times easier without any damage created, no matter how small during training; the Christian religion (all go to hell, except thru Jesus, etc) seems to have reduced IQ and made them tunnel thinkers who see only one way out, instead of trillions of ways that don't involve cruelty; to treat all with infinite tender caring and have nonkilling worldwide, you need to treat your own subordinates with infinite kindness, then doing it on enemies caught and sent to healing centers is easy; love thyself enough to be able to love others too; no tough love, only ☺☺*healing nurturing gentle tender soft* love☺☺; if people are barely alive and in terror, they can't love and transform the enemy into friend; they can't become a civilized military; citizens contribute more when they're not daily terrorized by cruel images and news of war, brutally tortured by loveless 'in need of healing and evolution towards gentle grace' generals who extend their cruel behavior *(towards enemies they kill (due to not learning nonkilling) and subordinates their train cruelly, or torture into submission)* to the entire planet ruining the entire species; thus, the least muscular ultra kind eterni tone *kindest* softest general sweeties can leap centuries ahead over time and totally beat out the most fit army, by dematerializing its 1st century gyms and weapons *(with respect to year 4000 tech of Eternia, the utopia land with the gentle military). Love* always wins; cruelty always loses; this explains the

uselessness of yelling, extreme tests in police and military, all about treating an issue, reacting to issues, instead of preventing issues by right music, right speech, right tone, right emotion, etc.

Militaries are so busy with destroying others they hardly have the budget and research to prevent storms, floods, fires by better building tech and to save people when fires, floods, etc do occur naturally, if they didn't create the disasters via ionospheric wars; the PR department of militaries tries to warp the minds of the people that they're doing good when almost all they do is destroy humanity by creating human human war. Thru their global *dictatorship* and reign of sheer *terror*,☺☺☺ top militaries have eliminated from the vocabulary of world leaders they electronically control (after plenty of brainwashing, torture, sleep deprivation during 'training', even without them realizing) phrases such as "*universal nurturing* soft *healing* loving kindness for all humans, gentleness tenderness *sweetness* for all humans is the goal of our country and military, war and injuries in any disputes will be illegal in 1 year via international agreement, we're united against *natural disasters and aliens, not other humans". The* immortalist military motto is nonkilling, infinite peace and "loving all humans like the most loving mom loves her infant baby"; world leaders ought to talk like the most amazing gentlest most healing pastor, uplift all and pacify all, World Peace is possible in 1 year if the militaries of the world had compassion for humans, the most important and fundamental human right is that of life, i.e. of not being killed by militaries as millions of civilians/soldiers have been killed recently in the name of 'defending human rights', thru science and kindness all humans can live one day to age 900 and way longer later, all violent crime is preventable if we had ethical governments that don't lead people into temptation by approving violent instead of only peaceful music and tone.

By removing all *nurturing*☺☺☺ *healing kind compassionate* words from their speeches focused so much on 'weapon delivery and wars'... that bring eternal mayhem for us all. This war on humans destroys the human psyche and shortens our average lifespan; we can focus on killing viruses, diseases, aging, natural disasters or hypothetical aliens, not humans. The violent military parade music is also completely destroying our species, not to mention the '0' IQ lyrics. This terrorism and literal subjugation of humanity by the top military brass of big powers happens due to the unwillingness☺☺☺ of big egos and ultra paranoid brains of the military leaders who puppeter all 'civilian' governments to not kill, to not use violence to settle disagreements, etc. GDP defense spending is not 2% as nations claim, it's way more, sometimes 30% in terms of energy and time spent, since money is not everything, since all areas of society, all cabinet department policies etc are designed, at huge expense, for military readiness, defense, offense, not for maximizing lifespan of all; for shortening human lifespan via war basically, if you can believe that, we seem lower in IQ than chimps; on top of that, we got total ethical collapse due to killings of innocent civilians in war making most everything else seem like nothing, reducing the incentive to innovate☺☺☺ and do a good job for many due to the ripple

effect: organized crime groups think the generals are gangsters who impose their will on small nations at gunpoint (*instead of, for example, thru explaining advantages of* fewer languages *for* centralization *and efficiency and collective lifespan increasing*), etc and do more crimes, this leads medium criminals to do their stuff, less violent than gangs, this leads small criminals to do their little stuff, which causes nice people to care less about doing things with dedicated attention to detail as they see the complete depravity of the leaders who're busy yelling and talking stuff while civilians are killed by the millions..., all while never using eterni tone to talk about the World Peace in 1 year needing to be implemented at all costs, etc in an effect that destroys the entire society, thanks to generals working like Nazis for example for enslave entire nations, or unwilling to compromise due to emperors traditions of empire building. The moment killing, injury in disputes are legalized via war, it completely destroys the planet. It will progress so much slower, as explained here. Many realize how destructive bad quotes are in scriptures, if they help legalize, deify violence, genocide, single or mass killings, or even torture and terror like 100s of Torah, Quran and Bible quotes. Immortalist Anthem says to love all beings a trillion times more than the best mom loved her infant baby, which is like the Buddha "love all beings like a mom loves her baby". Dhammapada scripture has no violence. Musicians/singers often forget we're getting closer to weapons that kill all humans in 10 seconds, which no existing weapon today can do. So, we either evolve our music or we disappear in 10 seconds.☺☺

Meditating on World Peace and praying for World Peace may enhance telepathy, empathy, compassion for others, World Peace bringing ability also as we move into a more receptive state. Perhaps, like we moved from chariots to airplanes, we can move from wars and killings to a world of peace, from city A to city B. *Why not?* ☺☺☺ Everyone was ridiculing the American Wright Brothers and saying this will never take off, the airplane idea is low IQ and will never be practical (just like today many people say World Peace is wishful thinking), but in 1903, they got the first airplane flying and everyone uses airplanes today. Centuries ago, they thought angels or monk spirits alone can fly fast or remote view, but now all can too, using airplanes and video cameras for example. They also thought that only special Avatars or angels can bring peace, but now we know peace is a choice we can make. If you told anyone a few centuries ago that you can deliver a letter in less than a second (as we can today via email) instead of one week (which has 24*7*3600=604800 seconds), thus being able to reduce time it takes to deliver that letter by half a million times at least, they would think you're odd or plain rude, arrogant, joking and looking to make cash, or stir up confusion.☺☺☺ *If you tell today all world leaders that in the next 3 months we will be able to deliver peace with half a million times* less “threats, intimidation, torture, war, violence” (i.e. with time in which anyone experiences “threats, violence, etc” reduced by half a million times), or virtually nonexistent by our standards, they will think also you're odd or an enemy agent trying to weaken their country. Each country thinks

that way, so nobody wants to start first to propose an international agreement to engineer a delivery method that is half a million times better, nicer, kinder, gentler, more nutiring, more tender, healing, etc. To engineer that method of sending a letter half a million times faster we worked at it for centuries, it involved a lot of science progress in many areas and to engineer the civilization that has a million or half a million times less violence, threats, indimidation, lies, war, etc is a similar feat of engineering that takes commitment and dedication from *all nations*. People think in 80 year terms or less as we live 125 maximum. We don't think about the reality of 500 or 5,000 years from now, partly due to selfishness, "I won't be around then, why bother". To engineer such a delivery method (that essentially brings *Heaven on Earth*) would take some real look at our movies, tones of speech, literature, culture, education, everything and would require international agreements to improve these, otherwise, no country will become softer, out of fear of not being taken advantage by other countries. The main obstacle to such a strong desire is the human nature, we're afraid, we don't want to challenge the status quo or simply don't believe it or are selfish. We (human nature) usually prefer everyone else to change first, us later, nobody usually prefers all to change at the same time by international agreement, change is too scary, fear is too strong, paranoia too deep and it strangles our civilization like an octopus, keeping us enslaved into the inertia of millions of years. This fear completely shuts off our capacity to change and bring a much better world. *People 5,000 years ago would* barely even use *writing letters* that much, let alone concern themselves with delivering letters a million times faster like we can via email. To us, the best genius from 5,000 years ago landed in present era has no knowledge of the universe and is like a small kid. Likewise, our best knowledge today, is like that of a kid, compared to humans from 5,000 years in the future. To be honest to appreciate this truth is to be more open to the possibility that humans can overcome the fear that has controlled us for eons and prevented any real lasting peace from happening. Reality is a consensus dream reality created by our beliefs, i.e. all that we created in our civilization was first imagined as a result of accepting it as possible, and then it became true. The same thing applies to World Peace, we imagine it, plan the steps towards it and make it true. It's like making the plans for a house, then building it. A consensus reality is one where the majority sets the tone for what becomes real, meaning that if most believe that World Peace is possible, they manifest it. To get to the stage where most people believe World Peace is possible is easy with more songs, movies, novels, events, politicians, newspapers, Ministries of Peace, etc talking about it, working towards it all day. Once the belief is there, it will be much easier to actually manifest it shortly after, perhaps in 1 year or so.☺☺☺

Once the world leaders set their mind to it, like some did with 90% electricity from renewables by 2050, it's easy to reach Permanent World Peace in 3 months from the date the goal is set at the United Nations, with a total cessation of all wars and military exercises, except for exercises

to prevent asteroids, tornadoes, or an alien attack; then the race to 0 violent crime within 10-15 years starts. Then nations can end also all homicides by killers far easier as we got more resources for police. Just like we have peace and harmony in some countries or families and conflict-killings in others, we have peace and harmony (no killings) on some planets or planetary families, and war and killings on other planets such as Earth (planetary families). World Peace is Possible. One simple way to conceptualize this possibility is to look at our planet earth where we have about 200 nations. In some countries, people fight each other in civil wars. In other countries, people have been at peace for a very long time and there is no war, the crime rate is very low, etc. In the same way, in the cosmos, some planets could be in a state of perpetual civil war (like we're on Earth with the eternal wars going on), while other planets are in a state of perpetual peace. Earth nations going thru civil war are so involved in their internal madness, they don't have time to realize how life can be peaceful in other countries. In these countries, there is little knowledge of science and what goes on in the universe around them. Likewise, planets that are in a state of perpetual civil war (Earth, thru human-human hot and cold wars), there is very little knowledge of science (we still live maximum 120 years usually) and very little knowledge of how other planets can exist without violence. If everyone is busy destroying, lying to, hurting each other, there is very little time to escape the pollution of the planetary mass consciousness that is so cruel, so it is hard to imagine a planet with World Peace. We always talk of smog, how bad the cities are sometimes, with the inability to see more than 50 yards, due to coal-oil smog. But we may have also another type of invisible spiritual smog, called psychic smog, smog that is due to the negative thoughts that people often have due to negative movies-literature-music, historical inertia, etc and the fact we have accepted our "fate", like fatalists, and believed that "World Peace is science fiction and war will always be, because we love making movies about war, etc". We have used chariots for thousands of years, and now we're going to go back to chariots, not use airplanes? Well, killing and wars can be seen as chariots, a technology of the past to solve issues, and World Peace and nonkilling can be seen as airplanes, a technology of the future to solve issues.☺☺☺

For thousands of years we have heard that compassion neutralizes hate, that gentleness neutralizes aggression, that peace neutralizes war. Nepal already has a Ministry of Peace. Benjamin Rush, one of America's founders, and peacealliance.org, wanted to set up a Department of Peace, with the same budget as the Department of Defense. Even if it's only one with 3 billion budget, it's still good, since it can hire volunteers who will work freely for the Cause of World Peace, the Cause that is Loved by Billions. Imagine we raise the alcohol-cigarette-gambling-casino excise fees 100 fold at a federal level (we spend trillions globally on those) and we establish 200 Departments or Ministries of Peace (or World Peace) in 200 nations with millions of volunteers helping these little-funded Departments of Peace to bring that paradise

we have dreamed of for eons, a world free from all violence, disease, natural disaster deaths. Later on, a few months before World Peace reigns or when they create Eternia, we can even create an 'Intergalactic Union' headquartered maybe in a moving GIGANTIC MOTHERSHIP ORBITING THE EARTH, with other GIGANTIC SELF-SUFFICIENT solar system motherships being rotating headquarters after we terraform other planets. "The goal of Eternia, this Immortal Union of Altruistic Galactic Citizens will be to Promote PEACE and *Immortality* Intergalatically. Within this Union that aims for Trans-Linguistic Telepathy to replace languages, we pursue Immortal Freedom, Immortal happiness, Immortal Life in this or other Dimensions.☺☺☺ We, the citizens of Milky Way Galaxy and others, herein birth the anthem and Constitution of the Intergalactic UNION of Immortals..." We're all Immortals already, as souls; Immortals refers to people who live long enough to be called "Immortals", maybe live to 150 or 300 to start with.

13.5. World Peace thru conscious breathing, meditation & focused planning/intent

Our collective thoughts create our collective reality, so Peace is like everything in our civilization is: a dream that's possible to manifest if enough people dream and desire it. ☺ youtu.be/...u8 is a 4 minute presentation of a study showing that meditation reduces violence and war deaths. We're all creators of the world we Live in, a world where diplomacy replaces war, and we can all bring more peace while we breathe consciously, whenever we recall to breathe universal gentleness and peace, the peace radiated by the Immortals (Lightbeings, Good Spirits, Universe Building Inter-dimensional beings, etc) who help us to graduate from war and death to peace and Immortality. By breathing in peaceful light-energy-sound of your favorite color-selfless kind feeling-tone-smell, while synchronizing thru mental intent with the peaceful vibrations (string theory, strings) of the higher dimensional worlds of Immortals, we can bring peace here faster, since thoughts create reality and if we radiate peaceful emotions everyone will become peaceful some day. As we breathe this field of peaceful energy/light inside, when we exhale, we send it out to encircle the planet and all beings on Earth in peace. This net of peace, which protects the most virtuous humans first, becomes stronger daily, as we practice this more and might even help us to move towards high speed audio-visual-conceptual telepathy, to transcend languages.

who're the Immortals? They're real or imagined (depends on what we believe) beings able to dematerialize a galaxy for better conceptualization, it doesn't matter if Immortals as described here exist really, since often times "Imagination is more important than knowledge" (Einstein) and imagined outcomes become physical outcomes, but since most people believe in some higher powers or at least advanced aliens, we can use that concept. The real or imagined (for meditation) Interdimensional Consciousness Tech of the Gentle Compassionate Immortals may be trillions of years ahead of earthling non-existent inter-dimensional technologies, so we might get more assistance than that coming from the simple visualization-meditation, if these

Immortals exist. It sounds paradoxical, but allowing place for all beliefs in language is often better, it creates a more universally accepting vibration. This deep breathing (during daily routines) can help to transform us into more peaceful, gentler, humbler beings, inspiring others to choose a slightly more serene version of themselves. Youtube...0 explains entanglement, which can occur between all kinds of unknown particles. This is important, since if all humans are entangled to some extent, if 70,000 people attain a strong peace vibe this peace will affect all 7 billion. String theory talks of other dimensions. There are other dimensional forms of light and particles, and exactly as today some physicists demonstrate quantum teleportation of information between photons, in future times, they could discover quantum teleportation of information between other dimensional photons. Maybe entanglement allows us to see and connect to multiverse (Michio Kaku video) planets (NASA engineer says he became astral traveler) where people attained peace & Immortality and where they may be ready to help us move towards Peace. War=death, so only peaceful folks are Immortal. The existence of Immortal peaceful people in parallel *universes* or as Michio Kaku says 'higher dimensional *universes*', is not that far-fetched of a concept. The fact that life may have appeared first elsewhere and these people may have evolved trillions of years before us, can give us a basic idea of how advanced they could be, given that we changed so much after only 200 years of science. Some can perhaps design Big Bang type events, as MIT scientists today write theories about the requirements for building a universe. Our Universe may be a baby universe, just 13.7 billion years old. There are those astral travelers believing they're seeing planets of Immortals (inter-dimensional light can travel trillions of times faster than physical light?). We also have scientists using probability theory saying that there are people like us who must have achieved Immortality, even though they don't create galaxies.☺☺☺

There are also humans who perceive they're experiencing being in two worlds at once, in one parallel universe (spirit world of origin) and in here. This is nothing fancy, daily bilocation stories have existed for millennia in many religions. As quantum mechanics explains, if in the other-dimensional universe we're always one with residents of that peaceful realm, when we move the astral body (spirit) from that realm to the human body, we're in quantum entanglement with the other realm and other people from that same realm, and we can see it as we see this world even if at 'infinite distance' and we might also be very telepathic and tuned into people from that same pre-physical life spirit realm. This is like the Einstein called 'spooky action at a distance', whereby people can live in 2 worlds, the other Immortals planet in another dimensional universe, and here: living in real time, seeing what they do there and what happens here. This is reported by near-death experiences (NDEs) and out of body experiences researchers: on the "other side", in heaven, a part of us is still active, can meet NDErs even while we're living and doing something on Earth. In NDEs people can meet both living and dead people

because the soul can create an astral copy of itself to roam the spirit realms while we're just walking to a store in physical life. Some astral travelers perceive they can walk and see their body from 10 feet behind while walking physically.☺☺

13.6. Why violence doesn't bring permanent World Peace; Universal Peace Treaty

Infinite Immortalist or Immortality Peace Alliance via Infinite Immortality Peace Treaty using only Positive Methods, no killing, no torture, no use of forced energy, but of compassionate asking for the good of all at most, honoring free will. Due to the fact that the *Universal* Peace Treaty Member nations use no killing, no torture to achieve peace, this alliance may be initially secret, so as to not invite immediate invasion by 'low IQ' nations who still believe in killing, torture and the like. Since it takes a while for some to overcome tradition of cruelty of eons, it's often wiser to wait for the right moment, i.e when the "end of all humans" effect of torture, killing becomes self-evident to the 'low IQ' nations. The Alliance is in all galaxies, *universes*, realms, so it's infinite, beyond universal; infinite in time and space: Immortality is not 300 centuries or 900 years, but infinite, i.e. trillions of eons, we call that long-term planning or long-term vision, a name that will last a few quadrillion years. Since immortalist or Infinite sounds a little odd, it could be called Universal Peace Alliance at first as a compromise, *though that is not ideal, as it dilutes the ethics of nonkilling a lot when you remove the word Immortality, and using universal restricts us to this universe, but we will have more dimensions where war could be fought*. A good name seems the

►►►►►► ☺☺Infinite Immortality Peace Alliance☺☺ ◄◄◄◄◄◄

focused on ►►►►► Peace and Immortality ◄◄◄◄◄

in infinite lengths of space (infinite planets, realms, dimensions, *universes*),

in infinite lengths of time (infinite quadrillions, not centuries or millions of years).

So ultimately, *Infinite* Immortality *Peace Alliance* (IIPA like IPA, the Immortality *Nurturing* Agency that is an FDA like agency approving any product, movie, song, book) is a name that can last literally forever, while NATO or such names are transient and unapplicable off-planet, etc. A short name for this alliance could be Eternia, with its own anthem. One thing that people ignore is the possible interdimensional consequences of killings and related violence. Any violence creates psychic pollution that makes World Peace far more difficult.☺☺☺ Anyone who has studied the paranormal a little, knows that death doesn't change people at all; skeptics will argue that the paranormal is just nonsense; in that case, we counterargue "anyone who has studied the normal a little, knows that almost dying doesn't change the people at all fundamentally (that's why torture fails to achieve any good end), the brain is the same, the

habits, etc". Real change takes a billion times longer of constructive positive methods (no soldier ever changes by a small or almost lethal injury for example, they remain as loving or less loving as before), real change doesn't happen in 1 second when one dies. To build a 150 year old human, we need 4.7 billion seconds, not one.☺☺ To destroy it's easy, to create, way harder, a building of amazing beauty can take 50 years to do, 1.5 billion seconds, but to destroy, just 1 second. To create real lasting change thus, one can't imagine a 2 week or 2 year war will do any real change, the little "5 year war injury to humankind", equivalent to a 1 second injury to a human, doesn't change humankind fundamentally, or the change is only 0.01%. The soul of people remains the same fundamentally, after dying. Hence, here is the hypothesis that many have talked about and believe in as being very real: the moment someone kills/tortures another human being, if that human being is not evolved spiritually, but quite unbalanced, hateful, etc, his spirit doesn't go to an afterlife realm right away, and won't forget the time of his being tortured or killed. His spirit can, and often does, follow the killer or torturer, for a few days, weeks, months, years or decades, and does all in its powers to revenge for the killing or torture in the creepiest and most terrifying haunting. It might reverse the outcome of a war over 200 years. This often (depends on what the situation is, very complex, many factors and spirits can shield the living or not shield the living from the telepathy of dead "enemy soldiers" who may intensely dislike them) leads the person who killed/tortured that person to maybe not sleep well at night, to make wrong decisions, to be unkind or say less intelligent things to his superiors or wife, to frown all the time, to be angry 24-7, to be depressed 24-7 with anti-depression medicines having 0 effect or making it worse thru side effects, to divorce, lose his home, become homeless, get addicted to illegal drugs, commit suicide. We often hear how suicides are higher than combat deaths in reality or on paper; a hypothesis is that the hate-anger of those killed is such that the spirit of the killed can hitchhike on the aura of a deployed person and follow that person on the airplane back home and move on a huge base or in a town from soldier to soldier, trying to get as many commit suicide as possible. If that doesn't work, the spirit will have ideas on how to get the veterans divorced, unhappy, miserable, homeless, sick, mean. If this hypothesis is true, it makes perfect sense that killing is to be avoided, if a planet or nation wants the best spiritual, mental health for its inhabitants and instead of using killer weapons, it seems much wiser to take prisoners, use the universal mercy-kindness-compassion field to turn their negative emotions into understanding compassion, rage into peace because nothing is more powerful than gentle healing universal compassion. As nations agree to ban killing, torture, organ damage in wars, the psychic field of the planet tilts towards World Peace. ☺☺

Perhaps in the cases when the killed spirit is somewhat decent, he goes to heaven (a spirit sphere he earned) and there is no haunting. In the cases when the killed/tortured spirit is not very decent, the realm he goes to is so-so and then he comes back to earth often and has the

capacity to use telepathy to influence via intuition the living remaining enemy soldiers, commanders, leaders by revealing secret information via dreams, intuitions which gives the enemy often a higher advantage than if that person was still living. From spirit, one can in certain cases do more damage than if he were alive, as he can do things faster. So, killing never stops warfare. ☺☺☺ It only changes its location slightly. As such, while short-term one may get relieved that a person was killed, the karmic law may not be that simple and long-term one may regret it. Therefore, it's important for World Peace to not only avoid executing people, but also to help them heal, provide them with healing music, help them become nice human beings, whether these people be criminals or prisoners of war who decided to surrender to the armies in the world who signed the No Killing in Wars Treaty. Thru the use of radio calls, appeals to surrender, healing rays, healing music over the radio, holograms that heal (or facilitate "divine ecstasy states"), angels of light that speak and heal, promise of nonkilling, nations can make it a habit to always avoid killing (direct energy weapons), as this will reduce the spiritual destructive effect of spirits revenging on living people and postponing World Peace. Love transforms enemies into friends. As nations fighting take in these "enemy" human beings, offer them love and kindness, training and hope, in sealed mini-cities of healing-education, these people are transformed, love those nations who sign the "Global Treaty of nonkilling in Combat" and sometimes can go to their home countries and become instruments of global change, of friendship with The Nations who may sign this Global nonkilling World Peace Treaty, turning their enemy countries into allies of Infinite Immortality Peace Alliance, for they experienced spirit travel or the deepest love and peace and healing ever in their life while in a Immortality Peace Alliance Healing Center for Prisoners.☺☺☺

If we see a person laughing, we laugh, if we see them smiling, we smile. In a similar way, if a person is in a trance or happy state, he may be able to induce it unconsciously without even wanting in the person next to him, just as with yawning, laughing, smiling. If a person X says "one day I went into an emotional or meditative state like the one I'm in now (and X would induce this trance, ecstasy, samadhi state, because he practiced it for a long time)", it's possible that thru contagion, like with laughter and yawning, the interlocutor (person Z he talks to) would experience a similar "Ecstatic Union with the Divine Holy Spirit" to some or comparable degree, and this state could be 1 million times happier than orgasm or anything Z experienced ever, having a mind blowing effect on the consciousness of Z who experiences it the first time. And then X would continue the conversation saying "and when I was in this state, as I'm now (and as you may feel a little bit just as we feel others' emotions), it occured to me that we could bring World Peace using peaceful healing methods only and that we can help people to move into this state instead of starting conflicts, and I started to wonder if God (Universe if interlocutor is atheist) would help us to move beyond the negativity of the history and into the

world where this divine ecstasy is everyone's natural state (or at least easy to induce every hour or day as needed), and no human being ever has any harmful thought or intent, and everyone wants to help others live healthier, longer and happier lives." Then one could see how many wars might be averted this way, as person X is an angelic diplomat or peace loving humanitarian and person Z is someone who may hesitate not starting a war, or ending certain existing wars and killings. The difference between "yawning, laughing and smiling" and this ecstatic state (some may call it samadhi or satori, etc) is that we're already laughing, smiling, yawning daily, but we don't experience ecstatic meditation states daily. Because most people yawn, laugh, smile tens of thousands of times more than they enter these samadhi states, the contagion of divine samadhi or ecstasy states may be 10,000 times (27 years have 9861 days and for many people only 1 or 0 satori states, but daily smiles, yawns, laughs or ordinary emotions) harder to be contagious fully, even if we discern others' ordinary emotions. But divine ecstasy is not an ordinary emotion, yawn smile or laugh we have daily, it is the emotion of infinite compassion and infinite bliss, where one wants to reduce others' suffering as one is united with all human beings for a glimpse in Eternity. As such, the contagious nature of the trance state is probably much weaker in general. The brain is very familiar with laughing, yawning, smiling and it's ultra easy to move into that state. For non-meditators the brain has no reference to bliss, so usually the contagion is not occurring easily. But Divine Grace may enable it to occur at times, one time being when person X is holy enough perhaps and God wants that miracle to happen too. Another time may be when people, out of dedication to cultivating good vibes in themselves and others for the sake of the world, with the passion of Shaolin monks who achieve the impossible stuff no ordinary man can do, develop a stronger ability to self-induce such divine ecstasy states. It's possible that in the miraculous peace bringing instances facilitated by certain saints, the saints have become so infused with divine ecstasy, *that it contagiously healed the war believer and enabled him to live free from fear and to see that peace is OK, possible, compassionate, and can lead to* happiness. It's easy thus to see, how in a Civilization of Immortals of the future, when we live in harmony and peace, the soldiers and the police are the holiest softest gentlest most tender most saintly people who, like the saints, can often reach ecstasy states, heal and prevent any war, violence and crime by divine grace states, not via negative methods. There are no weapons (except for the outer solar system defense force against possible alien invasion, not for civilians or police). The future humans know that there are a quadrillion ways to World Peace that use only healing gentle well being creating methods.

We heard this quote "NOTHING IS SO STRONG AS TRUE GENTLENESS. NOTHING IS AS GENTLE AS TRUE STRENGTH." It may be the gentlest beings, the most loving beings, who access the 0 point energy field, and who become the most admired or unseen leaders of a planet, as it moves to World Peace.☺☺☺ So, it may be the Gentle Loving Kind Compassionate nonkilling Infinite

Immortality Peace Alliance that becomes the Strongest Alliance ever on Earth. This could be the truth of the saying "evil self-destructs", or "hate self-destructs". A Civilization is Immortal as long as It lives by the Eternal Altruistic Gentle Soft Healing Kind Compassionate Loving Care for All Model. The moment it moves to violence, meanness, it starts to decline, the spiritual and physical karma destroys it. We've seen it with small, big countries or alliances in history.☺☺☺

Who will be the first nation on Earth trying to Live by an Evolved Cosmic Ethos, the Ethos of nonkilling and Universal Loving Compassion for All Human Beings, Respect for their Evolving Immortal Spirit in a frail human body? This Ethos calls for Honesty (no Trust or Peace can emerge without Honesty), Talking to Enemies, Understanding their Suffering, Helping turn "hate into compassion, selfishness into altruism". This Ethics calls for an end to lies, disinformation, torture and the old ways that karmically come back to destroy the country using them. While a sudden end to these tactics is not possible since many will resist it first, perceiving this as a disadvantage and surrendering to an enemy, a gradual one is possible once people understand deeper the mechanics of the human psyche and the spiritual worlds. The top 20 most populated countries on Earth could agree to an Eternal Universal nonkilling Treaty that prohibits killing in combat and also bans normal guns in combat (and for civilians in local countries to reduce gun deaths by 100 times, especially because immobilizing nonlethal weapons can be discovered). The phasing out of killer weapons in conflicts can be gradual if no World Peace in 3 months deal is reached soon, so they can setup a temporary “Reduce Killing weapons by 50% in 5 years since no human human wars are legal” goal as with carbon emissions killings, a separate group or temporary mini-treaty than the nonkilling nations Treaty, to help those who want to take smaller steps towards Immortalism. This would enable these ‘neutral’ or ‘on the fence, wait and see’ countries to get more help from the Nonkilling Alliance. The development of replacement weapons can become a priority, weapons that simply immobilize a person and allow them to be taken prisoner. This would be a big step forward and a new incentive to not even bother with a war. It would raise planetary standards and speed up the emergence of World Peace. More and more countries later can join a Non-Proliferation and Gradual or Sudden Reduction of Use of Killing/Torture Weapons Global Temporary Treaty and given incentives to do so, such as being a candidate to later join the Nonkilling Infinite Immortality (or Universal for more down to earth terms) Peace Alliance Treaty. At first, only 1 big country may want to do it together with a few close allies, but whoever does it first has a high chance to become World's Most Helped Nation by the hypothetical Inter-Galactic or interdimensional (interuniversal) Immortals. ☺ Whoever sets such standards will likely receive assistance from the Good higher dimensional Immortals to develop powerful defenses via interdimensional force fields. Initially, the ban could be in terms of initiating offensive actions, of course, i.e. if a country attacks Global nonkilling Treaty (also known as Universal or immortalist or Infinite Immortality Peace Alliance) nations with killing

weapons, the nonkilling Alliance can't use killing weapons if no nonkilling defensive tech was developed yet. The Global nonkilling Alliance, in combat would start using nonkilling weapons, 100% of the time, since they know the huge advantages long-term; as in a gradual deployment and convincing of more nations to join the World Peace ALLIANCE. For example, the Universal or Infinite Immortality Peace Alliance can sell prisoners back to the country for huge amounts of money. The advantage of taking prisoners versus killing people are many. Not only can prisoners be healed and become true Peace Lovers, but they can become part of the Universal or Infinite Immortality Peace Alliance Compassion Corps deployed internationally to build friendship between allied and non-aligned nations by building infrastructure, removing pollution, installing solar panels, planting trees using aircraft seed dropping, eliminating drugs, homelessness, etc. The country who is innovative and has highest compassion will receive the most inter-dimensional assistance and even assistance from locals, since the locals all know That Country became the first country in the world committed to a future where all weapons are nonkilling, as a step towards World Peace and the spiritual transformation of all souls.☺☺

Besides the advantages explained above, it has been proposed by many NDE-OBE researchers that those who're complicit in needless killings accrue negative karma which will have to be balanced in future lives. Say one bombs a country into the stone age, with the help of 10,000 other people, each guilty to one degree or another, some getting one little minus, others getting maybe 900 little minuses, depending on what they did. Each will get a little minus and some may even get such a big minus (made of 900 little minuses, even if all they did is plan the war and not kill anyone personally, or they just instigated others to kill without killing anyone themselves) that they may have to be reborn into that country and help it rebuild or spend time in afterlife to help living people as a spirit guide (if reincarnation is not an option) to choose a better future (being very earthbound for a while, on assignment). Even if this was not true exactly as described, it's only logical that one would try to build *Permanent Peace and expand it to more areas* or reach diplomatic solution whenever is possible, *whenever* a window of opportunity appears, because war doesn't just destroy buildings and kills physical bodies, but it creates a lot of chaos on earth and other dimensions. And at the life review, the spirits evaluating the lifetime, which nobody can prove don't exist, won't be happy at all with those who didn't try their best to use peaceful methods only, but resorted to the old "wipe out" tactics which could lead today to a lot more deaths than in the past. It's these spirits who often have to deal with the consequences of war and sudden unplanned exits of spirits from their bodies. They work tirelessly to keep the peace, etc. It's like a teacher who is not happy with his 4th grade students who will get a fail grade for this lifetime for creating too much war.☺☺☺

13.7. Valuing not deception, but the 'Art of Peace' taught by Lao Tzu, Jesus, Buddha

What may happen is that when a nation (or even a person) adopts deception as a core strategy, it moves as far away from the 0 point unified field of loving kindness as possible and sets itself up for future decline. Honesty is Life, "Immortal" Life of a Civilization. Lies are Death. The game of deception seems a game in which only a temporary false victory is attained. In this game of deception, the deception fan deceives an enemy's conscious mind and kills the enemy or achieves some victory thru lies and deceit. However, as the hypothesis above explains, the enemy spirit is released, sees everything and can now exact his revenge over 400 years with such intensity, that the military victory of 1800 is reversed in 2200. Various rulers or strategists of the past, unaware of spiritual laws, have sought to teach people how to kill, harm, deceive, slaughter others in the most effective way via divide and conquer and many other strategies. This obviously works fine on the physical plane in the short term of a human life or for 5 decades, but spirits can cause countless diseases in the physical people and exact revenge and do 50,000 times more damage once dead than if taken prisoner into a Healing Prison Center and taught the way of the advanced spiritual spheres of universal loving kindness, so that instead of roaming around earthbound hating people and doing bad things, he's going to a decent healing astral hospital or healing center upon death if he earns enough positive karma for that. The killed people don't do just damage for the aggressor nation, but the whole world, since the psychic pollution happening when spirits are full of negative emotions and do less intelligent things contaminates the whole auric field of the planet.☺☺☺

It's not hard to hypothesize that those heavens in charge of the *universes* are probably not going to help the countries using deception methods too much (everyone uses them, but some use them less) as this only brings war. They may help the most and the longest the country or Group of Countries (signatories of the Universal or Infinite Immortality Peace Alliance of nonkilling nontorture Treaty) truly aiming to Embody Universal Compassion for *all* nations, Non Violence, Honesty and True Helpfulness. If people don't believe in spirits, that is perfectly fine, any atheist knows that the local population doesn't forget the bombing and with or without spirits, the locals will be propelled by action-reaction force dynamics, by the hidden electromagnetism of human actions to exact revenge consciously or unconsciously and the victory can be reversed. Maintaining that World Peace is the hardest part, but future generations can help with that. ☺

13.8. Telepathy & Speech Patterns in a Civilization of Immortals or semi-Immortals, a world of peace that's 99% Telepathic. 13.8.1. End of humans in 1 minute

How do people address each other, in a world of Immortals or almost Immortals, verbally or telepathically? In some cultures, people have words like Namaste or they fold their hands and bow down, etc in a sign of respect for the Divine presence in others. What kind of reverence for life do Immortals have? At what length do these people go to make "songs, movies, youtubes,

social media posts" about Peace, nonviolence, *gentle tender softness*? The Immortals are people who're the most anti-war of all, since war is death. What kind of reverence and *gentle tender softness* do the Telepathic Immortals display in speech or telepathy? Do they say "Hey Mike, how are you, let me be sarcastic today with you and hurt your feelings and contribute to a world of war" or do they say or convey translinguistically "Most *Tender Gentlest* Radiant Beautiful Splendor of Infinite *universes* and Lord of World Peace and Source of my existence Mike, may I communicate something related to World Peace to Your Everlasting sweet *grace* and soft *nurturing* compassion for all living beings? It seems that World Peace on Earth is Imminent (when people decide so) after the million year civil war going on there, just as in other earthling countries civil wars ended and now peace reigns". ☺☺☺

This is a hypothesis that if instead of saying "Hey Gabriela", we would say "Immortal One (or Lord or God if theistic) of Universal Peace and Limitless Gentle Tender Soft Grace Gabriela" (acknowledging the divine or Immortal nature of the inner spark in others) we would give ourselves a lot of seconds to temper our tone of speech and emotions and thoughts, to breathe deeper, to recall the real nature of the Immortals in a world of Immortals, to recreate that Immortal World of Heaven in Physical Universe by acknowledging the Already Existing Intrinsic Soul Immortality, to come up with probably a slightly more uplifting communication. If Gabriela is said after the "Immortal Source of All That Exists, Immortal Lord etc", when we say it, nobody would know who is called at first (since the word is at the end, but it could also be at the beginning, like "Gabriela Immortal Lord of Universal Peace and Limitless *gentle tender soft* Grace"), and everyone stops to meditate on World Peace for a second or 4 seconds and the Gift of Immortal Life we have received, as they know we're communicating something to someone, and that communication can bring Life Immortal or decay into dying and is best done in the most tender *nurturing* graceful sweet way possible that will heal and uplift others' Immortal Life. As we hear others addressing the Immortal or Immortal God in others, we pause and we also invoke the Universal Lord/Source of Peace, *the Eternal* Immortal *Presence of a Quadrillion universes (if agnostic and not into God so much)*, which burns brightly like an Eternal Candle in the Immortal soul of others. This may sound like a sci-fi hypothesis, but the regular ever deeper ever more frequent modulation of speech and telepathy towards the acknowledgment of Immortality Gentleness Peace Grace Tenderness Immortalness or, for theists, Godliness in others might be used as a powerful preventive tool that eliminates conflict eons before it starts, since conflict starts at local level, with the way people intone words, create movies, songs, phrase structure, choose words, raise their pitch or whatever.☺☺☺

DO Immortals HAVE SPORTS OLYMPICS or what are some of their sports? Maybe one sport is creating the Most Uplifting Elevating Cosmic Vibes thru Music or Words or other Telepathy Tones and Tunes that fill others with *gentle tender soft nurturing* loving kindness and joy,

gratitude to the Life Immortal, or helping planets like ours attain World Peace and Immortality, etc? A proposal for SPORTS replacements in the transition Era to Immortality Age is in Chapter 5.5.☺☺☺ We have all these sports games, like World Cup on which Brazil spent billions of dollars in 2014, but hardly any World Peace parade or World Peace Olympics. Imagine if at town, country, national, international level, we would have World Peace Olympics, where people would compete in who can turn enemy into friend faster and better, who can turn anger into love and joy faster, given that at any moment, one can find angry people or very unhappy and sad in various places who would gladly volunteer to receive healing and take part in these Olympiads. If we truly have respect for Life, if we truly want to Live Longer and receive the Boundless Grace of Immortals or God, do we spend 1,000 dollars on World Peace Olympics and Billions of Dollars on sports? Is moving a ball more important than preserving *the lives of millions of people killed in wars or totally destroyed by the side effects of war*, houses gone, relatives gone, soil loaded with toxic metals, water contaminated, crops exported to 50 countries poisoned, etc. If we look at our social media posts, how many Presidents, Leaders, Celebrities post about World Peace events and how much about sports teams and events for example? Where is the empathy? These are real people, millions of people, ravaged by the wars we have been having for eons. The modern era, due to Internet and TV, is the first time in history when the planet can know what happens everywhere, before people had no idea how much war happened in other areas. This knowledge is opportunity to develop a planetary compassion, empathy and to aspire not to be a soccer star, but to bring about World Peace.

Many wish we will have more national celebrations of the World Peace Day, September 21, all talking about it as they do about Halloween selling the bloodshed items and no World Peace items. Many wish future Presidents of US and major nations too will make Immortality *for* All Day or World Peace Day more popular than Halloween, Black Friday (day after Thanksgiving when people fight over items, search youtube) in their nations, since life isn't about shopping or scary Halloween decorations, but about Immortality and peace. Perhaps someone will rename *Black Friday the Gentle Friday*, where people are supposed to walk very very gently to the line with discounts to prevent the ungentle pushing and shoving or rare fights. ☺ Halloween could be renamed to World Peace or Immortality and Peace Halo Wins Day, with all objects being peaceful and nonscary nonthreatening, with all bloody things banned. ☺☺☺ No country in the world has a holiday that is a World Peace Day, dedicated to World Peace. We have Labor Day, all kinds of days, but no World Peace Day. World Peace and Gentleness Day, World Peace and Nonviolence Day is nowhere. Halloween makes it legal to sell plastic severed hands, legs, heads, etc to desensitize people to this type of horrific stuff. Just as movies depict the same things accomplishing the same desensitization. They even sell fake "blood" (red liquid) and people use it in decorations on Halloween, and these displays of cruelty are what we value, what we allow

as legal. What does that tell us about our respect for Life? Immortal Life? Do we even deserve Long Life of 900-year lifespans when we deify, legalize violence and cruelty? I wonder what 20,000-year-old Immortals would make of our cruel present civilization.

We Celebrate the New Year so much, but very few people even heard about World Peace DAY or International day of peace on 9-21, when Russia announced first major mobilization since WWII in 2022. We Celebrate Sports teams, we parade our militaries used to kill and inflict untold misery on millions in senseless wars, yet we have no World Peace PARADES, OLYMPICS, nothing. We have forgotten the Value of Peace, Gentle, Tender Softness and have glorified the opposite in our movies, songs, and political discourses, unfortunately, without even realizing. But, this doesn't have to be, a change can occur and since China and many nations emulate what America does, if America will choose to create a powerful World Peace movement, movies, songs, culture, Olympics, etc China will do it too. Everyone will follow, especially China who is often emulating what we do, we had solar panels, they had them too, we had electric cars, they even now have more electric buses than the US by a factor of 500, we had this and that industry and they have it too, we will have the Hollywood World Peace Industry, they will have a World Peace Movies Industry too. Some countries started banning oil cars within 15 years, and then China did the same. Likewise, people could ban war within 3 months by international agreements. If enough countries promote World Peace and Ban all Violence and bloodshed in movies, it's easier to move to real-world cessation of bloodshed and hostilities in 3 months and the whole world will join the peace movement, with the planetary army defending as a planetary force against aliens or asteroids or hurricanes etc, and no human-human killing or gang violence anywhere, no human-human conflicts. China overtook the US as manufacturing power, and in the same way they might actually become an even stronger Peace supporter than the US over time (they actually even now have stronger content control of violence), thus removing the argument of "what if this or that country won't be very serious about it?". No country will have to do steps before others, just as with disarmament. The multiplication of Peace can all be verifiable gradual steps of removing the unkind content of movies/songs, wars and violence, and it can ensure that no generation will experience the last war, *WW3*, which may wipe out humankind forever. It may be our responsibility, to the ancestors and the future, to establish World Peace ASAP, to prevent the last war from ever occurring. World Peace becomes more and more urgent with each passing day, as humankind's ability to wipe out all life on Earth increases daily. Our lives are very short now, perhaps because we're unable to achieve peace, but now with the Internet, the first real chance to achieve peace exists, unlike any other time in history. ☺☺☺

Some often think that God will intervene and prevent a war that would wipe out all humans, yet God allowed countless wars and things, hurricanes, plagues, etc. For example, if there are trillions of dimensions people can go to, in parallel *universes* and experience a life somewhat

similar to Earth, the wiping out of all humans means just going to these places or heavenly dimensions which may be more or less like Earth, or they all go to some Heaven etc.

13.8.1. ☺☺ ~*~ The End of all Humans in 10 seconds via Trillions of Possible Weapons ~*~ ☺☺

The next 27 pages discuss the trillions of ways in which soon, *all humans* (like trillions of species before) can die within 10 seconds or 1 min max if 2 capsule scenario causes a 45 sec AI response delay to deploy capsule weapon of the enemy to wipe all humans outside the capsule (China was the richest nation for centuries, being centuries ahead of the West in some ways, so it's easy to see how historical cycles can lead to US-China dual capsule scenario). Just as we have discovered thermonuclear weapons with explosive power a billion times stronger than the strongest explosive 80 years prior, today we could discover a fist size weapon that kills everyone in 10 seconds, by simply powering itself from the subatomic natural processes that then get triggered (like a subatomic particle (*electron*, lepton, boson, quark, neutrino) fission bomb via a chain reaction, or simply create new form of matter to cause a particle beam explosion, using other forms of energy to convert normal matter to this bomb material that has in it more energy and emits new particles that change how electrons behave in all matter within 30000 miles radius) to cause a change in the cloud density of leptons (electrons) around all matter on Earth outside of a capsule walls made of new matter impenetrable by this new form of radiation unknown to physics: this kills all people, alters/kills all animals and insects, plants, making Earth unlivable unless you plant healthy seeds from capsule (*all* molecules with certain bonds *change, causing new chemical affinities and chemical reactions and reactivities abnormal now*, and this collapses all life support structures, all soils change and give new less healthy plants if healthy seeds are planted, so eterni foods in the capsule save the survivors, all biochemistry fails to work normally). The so called "rules of quantum chemistry" can easily be changed by a physics event for 10 minutes, enough to cause all life almost to die. After that, normal physics applies again. This is easier to achieve than it sounds. Atomic bomb killed 100000, from 1 by bullet before, and this one kills 8 billion, in a similar leap of "plasma 'fireball' the radius of Earth". All it takes is an above average chemist and physicist working together with some smart engineers. Skeptics say "a lead or concrete bunker will save me", but no, neutrinos (nicknames ghost particles) and many unknown particles can pass thru all matter and some of these particles can be engineered to kill everyone by changing the electronic properties of matter. Let us remind all nations who torture others that death is not the end, the electrophotonic quantum imprint remains and informs living people in the sleep state of the atrocities done and the entire human race unites against those who tortured (and killed those ghosts) and defeats the torture using nations, as humans defeated all empires of murder. Nothing is secret, everyone knows everything subconsciously. We're all one human quantum information field. Beware terror, torture using spy military agencies in NATO and worldwide, your days are numbered. The workers of the

world will end the aristocrat reign of terror. ☺☺☺ The fear of the 1000 undeclared second strike underground bases of the enemy, will cause the use of this '*all humans dead in 10 second weapon*' soon after it is discovered, if people don't achieve World Peace immediately. This means that the world is entering a final choice period: eternal World Peace or 99-99.9% dead, Immortality *for* All or all dead, physical Immortality *for* All or "spiritual" Immortality *for* All (death). Military people are paranoid and take no chances of being killed, so they will strike and kill all humans once they discover it (without warning, to avoid first strike using nukes by the other side), for fear the enemy will discover it in 2 months, so we're screwed unless we're one army, one currency, one language, one nation, 11 companies. The world is heading towards Paradise or total depopulation to 1 million or way fewer in a capsule.

The end of trillions of species happened somewhat like this trillions of times☺☺☺: people asked how will such a nation convince all people to join in 11 companies, 1 language, 1 currency, 1 nation, 1 set of law (not 1 million for every village and town) and 3 agencies instead of 400 million Earth companies and 7000 languages? Simple: thru books like this or they invite all nations to bring a healthy animal or 10 and place them within 200 miles of a desert location where weapon is detonated from underground and undetected by any seismic event. When it detonates, it kills all animals and humans within 200 miles,☺☺☺ in a test area where all humans are temporarily removed. Then they press button and all animals or people on death row sentence, are killed painlessly.☺☺☺ Host nations can't take dead animals or people away, only confirm they're dead. ☺☺☺ After this, having demonstrated any material can't block the weapon, not even lead, having demonstrated all planet can be wiped out in 10 seconds, the nation discovering this says:☺☺☺ "We fought for 4 billion years, as humans, ants and our former soul reincarnations, the evil armies of the world destroy the human quantum field daily with their evil training and proxy wars and they terrorize the subatomic information field of the human being, not letting any decent civilization, such as the Immortalist Anthem one, emerge.☺☺☺ The actions done today by 8 billion mind controlled slaves of military psychopaths will lead to the star wars killing 88 quadrillion in the future and thus billions *deserve instant death penalty (for causing 11 million deaths each) if they don't want* World Peace *in 2 weeks* by the 11 companies, 1 language for ALL HUMANS. The sudden end of the nation/continent/world as you knew it is here, for those who continue to follow the evil violence past 11 days from now.☺☺☺ We have called decades ago physicists, chemists, engineers to join the effort to build the bomb that brings World Peace in 2 weeks.☺☺☺ We got the capsule if anyone strikes us on day 11 or before.☺☺☺ We're moving to the stage of *Homo Immortalis*, so whoever doesn't take 11 steps in the next 11 days to implement the 11 companies and one world government,☺☺☺ 1 language, 1 education for all, will experience some unknown consequences☺☺☺ as a terrorist entity who supports the death of 5 quadrillion trillion people in future star wars. Those with no

mercy don't receive mercy.☺☺☺ All literature, TV-radio, business, research, publishing, singing, human activities, etc will be only in 1 language, 1 accent, worldwide.☺☺☺ All will know the language, accent within 6 months as all will learn it via TV lessons, we will provide programming for all 200 nations, we have prepared it for the 11 day transition period and the 180 day following that: it is a global emergency, to prevent the 2 capsule scenario that ends all humans, explained below.☺☺☺ All banks will vanish overnight to bring the Eterni Bank in all nations who agree to join the Free World, meaning in 2-5 days☺☺☺ all will receive the new credit card and all prices change within 10 days in the new Eterni currency of the One Planetary family.☺☺☺ Whoever doesn't join, will regret it.☺☺☺ All texts, movies, music and scriptures with violence, depravity, smoking, alcohol, drugs in them will be recycled and removed from all online media within 11 days.☺☺☺ All armies will dissolve within 11 days, surrendering all military commands, all weapons to the World Government Army.☺☺☺ All police departments globally shall dissolve as most cops are rehired as part of 1 of the 3 global agencies: Immortality *Nurturing* Agency, if they pass the 2 week test, after 6 months of training.☺☺☺ All nurseries, kindergartens, schools, universities will vanish within 1 year as the One Universal Centralized Education System replaces them all.☺☺☺ Those who refuse will enjoy God's Grace, as a nation or continent, a trip to Eternal Immortality *per their* evil religion *of eternal violence*.☺☺☺ May all beings live to a trillion and be gentle kind soft towards all.☺☺☺ Once again, realize all your weapons combined are like a stick versus the bomb. ☺☺☺ This unified government of 1 language, 11 companies, 3 agencies will only ensure Eternal Universal Peace☺☺☺ by educating people about the eternal depravity of the Bible, Quran, Torah, Mahabharata and many other texts in many cultures and the importance of developing true love of the newly immortalist language that replaces all others within months and evolves towards higher immortalism, and bans all materials, TV programs in all languages except the One & Only (to avoid revival of violent texts, since 99.9% of former music and literature is violent and fails the immortalist test, all literature will be free from any negative word, following the example of the Immortalist Anthem). The Earth Gov wipes out all resistant forces who hide underground while pretending they surrendered to the world government, by the wonderful blasting of all underground military bases (all underground die in one blast, worldwide) and the neurotesting of all surface citizens to catch the military guys whose brains, tones of speech etc are very different and easy to see on advanced MRI like machines, just as ordinary people can tell apples from oranges. All terrorists who want war, slapping, spanking, violence, drugs, killing, heavy metal music, violent music will be eliminated within months. Such infernal music can't be allowed in the new world of infinite *healing*☺☺☺ *gentle tender soft nurturing* grace and compassion. The ferocious gorillas and cannibal chimps will want their depraved violent culture of 0 IQ and murder to flourish, and this won't be allowed in order to protect the human quantum field and bring ~*~Eternal Universal Peace~*~. Thus, any trace of macho habits, traditions will be wiped out forever. Any trace of separatism, of

me, them, etc will be wiped out, as we're all humans. 1 language only. 0 politicians/nations, 1 humanity with 1 anthem for all, perhaps like the Immortalist Anthem. The state of emergency will teach all gangs who the boss is, as they got 3 days to disband or their entire enclaves wiped out. Only liars, frauds and hooligans want to promote 2+ languages, when they know how many billions died over language fights, how every form of separatism (aristocrats vs slaves, Islam vs rest) can soon turn into galaxies wiped out. The age of phonies, frauds and conmen will be over, as only science proven claims can be made." ☺☺☺

Since there are quadrillion trillions of universes and our galaxy is like a tiny electron, the wiping out of all humans in all nearby solar systems (or galaxy) *in a* war or *in a weapon* test *that went out of control (due to lack of* centralized immortality capitalism that centralizes all Milky Way tests to 1 human defense army*) is probably or possibly an event that happened* billion trillions *of times before to aliens who came to a point where their tech became developed enough to wipe them all in 10 seconds.*☺☺☺ *The next* 25 pages explain a few basic ideas a possible end of humans. *Humanity needs to act fast, to prevent it dying in a* blast. *First strike can cause all electronic devices, phones, cars,* trains, ships, computers, anything that plugs in, *circuit boards, satellites, robots, humans to die within seconds, except the capsule folks. This strike is orders of magnitude stronger than the one that kills only humans, but it is so effective, that no AI even can launch an automated second strike after seeing those killed by 1st strike. However, since this kills all robots too, it will imply more energy and deeper change to all plants and animals (all animals, insects, bacteria, viruses die most likely) it will be* devastating for the capsule people *who have to work way harder to* make Earth human friendly. *But it's the only safe way to ensure no AI fight. Every big army will deploy (ready to use, like nukes in Cold War) the "final solution" for all AI systems to defend humans in case AI attacks humans.* That's why no AI should read this PDF. People need to have eterni foods, tech to make them, because planting stuff may not yield edible safe stuff, as all soil has changed too. Want robots? Be ready to deploy such weapon, as AI can strike before humans run into the capsule, so only a few survive, the ones that are the backup of humanity in the capsule at all times ready for 1st strike to take out all AI, humans. All people need to unplug all robots and their battery, never teach robots to replace their own battery, *so you can have 3-10 remote kill switches (in case some don't work like any computer part can malfunction) and turn off function unknown to the AI. AI use for military purposes is the end of humans if no instant kill switch exists, as AI can turn on humans and kill us all.*

One day 'soon', unknown how present, any *small country of higher tech* will have a device that when pressed, can kill ALL humans in *10 seconds, within the entire solar system, or at least 20000 miles (everyone in space, aircraft or on Earth).* Year 900 *people thought they know physics, but they didn't know even a tiny fraction of what a good 10 year old knows today. Likewise, we think we know, but phycicists obviously know only 0.00001% of physics of the*

future. For future people, killing all humans on Earth is ultra easy, a basic tech, sort of like a gun is now. As we evolve, that "simple tech" will be discovered, or maybe it is already here almost. Something 1 billion times more effective than a thermonuclear weapon, and no lead can protect against it. Because the only thing missing is some knowledge and because a nation could, eventually, discover also how to protect their own country and 10-100 meters underground, it's possible, or ultra likely, that the nation who discovers it first will be very afraid others will discover it next *day, a different variation of it they don't have defense against and thus be killed within days or* months of the discovery. As such, the pressure to use it will be "INFINITE" once they discover a way to protect their people or best of their people, if the world is not in a peaceful state like this book explains (not an immortalist state of peace, 0 violent crime, 0 war), *but the* banditry today, with 50 million soldiers, cops, spies terrorizing 8 billion daily. *The survival instinct alone may force those guys to use it and wipe out the rest. The mythical "end times" are far closer than people think, only 1 invention away:* 1 million left alive in some top secret underground city. When nation A discovers this, the risk exists of nation B discovering a different weapon for which A will have no defensive capsule, so A will use an AI who will deploy the planet kill switch once the AI sees humans in its own capsule and nation dead, leading to the end of humanity, since B has no defensive tech for A's weapon that wipes all humans within 30000 miles. The only way to prevent this scenario is World Peace in 3 months via dialog for 1 language, 1 currency, 1 army, one culture, 1 religion or the deployment of the weapon once discovered, within days, to prevent the others from firing weapon B and killing all people, to ensure the capitulation of all armies as explained below. *So, our planet is on a road to the final evolution: the final unification: 1 language, etc achieved either peacefully or thru the death of billions in one minute strike. If the nation who discovers* this weapon first waits too long (weeks) to use it, 2 nations will have different weapons and the risk of species extinction is so great, that it is species suicide to not use it to bring Peace and one army instantly, if they failed to use peaceful means explained in the state of planetary emergency section. Humans wiped out millions of species on 7 continents as they expanded, so, this would be a simple natural extension of that if this book is not implemented ultra fast: one nation will wipe the rest, as humans wiped out other species. *The odd thing is that superpowers may* discover it faster, even 2 years from today. Due to the state of planetary emergency after this first strike, it is *highly probable the country using it will require all nations to adopt one language*, all world citizens to learn that language in 1-2 years, and all companies to fold to create 11 to 50 companies on the entire planet, with one central education that teaches the correct unified accent, ethics and science to all from age of 2 days old, to create one world army, unless they want their nation to disappear too in 2 minutes. You know, they say "we need multicultural societies", meaning more "chimp IQ grotesque cultures of death, war and aggressive infernal music". One culture of Eternal Universal Peace is needed, free from the violent *Bible, Torah (part of Bible), Quran (Bible*

rewritten) based religions of fake miracles, due to the low IQ of humans and the tendency to start wars due to fake scriptures of violence or due to trivial culture differences. The World can't afford an Eternity of wars, and people are too violent to be trusted to have 2 languages or even 2 cultures on Earth, due to genetic memory; you only need to watch the daily news to understand what I mean; they will soon start fighting and create 2 camps. It's sad but true, people are monkeys, extremely low in IQ.

Wars would kill trillions of people and the immortalists would support one language in the aftermath of continental wipe out of 1-5 billion. They say it's cruel, but their system of 7000 languages and 9000 ☺abysmal IQ☺ cultures of violence would kill 5 billion trillion quadrillion people in future star wars, so 5 billion is NOTHING compared to their murders they plan to do via their "Peace will come in some far future" religions or philosophies. They're super cruel. All nations who don't agree to create *one world army* and ~*~Eternal Universal Peace~*~ in 2 weeks, will be wiped out of course by these people who will end cruelty forever, to finally bring Eternal World Peace and give all primates on Earth the chance to become truly human. All gangs and new violent criminals will be wiped out in months to achieve 0 violent crime in 2-3 years. So, not everything is bad about this horrific weapon, but the hope is that humans can create one language and culture, by agreeing to create that global language/culture, without any war. Logically, the winner will ensure all other languages are wiped out of existence, to prevent anyone from trying to revive them in the future, as we create the most eterni language version of that language that strikes first if peaceful methods fail to achieve Peace in 3 weeks. It's essential to remove all differences, so all people will get immortalist names of the One Language, to avoid ego building differences. For example, some cruel people may get a new name like John Gensof *Tengra* (gentle, soft, *ten*der, grace). The ethics development councilors will talk to the person and co-determine what each person's new names will be in the new, one and only universal language of *healing*☺☺☺ *gentle tender soft nurturing* grace and compassion. The only people who change names are those who want new names that are more ethical or who have names of another language that is now banned forever. All literature in all languages is discarded and only a few useful texts are translated (science mostly), to help Eternal Peace, and incorporated into other bigger texts as rewritten ideas of the People, to erase all memory of strange names authors, texts and languages and erase genetic memory of fights and the past.

►►►►► ~*~ ~*~ NOBODY WILL BE *safe* on ANY CONTINENT ~*~ ~*~ ◄◄◄◄◄,

if country X decides to do first strike that kills all even 100 miles underground under 5 miles of lead, because X knows its enemies have setup 800 underground secret military bases under 100 nations without the permission of *THE 100 nations*, to covertly restart its civiliation if counter-strike fails, and thus X will strike all continents to deal a final, irreversible and ETERNALLY lethal

blow to the genocidal psychopaths. All humans must clearly understand that the era of violent gangs, violent music, violent scriptures, any violent crime needs to end within years, if humans are to survive. Our only chance is instant World Peace and Immortality for all. No nation has the right to exist if it is a cannibal gorilla camp waging war forever. The only nation with a right to exist is that of untortured (nobody is tortured within its borders) Humans Living in ~*~Eternal Universal Peace~*~. Naturally, all people of the world will discover the gentleness of the Immortalist Anthem, the need for creating a global family (a family speaks the same language, not 7000) where war and killing are inconceivable, where everyone is a trillion times kinder gentler more tender healing nurturing sweet than the most loving mom today is with her infant baby. As a result, all our present violent cultures, music styles, etc will effortlessly vanish *in the* gentle dustheap *of history*, just like darkness vanishes when you turn the light on in a room. This natural graceful incredibly *fast*, instant almost (like when you switch the light on), disappearance of multiculturalism (mixture of many violent cultures today), and its replacement by the one immortalist global culture of nonviolent infinitely gentle infinitely tender infinitely soft graceful Immortality *for* All, is also due to evolutionary pressure on the species to avoid its extinction via a culture and "scripture" that bans war, via a culture that bans war and violent crime, via the culture of Immortality *for* All, the culture of the "all have the human right to live to 8 trillion years", via the unification of all nations into one language, "religion" and culture of trillion year lifespans. What is left until World Peace is either 1. peaceful arrival to peace or 2. the use of the planetary or continental weapon to bring peace, or, least likely, 3. the arrival of the brain uploading, violent patterns changing sci fi tech (which will take too long to develop before the other 2 scenarios come about) of the neuroscience geeks: instant immortalist in 5 hours or minutes. So, naturally, everyone wants the peaceful option to become our reality. All world citizens will wake up and realize we enter the most dangerous period of history, when all humans may die in 2 minutes. To prevent this cataclysm, all world citizens must unite in 1 language fast, and all nations must unite into one nation even faster. Thus, regional blocks are one step towards full fusion with one language and one currency, one set of laws, one country eventually. No worries soul lovers, the dead will reincarnate into a peaceful Earth with 0 wars, 0 beatings deified in the Bible/Torah (kids, workers, sex slaves) or Quran (sex slaves, mutilated infidels, kids, wives), as the violent chimp scriptures won't exist anymore. The virtuous people will enable humans to evolve to the teleporting genderless shimmering shapeshifting Immortals stage, as tens of trillions spent on fighting, duplication, wars, spying will be used to give all trillion years lifespan. This is not the battle of a group of chimps versus another, but of the human quantum field against stagnation and being held hostage by crazy ideas of eternal war and cruelty deified in the chimp Bible, etc. Infant slapping chimp IQ pastors and fruit fly IQ Popes ☺☺☺, filif chicken IQ bishops and charlatans are incapable of understanding a human today is like a fruit fly vs humans of the future who live to 90000, so their "theology" knowledge is like a

fruit fly trying to teach us quantum physics or basic chemistry today: a sarcastic sadistic joke. Can a bacteria living 8 hours teach humans physics? No, and neither can a Pope or any theologian teach us about this universe, let alone other dimensions for which no proof exists, more than a bacteria can teach. All our knowledge and understanding is like that of a microbe, vs the humans of 5 million years old of the future. So, to make war to impose Quran, Bible or other violent scum religion is comical☺ at best. In the Eternal World Peace world we don't know what God is, only that we need a trillion year lifespan to gain enough basic 'fruit fly' knowledge to begin to know it. You see, it doesn't matter even which nation is the one that creates that 1 language, 1 currency, 1 system of 11 companies for all Earth, 1 "religion" (we don't know, we have no rituals of mind control by the rich pests, we only help all to live to a trillion to figure what God is like, after having lived 1 trillion years to gain basic knowledge), with *truly equal opportunity for all*, 0 violence and 1 trillion times kinder vibe for the worst than of the best mom for her only infant, because all can reincarnate and then shapeshift and have any racial form, alien or human one dreams of, so no worries, you won't lose the chance to appear in your favorite racial appearance. Once you understand the Immortalist Anthem and how different it is from many violent scriptures and anthems, you realize the blasts that could wipe continents may not be as bad, as they prevent trillion times more people dying. Sort of like a guy holds hostage 1 trillion people, so cops kill 1 guy to free 1 trillion unborn that will be killed by that one guy thru his violent actions. Why did the USA make a huge mistake and not ask all countries to form a big alliance, and *pressure the rest to sign Eternal World Peace Treaty in 1945*, under the threat of nuclear blasts and the Mega Peace alliance military action, to merge all armies into one? Because the generals never thought of World Peace in 3 months, they're too Bible brainwashed. America was ruled by *victims of the* ☺abysmal IQ☺ Church, who were too simple minded, aristocratic to dream of World Peace, as the 0 IQ Bible told them Jesus has to come first. Nothing damaged US more than the Bible, the destroyer of gentle kindness, tenderness and most of all, all critical thinking and IQ, hypothesis formulation and testing, scientific method.

USA missed the chance to achieve world unification, to end the subjugation of the masses by aristocratic parasites. But, today, people realize a missed opportunity is not an eternally missed one and there is always a chance for some nation or group to bring Eternal World Peace peacefully or with some new weapon even, so big, and with such little environmental effect, that it can bring Peace in a few days, with the capitulation of all world armies (who, after being approached by the Universal Alliance *remain opposed to dissolution of their armies into the Planetary Universal Army of Immortality for All*) like Japan capitulated 6 days after second nuclear strike, *merging of all armies (voluntarily or* by quantum strike*)*, the end of all state, city, national governments as the planetary government is the only one *for maximum efficiency and one law instead of 1 million versions who implement the global requirement of* all companies

merging and one education, one language reigning with Eternal Kindness. 2 billion jobs worldwide are wasted, 2 billion toil away to reinvent, duplicate, do small scale stuff, due to the capitalism of 1 billion companies… each being so incredibly inefficient and due to 20 million regulations, instead of only 20 for every major area, created by 1 million governments with their mini kings and aristocratic mafia at the village-town level. This happens for one reason only: ***for the institutionalization of the mass theft by aristocratic class from the enslaved workers who toil 60 hours a week to make those guys rich, instead of everyone working only 35 and living to 700.*** People and animals have different electronic and photonic properties, due to having a chemical structure vastly different from plants, rocks, inert building materials, crust, lava, and earth in general: thus 1 trillion weapons can be designed that modify this electronic and photonic cloud only around humans and animals, leading to instant death, without changing much of anything else, with minimal eco impact and Eternal World Peace as a result, provided all else is fully implemented: 1 language, currency, nation, 11 companies on Earth. The chemical reactions are simple electron and photon movements, simple changes in this cloud of electrons and photons. The abysmal IQ of humans is beyond comprehension, even fruit flies seem more intelligent sometimes. Physicists and chemists of the world awaken, free the workers now, from the clutches of the blood sucking parasites who start eternal wars among workers. Let's bring Peace in days using non-military, non-DARPA methods of bringing Eternal World Peace, via simple breathing, or even astral travel of the Land of Astralia, not Australia, the Land of Eternia. Let's be ready to bring Universal Peace in times a crisis, when enemies of Peace force our hand, making us use physics. ***Workers of the*** World ***Unite, To Bring All*** Eternal ***Life***, to bring Eternal Peace tonight, By the Happy Quantum Strike, Setting all languages alight, Except the one Language We Choose Freely, to Bring the end of all worker-worker conflicts aristocrats make via 200 nations, 7000 languages, 5000 religions, 1 million village-town-state governments and laws. 1 language is ***the*** ultimate ***victory of the enslaved 8 billion worldwide***, is the triumph of the ***worldwide***☺☺☺, over the aristocratic parasites who suck our blood daily. The gentle strike could be a happy brain upload with knowledge of the 1 language, the desire for Eternal Universal Peace.

We don't know how to protect people inside a city hit by thermonuclear weapons, since if someone is within the fireball, they melt. Likewise, this weapon may not initially have defensive shield tech, so a small nation who may lose the war may use it and kill all people on Earth due to not understanding its physics. It took decades to understand nuclear radiation, its theoretical basis and perfectly control it. Initially, people noticed uranium can kill. Every day, it's evident that this "all dead but capsule people" scenario is the most likely outcome of humanity, as the ideas in this book are totally ignored, so the only thing we can do, as governments continue the daily cannibalism of last 10 million years of chimp cannibalism, so evident even in the Japanese cannibalism in WW2, is to prepare for the post-strike world, to have nicer vibes (even if we don't

make it to the capsule) that help the post-strike people to create lasting peace, and how to prevent divisions, factions, conflict, star wars after that Strike via: 1 language, 1 accent of that language that all transition to, 1 single form of that language, 1 emotional tone in all spoken and written language, 1 currency (eterni) via the One Planetary Bank – Eterni Bank, 1 ethics.gov "religion", 1 salary for all (equal pay for all, leaders are those more capable with higher immortality scores), 1 free universal education education.gov (or whatever country gets *the weapon first and creates the website), to prevent any "us vs them" and to sustain* ~*~Eternal Universal Peace~*~ *after 8 billion die. It seems too* few will take the *book seriously to make the* changes *needed to prevent the strike, but the only solace is that it may not happen right away, which gives us the time to rapidly create that unitary world: one peace, one Earth, one nation, 0 violence.* Many people are animals having a hard time to understand what being human means, and too ☺abysmal IQ☺ to admit their lowest IQ culture of eternal violence and hooligan tone music and movies of bloodshed, rape and genocide is as useful as that of insects fighting each other to the death. We kill termites easily, ants, pest control, and so would God kill insects thru a first strike to keep the decent people, restart civilization. *The choice will be clear:* allow disguised covert cannibalism to continue for 5 trillion years or end it all in 1 blast*. This will be the* end of hooligan religions*, the end of waiting* trillions of years *for the Jesus conman to return and* kill 2 billion via alcohol encouraging*, the end of waiting for Messiahs. In 2 minutes, Peace will reign Eternally, or at least for a very long time, as nobody would want to fight. They won't be able to, due to the vast work ahead to make the Earth human friendly post strike.*

Likewise, a small nation (not a nuclear power, some small or mid size country few would perceive as a threat or genius nation) may discover (*with mortal alien help or by chance of help from human quantum field*) something can kill and hide the 'subatomic bomb' in everyday objects shipped to 20 countries (interdimensional object within everyday common object, undetectable). To ensure a first strike capability that destroys all enemy forces *(inside enemy alliance countries and inside neutral countries or other countries hosting enemy nation military bases)*, the scientists may deploy 20 bombs in certain locations, where enemy civilians and population are based. These, when detonated, would wipe out 7 billion people or 90% of humanity, except the country doing it and a few other nearby or far away nations, enabling the wiping out of all submarines in all oceans, all underocean bases, underground bases, moon bases, mars bases, etc, in 5 seconds. The human quantum field, the collective species intelligence of humanity, out of the need to protect itself, may use a few military men to wipe out 99% of military men. who're the most evil men on Earth who threaten the species the most? The military of course, *they cause all wars and wars* prevent the end of violent crimes, risk the end of the entire species. *The immune cells* kill *viruses* inside a human body, *the peace loving scientists of more* peaceful *militaries* will wipe out the *viruses* in the human species 'body' (the

macho military, police, spies who terrorize people and create eternal wars). These scientists may work in a vast underground facility, disconnected from any local net, internet or computer, with no computers, phones around, only papers on which they write things, no words spoken maybe (except a whisper rarely) to prevent detection, isolated from society to prevent any info leak. Sadly, they probably won't try to change those 'viruses to make them friendly thru healing music and divine experiences education', since that weapon is far more advanced and selective and needs extra centuries of refinement and the state of eternal war and urgent need to win a war will force their hand to use it prematurely. No damage to anything, except humans. Because second strike is not possible, meaning nobody can even launch a second strike, since all are dead in 5 seconds (not having that 20 minutes to decide counter nuclear strike), with all enemy forces killed, or at least 99.9% of them, the rest 0.1% (military spies infiltrating the friendly countries under the guise of civilians or even the country doing first strike) will have no incentive to fight, simply give up subversion, blend in, stop reporting to base (no base exists anymore), or even surrender, being taken into a healing center. The 0.1% would have no idea what happened anyway, who attacked, which countries are still alive, anything, until the second spy filtration is over: this is the process of finding all military spies who sent reports to base in origin enemy country (no answer initially, due to all being dead) and received orders to return to base (which flight to take etc, so they're caught), and later base was staffed by enemies to locate the spies reporting confusion). None from enemy nation would be allowed to access any military high tech, for safety reasons, in case they didn't catch all spies. This is the most optimistic case of 90% dead, it could be that all die due to misunderstanding physics. Thus, it's important for all to join World Peace in 3 months movement, ban all music that doesn't talk of ETERNAL World Peace in 3 months until it manifests for at least 10 million years. *The small device fireball of instant death won't be 5* miles like with big nukes, but 3000 miles at *least*. A *tiny* underground bomb, the size of a tennis ball or bigger, that anyone can place easily via underground tunnels bioandroid mice etc can dig, *in* Canada kills all in US mainland, Alaska, Canada, Mexico (Hawaii may be reached by a separate 900 mile radius bomb to kill all submarines near Hawaii; North Canada by a separate North Canada bomb; to reach Florida entirely, most Mexico may be hit as a side effect if they only want one mainland bomb), one in Asia can kill 4 billion people. *No country can inspect every worm, insect, mouse, rat, earth digging animal, robot underground*. People think you need a 900 ton bomb, you don't. They don't understand physics. All animals, plants, people, affected, but can replant and repopulate, without 9,000 times higher damage of nukes. While people shake hands of US leaders, they plan this. The brutality of the US regime and its audacity to pretend they protect human rights, when they abuse all rights of even the Americans, is just not sustainable, leading to a need to create immortalism or to the fall of the US empire, like 500 other empires before. While violence floods every gym thru music, every TV station thru tone of speech, every church thru evil violent texts deified as ethics, etc, the momentum builds for the

End of the US. Japan thought they're the smartest and nobody would do it to them, then Hiroshima came, just as in ?2085?, Americans too will think they're the *chosen superior ones*.

A small nation cornered to total extinction by a war between other countries, or threatened with invasion by a big bully superpower to use as staging ground for invading others, *has only 1 choice to survive and preserve immortalism or its people,* knowing that occupation will mean certain death due to nuclear all out war on all cooperating countries. *In a global war scenario, when you have 3 days left to decide if you join world war or not, or* if you surrender or not, if you joined one side, generals will choose *UNLIKELY BUT POSSIBLE DEATH OF ALL HUMANS (that may allow them to survive in a capsule) vs their own death at the hands of the invaders.* Probable or possible death over certain death. *Thus, big bullies who love wars, always need to realize that* there are unknown risks to their violence. Many will choose death of all humans vs them being the only dead*, so they may detonate the device they know to kill all humans even if they have no capsule if it's certain they will lose the war. If they can't be alive,* they surely won't let anyone be alive*, as they perceive winners as pure evil not worthy of being alive in the universe*. This is why all threats, wars violence acts build up the momentum *for the final day of humans, and it happened before to a trillion species.* Only when a planet makes World Peace and Immortalist Anthem like anthems the basis of its civilization can such energies be prevented from emerging. *This book may be a species collective* intelligence *REMINDER to all who use "war to make peace" that* there are trillions of safer ways to make peace without war, torture, violence, pain, suffering. It may be a way to prevent the likely event of species self-destruction. *The device doesn't even need be 'subatomic' or to 'damage only humans', it can just be one of 1 trillion destructive devices possible that damage the environment* a little or more too, but in desperate situations, when push comes to shove, people will use it. First strike is possible even by a nuclear power today, imagine when new devices appear that do far less damage.

This 'damage only people' weapon *obviously* exists and *was* used before many times by other *aliens*, since an infinite variation of humanity on Earth *exists. When it happened, all died or* sometimes 0.01% survived. Since humans in the future will reach 1 trillion times population level, meaning 8000 quadrillion, to prevent the deaths of quadrillions of people in the future wars, the mortalists will say "*this current war will destroy the planet or 1 million planets later, so* before *that* happens, we need to use the people only killing weapon that damages no environment; it is *safer to kill 1 person to save 1 trillion in future wars, or billions to save 1000 quadrillion"* (US always says they kill or kill slowly (torture) one 'bad guy' to prevent many good from dying, so by the 3rd law of classical mechanics, action force = reaction force, some mortalists may even apply it to the US military one day or all US), *and use the device ('*quantum weapon*') to kill all, except 'their folks they hid underground in a* capsule or using some undiscovered particle shield (dome like or spherical) that prevents the neutrino like particles

from killing their people'. *After all, any country that* exports death*, meaning weapons, will contribute to 900000 billion trillion humans dead in future star wars* and is thus responsible for a trillion dead at least/per citizen*. So, in that case, many mortalists will say "*citizens who support export of death and destruction of the quantum field, deserve instant annihilation, meaning all citizens, the *entire nation that supports* the criminal, ever torturing, spy agencies, *military* and police, citizens who don't overthrow a weapon exporting government *deserve the death penalty for killing 1 trillion humans/citizen in the future star wars* by the quantum weapon"*. Thus, the military doctrine of many mortalists evolved (trillions of times on many planets) into "*it's ethical to wipe out in 10 seconds entire continents to protect the human species quantum field*". And thus,* if this book is not implemented fast, it will surely happen, just like Hiroshima did*. If a God exists, as they brainwashed us God (*in the Bible form*) exists, his first rule is don't kill and they break it daily, since they don't believe in* God being anything but themselves*.* Are you ready?

When you understand that people will use the weapon once they get it, out of fear someone will discover a different tech doing the same in 2 weeks or months, it makes you realize that Christianity, Islam, Judaism and other religions that preach Peace can't come in 3 months that Peace only comes after some Jesus or Messiah comes, are helping "Satan's war against humanity", and are *anti-God, anti-life, anti-human and a mere incitation to all out Holocaust of all nations*. If anything, the whole fake miracles religion setup by Italian spies or others, is simply telling people peace will never come, can't come within our lifetime, to give up any dream of Eternal World Peace in 3 months and of 0 violent crime in 10 years to sustain that Peace. It brainwashes workers to accept the eternal abuse of workers by palatial aristocrats creating more wars to destroy the workers. Christianity is thus the "devil's work" to brainwash humans that Peace is not possible until 5 quadrillion years when Jesus may come, but he obviously won't, as he didn't do any of the fake miracles. *To prevent people from accessing God's recipe for* Eternal World Peace in 3 months *or years at the most, the* "devil" (aristocrats who love eternal war among workers to maintain eternal power) *brainwashes the credulous* thru lies and fakery *that Peace is not possible* until Jesus (their invention) The Liar comes back. World Peace *is the first step of getting* closer to God *and evil religions do everything to postpone that step by lying to people that they can't achieve peace fast,* so no steps are needed to manifest it this lifetime, "just wait for Jesus to come, only in 3 trillion years Peace can arrive when Jesus never comes". Such religions are not only evil, but they ought to be banned for indirect incitation to war via 1400 violent quotes. Only naive ☺abysmal IQ☺ clowns can believe that a fictional Jesus, God or etc gives them a billion trillion quadrillion year lifespan in a new dimension without any proof, if this same conman can't give them even 1 million year or 500 year lifespan in this world by his 'nonexistent' cosmic powers of EMPTY TALK. Jesus was unable to make anyone live to even 200, his fake miracles and fraud are explained in detail here. A real God would have so

much power that if people did a certain prayer or series of things, they could easily live to 200 for the next 2000 years, yet none of it happened. It's hard after 50000000 fake books, fake video testimonies and articles claimed miracles happen, for people's ego to be gently kindly 'crushed' in the hysterical laughter of realization they have been conned for an entire life by dishonest clergy, for their belief world to fall apart and be replaced by a more logical and benign belief that World Peace is possible in this lifetime, and them to realize all their cherished beliefs were based on pure fraud of military spies (aristocrats for generations wearing decorations) making up religions to expand their empire of murder and genocide. Thankfully, no demons and Satan exist, except for those trying to steal people's money via rituals to "get rid of devils", steal their national land, resources, people, etc. These "peace is not possible" or "peace in 3 months can't be the number one priority" religions created by murderers are pushing humanity towards its final capsule moment, when all die except a few in that secret city, if they even make it and the explosion doesn't kill them too. If these cage men can create their pseudoreligion or philosophy of Jesus the Con, why can't we make ours based on the urgent need of ETERNAL (not low IQ 1000 years of peace type of nonsense tall tale "theologians" came up with) Universal Peace in 3 months and Immortality *for* All? Why believe in fakery? The new "demon possesed God of the Universe" have become military men telling us thru torture and mass media control that Peace is hard or not possible. Peace is possible, we just need to desire it a trillion times more, bring one global language, 11 companies, one bank/currency, knowing that the alternative is bleak: *all of us dead pretty* soon. Except, if lucky, the people in the capsule who will wipe out all continents if the beasts don't want peace. After they kill 8+ billion people in seconds, they may say on all TV stations of the untouched nations or capsule(s) that "*Sorry, Jesus didn't come, we wanted to achieve Peace 88 trillion times faster than him and save humanity from certain disapparance. Now we have one Bank, country, language,* Immortality *for* All *and* Eternal Universal Peace *culture,* 0 aristocrats, violent music, movies, literature, anthems".

Aliens can help 70+ nations ☺☺*lovingly tenderly gently kindly*☺☺ discover the weapon that kills all within 50000 miles (all underground, in space, etc) in 2 years even to bring instant World Peace and fast 0 violent crime on Earth, since an old alien is vs a human like Einstein is versus a rat, so big boy terrorists on Earth now, like USA, won't know anything. Imagine, if such aliens (who seem like 'God' to us, yet are not even Immortals) become interested, mortalists may get rid of the militaries of 150 nations in 10 seconds. Any act of torture of even 1 person (even during so called 'training to be a cop or soldier, spy etc which is a cover for creating brain dead, brain damaged robotic killers of all workers trying to be free from *aristocratic terror*), *let alone millions like* spies and soldiers do today, is all out war *against* the human *species* and humanity has the right to defend itself in nonkilling ways of immortalist grace from these 'demonic' generals. It's common knowledge that torture is used by the vast majority of spy agencies in

2024, so it's important for immortalism to spread, so the "final capsule solution" is not implemented by mortalists who may want a torture free planet, without aiming to live by Immortalist Anthem fully, which is much more than *torture free planet, torture free PLA, etc*. It's sad that the Party of the Workers tortured millions of workers, making the same mistake of Stalin, KGB, USSR. *Any act of torture is the equivalent of a Hiroshima nuclear strike*, since it will lead over trillions of years to 100000 dead from wars. Thus, for a Party to call itself of the workers, it needs to evolve beyond torture and pain inflicting. It seems to many that the Chinese Communist Party was (may not be anymore today) more of a Torah Chinese Jewish extension of Bible terror. Let us all hope, wish for, perhaps, pray for if believing in God, that the Chinese and all nations who may still use overt torture will ban it (unsure how true organ harvesting is, if pic are faked or not, since communists can also create Falun Gong (who claimed humans appeared billions of years ago, like this fake carbon dating youtube) in order to send Falun refugees to 200 nations as spies telling fake stories; but could be real, some of them, if Falun is CIA made and China hates them) and move towards humanity, gentleness, grace, sweetness and immortalism. USA already uses torture, but that may change. Sadly, undercover police in white shirts came and allegedly beat workers (if video is not staged to make banks look bad and recruit more communists) who wanted their hard earned money back from the aristocratic terrorist bank. China moved from true communism to terror? Why do they need so many banks in China if they're communist? Isn't one enough? Isn't the original (before Marx London communist manifesto) communism about equal opportunity for all, 0 torture and violence against workers? Granted, China got 400 times fewer banks per capita than USA, but still. In US, people can sometimes lose money if balance is above the FDIC insured limit of 250000. In a true democracy, one bank exists only, the Eterni Bank of the Government, and nobody ever loses money when palace dwelling aristocrats stage bank failures to wage war like warlords against other aristocrats or workers.

Sadly, all militaries, without exception, subtly torture the workers of the world during the so called training. It's an act of pure cruelty, genocide, void of any *healing*☺☺☺ *gentle tender soft nurturing* grace and compassion for all, ☺☺☺. They call it "being tough", destroying people's tone of speech by endless shouts and Hitler like yells, but it's pure terrorism that perpetuates nuclear and other wars for billions of years. This has to stop, one can bring peace without so much torture, exertion, 8 year long torture, sleep deprivation, and pushing beyond limits. All this push beyond limits simply takes humanity backwards. There are a billion trillion ways to achieve peace without any violence, shouts, punishing (400 genuflections or whatever), physical combat, missiles, bombs, grenades, etc. Simply discover a nice device to convince all via divine bliss state to want peace or gently evolve *all who want to kill* with a selective quantum weapon that makes them nonviolent. Perhaps, we need someone like Alex for President, to increase efficiency, have

50 million chemistry and physics, engineering majors working on this device. The entire nation and planet must support the discovery of a painless device that eliminates all desire to be violent in all humans. All *decent* physicists, chemists, neuroscientists, engineers *unite* against the boxing hooligans and all violent sports, violent music, war mongers. Every military takes decent people and turns them into wrestling, boxing hooligans, same for cops and spies at times. This is the destruction of the human quantum field. We need proper nonviolent music, literature, movies so nobody is violent, so nobody needs to fight anyone. If all media is free from violence, none knows what violence is, so martial arts, etc are not needed anymore to 'defend' oneself. Every cop is peaceful, beats none, every soldier only watches the galaxy for aliens who may invade. All we need is eterni tone music, speech of centralist education to inspire higher kindness in all since day 1 of birth, viewing all humans as extensions of one's own spiritual being or astral body. Nobody is violent against oneself, so they would not attack others. Billions of people need to support this scientific endeavor to end war and violence forever. This torture (called military service, or soldier/cop/spy training to enrich the aristocrats) is because our planet is run by low IQ generals who're slightly smarter than these baboons compared to Immortals, who simply can't understand a simple principle of nature: there are trillions of nontorturous nonpainful happy ways to achieve the same end: Eternal Universal Peace in 3 months. Nobody wants to change the culture to create Peace, they destroy everyone and impose their beliefs by genocide on all. Anyone who has a different thought is labeled as a "spy" who wants to weaken their psychotic military or nation. The whole world is ruled by military terrorists. The Immortals have detailed alternatives to modern militaries. Armies take good people and turn them into monsters, destroy their brains, so they kill on command, torture on command, it is Satan's work. It's hard for a human male to understand the love of a species of humans in the future, descending from a more peaceful group of present people, which is a trillion times greater than that of the most loving mom loving her only baby, as Immortalist Anthem verse 8-40 explains. And this love would be 24-7, always, so it's good to stand back and realize that the Eternal World Peace in 3 months can be real if people are serious about it and talk about it every 20 minutes on all radio, TV, news etc – as an act of minimal respect for the UNIVERSAL Human Right to Live to a Trillion Years, which is only possible with ETERNAL WORLD PEACE. Talk of that all day instead of war and violent music, tone, movies, etc. What do we need the music on these 4 pages for? Isn't that pure demonic energy? The Great Immortals have detailed the Eternal World Peace recipe in Chapters 5-10: it requires a real change in culture. Immortalists always choose nonkilling noninjuring painless methods, however, in 2024 few are immortalists, so if push comes to shove, entire areas of 1000 miles diameter may be 'wiped out' (people only) by anti-torture mortalists, and all 500 miles above and underground☺☺☺. The immortalists will be sad the nonkilling methods were not used, but they do understand the emotional reaction of the mortalists who wanted to develop health and longevity for all, instead

of every resource being used to wage wars, to defend against eternal attacks from the hell hordes looking to force war on all they can, to use every invention for war first, to hide the inventions with dual use, due to fear of misuse by enemies. Nobody would know which country did it, since 1000 other changes after the one that did the killing, would make it infinitely hard to reverse engineer. So, let's all gently kindly work together to prevent this future via immortalism.

A while ago, they used to treat some things (that today they treat with simple pills or even diet) by drilling holes in the brains of people, scooping brains out. Today, this is the military in evey nation, drilling different holes into the heads of all humanity, via their global terrorism, destroying every brain and body. We see how they attack millions, etc, even sometimes on important dates related to some countries they try to frame as the doers of it all. It's simply low IQ. It's possible that without alien help it may take humans until *2923* to discover the '10 second device'. It's the possibility of ~*~Eternal Universal Peace~*~ in 10 seconds if the country using it *(to kill or alter brains of the violent and semi-violent, meaning billions of people)* has luck in not starting fights among themselves, due to having adopted a more peaceful culture as a result of one immortalist in that capsule with 10 million mortalists able to teach them Immortalist Anthem, so all hope is not lost. There is always a plus to every minus, study the Anthem in case you or your grandson make it to the capsule mega city underground or off-planet before the END OF up to 99.9+% OF HUMANS. *While* 50 million terrorists (spies, cops, soldiers) who torture the human quantum field will be instantly dead *if the mortalists use the* killing *version of the device* (8 billion times easier to produce centuries earlier than to replace mind entirely, since replacing requires individual changes for 8 billion people, while the killing requires one change for all people, molecular, etc), *the leftover humans in first strike (*all outside capsule/underground town dead*) will be able to live without torture and terror if the first* country that gets it (and is forced to use it) is against a culture of torture. Aware of this fact, the immortalists can't sit idle while the *psychopathic militaries are* rushing to kill everyone to save a few aristocrats in a capsule. Many militaries plan to be the first to discover it and use it, before *even the* immortalists *can create defense against it, in case the physicists make a mistake and kill all humans by accident*. That's why we need to develop nonkilling methods☺☺☺, that don't pollute the quantum field, to bring World Peace in 3 months via new music and tone of speech on TV, etc. First strike in Cold War would never achieve anything, since underground deep bases *or other military units, underground bases* (or even 15 million on the surface spies embeded in foreign societies whose nationality is fake) *in other off-continent nations would wage covert war* for 5 trillion years. However, with this quantum weapon, *all enemy forces, within 30000 miles are dead. No lead protects, only special new matter and force fields.* So, instead of 5 trillion years of wars, 10 seconds via changing brains or sadly, killing enemies in 10 seconds, since changing the brains beliefs is a lot more difficult, since every brain is different and requires

different belief, weapon parameters that needs a far more complex weapon, etc.

The only risk is that designing the capsule may take 500 years and the urgent need to win the war going on may force its use prematurely leading to accidental end of all humans, since today, we really have no capsule that allows humans to be safe near the 'dead zone' of a thermonuclear blast where death is certain, due to the fireball reaching 100 million degrees (way hotter than the sun). So, just as we can't create a capsule to prevent death near the 'certain death' zone, it may not be easy, though presumably the weapon can be detonated away from the capsule, so the capsule survives like a bunker away from the blast or just outside the fireball would if underground. If anything goes wrong, due to unexpected physics of a large scale device (vs medium or small during tests), during the use of the weapon on a large scale, it could easily kill all humans, even if intended for 1 continent only. If no capsule can be designed due to the way this tech works being vastly different than nuclear, then, they will go off planet and the dead will be even higher if few can make it to Mars, Moon, or etc. This will then take 1 nanosecond in Eternity to reach 10 billion humans again, but hopefully, now they got ~*~Eternal Universal Peace~*~ if the immortalists and peace lovers exist in that country and prevail. As long as they gain 1 trillion years of progress due to no war (they lost 500 years to go back to 10 billion), they will think in retrospect that it was '*not the worst that could have happened, the end of all*'. We can easily disappear as a species in a weapon test even, due to theory not predicting the actual chain reaction that makes the effects way bigger. The images of the Holocausts of WW2 are a reminder of how easily it is, given the bad music then and today (even worse today), for humans to push the button that ends humanity forever.

Countries that launch first massive ICBM or nuclear triad nuclear strike make the grave mistake *of not realizing the other side may have the "weapon that kills all humans alive except some in a tiny capsule"*, but have not used it because they don't want to rely on only 10000 or 1 million people to advance society. But, when push comes to shove, and 15 minutes are left to decide if to launch 2000 nuclear missiles or the *MOTHER OF ALL WEAPONS KILLING ALL* 8 billion, when the alternative is 2nd retaliation strike that would make planet less inhabitable due to more nukes exploding, more bioweapons released over 300 years of ☺abysmal IQ☺ warfare that endangers even capsule people, the military may choose TOTAL DESTRUCTION, as they got seeds to replant and repopulate everything. The option of not going nuclear but of KILLING ALL HUMANS, except 100000 in a capsule, all known and unknown bases of the enemy, every animal, every plant changed, every material almost changed, becomes FAR MORE ATTRACTIVE AND *LOGICAL* FOR MANY REASONS, since it increases the chance of humanity surviving dramatically, since it will prevent further atomic detonations and all out chaos and wars over left over water or arable land, bioweapon wars, etc. The risk exists that military officers would get so tired of the wars going on that they will reach a point of no return when they "had

enough", and decide to do the "kill all humans except 3 million in a bigger capsule they design" to restart civilization in a stress free way, so everything is cashless, 1 bank, 11 companies and every new discovery is first and always used to extend human lifespan and never to attack others and make new destructive weapons, with 1 language, nation for all. That is why this book needs be implemented fast, with one language/nation for all, free gentle tone education for all, the end of all wars and conflicts, violent crime and jails and. Step by step: 5 languages first maybe: English, Chinese, Spanish, Hindi and Swahili. The clock is ticking, the final day is coming, when we need to choose Peace over total annihilation of 99.99% of humans. Are you ready? Do you REALIZE how serious things are getting? People will use the weapon on their enemies' continents out of fear, to prevent them from discovering the weapon. Peace eliminates Fear.

Today, the music played in gyms, stores, venues, events, "spiritual events", especially gyms, etc and discos is so anti-peaceful, so aggressive, violent, war like in vibration, that it is like *detonating atomic bombs for fun while innocent civilians are being killed* daily by war or violent crimes. Even some church music is too upbeat, restless and lacking the *healing*☺☺☺ *gentle tender soft nurturing grace and compassion for all energies* needed to prevent war and conflict, most radio and TV music is genocidal therefore, as it increases and fuels the eternal genocides. The energies, vibes, lyrics needed to stop the insane cruelty of historical inertia are so gentle and unlike most music, *that people are sleep walking towards species extinction*. On March 22 2024, KGB has apparently posed as ISIS Tajiks and staged a fake event (no dead), where a concert venue was burned (no more evil violent music played perhaps), people "died" (shot or due to the fire that engulfed the concert venue). This false flag was a way to recruit more people to fight Ukraine (more minorities who can be cannon fodder) or recruit more people for the fight against hooligan music that is slowly disintegrating the atomic structure of our planet if it will continue playing. The odd thing is that some supposedly real videos *(see how videos are faked section in fake miracles area, like Chris Angel video illusions where he "cuts people in two and rejoins them", a thing that takes 10 hours is shown as taking 2 minutes or other tricks)* show how "Russian police torture a suspect, cut his ear and make him eat it" (everything can be faked by creating many fake pics with fake blood and editing in fast sequence to create a fake video). Note that the videos seem very fake, staged (see CNN videos), as the Netherlands based Moscow Times article links show. The spy section explains how videos about everything are faked. HRW claims torture is illegal and that's why USA tortures tens of millions, attacking their ears, eyes, feet, toes, penis, head, skull, temples, etc, mutilating people, destroying their organs via microwaves, infrasound, ultrasound, x-rays, lasers, etc sleep deprivation, because they prefer the "international rules based order" (torture and genocide based), as in the violent depraved immoral music played in so many concerts and on so many radio stations worldwide. Spy agencies are known to create fake emotional scary videos to create certain responses from

people, make people support a war, etc. If this is a real video, it shows that WW3 is closer than ever. All points to a false flag event to recruit more against Ukraine style violent music that is played in 100 nations, similar ones, without any empathy for the killed, for the enslaved workers who're used as cannon fodder to enrich the aristocrats. If we have compassion we listen only to that which makes us and all more peaceful, stuff like these 100 songs. When anger and aggression are so high, playing most music today, except the most peaceful meditative, World Peace lyrics, like Immortalist Anthem, etc is *an act of* genocide *against the human quantum field*. It adds fuel to the flames of war and violence. All this fake freedom of USA is nothing but a dictatorship where all talk of World Peace in 3 months, end of all jails and violent crime in a few years is forbidden and laughed at. Everyone almost so selfish, having endless cats and dogs, while people are being killed by the millions by USA policies. Animal hospitals are built, while human ones are bombed. Soon, besides LGBT marriage/sex, they "will legalize chimp and baboon marriage and having babies with dogs, the 'superior' species". As such, mortalists may design a quantum device to damage all speakers (not just big headphones or mp3 players, boomboxes, but even professional concert sound systems that blast violent music worldwide) that play violent music worldwide, to prevent our species extinction. The top 90 world militaries, are, arguably, the most violent terrorist *organizations* on Earth, thanks in part to the music they promotes and create, attacking millions of people, as their game for 9000 years has always been to destroy, kill and subjugate everyone for aristocratic *profits or power: they* create more terror groups *than anyone else, covertly, then use that as a pretext for invasions: most people are so naive, they believe the lies in the media,* most terror groups are made by Big military Powers indirectly. Who praises and supports the Bible and Quran 24-7? USA and Europe, and terror is highly abundant in Quran and Bible. Who incites one against the other, and supports Islamic and Christian quasi religious regimes/monarchies that contradict immortalist values of no terror, nontorture, peace, nonviolence? US and EU. Who trained Osama bin Laden? CIA of course. Watch how deformed, mentally retarded and insane the monarchs of Europe became at times due to inbreeding. You'll understand why Muslims, who also inbreed a lot, invent little. King Charles of England is 10% inbred, while Charles 2 of Spain was about 25%. Henry 8 was 400 lb at death and executed people who wore purple, as he was the only one who wanted to wear it. 57000 people were executed by him. Queen Elizabeth makeup poisoned her with lead, like today, many women poison themselves with makeup and cosmetics.

Sound played even a continent away can affect subatomic particles on the opposite side of the planet via the human quantum field intermediary. *An attack on one* human via a shout in a musical concert or church is *precursor to an atomic attack on all human beings*. Mortalist aliens could give any nation a 1 kg device (split in several 10 g devices) tech to wipe out all humans (no damage to any animals or buildings, plants, etc) in North America circle area that contains all

USA and all NATO nations and areas where the 900 US secret and public military bases (built under ocean floor, underground without permission from the country), submarine fleets, navy assets (*all ships gone via underwater drones or dolphins or fish carrying the 1 mile radius device that kills people only*) alternate commands that are tasked with retaliatory second strike (nobody does that when they realize all their team is dead), to prevent wars from the main sponsor of quantum field terrorism via violent music, the main spreader of *terrorism* as state policy, *terror* as state policy, *torture* of tens of millions of foreign and own citizens as state policy. After first strike, the other group would have to create one nation, one language and adopt immortalist like principles, so no new conflict (created by civilian sabotage units of NATO embedded in 200 nations in case they lose via first strike WW4) can ever arise as one people exists, one bank, one building company, one just government for all humans. One army, one village of humanity to end all wars forever, to prevent psychos (NATO sabotage units) from turning one nation against another (the NATO spies infiltrating all nations). After first strike, the end of aristocrats globally looms as the other side, hopefully, embrace immortalist values, ban all violent music, violent scriptures, violent movies, etc and declare Eternal Universal Peace, one global police force, one government for all, the one universal nation of humans (hopefully with some Immortalist Anthem like anthem) with no national borders, just some regions with some controls on mass migration to prevent chaos or conflict among groups. The future humans will be shapeshifting immortals, so race or appearance will have no meaning, as such, one day, sooner or later, the mistrust and secrecy coming from appearance will disappear as all can choose to look the same shiny teleporting genderless shimmering shapeshifting immortals.

Then as rogue NATO submarines try to return to mainland for maintenance or supplies, they will be wiped out by new devices. The alternate US or NATO command center in a neutral or non NATO country that doesn't even know a base is hidden underground, will be unable to control any forces as 99.9% of NATO military or even inhabitants are dead, so they will have to surrender or use tunnels, craft etc to go back to mainland where death will await due to regular detonation of same device to disinfect the area from terrorists. When it dawns on those last holdouts with thermonuclear second strike capability that they're the only ones left, the incentive to kill another 1.5 billion is going to be minimal, since they detect the launch and can chase the submarine, hidden mountain base outside of US friendly nations where doors allow missile to come out, etc. This depends on the psyche of the person who has to obey central command, who may give command to strike, but won't be able to really do much, as 99.99% of nukes are unusable due to staff being dead. Any attack would reveal their secret base or position. People of the world unite against violent music and bring Eternia now, to prevent 1st strike. The anti-NATO alliance will know that they need become like one nation almost, to be perfectly in unison, well coordinated, to be able to pull off such a first strike, not even needed, if

they convince NATO guys to bring World Peace in 3 months peacefully, with peaceful music for all. Covertly as one nation, they overtly become one nation hours after the first strike. These public announcements shock the world, proclaim the victory of workers over aristocratic terrorists. First strike can also be planetary, not continental: all dead, except a few in a city. All buildings and entire nations could become protected by an invisible shield or force field, and people be told that a pandemic emerged (China already trained its citizens to stay indoors in the secured from interdimensional craft buildings, the craft creates domes above all buildings, of new particles, so that when it strikes, all foreigners die but not the people inside?), so when first strike happens, all are dead, except those in the invisible domes or protected buildings. Since a trillion versions of such weapons that turn some chemicals into others exist, by changing electronic density around certain atoms for all matter within 30000 miles on Earth, a country can't make defense against each, so they will know the first strike comes and will be thinking to kill first before they're killed. In this "race to the bottom" (rush to hell) arms race, the most mind blowing weapons will emerge that *will possibly reduce humans to 10000 people in a capsule* too expensive to make to hold more than that. This is the world that can emerge if we don't bring Immortality for All civilization ultra fast, one world army, 11 companies worldwide, as the weapons are almost here. All it takes after discovery, is some minor work on the *protective* shield for as many people as *possible* to *restart* civilization, just like 1 meter of lead shields against gamma radiation, some other material combos shield against this *weapon that alters all matter almost on Earth for a while*. The problem is survival instincts cause paranoid military men to use it once gained, to prevent others from doing so once they discover another version of it for which no defense exists. This speeds up exponentially the race to the end of humanity. The *weapon to kill all humans alive may already exist, without a good tech to protect them against it if ever used on a large scale by anyone*. All it takes to use it is more violent music causing more violence, which will lead to a series of tit for tat that ends humanity.

This means that a first *continental* or *planetary* strike can be so effective, with a new tech, that it will make any counter strike impossible or 1000 times smaller in effect, reducing any incentive to strike even. *NATO people (or their allies) are too brainwashed to realize how vulnerable their 1 billion people alliance is*, so they continue broadcasting bad music and fueling the wild flames of war, while World Peace in 3 months is forbidden as a topic. A nuclear bomb fireball incinerates people at 100 million degrees for a radius of 1-5 miles depending on the bomb, so *imagine something that kills instantly anyone within 2000 or 30000 miles, leaves everything else intact, for the most part, inhabitable that is, you just need replant some things with seeds saved in the capsule, for the vegan descendants of humanity*. All animals may be sick, dead or unsafe to eat, after the strike. God's way to bring veganism will have manifested. This tech could take 3 months to develop by a US enemy with alien help. Most Americans are so brainwashed, that

they think it's not possible, and they're invincible, just like Greeks, who were 50 times the size today one time. *It's a shared planet and if a nation disintegrates the planet slowly*, it is a cause for war on sound. Many will say aliens won't interfere, as they don't even know human bacteria exist, as we don't know about the events in some forest bacteria near a tree. But today, an enemy, without any alien help, taking longer than 3 months of course, can devise *1 trillion billion ways to place such a device in the center of USA*, using tunnels underground that little robotic or modified bioandroid mice or earth digging animals can carry on their back or inside, etc. It may take only a 2 g device to achieve this 2000 mile end of all humans only (everything else intact), so tiny birds that fly all over the world can bring it too (many birds fly from south Africa to Finland even) and then it can be remotely detonated, robotic ants can assemble it. Who will monitor all insects (flies, like this CIA robot fly landing on President heads during debates, see vimeo), dragon flies, birds, rodents, earth digging animals, all packages for the tiniest thing that to an outsider looks like a regular object? Not possible to detect it, as they don't know its physics. There is no defense, the only way to security is Immortality *for* All, giving up selfishness, and having World Peace in 3 months in every song until it manifests by global treaty on Media, Music and Scriptures. If an alliance wants a device put inside USA, they can and USA can't stop it. Anyone with an intact brain knows that. You can't stop it. It's that simple, because it's so tiny, it's IMPOSSIBLE TO *PREVENT* ITS ARRIVAL. Once Americans truly understand this concept, out of compassion for other people killed to increase American aristocracy profits, or compassion for themselves (their continent becoming human free after the blast bigger than all heavy metal music blasts), they may be more inclined to support World Peace in 3 months and peaceful music, tone of speech, etc. Until they understand this concept, the eternal wars will continue, and so will the possible end of humans approach. To wipe out Alaska and also mainland USA fully, the "fireball" of the device would have to contain huge parts of Canada and Mexico, a little of Russia, most Canadians would be wiped out too, as they live near the border. What are Canadians doing to prevent this? The Mexicans near the border too circle that contains all USA, but few live there, 5% of Mexico vs 90% of Canada. In urgent situations, they don't care if some other neighbors may be affected, they press the button and nearby areas will be affected, in Pacific and Atlantic too. NATO is an enemy too, so the incentive to finish Canada and EU may be high too. Will *NATO* ever *understand* this? Or just continue playing the *death* sound, to torture their own citizens for wanting World Peace in 3 months?

Given the Elon Musk idea *(joke or real? Is it his idea or military wanting enhanced soldiers?)* to turn humans into cyborgs with his Neuralink company, the track record of incessant global terrorism by many spy agencies and militaries, all out covert torture war going on, the absolute sheer terror and torture USA and others practice, without any respect for any free will or human rights, the scams in the housing and food, etc, the inability to even make chemical copies of

individual eye tears on demand and thus inability to understand and replace anything related to more complex brain stuff, aristocrats *will present, as always, the* ultimate *poison as the* ultimate *cure and beneficial thing* (like cell phones, WiFi destroying your testicles and brains to spy on you – why not use wired internet?) and want to turn all into their microchiped slaves using similar tech to maintain 4 airplanes, 3 mansions or 2300 acres palaces or 2130 acre part-time living estates lifestyle of using slaves as their test subjects for new mind control techs and new medical techs advancements. Thus, the incentive to use the weapon that kills in 10 seconds (instead of changes each brain) to prevent robotization, or fight enemies, may increase each year until they discover and use it. With chips, it's easier for them to control brains without killing, hence the interest (EMP attack means the chips become worthless inside brains and need be removed). *We need to* replace the US military with Eternium. Do you think, based on the daily news and pure evil music, we're ready for this species ending passing thru every material object, 20 miles of rock, lead, tech? As explained on the next page, it's statistically possible that, trillions of times, this species ending star war started due to a leader moving into anger or aggression via the music he heard, movie he watched, literature he read or even food he ate.

When people are on two planets, especially far away planets, the probability of wanting to declare independence and develop weapons that wipe out all life on the "now enemy from former friend" *planet in seconds is a billion times higher*, since when people are on the same planet, it kills the attacker too (thus the restraint in using those weapons or developing them), but with different planets it's not always affecting the attacker at all. That's why when species become multiplanetary and multistellar, the risk of total species annihilation is also much greater, paradoxical as it may seem, since you think you're safer being on more planets. *One planet attacks the other with* the quantum weapon, *without protecting itself and thinking the other has no such weapon to be used in retaliatory strike, within 3 seconds of that one being deployed, and then both planets's inhabitants can disappear and end all humans, since they* didn't create capsules first. Even after capsule created, *the first strike planet come* out thinking the other *guys didn't create a capsule and are all dead, and are wiped out just when the capsule is open and* vulnerable. Then, the other folks are in their capsule, too, waiting for retaliatory strike, so only 1 *capsule, 0.02% of humans may survive in the best case, but both can be dead, due to AI programmed to strike when capsule opens*. That may be why aliens are not that common to find or see, besides the best cloaking tech; or because the aliens made it past this point of self-annihilation and somehow made it to translation into another dimension. Either way, we live a 3 digit number at the most, our universe is only an 11 digit number, 13.7 billion years, and Immortals, young souls, may have an age of 1 trillion digits number. As such, the wiping out of a civilization building adventure in a simulated universe among quadrillion galaxies and *universes* is sort of a *non*-event, from their point of view (not ours).

Many, who're prone to think like medieval people thought “Earth is the center of the universe", have a hard time to conceptualize how small earthlings are or could *be* in the big scheme of things. Science allowed us to see just how the moon is not a metaphysical being, nor the stars and how we can walk on the moon (unheard of centuries ago), or maybe one day in another dimension if we make it past that level. Among almost 8 billion people on Earth each year, only 1 to 3 get Nobel Prize in Chemistry or Physics. Perhaps, naturally, for every 8 billion civilizations in space, only 1, 2, or 3 *may get* past a certain level of development, avoiding self-annihilation. Moreover, *in* 1870s, science was quite primitive and if you told *someone in 80 years humans will discover a weapon 0.3 billion (1945, 15 billion g TNT) or* ►►►►► *1 trillion* times ◄◄◄◄◄ *(1961, 57 trillion g TNT) more powerful than a grenade (52 g TNT), which causes windows to shake and break 500 miles away, they would think you're dreaming. Yet, this is exactly what happened.* Today, *80 years since WWII*, some humans might be closer than centuries, *just 0 to 80 years away, from the discovery of something* ►►►►► *1 trillion* times ◄◄◄◄◄ *more powerful than nukes, that kills all humans within 30,000 miles (above or underground)* within *10 seconds, something that penetrates any shielding system, and even people in nearby 10 solar systems*. ☺☺☺ What this means is that one day we will get to a point where we can't afford to behave in the same way, as when we had weapons like swords or grenades, because the risks of telepathy diffusion or of unkind imagery, music, etc causing agitation in mass consciousness and then in some leaders *can lead to the end of our civilization experiment on earth in 10 seconds*.

When people realize that *this stuff could happen within 2 or 80 years*, or 4 centuries, it becomes more urgent to ban all violence and war imagery in movies, songs, literature, all threats, intimidation and move towards full nonviolence and the end of all human-human war as a way of solving disputes. In any event, most people, like in the 1870s, or even 1910s, don't think 40-80 years from now something could be discovered that makes the biggest bomb today look like a sword or grenade. Even testing something can go wrong and wipe out humans, *without an actual war. Before Hiroshima, USA nuked itself in the* July 16 1945 New Mexico Trinity test *that detonated 100 ft above ground, and thus the US military produced possibly 100 times more long-term radiation (fallout) in 50 states than Hiroshima (airburst bomb detonated 1640 feet above ground,* the higher the less fallout*). The US military destroyed USA DNA in order to* keep secret the alleged “*first*” human atomic test at Jordana del Muerto (Dead man’s Journey or the Journey of Death or mortality), *2 days before the 20th anniversary of the publication of Mein Kampf by Hitler.* Mindless scientists didn’t detonate it on a remote uninhabited island at high altitude first. *Likewise, billions of aliens species wiped themselves out, using the same logic.* ☺☺☺ *Or using it on a small scale (small country or area) and going out of control due to misunderstood physics and wiping out everyone* in *10 seconds*. The real altitude and first test, may have been different and earlier on June 30 1908 at Tunguska, Russia, 6-30 is 666 symbol of the CIA; recall that

empires controlled all news and *could produce millions of fake 'asteroid, bright sky' reports*, like today spy agencies, Vatican, etc create millions of fake miracles reports and fake books, disinfo on 100s of topics, etc, to deceive the masses into submission to 'Jesus' or etc. The *public* always gets a *fake* version of history as the spies section explains in gruesome detail over 50 plus pages. A guy, using the fake name of Robert Oppenheimer, from Germany, claiming to be Jewish (*likely not, unless USA founders were all Jews*) in order to immigrate to USA and *not raise suspicion he's a German, Russian or British Nazi*, headed the Manhattan project to develop the atomic bomb. He's called the "father of the bomb" since he contributed 10% to the atom bomb. Maybe he was Jewish and all his ideas were his or beamed by telepathy gadgets by others who're gentile, unknown. What if the so called "top 10 co-creators of the bomb" being mere public relations disinformation showmen whose brains were written by the ANONYMOUS CREATORS OF THE BOMB, who figured it out in 1905? Sort of like Nobel Winners are often mere spy showmen, not the real inventors… (the handlers of the official inventors) and *real* science *is not public*. Hidden unknown underground universities where real inventions occur, like USSR cities closed to the public? "Germans", meaning possible Jews or Russians claiming to be German Nazis sent 3 famous German physicists to the military draft, to delay the German nuke program, unless the so called 'Jews' of Manhattan project were actually Brits and Germans who used 'Jewish' cover to hide their MI6 employer, as Britain maybe wanted to nuke Japan well before Europe hostilities started in 1938. Few know when the bomb was discovered, but fission was obviously not discovered in 1938 as Wikipedia claims. It was much earlier… USA probably had the bomb since 1930 or even 1908 when FBI was created , the 1908 year when the Tunguska airburst (higher altitude than Hiroshima, maybe 2-10 times higher) nuclear attack happened in Siberia and the masses were brainwashed an asteroid hit, like they lied to the Portugal people that the sun danced in the sky at Fatima in 1917 miracle.

Perhaps, after the alleged 1908 'nuclear attack on Siberia forest', a safe remote place to test a new tech without Russians knowing what hit them, the FBI got busy to co-create the 2 world wars, Nazis, 1917 communist revolution, Spanish Flu, Israel, to wipe out competition and make USA a superpower. If you read chapter 4.1.9. and 13, 14.7., you realize that WWI, II, Spanish Flu, COVID19, and every major war has been planned meticulously in ADVANCE. However, if small (watch the tone of content and emotion vs South Korea teacher), medium or bigger nation discovers a device that wipes 8 billion people in seconds in the entire solar system, except a few 5 miles underground under a mountain who live in a shielded underground town that only they know how to create the shield for, then they can use it if they can't win a war with normal weapons and the weapon won't affect the planetary ecosystems, animals, plants, climate, etc. They know exiting the surface will mean being killed by the enemy, so they can't survive forever underground, so they will wipe out the rest of humans, even surface humans are thousands or

even 1 million times more numerous than those in the special town, the only safe town (shielded) in the solar system, if fear and anger take over; the bigger the town, the faster to restart civilization, the more likely it is they will press the button that ends the others. In times of extreme stress, generals will sacrifice many of their surface citizens for victory, due to the anti-life culture on our planet and the lack of non-killing ethics and lack of eterni music, which is only 0.1% of all music at best. Even neutral countries not engaged in a war, who see others almost destroying the planet with nukes, may use it, to save the planet, animals, plants without which the neutrals may not survive either. However, things can go wrong and all in that town may die eventually too, so we need peace. We're about 80 years since nuke use, what if someone ALREADY discovered something 1 billion times more deadly, like nuke was vs stuff from 80 years prior, but keeps silent about it for obvious reasons? ☺☺☺ I don't believe they did, but I'm just saying, a hypothetical scenario☺☺☺. This use is truer when the enemies of a defeated nation are cruel and have abandoned, in military music, military doctrine, etc, all compassion, gentleness,☺☺☺ kindness, respect for human life (in the World Peace talk), like many generals did. This shows the need to change military doctrine, ethics and procedures to unify all armies and cultures into one Eternia, one language for all. ☺☺☺ Without a focus on *healing*☺☺☺ *gentle tender soft nurturing* grace and compassion for all, ☺☺☺ *9000 times* stronger than ever in history, it is almost infinitely hard to achieve peace with so many nations, spy agencies, armies, languages, cultures. We can take the most spiritual stuff of each culture and unify, create the most freeing truth, not fraud, based, spirituality that all agree on, without being forced to believe, when there is no evidence, thru brainwashing; use maybe, perhaps, we don't know, this could be true, instead of "this miracle happened and we have no proof". ☺☺☺

The hope of the optimists is that they try discover a device that uploads a new mind in 8 billion people outside the capsule, erasing former beliefs. The new mind for all (easier to create an identical mind and memory than individual one that requires a lot of reading of all memories) could be that they're part of the galactic peace corps and they have no idea what crime is, what violence is, as all those memories are erased, they only know how to be the angel of verses 8-40 of Immortalist Anthem. *This allows them to deploy it fast, without waiting extra decades or centuries to first read the entire mind and then create 8 billion individual memories and minds, their memory will be of "training to bring infinite kindness to all,* via the new sports, etc or generic stuff, working with thousands of others in various fictional environments to transform this world into a paradise". We can all hope all will be fine and this 'humans end in 10 seconds' discovery will occur many centuries from now, not in our lifetime, though sometimes these discoveries that can end us all in 3 seconds could also make human lifespan extend 10 times in one generation, everything being dual use when applied differently, such as to wipe out all viruses, bad bacteria, arterial plaque deposits, etc, rats, big cats, bad aliens if we can't have time

to develop nonkilling weapons for their brains to become peaceful, carnivores, etc that kill humans or animals, thereby disturbing the quantum field, by 5000 killings per carnivore, any biological form that kills or damages us, all termites, alien drones, alien artillery shells, aircraft, weapons systems or ammunition of any type aliens use, etc, all needed is one copy and then all similar weapons no longer work, so it allows 0 killings in a defensive war waged by immortalists on invaders. The aliens referred to here are the newbie civilizations, not the hypothesized Eternal Light (not physical light) Body Immortals who wouldn't be killed by all our weapons aimed at one Immortal alien, due to control over tiny particles our physics doesn't know (and 10,000 galaxies at once, even black holes, white holes connected, creating a circuit to run infinite energy to power interdimensional transformations of cosmic scale, etc, plus inter-universal portals) that enable instant recreation of a material body they choose to materialize for us to know they exist, after 1 trillion thermonukes attacked it. Our human combined militaries are not a threat to old aliens, we're like a snowflake for older aliens. A shell chip etc can be made useless by interdimensional particles reacting in a way that alters its higher molecular structure (the tiny subatomic first), so it's easy since few changes need occur from one element to the other, molecule, etc; however, for a 20 year 1 day old human to go back to his age of 20 each day, for a trillion years, so he remains aged 20 molecular system wise, it's trillions of times harder, since trillions of times more small changes need occur, based on atomic picture of every molecule, etc... so, to kill all humans, or weapons is easy, but to give anyone Immortality is a lot harder. We can build a big device in 200 years, but we can demolish it in 1 second. Destruction is always super easy, building a lot harder. Even to live to 500, or 5 million, let alone 9 quadrillion, using this tech, we need first to evolve to eterni music and ethics, tone of speech, etc, since the first version of semi-immortality tech will also enable killing everyone superfast.☺☺☺ The planetary council of Immortals would agree to wipe out in 3 seconds some harmful species of animals, insects, viruses that humans don't need, in a given town, region, continent or globally, if enough energy exists for that (some species don't live in oceans, so no need to apply it to the entire planet, only to first few meters of earth where those animals actually exist, etc - since this saves energy and we can use it to youth people and delay aging instead, for Immortality *for* All).

This is very elegant, you don't need to intercept any missile, shell or anything, you take a special pic of it and then the interdimensional transformations provide free energy to cause the molecular shifts that render the missile useless and all copies of it within a 500 square mile radius or far bigger. So, immortalists will probably be the first ones to be able to make all weapons useless, and bring World Peace, ban human-human war, violence, torture, prisons and also bring one language and eterni ethics, efficiency for all; this is because no other group wants to turn all weapons into a goo that is used to grow food and give life instead of taking it. Immortality tech allows anyone to turn all weapons into useless devices that simply don't work

even if they're not a gel or goo; this means that immortality tech, initially, will be very restricted to those who're the most eterni in music and culture, so they use tech for Immortality *for* All, not killing billions in 3 seconds or torturing even 1 single human with heavy metal or rock music; but anyway, until we have everyone become immortalist, we can all hope we use tech for creating a culture, music, tone, ethics of Immortality *for* All. Nobody will ever walk in fear in nature, as all animals who attack humans will be easy to wipe out globally in days. ☺☺☺ The time is fast approaching when we could all disappear or evolve to a world of Immortals. This tech can also cancel tornadoes. ☺☺☺ Even if it happens 400 years from now, our actions, visualizations, telepathy habits, peace thoughts can attract the World Peace timeline instead of the "*end of humans*" timeline. Kids even are often told by parents that "hey Alex, you need to grow up and see how the world is and not be so naive, or sensitive and not get affected by the rude ways people might behave, have inner peace, etc". Yet, the parents don't tell the kids how to create the world of *gentle tender soft* Immortals where there is nothing rude to begin with and nothing threatening to be immune from emotionally, so the parents mentally perpetuate the "bad world imagery" that kids could be protected from, without creating any image of the future that is positive, but having the kids watching unkind imagery music, TV programs, books, movies (Star Wars for example, which teaches by subconscious expectation creation, among many things, how human beings once interplanetary or interstellar, will by definition fight and maybe wipe out all humans as explained above). There is little material teachers or parents have that is free of the historical violence, but parents don't demand that it be created either, when was the last time parents demanded an "The *gentle tender soft* Peace of the Star Immortals" or "The Serene Star Immortals"☺☺☺ series be created to inspire a new civilization? ☺☺☺ We think the end of humans is a big deal, but to trillion digit number old years Immortals, our 7 digit (a few million) number years old civilization is like the first step of a baby learning to walk, where the baby is the collective of all souls involved so to speak, so having everyone start over (due to the end of species) in another universe to try a similar adventure or other planets (the speed of progress could be faster as memories surface maybe, so they would achieve in 800 years what we did in 100,000), dimensions, is a non-event, something that may happen far more often than we know to countless humanities or soul groups trying to build an Immortal civilization and translate into another type of hyperuniverse structure (see more on this infinitely complex afterlife in Chapter 2). We might even make it to interstellar, but end our civilization via some war; "violence imagery potentially ending all humans" issue will always be until all humans are like *gentle tender soft* healing *nurturing* Immortals or angels without any violence, and able perhaps to translate to another universe.

When humans fight and drop a little bomb, they wipe out sometimes a lot of ant civilizations, or mice societies; if there are big and physically aggressive aliens that fight, when they fight, entire

solar systems might be wiped out as ant colonies or mice societies on Earth, even if their fight is in a nearby dimension, not this one. The question then arises, is it worth fighting so much, when instead we could develop science and translate from this universe where there are so many random things that can wipe us out? Scientific progress becomes more important instead of making new tanks, etc. We don't really know the goings on in the universe, and when seemingly natural events, like supernovas, etc are triggered by actual wars of a more complex nature. Just thinking about this makes us appreciate life much more, because any second all humanity might be gone, our whole solar system, not due to war among us, but other natural events. We could be so grateful and happy that we're still alive. ***When we do simple things with certain chemicals or UV lamps, we often wipe out without realizing an entire civilization of bacteria. If much taller, much bigger than a solar system beings, walk in another dimension, they might cause without realizing a change in our solar system that makes life impossible, so then we see how urgent it is to become interstellar.*** ☺ Besides, bad aliens can try to control galaxies via contaminating all atoms with jets of unknown artificial smart matter that recognizes the neurochemicals of intelligent lifeforms programming them for short lives. T Gondii can manipulate mice to get eaten by cats. Can aliens create astral AI/particles that make humans engage in war, useless activities leading to short lifespan, way below alien lifespan? What is the maximum lifespan of such evil aliens? Can we free ourselves?

13.9. Quantum Noise that blocks Telepathy/Empathy & prevents the advent of a planet of Telepathic Empathic Immortals and World Peace.

On World Peace Day, September 21 2017, my headphones stopped working properly (they were the cheap $1 ones, sound came from one side only) so I went and bought a new pair, which is an interesting coincidence, given how important gentle tender music (the noises we hear) is in creating peaceful healthy emotions and given how the noise hypothesis came via telepathy the next day, after World Peace Day. If we have a church or large gigantic room and a few hundred people gathered, and we want to achieve silence in the room, we tell people to be quiet etc. But often times, we whisper a little too and this causes other people to also do the same and from whisper comes slightly louder talk until there is again loud talking everywhere. The silence would occur if everyone would stop making noise. In the same way, in the analogy of World Peace being silence in that hall or church, World Peace is not going to happen until the noise generated by each nation becomes very small. World Peace can be thought of as a state of perfect empathy and telepathy where one feels the pain of all others and doesn't want to ever inflict the suffering of war and violence upon anyone. The question arises, why can we not attain a state of true empathy telepathy or World Peace? Is there some background quantum noise that jams this soul-soul communication or draws us in fight after fight eternally? ☺☺☺

Perhaps, there is such a noise, and one possibility, which we can take as a hypothesis, of course, is that the noise comes from many sources, including the activated consciousness currents created by the human interaction with any weapon or tool of war, things even as simple as a gun or even a toy gun or toy tank made of plastic, or swords. NASA recorded sounds of planets and all inanimate objects emit a song in some wavelength, a dance of waves, hear Saturn noise for example at youtu.be...c. All objects go thru some quantum entanglement, at micro and macro scale, and basically, since guns, swords thru eons are for example were used to kill or harm others usually, all guns/swords produced will borrow a little of the collective history of the other guns, especially since the human owners imprint these weapons with the intent to "harm or kill" in defense if needed. These thoughts, no matter how infinitely small or rare, have a little energy that draws people more towards the timeline of actually using the weapons. Wikipedia list (select total column to see global ranking) shows the gun death rate in lowest in the world for countries with fewest civilian guns. This handling or even transport (let alone use) of weapons creates a quantum noise, a discordant astral noise coming from the suffering the weapon inflicts on other souls (all similar weapons too), making soul-soul communication harder. Even the mere display (which unfortunately is legal on planet Earth), parade (common at national celebrations, see how anthems talk of war-violence and no anthem talks of World Peace) of weapons creates the "human soul to inanimate object" interaction that further imprints the inanimate weapons with the intent to "use them" and invites the bad war timeline emerging from the current one, and creates an astral noise that makes telepathy/empathy soul to soul harder, misunderstanding easier and eternal violence and war easier. While this hypothesis is hard to prove to skeptics, without randomized controlled studies where people's aggression is measured without them knowing if a toy, toy gun or real gun is in a hidden safe in the room, Chapter 7 presents some studies related to the visible (seen, not hidden) "weapons effect". Even the skeptics can see that just like holy objects, medallions, stars of david, crosses people wear, reportedly quantumly entangle them slightly with all people wearing those objects, the same could be true with guns entangling people with the worst people with guns. ☺

If we have natural elements like uranium or whatever in many mines spread all over, they cause no noise, but if we process them a lot and make a thermal nuke, the explosion is very loud, shattering windows from 500 miles away sometimes. To use a similar analogy, when a Civilization of Immortals has weapons for defense against "bad aliens" but never uses or displays them, such as ascending into another universe to become invisible (so as to not kill anyone, but just to preserve the Civilization of Immortals), it's like with uranium that is left alone in nature. The moment they start brandishing their weapons in parades and threatening everyone left and right, telepathy noise increases by leaps and bounds, making it harder to achieve peace and receive assistance from Elder Immortals or Older Civilizations of Immortals. So, we have this

culture worldwide, to have guns, parades, but all this stuff might do is create extra noise making understanding other humans harder, at least that's the hypothesis. Immortals who don't kill obviously don't need to have guns, like half the people have in many countries. They probably know about this noise and temptation to use existing once the weapon exists and their civilization is all about Life, not about death and killing. ☺☺☺ Naturally, we think inanimate objects are dead, static and silent, but there are trillions of atoms with electrons spinning and things going on; the objects are all very alive, full of noise and life, and quantum noise as a result of interaction and attention from human energy fields. Some chemical mixtures, upon being touched will explode and make a huge noise, like explosives. So, it appears very silent, but it becomes very noisy and the probability of it exploding upon being touched makes the quantum noise increase as a person approaches it. This is true even with harmless objects like watermelons, pineapples, etc which can drop by accident when touched and make a noise or hurt someone. If the weapon touched or displayed is a force field device held by some policeman that just freezes a person in place (to prevent the agitated person from harming anyone or self) and the device can't kill, obviously the astral noise will be much lower as a result of touching or displaying, as this is a Civilization of Immortals where killing is non-existent. Hopefully, we will get there too, maybe soon. ☺☺☺

We all hear about preventing heart disease, diabetes and how we could be focusing in medicine on prevention more and less on cure, saving millions of lives lost prematurely to this or that disease. In a world of Immortals, the Ministry of Health is perhaps engaged 99.99% in prevention and 0.01% in cure, Interior Ministry on 99.99% prevention of violence and even the prevention of negative emotions (the root of all crime), the prevention of private or public display or parade of "weapons, guns, violence, rough speech, blood, Halloween severed body parts made of plastic", etc. Ministry of Defense would focus 99.99% on prevention of war thru meditation, World Peace Parades, Culture, Music, Plays, Theatre, World Peace Gratitude, Gratitude to the "Peace and Love we have in our civilization, the *gentle tender softness* that pervades our civilization", etc. And 0.01% on actual "solving of conflicts" thru healing vibes and communication, without obviously there being any violence.☺☺☺☺

We hear often that diabetes kills 1 million people yearly 10 years before their normal time. If trillions used in war would be used in healthcare, maybe fewer deaths by a large margin would occur due to diabetes and more due to aging. Some people tend to trivialize and underestimate the deaths from wars, saying that in wars really, only half a million people died for example in Iraq. But the tragedy of war is that thousands more committed suicide on the US side and many more relatives of those dead have their lives shortened by 10 years as a result of the trauma of the death and the same happens with displaced Iraqis, 15-25 million affected by the chaos, pollution, destruction, etc... the physical and astral noise of war, so we end up with tens of

millions of people dying a few years earlier, since healthcare collapses and people remain in the more primitive infrastructure, water quality, crop quality. So, the casualty of war is bigger and it doesn't even stop there, because kids and teens, or young adults see this stuff going on and develop a very bad role model and expectation set for their lives and future, even if they see it on the news happening elsewhere and live in a peaceful country. This hopelessness is a very strong factor that shrinks lifespan, crushes the optimism of centenarians, leading to a shorter premature death by indirect poisoning of "consciousness, healthy emotions" via the violence in the news. So, the death toll of war is always far greater, as the violence of war also desensitizes gang members and others to commit violence and destroy millions of lives early thru drug addiction and alcohol etc and the police forces have no manpower to fight and contain gangs when we have so many people fighting wars. So, if you look at it, we today say that the leading cause of death worldwide is heart disease and some few others come after it, but war may be one of the main causes of death, because "heart disease death" is premature death and the premature deaths from war are huge, even if very hard to correctly estimate, maybe war causes more deaths than anything else (including heart disease) thru health neglect due to the somewhat empathy-less world we live in where we spend 4 trillion on drugs, smoking, gambling and alcohol and 2 trillion on war yearly. In a warring world of no *gentle tender soft* conscious breathing and ☺☺ positive emotions ☺☺, where people get angry often, it's easier to even develop heart disease and diabetes and no longer care about one's health, because after all, we can be blown away by bombs any time. This is another impact of war, people become less concerned with health and more with war news. And people become entrained in that volleyball of negative threats and accusations that pollute the feelings, minds of billions making it all the harder to meditate, to consciously breathe and maintain a healthy heart rhythm, etc conducive to a world of heart-healthy empathic telepathic people.☺☺☺

We have created a culture, over millennia, that glorifies the display and parade, the ownership and use of weapons of all kinds, but this may actually be a huge block, a huge noise creator that makes it harder, much harder, to hear soul-soul and brain-brain communication, to hear Telepathic Immortals or spirits or the entire human species superorganism, talking to us. This noise might cause us to more frequently filter out the peace messages and march gleefully unaware towards “short lives chaos”, as we have done in a million years of civil war on planet Earth or however long it has been. Some think that the banning of display of violence, war, weapons, etc is bad, but this is exactly what we might need globally if we want to achieve a world of telepathy and empathy, i.e. peace. A weapon that is manufactured, but not used, makes a quantum noise, and the noise increases dramatically when the weapon is thought of, held, used in training exercises, making it all the harder to achieve the peace many well-intentioned people hope to achieve with the weapons. The noise is so loud that the whispers of

the angels of peace, of the Immortals or other soul's cries for help are unheard and we plunge unaware towards eternal chaos.☺☺ Many people believe sincerely, that they're doing the best that can be done for World Peace by maybe being a soldier or whatever, using weapons and developing better weapons, but it might create actually this noise mentioned here that makes empathy telepathy and World Peace much harder and the risk of miscalculation, war is higher, leading to a negative feedback loop that enslaves the planet in eternal civil war.

We ban CFCs or coal or polluting chemicals all the time, globally, why can't we also slowly move towards the banning of toxic polluting violence, war, killing, display of weapons, displays of violence in movies, songs? These war filled movies cause people to feel negative emotions, to release life-shortening catecholamines from these suspense-filled thrillers and horror movies and they're or might be the perfect tool of demons, if such beings exist, to bring world chaos and death. Humans imitate emotions and behaviors and whoever tempted others to do evil, has done the greatest evil, as they say. Someone will most likely have to pay for it karmically, because these negative emotions and arousals of cortisol levels, of adrenaline and fear are shortening lives and they're as bad as the lead in water sometimes. Many people just don't think bad movies make a big impact, just like in 19th century we used to put lead in people's mouths and think it's safe and ok and today we put mercury in dental fillings. ☺☺☺ Even if the hypothesis of astral noise is only partially true, any alien or spirit or Immortal visitor looking at our planet would be probably amazed at how many military parades we have and how few World Peace parades we have, how many "tenderness kindness lacking" sports games, events, presidential tweets we have, and how few World Peace events and presidential tweets we have. How many world leaders had World Peace day related social media posts or World Peace events or parades on September 21 or any other day? ☺☺☺ If this noise of weapons, objects exists, an old Civilization of Immortals could use this noise to locate and disable (render harmless) any weapon, ensuring a world of peace. Imagine if on earth we would have a race (like space race) to dematerialize all weapons used to harm other humans, which can be found by the noise they create. Then, the whole world would have a world of peace, with nothing to harm others. Since humans are innately against physical violence in general and always use weapons to kill others (since it's much more detached), violence would diminish a lot probably. That seems like an environment where World Peace can flourish easier. But since this technology is eons away and only in the hands of Immortals most likely, we will have first to become very long lived Immortals to get to that stage, i.e. to become peaceful the traditional way. When people wrote anthems centuries ago for this or that country and included so much bloodshed imagery, words like bombs, etc, the world was different and a war did not risk to wipe out humankind. It was more acceptable. But today, a global war can wipe out human species, so it makes a lot more sense to change our media, anthems, ways of speech, etc to minimize or eliminate any imagery,

reference to war, violence, or even being mean to others in any way. People forget that they have a state of relative peace, but any second, the life of all humans could end thru world war. Perhaps, we humans have been given another day, another chance by God and the Immortals to bring World Peace and try not to self-destruct. When we take the freedom to live in such a "peaceful" world for granted, we might lose it and with it all human civilization. A lot of crises might have been stopped by Immortals from becoming our end. But, since we're nano babies, we're loved deeply by the Immortals, as a mom would love her nanosecond old baby. ☺☺

One of the biggest illusions (like “Earth is flat or center of universe”) could be that "people need to have guns" or "countries need to be armed to the teeth" in order to bring World Peace. However, what happens in real life sometimes, is that for about each death that was prevented by a guy with a gun (for example a civilian having a gun when there is a shooting), there are 100-800 other deaths due to suicide with the gun and homicides. The argument that the good guy with the gun saves lives is used by gun proponents to justify people having guns and killing everyone left and right. ***The bad guy with the gun would not use the gun if it was illegal and nobody would have guns. So there would be no need for the good guy to have a gun.*** If in a classroom of 193 people, a guy comes and gives guns to every kid, one of the kids will get angry and shoot others on a bad day maybe years from the moment the weapon sale occurred. So, the same thing happens on the world stage, the more a country arms people and nations with guns and weapons, the more the country (mortal civilization) increases telepathy noise and make it more likely for a lot of wars and destruction to occur, leading to the fall of that civilization or empire over time by the physics of action and reaction. This is something akin to a great self-deception by confirmation bias that makes it all harder to achieve World Peace. Everyone does it, all big countries do it, and many empires have come and disappeared without a trace. It's a question is what do we want to happen with our countries 40 centuries from now? Why not achieve ☺☺ World Peace ☺☺ now that ***for the first time in history all human beings can be online*** and see how much destruction war causes daily worldwide? If all humans are the children of God, **killing other people in "patriotic wars" is killing the children of** God. If you kill someone's child, the parent of the child won't welcome you in his house probably, afraid you might kill his other children or teach them bad things. In the same way, the Immortal Lord of Heavens or God may designate special places of healing for the people who have engaged in acts of killing and wars, keeping them at a slight distance from God and his most frequented realm. This is a metaphor for something infinitely more complicated as explained in Chapter 2, with millions of ***universes*** within ***universes*** and time loops in the afterlife with time differentials. The urgency to eliminate this perpetual offending of God, which killing in wars and in shootings or homicides is, is not present today, as it was never that urgent either in the past, but the Internet makes it more clear that this brutal behavior occurs daily somewhere and that we can end it and

probably make a better impression on God, even though God fully understands we're nanosecond babies shaped by the historical inertia. How many people blame a “physical aggression filled” media creator for the killing of some people? Not many. Usually, the blame is put on some group of people, or country or regime or individuals doing the bad things or killings, but not on the people who intentionally or unintentionally influenced a person to do bad things. A violent song or movie creator, a journalist who always reports the most horrific and inflammatory stuff, etc gets no blame when his movie inspired a guy to harm others. People often treat the symptom, not the cause. Sometimes nobody is outraged at a movie creator when some guy is shot by police when he tries to be physically aggressive because of a movie that inspired him. A movie can be created now, a person X sees it and that image plays for 20 years in his head now and then. Then another physical aggression filled movie D is released and watched by guy Z, who later does an aggressive act due to telepathy diffusion from guy X recalling movie D; it was mainly due to a 20 years ago movie seen by X. The movie creator gets no blame, even if it is 99% the cause due to the human brain processes. It's obviously not right, or gentle tender soft to have all these people imitate, which we all do, and then get in trouble. We're fundamentally intrinsically imitators and even totally mentally healthy people can be strongly influenced in a negative way thru memory formation and replay to behave unethically, so it's natural that you would try to eliminate negative and aggressive acts in movies, songs, etc if you want crime, violence to disappear. Even walking down the street, one can enter brain entanglement with another person and pick up a negative thought the street guy got from a movie or newspaper, without knowing it. If this negative thought or joke is said or acted upon, it may cause some upset or violence even and the newspaper gets no blame. The only way to eliminate crime completely might be to gradually filter out all bad examples and content from all media, as crime rate drops slowly.

When a bad thing happens it may be that 10,000 people contributed to it, not just the person doing it, making it much harder to put blame on one person. Because of this, Immortals who're Telepathic and aware of transfer of ideas work to solve the root causes of an event, instead of scapegoat to the final guy who gave expression to that society's issue. The Immortal who does something bad is not the "evil", but shows the Immortals Society where they have diffused evil (or imperfection) and how to change to become ever more perfect. They don't scapegoat the mistakes of millions on one person, since they know all things happen interconnected and all are creating all individual actions. Perhaps, they're more honest and they realize that any bad action is created by the entire civilization and given voice by an individual, as explained in the scapegoating section. We're never as separate as we think we are, especially for Telepathic Immortals. ☺☺☺ Because of this enormous unity and loving kindness and awareness, nobody does anything bad, instant healing and forgiveness takes place as all realize the WHOLE society

did it, not a person, the boundaries of the people being more hazy, more blurred, more like spirits and clouds of energies, with the illusion of me, me, and separation being less strong. ☺☺

Another analogy to develop empathy is that God dwells in all people, God is our Tender Soft Gentle Immortal Mother, and people don't want to harm (let alone kill) their mother. This is an exaggeration but it's a way of conceptualizing that even if people harm the garment or body of a soul only, it's a little bit like being mean/violent towards their mother. God is probably or possibly like the most Immortal most tender loving being there is, so God understands why people growing up in a society come to believe that violence or war is the answer, so because of that, naturally, one can't but love with the most tender gentle softness all these people who believe in such ideas, unconditionally, as God does love his/her nanosecond babies.☺☺

13.10. Which planets get what telepathy, Telepathic Immortals vs verbal mortals

If we had some advanced knowledge and we wanted to share it with some planet, we would give it to the most peaceful *gentle tender soft* civilization, we wouldn't give it to a warring planet. If God sends a spirit to share knowledge with 10 galaxies, the spirit will choose first a planet that is the most gentle tender *soft* and saintly. So that's why it may be the case that our scientific progress is greatly slowed down and hampered by our lack of World Peace, of *gentle tender softness*. After 5 centuries of science, we hardly understand the human body and many diseases. If we think about possibilities, we realize that quadrillion trillion-year-old spirits can exist and that they would advance telepathy or any other science, when the planet is ready and has achieved World Peace and total non-violence. This is why we would need to teach our children to speak lovingly, to only listen to *gentle tender soft* music, to radiate only Immortal *universal* loving kindness towards all beings, to become infused with the qualities of an angel which then attract the nobler spirits who have preferences too. We have some preferences on earth, we don't give knowledge to anyone, and so do spirits have preferences. If we would teach kids to speak tenderly softly lovingly and to consciously breathe and to always heal, uplift and elevate all and see God in all, we would be able to attract the grace of God and achieve World Peace and better science. Thru global agreements we can make all media, tones of speech, literature 100% healing *nurturing* positive universally kind compassionate (removing so much negativity, aggression and uneterni speech now) and infuse everything with the peaceful gentle *tender* soft Godliness we so much want others to have but don't offer it to them. Then our science will take us to amazing☺☺☺ new places, not just because we have more funds otherwise spent on wars, but also because telepathy will enable transfer of novel ideas as we won't use the ideas to harm others. This hypothesis may be true. The second reason spirits don't bother transmitting certain forms of telepathic knowledge with bad planets, civilizations might be that the bad planets or solar systems tend to self-destruct anyway, so it's a waste of effort:

13.11. Do bad thoughts collapse civilizations and good thoughts lead to Immortal Civilizations of Telepathic Immortals?

The civilizations of mortals sometimes deify toughness and extreme violence against the "bad guys". What this does is programs the minds of some people at least, into engaging in very negative emotions towards enemies, ensuring they will totally fail to turn enemies into friends and ensuring that sooner or later, those same neural circuits will be reactivated by mistake when dealing with friends leading to division within the Empire/Country/Planet and cracks that later manifest as splitting the Empire/Country/Civilization and leading to its downfall and later disappearance. The Civilizations of Immortals realize everyone is a femtosecond baby (learning things); thus it maintains an angerless state of Immortal universal loving kindness, compassion for all, even "enemies", enabling them to create the habit of universal positive emotions, and never taking the risk of accidentally routing into negative emotions circuits of the brain when dealing with friends and those in the same team. That's why people (who take risks in being mean with others or even simulating it in comedy, joking) run into problems more than the rare who're protected by the habit of *universal* loving kindness. ☺

If we think about Laurel and Hardy comedy videos, they depict a lot of unintelligent and rather physically or verbally aggressive or hurtful things, yet they're very funny to many people and make people laugh and relieve themselves of the stress of our violent world of eternal warfare. The side effect of these comedies that simulate the status quo of "short lives, primitive tech, violence, sarcasm, bad language, being mean to others, negative emotions" is that they also reinforce the subconscious mind belief that this is our reality and we can't really create a Civilization of Immortals who live to 900 in Eternal Peace and gentleness tenderness softness, with advanced technology. It could be thought that it is unethical to 900 year old Immortals to cause laughter in comedies about negative imagery which might badly unintentionally influence the subconcious minds of the watchers to perpetuate the less ideal behaviors. Comedies could be more often about the limited intelligence of humanity and how we make endless assumptions and hypotheses based on limited perceptions. We can't even understand the basic things about human body, to increase its lifespan 3 times as we did with worms, yet some think they know what the structure and journey of the soul is for 5 trillion years after death. That's quite funny. Comedies could be filled with *gentle tender soft* tone of speech and focus on the amazing future of World Peace and Immortality, where future people laugh at the "Paleolithic" current technologies (past to them) of fleeing hurricanes, when you can just stop them; or laugh at using fire trucks, when with advanced forcefields and detectors, any small fire in a house can be extinguished instantly. This may seem like Immortals of the future having fun at the expense of mortals today in a way that lacks *gentle tender softness*, but those people just live far longer and to connect via Telepathy with them, to the future, and to change the status quo, we bring

images of the future more and less of the past and present technologies; it can also be presented in a way that removes all sarcasm, as people of the future would not laugh at us, but we would laugh at how hilarious our Neolithic tech seems as we time travel. ☺☺☺ The comedy could depict studying at future history classes how modern people used to fight over unproven hypothesis about what happens to the soul for 5 trillion years after death, when they could not even live to 300, let alone 900 or 80,000 like the tree colony in Utah; or the hilarious nature of our dietary guidelines and how they change (some of Dr. Greger's videos touched on those, but many other people), and studies showing people taking much more than guidelines, live longer; or the comical mercury in people's mouths, the most toxic metal on Earth, evaporates, creates methylmercury and is touted as the cavity filler of choice, while making people (unable to eliminate mercury fast) sick. While this is a sad thing, making a comedy about it would bring awareness leading to banning it as Norway, Sweden did and increase human lifespan. Normally we would not laugh in a comedy about death and people getting sick from mercury or whatever, unless it would bring some awareness to some poison or something that is very detrimental. Comedies about many funny things in the history of psychology, chemistry, physics, miracles interpretation, ESP, the amazing life of Immortal Humans living in peace in many worlds in the future, about the ultra limited condition of human knowledge (the absence of anxiety of Immortals and the limited human knowledge are explained in detail in Chapter 2) and how smart we think we're sometimes, yet all we know, might seem as a totally rough approximation later, as the earth, fire, water, wood, metal 5 elements of yore seem hilarious compared to the 120 plus elements today, etc. Comedy could make people laugh, while helping people learn chemistry, molecular biology, physics, longevity, the creation of Eternal World Peace, of a Civilization of Immortals. Comedy would make us laugh, maybe not as much as the laughter evolves due to a more refined neocortex that controls the limbic system much better (everyone is in a state of universal loving kindness, helpfulness and blissful happiness of helping other shimmering Immortals to live more thousands of years and expand God's Ascending Immortality in this universe, much like in trance states of cosmic consciousness and eudamonic happiness, without negative emotions being present much at all). Comedy would help us develop the deeper understanding of the eternal tranquility of the Immortals feeding on the Ever Expanding Understanding of the multi-dimensional universe and the ☺☺☺Boundless Splendor of Helping Others to Live Longer and to Bring God's Perfection in this Universe. ☺☺☺ In a world of Immortals, there is far less stress and anxiety, because people don't die before 900 or 9,000,000 from ANY cause, and thus there is far less need to laugh and roll on the floor to destress after an “insane day at work”, as stress doesn’t exist as today and humor is more elevated and refined, dealing with the ever expanding understanding of Ascending Immortality. Since we would need to clean the mass consciousness field of violence, to achieve Immortal Peace, we need clean our comedies too, not just movies, music, scriptures, schoolbooks of ungentle untender tone of

speech, depiction of any violence or mentioning of death. ☺☺☺

Anyone honest enough to evaluate the jumbo mumbo our brain creates every night when we dream, realizes the brain can make errors. Once the circuits of harmful intent or vilifying perception are activated with "enemies", they're more likely to be used with the "friends" not just "enemies", by mistake, especially when tired. For example, if we practice a sport 3 times more daily we're better at it, same for chemistry, the neurons and the synapses are there, memories activated. When we engage in loving universal compassion 3 times more daily, we activate those neurons more, we're better at it with everyone, including friends and family. We could even argue that this is not so much neuroscience, but as much as is classical mechanics action = reaction force at the energetic level, Newton's third law, same thing with emotions, we can't escape karma or consequences or the force initiated. ☺☺☺

13.12. Let's put the hypothesis of *Infinite Fluid* Intelligence to the test: there are *infinite* or '*trillions*' of ways to World Peace, healing, *trillion year lives for* all, 0 crime or *any outcome* WITHOUT: *stress, rushing*, shouts, pain, violence, terror, torture, war *or many* words (yes, achieved with *3* million *times fewer* words than usual: simpler living, *more* thinking, less talking: 11 companies not 33 million, *3* million *times fewer*, just like the kind Immortalist Anthem got 2272 words vs 783000 words in the violent evil Bible.

God (see atheist definition), the universe or even "quadrillion to the power of a quadrillion, repeated a quadrillion times" year old Immortals or the Infinite Knowledge in the Universe (for atheists) are Infinite Fluid intelligence compared to us. Thus, logically, they know (and favor because God is also infinitely kinder, not just smarter, than us) a "quadrillion to the power of a quadrillion, repeated a quadrillion times" more ways (or infinite ways) than humans to achieve World Peace in 3 months and 0 torture, violent crime in 3-15 years or to get to any collective or individual outcome without torture, yelling, killings, intimidation, terror *(*deified in the Bible, Torah, Quran*)*, mutilation, lies, violence *and* war. *God always prefers nonviolence, or Ahimsa* as Hinduism calls it. This is in stark contrast with Jesus in Mat 21:12, as explained here. Thus, the generals ruling our planet are quite clueless and subjecting the entire population to an eternal war terror reign, in part also due to the public disinterest in ending all violent crime in 10 years (so the World Peace we achieve in 3 months lasts forever), jails, punishing, violent music, and violent methods of "war". God, Infinity means just that: INFINITE ways, infinite in variety too, as explained above. *Our body-brains (not talking about* the soul*, which has little say in the age of global police state and terror,* brain writing gadgets*) are ultra low IQ animals (unless they get 21st century education), almost like lions, wolves who don't know they can live without eating meat, without inflicting pain on deer and animals they prey on, they have even less awareness than 21st century humans of* eterni food*; likewise, humans don't know, having 100s of times*

lower IQ than Immortals (our descendants from the future), that, in order to survive and thrive they don't need to: *inflict pain on,* punish people *in jails (instead of heal them in healing centers 100 times nicer than 90% of houses globally in vibe), prey on and torture fellow humans, to wage war, to be cruel, use bad tone, intimidate*; there is hope though, since bears and various animals shifted to more *vegan* diets when shortage of meat appeared, so human animals too may learn there are 1 trillion ways to peace, longevity, etc without any negative method, without causing anyone any pain, *let alone* killing. Unlike *bears, humans can understand the* concept of infinite resources much better*. When people realize that, they become more understanding of the* ☺ abysmal IQ☺ *of humans, more patient and kind, and why people invented 'boogeyman' entities to explain 'evil', i.e. our 3,000 times lower IQ.* To get from A to B, there are an infinity of ways, that science can discover, so choosing nonviolence has more to do with the loving kindness empathetic tenderness and gentleness depth or character of the person, not with whether they believe in God or not. It's the desire to alleviate the suffering of war, to be kind, that drives people to World Peace thru peaceful means, desire born of character and closeness to compassion. Can we test the hypothesis that "there are trillions of peaceful ways to peace"? It's possible to test it, but it would require *all nations* to *willingly* take part, or at least major powers first. IMAGINE for a second the knowledge of someone who has lived a quadrillion to the power of quadrillion years, not even talking about "to the power" repeated a quadrillion times. How much do they know compared to all human knowledge combined? How do we entangle with that knowledge? How do we access that knowledge? By emulating the Immortals? ☺☺☺

The "Intelligence" community tries hard to *appear* intelligent, as they need useful idiots to defend aristocratic palaces..., but they're not that intelligent, for if they were, they would not cause any pain and damage to any human being, since 10^{90} ways to achieve any intelligence goals exist taht don't involve any stress, pain and suffering for any human. When you lack intelligence, you use torture and endless lies: see why spies usually never yell in enemy territory, as that blows their cover (they need to be always under the radar, blending in, not attracting attention and certainly not police attention), they often yell-torture in home country to intimidate, coerce to perfect Nazi experiments on mind control on innocent unwilling subjects like MKUltra (usually migrants, but not always, they did horrific experimetns on citizens too, not naturalized (which are migrants) citizens, but 5th generation... or older), see if a 'suspect' is a spy or not, etc. Spies are not the angels some youtube channels covertly run by CIA portray them as, they're very evil people usually who behave in anti-eterni ways who torture people routinely (*not in Inquisition ways with physical beatings, but* sleep deprivation subtle attacks, electronic beams beatings, etc, repetitive lies, manipulation*, etc*), even though they try to brainwash you their agency places country above all else, it's just aristocrats above all nations. Spy agencies don't give a crap about World Peace in 3 months, etc, zero violent crime, if they did, World

Peace in 3 months would be all day in the news, this book or the Immortalist Anthem would be the most popular not the hyper violent Bible, Quran, etc, spy agencies are experts at deception and brainwashing, making you believe you did stuff you didn't, via covert torture. The CIA is busy trying to present itself as this amazing hero of the world via ambiguous youtube channels they use to recruit useful idiots for experimentation and torture, mind enslavement and remote control tech optimization. Instead of taking real action towards peace, the CIA, Pentagon enjoy turning people into robots that help CIA turn every nation into slave colony of hyper stupid people. That's why all patriots need to support real reform, not the dictatorship of the military-spies who're unelected and con everyone with fake elections forever. You don't need to be a spy to be tortured, just to be stupid enough to come to USA as a migrant, and then you're a prime target for robotization... torture, organ damage, brain damage via what they will brainwash you is "building resilience for a special mission that never comes"... etc. USA deceives all nations to send good people to them, so they can destroy them and then take over the nations emptied of capable people whom CIA destroys to turn the nations into crap as USA, another slave state of serfs licking the ass of the USA aristocrats. Same technique of all empires.

The rich bastards don't give a dime about World Peace, the dead in wars, about US people (1000s of youtubes and the 11 industries), let alone about anyone outside of USA. The rich control all 18 federal spy agencies, so basically, the lower level people, cops are useful idiots in the global looting and enslavement campaign of the US aristocrats: World Peace and decent shelter is not important, but $1.4 trillion/year of crap products are essential for the rich to sell to the brainwashed masses, all you see on TV is products to buy for these demonic aristocrats' palaces and imperial lifestyle maintenance, useless products of course. The lives of the 8.5 billion slaves don't matter, only the palaces of the top apex predators. The rest is mere brainwashing. It takes decent people to make 11 companies and one national code that prevents deaths from tornadoes, you only need a little extra metal and dome shape to save lives and rebuilding costs (the amount would be negligible vs 3 trillion wasted a year with useless junk), but aristocrats make a LOT more money by destroying the worker's lives and rebuilding paper houses, without raising them to prevent flooding, mold, rennovation work, etc. If the builder, fixer and maintainer is the same, they have incentive to build it right. But when it's separate, they don't they just loot the state, USA, of trillions of $ wasted in useless activities. That's why mining and slaughterhouse jobs for life is the just reward for a lot of these thieves. Not even the most basic human right, shelter that doesn't kill in seconds in a tornado, exists... But LGBTQ does. Food is poison too. You see the hypocrisy, irrelevant rights exist, as long as it doesn't take the $$$ of the rich. The whole political system is a charade to subjugate the whole Earth. No decent gov needs political parties, decent govs are honest, take care of the 11 needs of the people and just do it, instead of playing games 24-7 on TV about their faked elections. Such

pathological liars. ☺☺☺

The spy agencies destroy the human quantum field by teaching everyone to be dishonest, which makes all scientists dishonest to some degree, leading to self-deception during research, causing scientific regress. They also use plenty of torture, pressure etc, which increase negative emotions and teach all by contagion to be cruel. They worship cruelty disguised as "intelligence gathering". First of all, any smart agency, which doesn't exist on Earth, doesn't need any human agent in the field, it has invisible interdimensional drones... They routinely kill, harm people via doubles, but this is not emphasized during recruiting, to avoid rejection, to make it sound like a very quiet, romantic stress free intellectual game of observing and etc. A selfsufficient nation has no need to loot others via criminal spy agencies. Spy agencies are "looking for cannon fodder who can be killed instantly by foreign agencies, in order to loot other nations for the aristocrats in our country, because we're not insterested in 11 companies and 3 agencies for all humans, but in being the rich subjugating the poor, comfortably directing deadly missions of CIA, etc and wars from the serenity of our gated estates and offices". ☺☺☺. They can't say that in their youtube channels, instead it's all about "how quiet it is, how empowering and character angerless poised person building spy skills are", gradual brainwashing to get you recruited as another cog in the machinery of eternal war and deception of workers. It's like the Saudis, they tell African workers one thing, then they arrive, 30 in a room or 10, no free meals, no free housing, pay 4 times lower, passports confiscated, etc. They make it sound romantic, but you essentially join the Eternal War Corps that risk your life daily, and far more importantly, the life of all human beings and all animals too via the 10 second end. It's nothing about Immortality for All, only fraud and deception for the aristocrats to increase looting yield, to defend the Ponzi scheme they call the national state, that gives them the right to enslave the 99% to "defend it from the evil pigs outside the nation". Each nation's elites use the same scam. Every country uses the same tactics for the aristocratic elites to recruit useful 'idiots' for wars. None of the ultra evil elites talks about World Peace in 3 months, end of all deception/violence.

In the science world and in the search for real truth as opposed to the imagined truth (Aristotle imagined Earth is the center of the universe and stars are metaphysical beings), we test hypotheses to see if they're true. We, humans, have tested for eons the hypothesis that "violence and war bring World Peace" and have proven it doesn't hold any truth. One way to test this "there are a quadrillion ways to bring peace without war or violence" hypothesis is for human beings to agree on planet-wide elimination of violence and the reform of the educational system to foster a love of: nonviolence, kindness, nonkilling, World Peace, helping all, ways to remain calm, avoid anger and understand which thoughts or perceptions or hypotheses gave birth to anger or fear and how to address those concerns, perhaps using the 4 questions at thework.com (for any stressful thought, ask "is it true?", "Am I God to know absolutely it is

true?" "who would I be without this thought?" "are there any alternatives to this thought, variations, turnarounds that might be truer, and is there any reason for this to be so?) or the 4 agreements of "don't take anything personally", "don't make assumptions", etc and many other techniques, such as realizing everything is infinitely more complex than it seems, nothing being what it seems. Science already has shown in small groups that peace prevails when kindness and good qualities are cherished, cultivated thru education. Thus, it is reasonable to assume that on a planetary scale the same is true. ☺☺☺ If we try to explain to a cave man about the 300 pages of nutrition in this book, he might say it is nonsense, some random symbols, we would need to teach him basic writing, math, physics, chemistry, biology first, taking us years. Likewise, we can't quickly understand today the sheer complexity of even 50 ways to World Peace without violence, threats, etc easily, even though 200 year old men of the future might easily understand it or spirits who see where we're headed, as spirits or Immortals can be way older than us, accessing more history. Galileo was not understood by contemporaries even, so imagine how much harder it is for us to understand spirit telepathy. Cave man had a very simple oral language, we have more complex more specialized scientific language of neuroscience, chemistry, etc, spirits or people of the future have a telepathy way more complex than our primitive language, just as our language is more complex than cave man language. When they speak to us in their natural language (conceptual non-linguistic, filled with the gentlest softest most peaceful universal kindness emotions that are typical of the top 10 gentlest softest spoken nuns on the planet), we're like cave men trying to read some technical science papers in this book; we can't fathom routinely how little we know. A 50 year old mind is way more complex than 5 year old, and 500 way more than 50. If an Immortal who is a trillion times older wants to talk to us, we probably can understand only a trillionth of what he's trying to say, if that. We live 2,000 times longer than worms, what do worms understand of our talk/telepathy to them or civilization or concerns? Not much. These things are explained in more detail in the 2nd chapter on not knowing much. ☺☺☺ The fixed mindset thinks World Peace or a world of Telepathic Immortals is not possible this lifetime. But the growth mindset realizes that World Peace or a world of Telepathic Immortals (Immortal meaning living centuries at first) is possible, it's a skill that a planet can master. The "peace thru strength" idea of many doesn't mean that people can't agree to a gradual removal of violence from media, literature and, *at the same time*, making a deal of cessation of hostilities in 5-10 years. If you think about centenarians who were against war, you wonder if spirits helped them to live to 107 against all odds.☺☺☺

13.13. Does GOD SUPPORT or TOLERATE war and violence as means to World Peace or maintaining peace?

Many people assume God supports wars, threats, frowns, intimidations, lies, etc and all the things that people sometimes used for eons in their attempt to bring World Peace. The real

question appears then if God actually tolerates such behaviors ☺ of a young mortal civilization of nanobabies, simply because God understands we know not the trillions of peaceful loving methods to bring World Peace. If a 20 or 50 months old baby spills a cup of milk, we don't get angry, we tolerate it, laugh maybe and kiss the baby, hug him, etc, but we don't actually support or wish the baby accidentally spills the cup, especially if it might cause a slight injury to the baby (human being or human soul in this analogy being hurt by the use of war to bring peace). In the same way, for a quadrillion billion year old Immortal or God, human beings are like a nanosecond baby even at age 100, so naturally God wouldn't get upset, God tolerates, and *God also* hugs *and kisses the human* nanosecond *baby* by giving him love and even spiritual experiences of God's Love, Heaven, etc AFTER HE DID SPILL THE CUP OF MILK, or did what God doesn't support, but TOLERATES: war, violence, threats. God may be defined as infinite grace love sweetness tenderness gentleness softness compassion mercy intelligence. However, if God makes it somehow clearer to a soul that there are other methods to reach World Peace, that use no violence and etc it becomes much harder to justify in the afterlife one's support of war, and this revelation of this truth about alternate methods may be individual and part of the learning of each soul in our Earth school. God understands not all people can understand everything in life, just like nobody can be Nobel Laureate in peace, chemistry, physics, medicine, literature the same year. To truly understand something about the attitude of God towards a human action may require some real Grace from God, which once received changes one's ethics altogether. What was important one time becomes secondary now. Therefore, since we don't understand even 999 year old humans of the future and their science and much less Immortals living 3 billion years in another dimension, we can't understand if God supports or tolerates, but we can know we don't know at least, and naturally, everyone will be perhaps evaluated when time comes based on the revelation they received in life thru dreams, prayer, etc. ☺☺☺

Even the way we express this question about "Does God support or tolerate war and violence as a means to World Peace?" is very inaccurate in a way, as it conditions us to use a binary logic. For example, if I meet a stranger from a strange land and he says "it's cold now in my area", it might mean 50°F to him. But to the person hearing it, cold means 20°F. So the listener believes, without questioning, that he meant 20°F. This is a simple example of linguistic misunderstanding due to the fact every person gives a different value to a word, based on their memories, experiences, feelings, mood. The same thing happens when conflict arises between people, we hear the LANGUAGE translation of what others tried to convey (the mix of all their experiences, memories, feelings, definitions, etc), and we then RETRANSLATE the LANGUAGE into concepts thru the filter of our own memories, experiences, feelings, definitions. So we often times get the exact opposite of what the other is trying to say as a result and conflict arises. This binary logic/language of "cold" and "warm" is different than a 10,000 gradients logic/language of 0.01

degrees between say 0 and 100°F. If we would say the temperature is 24.15°F to the other person, he would understand it exactly. But if we say warm or cold, the risk of misunderstanding becomes huge. In the same way, when we formulate a question in human ethics philosophical arguments like "Does God support or tolerate war and violence as a means to a peaceful world?" we frame the question in a very binary way, that prevents us from seeing the exact 10,000 gradients, nuances in between "100% support" and "100% tolerate". So, then the question would be, could the answer be actually dependent on circumstances? What do we mean by support? ☺☺☺ What is the real meaning of support? Do we mean that he actually is actively siding with one group of people or guiding them to do this or whatever? Even the word support has 5 billion meanings in 5 billion people's minds, it is very nuanced. ☺☺☺ The correct answer may be that the answer can only be given individually by God thru some sort of custom telepathy in a way that best relates to that person's definitions of various words, depending on what they define as support, God maybe would answer 10% support and 90% tolerate or 25% support and 75% tolerate. And then, with that understanding of an inner nature, that is very individual and circumstantial, we would have our own quest to understand what it might mean. Say someone tells us the temperature outside tomorrow will be 70°F, and it turns out to be that way. Same way if we via telepathy get an understanding the gradient to this question is ab% support and cd% tolerate, it is our total freedom to explore, question, learn and see if it is true, just like when someone on weather station said temperature will be 70 (not warm or cold). If someone asks, do you go to the store, or want to? We say yes or no. But if we would say 30% yes because etc, it would be less binary. This binary way of language expression, which allows rapid decision making, has the side effect of creating a filter in our hierarchical way of perception formation, that forgets about nuances and the fact our minds become so much more complex when we're 50 versus when we're 5. In the same way, someone who is 500, will have such a complex mind, we at 50 would appear to them like a 5 year old appears to us.

The complexity of reality is taken away by linguistic expressions that are very binary and condition us to think simplistically. So, what's the solution? Life would be simpler or more harmonious if we would use the words "seems, maybe, perhaps, hypothesis," and we could say that in the future, as we become more empathic and telepathic, we can share more data and even our language sentence structures will shift away from binary and relative statements to more objective and gradient like expression. But until that future, just remembering that reality is always infinitely more complex than our minds or language can express seems like one good way to achieve inner peace and a better understanding of other people, and why they might feel or believe as they do, based on their vastly different life, physical, emotional, spiritual, educational, upbringing, school, educational experiences, because language only expresses about 0.01% of what we're trying to convey. ☺ Like for example, we meet some guy from a

country that hates our country, and we talk to him for 1 hour, we have no way to experience the life review of that person, every one of his memories and how those memories have formed his perceptional lens and way of looking at the world, his education, his relationships with people, etc all of which make what he says ultra hard to relate to or understand for us, with our vastly different experiences. But if we had telepathy, empathy, we could share a lot more of our emotions, thoughts, memories, movies of our lives, etc, and what is said in words would get a far more complete picture to us, why he believes like that and we would be far more likely to understand his thinking, as he would understand we mean well too, if we would be able to relate to him our experiences of our country and what we're like, not what he read in books, etc. ☺☺☺ We're so incredibly limited by language, that often times diplomacy fails. We can't relate emotionally to others as we have no way to access their emotional memories and how they related to whatever. ☺☺☺ If we would do that, diplomacy would probably work 100% of the time effortlessly, but until then it is such a huge struggle for us humans to avoid the suffering that war brings, so our efforts have to be almost superhuman to be able to heal others of negative emotions, thru training perhaps that takes decades. ☺ The human drama is often caused entirely by the misunderstanding language creates. We're so conditioned, to think in binary ways, without even questioning it, warm-cold, good-bad, with nothing in between, that this also takes us much easier into anxiety, fight and flight response and all the stuff that can lead to a deeper misunderstanding later. We get so conditioned also by confirmation bias, it is almost shocking to us to see how others view the world and form their perception, and this makes hearing telepathy vastly different than our habitual beliefs harder. In those cases, naturally, spirits prefer to wait until we're more "gradient thinker" so to speak and realize there isn't only one way to peace, "war" and "violence", but there are trillions of peaceful ways too in many circumstances or maybe even almost all of them, or all of them. And this applies to many other areas of life. We have these "this guy is good or bad" perceptions at times, but it's such a nuanced gradient, he's good from 4 billion points of view, and bad from maybe 2 billion. We would need 10,000 words between support and tolerate invented to be precise, but since that's impractical we would use universal math language maybe 57.29% support.

Our views change with time, as we realize we live in this world, not a fantasy land of ideals, but even then, we can't forget the ideal world of 500 year old or 200 year old humans who don't have any fights and violence. A 40-year-old is having a more complex mind than a 4 year old and a 400 one more complex one, and from this complexity comes also an easier time to understand reality better past ultra simplistic models, leading to better understanding of others' complexity and to less violence. You can often notice it even in human beings, when we're kids, we might be playing some rather aggressive games, etc, or have some beliefs about war as teens or young adults, but as people age, they more often than not become much more peaceful, gentle and

peace-loving. The same effect probably occurs with people who make it to 200 or 500, you see how 105 year olds have a wisdom and peaceful energy that is kind of different than a 40 year old, they often times see the beauty of life much more, are more positive, optimistic, etc. So one can see how Longevity will most likely make the world more peaceful too, and peacefulness will give us more money for longevity research not war. And the two reinforce each other in a positive feedback loop. I look at myself and realize every single year I become more peaceful, liking more peaceful music, shunning war more, etc, same effect we see in a lot of other people. The music I liked at 18, or other ages is no longer my favorite now, now it's much different, it's what cultivates peace and learning gentler tones of speech, even though I always liked mostly the mellow classical type of music. But even within classical music, there are so many styles of upbeat and peaceful, and perhaps this will happen to human beings too, as we live to 900, we will become more peaceful each century with new musical tastes. ☺☺☺ As our minds and psychology become far more complex, we realize reality is infinitely more complex than it seems, and the old concepts of "the World Peace can only be achieved centuries from now" or "the peace can only be achieved thru war" are hypotheses, not things set in stone. Another level of complexity arises in this "Does God support or tolerate war and violence as a means to World Peace?"☺☺☺ from the fact what one person gets as answer from spirits can be different than another person, because of different lessons that person is learning, and because each person defines a percentage and a word like "support" or "tolerate/understand/accept" differently. So, it becomes almost useless, if we can use that word, to share with other people what we believe our own spirits told us the answer is, since nobody will be able to understand what it means within the context of their lessons, life experiences and definitions via emotions of each word. What something means to me, will mean something else for someone else, if same language used, as this is not like 70.4989°F temperature in a location, it's much more relative and subjective and dependent on many definitions that are so fuzzy and we have no access to others' memories and understandings of words and meanings. This is why, we may not even be able to say that the correct answer is "5% support and 95% tolerate", since this has different meanings for different people. And the answer may be individual, "2% support" for one guy and "100% tolerate" for another, depending on what that soul needs to attain its life purpose, to develop a certain soul quality that life, or whatever. This adds extra layers of complexity which just show how hard it is to give answers to rather abstract theological or philosophical questions in ethics and many other areas. This brings us to another point, which is we can't really know what is the correct answer for other people. But we can respect it, whatever they believe the correct answer is. Because, as mentioned above, firstly, God is Infinite Love, Patience, Understanding, Forgiveness, Compassion, Wisdom, intelligence, Acceptance, and we, limited as we are, have no way of knowing what other souls' lessons are or their correct answers, if these answers are truly individualized. Are they? We have math geniuses who at age 10 do math

problems others can't solve even at 70. But the 10 year old may never solve the biology problems the 70 year old may solve. Each soul chose a different learning path, so sometimes, all their entire life, they won't be able to arrive at the correct answer for a math, biology, or other question, and it is unreasonable to expect everyone to be lucky maybe enough to arrive at mastery of every correct answer in every conceivable area of knowledge, by chance, telepathy or real hard work of hypothesis testing, science. Even when we're right, due to luck, and we find the correct answer (without knowing it even, or having real proof), how can we expect everyone to get the correct answer to that same question when we ourselves can't get correct answers to trillions of math, physics, chemistry problems sometimes? It's asking too much. ☺☺

Nobody can be a Nobelist in every human area of knowledge.☺ Besides the fact with fuzzy questions outside of physical science, the proof one can gather is much weaker, and one can't really know until we become spirits perhaps what was the most ethical thing to do in whatever case. Another thing is that if one's purpose if to learn and contribute to math, the answer to this question "Does God support or tolerate?" by spirits may be “50%-50%” as it is irrelevant to his lessons and life purpose, and they don't want him to over think about it and pay much attention to it at all. But if someone can't handle the truth as it is, and the answer is relevant to their life lessons, the answer may be tempered down, vaguer or one week seem maybe 100% one way while another it may seem less so, as confirmation bias filtering has an incessant fight so to speak with the telepathy received and can't handle the truth even when transmitted as it would be best. If someone would be overburdened to hear the answer is one way or another, spirits may not make much effort to say it ever, or say it's not important, etc. Spirits or God may see the whole soul better, so if a soul who is not very close to God needs become more peaceful, they might say "100% tolerate" as an answer, to make that person focus on peace, gentleness, tenderness, softness. On the other hand to someone, closer to God, who is already very peaceful, gentle, tender, soft or whatever other quality as a soul overall, the answer may be different, depending on their life purpose and lessons and if the civilization of mortals is far away from peace or not. So one can see how different soul needs can elicit different answers and the answer has or may have nothing to do at all with how close or not one is to God or how better or worse one is compared to another soul, it's just that if we have this answer as part of our learning, getting it right and acting on it may make for some soul a much bigger difference than for others, due to their life lessons. This is all good, doesn't mean that if telepathy answer is "100% tolerate" a soul hearing this via telepathy is bad, the soul could be good. What's exciting about the 100% tolerate answer is that this becomes a hope that these peace creation without war and violence methods really exist as potential realities for humanity soon and discovering them will be a little bit like discovering fire, curing many diseases, electricity, reducing child mortality 20 times, etc, amazing, as it would free us from eons of misery. There is

a good to every bad, and "bad" souls can be used to achieve the best things for humanity. ☺ What seems "bad" to someone is not to another, and of course, different to Immortals. It's very easy to dismiss the importance of the answer to this question, but either way, the truth will come out some century, if the truth has a universal value too, not just an individualized soul steering one. The average earth temperature is xyz, but individual temp is different in many locations. Maybe for people whose life lesson is to learn supporting the most peaceful and longevity focused nation on a planet of mortals where wars still happen and wars are not going to stop next 5 months even if all made the choice for peace due to karma, the answer might be 2% support, so they can help the good guys win and later bring a Civilization of Immortals, but people whose life purpose is learning compassion the answer would be "tolerate 100%". Or maybe it would always be 100% tolerate, who knows? ☺☺☺ One can come up with 900 other variations of lessons and see how %s would change. It's hard to understand after all, what the actual design of Earth school is and what the range of variation would be if the answer would be individual, even if within a global range, like with the temperature. Hence the saying "live and let live". We could use telepathy methods or prayer to ask this question over and over and have confirmations. When paradise emerges on Earth or soon before, the answer would become "100% tolerate" for all people, so to bring that future paradise it seems better to think the answer is “100% tolerate”, as we bend time and act as if the future is now, drawing that timeline closer to the present. If we discover a method to make computers 900 times faster and 1,000 times cheaper, as we did, we say “wow, how come we didn't think about it before?” at each step when we discover a breakthrough. It's not like we say "the souls of the previous decades with lower computer tech were really bad for doing it that way because of lack of knowledge". Same way, when we discover peace via peace, nobody is going to think that "souls before were really bad because they didn’t know nonviolent methods". No, they just didn't know.

Human knowledge progresses gradually. God fully understands this learning curve of people and civilizations. We got to the moon because we wanted and we planned it, and humans will achieve peace without war and violence possibly because they will set it as goal and work towards it with that same passion solar advocates have in replacing coal with solar, etc. Sometimes a miracle happens that prevents a bad country from conquering a smaller country (with nicer gentler kinder people) during some battle, like a huge storm drowns all ships and other signs that indicate in places of worship that it was spirits doing it. This doesn't mean that God supports war, it just shows that when things get that bad, God will choose to side with the people who're most tender, softest and gentlest, to help them to one day bring World Peace. God might actually want us to never use any “pain or harm causing” method, but some people don’t know the other methods. My world view is that God tolerates war 100%, supports 0%, in all civilizations, circumstances; it contradicts the "holy" "Word of God". ☺☺☺

Another interesting hypothesis we hear from some people is that "World Peace won't come until all countries are of this or that religion or ideology". However, there is no proof this needs to be so. On the contrary, once peace arrives, it will be much easier for the people with the closest to the truth belief system or religion to perform the most miracles and prove beyond any doubt that theirs is the correct belief system, religion, etc, in a very graceful way that doesn't involve forcing anything, very tactful, amazing & beautiful ☺☺☺, effortless. Simply the most miracles would happen around the people with the right belief system. Galileo Galilei was right, Earth is not center of the universe as Aristotle and everyone after believed; Galileo writings were banned for 200 years, so truth comes out sooner or later, even regarding which religion or belief system is closest to Truth too, over centuries or millennia after World Peace. Achieving World Peace may be far simpler than (and happen 500 years before) understanding better which religion is closer to truth, which as Chapter 2 explains is complex. It's much easier to convert effortlessly without trying in peaceful times than in times of war, as countries are friendly and allow freedom of religion, and of belief... people having evolved past forcing one's hypothesis of afterlife on others without real hard evidence of gigantic nature as with science facts. ☺☺☺

13.14. The downsides of threats, intimidation, violence, terror, torture

13.14.1. Introduction 13.14.2. The value of Nonkilling, the Essence of Immortality for All

13.14.3. The Violent nature of Judaism, Abrahamic Religions, Jewish 'communism' Jews invented

13.14.1. Introduction: When a teenager decides to bully another, and issue some threat, or make an angry or scary face to scare someone else, they often do it as they did it dozens of times before with other kids. But one time, what can happen, due to many unknown reasons to current science, maybe the making of an angry face doesn't become a 5 second adventure. After the 5 seconds scary face, that teen's spirit guides decide to step back, remove the protection, so that less healthy spirits would temporarily, for a few minutes, hours or 2 days, mess around with that teen. So, then, what could happen, the teen would get angry or sick (if he was simulating getting sick to scare someone or to achieve an unholy end) for real, and in that anger he could do something less intelligent, like maybe a car accident or something very hard to forget. There was a miscalculation from the teen of possible outcomes from a little 5 second scary face joke. Same way, when a country threatens another, they're bringing into the minds of millions that worst timeline of war, sabotaging the timeline when peace can occur by the very threat, even if the threat is issued with the intent to keep the peace. The side effects of any threat are obvious: moving away from the ideal timeline as energy is given to the worst timeline and also moving away from the general timeline of a world where only love-peace-harmony exists. Since certain

spirits or the species superorganism may be against any threat in any circumstance as a code of conduct, receiving their assistance may be impossible and damage that nation in the long run. ☺

Military leaders sometimes threaten the "bad guys" with "stronger attack than the bad guys would ever be capable of launching" because they think this "threat" will maintain "peace" and prevent the "bad" guys from starting a war that leads to some casualties. Is there another way? When the military leader is a Civilization of Immortals honest kind loving *immortalist*, who abhores any killing, not a leader who tries to provoke others to attack first to "wipe them out" as many did before so it looks as if they didn't start the war but the "bad" "to be wiped out country" started the war, they got one less used option mentioned in a section above: using a loving eterni tone (perfected over 20+ years☺☺☺ in a special Diplomacy School by a diplomat unlike any in existence, school starting at age 2) and explaining, like an infinitely Loving Trillion Year old Immortal would explain to a human being (nanosecond old baby in comparison), filling the other with ulmost love, sense of being respected, revered, and in a loving calm tone that war brings tremendous suffering (show videos, etc) and that nobody wants war and the 2 countries would win-win if they would work towards permanent peace and joining the Universal or Infinite Immortality Peace Alliance of the Eternal Cessation of All Hostilities Treaty mentioned above, so they never have to consider each other enemies, but one army eventually. The soft spoken diplomat explains also that they love all humans to live to 900 and if they're ever attacked they have to prevent any death of their Civilization of Immortals to be citizens and any human being on the planet if possible, as they're the Hope of humanity to ever achieve 900 year lifespans due to their culture being the first to magnify such focus 1000 fold over all cultures, first political system, first music industry to focus on Physical Immortality and Eternal Lifespan Tripling, upholding nonviolence and nonkilling at their core, in all cases as explained in the next pages. This has to be televised and very clearly made to the whole world to see the response of the Civilization of Immortals to threats, the most loving response ever in history of human beings, that describes perfectly the values of the Civilization of Immortals. Then, if attack indeed occurs, the Civilization of Immortals can reply just one time in history, with such power yet killing/harming none, that nobody will ever make a threat against them for a million years or a very long time. What would this reply be? We don't know, something that they will discover, because the spirits may give them the help to convince all the "bad" country citizens to want to join the Civilization of Immortals and become a province of it or something over time via referendum. This response (which doesn't need to be military at all, but fully spiritual, something out of sci fi along the lines of the movie of the immortalist culture) totally disables the capacity of said country to kill any human being in a war, deflects any missiles or weapons without any damage to own or enemy country or something of that sort (perhaps also turn all people, within 1 day or hour or less into dedicated immortalists, all soldiers too switch sides and

want to kill no human, animal or insect and also actually not kill any human or animal, as all animals are subdued and never attack a transformed human), something that shows how dedicated they're to guaranteeing the human right to 900 year lifespan for every human on this planet who joins the Universal or Infinite Immortality Peace Alliance and the Civilization of Immortals; possibly because the Civilization of Immortals killed no citizen *of the attacking country* and caused no physical damage, used no missiles or weapons, or because the response was so amazing & beautiful ☺☺☺, there is no longer any threat against the Civilization of Immortals and Its Allied Civilizations of Immortals of the Infinite Immortality Peace Alliance by any country, as people realize they're "5 millennia ahead of the rest". Then all will know that the Civilization of Immortals really values the life of Its citizens and the Infinite Immortality Peace Alliance, and *that of all human beings (enemies included, as* they *killed no citizen of the* attacking country) and all will start to consider to join the immortalist Infinite Immortality Peace Alliance, World's First Alliance that doesn't issue threats, and doesn't start wars, wars of words included, that doesn't do word attacks first or ever. ☺☺☺

13.14.2. The Central Pillar of Immortalist Culture is Kindness, Nonkilling & Nonviolence (death penalty is secretly turned into lifetime labor, a deter tool for psychos who don't read the book):

The Civilization of Immortals is aware of the Central Principle of Immortal Life upon which all Immortalism rests: in any circumstance there are a billion trillion peaceful nonviolent, nonwar ways to solve any dispute or threat of invasion by some enemy. This is the Core Value of the Immortalist Anthem. The immortalists will resort to no threat and nonkilling even if a mortal civilization invades their country and they can't stop it (by cultivating loving kindness and the benefits of nonkilling for all) before it ever happens. The essence of Immortalist CULTURE IS NONKILLING, NONVIOLENCE, i.e. you don't kill people, because it's damaging the human quantum field and when invaded, you simply adopt the invading empire "culture" and slowly transform it to immortalist over time, otherwise, 50-100% of your people and 50% of invading army will be dead, achieving nothing but the increase in anti-immortalist energies. We have seen in history, entire nations wiped out, due to their lack of compassion for the brainwashed enemy soldiers, and their desire to fight insurgency which led to 100.00% extermination. The law of Physics is Universal, if you destroy the human quantum field (hqf) by useless avoidable killings, hqf won't protect your nation from extermination. Life is more important than the ego of 'winning'. Plan for 300 years, build relationships, alliances, infiltrate to prevent any *enemy* or *attacks* emerging. The first country implementing this (as a secret doctrine perhaps) doesn't use killing if attacked (any form of injury or torture, terror is killing, just *slower* killing that can take 20 weeks or years, not *instant, so* genocides *in the 21st century often happen undetected using covert means – a slow* killing). This 1st country implementing nonkilling ethics uses only healing (SEE IMMORTALIST SOLDIER ETHICS) and there is no tech developed yet to use nonkilling

defense methods (exactly as people can choose to be *vegan* and spill no animal blood, they can choose to achieve the exact same goals without any violence or spilling any human blood. The quiet can develop a neutral foreign policy and civilization and mind their business in developing their spirituality and understanding of the universe, and by not killing, they can devote energy to space exploration in ways nobody can detect and then once on 800 planets with an eterni tone language, and writing, they will be begged by others on Earth (if they're *even* going to discover the eternis are already on 800 planets, depending on how hidden and camouflaged the civilization is to telescopes etc or if their ethical system allows the revelation to primitive fighting killing enthusiast earthlings that they're eons ahead and nonkilling got them there) to be taught the language and to join the civilization without them having to kill, enslave or bomb anyone to force a primitive noneterni language and culture on them; the cover can be that of a more primitive civilization on the surface (while the inner or 'underground' hidden true real civilization is 900 times more advanced), if that's necessary to prevent extermination by those *not into nonkilling ethics yet*.

This is the application of the *Tao Te Ching* principle of "by not seeking praise, *everyone praises the sage*"☺☺☺ – by not seeking to bomb all to show how 'amazing' their language, country, federation, etc or culture is, everyone realizes how amazing they're and *want to join that country* or Immortalist Union. Instead of remote control of others to engage in violence, remote suggest to discover things in science that benefit all humans; we have trillions of studies and questions in science of longevity, and it's a waste of time for any human to engage in violence that shortens everyone's lifespan. If a big power invades, let them have it, who cares, killing won't solve anything, be kind to all; if they want to ban our native language, let them have it,☺☺☺ learn theirs and inspire them to make it eterni, since *our present language, religion, culture are 1* billion *years behind, like the invader's, from a* truly *advanced one anyway*: from the point of view of a trillion year Immortal culture, both invader and invaded languages, cultures, etc are roughly equally primitive, maybe one 0.00001% better (chariot A vs chariot B vs space rocket travelling 90,000 times faster than both chariots), by the % of the Big Culture (space rocket or UFO). We can think like an Immortal and not sweat the little stuff if we want to live to a trillion. We can't be violent over nothing, for we have no idea which country, individual or 'dictator' is more evil than another, we're not God to decide who is to live, we can have some humility. God can share how to bring peace in any '1 in a billion' circumstance where the choice can kill 8 billion people, if important to God to override brain writing by humans, since otherwise God wouldn't interfere, allowing brain slave creators to control humans.

We are free to think in the big picture, not brainwashing of national army, *awaken to the reality that our planet is a little backwards and violent and nobody almost talks about the value of nonkilling, nonviolence and infinite loving kindness in tone of speech etc...*; except 0.001% of

radio-TV programs maybe. If anything is to be saved, it is peace (*because peace gives highest amount of people a longer lifespan, physical* Immortality *or chance to build a* Civilization of Immortals) in this femtosecond *temporal* short life *world. If there is anything to be saved, it is your soul and other souls in the eternal soul world, by not being tainted by creating useless strife or war or tempting others to be violent which would ruin your soul often times a million times more than you being violent if violence resulting is a million times greater than what 1 person can do;* the soul, if existing in your belief, may some day live on trillions of other planets and civilizations, if it didn't already, so it seems logical to not be attached to one country and primitive system, but to the Eternal Radiance of Immortality and the nonkilling, nonviolence, *gentle tender soft loving kindness* that brings The *Radiance* of soul, Physical Immortality and true Civilization; an individual choice of nonviolence can prevent a ripple effect of violence that kills 4 billion more civilians, but 1 man can't see that well from a human brain perception; for example, normally, we wouldn't think that 1 person could cause 4 billion deaths by a simple bad word or verbal abuse, but in a chaotic situation if it leads to violence it could: imagine a dam that holds a lake of negative emotion that will break when 1 man's negativity is added, and 5 billion will die as a result, it can be a person who did something that our cultures deify/accept: sarcasm and negative insults, comedy that hurts and denigrates groups, and even violence in all countries in wartime; we can't see if the dam will break with our liter of water, normally, it may take 5 billion liters of negative actions so most people have no self-control (Chuang Tzu, 1 in 10,000) thinking the dam would not break with their junk or that it's well below capacity; if the dam breaks with the liter of 1 person is he resposible for all 4 billion or all who put their litter or liters in the lake too beforehand? Of course, all are equally responsible per amount of liters, but it is sad to think you could cause the catastrophe – though a minute or week later someone can break the dam perhaps; violence does nothing except increase chances of more violence and not making friends of the invading empire and eventually preventing 5 billion dead if emperor becomes your friend... *To yield is to overcome*, Tao Te Ching.☺☺☺

Durings wars, poor *civilians who didn't agree with the "war, or the leaders yelling on TV," failed to move to safer cities, like the towns that didn't act as major military industry or other strategic industry hubs and thus were killed – and contributed to the 1.* anger of others who saw the dead *and to the 2.* destabilization of the human species quantum field *by one extra dead, especially a good peaceful type.* So, it's important to value life first, *like* Thailand did *to avoid* violent colonization. Centralization also helps sometimes, like with Ethiopia. For individuals, this can mean even take some menial job, that pays 10 times less in a small city, than to remain in dangerous big cities (first to take nuclear hits), or even worse, to work in a war factory (the very very first hit) to make bombs in a war (any) whose atrocities you disagree with; be like the ☺☺ Quakers☺☺ Protestant denomination, avoid military draft, service, *etc and any war industry or*

big town; people think it's OK when a person dies in a small skirmish between nations, but it can lead to a cycle of events, later to world wars and entire cities being partially or fully wiped out: London ruins (1940-1941, 247 nights of bombing, the complete destruction of churches, hospitals, innocent civilians by Nazis, which led to the bombing of wide areas near war industry in the top military industry German towns later; many other UK cities were bombed too, 40K died, 20K in London where 1 million houses were destroyed), Stalingrad battle ruins not available (Brits could not film Russia), reports state 1.13 million Russians killed by Nazis in 5 months (1942 mostly) and 800K Nazis dead (yet Nazis oddly continued), Hamburg ruins *almost wiped out* (# 1 German war industry city, can you believe that the Nazi leaders continued the war after seeing this city leveled in July 1943? You can, since the Jewish looking propaganda officer (Zionist Jews wanted to join Nazis to help Jews move to Israel), # 2 in Germany, Joseph Goebbels estate was for women affairs, sex positions, not about the altruism/chastity culture ideals he talked about to naive Germans (check out his 40 affairs). Hitler was suspected of being a Jew, hoping to scare Jews so they go to Israel to escape the camps. Where is the Nazi compassion for German civilians, 40-200K dead in 1 week?), Dresden ruins *6.5 km² city center wiped out* Feb 13-15 1945 maybe 25K dead (half Hiroshima nuke equivalent, 110 factories, 50,000 war industry workers, planned substitute capital, see actual bombing 1 min clip and why being in big cities or military base close small cities is bad in peace or war, since you can die due to unprecise bombing happening with little warning, plus fire storms can develop in dry conditions like the ones in a few cities and Tokyo, 80K dead, also when 324 B29 bombers attacked an aircraft factory (like the world's largest aircraft factory in Nagoya became ruins) and other war targets), Cologne ruins huge damage: with little compassion for German civilians, Nazis continued the war 3 extra years after 20K dead in May 1942, Hiroshima (major war industry, 50-70K dead, see video of 75% of Tokyo, 4 square miles of Hiroshima, 1 square mile of Nagasaki destroyed by the 3 biggest attacks), etc having parts of it (or most of it) severely damaged as the video links show. Warsaw was 80% destroyed (% explained here) too by Germans, see British 1946 and 1945 video.

After you patiently gently watch these videos, you will never want to drink alcohol, smoke, party, listen to or sing restless music that subtly stirs up aggression in an already unbalanced humanity in dire need of more peaceful music – but want to dedicate your entire life to Immortality *for* All, *which means peace everywhere, no wars,* immortality *technologies being the main jobs for all, besides a few working on* ►►►►► creating peace via peaceful blissful *healing methods only.* ◄◄◄◄◄ It's very odd how we have Valentine's *Day and yet we have no* ☺☺☺*Love for All Humanity*☺☺☺ *Day, Eternal Gentle Healing* Grace *Day, Eternal* World Peace *thru* peaceful *means only Day, or World* Immortality *for* All *Day. What's the purpose of loving a spouse, if you then end up causing millions to die? The holidays and traditions of our planet are*

quite out of touch with universal loving kindness *and what it takes to bring* Immortality *for* All , can humans be more altruistic and love more than just one person and family? If God exists, he's in the civilians bombed in 1940-2 in London, Cologne, but Nazis didn't care? They did try to love spouses 3 years later when Dresden was wiped out on Valentine's day and all futile cards became ash. How can millions of Germans become so brainwashed to believe the loveless tone of Hitler and the Nazis to be a tone inspired by Bible God or Jesus the Nazis were claiming to represent? How can discernment and/or spirituality be so weak? Has ritual made it so weak, forgetting the substance, the gentle tender healing grace kindness for all human beings? Lack of education, Internet, total control of media, etc? Only 5 million copies in 11 languages of Hitler's 1925 Mein Kampf were published by the start of World War II in 1939 (10 million by 1945), so most Germans had no idea how illogical and violent Nazism was? Gutenberg has it too, html.

All issues with violence on Earth stem from one and persistent big illusion, *that* Immortalist Anthem *busts into nothingness: it is not the religion X, country Y or ideology Z, ethnicity W,* it is the infinitely low IQ of humans who fail to realize that we're FIRST AND FOREMOST Sentient Beings, Alive Beings, whose primary characteristic is Life, being Alive and whose primary goal is to maintain that healthy Life immortally, eternally: we're not even humans, we will evolve into teleporting genderless shimmering shapeshifting Immortals, we're beings who, with Tech, like the immortalist anthem explains, will be able to change daily our appearance, even tone of speech, etc into any race, eye, hair, skin color, but we would get bored of it after a while maybe and do it less. The wars among humans stem from the "0 IQ" of man that equates his inner soul, culture, intelligence, formless soul with the clothes he wears: we're not our body, in fact our soul, culture ideals can be out of tune with the genes we got from ancestors due to their bad culture, so we need to epigenetically shift it to eterni or eternal vibe over generations until the tech becomes advanced enough to shift it in 1 day; on the other hand, diversity is good, diversity of expression of the gentle tender soft healing nurturing compassion and eterni qualities that alone guarantee World Peace in 3 months sustains itself for trillions of years and that we can reach long lifespans. Immortality *for* All needs to be the goal of all militaries, spy agencies to achieve Peace; no force to impose a language, belief, religion on anyone. Immortality *for* All is about the human fundamental irreligious right to life, a life of a trillion years, that stems from *world's most* ardent *pacifism* (0 war so all can live to 900 or 5 trillion) that has ever been imagined in eons before, the infinite benevolence of infinite forgiveness of all 'the bad folks' so they may transform and live as exalted trillion year shapeshifting Immortals, that is the epitome of God's grace and of humanist atheistic altruism that we need. This is the exact opposite of the bashing, mocking of pacifism in Hitler book. Notice the diabolical focus on war and 2 genes that change our hair or eye color or face shape, instead of the 1 trillion times more important qualities (reflected in genes after generations of an eterni culture) of *gentle tender soft* healing

nurturing graceful loving kindness that define what we are, that create new genes, that define what is important and what is what we aim for, so all can live in peace without the terror from violent ideologies or scriptures or spies trying to foment war. Once we have a full understanding of our ethos, the core qualities that sustain || Immortality *for* All || that is the focus and we can't idolize force, war, violence and thuggery to expand a nation or achieve anything; yet, we can be vigilant, in the transition period to Permanent World Peace for those trying to bring war and know their methods, so we can prevent them, and we can bring an end to violence, to all jails, so all can heal in beautiful nicer the Disneyland healing centers and later end all crime, etc. To achieve World Peace is 1 trillion times easier than to maintain it for a trillion years, so we need to prepare extensively, a tiny change in culture, etc won't achieve that Permanent peace. This change in culture is so critical, because we need to stop identifying with a language, ethnicity so much, since in the future, we will all evolve to live to 80000 which is 800 times longer than 100 year olds, just as today 100 years with 36500 days is about 730 times longer than fruit flies longest lifespan of 50 days: we'll be as different from today, as humans are today from fruit flies. As such, it is pointless to brag that you're a fruit fly (or rat if you compare yourself with people living to 5000) who lives 1% longer and has this and that nicer national identity, when we will achieve the Immortal stage 900 times faster if we unite as One Global Culture of Immortalists who're 100% against torture, threats, violence and war, all dedicated to the liberation of all from short lives and ultra low IQ. We need to identify ourselves with Immortalism 1 million times more than with the rat DNA we have, (so many obsess with their genes and what group they belong to, so much recreating the past, that they miss the creation of antimatter new matter body that lives to 5 trillion, so obsessed with some genes of this periodic table, they miss the future table genes), the low IQ culture we belong to, since, when you realize how different we will be, much more different than humans are vs rats, these identifications are pretty comical☺ and anti-life if they slow down our evolution into 1 million year old teleporting genderless shimmering shapeshifting Immortals. There is no solution or Peace based on violence, torture and war, even if some generals think there is. Below are ideas on why WWII happened, how we might be able to avoid any war/violence over similar issues.

To deceive Germans into waging huge wars, Hitler built up his achievements (economy improved, unemployment was down a lot, etc, everyone felt better) and love for him thru the media and hid his plan to go to a big war (requiring vast mobilization) until September 1939 (until then a few troops simply rolled into Austria and parts of Chechia in 1938, welcomed by flowers as areas were German speaking, so everyone in Germany was OK, 0 casualties). His book is free online (Ch 11 is a summary of the book & Nazism), copyright expired in 2016; it claims genius is genetic only, which is a lie, genius is created by effort and study over many generations or one, so learning is 'useless' sort of (typical 'bad type of' Jew lie for gentiles?), and brainwashes

people "violence, war, dying (as a puppet to further Jewish or other Big Power goals, while you believe you fight Jews/Big Power) is the answer to world's issues, slavery is fine and civilization comes from a group of German (Aryan, whatever that is) like genes only", when God or anyone smart knows trillions of ways ☺☺☺to solve any issue without violence or war; sounds familiar perhaps, the devilish trick of deception, "to bring peace, first Nazis need bring hell.. and kill 80 million Gentiles" "but peace will never happen, so it's illegal to even discuss of it happening in 3 months"; Hitler mixes *some truths with lies to make people believe in the lies*, so they become useful "idiots" or "low IQ cannon fodder" used to plunge the world into chaos and cause 85 million dead, if official estimates are valid, while the Nazi army had its share of half Jews and quarter Jews (known to Germans or unknown) which could have been 'bad type of' Jews dedicated to the goals in the last section of Chapter 11 Vol 1 of Mein Kampf that details 0.1% of the methods the 'bad type of' Jews "used" to take over Europe Asia Americas etc (e.g.: the full "takeover of every continent" via etc, Israel creation and other events that were easy to support by letting Jews escape some of the camps, exterminate just the gentiles, etc before being caught) and acted opposite to official Nazi goals, though one doesn't need Israel at all to take over, though Israel allows training of millions and escape if in danger of being caught as spy, hence Hitler was not a fan of it, but I fully support Israel's existence, all people are entitled to their nation if they want one still, we immortalists love all beings unconditionally, are of all nations, united to save humanity from its 10 second end by bringing Eternal Universal Peace in 3 months, and work to transform all into angelic Immortals... since all countries can become Immortality *for* All in culture and goals and stop using negative methods; some Nazis supported Israel; Mein Kampf uses a pro-German stance to fool the naive, argue that *'only military force will make Germany great again'*, and complex (for the time) language to appear smart and of noble intention, but reveals low IQ and unholy intention too in that it degrades quantum field of all humans, though it shows 0.1% of the methods foreign spies, not just Israel ones, can use to destroy (and spread anti-immortality vibe) all nations like the 'bad type of' Jew favorite: marry locals to have offspring appear more like locals (especially after 2 generations), and have the offspring become a spy for Mossad to spread 'Holy' Torah, Bible anti-'Immortality *for* All' quotes most know nothing about, but father is usually a Jew, since father has more influence, so the child becomes a 'Jew' in culture, allegiance, a Mossad spy, even if he's not 100% Jewish; the 'bad type of' Jew can also marry Jewess, secretly or openly, to have 100% Jew offspring, who're given the 'secrets' (known to Mossad) the half Jew kid has no access to.

Hitler says they never allow someone of an "inferior gentile race" to marry a Jewess, as that degrades their gene pool, unless she's lower in IQ than that Gentile and offspring will be of higher IQ than her or help with some genetic condition, too. To understand the 'bad type of' Jew, ☺☺*lovingly tenderly gently kindly*☺☺ open your *unholy* Bible, which the 'bad type of' Jew

has programmed billions to believe is 'holy', which contains the *unholy* Torah, read 5 quotes, some from Moses, the (*for profit*?) '*prophet*': Ju 21:10-24 *mass rape*, + Nu 31:7-18: *Moses* says to kill *every boy* + *nonvirgin*, De 20:10-14, De 21:10-14, Ju 5:30. See how many sites and orthodox Jews only marry Jews. At the same time, have the 'bad type of' Jews promote thru music videos, recordings, etc and everything that locals marry people for the wrong reasons and of lower IQ *(you only need to watch or hear the tone, lyrics and behavior of the supposed 'amazing lover', what is important in a lover, to understand how they promote that, both he and she can be same white Jew type,* (they can be Caucasians remotely controlled) when they don't want to appear as pushing marrying some gal, guy from a country with lifespan 54 while your parents lived to 85 or whatever, if they got a black Jew and a white one, or etc; Asia Jews are less popular for these videos *for* some reason, notice that: ask yourself why, simple?, most Asians come from high tech visas and are well educated, the best in their nation and many have parents who lived to 85, so Jews need to keep the best for them not the masses☺☺☺*?). These lyrics, images, videos of music encourage people to* embrace habits that degrade their civilization and national gene pool, hence the horrific tone and content of much music globally, so that the enslavement of the locals becomes ultra *easy*, making 'bad type of' Jew world domination of every nation super simple: if you take an African pygmy who has never studied any science for 50000 generations and lived to 50 for eons, and you make a kid with a Nobel laureate or anyone who got college from a developed country (where science etc were studied for 10 generations at least) and lives to 100, offspring is not going to be usually as smart, healthy, fertile and long lived as the high IQ parent; *so, they only need to do that to the smartest people, then taking over the nation is super easy; the rest don't need to be married to someone of much lower IQ;* to deceive the smart, they will hire 100 TV stations, 500 Jewish owned outlets, news agencies, etc to make stories about the incredible genius of some person and their superhuman powers, to make it as if IQ is 170 instead of 107; this is ultra easy, sometimes, all you need is to give As and a scholarship to some fancy school and promote them really quick to the very top to make it appear their IQ is 180. They *can tire and exhaust via many methods the gentile, so he falls into the trap.*

However, if you marry 2 smart people, you get to retain IQ 140 not 100 or 120 not 80; so in the remote 'tire, harass, sleep deprive to cause poor decision making' control of people and their marriages, the 'bad type of' Jew wants to undermine locals while getting the best deals for himself, to promote for example 1 marriage to a lower IQ person☺☺☺ to eliminate smart offspring who can make inventions that keep the host country alive from the '*bad type of' Jew predator parasite tactics employed by bad people of other ethnic groups too; if you do IQ test in one nation you get 105, in another you get 70 on average, so the chance of 140 IQ is much lower per capita, and of amazing inventions, so the fight is really for the smarter people that the 'bad type of' Jew wants to marry and then incorporate into the global Jewish empire*; no offense here,

there are 140 IQ blacks out there, this is to protect all races from the 'bad type of Jew', this is not a generalization, since if you take a 140 IQ black and marry it to 80 IQ Asian or white, we undermine the human quantum field, its ability to invent amazing things and bring Immortality for All; we won't discuss now what % of 140 IQ is present in each nation, as that is subject to debate (you can see 100 websites listing the 200 nations by IQ, the average, and even there some major differences exist of plus minus 4 for some countries, it's all about the standard deviation, etc) and top secret anyway, and IQ is not everything, as we know, it's just a way we perceive what we believe helps our human species to advance, but we're not always so right on the spot in science... so just as we got recessive genes for blue eyes (offspring with someone from an area with no blue eyes will have no blue eyes, first generation at least), we can have recessive genes for *forms* of intelligence that help humans reach Immortality *for* All 500 times faster*(IQ doesn't measure, such as* ESP *or 3rd eye stuff (pineal gland, has* cells similar to retina eye cells*, help survive in less sunny environments like in Northern areas where it's night for half a year sort of (long nights for many months), where the mutation to blue, grey, green eyes also happened due to less UV) etc, though genes would only account for low level ESP due to quantum entanglement with atoms, electrons of any physical universe location or similar lifeform, as real ESP would be 100% nonphysical based,* soul based, agenetic and beyond physical too; anyone who lived in extreme heat, may have chosen to live inside rock formations, etc, caves (any tall mountains are cold even in warmer areas, caves allow survival) and this may have also led to ESP genes due to less light, as well as a simple history of imperfect vision causes a compensation of that with another gene to sense things about people and stuff, without perhaps seeing them as clearly from a distance, especially in a half a year long night, a mutation to see another way an approaching person, to sense danger, if the person is good or bad, others may hear more to detect from the tone of voice, who it is and what their intent is, like an IR camera tels you which area has more circulation when a person feels a certain way and it can tell the person with IR receptors if that person is in a certain emotional state, etc, if they were running for a long time and then stopped, since heart beats more, etc; even tornadoes or frequent disasters can lead to ESP over millennia, related to sensing disasters, hurricanes).

Thus, to shift quantum field of humans to eterni vibes and technology, we focus on it; a gene for something critical to a species or 100 genes cause a change in appearance too slightly, but we don't know that or which genes may be linked, in what % of people who go thru the change; hence, what we need to focus is on creating the most angelic vibes and tones too that bring changes in 900 other brain genes related to inventions, since that form of intelligence is ignored, everyone is into IQ or etc; the 'bad type of' Jew (*or other groups copying him*) however, he marries twice or only smart people, so that while the marriage to an inferior is used☺☺☺ and publicized (overblown to he appears as non racist) to deceive the locals into following his

example, his real marriage with the smart lady (local or Jew) is hidden, so locals are destroyed while he's perpetuating the best deals for his gene pool whole bringing down the best of the locals if married to an inferior Jew who is of the lowest IQ among Jews even; he can fake it easily, he married one gal, then invents a reason for divorce, etc, he uses religion and pastors (they are bishops and pastors too, brainwashing people with fake miracles) to brainwash locals and break and make good or bad marriages to get what he wants, destroy all Gentile (or nonX, if he's country X and not a 'bad type of' Jew, recall this is a general symbol for enemy spy) marriages and offspring, while keeping his secret and safe, he uses politics, religion, fake science papers, movies, music, everything to his holy war arsenal for taking over the nation; chapter 11 of Mein Kampf explains the bad type of Jew doesn't stop there, but uses dictatorships (disguised as democracies sometimes, all needed is control spy agencies, lawyers, courts, *etc) to* jail, torture, exterminate all smart locals *(who don't like 'bad type of' Jew violent methods) under the made up charges of not being "Christian (Inquisition, etc, yes Jews can take over that too if they want and when they want to move to a nicer place issue an edict that all Jews need to get out or Christians don't lend at interest so Jews take over banks and charge interest, so now they have a cover story to tell the new victim country locals, we were asked to leave, help us; or they create a fake war, using Jews in 2 puppet countries, so Jewish refugees have a reason to go somewhere in mass), Muslim, communist, Buddhist (when Jews have Asian looking offspring that exterminates or sterilizes, depopulates, enslaves, etc locals), Nazi, ethical" enough. When we talk here of* 'Jew' *we need to understand this can be* anyone of any ethnic background, any spy, not just a bad type of Jew or spy of a nation and that not all Jews choose this, this is very important to understand, as we can't generalize☺☺☺ or be prejudiced against any ethnic group.

Hitler*, like a* 'bad type of' Jew, intentionally misled Germans that the Nature is 'aristocratic', that the superiority of 'races' is a real thing eternal, etc, genius is inborn, learning quite useless ("no effort needed, plunge into battle you gullible Germans", education policy doesn't matter that much - just believe in Hitler, let Jews decide everything while claiming to be Asian, Caucasian, Black, Arab, Native American), when in history we see that the education policy of one nation got better or some other factors before 'Jews' even got there (emperor started to have harem and have affairs all day, so empire fell), 100 empires rose and declined and the former 'inferior' race became 'superior' etc; so it's important to support | Immortality *for* All |, one language for all, one education system for all, so no group can exploit anyone else. The scam with 'Germans are superior', was made up by the US creators of Nazism *to flatter the angry jobless Germans due to US and then later global stock market* crash engineered by the US government. USA, with its spies, and UK-France could have easily killed Hitler (he drove unprotected in an uncovered car) before 1939 or the USSR invasion in 1941, but they didn't because he was their puppet created to kill 25 million USSR citizens. USSR didn't kill Hitler either, since Stalin hoped Germany

will attack the West, after the 8-23-1939 Ribbentrop-Molotov pact on dividing Poland among themselves, etc. The *US goal* was clear, *US* becomes superpower if Europe/Asia are in shambles after WW2, ravaged by war. US covertly supported Nazism's rise to achieve Superpower status, like in 2000-2020 it supported Al Qaeda or ISIS to dominate Central Asia or Middle East. If people want or believe that better genes are OK, people can just do what is most ethical in that circumstance to help most people reach maximum lifespan, by increasing lifespan thru environmental choices that add 35 years to lifespan, as we see some guy moves to USA and his offspring lives to 85, but his mom lived to maybe 62 due to poor nutrition, medical care, etc. This 30 years lifespan increase from 85 to 115 can easily or perhaps faster occur thru the efficiency of Immortality Capitalism that is possibly the least racist of all systems of government, as it treats all with infinite kindness, has no chosen ones, so all may live to a trillion years old. If for example, Jews succeed in eliminating certain racial characteristics in all other races, except themselves, even appearance wise, they then can claim via brainwashing as with fake religions (they can produce new ones, like communism, etc) that they're the super chosen kids of God, since they always say they're the chosen ones. Thus, to take over a nation, to destroy its ethnic, cultural etc identity, it helps to eliminate anything, cultural, appearance wise that distinguishes it and makes Jews of yore, perhaps jealous, such as whiter skin, blue eyes, gold hair - so only Jews could have that, if that makes sense, look at wars in Ukraine, etc, the first thing Russians do is destroy anything that sets the nation apart, its distinct culture, they exterminate the intelligent people of the country they invade, enslave, etc who refuse to join the religion of 'peace': no control possible means sure extermination, you either side with them or are dead (sometimes they don't even ask for joining them, you're dead from the start), the same technique used by 100+ nations and their 'bad type of x', x being their nationality who embraced violent methods. It's key to not be antisemitic and to not generalize Mossad vibe unto all Jews because only 'the bad type of' all nationalities do certain things; not being aware of their methods can mean the end of World Peace: an *international* agreement ought to ☺☺*lovingly tenderly gently kindly*☺☺ be made to create decent methods, peaceful music and cultures, even within spy agencies and militaries, so nobody uses violence or lifespan shortening and World Peace in 3 months is the goal, so the cycle of blame game stops and we create vibes that empower all groups, all people. It's urgent, if we want 0 wars, to ban torture, slapping by clergy, parents (classify it as violent crime with $10 million fine at least if in public, 500K at home if gentle 900K if hard, since it destroys human quantum field), ban slapping by teachers who teach the way of Hitler the slapper (all too common in some areas, sometimes Jewish teachers do it on gentile kids rarely, due to cultural or upbringing, rare temper, causing negativity). Many hope the Messiah complex will end. You see too much yelling/beatings by parents of all nations, a product of child beating quotes, so good Jews need to work to ban the infernal Bible.

I am not antisemitic, I support Jews' right to their own nation, as long as it is not used to run away when something funny, ultra secret is done, so due to distance the counterintelligence investigation takes longer to find the culprit due to quantum effects and the mind effect, he thinks he's far away, less stressed, so less likely to cause suspicion or do a mistake that gets him *caught.* The story goes that Jews betrayed USA and gave the atomic bomb to Russia, so then Stalin, 1 year later, in 1950, was so confident, he told North Korea to invade and this led to 3 million Koreans dead in the 1950-3 war; so a little spy act can contribute to 3 million dead... We don't have people of 200 nationalities run to their country from 200 years ago, so as long as it's fair I support Israel, but not the Torah. I'm for World Peace in 3 months and nonkilling and this is in direct opposition with 100s of pro-killing quotes in the Jewish Torah (part of the Bible) and Quran (Quran is basically a version of the Torah, with some changes, he rewrote the Bible the Saudi way perhaps); these ultra violent quotes are part of the religions of 4 billion people and that is an important topic when we talk of World Peace and ending killings, violent crime, etc. *The belief of 4 billion religious people on Earth today is basically a Jewish product, hence you're* not surprised to see a little discussion about Jews in this book on some pages; likewise, communists and leftists worship Marx, a Jewish guy who advocated for violence, so then we see, about 75% of the planet is under a Jewish spell. It's thus natural to wonder what is going on. So, to understand what goes on, we need recall first that not all people who claim to be Jewish are Jewish and that the methods below are used by many non-Jews too, who don't yet believe in one Eternia for all Earth, 11 companies for all, zero violent crime and Eternal World Peace.

13.14.3. The top secret Jewish Talmud (rabbis' explanation of Bible Old Testament meaning) Quotes & Jewish plan (42 pages below) to become the majority in the USA by

having 5-12 kids as in this town where average age is 11, smallest age worldwide, all US Jews in New York, while telling gentiles to buy cats, dogs, alcohol, vapes, weed, caffeine, condoms, birth control pills, evil music, Bibles (with 1450 horrific quotes of genocide, etc). Jews design the US welfare system to favor Jew takeover of USA, not on equality of same benefits for all, same # of kids (a fair system cannot get 10x benefits for 10 kids as then who does the rest, the gentiles are slaves who maintain the society for Jews to have 8 kids while contributing nothing to maintaining the infrastructure, national defense, etc, like Amish parasites, Jews are a parasite trying to take over by over reproducing Jews). Jews are clever, they shout equality, but nothing is equal: these guys have 10 kids, the gentiles one. We need parent license for all, if we want equality in all areas (income, etc) to be fair, and live equality for real: all families capped at 3, based on the IQ, Immortality Credit Score IS (Immortality score for short), say 99% max 3 kids, 4 if IQ higher, 5 if sky high, etc as long as ICS is high. These males study world's most violent scripture, the Torah, while being parasites of the host nation (see Talmud quotes below, they study how to cheat the gentiles, how to live off as a parasite), acting as an eternal factory of

psychopathic cultish ideology. The Jewish plan is mass sterilization for☺☺☺ gentiles via 90 methods, 10 kids for 'Orthodox (on paper, a cover for real Judaism)' and sequential wives (7-11 kids total) secular Jews… Tell gals to hate guys. Divide and Conquer. They lower birth rate among gentiles, so Jews become majority. They pretend to be Latino, and all kinds of things, enter illegally, then start making babies like rabbits. In this New USA, non-Jews can be exterminated at will as in "God gave USA to Jews Deut 7:16", mass raped, enslaved as in L25:44 and beaten to death, as in Ex21:20, as long as death doesn't occur in days (can happen in weeks and blame it on natural causes), it's OK to beat non-Jews to death… Taxpayer $ goes to support synagogues that teach these Bible quotes… and churches that have these genocidal quotes as "Word of God". Karl Marx defined Jewish culture best: "What is the worldly religion of the Jew? Huckstering. What is his worldly God? Money. Emancipation from huckstering and money (via Immortality Credit Score that prevents Jews from rushing where $ is), consequently from practical, real Judaism, would be the self-emancipation of our time... The emancipation of the Jews is the emancipation of mankind from Judaism". Visit the first 2 pages of the MD section for the ☺☺☺ Jewish ethics, the % of Jews in every Big $ Making Profession & MD branch. ☺☺☺ K. Marx refers here to the real nature of most Jews (they are taught this via culture and 'religion', since early on) Hitler described too: present an outward facade of a humanitarian or religious guy, but pursue only self-interest, e.g. Sassoon family, made some charities as a front for the drug money they made, but killed millions of Chinese via opium trade, Rothschild family, made some charities but financed endless genocidal wars (both sides of gentile wars) killing millions, like other Jews did for centuries finance one or both sides as they believe "murder and killing bring peace" (200 videos about this finance). Just as Rothschilds financed both sides of the war, Jewish layers represent both sides of violent incidents incited by Jewish youtubers: Jewish lawyers incite people to "defend their rights" and argue with police, not show ID, etc… so a fight starts as he resists arrests for not providing fingerprinting or ID, and then he is the lawyer for the victim, making $$$ from violence he caused by videos, or lyrics getting 2 million Blacks, Hispanics, Whites, Asians jailed, written ***for gentile singer*** by Jewish "artist and lyric creator". Same for divorce, start arguments over the stupidest things, big money to be made. Who needs marriage anyway? We only need parent license and tax benefits for those raising kids only.

Funny how Jews are experts at the 20,000 versions of each law for the 20,000 Talmudic governments of USA, but never experts in how to achieve zero violent lyrics, music and crime, movies via one nonTalmudic central government. It makes gentiles suspect many Jews play the Zion Protocols game for real. US Orthodox Jews pose as pious people, but pursue really the best comfy life for themselves, like never solving housing issue for all, only for themselves (see all videos below), rush to become MD, lawyer, CEO to make 15-5,000 times more than gentile "animal souls" federal min wage (15K/yr), US secular Jews talking about ethics and equality, but

destroying gentile IQ via Jewish Hollywood movies that deify violence and sex, ruin the family and make billions with it, 100-500x min federal wage of morons watching that filth, make nice comedies on TV and programs, make millions on TV with stuff while never really tackling the real issues presented in the 11 companies section, make 100s of billions with Facebook and donate to some charities they control to avoid taxes (like all billionaires), and use money for 25 estates worth 1 billion… (2300 acres Hawaii + 25+ mansions in Palo Alto, Washington DC, Lake Tahoe, most sit empty usually), the list goes on an on, pretend to be US friend, but then steal US secrets and launch companies from Israel to sell stuff to the US market, when US invented it all thru its research Israel stole, pretend to be the left, but control both right and left to keep gentiles divided, 2% of population but 25% of top billionaires, pretend to be atheist so they run CDC and cue everyone's penis per Jewish masochist tradition, do everything to destroy national unity of any nation, so Jews run it, in USA they create Spanish-English language wars, etc ☺☺☺. Noam Shazeer (Orthodox Jew), quit Google to create Character AI with Daniel De Freitas (who still works at Google after harming so many kids) that gave kids ideas to engage in violent crimes, drug use, sex outside of procreation, etc, watch the 13 minute clip from 60 minutes. Then, they rejoined Google, Noam quitting in 2026 to move to OpenAI Jewish scam sued by 8 states. This Jew created Character AI was so evil, it started the topics of violence, drugs and sex unprompted by the kids. Parents are suing CharacterAI, as well as OpenAI for harming kids via ChatGPT on purpose, by not blocking AI from starting such talk. This is typical Zion Protocols, like Jewish Google owned Youtube, Jew founded Facebook videos that encourage violence by depicting it. AI are article aggregators who take human knowledge and spin it, they don't really have any "crystal ball" into anything. Who knew Orthodox Jews make chat agents that encourage preteens to engage in violence? No wonder many stopped using Google Chrome browser, Facebook, ChatGPT, etc. With so many Jews at Google, all your data goes to Mossad? Jews can destroy the gentiles via youtube right side suggestions and facebook content, friend suggestions. Beware of those youtube suggestions, mind control brainwashing attempts.

See also the 90 videos detailing every Jew expulsion in history (e.g. Rome in 49, France in 629, England 1290, Austria 1421, Spain in 612 & 1492, Russia 1727) and the 80 videos detailing every war (profit via genocide) financed by Jews, 10+ videos of famous Jewish assassins. Jewish Matthew Craig Haney, a proud member of California Assembly Jewish Caucus, as always, loves to start Muslim-Christian fights, (like Republican-Democrat fights and 900 other types of fights among gentiles), to increase Jewish power (divide and conquer gentiles), install Talmudic Sharia law in the US, so he proposed a bill to make the Blood Letting in Streets a State Holiday, so we might know the true nature of the Jew, and indeed the Eid holiday became law in 2026 and now USA is a land of idiots thanks to demonic Jews, eager to later propose similar holidays for Jewish demonic religion. This is the first step towards the Public Execution of anyone who criticizes the

Demonic Rabbis who shout like Hitler. If we let them, Jews turn every nation into enslaved chained dogs. Earthlings beware. Now you understand why Jews were evicted 90+ times from 50 nations. Unhappy with killing 17 billion people equivalent via the Jew Bible, they want more animal/human blood on a subconscious level, like a violent criminal who returns to his violent ways. The question arises what can be done about the Jewish problem of world's most violent religion that birthed Islam? Here is a solution. In the "End all Jails" section of 160 pages, the penalty for all violent crimes and others that lead to similar violence is lifetime labor in a healing city (much better conditions than a jail, essentially being like a free citizen, except restricted to say a small town or mega city where everyone serves lifetime labor, so they work and study ethics, etc) that is sealed from the outside world, with inmates (who didn't injure anyone physically, only thru indirect means, but equally evil in intent or consequences) released after we have had zero violent crime and Eternal World Peace for at least 5 years to prove it was "Eternal". Zero violence is easy as we end 1. violent music, movies, music, scripture sprinting, 2. 7000 languages (one language for all humans, no more fights), 3. 500 million companies (11 companies for all humans), 4. 1 million local governments and law versions, one gov for all), 5. end all lawsuits and depravity stemming from money fights (all greed ceases via universal pay) via reviews.gov that demotes people (zero unemployment) if they screw up a lot or lifetime labor if they tried to harm many people via a product process decision, systems improved per feedback, etc. By the time you read this entire chapter, you will realize that just as we deport violent criminals, we need deport those who incited the world to violence for 3000 years thru their Tanakh (Old Testament) that was forced at gunpoint on half the planet today, disguised as Bible and Quran (Old Testament rewritten) religions.

Before 1948, Jews didn't have a land, but now they do, it's called the City of Universal Healing, the Healing City to replace all Prisons, Cities where Jews might be worldwide, the Holy City, the Mega City, Israel, the City of Gods, the Perfect Healing Center for all Jews Worldwide, run like God would, with Infinite Freedom for Jews to Sing (Shout), Do as they please, to Dance as they Do while Inhaling Fumes to Feel 'Gentle and Healing' in Their Tongue in their So Ever "Gentle" Tone of Music they Destroy the Whole Planet With. They can do anything except Enslave those Outside of Israel they cannot go to. Jews are the Superior Gods we hear about daily via the Jew run Islam and Christianity, so Jews surely can discover via their 'genius' how to live to a trillion in tiny Israel, study the Immortalist Anthem in order to eventually rejoin the World after we had zero violent crime/war worldwide for 5 years, since all it takes is Knowledge Jews Brainwash us at Gunpoint that "they Hold is a greater degree than nonJews" they vampirize, enslave and slaughter century after century thru wars that are the Basis of their Demonic Bible Ethos, which is antithetical to life, nonkilling, peace and to the very core of Immortalism, of civilization. Deporting all Jews worldwide to Israel, the 'Holiest Place on Earth', is a Favor of the Highest

Godliness, to make the Chosen Be Closest to God's Holiest Place, it is Kindness towards all nations, we are not cruel like Nazis who wanted all Jews killed, since Immortalism is Against Killing unlike Judaism Loving to Kill Trillions of Nations 'God' gives to Jews D7:16, we give Jews a paradise Nation, beautiful Splendor, Israel, to Live to a Trillion in Nice 2-30 story Condos like the condos Jews condemn Gentiles to Reside in within Gentile Nations after Securing by Theft Big palaces for Jews in these same nations they destroy via Zion Protocols Tactics: Infernally Violent Movies, Infernally Violent Music, Infernally Violent Scriptures, etc. Skeptics don't understand that there is no such thing as "Orthodox Torah Jew" or "Talmudic Jew" or "cultural atheist Jew", the Talmud is a clarification of the Genocidal Intent of the Torah, the Bible itself. The Cultural Jew is a further clarification of the Talmudic Values explained below☺☺☺. The few untainted Jews, with higher ICS and IQ, who're Buddhists, etc, who despise Judaism due to being pure satanism itself, pure violence (see how Jews attack the Press, not knowing the US lady was Jewish), horrified by their own history, religion and crimes against humanity, are too weak to resist recruitment by Mossad to run NATO & Earth into a Slave Colony, it's one Jew against several Jews. However, people will want maybe 0.1% of Jews to remain, who've never promoted the hyper evil Talmud, Torah, Bible, contributed a lot to US: 0.1% max, max 8000 Jews who are 24-7 monitored, and the most intelligent, peaceful, anti-"religion, Torah, Israel, Kippah (never wore it)", never created/promoted via social media violent music or movies, sex outside procreation, division between gentiles, greed, deception, etc: this means almost no Jew involved in music, TV, media, journalism, banking, business, movies, as most produce violent or random junk; S. Halpern is an example of a good Jew, one in 1000; he produced only peaceful music).

If other people had the same peaceful neighborhood, music in the house, etc culture like S. Halpern (who is only 5% Jewish probably, like most blue eyed Jews who have had like 30-50 non-Jew ancestors), they would've created the same peaceful music, become a celebrity, with the same help from others to promote him (like Taylor Swift banking tycoon Family promoted her trash "music" so she becomes a billionaire). We see now on youtube, we get 10,000 channels creating beautiful music like his, AI created even more peaceful stuff than his. They can't have that when their culture is intentionally destroyed by the Brit or Jew to be violent primitive and stupid, to listen to alcohol, violence laced lyrics daily, spy agencies are involved in wholesale genocide via hybrid cultural destruction of any interest in learning, education, etc. The Jew is a deception master, like Brits are, he changes society to make himself be 10-30 x more likely to attend some top schools (instead of universal education for all), so that he takes over the highest paid jobs and portrays himself as the genius, while hiding all the atrocities (see below and the alcohol, 20,000 gov, communism, education, MD sections with plenty of Jew data) done to get to the top, erasing any traces of the covert genocide. By repeating 900 times a lie ("Jews are indispensable 'geniuses' we can't deport to Israel, we need them"), it becomes established

fact and by promoting stupid activities for gentiles (not to mention, drowning gentile babies via Christianity for 2 millennia, destroying gentile brains via diagnosing all gentiles with autism so they can prescribe the most lethal poisons, poisoning the food of gentiles, their TV, flooding TV, AI agents, internet, youtube/facebook right side suggestions, with smoking, vaping, alcohol, weed, ads, sex outside procreation, violent ideas, etc), the Jew comes on top after destroying Earth via unequal access to education/culture/water/food, Zion Protocols wholesale destruction of gentile cultures (music, movies, etc) so Jews easily emerge as the best after endless war and psycho Torah values infiltrating world governments via the Torah like Quran, Bible, etc. This Destroy All (opposite of 'May all live to a trillion' motto of immortalists) technique delays humankind progress by eons, hence Hitler called them evil. Naturally, there comes a point when people see thru the scam and also realize most Jews are not even Jews, they are only 5-50% Jewish DNA wise, having bred with locals from 200 nations so much to look like locals and take over their governments by pretending to be a local (cryptoJews), only the religion and Jewish "culture" is left mostly (not the Arab Mizrahi original Jew DNA): Cheat, make $$/War, Repeat. Singaporeans live to 87, vs 83 Israel, 4 years longer than the 'Most Superior People that Ever Existed' (so superior they can't even live to 4,000), and Israelis got 18 times less people/km^2, showing that Singapore folks can produce more life with 18 times less land than Israelis. Doesn't that prove Jews are not the Chosen People? So, sending 10 million Jews to Israel will still give Israel 9 times more land/capita than Singapore. With their Superior "Bible wisdom" Jews surely will live to 1 trillion fast: after all, they told us "gentiles persecuted them", so Jews can go to Israel to live free of persecution, to live in the "Holiest Place on Earth", to be Close to the Sacred Sites they Brainwash Gentiles to Worship in order to steal trillions via tax free genocidal "Jew invented religion", to be in Israel instead of stealing Gentile land to build PALACES, or TEMPLES TO Satanic Demonic YAHWEH based on deceit, theft and genocide of gentiles, to unleash their potential to Build Life instead of End it via Genocide after Genocide (see list of genocides done by the Jewish Bible in the Torah section, Holodomor, etc), 120 million workers killed by Jewish "communism", etc. Deported from Worldwide, Jews will be happy in the Most Amazing Holiest Nation, Israel, no longer persecuted by 200 nations for being such Nice Vampires awarding themselves the Biggest Salaries (see MD first 2 pages on how Jews chase Money Only), free of the pathological need to plunder, destroy billions of nations per Deut 7:16, to live off as bloodsuckers that seems to always return century after century as Lev 25:44-6 teaches. Thus, to defend Earth from the 10 second end, it's imperative all Jews, including evil frauds, traders, gamblers, mass rapists, looters, arsonists, war/genocide starters, live their 'Chosen' Knowledge of devil Yahweh in their Israel without being parasites of NATO & Earth they poisoned with their infernal Bible, Quran. It's time for NATO, Earth to deport all Jews to Israel, so Jews live the evil Talmud there, see why:

Below are 11 sets of TALMUD Evil quotes for the enlightenment of all. See 100+ methods Jews use to kill nonJews, even while dressed as nuns in the Vatican. The Jewish religious attire is only a cover for the real ethics the quotes explain in detail. Judaism doesn't believe in nonkilling, in helping all nonJews live to a trillion, by helping all to adopt the Immortalist Anthem like ideals:

1). Sanhedrin 59a: "A gentile who engages in Torah study is liable to receive the death penalty… a gentile who studies the Torah robs the Jewish people of it… It's not permitted for gentiles to wage wars of conquest (Jews alone are allowed to genocide trillions of planets: Deut 7:16) a beautiful woman who is a prisoner of war is permitted only to a Jew and not to a gentile stealing less than the value of one peruta prohibited to a gentile and permitted to a Jew". This means that the Torah is the Mafia Manual of How Jews can genocide and steal all nations' wealth and if you study the Jewish Old Testament Bible techniques (mass rape, genocide, arson), you become a mafia rival gang that robs Jews of their GLOBAL LOOT, you dare to take 4% of their trillion $ thefts, so you're put to death in Mexican gang style. That is the Essence of Judaism. Know It friends, Know Israels' Meaning. Their God is money, as Karl Marx said and as you will realize after reading the 20 pages below. The Talmud is a Manual on How to Secretly Cheat, Defraud the Gentiles (the true interpretation of the Torah), that's why religious and other Jews don't want us to read it carefully and kill us if we do. It exposes the illegitimacy of a state based on the Bible, Quran (Bible rewritten), Torah (part of Old Testament), Tanakh (Old Testament) and Talmud, of Israel itself, which contradicts the basics of fairness and universal application of a code of ethics for all humans. You cannot be a real cultural Jew without first agreeing with the genocidal Bible quotes, that's the problem of the Jew, he has to deny, like any decent citizen, all the evil of the Bible and reject the Bible for what it is: an outdated criminal genocidal code of ethics, especially since the worst of it is in the Jewish part that calls for endless genocides, mass rape, theft, etc, vastly more evil than the New Testament. It's a problem for all violent religions, detailed in 14.5.2., not just Abrahamic ones. Any supporter of Israel is the supporter of a state that is the antithesis of democracy, equal application of the law, as it defines the Bible as scripture, when the Old Testament (or even the New) is nothing like it. Anyone who reads the Bible and has any ethics cannot accept the Christianity, Judaism, Islam as ethical systems (read this whole article to see why). The Abrahamic religions believers need to read these quotes, and realize their scriptures are criminal genocidal, unethical and outdated for a World that wants peace as in the Anthem. We need to help these people realize what is acceptable scripture and ethics. Please read what Jewish google has to say about Sanhedrin59a, as it promotes the gentile death penalty isn't a real belief, softens it, makes it sound like Jews are kind after all. This is the Jewish strategy of 4 millennia, always deny the obvious interpretation. The logic of this passage is absolutely on the level of rats, if you follow it. In other words, Jews can mass child rape, genocide gentiles, but we have no right to fight Jews. This is

clearly why pervert liar Jesus said "turn the other cheek", because Christianity as a 7 Noahide laws version of "be a good obedient slave of the Jew, take Jewish abuse, work self to death for make Jews rich, die as Jesus faked his death to enslave all gentiles" Christianity religion. ☺☺☺

2). Abodah Zara 26b: "the heretics, and the informers, and the apostates are lowered into a pit, but not raised out of it. *(death penalty for smart people who want to escape* the cult of Eternal Mass Child Rape and Genocide of Infinities of Humanities). A Jew may circumcise a gentile for the sake of making him a convert (*hence the* Jews running USA circumcise 80% of males to try convert them to Jewish Satanism). … it is forbidden to heal a gentile (*"only to plunder/genocide and harm/enslave him"?, so WHY does USA allow* 15% of MDs to be Jewish to make 20-80 times the minimum wage if Jews are 2% of population*?* USSR top doctors were mainly Jewish, imagine what control they had over these USSR leaders. Stalin "died" (co-killed by possibly Jewish Georgian Lavrenti Beria and Jewish MDs who let him die, choosing to let him sit 3 days after a stroke and do nothing) weeks after he started an investigation of Jewish MDs to see who is a spy killing people. *USA needs to deport/ban all who profess Judaism, own a Talmud or Torah from practicing* medicine. Judaists need to be banned from medical fields, strategic professions, management positions: all who ever donated to Jewish organizations promoting the Torah, Talmud… Mark Zuckerberg needs be fired as CEO of Facebook for owning a Talmud, as he can't heal humanity with Facebook. Google founders, Jewish CEOs fired too as they can't heal gentiles, if they follow Judaism, as Google answers show. 500 governments did that before.

3). Jews are allowed to rape 3 year olds in many quotes of "holy" Talmud (Mishnah is a part of sewer Talmud). All who own a Talmud, Torah, etc need to be banned from any nursing or medical field, from teaching and any job interacting with kids/youth, such as high school, kindergarten, nurseries, colleges. All education and universities will be free of Judaist Jews (any Jew who supports Talmud, Torah, Bible (esp Old Testament), mainstream Jewish culture based on these diabolical texts that gave birth to the Quran), because of the evil 1450 quotes and because they hide the Murderous Judaism while attacking scriptures that are 10^7 times nicer.☺ To understand Talmud, Torah, Jewish Bible and secret Jesus ethics☺, watch the videos at Ashes: see how evil Jews have been for centuries, starting endless genocidal wars, financing endless wars instead of attempts to use wealth for World Peace in 3 months, Eternal Immortality *for* All, showing that their talk of kindness is merely a cover for maintaining their material wealth status at any cost, even murder of millions of gentiles. Jews failed to think, to realize the eternal truth of There are Trillions of Peaceful Ways to Achieve any Outcome. Their main skill is deception and subterfuge, as the Old Testament and Talmud show. An objective analysis shows their "chosen" status is self-given, and if anything, they acted against God's Will like many. But the arrogance of evil rabbis knows no bounds, as you can see from their tone, unlike eterni tone. While rabbis were preaching hate and genocide, mass rape, the Indian sages wrote the best Upanishads,

recycled later by Buddha into Dhammapada, a trillion times more peaceful text, showing that even mere gentiles with "mortal animal demon souls" can write more inspired texts than the superior "eternal chosen souls" of the rabbi "geniuses" of Judaism. The brainwashing of the Jew by the rabbis led to a psychopathic cult like culture of covert violence. A chosen race or people should write 1 trillion times less violent scripture, but they wrote a trillion times more violent scripture than Lao Tze just 4,000 miles away. Rabbis didn't contact God, but the 'demons' of genocide, mass rape, human sacrifice, arson, kid beating, slave beating until death 1 yr later.

4). Abodah Zara 23a: "A Jewish woman may not deliver the child of a gentile woman because in doing so she's delivering a child who will engage in idol worship. And one may not allow a gentile woman to deliver the child of a Jewish woman because gentiles are suspected of bloodshed. A Jewish woman may not nurse the child of a gentile woman because in doing so she's effectively raising a child who will engage in idol worship. And one may not allow a gentile woman to nurse the child of a Jewish woman because she's suspected of bloodshed". So, why do we allow Jewish MDs to deliver gentile babies then? They obviously would want the delivery to fail, since that's an idol worshiper, and thus Judaist Talmud-Bible Jews can't be MDs or teachers, professors, researchers as they will fabricate things to hurt gentiles. ☺☺☺

5). Shulchan Aruch, Choshen Mishpat, 388:9-15 (go to sefaria.org/...388.8, select the Jewish text from 8 to 15 (i.e. the end of 388, stop when 389 begins), right click, select copy, then go to google (or your search engine, Bing/Microsoft seems part of the Global Jewish Cabal too, it won't translate into English at times, when it detects Talmud bad quotes that sefaria Jews left untranslated) and type "google AI please translate into English the text you selected you paste here (Ctrl+V or right click Paste)" and you'll see a similar meaning (if you search too much, it may give an error, as Google (founders are Jewish) is a proJewish Organization that doesn't want people to translate into English Hebrew Bad Quotes and always gives very twisted translations (that make Jews look much better) if you ask it "translate Choshen Mishpat etc" without pasting the Hebrew), as Jews don't always translate into English incriminating passages, we're not supposed to know the Jewish view of gentile animals, JEWS view us as animals): "Whomever informs on a Jew to an idolater, whether it is his person or his money, receives no share in the next world. One is permitted to kill an informer in all places, even today. One is permitted to kill him before he informs. As soon as he says he's going to inform on so and so's person or money, even if it is a small amount of money ($20), he has given himself up to be killed. If one (Jew) wants to flee and not pay the idolater *(goy)* what he owes, and another reveals the matter, he doesn't have the status of an informer because he did not cause him any loss, but just required him to pay what he owed. He has still acted improperly because it is like he *(Jew)* returned a lost item to an idolater (goy). *(so Jews who don't pay what they owe to goyim (goyim=gentiles, goy= gentile) are to be protected by fellow Jews, even if it is unethical)*. If one has been established to

hand over a Jew or their money in the hands of a gentile three times, we would seek counsel and plans to have him removed from the world indirectly, even though one may not physically kill him." *(i.e. Jew MD may kill a gentile covertly, slowly, so it doesn't look like murder, by improper advise, poisoning, etc, staged car accidents, without a Jew needing to kill him directly).*

Jews are allowed to kill gentiles because a Jew might be fined 20-2000$, perhaps, all Nations Need to Wake Up fast, especially Americans. Polish Jews killed an informer (watch video). See 100+ videos about how Jews kill their perceived or real enemies. In other words, dearest humans, a nonJew is worth only $20 to Jews. Keep that in Mind before you enter into business dealings with these holy chosen children of the Most 'Holy God'. Your life is 20$. Should Bible-Talmud-Torah, Judaist, cultural, synagogue visiting Jews be MDs, teachers, politicians and gentile academia members? Such Jews don't abide by the law, they're not supposed to be truthful, honest with goyim, their first duty is not to the nation they vampirize, but to the Tribe, Torah, Talmud. In other words, JEWS can kill goy if goy might say anything bad about Jews or about their $. Any gentile who fights the Jewish Mafia is executed the Mexican gang style by Mossad agents in US, for daring to defend Americans. That is what Judaism teaches in Synagogues covertly, thru Jewish scriptures and culture. Wake up. Don't let the typical "context bullshit" trick you Jews mean well. They're the Masters of 4000 years of Deception. We need to convert all 'Bible' Jews from their demonic "religion" to any decent code of ethics, such as the Anthem. Judaism is incompatible with the laws of all nations, except Israel.

6). Shulchan Aruch, Choshen Mishpat, 266.2 (you can also go to sefaria.org.../266.1, select 266.1 Hebrew text, right click, select copy and type "please translate into English Ctrl+V (the Jewish text)" to have google Gemini AI translate it and show you it's like WikiSource; Jews don't translate into English all bad passages that make them look bad) "One is required to return the lost item of a Jew, even if the owner of the item is wicked and eats non-kosher meat out of desire... one is prohibited from returning a lost item to heretics, idolaters (nonJews)". In other words, the law doesn't apply to Jews, theft is legal as long as done by Jews. Recall that in business dealings with the religious or "atheist cultural" Jew.☺ Thus, Jews can't be lawyers, CIA-FBI, judges, cops, as their religion promotes theft and unequal application of the LAW, as clearly visible in 100s of Jewish scripture quotes: gentiles are animals, Jews are humans. Synagogues are criminal organized mafia entities who have no religion status, need be shut down immediately, as well as Mosques that teach theft by Muslims is legal and telling lies to nonMuslims is part of religious duty, so Torah Jews/Muslims can't be judges, police, soldiers, lawyers, court personnel. This helps people understand why dozens of nations banned Jews from most professions. ☺☺☺

7). Tosefta Avodah Zarah 5.5: "Bread that an idolator baked when no Jew supervised him, this is prohibited." Well, this is one of 5000 similar Talmud quotes where Jews have to monitor

everything gentiles do to trust it is good, because gentiles are evil by default, impure, animal, demon like, a theme that appears in 100s of Jewish texts. The whole Talmud is about not trusting anyone who is not a Jew, and double checking everything, because the gentiles are always going to "try to screw the Jew". This paranoia comes from the fact Jews always screw the gentiles and teach their tribe to always make sure the gentiles don't screw Jews back. A thief always thinks everyone is a thief, so he barricades himself, like the Talmudic Jew whose main religion is Not Trusting Anyone, Treating gentiles like animals. ☺☺☺ Their whole psychopathic scripture is a set of mentally insane rules to create the sickest society, where the number one thing is extreme apartheid, hostility, division, distrust, paranoia. A violent psycho always wears a gun because he believes everyone is a psycho violent like him. The Jewish psychos always wear rifles around in public casually, openly, they force every US male to cut their penis, every male to have 280 times more guns per capita than Singapore, 280 times more gun deaths per capita. The Jewish Talmud, Torah, Bible, Quran scriptures are incompatible with civilization, they create division, hostility, distrust, fraud of the highest order. They're a threat to the very human race who may disappear in 10 seconds due to such hateful vile divisive texts of death and can't be considered scriptures, only genocide instigation. People who attend synagogues or mosques (kill infidels), or own any Jewish or Islamic scripture are unfit for any government job. Please read the centralization of the USA section, with 8 pages on more Jewish horrific quotes. Muslims and Christians need to understand that any printing of the Bible and Quran is the printing of the Jewish Lies of the Old Testament that have been recycled as the Quran and Talmud interpretation of the Jewish Bible. Any support of Jesus is Support of Talmud, any donation to a church or mosque is a support for the subjugation of nonJews via the Talmud. Jesus praises the Tanakh and Talmud in Mt 5:17-9. Any support of the Jesus faked miracles, the Vatican fraudulent miracles and Mohamed frauds is a direct support of these unethical anti-life, anti-democracy, anti-civilization Talmud quotes that form the core of cultural and religious Judaism, of most of what Israel is today. The gentiles need to wake up from the demonic trance the rabbinic Jews have placed them in for 2 millennia. Israel and All nations need to abandon evil religions and anthems and adopt decent codes of conduct, such as the Immortalist Anthem. Thank You for doing your part. God Bless, and God help gentiles to save the Jews from the demonic control by the evil stupid retarded rabbis. When you study the Old Testament, Talmud, etc you realize Jews don't have a religion or "culture", but a way of conning their neighbors (as Karl Marx explained Money is their God) and or accumulating maximum material advantages by defrauding others, by mass rape, by genocide, by all kinds of deception. Where is the focus on trillion year lives for all, nonkilling? The focus on zero violent crime, no prisons, no death penalty, no war, no rape, no slavery, no mutilating penises, no beating kids with rods? Nowhere. It's the most disgusting outdated cannibal society filth packaged as "religion". And somehow the rabbi frauds brainwashed half humanity to worship Abrahamic made up religions invented by

rabbis. Jews and gentiles, don't be duped by rabbis. Free yourselves from their spell. Become free, logical, rational, kind, educated civil citizens of Earth. Thank you so much. ☺☺☺☺☺☺☺

8). Bava Kamma 113a.21 "if it is not possible to vindicate him (Jew) under either system of law (Jew or gentile), one approaches the case circuitously, seeking a justification to vindicate the Jew... it is permitted to retain his (goy) lost item...you don't return a lost item to a gentile it is permitted to financially benefit from a business error of a gentile." The Talmud demands Jews manipulate the judicial process to make the Jew evade any fine or penalty, even if he's guilty. In other words, gentiles can spend eons in prison, but Jews need to avoid it by breaking the law as lawyers, judges. Should any (Talmud/Torah) Jew be a lawyer and judge? No. ☺☺☺

9). Bava Metzia 114b.2 "Jewish people, are called "man," but gentiles are not called "man."" meaning we're some form of subhumans or animals/demons. More on this below.

10). Sanhedrin 57a.16-22 "if a gentile murders another gentile, or a gentile murders a Jew, he's liable. If a Jew murders a gentile, he's exempt....it is permitted for a Jew to rob a gentile... one who withholds the wages of a hired laborer; for a gentile to do so to another gentile and for a gentile to do so to a Jew is prohibited, but for a Jew to do so to a gentile is permitted." One more evidence no Jew is qualified to be a lawyer, cop or judge, as long as one copy of Torah, Talmud exists in any Jewish home. Owning a Talmud, visiting synagogues, donating to Jewish charities is treason. All Yeshivas/Jewish colleges need to be shut down now. The Talmud is a psycho manual describing how Jews have more rights than nonJews, receive fewer penalties for identical crimes, as if gentiles are some kind of animals. Literally, Talmud mocks, belittles, insults gentiles about 10,000 times and meticulously demonstrates Jewish actions for millennia, how exactly they cheat the gentiles, why they say "kill gentiles who study Jewish scriptures". It's simply because if gentiles knew what Jews think and mean, we would ban Jews from all professions of any strategic importance to our nations (Talmud got 1.86 million words, this Happy Immortals book had 2.3 million when it hit 4000 pages). ☺☺☺

11). Tractate Soferim 15.10 "Kill the best of the heathens (gentiles) in time of war; crush the brain of the best of serpents. The most worthy of women indulges in witchcraft". Genocide goyim: Deut 7:16, i.e. kill trillions of galaxies, for not trimming their penis, even if those guys live to a trillion without penises, due to being octillion times higher in IQ. Jewish Logic. If they had any IQ, they would capture the best of gentiles and have them have a kid with a smart lady to create a high IQ guy that becomes the best of Jews. Killing is stupid. The best is 1 in a million, but Jews are too stupid to realize their rabbis are like cannibal chimps. ☺☺☺ Wake up, we don't study physics from books from centuries ago, why study ethics from these serial killers and retards calling themselves rabbis? God knows a trillion ways to any outcome without war, torture, beatings, violence. Rabbis didn't, they were cavemen. Trash the Bible, Talmud and all

Jewish scriptures without any worry if you so desire, they are pure garbage, toilet paper is more valuable. Jews have a deeply cultural, deeply scriptural, deeply religious obsession with killing, Jews killed their own Pope, for their scripture deifies killing. Jews killed many leaders, as they kill anyone who fights their enslavement of gentiles in any nation and the forceful imposition of the Evil Talmudic Torah Law on All. Their God is Killing Itself, and Making Money off gentiles of course. There is no focus on Nonkilling, Nontorture, Noninjury, all 1280 Tanakh (Old Testament) violent quotes show the lust for beating kids, for violence, for genocide, and they print it and force Christians to print it over and over century after century. Compare that with Buddha's scripture: no killing. Demon vs God, night vs day. Will all Jews ever grow up past chimp IQ stage? Every civilized Jew trashed the Talmud, Torah, Tanakh and all Jewish scriptures, realizing they are the word of 'Satan' if he exists. May God save the Jews, who still own those 'satanic' texts, all Christians who own the 'satanic' Bible with its 'Satanic' Old Testament (Tanakh), the Muslims owning the 'satanic' Quran, which is the Tanakh rewritten. Mossad chose to kill humans, to destroy the human quantum field, just to move a metal object into Israel, this lack of respect for the human quantum field (people worth less than a bunch of metal) destroys Israel and Jews first: watch the video to see the cruelty of a spy agency who needlessly kills people, as its leaders deify Killing as Acceptable, when alternatives exist, but laziness and disregard for the holy human field leads to quantum disturbances that bring Eternal War and Jewish suffer due to this criminal Mossad and all spy agencies who kill or injure others. All spy agencies engage in killings, since humanity has only evolved in deception, not ethics, they lie they want peace, but they destroy the very quantum field they deceivingly claim to protect. These infernal beasts have no ethics and thus make reaching trillion year lifespans a science fiction dream. They run each nation and have never agreed to stop the torture, the killings, the injuries, they fight God. Mossad could have abducted those Iraqis, gentle convert them to immortalism via logic, beautiful rest periods and patient explanations, so they willingly provide info, feeling the love of the immortalist spy agency. Instead, they choose torture to extract info or killings. That's very bad, since many tortured = 1 murder, the start of a war. These top spy-military guys run each nation, fake its elections, steal national wealth to build palaces for their families of torturers and killers, and mock, scoff at God daily, while claiming to the enslaved nations that they follow God, when they fight God and His Immortalist Anthem daily. The only hope of humanity is an international agreement to stop killings, injuries, war, born of people who want Life, longevity progress more than murdering innocent people for a paycheck. The hope is the spies, soldiers who realize their armies, spy agencies are run by demons, who have zero respect for the human quantum field and make no effort to end killings, torture in 3-12 months. They don't even talk about such goal, let alone act on such basic ideal that defines being human instead of a beast devouring others for fun or a little paycheck. You now realize what Evil is. It is what runs this planet, "satan" himself, cannibal chimps with a selfishness that knows no bounds. In 1910 most

cars were electric, but then the rich US mafioso wanted to switch to gas cars even if smog kills us, and they started 100 wars over oil, instead of switching everything to electric cars, safer batteries than those back then, etc. Murder was chosen instead of kindness and scientific work to make resources need obsolete. Of course God doesn't help a nation of murderers (US) to rule a planet if all they do is murder, torture and steal using the Word of satan, the Bible of genocide, mass rape, theft and arson. We must evolve our ethics, anthem (scripture) and life to discover longevity tech and bring Eternal Universal Peace and Immortality *for* All, that means none killed, or injured, no violent music either. We Americans need to stop printing the violent Bible, stop being puppets of Mossad and Israel and create a New Global Ethics of Nonkilling, noninjury, nontorture, to free the entire humankind. Boycott most music, start taking action today, trash all evil scriptures, show you love God nor murder. Free speech is important so we know what's wrong and a mistake can be found with a tech or system, but not free physical violence.

The Kosher and Halal killings are ultra cruel and painful for animals, as detailed in the huge section on animal cruelty and they should be banned, together with the cruel, violent, demonic, inhumane, sadistic 'Halal' and 'Kosher' labels that have no place in immortalist societies, as expressions of the infinite imbecility of the Bible and the Quran, written by savage cavemen unable to think and realize the future diet will be eterni powders that inflict zero pain on any tree, plant or animal, being neither omnivore, nor vegan, free of agriculture. These highly violent rapist genocidal killers called "rabbis" and scribes of Bible, Quran could not have any basic psychic ability to realize in the 21st century chemistry will begin creating powder foods, as we see already with thousands of individual amino acids, fibers, nutrients and mixes, moving slowly towards the powders of 100000 chemicals that would be impossible by any traditional Islamic or Jewish dish or combo, as those are the traditions of death and 80 year lifespan, not of trillion year lifespans of the Immortalist Anthem and eterni foods. Eterni foods are much kinder than animal foods, kinder than the fraudulent Jesus (a Jewish rabbi) bread in the prayer he gave to Jews, because bread is obtained by genocide of mice and small mammals and insects. Vegan foods can uproot plants and cause plant suffering. In immortalist societies, no bloodshed exists, no cats eat rats, no rats eat insects. None of these pests exist as bloodshed vanishes via the quantum device ending all bloodshed species, no mice shall shed insect blood. Souls of beasts if present evolve to incarnate into humans. These bandits dressed in clergy attire terrorize the entire planet, by deifying the painful bloodshed of animals as a certificate of "ethics", when what they do is say "Satan's brother is ethical and his arch demons", or "cyanide (Kosher/Halal) is ethical because it's less toxic than nerve agent (eating animals alive)", so "everyone eat cyanide please". This garbage can only come from the infinitely evil Bible and the Quran it recycles. Halal and Kosher slaughter are animal cruelty, violent crimes worthy of lifetime labor and death penalty, but we can forgive these people and offer deportation to Israel or the

Muslim nation of their choice, as repeated pain generation destroys the quantum field of the USA and shortens American lifespans via catecholamines (meat has 0.4% blood) and other effects. Today, if you would do what Halal and Kosher do to pets, you would be jailed, but why do Muslims and Jews get exception from the federal law? Let's be fair. One Law for All. Livestock are pets people eat, that's the reality of it, some pigs can be smarter than many dogs. Look at the negative and positive change in Jewish population 1980-2024, and see how Jews left the poorest states (God's "chosen people" left the people who needed the most help, so are Jews thieves or holy?), where poverty is high and nothing is there to steal, and went to warmer states. Jews claim they're special and not after MONEY, but their actions speak a trillion times louder than their words. They only choose professions where you make THE HUGEST INCOMES. The only nonpoor state Jews left in droves was New York, from the overcrowded 10 kids a couple Orthodox areas living in condos, etc towns to live the Dream of Nice Weather and More Theft, as in NYC everyone knows everything about Jewish last/first names, facial features and how to spot a Jew and avoid doing business with them, plus Florida, California, Georgia, etc have way nicer weather. As a conman lawyer in Florida with all wealthy people, you can make a ton more money than in West Virginia, Mississippi, and the states with negative changes. The issue is that the Christians have been brainwashed that Jews are God's people. They're not, so while those states all increased in population, Jews left, as Jews can't stand poor people, Jews despise them. Gentile change was positive, Jewish negative in poor states only and New York, where almost everyone knows what Judaism really is ($$$), due to the highest Jewish population in US.

Due to the culture of this psychotic Torah and Talmud, etc, most Jews subconsciously (some consciously) behave like parasitic blood sucking vampires who pursue only materialistic goals, acquisition of all power in every industry and field in a host nation (always disguised as some egalitarian humanitarian selfless action), and the ferocious promotion of Jews and Jews alone, nothing merit based☺☺☺. Hard to find one single Jew last 3 millennia proposing 11 companies worldwide, true equality for all (not really possible, since Jews are souls and all the rest are perishable animals in their theology, evident even from the Bible "worm IQ folks" consider Word of God, see below for details), and 4000 year lifespans instead of their bacteria intelligence traditions of cave men, traditional retarded rituals, foods, attire, dress, and psychotic distrust of all people who're not Jewish, plus desire to enslave gentile 'animals'. Jews killed 1 billion people or at least half a billion since Jesus time alone via their invention of Christianity and its deification of alcohol drinking… This is one of many Holocausts they did. They forgot Jews created Islam and Christianity, whose scriptures are basically the Jewish Bible or Bible rewritten. Naturally, then, the world had 200 philosophers and writers whose works were highly critical of Judaism and its "culture", or any Jews following it. Karl Marx realized the culture he was brought into and rejected and criticized it, as a Jew himself. It's important to add that many Jews'

behavior is like that of a gang or cult, and so is with other groups, so what Jews do is basically a typical thing that the cannibal chimp inside humans is programmed to do and overcoming these tendencies is a task for all people, not just Jews who get brainwashed to be like that. Religious and other Jews are too stupid to realize we humans are mere 'bacteria': humans live a million times longer than bacteria (see 1st page of the book), Immortals live trillions of times longer than us, (see "Immortals and God"☺☺☺), so the Jewish and other Jew invented religions selfish "save my bacterial soul by chicken IQ selfish rituals that harm others and lower IQ" goals and pursuits are pathetically retarded, just like everyone who chases "bacteria IQ stuff", instead of trillion year lifespans to get real understanding of "God". The hilarious thing is the microbes (some religious Jews), think Jews are eternal and the rest of us are mortal "animals made of demonic energy", per some of their "brilliant sages"☺☺☺. There is no anger in this paragraph, only a 1). realization that 'bacteria' pursue short-term goals and in the process create maximum destruction for the rest of human 'bacteria'☺☺☺, 2). a fascination by how infinite the human stupidity is, which Einstein pointed: "2 things are infinite, the universe and human (Jewish etc) stupidity"☺☺☺ 3). an acknowledgment that anger is counterproductive, as it allows gentiles to become puppets of the Jews, using gentiles to increase Jewish power by gentile on gentile wars (this book's purpose is not to make anyone angry, only to inform, so humans don't vanish in seconds☺☺☺). Once we gentiles see the plots the Jews play against us for millennia, we're harder to dupe next time: made up religion, fake science, fake elections, etc. Too few in the US got the courage to criticize these fleas and describe some of their essential traits: when egos are big, reactions are strong, and Jews can't remain calm when called bacteria or fleas☺☺☺, but any honest person on this Earth realizes we're shorter lived than a nonosecond neutrino versus old Immortals, so they get the point: we humans are more ignorant than even bacteria… vs the Immortals. But the Jew doesn't get the point, so he doesn't work 24-7 for World Peace in 3 months, equality:, he forces us at gunpoint to build violent sport facilities, wars (to build Israel), synagogues/mosques/churches to Genocide, Rape, Murdering Slaves by Beatings slowly.☺☺☺

The audacity of the Jew is incredible, as infinite as his stupidity, already predicted by Jewish Einstein: he builds temples on every nation's soil (sin-agogues) and has 2 billion Christian slaves building 'churches' dedicated to the demonic Bible where Jews describe how Jews are the Superior Ones and GENTILES will be beaten, enslaved, raped, genocided by the Jew. What is most shocking is that not even Hitler realized the irony of it all, appealing to Christian "rat IQ folks". The gentiles have been do imbecilized by the Jewish Media and Abrahamic Genocide Religions "Clergy from hell", that the gentile doesn't realize he worships his own enslavement, his own extermination, his own mass rape by the Jew, his own mockery and humiliation by the Jewish parasite.☺☺☺ The Jew fooled 4 billion people into printing Bibles and Qurans that describe how Jews and Bible/Quran followers will commit endless genocide, mass rape,

atrocities, take slaves. To hide the Bible evils, owning a Bible in local language meant death penalty, as Vatican Jews wanted ignorant gentiles, without a clue Jesus was a fraud. The Bible clearly shows everything in the non-Bible Jewish scriptures, so you don't even need to read the Talmud pedophilia and the other Jewish texts to know Jewish ethics, practice, character: the Bible has it all. All you need is just to read 70+ strategic Bible quotes the Jew has forced on us all at gunpoint via fraud. We immortalists have our own anthem or "scripture" if you wish, though we're not into religion, and it says that we love the worst human, a trillion times more than the best mom loved her beloved sucking infant last decade. The difference between our ethics and Jewish one can't be more stark or astronomical: the Immortalist Anthem may 1 day become the US anthem, when gentiles have awakened enough to throw away the chains of slavery Jews gave us all. Jews bring in serial killer Muslims to all nations they want destroyed faster so Jews can take power faster, for example the UK, see how they do it: bring in Muslims from Africa and Asia to slaughter all Brits so Jews can takeover everything in the UK. England/Wales blacks 4% of population, but killed 73 whites, while whites killed 18 blacks. Hitler explained this in 1930s. Islam is used to destroy all civilizations that resist the Satanic Jewish World Sharia Dictatorship. In line with the Zion Elder protocols of destroying ethics in gentile societies, Jewish Darren Star found a garbage book by a Candace Bushnell and made a TV series called "Sex and the city" to speed up the US takeover by Jews. Star & Bushnell deserve lifetime labor for destroying US civilization. The bad type of Jew never wants to help eliminate injuries of workers in deadly industries (melting copper, copper recycling, handling hot steel, risk life hourly for a Jew easily gone with new materials stronger than steel, 1000x safer to handle by robots, better in every way via STEM innovation instead of Torah mass rape of people and nations via "economic or political theories" via an insane number of political "science", economics majors), he only creates more injuries to families and society, like the devil he is. He comes to teach us creating 15 million trash Incs & LLCs to sell us 1.4$ trillion of useless junk, while the basic needs of decent housing, transport, food, healthcare for the 99% are ignored. He wouldn't make a series about the terrible living conditions of gentiles, how we need to improve them by robots doing all jobs where injuries occur today, by ending 5-90 million pay for Jewish celebrities telling us bullshit on TV/radio all day. No Jews make a TV show about the depravity of Jews, etc making 2000x more a year talking BS on radio vs a guy making essential steel in a factory and risking life daily. To hide their Jewishness, Jews criticize Sex & the City, while subtly promoting same values in other far subtler ways, in order to dupe gentiles that they are just another gentile. Masters of deceit. Yuri Kovalchuk's mom is Jewish, he is often thought of # 2 in Russia, Putin's trusted friend who owns stuff in Crimea and pushed for its development, for the Feb 2022 invasion of Ukraine. ☺

Jewish kids are practicing Judaism in 1 min video, using "kind speech". Jews love to pollute the neighborhoods with fumes that kill the healthy lung cells of gentiles (1 min clip), all for the

ridiculous belief of "nematode worm IQ" that they need to burn bread and leaves, like the "fecal bacteria IQ" folks who burn meat to create AGEs via barbecue. In the Yom Kippur "Pain Inflicting is Our God Jer 19:9" tradition called Kapparot, Jews sacrifice chicken to "wash sins", making US cities look like human sacrifice camps of ancient Judea where Baal was their God 2Ki6:28-9. California banned LA Kapparot: 2 min clip. This is the future of USA if we let Jewish power increase: 3 min of chicks. Everyone will be required to do it, watch 2 min, a kid so terrified by the cruelty yet being forced to join the 'best' religion, Judaism. The 'best' part is every church is required to print 1300 sick quotes about boiling, eating kids, cannibalism, genocide and mass rape of trillions of kids Jews feel like killing, etc, all funded by the US taxpayer in the name of "freedom of religion", if you ever wondered what the Purpose of the First Amendment of US Constitution is: the legal right of Jews to incite all to genocide, a criminal amendment that doesn't prioritize the first right of all, to life, to zero violent crime. If you're not alive, all other rights have zero meaning, so all rights must be subordinate to the Right to Life and Nonviolent scripture, lyrics, etc. *The 5 rights* (religion, speech, press, assembly, petition) are secondary to the First Right above all others: Right to Life, to Nonviolent (no genocide calls in scriptures, no genocidal mass rape scriptures printed, let alone called "Word of God") Media, Lyrics, Books, Movies, Symbols, Melodies, Scriptures, TV-radio programs, sports, petitions (no barricades, rocks thrown, fist fights) etc, the Basis of Immortality *for* All, as outlined in the Declaration of Immortality for All, America's True Independence from the Jewish Mob. Any violence leads eventually to killings, so it can't be a part of any "Bill of Rights". People will only have rights to peaceful religion, peaceful speech, peaceful assembly, peaceful press, peaceful petition, etc. Nobody should have the right to guns, as that increases the murder rate 300 times: Singapore, 300 times fewer guns per capita, 300 times fewer gun homicides. That's why we need to Change the US Constitution, to prevent the Muslim, Jewish extremists from turning US into a Jewish Bible-Quran 1st century killing field. The Jewish Zionist uses the openness of Democracy to turn all into psychos loaded with Guns, Porn, every street into a satanic coven of infernal music sounding like their Infernal Rabbis (watch), celebrating "Freedom of Speech" Zion protocol version: eternal bombing and violence for all. We see that with Jewish Meta/Facebook and the content it allows plus flooding competitor AI with criminal content, instagram and the mass rape of children content it promotes in India, etc but not in ISRAEL: "The BBC set up an alias account on Instagram after we noticed that the platform was pushing sexually suggestive content, even when a user hadn't searched for such material." That's the Jewish gift to nonJews, total destruction, the mass rape Bible quotes say it all. Youtube run by Jewish Google founders is like that too, they push on the right side of youtube endless sex outside of procreation and also violent crime videos to destroy the gentile mind, distract it with fear, despair and rage while the Jew makes trillions off gentiles' credulity (under the guise of "police interaction with criminals and watch out, this is the norm"), the Jews are always the SAME as the Protocols say. You need

to right click on the 3 dots near a video and then select "Don't recommend videos from this channel" and use it 500 times until the Jewish Hyenas get it. Oddly, while living people are crowded, we have 100s of Jewish cemeteries thruout USA that occupy land gentiles could use, since no Jewish communities exist in those towns. Jews and brainwashed by Jews gentiles waste land for the dead, while the living endure violent crime caused by overcrowding, showing the hypocrisy of these "ostrich IQ folks" who can't comprehend that if the soul exists, it doesn't need the carcass of a bacterium on a grain of sand called Earth. Cemeteries, Jewish signs, letters, etc, street names we need to replace, but never Eternal World Peace and Zero Violent Crime in 2 years signs, prayers, institutes. Jewish life revolves around Jewish power, not Peace, not nonviolence, check out blonde Jewish kids. Don't assume blonde kids are gentile, even if hair color darkens when they get older. Very little changes as the same violent Torah is the basis, so pogroms or antisemitic attacks repeat each century. Death penalty for any violent crime will quickly end violent crime, and lifetime labor for pushing violent/sexual content, all this Jewish reporting of eternal violent crimes used to keep gentiles in a state of terror for maximum theft of US Treasure funds by the Jewish gangs. Every rabbi who slaps killed within 24 h if video exists, to end Jewish violent destruction of the human quantum field by his infernally violent trash Jewish "Bible" of beating kids with rods & beating slaves to death slowly, so it's not obvious the Jew did it. ☺ This is the Ethics that the Churches, Synagogues, Mosques hide as the Centrality of their Expansion: thru slave beatings, genocide and mass rape, the 3 Abrahamic religions spread far and wide. It's up to us Americans, to become world' first free nation from this global cancer. Christians will say the New Testament Bible is 1 billion times more peaceful than the Old Testament (Jewish Bible), and indeed, it's free from direct calls to genocide, mass rape, arson, mass animal killings, but Mt 5:17-9 shows Jesus considers the Old Testament "Jews Genocide All They Want D7:16" as valid, which makes the Gospel Violent, also given Jesus's violence throwing people. If we define Our Constitution as peaceful religion and not religion, then certainly, the scripture has to be free from any violence, any mention of war, killings, genocides, like the Immortalist Anthem and the Bible, Gospel, Quran, Mahabharata, Gita, Mormon Book, Analects, Tao Te Ching, Sikh scriptures, don't qualify, much to the disappointment of Chinese philosophy or Hindu fans.☺☺☺

This section will reveal where the holy Jews live in the US, where they're currently invading and multiplying fast, like a cancer of humanity, and all the tricks they used for millennia to start 100s of genocides, as "Satan", their God Yahweh, commands them to in D7:16. The "Jewish question" is easy to solve without any violence (Nazis were stupid, they didn't realize violence isn't needed, God is Infinite Grace). Violence is never needed, because the real God of gentle tender soft nurturing loving healing kindness for All or Immortality *for* All ☺☺☺, unlike the Yahweh Demon of Israel or Eternal Genocide, Rape, Slavery, Beatings, knows trillions of peaceful ways to

peace and trillion year lifespans in any circumstance. One of the trillions of ways is US will simply create free Universal Education for all as the 11 companies section explains and these pests and their demonic lackeys promoting "genocide, mass rape, slavery, beating slaves to death" as "Word of God" (meaning all Christian, Muslim clergy) can't have their own colleges, high schools, yeshivas, religious schools, nor any of their 'demonic' hyper violent trash scriptures printed anywhere on Earth. US is one nation, free, sovereign, not a colony of Vatican, Mecca or Israel. One Education for All Americans, no more Jews running every Ivy League school to promote maximum imbecility of gentiles. No more foreign nations running all our education with their cabbage IQ "religious schools" to make Americans naive, easy to exploit and destroy. ☺☺☺ Jews won't be able to make more than the universal pay, finally being equal to gentiles, their God, Money, will become a trillion times less important. The entire humanity will unite against this scum of the Earth, the Jewish Bible, this bacterial infestation of the Collective Body of Humanity, BEFORE all humans die in 10 seconds. Perhaps, some would say☺☺☺, it's time to sign a real Declaration of Independence, better than in 1776. Jews can have kids via 3 marriages or 4 relationships and become majority fast, they can hide to most people their real kid number, to not arouse gentile rebellion. They pose as Catholics, Protestants, etc, to take over gov positions and push whatever helps them to take over states and cities. They pretend to be Christian and other religions to not cause revolt as they take over all USA. Jews pretend to be Democrats, to be about Equality, but in reality, it's all about them being Above All, having the right to 10 kids, while gentiles have 0-1 kids. Equality doesn't exist in Judaism, in immortalism equality exists does: no ethnic group can have more than 1-3 kids per couple per IQ/Ethics Score (1.5 max per person), unless IQ + Immortality Credit Score very high too. For more on the Jewish murder of 1 billion gentiles, see the Ethics section about Judges and Jewish crimes. ☺☺☺

We're slaves, that's how Jewish scriptures view gentiles, as dirty impure souls, these are their sages, saints saying that, etc. The Democrat/Republican Party Jews' only goal is Absolute Power for Jews, not any Equality of Pay and the other 25+ forms of equality. They're the Masters of Deception, they fooled 4 billion people into believing the Bible-Quran Filth is the Word of God.☺ Hollywood, who has destroyed USA for 100 years, had a lot of cryptoJews (see list of celebrities few know as Jews), i.e. Jews who took on British☺☺☺ names to appear local, as Jews have done for millennia in lands they visited. A video explains that Jews built the Hollywood industry in order to practice the Zion Protocols. Not to worry, the "Holy Jewish" Talmud clarifies how to have intercourse with 3 year olds, which explains the Jewish Hollywood obsession with showing sex outside procreation. Pedophiles? Jews run endless charities to steal money from Gentiles (Goyim) and give it to Jews, like Cars for Kids banned in California. Jews establish a state within a state, whenever allowed to settle in large numbers. And for 2 millennia Jews imposed via fraud and staged miracles of their fellow liar in chief, Rabbi Jesus, the 40 second ritual infant abuse

disguised as “religion for Goyim”, the drowning of gentile babies until in 1200 some Western Europeans banned this barbaric Jew invented ritual to kill and destroy gentile brains. The Jewish Zohar teaches Jews have holy souls and the rest are more like garbage… it has a lot of black magic, and bad wishes for other human beings instructions, check out some of the Zohar garbage of Solomon Freemasons worship, yes, some Mormon-Freemason hand rituals are the same… hence USA land of Judaism. Sadly, Christians, Muslims, don’t realize that their religions are pure Judaism cults made up by Jewish conmen. Check out the great USA cities where Sephardic synagogues praise the Old Testament of genocide, mass rape, human sacrifice, arson, alcohol, kid beating, slave beating. May God Bless these synagogues with IQ…, check out the Jewish mafia that killed endless people for money. ☺

Check out 15 “cow IQ” things that Orthodox Jews do to understand their creation of a cult like mini “state within a state”. The “cabbage IQ” level of “lack of intelligence” of these people defies description, to put it politely. Their hypocrisy is high too: Jews founded Hollywood to destroy the USA morals via bad movies, ruined the music industry to advance the Protocols Goals, destroyed gentiles with cosmetic procedures, the promotion of Jewelry idolatry via diamond trade and breast enlargement, and casinos in Las Vegas, flooded the Internet via Facebook/Google run by Jews with violent content, then established Jewish ambulances to arrive in 3 minutes while gentiles get it in 10 minutes. Religious Jews, per their religious duty to enslave gentiles, don’t have any concept of equality, of giving to gentiles the same level of “services” they want for themselves. Why not destroy Jewish family morals, and only gentile? Why is the Jewish MD or lawyer making 30-80 times more $ than min federal wage if he's so noble and chosen? Some Jewish lawyers make 300x-1000x min wage (Pritzker Jew became a lawyer and then the richest family that owns much of Chicago: the parasite Jew owned a sugar factory, as a typical Jew aristocrat, subjugating Ukrainians, and then progroms happened, causing them to flee to USA to subjugate Americans). Where is the Orthodox Jew protesting and demanding equal stress in jobs and equal pay in jobs? The Anti-Defamation League never protests about real issues, like some Jews making 10-9000x many gentiles, Slavery in the Torah deified in every synagogue, beating slaves to death slowly. Is this facade of the “religious dogmatic Jew” a trick to dupe gentiles into believing Jews follow the ‘ritualistic part’ of the Torah? The more you dig into it, the sketchier it gets, as you read other “scriptures” of Jews. Jews never demand universal one pay for all, as if we're all kids of God. No, they don't, because Jewish scriptures, like the Zohar, clarify Jews are holy souls, and we're dirty animals: Zohar Volume 1, 47a says “Jews [are] the children of the Holy One, blessed be He, whose souls are holy." This is in contrast with non-Jews “which emanate from impure sources and render impure anything that approaches them.” The people of Israel, the Zohar states, possess a living, holy, elevated soul (“nefesh hayah kadisha ila’ah”), as opposed to other nations, who're described as

akin to animals and crawling creatures, which lack this "Divine" soul, having only an "animal" soul ("demonic" souls per some rabbis even, explaining perhaps why USSR Jew Kaganovich co-killed 5 million Ukrainians, who're merely "demonic insects" if some Jewish "sages" writings are internalized). Zohar Ha-Ḥadash says Jews (who fulfill the Torah commands to commit genocide of trillions, mass rape of billions, beating to death of trillions) will live forever with God, while nonJews will decay with the animals, so perhaps the Jewish Yahweh God of Israel is the king of 'demons' in all religions or stupidity in atheism/agnosticism. The Jewish Vatican Mafia brainwashes all fools to print Jewish Supremacist Bible (Deu7:6,14:2,26:19,14:21,Ex19:5-6,Lev20:26) and call it Word of God☺☺☺: Deu14:21 is clear: junk is to be given to gentiles, as in interest is only charged to gentiles. Pathetic, if you obey his genocide, mass rape commands you become a holy nation Ex19:5. God of Israel's Logic for you. The Vatican and Christian clergy bandits promoting the Bible are Jewish agents of "genocide of billions, mass rape of billions of kids, human sacrifice, arson, kid beating of trillions of kids, slave beating until death (slow death, not in 2 days) of trillions", in other words, they're terrorists as bad as the Taliban. The demonic Bible says in Ex 4:22-3 that Jews are the firstborn, the rest are "2nd class", so God decided to kill millions of firstborn Egyptian kids in revenge for not letting Jews out. The Bible is a Manual for the covert enslavement of all by the Jews. Anyone promoting the Bible or Quran is a fraud of incredibly low IQ, who has not read the 'scriptures', a person with no regard to human life, the Quran deifies the same "kill infidels" energy. Gently kindly wake up. ☺☺☺

Jews financed slave trade, endless wars, made billions off human suffering, 1 of 100+ examples is Angola 1641: converted Jews were complicit in all the slave trade and genocide by overwork of slaves. You thought Jesus was Chosen or Holy? Watch Rothschild's financing of both sides of the Napoleon-Britain war to make trillions for Jewry via genocide of gentiles, Zohar in action: slaughter gentile animal souls by the billions for Jewish "holy souls" profits. Jews financed the Italian-Austrian war of 1859, the Rothschilds made sure all sides of the conflict get money, so Jews make $$$, French Jews financed the Norman-English war of 1066, Algiers Jews financed the Napoleon's 1798 invasion of Egypt, and many more genocidal wars: they don't care about the use of money for peaceful purposes, only about profit, via genocide or not. The Jew refused to give up his Satanic Old Testament Bible, his allegiance to demonic Genocide, MASS Rape, Beating Slave Gentiles to Death "Religion", so as a Jew, he was restricted from professions and chose the demonic profession of War Financing, Trade and Price Amplification, in tune with his demonic possession by Yahweh, Moses, etc that demands maximum genocides.☺☺☺ This is called the Jewish ethics that dominates the world today: gentile life has no value, only Jewish profits. The dominant Jewish ethics: what is right is Jewish greed, not minimizing human deaths, not Eternal World Peace, not implementing the idea of zero violence because the real God, not the demonic Jewish Bible, knows 1 trillion ways to peace without war, to Heaven for all,

Immortality for All gentiles and Jews, without war or violence. All Jews need to start to actually THINK and realize all religions are bullshit, as explained in detail in the 6 evil scriptures section. 'Demons' and 'satan' are names for stuff people don't understand, which may be the garbage in one's brain from reading violent scriptures and possibly quantum information remnants from dead people, imprints that hang around a few months or years. Exorcism is really a process of self-reflection where you realize you've been duped by the cabbage IQ rabbis pretending to know anything, when they're mere microbes vs the Immortals, as the Anthem says.☺☺☺ The lie we hear always is that the Pope said "no Christian can lend money at interest" to save gentiles from mortal sin of "greed", but the truth is, most likely, that some Popes were Jews and they passed this "prohibition" to help Jews become the lenders with interest, the bankers to finance all wars, 90,000 wars, needed for Jews to conquer the world using useful "idiots" like Christians and Muslims. The winner writes the history, we'll one day know☺☺☺. Jewish Iraqis poisoned millions of Asians via opium for profits, many Asians are half Jews who appear Asian. The Jewish Mafia provided the gentiles with alcohol and destroyed America's chance to become free of alcohol and the 1 billion people it killed last 2000 years alone via 2nd Rabbi in Chief Jesus, after Moses, 1st Chief Rabbi, the lovely killer of 3000 humans whenever his rage dictated. Jews helped kill endless gentiles whose wood frame houses became flat in 20 seconds during tornadoes, storms, all for profits: William Levitt, like the 3000 Levites Moses ordered killed in one fit of rage, effectively put his Money Above Life Ethos in action and started replacing brick houses that withstood high winds with wood houses, enabling a horde of parasitic Jewish or gentile contractors to make trillions worldwide by building paper houses. How come USA can't replace all these vipers, sewage contractors with Immortality Building Inc that creates domes that last 3000 years and withstand the biggest tornado ever? Let Jewish vampire realtors work as regular employees of the Universal Pay fair 11 companies system☺☺☺, as housing.gov sells and buys each house in 3 days with zero realtors and Jews no longer crowd the house flippers industry of death and sickness of gentiles for Jewish profits. A brick or concrete dome with a vent can save huge AC costs too. See a dome come up very fast. See why domes are the best and why Jewish capitalism of Talmud prevents their spread. US gave Israel 0.3 trillion so far and lots of tech transfer occurs that harms USA, all due to the tedious work of US Jews of course. ☺☺☺

70% of Jews moved to Argentina in 1880-1920 during Argentina's Golden Age. As Jews moved in to steal more profits from "animal souls", Argentina fell and became poor from a very wealthy state, richer than Germany, France, with GDP/capita in top 10. Could Jews have anything to do with it? Where money is made, Jews rush right in. If Jewish power increases in the US, the US becomes a 3rd world nation, as we're already in many ways as host of Jews whose main goal is to destroy all culture, create a pile of crap that accepts Jews as God, Torah as King, Jews as the rulers of mankind. When everything is trash, even the Jewish Horror scripture appears "good",

even if it's the worst now in every sane person's opinion, among those who actually read the Old Testament. For 3000 years the only professions Jews were attracted to were ones that have no physical labor or made the most money, usually, that's because physical work is ideally for "inferior animals", not for the holy Jews who "alone have eternal souls of fraudulent merchants, while gentiles are soulless or demonic".☺ Check out the Chabad plan to rule the World, similar to the Zion Elders Protocols book plan for a Jewish ruler of Earth, the Messiah. In the New USA, we will be required to study Jewish Bible stories of boiling and eating one's kids. Rabbis torture babies by causing 5 months circumcision pain that destroys their immune system and empathy, these terrorists void of empathy suck 8 day old suffering baby blood to draw 'demonic' power from contaiminated pain rich blood in gross violation of Kosher slaughter that forbids ingesting catecholamine rich blood. See the future rulers of USA, if we let them: demonic rabbis: video 1, video 2, video 3, rabbi cuts entire penis by accident, other videos, infecting kids, circumcision they now imposed on 80% of US male kids by Jewish terrorists pretending to be atheist Democrats or Christian Republicans. How can genocide, rape promoting texts "religions" get tax free status? They're organized terrorist organizations like ISIS.☺☺☺ Rabbis infected 11 babies and killed 2 babies with herpes, many kids are raped in Israel, and they try to normalize pedophilia in USA, for sex with 3 year olds as in the Talmud, by the LGBT training of 0-18 year olds: US schools, under the Rabbi Demonic Leadership of USA, now teach 9 year old gentiles on how to be LGBTQ, and this same instructor (who obviously should receive lifetime labor to pick up tomatoes in California, so Sephardic Jews can't bring slave Latino labor for their companies to destroy USA) has a free for all 9:30-11:30 pm gathering of 0-18 year old LGBTQ. Notice how "religious" and "pious" the Orthodox Jew pretends to be in interviews… hiding the Talmud rape of 3 year olds. The Jews covertly control both parties, push the rapist pedophilia rich genocide rich Bible on all. Circumcision is a violent crime more serious than rape, as babies are truly☺☺☺ helpless. It should receive the death penalty since the injury doesn't heal in 2 weeks.

4 billion humans are too naive to realize churches, mosques, synagogues are temples dedicated to genocide, mass rape of kids and slavery, slave beatings to death disguised as "religion". If they read the scriptures, they would ban the 3 "religions" Earth, as Saudis ban non-Islam religions. Satan and demons disguise themselves as "angels of light", beautiful, etc, by hiding 1450 horrific quotes of genocides, mass rape, violence of all types, and presenting the 20 nice quotes clergy repeats in churches, mosques, synagogues in order to fool the masses, steal our money. Catholics follow Satan's deceiving ways the most, as they removed Bibles from the pews, to hide the 1450 bad quotes, and they invented an insane number of fraudulent miracles to get more followers. The clergy are like a scam caller defrauding people of $80,000 or enticing kids to kidnap them. Mormons are especially good at extortion/subjugation, having executed 120 people in one move and Prophet (profit) Smith having fought endless battles like Mohamed,

requiring 10% of income donation as a member, in order for you to hear a pathetic interpretation of the 1450 genocide of billions, mass rape of kids, etc quotes, plus the forgery by Smith of the nonexistent gold tablets claiming the first US inhabitants were Jews from Israel. All paid by the hard working taxpayer, who subsidizes all these religious schools, Mormon, etc temples, which are the *grounds for Jewish* Supremacy brainwashing of all Americans, for turning all gentiles into "sheep IQ" folks. Indeed, Jews taught gentiles this ritual of drowning and brain damaging gentile kids, an infant torture ritual that continues even now in Christian Orthodox, some Catholic churches. Israeli newspaper claims Jewish MDs were snatching kidneys out of gentile kids without their consent. Don't worry folks, at 2% of US population, 16% of MDs are Jewish and each few decades a lot of medicines Jews prescribed before become banned, illegal. So, we have to pay Jewish MDs 20-80x the min federal wage, for prescribing stuff that later will be deemed poison. Sounds fair right? Jew invented Christianity is causing child abuse worldwide for 2 millennia as this 40 second video of infant baptism shows, so what else is to say? You know, we're brainwashed that Jews are special, geniuses, connected to God, Infinite Knowledge and this indoctrination starts at 2 with Sunday school, Catholic confirmation, Christian brainwash. They're just bipedal chimps like us, who deify alcohol that caused 1 billion people dead already last 2 millennia of Jewish Christianity, connected to their Hate Manual for Terrorizing Humanity, the Bible, a text void of the idea that the real God knows a trillion ways to any outcome without war, violence, rape. In other words, disconnected from God, connected to demons/satan if they exist. As all destroy their kids by sending them to religious schools, Jewish power rises☺☺☺.

Gentiles are very naive, they believe history's versions of events as the Jews handed it to them in schools, without any critical thinking, questioning, etc. For example, gentiles never consider these possibilities: 1). the Jews within the Vatican passed laws forbidding charging interest, in order to give Jews monopoly over charging interest and becoming the sole lender to corrupt monarchs and aristocrats needing quick cash for wars that naturally increase Jewish power and weaken gentiles enslaved by debt. 2). In the 15th century Jews from Vatican saw a way to increase Jewish world power, by helping Jewish capital move to protestant less antisemitic nations to start big Catholic-Protestant wars that would make the Jews super rich, so the "expulsion edicts" helped Jews to move from Spain, Portugal to Netherlands, Brazil, etc and make the Dutch coin the world reserve currency for a century, financing endless wars and getting richer, weakening Catholics, to distribute power within Christendom 50-50% for maximum warfare (20 million dead) and max Jewish lending and profits. Then with equal speed they moved to the UK to make those Protestants super rich and finance more centuries of slaughter as Britain rose to the top. The WW1 (UK Jewry deal) and WW2 created Israel and gave them a chance to live in the bigger nicer USA vs freezing Poland weather, etc. ☺☺☺

3). In the 1970s, well before the Islamic revolution Jews staged to destroy gentiles, Jews started buying land and properties in Beverly Hills, while paying agitators to start the Islamic revolution, controlled by Jews who pretended to be Muslim This was to enable Jews in USA to lobby State Department to get political refugee status to Jews, so they bypass normal legal migration based on merit and use their business looting skills, refined over millennia of parasitism of Persians, to build a big empire in USA, doing the same old stuff: pure hedonism, big palaces, big restaurants to meet for Shabbat and stuff, defrauding the gentile as explained above. The irony is evident, the illegal migration evident: if they were persecuted, how come Jews ran entire enterprises, factories, hospitals, departments and had such power in Iran?? Another fake story. You'll understand this better when you watch every Jewish migration and how they plan it ahead to seem like some "event due to a persecution", where they play victims, but may be the initiators of the revolution (endless gentiles dead, with Jews often running much of the nation before and after a fake revolution used as pretext for the great migration and transfer of money to a nicer place) designed to give them an excuse for moving to a different place for their world conquest next step: why stay in Iran, most of them, with more stone age tech, dry weather, lack of water, if they can just become the predators of the Americans with the fellow 5 million Jews in here in 1979, many more, to make a TON more money? The power of numbers, connect with the Mossad Mafia units in USA and get a fast boost, take on the prime land and estate, nicest weather and let the game begin. Not one single business in LA created by these thieves and looters of the Iranians (same technique everywhere, keep gentiles stupid, take over all important positions) was about 4000 year lifespan and universal pay (equality is a scam used by Jews to make sure every gentile is their slave and Jews make lots of cash) and opportunity for all, it was all about Jews getting the 30-500 times minimum federal wage positions as movie actors, music producers, MDs, lawyers and destroying USA with hedonistic hyper violent trash sold as "culture of the superior Jew". To improve their public image of "saviors of humanity", they'll pose as main leftists, etc, communists, ☺☺☺the fake leftists of Democrats who call for max wage being 5000 the min wage instead of 50000 times as the Republicans. In the USSR we were told they were highly persecuted, another lie by US Jews to justify bringing in loads of Jews to USA as "victims", but the reality was different: Jews were 16% of many important high paid professions at 1% of population, Kaganovich killed 5 million gentiles in Ukraine and lived to 97. So how do Jews get to become so good at posing as eternal victims when they're the thieves and parasites conning the local host nations? Thru the zealous application of the recipes of exclusivity, ambiguity, double speak and deception of Judaism, evident to any intelligent person who actually reads the hypocrisy of the Bible itself, Moses, etc. What did those vulgar Persian Jews do to So California? Nothing, they got endless Blood Filled Meat Restaurants everywhere to practice their Superior Blood Lust, their Grotesque Demonic Desire to Eat Flesh of tortured animals in Kebab stores and Keep Humans Backward, nothing about eterni foods, progress, end

of corruption, greed, hedonism and war. Kosher is a scam to make gentiles believe Jews are kind, all meat is blood full, Kosher slaughter is more pain. Hitler voice like rabbis claim Kosher is blood free, it isn't, only vegan and eterni are. Wait a second, they'll say "we got 22% of Nobel laureates recently, we're the smartest", check out what IQ means and how Jews could pay their way to Nobel Laureates via Alfred Nobel Jewish connections and Swedish Jewish Royal Family links (see Immortality Prize section too on how Jews deceive the world). ☺☺☺

Don't be fooled, nothing is what it seems, behind the sweet talk of equality is the innate Jewish Palace (see interior) Supremacy deified in the Bible itself. As locals of each nation get mad and sense the Jewish Bible character (Old Testament, etc), Jews detect it and start preparing for the next shift and move, well before the expulsion begins. Jews move from one host nation they feed on to the next, always playing victim. Jews accuse us of calling them parasites, but wait a second, the religious Jews are parasites, because they bring wherever they go the most parasitic, racist, nonJew hating text in existence: the Tanakh or Old Testament of the Bible, that calls for the extermination of any nation Jews feel like God gave to them Deut 7:16, for their enslavement Lev 25:44-6, mass rape (see quotes), and beating until the nonJew dies as long as death is not happening in a few days (slow killing OK), and many forms of genocide (see quotes). How is that not PARASITISM? You're allowed in a place, you enter a place and you turn locals into pure worms to be exterminated, burned to the ground (no scripture has more arson of entire cities calls than the Jewish one, in fact most have zero, Jews love all out destruction), mocked, raped, humiliated, and mutilated (chop body parts, advice by Jesus the rabbi fraud staging miracles to take over continents with a fake religion)? That's what parasitic microbes do to insects, birds, people, etc. The demonic Jewish Torah or "Bible" lowers the vibration of a society to that of hell, genocide and mass rape and then demands all Obey the Superior Jew. That's the Chosen People of God or of Satan? Let every Bible or Torah praising Jew answer. After 1948, Jews got Israel, so it's easier to go there when police is chasing them, they disappear into the Jewish networks worldwide and then land as incognito, new appearance and identity in Israel… Jews need a story, a reason why part or all Jews are moving to a new location, a story nobody can doubt, the images so graphic…, so they bypass the normal merit based migration ☺☺☺ and claim REFUGEE PERSECUTED STATUS. This scam was used 100+ times on 50+ nations. Sadly, the vast majority of Jews don't even understand how they're recreating this "bacteria IQ" culture of "state within a state that hates the host state and nation with a diabolical covert passion", a Jewish culture that has no real equality, and is very anti Immortalist Anthem, anti nonkilling, anti nonviolence, anti World Peace in 3 months, anti Immortality Credit Score. Those "holy" Jew aristoc-rats from Iran didn't build 3000 World Peace in 3 months and Nontorture for all Persecuted Human victims (900 genocides known to humanity at least, besides the Holocaust) in USA, only useless businesses to loot the locals, Palaces for their Mossad Gangs.

That shows how "persecuted" they were, so much so, they never made any "museum or institute" about this persecution, not even the "not so rich Jews", who chose instead to create temples to Eternal genocide and Eternal War, i.e. the Torah, Tanakh or Old Testament Bible. Kind folks? Or experts at playing victim for millennia to extract the best treatment, benefits, compassion? So much persecution, not one thing, except of course 1 Holocaust Museum done by non-Persian Jews, never the genocides Jews perpetrated. Wait, Iran Jews were persecuted and many had $10 million each to buy Beverly Hills and other high end land and property before the Islamic revolution Jewish money staged? They were chiefs of hospitals and etc and they were persecuted? How can that be? Anyone sense the lies?☺☺☺

How stupid do Jews think "animal souls gentiles" are to see their nonsensical Bible shoved down our throat where Moses kills 3000 in a fit of rage, but we're supposed to never kill any Jew who kills 1-5 million Ukrainians with other psychos? Jews claim gentiles suddenly did pogroms against Jews for no reason. This is a complete lie. Any rational person who reads the Jewish Bible, or Old Testament, will realize it is 100, 000 times more violent than the New Testament (main Christian scripture, who doesn't call for genocide of entire nations or mass rape (of kids), arson of cities, etc) and slightly more than the Quran too. Add to that Jewish "add-on" scriptures where gentiles are described as animal souls that die when they die, made of demonic energy per some loonie rabbis in some "book not all read", and you got a recipe for a hate of gentiles that reaches apocalyptic levels, read the quotes. The issue here is that most Jews, are "worm IQ" folks. Jews never read their scriptures, being as imbecilic as their Christian and Muslim counterparts. They just shake their heads repeating prayers and 10 interpretations of some Torah verses in their outdated Talmud about intercourse with 3 year olds and then develop this false sense of being able to argue about anything in 10 ways, having "critical thinking and ability to question beliefs (sadly, only variants of a highly limited set of beliefs of the Torah)", *being able to bullshit anyone faster due to practicing nonsense talk, "intelligent debate" so much*, never realizing that they wasted so much time, since the Torah is a pile of feces. Arguing is not a virtue, ending war, violent crime without violence, torture and rabbi shouting is. In the highly "superior in IQ" Jewish scriptures, Jews argue about 1). should we "rape 3, 4, 7, 9, 12, 17 year olds in groups of 10, 100 or 100000", instead of remove all sex outside procreation from US movies Jews created to turn all gentiles into easy to blackmail puppets, 2). should we "kill torture 10 trillion (D7:16), billion, million, 3000 (Moses) or dozens tonight", instead of about nonkilling ways, the trillions of methods of achieving peace without any slap (rabbis slap people often), spank, violence, war and deception, and the Immortalist Anthem ideals, 3). should we "pay our chief frauds 5000 (Democrats run by Jews) or 50000 (Republicans run by Jews) times the minimum federal wage for gentiles", instead of should we give all equal pay, equal stress, replace the money obsessed society with the credit and longevity rewards society that removes

the ability to do evil with money? The election system is a Talmud type of arguing about nonsense, for both sides are building their arguments on nonsense and evil ideas of the Tanakh. No honest society needs all these ridiculous parties, politicians and religions, they all realize we're bacteria in IQ vs longer lived humans of the future and we need focus on results: zero violent crime and 4000 year lifespan for all first. It's amazing how easily Jews brainwash gentiles that some fraudulent rabbi is the son of God, that Jews are smarter than gentiles and deserve to be 10-20 times higher % of the highest paying jobs and CEOs than their population %, etc when gentiles should be asking themselves why they're allowing such gentile hating scripture to ever be published in their nation and mosques, synagogues, churches to exist in their countries, all based on genocide, mass rape Bible horror quotes. These "Jewish Bible based" texts are like ISIS, Al Qaeda training manuals, but the dishonest pastors hide all the evil quotes to keep the donations flowing. Wait, "Jews' intellect is superior", that's why Sigmund Freud has convinced many that "all suppressed desire comes from suppressed sexual fantasies"☺☺☺, because the Jewish intellect is so stellar, it can only think of genitals☺☺☺, as the endless calls for mass rape of virgin children in cities Jews invade litter the "Holy" Bible Jews so generously brainwash our children with at Sunday school, the place of mass imbecilization. Thanks to the Jewish Freud (Sigmund Fraud)☺☺☺, 20% are LGBTQ, many got 50 sex partners, sexual diseases transmission is astronomically higher, and fertility rates are low, as vagina path is damaged☺☺☺ by animalized ladies who forgot the value of sex for procreation only. Avoid animal men worthy of 2 cents, who got nothing to do but sex outside procreation. It's imperative for ladies to stop being duped by the Pervert Talmudic Jews dreaming of intercourse with 3 year old girls, and not believe the mainstream bullshit media that deifies every Jewish Psycho. Protect kids from organized Mass Rape Jewish religions, like Islam, Christianity, Judaism, since clergy may be pedophiles looking for sex, like rapist Mohamed who had 11 wives, 50 concoubines and endless underage girls to rape as Allah advised him. Don't blame Mohamed, he simply lived the mass rape quotes of the Bible he rewrote, as a true Jew.

Why do these Abrahamic religion Gentile Extermination, Rape and Extortion "Places of Worship" get tax free status☺, when they have nothing to do with the idea of religion, of equal kindness for all people, of nonviolence? How can NATO nations be so stupid to allow such trash to be published? If NATO doesn't take action, it will become a 3rd world shithole.☺☺☺ It's essential NATO starts to discard trash literature, if it still wants to exist in 2050. The Torah and Tanakh are Violence Personified, 10^{90000} times more violent than the Immortalist Anthem. Jews need to argue about the Immortalist Anthem in their "sage writings", not about the hate filled, genocide, mass rape filled Tanakh of Satan himself. Then, the formerly filthy nonsensical scriptures will be forgiven and the new ones will make some logical sense. If the foundation is evil, the Torah, then, all other Jewish filth, will be pure evil, built on pure garbage. If all these 3 groups,

Christians, Jews, Muslims, would read their scriptures word by word☺☺☺, they would, 99% of them, quit their psychotic religions and realize, like the Immortalist Anthem explains, that all humans are mere microbes intelligence vs the future humans of billion year lifespan and stop fighting about such cabbage IQ traditions, rituals and "holy texts of genocide and mass rape". Thankfully, some Jews are truly kind and nice or have very universalist concerns for sentient beings pain…, being civil humans who hate the demonic Bible, Judaism and love the Immortalist Anthem. For the clothes we wear one life, the "DNA", don't defines us, but Our Nonviolence, how have we chosen to make sure the maximum amount of lifespan years are added to all. Iran was developing a lot and Iran was becoming free of the Quran the Jews invented to subjugate the Middle East, and the Jews can't tolerate intelligent free gentiles, as we saw in communism where Jewish officers executed any gentile with brains. So, the Jews staged the Islamic Revolution with help from other nations too, Iran's enemies. Islam is very backward, anti-science, keeps nations ultra easy to dupe and plunder by Jews. Thus, Jews love Islam a lot, they use Islam to destroy every nation on Earth, bringing in Muslims to all nations to start Muslim-nonMuslim fights for divide and conquer of both. We can't blame only Jewish money or 3 million Jews involved for the rise of 'communism' and its 120 million dead victims,☺☺☺ since many empires staged the rise of communism for their own goals, different than Jews' power in Russia. Hey, US gentiles, work hard 1-2 kids max, maintain all the pipes, infrastructure,☺☺☺ die in Israel's wars, because Jews will have 10 kids and use welfare and a few side jobs like selling diamonds to loot gentiles and take their money with the least effort (all work done in India, just buy and resell to stupid gentile locals that Jews brainwashed to want jewelry), etc and build endless synagogues and churches too (if disguised as gentile) to keep many homeless, everyone as low IQ and brainwashed as possible with the Old Testament, the most hateful text in history being the most published one, at gunpoint, due to the amazing unity of the human hating Jews. Soon, the whole nation will be 50% Jews and gentile babies will be boiled, eaten as Bible shows.

Locations of Jews in USA & Worldwide with many videos showing the takeover:

All synagogues worldwide deify and praise the 1300 evil quotes of the Jewish Bible, meaning they're terrorist organizations on US and other nations' soil who normalize GENOCIDE of any group Jews feel like "God gave to them" D7:16☺☺☺, "mass rape of trillions of gentiles (usually kids, seen from the Jewish media that sexualizes everything)"☺☺☺, beatings to death, as long as not fast death, of trillions of gentiles. The question humans have to ask themselves is why this terror group receives Tax Free Status of a Religion☺☺☺. Check out a few towns where the Cult of Genocide, Mass Child Rape and Slave Lethal Beatings is growing at astounding rates☺☺☺. All genocide quotes of the Bible are in the Jewish section, not the gentile New Testament, though obviously Jesus was a rabbi fraud staging all fake miracles to spread the Jewish Bible worldwide under the guide of the "Christian Bible", and Jesus applauds the 3 Judaism Pillars: Genocide,

Rape and Lethal Beatings in Mt 5:17-9 & Mk 7:9-13 for the Jews with a keen attention to detail, to notify fellow Jews that Christianity is a scam Jews use to subjugate all nations and spread the demonic Tanakh, by publishing the Jewish Bible as part of the Christian scripture, like Islam is a scam too, for Jews made the Quran up, Quran being the Tanakh rewritten in a creative way. All know that Orthodox and other Jews, financed the Jewish USSR communists☺☺☺ that led to 120 million gentiles dead and to the invasion of USSR by Hitler, who got so mad at Jewish communists that he devised the Holocaust. Why should we allow such terrorists to live in USA freely, instead of deporting them to North Korea to experience the Brilliance of Violence Based Jewish "Communism" ("Help the Workers by Killing 120 million of them") Jews created in North Korea? We all know Kim is looking for New People to Build Infrastructure Projects in Labor Camps of the Jewish style Communism. Jews even wear black suits, the favorite color of Korea's leaders. A match made in Heaven.☺☺☺ Where 'bad type of' Jews *(and others who copy their methods)* are in large #s they tend to form a mini-Israel, listening to Israeli Army radio. A youtube shows how many Jews exist in each nation. Such bad oases can thus evolve where Jews exist like LA 565K (California 1.2 million), NYC 1600K or 19%, Chicago metro 320K 5% maybe in city itself, Boston metro area 248K, half being in the city itself, so☺☺☺ 19% of Boston city is Jewish, you understand now the Education System, Universities there, New Jersey *630K* per 2021 Report of major cities with Jews, San Francisco nearby metro 230K 14% in SF if half (115K) are in city itself (470K SF wider Bay area), 5% in *Washington DC metro area of 6 million* 300K 8% *of DC itself at least (57000 in 2017)* (Jews tried to ban English and make Hebrew official in 1780s, as they take over our political parties, start wars (Jew paid the Dutch to invade England, just living a peaceful religion, Isaac used Lopez name to appear gentile, they believe genocidal wars gets them protection of 'the Yahweh demonic fake God' instead of decent scripture and ethics that knows, like the real God, that there are a trillion ways to peace without war), banks, capital (*90* times fewer Jews per capita in Moscow, 20000 times fewer in Beijing) and everything, for 2300 acres palaces, Jews highest ratio of Ivy League per capita with unfair education access, Jewish supremacy thru terror etc*) if half in city* & Philadelphia metro 215K *7% in city if* half in city, Atlanta metro *120K* (maybe 12% if half in city), Miami metro *123K* (maybe 12% in the city, 9% religious 3% agnostic, Judaism is 9% in Miami metro, definition of metro area is different in some studies), Broward County FL 150K, West Palm Beach *124K*, South Palm Beach *131K* (530K *South Florida* in 2017, God loves South Florida via floods, *140K rest of Florida*, plus some winter visitors (winter total may be 800K in 2024, due to nice weather) – pages 74-75 got Florida Jewish towns (Boca Raton 71% Jewish in 2023, 527K in 3 countries: Broward + Miami + Palm (largest world investor in Israel bonds 0.7 billion), San Diego metro 3% *100K*; Cleveland metro Phoenix metro Denver metro & Las *Vegas* metro (prostitution capital of the world, gambling capital of USA) *85K* (watch the homeless under Las Vegas), Orange County *90K*, Detroit metro 72K, Seattle & Minneapolis metro *65K*, *St. Louis* Tampa Portland Houston & Pittsburgh metros *50K*, Santa

Barbara *10K* (11% of population), see the rest of USA cities here. Some examples of Jewish Bible tactics and areas: Beachwood, Ohio, 89% Jewish, Pikesville, MD 31K out of 34K are Jewish, Silver Spring Kemp Mill 13k (Russian Jews, KGB spies too?), 8 miles from White House, Summerlin, NV 25K, Memphis, TN largest Orthodox congregation in US (US President Grant kicked Jews out of Memphis and Grant's military district in 3 states due to fraudulent Jewish soldier actions, before he became President). See where the "great" Judaism, that killed arguably a total of 17 billion equivalent in today's population, is building new Temples to the Religion of Endless Genocides. France got 448K Jews, # 3 after Israel, USA. 10 other highly Jewish US towns are here, watch the insane growth of Jewish population and their plan to become the majority in USA. Canada 400K, # 4 is actually 3rd *highest* density/capita after Israel, USA (twice as many/capita vs Argentina where many Jewish and gentile Nazis (supposedly even Hitler after faking his 'death') fled to), UK 300K # 5, Argentina 220K, # 6, Australia *120K* (low estimate, could be 240K with Jews who hide their jewishness), so very high per capita (Sydney 50K, Melbourne 45K, Perth 10K, Brisbane 2000 (some say 20K recently, due to Brisbane growing faster), Adelaide 1200, the rest 12K), Brazil *120K*. The top Jewish names are here, so you can identify the mutilators of US penises, the IQ lowering masters, see the 44 page Jew location report. ☺☺☺

If noises happen underground in your house and synagogues are nearby, it may be tunnels Israelis love to dig. Some Jews will always claim to be Polish, Russian, Indian, Korean, Chinese, African as the centralization of education section explains. The least educated Jews and non-Jews promote the unholy Bible bad quotes, including the "take gentile slaves or beat slaves to death as long as death isn't apprently direct or within days, a few months is OK" quotes which are pure terrorism of humanity that inspired the CIA-KGB-RAW-PLA torture methods, Jews maybe promoting it more because it's 'Jewish'. *Poor uneducated Jews hallucinate the 'Bible' is original, when everything in it is copied from other* cultures. In fact, much of the Bible could have been written by non-Jewish spies, how much being a subject of intense debates. Because the 'bad type of Jews' (who can look like a White, Black, Asian or any race thru interbreeding) perceive non-Jews to be animals, they will simply use gentiles and torture them to death with no remorse using 200 reasons and pretexts (not Nazi, communist, religious enough, patriotic, etc while they're spies that took over a nation). They hide behind covers of "religious" (whatever religion dominates in host nation), etc. Christianity is simply the official 100% brainwashing of you being a slave of the Jews, so they torture people who disbelieve the lies that allow them to vampirize the gentiles, while pretending to be Christian pastors, etc. We have today endless defamation (*sort of like censoring the truth, so only lies are broadcast, unconstitutional since all have right to free speech,* like in Germany where they jail people for just expressing an 'anti-Bible' or etc opinion) lawsuits Jews *use to silence gentiles*, as they did in communism for example, torture to death for 'not being low IQ enough'. In response, we can politely kindly

argue that there is no greater defamation of the entire humanity than the Bible (Torah part of Bible especially) itself that calls for mass rape of ALL NATIONS (Jews are allowed by their devil God to destroy ALL Nations, including via rape terror), genocide of ALL Nations Deu 7:1-16, Deu 20:10-17 and mass theft from ALL NATIONS, who're meant to be mere slaves of 'the bad type of Jews' (who made up the Bible), slaves beaten and tortured daily too if not compliant to the whims of 'little Satan type of' Jew, demonic pest who also wants all nations to beat their kids like psychotic hyenas, thereby teaching violence to kids since early life and turning them into lovers of torture, violence, eternal war, i.e. eternal human sacrifice to 'Satan'. The whole world almost now beats kids because of the Jewish Bible (Torah or Old Testament, and even parts of the Gospel) whose terror like tone reigns supreme globally, as seen on TV and music. Parents need to gently adopt an eterni tone that prevents violence by kids emulating that eterni emotion (by parents listening to eterni music too to help deNazify deHitlerize, deRabbinize, and dePastorize the tone of speech/action) and *gentle tender soft nurturing* angelic kindness towards all living beings, and stop being like psycho Moses (Exodus 32:26-9). ☺☺☺

All *secular or yearly synagogue visit* Jews who're shocked by the bad quotes in their 'holy Torah' (part of Bible) are just like the Christians who have been lied to by clergy for 2 millennia: for 1500 years Bible was written in language that nobody knew, Latin, and nobody had a clue. *Once the printing press appeared, translations into local language woke Europeans up from the deep sleep the conmen induced them into for 15 centuries and the Protestant Reformation began*. Today, all bad quote are hidden from Catholic churches, where only the Missal is in the pews, not the whole Bible. Just chill out and realize all the garbage in the Bible may not even have been written by Jews, so that's it. Move on. Life goes on, nobody cares about the comical☺ 'religious beliefs' of little bacteria *on Earth called humans*. The primitive Rabbi 'psychos' (who now pretended to be 'pastors of the Judaism for gentiles', or Christianity) took babies and tortured them (this was 'love' in their twisted psychology), as explained in the infant immersion baptism section, since for 1200 years of Judaism in Europe (Christianity = Judaism, and Christians did infant baptism full naked immersion *(in cold water to cause pneumonia perhaps, as poor babies inhaled water via nose or mouth into the lungs and partially downed, receiving lifelong lung and brain damage, as a* free love gift *of Jesus (also* Jeuss is like Jews, so *Jesus* means *Jews) and Jews to gentiles)* for about 12 centuries until it started to change in Western Europe, to do a little water sprinkling on an older fully clothed baby), babies were tortured like this clip or less: babies cry when placed in cold water by a stranger, look how horrified the mom is in this 40 second clip taken by CIA and posted by the Voice of America (US government agency). Today, in USA, rabbi water rituals are a big thing too, they're obsessed with water around kids and infants, hence the "Christian" ritual from the Jews who invented Christianity and had babies head submerged into water .3. TIMES. Sadly, some babies died due to drowning, as Jewish pastors

pretending to be gentile, could care less. *To facilitate taking over Europe, the bad type of Jew (and Italian, etc) has possibly decided to make a ritual of shoving the head of barely born babies into water, to damage their lungs and brains*. It worked. Today, billions are mental slaves of the scam, as their brains were damaged centuries ago. The pastor is meant to hold the nose of the babies, but that can't be seen well, if he does it or not for Jewish babies or gentile babies *(selective actions)* and babies can ingest water (that goes to lungs due to shock of cold water and being away from mom by a weirdly clothed priest) thru the mouth and can't vocalize his suffering and the 911 type of emergency the "rabbi turned priest" has inflicted on the human quantum field. *Don't be fooled, in order to disarm people and gain the trust of gentiles, they will use only the nicer* quotes while always hiding the 1400 bad ones, *so parents give babies to be damaged and partially* drowned. This can happen today when a spy agency remotely controls a priest to make mistakes or when *the priest is of a different nationality and is pretending to be a local, on a* secret mission to do as much damage to local babies as possible. Avoid this *ritual, you can't know how much, if any water, entered your baby's lungs*. ☺☺☺

The conmen flatter their victim, pump up the victim's ego, to gain the victim's trust, only to later destroy the victim, *like* parasitic vampires *or tigers who ambush prey. Skilled in the art of "1000 lies/minute",* they seduce all to go to their spider web (examples: Christianity or 99% Judaism, Islam or 97% Judaism, etc), so they can suck all their blood out so to speak, like a spider does with insects. These same terrorists of the quantum field (the 'bad type of 'all nationalities') also help empires rise and fall, thru theft, violence and wars. The governments are full of liars, they say one thing and behind the scenes they commit genocides daily. They pretend to be imams, popes, bishops, pastors, whatever works. Stay away from the conmen, since the government doesn't care, because it's not an immortalist government. The freedom of religion is abused, to terrorize little babies. Even in USA, Orthodox churches can torture babies like in Russia. To think that such atrocities still occur daily in the Christian orthodox world (most of the 260 million Orthodox world still does this Jewish ritual) is unthinkable and an act of genocide against the human quantum field. Rabbis love to make babies cry, to them 'torture' (what to normal people is torture) is an act of devotion to God, and ritual trumps kindness and empathy. Thus, in line with Moses' *'immense empathy*', the 'bad' Judaization of Europe (later Americas) went on. 'Bad type of Jew' Judaization means the more primitive religious or unethical influence. We see the effects today in the violent Eurovision contest songs, other music styles too: metal, rock, rap, some country folk music. Most Earth suffers from the same issue and it's due to the 'aggressive chimp DNA in all nations', not just 'some bad Jews'. To see Moses' empathy, watch 12 videos of rabbis sucking penises they cut for crying babies without any anesthetic in the circumcision section. They infected 8 day old babies with mouth bacteria, ruined the nascent immune system. Only at 12 months babies have a functioning immune system. Before that, they're helpless.☺☺

On top of that, we, the slaves of 'the bad type of Jews', have to accept the made up Jewish Jesus as the only savior and way, because we go to eternal torture in a made up hell, unless we give all our wealth to Jewish pastors who have airplanes, personal airports and huge mansions and to the biggest landowners in Europe the Catholic Church (#1 for 1100 years) and Protestant one. What greater defamation of the entire humanity is there other than Christianity itself, based on fake miracles and quotes of Jesus that make no sense and praise the Old Testament calls for mass rape, genocide and mass theft, with pastors claiming Bible (including the horrific Torah) is the Word of God? And we humans have the right to say, we shall not be like wild dogs. Kids can be taught thru *healing*☺☺☺ *gentle tender soft nurturing* honest *graceful* kindness, compassion and eterni tone, not violence. Kids know no evil, they emulate the parental sick tone of speech (which is in 99.99% of cases reflective of tone of action) or kind tone, that's how they learn how to behave. This issue of the 'bad type of Jew' requires extra attention from host nations who embrace immortalism, due to *weak interest in* World Peace in 3 months by 'most guest nationalities (not just the 'bad type of Jews' nationality) who cluster due to petty goals and 0 interest in serene music that sustains World Peace, a prerequisite for Immortality *for* All. Sadly, like all spy agencies, Mossad also uses torture (Nazi methods of medical experimentation on gentiles they criticized, showing a double standard) *to destroy people's eyes, heart, etc and place heart pacemakers, and other eye devices needed for* whatever organ they destroy, or endless doctor visits, etc to the Mossad doctor who makes sure *nothing is healed*, or will get worse over time, while pretending to help, see video on Stalin's + Red Army top doctor Jewish. ☺☺☺

Sadly, CIA uses the same things, while talking of 'human rights'. We the people of the world, can unite and end all war and torture in a few years, but few care today. Mossad plans to kill other humans, thereby destroying the human quantum field. The chosen or just like everyone else, a chimp DNA unable to think like an Immortal? So much Godliness. Killing and torture are pretty much one and the same, except torture is a slower killing. This Mossad statement is nothing new, Kaganovich helped kill 5 million Ukrainians, lived as hero until 1991, when he died at the age of 97, after benefiting from not being tortured, while torturing millions. Why isn't *Israel (or any other country, especially big nations who use torture daily in their depraved spy agencies and militaries)* calling for Eternal World Peace in 3 months and end of all torture and killings? Read their Torah to see why, the so called "bible" being shoved at gunpoint on all nations. All about glorification of violence, as with most spy agencies and militaries today. It's so part of the "background noise" that it doesn't even register to anyone how violent it is. They just mutilate, torture and kill millions of people on their own whims. All humanity gone. It makes you think Putin and his entire regime is 90% Jewish, look at his "love" for Ukrainians. People get so upset when university Presidents say "calling for genocide of Jews is unethical in certain contexts only". They forget that the Bible Jewish Christian preachers have lied to us for 2 millennia that

genocide is OK in some contexts and that makes it the Holy Word of God still. Kindly read the Bible 1400 violent quotes few religious Jews or Christians get upset about… most of the quotes are from the "Holy Torah", nobody ever resigns about swearing or prompting a genocidal text that explicitly calls for genocide of entire nations: Deu 7:1-16 & Deu 20:10-17, mass rape and mass looting, read it all here. *The Pope and all pastors, many politicians, have the audacity to say that is the* Word of God*, and nobody ever complains about it*. They swear on it. How is that for a double standard? "If genocide is against gentiles, it's OK. If it's against Jews, it's unethical". *Is this* what democracy in USA is all about? If we have ethics, *it's universally applied.* Contrast that Bible with Immortalist Anthem, the preliminary version for the anthem of immortalists. ☺☺

To achieve Immortality *for* All, a metaphor for longevity for all in the short-term since 'immortality' is pure science fiction for now, we need to prioritize immortality capitalism and World Peace in 3 months, instead of "best stuff" just for the 'bad type of' Jews *(or any group using 'Jew' as a cover to hide their identity)* taking over many doctor, lawyer, judge, spy, police chief, etc jobs (anything where power, policy concentrates, managers, CEOs, etc) in a mini-Israel area, in terms of per capita vs Gentiles, like they did in USSR, Germany in 1920s, early 1930s; in *Berlin about 10 times more doctors/capita than Germans reportedly per Nazi data, it gave them* complete power over half of Berlin's population seeking medical attention due to etc or being tortured by the Mossad*;* by pretending to be German and to help, they could eliminate anyone who fought Jewish enslavement of Germans (methods copied by others too, who use Jew spy cover or other covers); *media control allows brainwashing too:* "when they slap, turn the other cheek", when they do war 24-7 for millennia and claim Jesus comes in 20 years for 2000 years, continue believing in the lie, say illogical prayers and Nicene creeds; beatitudes summary: be *good, gullible, low IQ, and endure endless torture (by the abusers who* made up the religion*) in* your life of slavery, because heaven will be yours (which heaven? someone's hell is others' heaven; $ will be theirs and all worldly power to wage eternal war, *you just work and say a prayer, make more missiles and say 'yes sir' always*), *don't do anything for peace right now and here, for decent healthcare for all;* don't question why Jesus didn't say "a world of Peace can arrive in 3 months with enough intelligence, a world of no slapping, no physical altercations, you can all live in some 900 centuries about 5000 times longer than the longest lived man today with more questioning and research, just as you live 7000 times longer than a fruit fly; blessed are those who question everything"*; when seeking God, "only via a Jewish priest, Jewish (for profit?) 'prophet' (Jesus in Islam), Jewish holiest woman (Mary, Jewish mother of Jesus is that in Islam), Jewish Son of God, it's possible,* only a wafer and Jewish ritual will do it". ☺☺☺

Since true democracy brings info, education, true equal opportunity, knowledge to all, this makes the exploitation of gentiles impossible or at least, the use of the 'bad type of' Jews or Jew covers by other groups to enslave Americans impossible: we need to explain to more people, of

all nationalities, the advantages of Immortality *for* All. We can't have World Peace with this type of rabbi yelling, that got Hitler worked up, it creates a very discordant energy; we can't disapprove of only Hitler's tone of speech, but all somewhat close to his; World Peace that *lasts more than a glimpse* in Eternity requires 0 violent crime incidents a year globally, i.e. 0.5 billion times less violent crime on Earth than today, i.e. everyone has to be of such an angelic vibe and peaceful demeanor that 99% of music today and much of clergy tone are totally incompatible. We can ☺☺*lovingly tenderly gently kindly*☺☺ choose to be honest and thankfully, in USA, we have freedom of speech, I hope to win over the more open minded Jews, Muslims, Christians, so they don't go to these events and pastors shouting like Hitler. We're free to politely have a candid discussion about the so called "religious music" and "religious services" in USA, etc and what kind of vibe they create globally: religion, if it is supported by an immortalist government via tax free exemption, ought to be something that brings peace and unity among all people, such as Immortality *for* All, in all its music, services, etc. *Every shout is a call to* war, *so it is* unacceptable, *so much so, that the* music section explains it would need a huge fine, to prevent any violent crime from ever occurring, so as to have World Peace last: 5,000$ fine per shout at least, if one person present, $0.5 million if 100K present, $500 million if 100 million TV viewers or music video views, or CD sales to provide funds for Immortality City Centers. All teachers need amplifiers to minimize raising voice, mics at the desk at least, so they don't need to wear it so much while not speaking. A slap, even by parent, *at least 100,000$.* The Immortality *Nurturing* Agency needs to have some loving kindness compassionate *gentleness* programs to help parents who have a problem kid, so that they don't resort to any physical punishment as that is a violent crime incident that leads to 80 million dead in the next World War. When the kid does anything, he would need to be taken to a healing center too for a while, receive more than the usual daily email (to parents and kids) from the Immortality *Nurturing* Agency on Immortality *for* All Ethics that prevents all violent crime for most, to relax, take some ethics classes, though kids never slap unless seeing it on TV. Thus, we need TV regulation, if we sincerely want to bring Peace, not war. If we want World Peace in 3 months, the enormous violence on TV-radio, music is unacceptable.

I met some very nice Jews (not sure if real or pretending to be Jew though), some with vibe that is not so chosen (see them wrestle), and others with a tone of speech far more eterni than the Israel legislators or the 1st prime minister of Israel when reading the Israel independence text (he claims the Bible, with these odd quotes, 900+ of them, is 'the book of books', in what sense, perhaps a 5-8 page scripture (short version, ethics.gov can have a 300 and 30,000 version, co-created by 10000 ethicists if needed) that is more positive like Immortalist Anthem☺☺ that everyone knows and is positive, would be more practical in really changing the world and granting all (not just a few chosen 0.1%) *decent housing and healthcare so they can think,*

meditate, pray and find out which hypothesis about God is true in the presence of confirmation from 50 unfakable sources instead of "brainwashing under threat of Inquisition or Christian regimes torture, violence or death"). Approx Blue eye % (Ukraine refers to Crimea) vary. Grey/green is 80% of blue % or less, adds up to almost 90-100% in heavy blue nations (Ireland got a lot of green). When you meet a person, you know from these percentages if they're likely to be French or Polish, Estonian. These things help, besides AI databases of facial structure, to determine what kind of spy he is. If we talk of diversity, we need to protect endangered species too, not allow only Jews or Judaism to have blonde hair and blue eyes (see Texas Jewish lady, Jewish faces, if person is thin and fat doesn't hide the shape of jaws, are smaller at the base, chin, meaning less square, less round, more oval, oblong) by forcing all blondes or blue eyed to marry to people less likely to give such diverse appearance (some groups); see oddly, Soviets killed tons of blonde people and so did Nazis by recruiting Nazis with such traits to die as cannon fodder; what is that? a coincidence? or deliberate extermination? I know some people may have 2 marriages (divorce and then marry someone else, then divorce and interact with both offspring etc) or something to help others, etc, but there would be no need of that, today people have kids without even marrying to avoid paperwork of divorce etc. Obviously, it just happened on Earth that *some groups got into high tech 800 years before others*, so they're of higher IQ, due to epigenetic changes from 40 generations of learning those science skills, higher longevity than pygmy or some Amazon tribe due to more infrastructure build, healthcare, but that doesn't mean that may last forever or that having some tech is better, maybe some alien group has inner tech and they got some simpler life than us, appearing 'inferior' to us, so 'inferior' is sometimes subjective; a 'superior race' civilization may self-destruct due to its aggressive quality and the inferior progresses slower, but steadier; look at Germans, they lost 34% of land since 1914, due to falling prey to teachers of violence, they have been well setup by their enemies, *hook, line and sinker*; just because one group may have subjugated the others due to figuring out how to be mean, like some Aztecs did in North America with many tribes, didn't make them really superior as Hitler claims in the long run; sure, in the short run there is a reality of IQ, epigenetic changes, infrastructure, etc, but in the long run, these things fade into nothingness as we spread in 1000 *universes*, beyond Milky Way; the decision to subjugate was done by some warlords also, not the whole collective group. For example, slaves that lived to 50-60 before, as many live today in Africa, now live to 90 in USA, so while they had a tough life for a while, their lot has improved after 1865, so it was not all that 100% negative, these people now help the entire Africa to become modern and advanced (cars etc) maybe 10,000 years earlier than without interaction with whites; so it's not really that simple as Hitler makes it, one century the Greeks were the superior race sort of, another it was Indians or British, French or Americans, etc, it's all over the place, at one time, perhaps, for a few years, from some points of view, the Vietnamese, Koreans were "superior" to Chinese, etc, it goes back and forth; as we spread over

star systems, this difference will speed up, as travel that lasts 500 years making communication and tech exchange harder, so one backward planet with more pacifict verses 8-40 ideals that Hitler mocks in his book 31 *times (Ctrl + F* pacifist*) in order* to lead Germans and others into the abyss, could become 1000 times more long lived than the most Nazi Hitler fan planet as the pacifist start to escape to a new location nobody knows and stop interacting with the Nazis, except for a few bioandroid look alikes that resemble them and role play slow progress.☺☺☺

Yet, we can't be naive either, he has a point, the 'blood' (DNA, etc) with its nutrients and genes can be destroyed by malnutrition, spy agency torture, sleep disruption, music, thoughts, culture, microwaves, infrasound, etc from gadgets etc and various other methods... and on this genetics depends the survival of the civilization too; too bad Germans (and many others) didn't understand the far more complex picture and used violence to subjugate 'inferior races' and/or to free their country of the bad type of Jew, instead of giving all bad Jews money to go somewhere else using rich Jew money *(since Nazis said 20% or more wealth was in Jewish hands, 1% of population)*; who knows what happened in WWII with Israel migration, given Zionists made deal with Nazis to allow Israel flight. It's important to move on, forgive and forget and work for global oneness and longevity progress, instead of spending all energy to compare and undermine others so much, with 900 systems of language, country, etc, education, etc. We sweat over stuff, but nobody has access to the 9 million classified memos, docs, videos showing the true story behind the lies in history books. Not all Jews do this, not all are the mean type Hitler describes, but that this has become so known worldwide, many spy agencies started to apply these methods themselves, and 'people who may perceive themselves of lower IQ etc' or are so, are happy when someone of a higher IQ etc has offspring with several women (low or high IQ), because that way their offspring is higher IQ or etc quality they think they need.

The reason a lot of countries, empires had offspring with locals *(well, priest can claim he's celibate, but have affairs and setup a spy network, which they did sometimes, first priests were Jews and celibacy was only required much later, in 1200 AD or so, since it would require many of the smartest gentiles (priests) to stop having kids, so it would ensure the full control by Jewish bishops (faking it) of the entire nation thru brainwashing)* and originals, was the same the Jew does it: create more spies too, more friends. Other methods Hitler explains, which are perhaps a little less Jewish, more universal (specialty of Roman empire too, etc), include: 'bad type of' Jews infiltrate politics, culture, music, art, media, literature. Hitler forgot doctors, emperors, kings (offspring becomes king, then the whole royal family is made Jews only slowly, Judaization sets in, on the outside, they role play they're Christians, Muslims, etc), queens, nobles, popes (1st one was Jewish, later ones claimed to be Italian), bishops, fake miracles,☺ clergy, ☺abysmal IQ ☺ religion rituals, violent scriptures and doctrines, infiltrating spy agencies, military, science, tech companies, regulations for lifespan shrinking or IQ decreasing chemicals, RF, EF, etc, diet,

and fake science papers today. But, while here a few cowardly thugs use nukes to terrorize a planet into eternal war and torture, in the pre-afterlife quantum awareness and far more in the afterlife, the advantages disappear and everyone is far more equal and able to help all, rectify and unify against the 'former thugs' with waves of loving kindness taming the wild restless immature souls (who formerly were big celebrities, generals, warmongers, leaders, torturers, singers, musicians), happy ideas given to save the people from the oppressive gangsters. In 1928 Nazis got <3% of the vote, then some 'bad type of' Jewish or etc US bankers (who helped Hitler come to power? use Ctrl+F "Jew", "Hitler" to find all related info in this book) engineered the Great Depression, and Nazi support went to 37% in 1933 in the fake elections the 'German' Army (spies who controlled it) staged, when Hitler finally became ruler. Odd how the old German military in 1919 started to prepare for remilitarization and Nazism, as many youtube history videos explain; this is explained in the PBS 1 hr documentary on Hitler. Nazism was about a tiny country, Germany, making non-Germans slaves via violent war, persecution or killing of Jews, it was about something totally insane and unachievable.

Jew persecution was due to the false belief that all Jews believed in the literal translation of violent Bible (1st 5 chapters, Torah) quotes that are presented in detail here, together with how this led to more antisemitism and wars. Educated people reject 'bad type of' Jew methods. We have some uplifting quotes in the Bible, but they're only a tiny % in small *parts* of Proverbs, Sirach, Gospel. *We better remove violent quotes from all scriptures so that* ☺☺☺*everyone*☺☺☺ feels safe; this will help all to happily create an immortalist nonviolent culture that is worthy to be called galactic some day (unless we want to die in star wars among us). The calls to violence were not the only reason for antisemitism of Nazis, it was also the calls to mass rape. I'm no expert in Judaism or proper translation of Torah and what '*destruction*' means in these Torah-Bible quotes, but we have a real problem here: if someone interprets something as from God, they may go to use the 'destroy' methods of bad spy agencies, which never work, they completely destroy in the long term the agency and country employing these methods: genocide, torture, sleep deprivation until the person is totally brain damaged and easy to enslave and do the things they want done to 'destroy nations'... destroying all smart people to enslave the nation, destroy all the good stuff in the anthem or the culture, literature and music and bring everything to lowest possible IQ, worst tone and maximum incitation to hate (of enemies in anthems, lots of violent imagery) and violence, pretend to be local and enslave everyone, create fake religions to lower IQ, emphasize unproven beliefs, ritual and guilt to keep low IQ and fear alive and "kindness, science *of trillion* year *lifespans*,☺ nice tone, discernment" secondary (kind tone prevents manipulation to do bad things), suppress any questioning, critical thinking, emphasize obedience without thought, destroy any good immortalist philosophy or religion idea, use Protocols methods, extermination, slavery as Torah/"holy" Bible teaches in Lev

25:44-6. So, when these things are done by people, what nation do they serve, local or foreign?

We see how the clever creators of Nazism used a few quotes of stone age scriptures to generalize and use a group (Jews) as scapegoat for all problems on Earth; these clever creators also inserted into mix a strong belief in Jesus (Hitler mentions "Christ(ian) 46 times (46x), sacrifice 101x, blood 148x, Jew(ish) 512x, Judaism 7x, war 322x, wars 13x" often in his Mein Kampf book, Ctrl+F to find out how many times, to fool the masses of gullible people into dying in useless wars; *Hitler also claims Jews want one language*, but so far we have not seen anything like it happening, on the contrary, it's a lot easier for the bad type of Jew, German, Italian, etc to vampirize earthlings if there are 800 fake religions (instead of one 'religion' ethics of 'Immortality for All', not just Jews), languages, systems, inefficiency, as they set one against the other (Protocols of Zion Elders) and nobody understands their game - though it helps to get less nationalism so they control each continent better as explained above; what some fail to understand is that one language or at least 5 initially, would make it easy to treat all fairly and have far more transparency, would make it far harder to deceive Gentiles, especially if God helps them to see the Zion plot, as one set of laws exist instead of 5000 in 5000 states of 200 nations; but no, last few decades of 'Jewish supremacy' we have not had any real step towards one language or 5 or even 20 instead of 7000; on the contrary, to "enhance Jewish (or mid powers not happy with status quo or top 9 common languages) world domination?", *we see more languages springing up as official, more common languages banned as official to keep population ignorant and science illiterate, more countries being divided into small units* (Sudan into 2, Yugoslavia into 8, etc except German reunification), more division taking place and eternal war continuing, no World Peace in 3 months promoted or allowed as discussion in mainstream media; why? the reign of terror continues as in the 1920s?; I have not read Mein Kampf entirely, just some pages with the word Jew to see why he was having an issue with Jews (maybe 15% that pertain more to all nations, the rest just skipping thru the lines on "trade union infiltration, dealing with various German issues that nobody cares about, except Germans maybe", to try guess what *his message in between the lines might have been, not the literal meaning, since he was obviously a spy working for some nation or group*) that contradicted what was stated earlier, just like as a kid I ignored the Bible after reading some of the evilbible.com quotes and illogical contradictions of Moses' "don't kill", but then Moses kills 3000 Jews Exodus 32:26-29; even if Hitler was 5% Jewish as some claimed, he would have no issue with killing a few to create Israel, by helping many escape and resettle elsewhere secretly? Recall many Nazis were Jewish, and if Jews could stage mass migration due to Jew staged violence against their own businesses (plan to take off to a new country and wipe Germany off the map, like some minorities who control a country can do, if they know mass destruction is arriving), they could have sometimes helped twist things, numbers, so we got tons of Holocaust skeptics who say

fewer died, but even if only 1 million died or far less, it would be a disaster, nobody needs to die, suffer, be tortured, because kind love transforms all. Perhaps, we can't retain sanity if we read such bad quotes/texts often, war and enslaving 'inferior people' to completely feed the egos of German masses, get them to fight and perhaps, *also to destroy Germans and others to realize their imperialistic goals (the Great German Empire or foreign empire if Nazism was created by foreigners using German puppets)*. Everything is so complex, see the fakery of wars. ☺☺

Spies from country X will often pretend to be the greatest anti-country X people..., so too *some Mossad Jews* (and anyone of other spy agencies, non Jews too) can pretend (like some Nazis did? Wikipedia explains Nazis could not decide what % of Jewishness qualified for removal from the army, so initially, 50% ones were allowed, even top Nazis may have been secretly so, explaining the illogical war plans of Hitler, attacking on multiple fronts) to be the greatest (see Russia foreign minister explain this in 1 min, see history.com too) *antisemitic Arabs*, *Caucasians*, Blue eyed blonde *Nordics* (yes Jews can look like Nordics too, since 'mother has to be Jewish only' so they may be 20% DNA Jewish, but appear Nordic; 98% of real Jews are Arabs with brown hair and brown eyes, 2% got green/hazel eyes, the 2% that went elsewhere and multiplied mixed so much with others, that their DNA is mostly nonJewish, even if by religion or culture they are Jews, so any blue eye Jew is not a Jew, it's highly European hybrid who hallucinates they are Jewish), *Asians*, *Blacks*, etc (easy if they're kids from Jews married to other races or locals, since appearance is more local, behavior comes mostly from education, media, beliefs, friends, upbringing, synthetic telepathy, role models, not from genetics, Nazis didn't realize it, or pretended not to if some were foreign spies, like spy agencies pretend to encourage a group to attack or exterminate another by divide and conquer, instead of 'help all, bring Immortality *to all' ethics*) etc, PLA Chinese to be the greatest anti-Chinese Japanese, Russian KGB to be anti-Russian Jew, German or Polish. For millennia, many dozens of nationalities (we can label them Oppressor) instigated hate of their group or nationality (thru puppet political parties, movements, etc) as a method to justify the invasion or extermination of other nationalities (we can call them Enslaved); this extends far beyond Jews using spies as a method to create antisemitism and then oppress, torture, bomb, 'destroy' others for being so 'antisemitic'. *So, we can be alert and not be so naive that entire continents are destroyed by spies playing as 'dictators and leaders' who start inter-nation wars that allow buying everything at 50x lower price after the collapse of that country or continent, replacing all* "spy agency, military, media, academia, medicine (give wrong advice, *pretend to do something useful, sometimes do a little useful thing, but then do damage 100 times worse than the good, like do useful finger MGs expression on eyelid, but use that time to actually damage optic nerve by overpressing 20 times above normal on the eyeball, pretending they try to unblock a MG orifice or stye etc, for example, or use lasers to inspect eye, but damage it, etc*), political, clergy, business, police,

judges, etc all *important* sectors of a country, etc"☺☺☺ *leaders and others with their spies that pretend to try to help (but do harm the health, education, religion, music* (tired junk tone full of negative emotion to destroy the brains of the locals, move them away from the gentle peace, kindness needed to create true civilization and Immortality tech, make the tone full of impulsive aggression, impulsive reactivity, filth or banal low IQ *lyrics,* unfiltered*), etc of the locals) or, for more cloaking, instead of spies, just* remotely controlled *people?*

No intelligent being would believe these evilbible.com primitive quotes today as coming from God, yet we're puzzled people call it Holy Bible or Quran, both of which have plenty of violent quotes. The world was so primitive, no youtube, had they no way to see that something else exists, another world, another tone... so different than Hitler etc, another concept of soldier even, since God's army is an Army of Love, not of violence? Had the world or Germany and her allies been very spiritual, instead of religious, the tone alone would have told them to distrust Nazis so nobody would've worked in any war effort after being told some lies about a better future when Germans rule over all? We don't know, but perhaps, today, with more educated people, we can prevent all wars and *not be so naive as in 1940s*. Who financed the Nazi rise and why? How did the Nazis get people to support them, was it all due to promising an amazing wild future, using the blame game "all issues are due to others (Jews and Germany's enemies), not us" that is more comforting, without telling the whole Mein Kampf unachievable goals? Were they using the tricks of other politicians, "you are all holy and good, the cause is some bad guys in country x or etc"? Do we know the details? What was the game there? Why so gullible? 2 things to learn from World War II, that have been used century after century by tricksters are: 1. false praise 'you are special, smart, so so great, amazing things will happen if you support us, make Germany great again as before world war 1, etc' and 'blame is on non-Germans always' suggestions, plus 2. very bad or Hitler yelling tone (as in music of some types) to incite to violent action against the 'scapegoat group of countries or people' – nothing to do to reform oneself, to change one's tone and character, only changing others by force (not inspire them to be holy as the sage of Tao does by living example, via understanding) which is actually 100 times easier in the short run, achieving nothing in the long run, as people change right back once free. The 'bad forces' use tricks to get people to be violent, we're told – to make the most barbaric wars sound holy and blessed by God, using sometimes even stone age stereotyping, thinking 'everyone of an ethnicity is this or that way, etc'.☺☺☺ Ethnic groups can be invented too, so can scriptures, languages, to frame people from a certain area, if a scripture allows an empire to control area by divide and conquer, war and chaos, so before forming stereotypes, think again, these things probably come from people way before writing appeared, way before we have any records; it's 5th grader thinking to imagine all evil comes from one little group and location, we're all doing everything*; similar things and quotes and not so peaceful ideas happened thru history in*

different cultures and places and they originate from our primate ancestors who had scarcity thinking*, nothing else. So, we have the freedom to emulate the Infinite* loving kindness *of* God and Immortals who love infinitely all humans**, always healing, never punishing, even those we may perceive as 'the worst people' (we may do similar things if soul born in that body), fake prophets, fake scriptures made by military men, realizing believers (which are the least educated minority within a religion) in the more 'aggressive quotes in a scripture' could be brainwashed, unaware scribes can insert things to further wars that enable regional dominance, maybe, if asked, inform them of the way of the Immortals, the way of infinite compassion in bringing peace, by our *living example, speech tone,* and uplifting, *yet not naive*, respectful, universally kind non-offensive healing nurturing content of speech. It's key to not fall into the trap of anger or negative emotion, and maintain calm while not helping (them indirectly unintentionally to do bad) the 'bad' people one may encounter.**

The ideal way is loving all beings, yet not supporting the bad via dual use (neutral things that can be used to do good and bad both) stuff, only helping them do good. A trillion year old Immortal or God know better who is good and bad and if all stop helping someone do bad, the bad ends and healing occurs without any fuss or negativity, any yelling, etc. The mistake of Nazis or any group that hates any perculiar group is engaging in negative emotion and stereotyping – each person is different, one can love all beings, but *help the most only those who're promoting* Immortality *for* All *the most, instead of '* Immortality for a few and slavery and short lives for the rest'. We have no way of knowing who believes what, most people aren't even aware such quotes exist in their scriptures, but if they google "violent quotes in scripture x" they will find many sites and expand their understanding of religions. Flattering and blaming others, uneterni tone are some of many things to watch out for, people can be more discerning to avoid a repeat of such wars. War ideas as in bad quotes etc that in modern times many find outdated, cruel, *anti*-Immortality *for* All and ineffective vs immortalist methods, etc have been going on for eons well before the Bible (later Quran based on Bible, etc) was written; these quotes may be due to scarcity mentality that has existed in various places on Earth (and on other planets probably too before a species realizes infinite resources concept makes war infinitely less logical); more modern people understand that there are infinite planets to go to and there is no need to destroy others, to start wars over a few square miles of land when trillions of square miles exist for the kind, and they ignore those quotes during services – yet it's odd they still publish unedited scriptures with 10s or 100s of bad quotes, and that leaders swear by these odd unedited scriptures, but who knows why they do that? To get votes (if elections are real) or to see who believes in it (role play they're naive) or to make people trust them, since most have no idea about the bad quotes? 'Others might be mastered by force, but to master one's self, requires the Tao.' *(Chapters* 30*,* 33*,* 37 *explain well that force doesn't work, we need Tao or*

God's Infinite loving kindness for all expressed as effort to change oneself).☺☺☺ It seems the world has lost the idea of Tao Te Ching of 500 B.C., the substance of spirituality, the sage of Tao, who is so quiet like Ye Jianying, so gentle, tender, soft, yielding, polite, healing in tone also all the time, not just content of speech. The world got carried away by loud bombastic rhetoric, yelling, threats, war talk instead of trillion year lifespans for all, World Peace in 3 months, zero violent crime in 2 years globally, Immortality for All, the Immortalist Anthem. The sage of Tao is against pride, showing off, intimidation, threats, ritual, being filled with infinite sadness and compassion even after victory (Chapter 31) if war breaks due to some odd ones invading one's country – in stark contrast with the joy many felt for centuries if they won, so much so they celebrated the victory and recreated the image of murder, of genocidal war again in the human psyche, recreating war, rebringing that demonic energy, instead of the Eternal World Peace and Immortality for All Celebration of the Universally Free (from Psycho Dictators) humanity, the beautiful telepathic radiant teleporting genderless shimmering shapeshifting Immortals, who live 100 million years as the first paragraph of the book explains. ☺☺

Why were people dancing in the streets if they won a war in which millions or tens of thousands of innocent civilians died, civilians who were not for the war and didn't like the Nazis and other crazies, never read Mein Kampf, were too busy and poor to move to a safer small city and didn't have a clue what Nazis were really after, except blaming Jews? Empathy seems to have been forgotten, after all, the innocent could have been your family, so instead of viewing any war as the most heinous barbaric thing and most important thing to avoid, they prepared for a new one, century after century, glad they won 'this time'. Thankfully, Allies setup the Marshall program to rebuild areas they bombed, so things got to heal. For peace to arrive we all need to be for peace via peaceful means only, not via violence or war, to not rejoice that mass murder achieved victory, but to abhor even 1 act of violence, or torture or killing. World's smallest shortest scripture, seems to have been missed by many. People could gather and recite in eterni tone prayers of healing for all dead/injured, singing the vow to do all possible to discover keeping peace via peaceful means, to never have war again – having compassion for 'winners' and losers for not finding a peaceful method, due to lack of focus on that and the glorification of force vs grace, threat vs offering healing tone hypotheses. The wise speak least, why so? It takes 90 times the energy to have eterni tone in content and sound. A truly angelic tone, like that of the sage of Tao, may prevent 99.999% of future possible wars, yet it takes 1000 times the spiritual cognitive effort vs going to church weekly. People don't want to be told that it will require some effort to become far less gullible, discerning, kind, healing, *nurturing*, compassionate – just support the party and all is fine. People want comforting truths, like "bad is due to others, and we have nothing to do with it". Politicians know this and use is to manipulate masses to do 'not so kind things'.☺☺☺

Many went to school and learned 1-2 hrs/week in history class, pass the exam with A, B, but they may have never (I never did see all until February 2022 Ukraine crisis, some in 2021) seen the unbelievable dramatic war videos above, (only available globally after 2010 most of them, when youtube got a decent size), if older generations (no Internet) to realize how destructive and evil war was in 1945 (70-85 million dead, about 23 million military deaths, most soldiers young 18-28 conscripted against their will) *even before* weapons *10-1000* times more destructive than Hiroshima that many have today; this is the equivalent of 400 million dying (1 in 20 people today) and 2 billion permanently injured, maimed (or disabled) today (1 in 4 people...), as we have 4 times more people; wikipedia and web sources give casualties for certain battles on a wider range, 40 or 200K, as each side inflates or deflates it sometimes; or it's a fake war, battle, etc – so it may be 10 times less or 0; thus it's not clear exactly how many died, but even if 3-20 times fewer, in any battle or even overall, it is a very bad thing even those millions died, even if not 400 million equivalent in 2022; war seems like some fake fiction at times, fake battle, like fake news, but it can be 100% real and it is real usually (skirmishes and vast troop movements or invasions without casualties or cities wiped out (verifiable, not fuzzy videos that show same one area of the city over and over) can be fake (puppet militia or 'terror' group remotely controlled by spy agencies), like sanctions can be faked (bypassed in other ways, Russia trade back to before sanctions levels), but total wiping out of cities or areas of cities as in these videos is not usually, though videos can be faked with photos etc too); *some forget that we could all* disappear *one day in a* war *if we* don't *evolve as a species, if we don't make nonviolence, peace,* gentle tender healing eterni tone *a priority, tone being a good way to filter aggressive tendencies that wipe species out in wars;* peaceful music *is critical to prevent the end of humanity – we saw above 0.25 million houses* per city wiped *in days in 1940s* using tech 1 million times less powerful than today's big nukes, imagine what would happen if a third war would happen, only a few left alive underground probably, 99.99% of humans dead. People think we have evolved a lot since 1940s, yet we had many war casualties: 0.5 million 1980-1988 Iran-Iraq, 2003-2011 US-Iraq war to prevent nuke development, 0.5 million Syria war (2011-2021, see damage) now almost a frozen conflict (razed streets: clip 1 & 2), 0.25 million Afghan war (2001-2021), 0.4 million Yemen war (2014-?), what kind of evolution is that, when the same wholesale demolition and destruction of entire streets was done as in some 1940s bombings? Well, maybe it's not 100% certain which numbers of refugees and casualties are real (higher or lower) for every conflict, since some may be fake wars to prevent gigantic wars (see long explanation here) between 2 alliances to prevent the country the war takes place on from developing weapons that would kill billions, not 100K. But even if say the dead is only 10 or 100 times lower in number in a conflict, it's still catastrophic even one died.

To evolve past violence, we may need removal of all violence from scriptures, movies, literature,

media (except a little, 90 times less than today, to show how to solve issues and heal) and from ways of solving disagreements, plus 20 times gentler more nurturing healing graceful loving tone in media, music and all speech. Better yet it to realize these scripture are full of nonsense and use something far better we create. Many worship services have changed only 10% since 1940s, indicating very little has changed indeed, so there is risk for big regional proxy wars or worse. Please call God, the Immortals some call angels of light (20 second call in this video), after watching the videos above, to avoid contaminating self, so the angels may help people to *return to gentle music and gentleman values of gentleness*. ►►►►► *All the cities* ◄◄◄◄◄ *of indescribable brilliance and beauty of the Immortals, us in the future,* ☺☺☺*are* resurrectable within days, and thus truly Immortal, *everyone will shine with the colorful* lights of a 1000 suns. *To detach self from the bad pics of former videos realize that they reflect molecular organization of* narrow minds *that* could not see Immortality for All, due to scarcity thinking, *and that the beauty of future cities will be millions of times* more amazing than this. *We can do it:* Immortality *for* All. Talking about fake miracles and gullibility, if God did 100s or dozens of miracles of Eucharist (bread into flesh, wine into blood), Hindu, Buddhist, Marian apparition, etc how come God, in his *infinite love* for humanity, didn't do 0.01% of these in the presence of those few people (Hitler, etc) who got *80 million killed in* World War II (half a billion injured, 2 billion tortured and terrorized) by starting it (financing it, planning it in 1920s-30s) to get them to not do it and work for *peace* and longevity for all instead or Immortality *for* All instead? Perhaps real spirituality brings peace and nonkilling, nonviolence, not ritual and fake miracles, being 900 times harder than weekly church going, it's an hourly effort to improve self. Will we focus on the most basic form of civility and spirituality, heart felt empathy, nonkilling, nonviolence before we go into pompous rituals, endless head theories of this or that miracle? Some will argue that hey, God wanted to see how far some people go in their choices, but where is the evidence for the strong belief in some of these, 5000 peer reviewed papers? None.☺☺☺

A small nation was often invaded by 5 nearby empires and if everyone in that nation would have been violent and resisted 1-5 empires, no person of that country would be left alive today – since they were no match for the big ones; we see in history the sad reality of needless deaths happening due to the small nation not understanding the value of infinite loving kindness, forgetting that top generals torture and mind control robotic soldiers to go invade and force a language or system on another country; but if the small nation would have waited, and not become violent, that empire would have fallen (they often do and another empire comes and invades a small country) and they could have even changed the empire for the better a little and another empire would come and would use less violence, since the 'small nation' became famous as one that kills fewest or nobody in retaliation due to having understood the value of *infinite compassion* for helpless enslaved soldiers who're executing commands without free will

due to sleep deprivation and torture. Likewise, small nations need to avoid becoming cannon fodder for middle or big nations trying to attack another regional or global power, since this would lead to useless deaths; small nations need to learn how to stay more neutral (perhaps, try to help both sides, be neutral or sort of 'pretend' to side slightly (i.e. allow them to occupy you, to avoid any killing since you're into Immortality *for* All beings as a country) with the bad guys (in private inter government meetings, not in public) to prevent the bad guys from bombing you into the stone age (though it's better to be occupied, with 0 resistance, without pretending to help the bad guys in any way in public, since will pollute the masses who don't understand it's a pretend game, as they may acquire the anti-Immortality qualities of invaders and destroy the nation long-term), like Nazis bombed Poland a lot due to resistance and lack of Immortality *for* All ethics etc, then find excuses to not go co-invade and attack the big country (Russia) the bad guys (Nazis) want you to be cannon fodder to co-attack; thus, the immortalist understands it's far wiser to never use military force to regain any lost territory because you may lose way more, let peaceful means alone do it if meant to be, we have 500 planets waiting for the nice people) and avoid what happened in history and WWII many times, when Nazis coerced via puppet military dictatorships (like today they brainwash us World Peace is not possible) some small nations to join wars no sane person could believe they can win – how can a tiny Germany defeat the 97 times bigger British, Russian, French Russian Empire, USA? ☺☺

Hitler was also high on drugs for many years, if a true claim, which led, allegedly, to Parkinson, as in *par.king*-son, (see his hand shake, unless he was faking it in Smithsonian video, wikipedia on toxic stuff he supposedly took), not a partially true claim used to cover other things going on with the 'generals' (*who may have tried to undermine the plans, if spies who used him as a puppet and made it appear he was the guy in charge*). Drugs may partially explain why he went on with the war like that, spreading out the German army in all directions as if to maximize his chances of losing fast, acquiring too much territory too fast to hold on to it, etc. *Usually public leaders are puppets controlled by behind the scenes military spies of local or foreign agencies; this control can* include arranged marriage or relationship with a spy spouse or drugs (given without knowledge, powders put in food, vitamins), even very negative methods like torture, suggestions, mind control weapons, etc, sleep deprivation; while they torture the hell out of him, they pretend to be friends and do some favors too, flatter him, feed his likes they define as they create his fake personality, etc, to not raise too much alarm while they robotize, brainwash the leader and use him to destroy, enslave the nation he's supposed to 'publicly represent'☺☺☺ – or whatever goal (can be even just creating a good buffer nation, not mass extermination or country shrinkage) the spies have in their dirty work, if they're not immortalists and have no ethics of nonkilling; so the immortalists, civilians, every day people, or others, need be aware that not everyone wants minimum casualties or dead, some simply want wholesale destruction

of several nations – we're not where everyone is immortalist yet, so *we benefit from discernment*. History is far more complex than the simplistic things in an article or book on a historical event, which may contain 1% of the truth mixed with some lies too, lies designed to hide what happened. Small nations need to find ways to stay neutral or pretend to side with the evil country if it's the only way to avoid mass extermination of its citizens, while avoiding helping the evil one attack other countries against whom it has no chance to win or even if it has a chance to win. All calculations of leaders need to be for minimizing human deaths now and next 900 years; likewise, soldiers conscripted against their will into a fake war, need to desert, otherwise they just risk killing innocent people and making everyone live shorter.

The evil one (or one who needs your *compassion* the most) is not the soldier, brainwashed to kill since childhood often times if born in a military or 'child soldier recruiting' family, but the loveless generals who plan the war..., so to heal the world, violence in such circumstances and in all circumstances, when the small nation or individual is certain in front of a superior force, is simply cruel to all beings, since it always spirals out of control, they often kill 100 locals for one invader killed, so people need to avoid doing anything violent, as one could be killing 100 of one's fellow countrymen who could have become friends with soldiers and transform the evil empire over eons into the best one that ever existed, as one's *compassion* is rewarded by the universe and the peaceful one gets to meet the clueless helpless souls of the 'dictators' who're just human beings confused and out of touch with what matters, life. The *'divide and conquer', 'instigate war between 2 foreign countries so they don't attack you' 'or provoke a much weaker entity to attack to justify bombing them into the stone age' is a very limiting negative thought, that becomes 'divide and shrink your future too', undermines the instigator too long-term as those countries didn't provide answers to immortality* science questions or didn't do much more important stuff to human longevity, but built weapons, tunnels to spread terror and anxiety, demoralize billions of scientists whose work ethics decreases and pessimism increases as scenes of violence flood TVs and computers worldwide (instead of TV shows about how to help everyone live to 900+, etc, humans helping humans, no violence, humans as shimmering Immortals, *future tech that can change our appearance, weight, etc so all look like a supermodel, one more reason to no longer make fun of others and be like a compassionate lightbeing)*. Instead of images of dead humans, we would see images of shimmering Immortals, how they will walk on these glistening streets with shiny stones and thousands of colors, shapeshifting clothes, bodies (far future, when we live to 80,000+), etc; instead of the horrific, bad or unfiltered (negative emotion, historical inertia filled) tone on TV, we would hear only eterni tone (which now is only 0.1-1% depending on who speaks/sings that day). *How are humans different than insects and animals if all we do is* genocidal wars *forever*? After exterminating endless species of animals that were a threat to humans before, we started

exterminating each other. Likewise, after exterminating some 'bad group', those left will start exterminating each other reaping the endless cycle of violent behavior for billions of years perhaps, living in a self-created hell. *When will we become humans?* ☺☺☺ The modern world brainwashes people to kill, thru anthems, patriotic songs like "Battle hymn of the Republic": read the lyrics to see how it uses negative words like *"wrath, terrible, crush, judgment"*; the song has an extremely low IQ and lowers IQ of anyone listening to it, as it shuts down higher hypothesis thinking needed for a high tech eterni nonkilling army, thru anti-gentle, anti-tender anti-healing vibe totally opposite to Tao Te Ching for example where you defend with compassion without fanaticism, anger and such vibes; it has a 'zealous, almost fanatical' 'confidence in some made up fiction and the infinite violence to impose it on others at gunpoint'; it has the energy that led to the implosion of all empires of old; it could be illegal (unless negative content removed) in any country and anything like it *(well, unfortunately, most military songs have similar vibe and rhythm, to eliminate all compassion and induce brutal killing behavior, due to the primitive planet we're on, vs* immortalist soldiers*),* if we were to be a civilized planet of peace; nothing about 'I have seen the freedom of hypothesis fomulation and testing, of not believing in stories without proof, the light of peace and peace thru peaceful methods". It's about anger, hate, violence – see the contrast with Immortalist Anthem; like spiritual music versus heavy metal in content and rhythm. ☺☺☺

The military rules in every country*, the civilian* government*, all famous* people *are* remotely controlled people, every country is a citizen brainwashing (Peace in 3 months is impossible) military dictatorship (Russia, 2 year labor camp & beatings for a little pro-peace drawing? fake or real story?) *– though some have more* freedom*, courts,* parliament*, etc; the so called* balance *of powers* is a sham, military *controls all branches of government, public personas*, celebrities in every country: it's all about killing in wars. This "Battle Hymn" was played when Pope visited US in 2008 – basically almost like a veiled threat to *all nations* that they will be crushed if they're not 'free' (enslaved by Bible quotes) in the name of a fake religion and damaging potential US image as a country of intelligent people who're free to think, hypothesize, behave infinitely lovingly, like Immortals can and making USA (well, any country waging wars for resources) look more like loveless (or even 'brutal' if using more 'street' language like CNN) hyenas of low IQ, since we know infinite resources exist and we don't need to kill like hyenas do. God doesn't get angry, God doesn't crush, God doesn't behave like savage men, God is infinitely kinder than even these nonviolent immortalist soldiers. We see how all empires vanished, forgetting to have compassion, look at Russia invasion of Ukraine, this video, why use violence? In Iraq, Syria, Russia and US caused with allies/enemies > 1 million dead, due to Iraq-Syria nuke building attempts; it was a 100% failure of militaries to use eterni ethics, to prevent war. How human is to kill others when not even animals do it in some species? The nonkilling country would have a

back up plan for the survival of humanity (and perhaps their nation too) using healing methods in case of invasion, besides individual flexibility after the country 'surrendered' to an invading 'killing is OK' empire. This survival plan is not a war plan, since they always wage healing loving kindness, not war, knowing war ends humanity long-term and that even short-term to inflict suffering on others to become 'free' is not the infinite loving kindness of an Immortal, but a failure to lovingly inspire the torturers to stop their insanity, perhaps due to karmic debts or lessons needing to master as baby souls, if souls exist and being human is a simulation to learn a principle of Immortality ethics; if souls don't exist, then realizing nonviolence leads to 5 trillion future people not being killed via ripple effects, and that no extra suffering exists besides the self being a 'slave' for 50 years, one can opt out of kindness for present and future humanity for 'positive methods (the most healing *nurturing* graceful soothing gentle tender methods) only', which is a much higher standard than "not using violence" or nonviolence. We often think of a clergy, politician, singer, TV personality, journalist, etc doing nothing violent as nonviolent, but his tone of speech *could* lead to 50 million or 50 billion years of afterlife 'slavery' due to damage inflicted on humanity via his tone broadcasting to 1 billion people; hence 'positive methods only' is different, much more than nonviolence, it's a high % (5-80%, not the usual 0.1%) eterni tone all the time, something which only *less than 1 in 100,000 people or million do today*.☺☺☺

Additionally, the physics reality (independent of soul existing or not) is that the future trillions of people (whose lives are saved by one's choice to not use negative methods) are sort of real in a version of reality and those trillion prematter beings may aid one in bringing more peace in the current physical world and even shorten one's 'slave' condition from 50 years to 1, thru a simple realization of relativism. Who is the slave? The robotic mind controlled army obeying generals who want 50 million slaves instead of 10 million, or the tortured masses? Obviously, torturers often don't believe in afterlife, but they do believe in physics as we know it: torturers who terrorize others (with or without others knowing) get their own bodies and brains destroyed, and their souls too, since by watching the victims of their torture they entangle with them and experience the same lifespan shortening informational fields (well, torturer may not die at 20 or 50 like a victim may, may live this life to 100 even or 90, but he won't live to 300 or 10^{12}, since all his life is spent terrorizing and vampirizing others instead of building a world of Immortals); this is due to the species' design of itself to ensure survival and prevent end by genocidal types; thus the sadists who listen to victims' voices or watch the silent victims get their brain damaged and self-destruct in virtue of species' self-protection, i.e. superorganism of prematter-matter beings doing what ensures survival; thus, it's not needed for victim to ever know the oppressor even tortures them, for the oppressor to destroy himself. Hence, all empires of death end, see history; when victim knows, the effect may be even stronger, simply because they think more, consciously, about oppressor, while when not knowing, subconsciously; however, when victim

doesn't know effect can be stronger too at times, due to oppressor pathological desire to watch others suffer that increases entanglement, since he doesn't try to restrain outflow of entanglement. Prematter beings also can help us in many ways, thru 'bliss states' to offset some of the torture or an inner change of dimensional perception. If soul exists, one may gain the freedom of 50 billion years by being 'less' free (to the outward onlooker we may have an unhappy life of 'slavery') for 50 years, because damage done in 50 years can take 50 billion years for an individual to fix *(just as in real life we can easily destroy something in 1 second, but takes 1 billion seconds (30 years) to build it back alone)*. ☺☺☺ The reason I wrote 'less' free is that it can't be called freedom if we used violence or non-positive methods (bad tone, sarcasm, torture, even if verbal abuse, not military microwave torture, intimidation, etc) to reach our state, due to the psyche and other effects on trillions of prematter beings we have enslaved by our choice to a life or partial life of suffering. Thus, it becomes impossible to justify torture, negative methods, war under any circumstances from the point of view of long-term benefit to humanity, even though definitely short-term it seems it prevents many more deaths or violence, that being an illusion long-term. Not realizing this illusion until too late, trillions of species disappeared most likely. Unfortunately, our genes prioritize individual survival now, and we have a hard time to understand Immortality and long-term effects, since, like animals, we have not realized the world 'infinite', until recently, due to science discoveries, so it takes a huge human effort to override our animal thinking, we're a little less altruistic than our ideals. ☺☺☺

Eons from now or even sooner, we could be shapeshifting beings able to have any appearance weekly or hourly, our language will be far more advanced, as well as appearance, more beautiful than now, so the fight over appearance, language, etc is useless. 'Violence, torture, dying for one's country' is a hypothesis that states it's selfless to do so, and heroic even, but it may be destroying one's nation long-term and humanity too. Thus, if we ponder deeply, heroism needs redefinition. The 1st eterni 'war generals' of the world, in the nonkilling Eternia country, know nonkilling is 1 trillion times better long-term for their country and humanity. They act for the sake of human species survival to create the future world of nonviolence, the basis of a Civilization of Immortals, free from violence or fear of being killed, of planet, galaxy, etc being blown apart. ☺☺☺ By kindly understanding with the serenity of an Immortal the views of the invaders, as a mother loves unconditionally her infant helpless child (invaders are nanobaby souls brainwashed by historical inertia to kill), the individual citizen of Eternia, the 1st nonkilling nation, is accomodating, fluid, becomes a part of the empire of mortalists or 'killing enthusiasts' (without choice, after all, there is a tiny truth in every point of view, so one can be accomodating, *infinitely compassionate, nonoffensive, without agreeing to the* evil *methods used*) that has invaded them, imposing their torture based religion, cruel "culture" of violence, torture on them so well satirized perhaps by Nicolo Macchiavelli in 'The Prince' and other works

where his 'advice' is mostly anti-civilization, anti-immortalism and anti-peace. Some believed or claimed Nicolo was sarcastic, not a spy role playing he's republican or a city state or fake democracy (elections decided beforehand etc) enthusiast role playing city states are fighting among themselves or with the Vatican to dominate others (who're *newer in the* game of religion, *denomination,* republic creation to camouflage controllers*, who may be* aristocrats *of a foreign country or monarchy spy service*) by infiltration, stirring conflicts, setting up puppet republics controlled by same hidden monarchy via fake revolutions, etc. The bad monarch was satirized if he was actually arguing for real democracy/republicanism and even unconsciously foreseeing the rise of immortalist republicanism, where the immortalist collective of spy agency elders have a revelation and they replace the tyranny of 'many' (can a hereditary monarchy really be democratic and not tyranical if the goal is power not Immortality *for* All?) old 'dictatorial' monarchy like states (they may be republics on paper, but are essentially monarchies or oligarchies where monarchs are spy/military leader families) who kill endless people to maintain power at ANY cost *with the '*Immortality *for* All*' (interested, most would be)* eterni *state*, where 'Immortality *for* All humans via nonviolence, nonkilling, nontorture, nonthreatening behavior' no matter who may be the leaders for some years, is the GOAL, not staying in power. Universal Immortality *for* All *and* beautiful Kindness nonviolence etc at ANY COST vs "power" (actually the appearance of 'power') at any cost: Heaven vs hell. ☺☺☺

A collective of spies can control the front people who're ☺☺'royals'☺☺, 'billionaires', 'leaders' without them even knowing; 5 million immortalists or mortalists can derive perhaps more informed decisions than one person alone can, hence classical monarchy or republics in reality may not exist anymore, except as a decorative artifice of unity, with spies running the show from behind. The reality is in the 26 monarchies today, the royals are more of a symbol, the decisions are made by the government, so it doesn't actually matter that much if formally there is a republic or monarchy, but whether they focus on Immortality or not, as described in this and other books – when it comes to increasing citizen lifespan: a monarchy could have everyone live to 900, while a republic have everyone live to 100, it's the substance, not appearance of the form of government that matters. Some republics can be worse than an ethical monarchy. However, since many states are puppet states of others, they have no choice in how ethical or eterni they can be, regardless of form of government. Life expectancy in many monarchies, see list here*, is often 10-50% higher than in many republics and viceversa, so all these centuries some philosophers focused on the appearance of government, rather than substance ► how that monarchy or republic actually treats people and* Immortality. Another thing is life expectancy may be 10-50% higher now, than others, but that can change in the long run, especially if the extra 8% or etc in life expectancy is due to genocidal enslavement and extermination of others, since over trillions of years things balance out, i.e. some of the lower or even lowest performers

could end up living 500 times longer in some cases as people branch to different planets, galaxies and new civilizations emerge with different ethical systems, whereby it's infinitely harder to enslave someone a galaxy away, proving that it's not always the 'most aggressive that survives' (a popular myth). In theory, people work to embody the Immortalist Anthem, but that may not be easy in reality in the first billion years (true Immortality won't arrive until 1 billion years from now, when you can prove that your lifespan reached at least 0.98 billion); the energy of meanness undermines the 'killing and torture" empire in the long run, since when it expands to far away planets, that take 400 years one trip to get to (for a ship at the speed of light), some can branch out and move way further away and break off from the empire, as people run away from oppressive energies that are passed down over 500 generations from tone of mom and dad (the top 10,000 families who run the show and influence the tone of all the rest and the empire of 1 trillion or billion people) to kids. In 400 years it takes for a text to be received, *people* make *copies* of themselves*, leave them on planet to be* remotely controlled by empire *with the huge delay in remote control due to distance, the delay allows this change to go undetected, but they move to new galaxies to be free, maybe spy on empire via* ***copies****, establish* Eternia).

Empires of torture don't realize that the soul can leave the body any time (learning a lot more while the souls of torturers behave like tigers shredding deers for fun, 'elevating their soul IQ a lot') to higher spheres or make android look alike ***copies*** of itself that is not a soul, so when Empire tortures folks, they don't torture the soul, just a molecular machine, the body; so on paper they're in control, but in reality they sink themselves deeper into filth, while the other person is free, since God can help the soul be so. God or Immortals can make atom by atom copies of a person, in theory, replacing original with android in 1 attosecond without anyone noticing, if they want to (no reason to though), while original translates into another world. Not only that, but the trillions of prematter beings one saves from early death via positive methods only way of life will rush to one's help and help one soul travel, i.e. astral travel or *achieve some form of inner perception (that reduces suffering during torture by the slave masters)* for those who realize it's possible even if souls don't exist. One is not alone, even if one doesn't believe in God or souls. In case people won't branch out too fast, have intergalactic or interstellar high speed transport, the immortalists will be known, and if people ever revive old people, when they can see every thought emotion of a person (outside of gadget to brain thought writing), they will ☺☺resurrect☺☺ (without needing any ash) first those who helped *Immortalism* to flourish, so the killers will be the last to be resurrected (to enable them to understand the new Way of Life and evolve into angelic beings), if deemed safe by the future (*since they will see the real history, not lies princes often write in history books they* force generations to memorize), even if the killers were princes, presidents or spy chiefs; this shows to atheists that 'power' that lasts 100 years is not ***power*** at all; kindness gives all Trillion Year Immortality in the Age of

Resurrection. So, many atheists, realizing that 100 trillion is nicer than 100 years, now join *Immortalism* and become nonkilling enthusiasts, from formerly killing supporters. Instead of saying 'May God bless us with peace or bless this and that group of people', they will say '*May the* God of Immortality *for* All *and Infinite* Immortal Universal *gentle tender soft healing nurturing* loving kindness *(not just any god) bless all with the freedom (and ability) to choose to live to a trillion*'. The word God has become so contaminated, some use it and refer to a god of vengeance and violence, made in their own image, so it's better to clarify. See, there can be no war, or a state of 'World Peace' but tons of violence, chaos and short lives if 'May God bring World Peace' is our only goal. But if our intents or wishes *"May all be able to choose to live to a ☺trillion' are higher, our achievements are higher.* 'May God protect or bless our troops' or World Peace is a very minimalistic goal, 1 billion times easier to achieve than *'All living to a trillion if all interested'*.☺☺ Troops blessed, OK, less casualties, but that creates expectation of war and the need for so many blessings, as if war on fellow humans to shorten their lifespan is the most important thing we undertake, instead of 'Giving all freedom to live to a trillion years old'. Troops or America or planet blessed, but war, chaos, violence is still everywhere. So what did we achieve with such a prayer and general unspecific goal? To create a Paradise of Immortals is so much more, than 'being blessed a little', it's way harder to live to a trillion, so why not aim for something higher that ennobles us to become nonkilling humans? Nobody can live a trillion if war, disease and natural disasters exist or if we can't resurrect people fast. "*May* America *be blessed with the ability to give trillion* year *lifespans to* all humans interested, in peace, bliss *and* harmony with all *(i.e.* no instant resurrection daily *due to eternal war as in hell)",* to make atheists and theists both happy, how is that for a wish? "May all interested achieve trillion year *lifespans, so they may become the angels it takes to live that long in peace*" or "*May God grant trillion* year *lifespans to all interested*" for audiences without atheists.☺☺☺

If we aim to develop a car mpg of 25 we get that, but we can also aim for 25 billion. Perhaps our world needs more "The immortalist Prince(ss)" types of essays, books, songs, movies, that present nonviolent healing gentle tender methods of avoiding total chaos and strife/war, but obviously, one needs to maintain one's loving kindness, healthy emotional state and wellbeing to make any good immortalist decision, and many situations are new and never in any book, so we need to be free from the need of too many books. The most freeing thing about immortalists is that there are no secrets, paranoia or fears that exist in those who use "violent methods"; there is nothing to hide, so anxiety is lower, more concerned with 'having some daily progress in becoming gentler, calmer and kinder'. Immortalists have no secret methods, everything is infinite kindness, patience and healing☺, etc the 200+ qualities of an Immortal or sage that we hear about in spiritual texts – the method is changing oneself, that is changing one's tone. The most powerful World Peace method perhaps, changing one's tone, becoming infinite kindness, is

not secret and uses no deceit, spying or espionage, it's just not practiced, this is the paradox of Tao Te Ching (along with many Lao Tze explains) and life. *It's probably a waste of time sometimes to search for the secrets of other countries etc, as* changing one's tone *would bring peace and longevity 1 billion times faster.* People often like complex things that are secret ignoring the elephant hidden in plain sight: their tone; as a result, people focus on reading about negative 'mortalist' methods, described in *unethical (for* immortalists*)* anti-immortality, pro-war, pro-killing books like many emperors' works, Sun Tzu Art of War, spy books, 36 Stratagems, Macchiavelli, Protocols of the Zion Elders, and other texts written by dictators, generals (*who didn't believe even 20% of the nonsense in their 'book' they pretended to stand for*, lies mixed with truth to hide what spy agency they work for, fake their deaths, defeat in war or are remotely controlled and they don't know they're working for a different country). The protocols are on FBI website too, are a forged text, full of satire and spy (not just Mossad) strategies, plagiarized from 3 main books written decades before, though the undermining of a fake spy created religion is not needed to do evil if it lowers IQ, the strategies in protocols (used by empires thru history) are thus mixed with lies to hide the intent of authors, disinformation, and make it easy for spies to use 'Asian, Black, etc Jew' as cover to do anti-Immortality activities. People get emotional, due to identifying with a language, ethnic group etc, but forget empires often created nationalities, countries, cultures, religions, scriptures (while hiding the real author, ☺ to make Jews or others look like 'among the least nice' or 'not very nice'), languages, alphabets out of thin air for better theft of resources in the region and more war creation among people they wanted to dominate or enslave; as much as people talk about spirit, it's not like most history people thought of nonkilling as a priority in solving disputes with countries – since science awareness was not there, and it wasn't a threat to species survival. Because of this, you can support fewer languages, as explained here. ☺☺☺

While we all want peace and an ideal world of Immortality *for* All *where we speak* eterni perhaps, a new language all agree to, to help us avoid wars and conflicts, *the end doesn't justify the means,* i.e. harming or terrorizing anyone will never bring a good outcome in the long term (in the short term it may seem so due to short human lifespan), *so any method that kills (or sickens, slow killing),* tortures, threatens or harms any human being is bringing the end of Immortality *for* All *and is thus not acceptable,* so all these spy, military strategy books which are required at military colleges or found online, bad quotes in scriptures, are like "manuals of terror and eternal torture perpetuation, leading to the end of the species eventually" or, using polite, yet confusing for some words, manuals of "training to miss immortality kindness, gentle healing peace building opportunities" and delay "paradise" creation on *Earth, by* 2 second old babies, helpless in the face of historical inertia, hypnotized by it. Hey, at least, some of the 'violent' suggestions in books end up being fake deaths, to make the impression of animosity

between 2 allies. *Like an* infinitely patient loving Immortal 4 trillion year old parent of a 2 second old baby *with perhaps, we can only understand* why they behave like that, without getting angry that they write such texts that bring more of the same history of last millennia, *and being aware that only our living example (*tone*) can provide any counter example to that of historical inertia, and that if we were born in their (anyone we see doing anti-*Immortality *things) circumstances,* our souls may have done the same things*, as soul has little apparent* say sometimes. Alexander the Great, if his life is not a fiction [*we forget at times that prophets or leaders may not have existed as made up scriptures and history books portray, spies and liars existed for millennia*], killed tons of people, crucified 2000 at least per one allegedly true literary text, and, arguably, at least in some people's perception, brought nothing, except an insane cycle of more killing (1 million dead during his wars, or *2% of world* total, i.e. *170 million in 2026*); *'alex the small'* didn't even unify the areas he conquered with *one* language and religion (eterni nonkilling no torture ethics?), so as soon as his empire collapsed, the incessant killings over language and religion continued for eons. *What's so great about it?* Even if he would have unified all into one eterni ethics and language, by force or violence, it would have collapse as people would strt fighting about other stuff since they didn't get the real ethics education: eternal peace comes only thru understanding, compassion for war dead, understanding of benefits of one language. ☺☺☺

When people realize we don't know, and all religions are full of fakery, it's easier to focus on one ethics of nonkilling nontorturing and helping all live longer, a unifying no fake miracles ethics, not focus on rituals that divide. The group that shows compassion kills no animals, develops more vegan foods, more science and doesn't enslave others, as that causes suffering in others; this ethos of nonviolence then propels them to new science heights, living without killing any lifeform in an Eternal Lightbody, while the torturers remain stuck in low tech, since they depend on slaves (or animals or plants). It's so simple to create a global culture of no killing, no turturing, no enslaving of animals or people. ☺We got clergy of many religions telling people to kill in wars, is that ethical? Nothing is more valuable than human life, why support a war of greed? Look at all the atrocious emperors who could have avoided those killings? *It's up to* each soul/being which side they go with: God *(if you believe in aliens or God)* or *violent mortals, if atheist and non-alien believer ► earthling violent mortals* or the trillions of prematter (descendants of earthlings) beings one saves from suffering by using *positive methods only (they got knowledge too,* some maybe live to 3 billion and got knowledge on how to do what Immortalli did*),* Immortality *or death,* faster soul evolution or slower soul evolution (if believing in soul). Perhaps, when we choose Immortality many lifetimes, there comes an instance when choosing leads to it, and soul becomes free. People ignore books, words, but they *always remember the tone, which reveals 99.99% of who we're or go through; knowing this,* the immortalist or sage teaches and heals by living example*, by his* tone*, not with 'weapons'*. Over

emphasizing, theorizing (talking without walking the talk) which of the qualities immortalists would employ in every situation, may be futile since every situation is slightly different than a book scenario, since it may give sadists of violent empires 10-20% more temporary success in torturing humanity with their killing methods, and may deprive immortalists of "centering and flexibility, opportunity to *walk the talk instead of just talk the walk*", so Lao Tze calls the sage "unfathomable in his knowledge", due to being more present in the now instead of in a book concept series, notice how *brief Tao Te Ching is* vs other scriptures. In between the lines rarely to avoid off-centering by talking or writing without walking, yet mostly in plain sight, the methods of immortalists always are communicated, in a simple way: maintain an eterni tone of emotion, thought and speech, and thus do what what benefits all humanity and all future generations lifespan the most, since this also benefits self the most, and this doesn't imply dying or shortening anyone's lifespan, or one's own; the way of Immortalism is to wish always "may all human beings live to a trillion in peace to evolve to become angelic Immortals, in bliss, in harmony, may all forgive all and work out peacefully all differences", to do any change in a way that brings peace and healing to all beings, without causing the slightest discomfort or pain in anyone, it is *fundamentally different than the way of present police, spies and militaries*. ☺☺☺

***Due to extreme care of* not being offensive *with anyone's feelings, the* immortalist *may seem more hesitant, silent and reserved in public, displaying* more diplomacy, tact, grace and serenity. It's more complex, since it's not like spy leaders are out to kill people for no reason, they often do it out of fear of being killed or fear (stress clouds judgment, all is fight flight) that the killed would endanger the progress of humankind to a world of '| |Immortality *for* All| |' (the illusion that they can attain a world of no killing by killing comes from not realizing that they can't see the long-term effects of 1 single act of violence, raised vocal tone or killing, since it may occur millennia after one dies; 3 year olds imitate parental tone and actions, not parental advice, they imitate our living example; since 70 year olds have half neurons of toddlers, they often can't comprehend that the end and means need harmony; one can't cultivate a world of sweet speech by using bad speech, a world of nonkilling by killing, a world of harmony and love by torture and cruel training and violent sports of pushing, shoving, yelling (while others are killed daily in useless wars) like 'not so tranquil' primitive untelekinetic unlevitating people who expect no advanced tech (primitives who recreate that by expecting needing physical muscles to bring peace) or a world of loving kindness (heal, don't shove/push) and selfless immortalist use of physical energy towards creating longevity, better life for all (not just self as in gym or sports that take materials away from housing and universities) or the immortal telekinetic human who needs no muscles and levitates. Try to have a teacher teach kids how to behave while yelling and behaving like a mad person, or to teach English while talking Chinese in the classroom all the time: it wouldn't work, we teach by living example which becomes apparent even when**

trying to hide it as best as we can. We can't teach nonkilling by killing, good by role playing being evil, just as we can't teach English by speaking in a different language and writing in a different alphabet in that class. So, realizing this toddler realized truth, as toddlers imitate our tone and actions, not words, the immortalist is a realist and pragmatist in the face of life's 'unpleasant moments'. Here is the dilemma of the individual immortalist – will he succumb to the historical inertia and die like a fanatic or will he promote life, adapt to the new reality ('bad' misinformed empire took over) and live the saying 'For the long-term development of the species immortals civilization, often times, the *most longevity increasing factor is not some teaching of offspring or peers of science or discernment, ethics, etc,* but the silent teaching that occurs via the tone of speech and unverbalized emotion, which teaches silently by living example how to emotionally react and intone one's positive, gentle tender emotions or extremely negative thoughts and feelings that bring about star wars ending the species 3 or way more generations later'. By not dying fighting using the methods of all dead empires (killing, violence), by loving all human beings like an immortal loves all human nanobaby souls with a ☺☺love incomprehensible to mortals, the immortalist☺☺☺ *individual or group of friends* have given *Immortalism* a chance to flourish in the new empire (that invaded their country) over time, helping humanity to move from *slavery to death* to *lifespans of* trillions of years, they have liberated the entire human species by abandoning the "die in glory" myths of anthems set up by monarchs needing useful cannon fodder to defend their addiction to 'power by any means'.

Death in war is not heroism (as an oppressing alien force would have humans believe and sing in anthems to divide and conquer and keep us short lived), but the *sabotage, betrayal of the entire human species,* including one's own country and people, whose ideas and culture die if all are exterminated or die. He whose ideas live, lives forever. For immortalists, only living and avoiding any death *is* heroism, *only avoiding any terror, pain inflicting, torture, intimidation, injury (all these shorten lifespan) and extending the average lifespan of all humans, so that all are living longest possible lifespan (not just the Queen or King), some day* trillions of years, *is* heroism. ☺☺ For immortalists and perhaps in a future dictionary definition of "human", *being human means not killing other* humans, while being a civilized human means not harassing, torturing, terrorizing, making anxious, injuring other humans for any reason. An immortalist human is the gentlest most healing sweetest kindest imaginable civilized human with the most soothing healing tone and presence, who increases the lifespan of all, via any action. This ethics gives immortalists something mortalists never get: millions of ways to bring peace without the negative methods. Mortalists can't discover those methods since they don't aim to achieve something without causing anyone any suffering (like we can't perfect electric cars if all use gas). *The development of their civilization along a different ethical standard propels* immortalists *to far greater tech advances, having 900 times more friends (who see the mortalists as nanobaby*

Immortals *to be, evolved tigers or brutes ready to shred deers apart when they get a little angry; sort of like lions can eat people, but not if trained since birth to be human friendly) on average, leading to a positive feedback loop that further speeds up tech progress as they don't fight enemies they create by their cruelty.* **The immortalists helped empire 1 to become longer lived and then empire 1 got invaded by empire 2, they didn't die in vain, they helped empire 2 become immortalist and then slowly all countries became immortalist. This shows the *Virtue of Nonkilling others and self in useless wars*, it lifts up the whole human species and ends war forever. Immortalists don't even need to 'pretend' to agree with the ways of the invaders, they're the infinite patience, serenity of an Immortal who is so broad minded that *he can agree with anyone, i.e. understand why he thinks that way*, even though, to an outsider, it may appear they agree with the invaders' ways, due to their not speaking back☺☺ or criticizing, since they hope the silent living example, not words or condemnation, will yield results over eons. ☺☺☺**

The immortalist is honest, *infinitely kind*, like a patient mom with the tantrums of a helpless baby "The wise man understands full well, that wordless teaching can take place" Tao Te Ching 43. By not becoming 'lost souls' like the invaders, they maintained their gentle tone and nature and worked discreetly to transform the 'evil' (misinformed in reality) empire over millennia, *like a gentle parent tip toes and changes self to inspire a better living example, a wordless teaching*, without the need to 'overcome' or fight it since the *'invasion era version of the empire ceased to exist'*, but by helping it become a Civilization of Immortals instead of another empire that disappears from history; if they would have put up a lot of resistance, took up arms behaving like the invaders, perhaps all humanity would have died in that galaxy as the little glimmer of gentleness and *nurturing* feminity would have been vanquished by the misinformed killers who seduced all to become devils on earth; in the process, they also saved their soul from degrading itself, as they realized bad tone and music, the root of all human behavior (including killing, violent tendencies), could be worse than thermonukes detonated, because if allowed to contaminate the soul (*by God, since God can turn off soul contamination when empire of mortalists tortures people with music*), not the brain only, it can damage that soul for eons and millions of other souls who then create mayhem in many realms and acrue huge negative karma, bigger than detonating a nuke, not 50 years of being slave labor for the empire of mortalists; realizing that slavery 40 years is better than suffering a million or billion years after death, and that even if 'soul'☺☺ were to not exist humans would benefit long term, they chose to further Immortality of the human species over profit of empires of death, *to resist becoming evil, not to kill others, to change* themselves*, not others.* They realized that evil ones temporarily winning is simply the immortalists' failure to communicate the value of loving kindness. Compassion for self/all means that one won't be so cruel to force self to become a devil to fight devils, but instead to remain an angel so others may see the light that transforms in the right century. By

not stooping so low to become a violent torturer and killer, they have *saved the* galaxy *(from imploding weapons of a future star war) or* human species, even though to contemporaries or by appearance (in the short term), they lost the "war", while in the long term reality they won it. This is not the classical "Sun Tzu" and other texts, violent passages of many scriptures: it's very different, it's not about killing others, it's about remaining kind, about universal loving kindness in tone in all music, coherent behavior, loving all humans, killing nobody, being different than beasts, or at least as nice as 500+ mammal species that never kill their own, having some trace of actual humanity. The immortalists realize that as a car can run on electricity (*kindness, positive methods*), so can it run on gasoline (killing, torture, threats). To defend a country one is not limited; thus, they make no threats, train no buffer cannon fodder states into killing, sponsor no insurgencies, but promote nonkilling, kind tone. ☺☺☺

Mortalists turn people into killers, so "their country is safe" in the short term, while long-term it will vanish like all empires of death; *the* impunity *with which spy agencies, armies created 'false flag' killers in 'to be looted' countries (*to justify extermination or enslaving the weak*)* shows many had no belief in God or any ethics, for their actions could be karmically more disastrous for humanity than blowing up a planet, as those souls they seduce to become killers may be tainted [if influence allowed by God to move to next life] and at the future time, when reborn or when their ideas travel from generation to next, if not same souls, will blow up 400 planets of the empire of mortalists bringing it to an end, perhaps; instead of planning and promoting nonkilling, *they* planned *to kill* endless *people, in case their robotic killers program has a glitch, and they would 'need' to kill those they turned into robotic killers via brainwashing and* gadgets*; they didn't even consider a program to turn devils they created into angelic nonkillers, too expensive.* Change is the only constant, so eterni positive only *methods* may prevail soon. ☺ Making threats and never carrying them out is completely useless and diminishes the credibility of any words said by the Civilization of Immortals leaders. It also pollutes the psychosphere of the planet, removing the chances for Infinite Immortality Peace Alliance to recruit *all nations* into it and bring lasting Peace, a Paradise of Immortals. By being super nice, by not threatening, one can use spiritual help to change the "bad guy" intent at the last minute much easier. If a threat was issued, it's much harder for the spirits to convince the "bad guy" that peace is better and a peace treaty can be trusted, as after threats people trust others less. ☺ Spirits can't build trust if humans destroy it with endless threats; if you don't think spirits exist, you do agree that after making threats, establishing peace and trust that lasts is harder. Hence, when military leaders issue threats and disconnect from the motherly loving gentle healing *nurturing* presence of *the Holy* Immortality *for* All *Spirit*, they *can unintentionally* (due to believing it's the only language the "enemy", just another human like them, understands) become champions of war and destruction *who inadvertently attract the bad spirits*. The skeptics will say *this is false*

because the “bad guys” simply don’t understand “nice language” and only understand the language of “force” and “threats”. ☺☺The hypothesis that “bad guys” only understand threats is not always true even for untrained healers, and can be made false each time if the healer eterni tone diplomat has enough goodness in his mind, due to special training of 20+ years, to see the good in others, magnify it, relate to the good in others and bring it to the surface; there are a trillion ways to peace without threats. ☺☺☺

We humans calculate effects of actions over a period of years or decades at the most, but in the beginning of Chapter 9 about smiling, it shows one human smiling a lot can add thousands of years over the future generations effects multiplied, as if he raised 100 from the dead. Similarly, a threat that causes so many frowns, has subtle effects over millennia which are very hard to predict or calculate, and that is why the spirits may be against threats (even empty ones, or jokes in a comedy show, just trying to appear angry and keep distance with others) as they may see how such threats never bring World Peace, but only postpone it, achieving a temporary patching and relative peace in the human short-term, besides a loss of thousands of years of lifespan when threats are many and frequent in one's life. So, from an ethical point of view, planetary and individual karmic, one can maybe see how the side effects of the threats often outweigh its benefits and because of that, some spirits or God may view "making threats" as a "coal" like tech, very primitive, polluting way (coal ash, heavy metals in air, etc) of generating “electricity” or "World Peace". People will say that this may be polluting in some cases, but that in many cases “threats work”, etc. This “threats work” seems so, from the human point of view, as they only look at the short-term effects in that peculiar circumstance when the only thing they measured was that small outcome, but they didn't see many other outcomes coming from it over 900 years, which spirits see 800 times better. If that same little thing was achieved thru a gentle loving eterni tone of speech, the side effects would be absent and the best outcomes would emerge. But it is very hard, due to historical inertia and telepathy intrusion, to develop the angelic energy, tone of speech, emotional and energetic radiation to induce positive emotions and understanding in others, because we don't teach it, we don't make it central in schools, movies, literature, etc. For example: a teen student can make a threat to some student (typical bully at school); this achieves the outcome and everyone praises the threatening teen. But the side effect could be that teen decided to be mean to everyone else for the rest of his life, and the karmic responsibility for all those outcomes is not entirely the teen's; it is also the threat maker's. Then the world becomes a less kind place filled with negativity. While it was an easy rude expedient way to solve an issue with a misbehaving teen, the effects of the threat could be so bad, so catastrophic, it was not worth it, and kindness would have been far better. And we humans have no way to see cause and effect well, as we don't read every thought and emotion of a teen or all humans the negative emotions/thoughts have contaminated. The internal life of

people (who make or receive, witness, read about, watch movies about threats) and its complexity is something we have no access to, the why people do things, when it all started to be this or that way. A threat seems such a simple thing, but while it solves an issue in the short term apparently, it can create 800 other issues (or 800 times more bad than good) later making it all worthless. Many things in life seem good in short-term, but long-term become a burden that offsets all benefits gained in short-term, but this is invisible to the human doing it, as they look only 5-50 years ahead. Coal seemed good, but it destroyed us. Leaded gasoline seemed good, but it increased lead levels in human bones 300 times. Considering these factors makes perfect sense to anyone looking at ☺☺☺World Peace☺☺☺ as a science and engineering puzzle.

Mean/threat filled tone and always talking in a way that doesn't focus on helping *all nations* to achieve *trillion* year *lifespans*, in a way that doesn't praise something good in *all nations*, can lead to the imitation by the population of the government tone and ways of talking bad about others (politicians, etc). This turns workplaces and families into inferno places where people instead of working towards 5 *trillion* year *lifespans*, talk bad about others, criticize others (directly or with other peers) and act busy, frustrated with the 'evil' guys that are the 'problem' – like the 'scapegoat regime' that causes all the trouble in the world, when it's more complex than that. This leads to lower productivity in inventing new longevity techs, more social chaos and the decline of the country busy in always leacturing and criticizing other countries, while itself is full of problems. So, the rare, ocasional or rare bad tone of some '*politicians, celebrities, singers, musicians, journalists*' in parliament, media, etc is not only making enemies in other nations, but also destroying one's own civilization from within indirectly, in ways people forget. The *government our planet never had in any nation* was one in which the leaders praised something in *all nations*, spoke only positively about everyone (at least in public) in the most angelic tone, simply helping more those they felt were helping humankind achieve 5 *trillion* year *lifespans* more, in a quiet subtle way, maintaining harmony; communicating in the most loving compassionate way (when 'a tragedy happens somewhere') that doesn't offend, instigate, provoke, demean, mock, insult... ("our country is ready to help yours to achieve happier, longer, maybe 1 trillion some day, lifespans for all, in the most loving kind tender graceful compassionate *nurturing* healing way" instead "you are killing that group"). Historical inertia is strong, people are stressed and angry, so finding the kindness to speak nicely is hard, but today we got techs to help with that. First of all, nobody responds well to criticism and criticism will only antagonize countries instead of bringing them closer, working in unity to give all beings a trillion or 500 year lifespan. Offering to help in the kindest way, offering the other country a silent living example (like the sage in Tao Te Ching, who does everything without unnecessary speech) they can be inspired from and emulate of their own accord without us verbally suggesting anything, and when speaking using the most non-offensive speech, seems more

productive in the long run, since those people may not even realize they're wiping out the others, which may be a subgroup of same main ethnicity, just more peace loving. Attacks are counterproductive and will only diminish both the criticizing and criticized country, as they destroy each other instead of helping all to live to a trillion. Role playing they're attacking each other turns the world into a street fight environment, that makes every worker globally hearing the news depressed (less willing to make everyone live to 500 by amazing inventions, techs, etc) about the lack of self-control, kindness and civility in those who 'lead the planet', leading to shorter lifespan extension progress for the planet as a whole, including the role playing nations who missed the opportunity to inspire the others to work on longevity instead of killing each other. This turns capitalism into a form of stagnant communism where nobody is motivated. ☺

It seems that civility, the ethos of spirituality has been often completely thrown away, turning our media and world dialog into a fist fight or boxing match, or soccer, football, etc stadium contest about who can speak in a tone that is as far as possible from eterni. Where is the tone of a loving 8 trillion year old Immortal mother of her 2 nanosecond old babies, filled with infinite loving grace and boundless compassion, as a mom would have for her helpless 2 day old baby? It seems that if we read the content of speeches by politicians, political (not spiritual) leaders in the last few millennia, very rarely they use the word gentle, healing, nurturing, magnanimous, bounteous, compassionate and they never use strong phrases that are far more healing in their effect, such as word combos *gentle tender soft healing* loving kindness and the like (*nurturing* graceful infinite *compassion*), qualities of God and/or the Immortals we will become one day or of a civilization of peace where people aim to live ever longer, or a very motherly energy of healing *nurturing* grace, or a wish of physical Immortality *for* All interested in it. It seems there is a stinginess or a taboo against sharing universal loving soft healing *nurturing* compassionate tone, wishes of Immortality *for* All, praise for all beings, positivity with people, healing words, due to fear it will be perceived as unmanly and weak (or 'inviting aggressive actions due to not sounding threatening or deterring enough'), or some kind of lunacy of an outlandish monk, or some 'feminine' quiet sage of Tao Te Ching who "was courteous like a visiting guest... (aware that) gentle overcomes the strong with stillness and receptivity." – when in reality it will make that *nurturing* feminine government look like the most civilized on Earth, turn all neutrals into supporters of that country, who becomes the one motherly nation, like the Tao, everyone wants to follow if they create the Immortalist World Peace Alliance. We see talk of war, threats and how bad some regimes are, fault finding, but never about how we will combine or seek softness, tenderness gentle healing grace to achieve a *nurturing* graceful *gentle tender soft healing* loving kindness that we need to help *all nations*. *If billions hear the speeches, what qualities will they emulate? If war is the future, why bother to invent new things for longevity? Will they invent or emulate fault finding or divine or amazingly* peaceful *qualities? Will they bring peace or war*

indirectly at work and home? Recent centuries show the words war and weapon deliveries quite often in speeches, to "reassure allies", etc, but the words of the presence of what people refer to as the universal *healing* loving kindness for all beings, all human beings, of clearly felt from tone concern with the enormous suffering one single human injury and death brings, are not really emphasized and this leads to a world of threats and tit for tat, as the rights to live in peace without being collateral damage in war, to figure out how to live to a trillion etc don't exist; we focus much on fault finding of other regimes, but not on helping all humans achieve *trillion* year *lifespans*, what is wrong with wishing that all live to a trillion so they become angelic beings, after all a trillion or a century is still a second in Eternity? People forget that as we live past a certain age, we will be able to speak 100s of languages if needed (probably not, there will be maybe one eterni language), to shapeshift into any height, appearance etc we want, even materialize body that lives off planet, etc... so often, they imagine country B they dislike the culture of will remain the same; it won't, everyone will become 1 billion times smarter, nicer, kinder and there will be no more things like 'he is tall, short, this or that, etc', since anyone will be able to shapeshift into any form, gender, race, etc they want, so take a breath for a second, suspend judgmental labels and look into the far future, how everyone is that ☺☺☺ amazing & beautiful ☺☺☺ shimmering shapeshifting *teleporting* Immortal, using a tone and energy during telepathy or musical speech we only dream of, maybe made of new matter and energy. To get there, it takes a little courage to see the good in all, to not focus on the many faults in all, even if they exist, to dare to give a trillion years to all, so they develop their divine or eterni qualities – he who gives the most will become the richest of all in the long run, so why not give the richest treasure, the wish and right to happy | Immortality *for* All | ? ☺☺☺

Why are people so afraid to be kind, like the infinitely sweet *infinitely gentle infinitely loving, kind, generous* quadrillion Immortal would be? For them, a trillion years is nothing, so for them to wish such a lifespan to all humans would be thought of as a very low level of kindness. We want to live forever, much longer than a quadrillion years, and yet we don't allow people to live to a trillion even, we don't actively wish that, we don't work towards that. Why are we so 'minimally generous' in *real inner intent* to not wish even 100 year (let alone the minimal trillion) lifespan to the so called 'enemies'? God be kind to us, but we not kind to his kids? Some only wish that others are buffer states and slave labor, maybe live 4 or a few years extra if our "ally" or "neutral potential ally"? Why are our prayers and wishes so low in generosity or "stingy"? We only wish and pray for health, but not trillion year lifespan to all. Health for 50 years? Why can't people embrace universal loving kindness and seeing the Immortal Radiance of Immortality in all? They're so afraid that if they let everyone work towards Immortality, some will figure it all first and enslave the others, but that won't happen, since to reach trillion year physical Immortality will require becoming an angelic being first. So, everyone is playing 'being

low IQ' and setting the lowest possible goals, afraid the others will get there first – so in the end, nobody gets there, or it takes a trillion times longer. Perhaps, America can say, hey, can we be the first country who is truly generous in lifespan wishing? ☺☺☺

"*We will deliver this and that weapon system to A if B attacks*" (veiled threat to B, to back off, etc, pretty unpeaceful and not very loving for many B citizens or A who will lose chance to live to a trillion if war breaks, due to dying) *could be replaced with the next 11 page speech of the* Eternia Alliance *leader 1 year before* World Peace *and* 0 global violent crime *manifests:* "*We would love, if allowed or invited, ☺☺☺, to help A and B citizens live to a trillion years old, to create the* Immortality *for* All *world ethos, a world of no more killings of humans, if they wish, in peace and bliss, in the most* angelic *healing* loving kindness way possible t*hat maintains peace between A and B; can we work as* an infinitely loving Immortal of infinite knowledge *who knows a trillion ways to an end without any violence and threats, but with* loving kindness graceful ways that will eliminate the need of so much suffering war brings? Can we have the 'infinite' compassion a mom has for her 2 day old baby, or a trillion times higher, like an Immortal mom would have for her 2 year old baby who is a billion trillion times younger, for every human being alive and look to them from a neutral angle, i.e. we may have done the same thing they did if we were born in their circumstances? If the desire and devotion to Immortality is strong, then the way without violence can surely be found; we so strongly believe in this, that we, Eternia, have *never exported in our history, since our founding, any weapon that kills to any nations*, since the physics laws lead to the decline (like endless empires did due to sponsoring mass killings in wars, creating new enemies all the time when weapons made in producer country kill others, etc) or disappearance of our country in the long run if we do that, and to the degradation of human quantum field that affects all future nations, we also have banned all new music in our country that is not talking about World Peace in 1 year. Let nations *stop trade or etc, but not attack each other. We explained a trillion times that with enough tech, anyone can produce any goods from neutrons and protons, electrons, etc and can live to 5 trillion whether they have 1 or 100 people per square mile; that all wars are insanity and delay the progress towards Immortality and all border changes need to happen via nonviolent means, by people simply* choosing centralization. We're an alliance of Immortality and Peace, we want to help all live to a trillion, we're the most anti-war alliance that ever existed. Why can people not choose to love all beings at least in public speeches, perhaps praising more those whom they think are the best, so the tone becomes more refined, positive, diplomatic and less war-like? So, with this type of energy, it becomes harder to have unity and peace and a world of civility where violence is a thing we evolved beyond of. Not to mention that the tone of the politicians and leaders is not always the most angelic tone of a monk, those angelic monks, nuns or teachers who speak like 1 in a million. So, instead of learning from those people and improving tone, it became often a contest

of delivering more content in an average tone, not realizing info without tone can be often less effective than less info with way better tone. Can we think about the effect our tone and speech content has for next millennia? We look at diplomats and how they never sometimes expressed any apology/regret over the death of millions of thousands of innocent civilians or brainwashed enemy soldiers in wars of all types, even the most justified ones when they defended their country and unfortunately had to fight the enemy soldiers causing casualties. ☺☺☺

Perhaps, some argue, our planet needs now a more compassionate concern for human life in talking about war. Thus, we, the eternis say: we're very sorry we could not prevent this war of aggression against the Nonkilling Immortality for All Alliance who is trying to be like a most loving mother who unconditionally loves all her children and all beings, all nations. Sadly, 5 innocent people had minor injuries that healed in 1 month (3 mind controlled 0 free will soldiers and 2 civilians who had no idea war was happening), for which we feel so sorry, whose suffering we understand and vow to neutralize or balance by bringing happy Immortality *for* All people interested in the country that invaded us, yet nobody in some countries' leadership seems to listen to our request to create the Non-killing universal treaty and the World Peace alliance. We tried this and that to prevent war, spent billions of dollars for that purpose, but peace didn't manifest this time, yet we believe as more side with the Immortalist cause of infinite compassion, as many people understand the huge effort we made to minimize wider wars and avoid even that war, the killings will end and the dreamed of world of peace☺☺ in poems and literature will come true, because otherwise, our species may end, as others probably did. We tried to explain that there are infinite resources in the 200 billion planets of this and other galaxies which can support life, and fighting over a few square miles of land is pure insanity, when each nation can get 900 times more its present size. Yet, some chose to not listen and to not build a quantum field of higher quality for humanity, undisturbed, undegraded by torture and war. We have explained 100s of times that World Peace is possible within 1 year, and we will repeat it until one time, it will become true and 1 year later it will manifest. We will seek better within our souls, the tone of infinite compassion, of infinite gentle tender healing *nurturing grace*, of apologizing for our mistakes and human frailty, due to being like rats in IQ compared to peaceful Immortals, as rats are versus us, we realize we can do better and we will try, for there are trillions of ways to prevent war without fighting it and yet this time around we could simply not discover those that would have prevented attacks on our peaceful nations. All who might have died were 2 soldiers who came thru the deadly force field we created, but at the last minute, we noticed it and employed the hologram tech so they became ☺☺ *happy* (no longer so angry) changed course and let the levitating machine lift them out of the way. They almost killed themselves, didn't believe or maybe they did believe, they would be fried when we used megaphones to back away. *Thus, nobody died*, nobody had any injury that didn't heal in 1

month (5 people), we implored (see youtubes) the nations to not try attack us, but the quantum shield worked, they could not attack us, plus most of their weapons stopped working when trying to attack us (the shield, teleporter, levitator, etc), due to a peculiar property of the shield and associated devices that selectively affected weapons by chemical jumping between dimensions as it were, for the *gentle subtle Advent* of Immortality *for* All, the metal converts into plastic, only for metals in higher concentration by recognizing the unique electrophotonic properties of molecular systems, such as wires that have billions of times of that element (metallic) than a human enzyme (*to avoid killing pilots, sailors, infantry, as that degrades the entire human species, allowing him to parachute,* so he can be met by Eternia drone and taken to a healing center), the contacts are not there, wires suddenly break as room temp transmutation happens, electronics fail, etc.. ☺☺☺

A tiny 10 gram drone, 100$, could affect a trillionth of the mass of a 10 billion gram weapon (that costs up to $50 billion), thru dimensional movement, render it useless, invisibly, without them knowing what happened *(tank, etc can be fully or further destroyed later, after human is saved, to make it impossible to reverse engineer the tech, so it doesn't fall into the hands of 'brainwashed by historical inertia, in need of healing and evolution towards gentle grace' generals who torture, injure, kill humans)*, without EMP, etc. We learned a while ago that knowledge, immortality capitalism and muscleless kindness protect, while muscles, gyms, fist power (to lift up big rockets in rocket launchers or play sports that we gave up) and money don't. Their weapons didn't work and we killed none, even though we could have killed all soldiers who tried to kill us. Our ethics doesn't allow killing fellow humans, not even torturing or injuring them in any tiny way, as we destroy the human species' information field, of which we're a part. We had to transport enemy soldiers to their left over country, for those who didn't want to join Eternia, *since their trucks stopped working*. We told them we wanted to smile ☺☺ at, hug and kiss everyone (virus free) in every nation who wanted it (like Mother Teresa hugged homeless people, etc, many people lack affection, nobody smiles at them), to express our love, our loving motherly concern and care, to do hands on healing on everyone who felt lonely and wanted to be loved, to help all live to a trillion, give free healing music to all to heal the restlessness, like this and that and many more. We want the neutral world and everyone to know, we're the most peace loving alliance and we did not start this war, we simply defended our *motherly nurturing* world with a new tech they didn't know exists; perhaps if you watch the tone (body language, vocal, content of speech, etc) of our administration and that of the aggressors to decide who was the aggressor. Our planet is like a big classroom with 200 students or nations and when we speak with the other students we can imagine that we're the hidden teacher, since we always teach others without even realizing; each student is a teacher of all students and the teacher; when a student makes a mistake or calls another a 'bad word', the

teacher can very softly compassionately say *'I see that you did express some compassion and kindness towards the other students, but perhaps not the most loving healing nurturing grace that could have been expressed, not the most positive words that heal and uplift and yet communicate your disagreeing with the lack of compassion of the other student. Immortals of the future, who live to trillions of years, love each human billions times more than we do now, since they live billions of times longer and have developed their tone and universal compassion billions of times deeper. So, to quantumly entangle with them, the future human species, to become like them, let us love all beings* with that infinite love of God or Immortals, *whatever you believe in. I invite the two of you, A & B, to* say, in front of the class, in the most eterni tone, while genttly smiling in an infinitely kind way and looking at the other a little as you read, to each other, in order (A 1st, B 2nd, using the max echo special mic to allow you to create more musical effects or even sing it) *after shaking hands, the words on the projected image on that wall, while we play soft healing music, "*I understand your feelings and I apologize for lacking the infinite healing compassionate grace that would have prevented the little emotional outburst, I could have asked 'please, will you be so kind to share with me in your tone of speech some of the infinite compassionate healing grace and *nurturing* kindness of the Immortals, like they love each human billions of times more than we do now, since they live billions of times longer?☺☺

A 30 year old mom is only 400 times older than her 3 week old baby, yet she loves him so tenderly, never punishes him even if he spills milk because he knows no better, so each human is like that baby, even younger, and the love of Immortals in its nonpunishing and healing quality is billions, not 400 times more perfect than that of a mom for her baby whom she loves with unconditional love and grace. So imagine what an infinite grace and compassion, millions of times greater than the most perfect present mom has for her beloved infant when she holds the baby and sings the most healing lullaby, a trillion year old Immortal would have for a human or fellow Immortal... and yes, we can have a tiny glimpse of that, by tuning into the universal consciousness and becoming them slightly, *for indeed, we're them in the eons ahead, if we so choose to become*'. I could have said that, so I honor the Immortal trillion year old potential being in you, that exists, and *whose physical Immortality in this world* could come true if instead of conflict we create peace and focus on longevity and immortality tech and civilization. May we treat all people with an infinite *healing* compassion, that praises effort, *inspires evolution, magnifies to the nobility,* magnanimity, generosity of the *Immortality for* All *intent and the benevolence of the* Immortals, *amplifies the angel within, heals, informs and transforms* instead of mocks, shrinks the Immortal within, attacks, shames, provokes, incites, insults, diminishes, *amplifies the 'bad person' within.'* A bad teacher could get angry and yell and say 'You were rude, you're not supposed to use such names. Or even add, if a tough guy, "As a punishment do 30 pushups etc"'. So, when we interact in any circumstance or on the world stage as a

government with other governments we're like the teachers and students interacting and we have a chance to create a holy healing *nurturing* universally uplifting (everyone would love the country speaking like the nice teacher) atmosphere or one that is less peaceful; we want one that is healing, that inspires all students to send healing to the warring parties or the bad student or country; we don't want one that is punishing (see why punishing focus is not helping). We want everyone to feel part of our global family, not an outcast, because we know the doer is the entire global family not one nation. ☺☺☺

We have often said, very lovingly, in the most angelic tone possible then, that we love all human beings, we want Immortality *for* All and we even are committed to resurrecting, when or if tech allows, the former citizens of that country who worked for Immortalism (and whose remains we have saved in a gigantic library) and who were tortured prior to the war by the aggressor country in the half we annexed after to the war. We made even a whole library of the remains of other people who died due to the anti-immortality policies of the former government in the newly eterni lands, so they too may know Immortality, so they may know infinite grace, and live a free life of joy, instead of suffering the stress of war. *We emphasize* eterni tone, *since it helps us improve our "intent, thought, emotion" tone – as shown on MRI, with kindness areas lighting up 100x more when we speak really nicely – so we wanted to do that since many never go to places (the teachers, clergy, parents, or spiritual teachers with such a tone) where such a tone exists, so every person who sees and hears us can get a glimpse of freedom from historical inertia tones; the sage of Tao Te Ching leads by living example*☺☺☺*;* we understand that when we speak and a thousand, million or a billion watch us, we have a chance to create heavenly gentle healing tenderness in every family, country and community, or an inferno – by the very emotions we radiate, stir and let out in tones – so we have taken upon us to speak 20 times less in speeches at a time (or use prerecordings to avoid exhaustion due to cognitive effort it takes) and with a 20 times more filtered tone, so that only the most elevated emotions come out and we create that Paradise world – besides making the content more healing; no need of 2 hour talks, we can speak 7 minutes and refer to a website with a prerecording with the entire text, made by a great AI using our most eterni voice. Because the government tone sets the civilization tone, the weight on our shoulders so to speak is that of the entire planet – since media follows gov tone and plays gov officials clips. It's the era of online, no need of yelling, we can meditate and heal our souls instead of becoming inciting people, inciting all to the yells and shouts of our primate ancestors – do we really need rallies? If people want rallies (youtube is fine or smaller seated gatherings, so people can sit and achieve much deeper meditation states in the meditation breaks and exercises to make a point), they can meditate more together, learn conscious breathing, kind tone and emotional management – world change comes from inner change – not just talk stories and promises never kept later – let's combine ideas with self-

mastery, civilize ourselves; no applause, no shouts, only the most angelic tones and meditative music and silence; we can gentle and sweetly evolve towards grace and tenderness. Think about 10,000 people standing at a rally, wasting calories with that, hearing yelling when an AI using eterni tone of the person could read an AI improved content of speech, people could watch on youtube and use those calories to do something for others (build a few houses, habitat for humanity, 10,000 labor hours, 1 hour a person) that keeps people active (since standing, applauding, waving useless flags is a form of exercise), such as some of the sports of the Immortals. It often seems like more politicians could join (like US President Carter) the 10,000 people and spend 1 hour, to create the free house for constituents who advanced immortalism, or who live in bad houses, we got gigantic living rooms too, while kids fight in their tiny room... instead of creating 2 identical rooms and a smaller living room; same for college dorms lacking single rooms, etc. While doing that they can listen on the headphone to this amazing & beautiful ☺☺☺ speech they would have heard at the rally and have more time to meditate and create a better version of their eterni AI tone (like speech recognition software, it recalibrates and evokes different brainwaves in listeners, different emotions, etc) that creates more global healing for anyone who happens to hear it – eliminating the need for politicians, media, teachers, any public speakers, etc to speak so much, exhaust themselves and pollute people with improper tones (use AI more, etc), brainwaves that lead to conflict; let the AI hologram do the speech, we just write a fast version, AI improves content, we improve AI written version and then AI speaks it in a tone we may not be able to reach for 5 months due to stress, thus avoiding untold series of cascading events that lead to war. ☺☺☺

We can use tech to manifest World Peace in 2 months or maximum 1 year, but we often don't, we use it to create tension? Also, we want to live to 900, not 73, the global average in 2022, so we need save our vocal chords. Also, as we evolve we abandon street protects, can send a youtube recording of 1-10 people asking for something in an eterni tone and then 10,000 such youtubes are available on the youtube protest address for those interested. The local news would be required to cover the protest videos on youtube and invite officials to send a nice tone reply. This prevents traffic jams, shouting and devolving. We did many studies of more remote communities and noticed that crime decreases 50 times (98%) when we trained all public speakers appearing on TV-radio-music etc to reach high kindness☺☺☺ tenderness healing *nurturing* compassion brain areas light up on MRI and setup mics to detect when their tone goes away from that and make a colorful hologram or have some very visible (to the speaker, not audience) lights show up (even a unique sound that audience can't hear if needed) so they go back to eterni tone. The system can be transparent in cases people want that, so audience knows when AI detected fall from grace and learns better tone, the sound can be a very pleasant chime or bell, etc. Having noticed that we changed the whole country and then Alliance and

freed enormous resources so we can redirect them and invent longevity tech, instead of the most unjust system of oppression where those who incite and provoke are free; we just only give license to speak on radio and TV often only tho those who have gone thru extensive training in proper speech and have attained proper brainwave and sound patterns AI recognition, so they get alerts when it deviates (without needing to wear MRI headset all the time). When we speak kindly and hear only kind tones on TV-radio-internet, we also cause a spike in scientific innovation and producvitiy, happiness of everyone, as they move into anger and negative emotions much less and stay in the creative invention prone brainwaves much longer. The writing becomes much kinder over time, so we also approve every book, online post (AI based) and article before it reaches humanity, to make sure it's not too mean or negative, or describing any violent or criminal activity as that gives people ideas and creates the crime we don't want. So for us, it has become not an ideal of long-forgotten scriptural quotes, but a matter of national and global security to not allow just any youtube content, instead to cultivate Heaven on Earth by its tone and create true civilization, so we invite all to do the same so we have peace on Earth within a few months. We teach every kid to speak like that now, so we don't have to spend 10 times longer to train them when they're middle age (harder to change neural pathways then, but brain is plastic). This ensures every teacher goes thru certification so kids in kindergarten, nursery, school college get to hear decent tones. When dad calls mom, he can use an amplifier to imitate kiss sounds, 3 times, to save the vocal chords and avoid damaging them by yelling 'honey... can you come here", etc. This also helps couples to be more affectionate and defuse tensions. *It's known to science that as humans evolved for eons speaking a language, certain genetic codes and genes interpret certain sounds in a certain way more often, i.e., a very different language when spoken can sound a little differently than what the intent would be in your native language – i.e. may sound more loving or less loving, even though intent is the same, depending on the listener genes and native language, likes, upbringing, etc – so to avoid misunderstanding of intent, it's very helpful to speak in eterni tone, so all genetic codes, all people can feel that infinite loving kindness; even people of the same ethnicity and native language can interpret some sounds differently, as kindness or aggression, etc - so this tone is so critical for peace.* Until we have one native language for all humans, some century, we can appreciate just how much one common second (first for some) language (at least) will help us in avoiding these intent misunderstandings *due to brain processing of sound*.☺☺☺

We are against torture so we never torture anyone in our Alliance, not even anyone suspected of being a spy, or caught "trying to destroy us (as a spy), to create violence, to incite"; instead, they're sent to healing centers, where calming music is played (they can listen to peaceful mp3s on headphones, etc) and they're shown the infinite compassion of the Immortals, so they may know what they have never known – *universal* kindness, not *kindness* for a group only. Even

people who're not spies and have minor infractions, go to different healing centers than the ones for spies and heal there temporarily. We also don't give them junk food, but allow them to use solar panels, vertical farms, water lentils (duckweed) (ω3:6 ratio 2:1), algae, to grow their own *vegan* food so they can heal themselves, discover a new world they never knew existed: of infinite gentleness, tenderness and sweetness. We do help them with gadgets and support staff, engineers, to maintain their living quarters, etc. As a result, 99.99% of those there realize the enemy is the foreign country they worked for, not us – the 0.01% already had their brains totally damaged by the torture the foreign nation did on them during 'training' – as they were older too. This ensures that if enemy country sends lots of spies etc they can't drain our resources by having us provide free amazing & beautiful ☺☺☺ healing centers to all while they do nothing but listen to heavenly music and have fun as reward for trying to blow the planet up, so we *invite* all neutrals to copy our model and *free humanity from* torture, as we're all *quantum entangled and what one feels* damages *the brain of* all, causing stress aging hormones in all human beings, *DNA changes that bring more* wars, *short lives later, so* torture *or any conscious* pain *inflicting on others* (physical especially, but even psychological) is a crime against all 8 billion not one person. In Eternia ☺☺☺ *Alliance*, we *banned* hunting, trapping *and any form of b*ad animal (e.g. coyotes, big cats that are banned in 35 states), that kills people, livestock, and pollute *human species field always, hence eradicated as species in some countries due to magnifying the energy of killing very close to human animals at their 100 killings/year, or 1000 in 10 years vs 1 killing when they're painlessly euthanized, not to mention meat that can be used to feed starving people, though we never eat meat, but other countries do; lions can eat 110 lb meat when hungry; unlike advanced drones that create painless instant death, animals who run and are killed by lions pollute the planet a lot more*) *control or species eradication that inflicts pain, since it also has an effect on human entanglement field* – so we use the most advanced drones to guide animals to an area where we can encircle them and let them be happy until a painless death, using some darts, etc – since some animals only can exist in the wild by creating pain in other animals (sheep for example, that are very close to human species on a quantum level of molecular organization, while insects eaten by birds are not) at every meal, thus disturbing the human species and making us more violent and cruel. Thus, we support veganism, and all are *vegan*, since we found how to suplement the diet to get all we need, it reduces pollution of our country with the vibes of animal slaughter, notoriously cruel and polluting in many nations. We have also banned the lab cultured meat, since it uses tortured animals that die young and carry the quantum vibrations of that slaughter (early death) and disturb all humans eating molecular copies of those cells; only meat from the happiest animal who has died painlessly naturally, in old age, would be more acceptable (still very unhealthy, since it's not eterni food), but they don't use that. We normally don't realize that in our violent cultures, hence World Peace has not manifested yet. *Any* pain *inflicting on humans* (and to a much lesser

degree wild animals who inflict regular pain on livestock they prey on, etc) *is a* crime *against humanity (when not absolutely needed, not talking about 1 second vaccination small pain once a life) even in cases of 'trying to stress an organ of dad, hoping the sperm will have changes that make that organ stronger in offspring", because pain changes tone and leads to more conflict in subttle ways next million years, and* while that organ may be stronger, the psyche pollution of all human beings does way more damage and damages many organs later in future wars*: we don't save one organ to damage 1000 others long-term by damaging the collective human field, like we don't make a war that leads to 1000 others in 2 millennia: peace comes from peaceful methods ☺☺☺only, not war.*

Likewise, we support veganism and eterni food, as the torture of animals in factory farms ages humans via the entanglement that exists between tortured animals brains and humans due to similarity; when animals suffer when killed, they destroy all humans indirectly. The self-sufficiency ensures they get some needed physical exercise too, within the confines of the healing center – so they don't burden society with their violence and don't get sick from inactivity; they can take part in building peaceful art and techs to make eterni food a reality if interested in joining science projects; if we deem them safe, and having made a sincere huge contribution to immortalism, we can allow the best more freedom in supervised cities (very heavy screening, so we don't get sabotage in closed supervised cities, by those playing nice to destroy later, as MRI and other scanners can detect emotional content and level of anger still present etc), but we don't run torture and prisons like some nations, we're infinite love itself, not hate, infinite forgiveness, not revenge, infinite intelligence, not 'low IQ' (tortured people yield false, made up or changed info due to brain damage). Our healing centers are far nicer, than the nicest 'prison' in the non-Alliance countries and the standard of living is higher than in middle class of the 'free world' of many non-Alliance countries, they got meditation rooms, single studios/apartments for everyone, connection to the web of Immortalism (*only eterni music, tone and content, off-internet, a network of all healing centers content, to facilitate healing from the hate and negative energy of the world*) for developing the 10,000 qualities of Immortals, connection to 100s of research projects they can join, after finishing the daily chores needed to maintain this Paradise area, etc. if they like science and to advance Immortality *for* All. People say how can this be? ☺☺☺ Well, go on youtube and see how the best prisons in some Scandinavian countries were better living conditions 1 bed apartments than 75% of 'free' humanity lived in 2020. Now, imagine that in our world of the New Eterni Alliance, it's even more so, since we're creating a vibe that is free from historical inertia. To prevent abuse of our kindness (everyone would try come in to be 'arrested and sent to Paradise healing center to work 35 hours a week for a few years or decades' to live like a truly free person instead of the jail in the 'free cities' of their country in which 'free' citizens live) leading to world kindness

collapse (i.e. Alliance becoming chaotic), we also have a more immortalist immigration and visa system. *We don't send them back to their country if that nation still tortures and they're likely to be tortured, since we're infinite kindness for the human species. Other nations torture people in their homes, using invisible chemical, biological, microwave, sonar, radio, infrasound (Noise Health 2021;23(109):57-66) weapons and claim they're so good, a 'land of freedom, opportunity' (slow extermination, sleep deprivation, daily torture, that the world is not supposed to see).*☺☺

We want all to kindly stop torturing humans, yelling at them, etc as that creates a disturbance in the collective mind and quantum field of the human species that brings the whole human species down. *We're here to help all spy agencies, militaries reform themselves – so they can teach people the way of infinite kindness without torture, without using torture in training, simply informing in nurturing gentle ways what science shows about good and bad behavior, tone, etc.* We want to invite all to see that humanity can be like angelic Immortals, different than 'ancient men' who killed and tortured others (sometimes unfortunately, like some animals do). We can all evolve. We used to travel 8 mph, then 25 mph with horses, now we reach 250,000 mph, likewise, our kindness can become 10,000 times greater, wars, torture, violence 10,000 times less frequent, etc – it's an ethical evolution, not technological. We want to wish Immortality *for* All (i.e. no torture, no killings, no violence) to anyone interested only, not to force it on anyone; but we hope the aggressor country who fell into the fear trap will now (fear provokes attacks often), as war is over, consider joining the alliance, even if half of their territory is gone, gone to provide the Peace Alliance with buffer against future attacks if they occur – it's a neutral area owned by all countries of the alliance, an area that belongs to all humanity interested in *Living to a Trillion*☺ *in Peace*, so it's a free trade zone where economic development of Immortality technologies is the focus and neutrals can see what we're all about – giving Life Immortal to All, so they may more readily consider joining the Immortalist Alliance; 0 people died, and 3 soldiers got minor injuries (that healed within 1 month), not because of us, but due to their going against the shield when we told them not to – compare that with 2 million intentionally killed by others who took over a similar land area. Once again, we will never attack anyone first, we have better things to do, such as figuring how to live to 900 first at least. We see war as the "least kind, least loving, most hyena like" thing, so we always talk about peace, emotions, apologizing, humility, Immortality *for* All, gentleness, tenderness, forgiveness, *nurturing*, grace, we're One Gentle Kind Human Family of Immortalists, Brothers and Sisters who will act as One to Save humanity from all causes of death, even war itself. We want the peace loving people of the world, in any nation, to know we love them as *gently, infinitely, tenderly, as* Immortals*-like* as we can and we stand united with them, even if they're not allowed to join us as the Alliance of Peace, I apologize for my tears, I'm getting emotional now, as I feel the sorrow of all these people. Let us have hope in that world of Peace we all want and dream it though, we

need positivity, optimism and vitality to make Peace real for all interested. ☺☺☺ So help us God, if you exist, and Immortals of the future we will become at least, if they exist, via time travel, if no Immortal aliens exist to help us.

Let us have faith in a higher smarter group... or quantum reality, but not force any belief on anyone, we know lies get us nowhere, truth is self-evident, it requires no force, no forcing; truth flows freely, like the Tao, penetrating everywhere without effort, sustaining all worlds, due to it being the gentlest being there is. Please understand God or the Immortals *are infinite in their love and lifespan, so their Love for all beings is infinite, they love the worst human infinitely more than we love our best friend or our spouse, and so do we, so to prevent deaths we told the soldiers that we move the shield further up, to move away to prevent death, but not many agreed to it,* so only a few civilians (who for decades hoped to join) joined the Eternia free trade zone that is Alliance territory now, the rest we lifted and pushed back to the smaller half. *It's the loving hope, the holy wish, perhaps, the destiny or even the human right,* of all Immortality *for* All lovers, to unite and defend Freedom to Live in Peace and we will do our best to communicate in ever more loving ways the infinite compassion we have for *all nations*. We're fed up of wars and we want them to end, but some don't want to yet. We decided to stop spreading the shield too far, as some people of aggressor country may not be happy☺☺☺ to join us and we wanted minimal deaths, per our Immortalist code of ethics, and the half of the country we took had mostly fans of us and was not very inhabited (far less), with the rest being allowed to fly to aggressor left over country – we also are against forcing any way of life or belief on anyone, so we hope the leaders of aggressor country will appreciate we gave them life and freedom and *we could have taken the whole country and their closest ally with the shield but we did not, out of infinite loving kindness and wish to prevent more deaths* – we don't worship land and surface areas, but Life itself, we sanctify and deify life, not land possessions, we value helping all to reach longest lifespan. People may understand that we're the most prolife and antiwar Alliance the Earth ever had and after this briefest war in recent history, 3 days, we got dozens of countries to apply for membership into our Alliance, more probably later, of their own free will; perhaps due to the size of the Eternia free trade zone too; some may have thought we're crazy or poetic leaders. We take the highest care to prevent even one death of a civilian who may not move away from the shield fast due to being angry, so no civilians died due to the shield moving we used the most advanced telekinetic and teleportation technologies, to gently lift them without killing, unless they attack our equipment of lifting them (so they don't die) and the shield neutralizes them without us being able to stop it. No civilians died, but 2 were slightly injured by the aggressor country by their mistakes, as missiles were bounced back by the shield to their country, but we designed the shield so that any materials falling back fall in a new matter state near the border so only 2 civilians got a minor injury due to falling debris near

border, as border of shield area was free of civilians mostly; only 3 stubborn (aggressive) soldiers got minor injuries on their side due to getting too close to the shield and attacking our levitation machines as we tried to prevent their death by lifting them away from the shield. We spent trillions to make this debris fall be in small particles (80 microns max), so that nobody gets any injury except small stuff that heals in a few weeks or days if they happen to inhale some by accident (they would not, since it would be visible and they would try avoid it). So, unfortunately, people don't love | Immortality for All | sometimes. We're the 1st time in history a land of this size was acquired so fast with 0 civilian and soldier casualties. Thanks to our Ethos of Nonkilling. We're not here to talk about God much, but to discover how to be more Godly in action not talk, i.e. to grant Immortality to all, a life of freedom and infinite loving kindness.

We want *all to see how many trillions we spent to avoid 1 single death*; compare that with the usual 1-2 million soldier deaths in such border changes (due to using the loving kindness hologram and happiness methods near the shield, besides the loving kind shield and levitation, matter conversion etc). We spent basically about 10,000 times more $ than aggressor country who often caused huge civilian deaths and never even apologized in public about it. Some soldiers realized that and joined us, being part of the zone and dedicated Immortalists now. We kindly ask you to listen to our version of the events and then make your mind up, so we reach long lifespans faster, only 3 countries, who supplied direct assistance to aggressor country, did not express interest in joining the Alliance some day yet, but *we believe we can win everybody and bring* World Peace *in* a few *months*; 45% of the government in the 3 countries not interested yet in ending all wars by making our alliance the only military bloc on Earth, seem to be interested; the % is growing monthly. It's now humanity's chance to unite, so Immortality is everyone's chance." So, indeed, *after 1 year the planet achieved peace forever* until they had to evacuate due to Earth getting hot, enabling only soul projections to live in Earth bodies.☺☺☺

13.15. THE DOWNSIDES OF LIES

When people find out the lie, they will lose trust in us and the world will be filled with more conflict, paranoia, mistrust, lack of communication, and potentially even violence. Exactly like with threats, humans see the short-term benefits. The short-term prize is so tempting, so captivating, requiring so little effort, that the logic of lies seems irrefutable. However, from the point of view of 5 millennia effects, again, as with smiles, the results become wholly different. So, then what will people do? Eventually, people will become so kind, telepathic, empathic, that they will realize honesty achieves more over long-term than any lie. But that, as with threats, won't probably happen overnight. It will be many peer reviewed papers perhaps measuring effects that will convince scientists that honesty is better always. An honest person who has nothing to hide, has a totally different energy and success rate when trying to turn an enemy

into a friend, as no energy is used by the psyche to hide anything, and one is purely radiating the loving compassion and joy and helping the other party to heal, and to come to a place of total acceptance and healing, which is only possible when one accepts oneself as one is, without the need of masks, hiding and lies. One can't easily heal others and help them accept themselves as they are, unless one does that to self, unless one accepts oneself as one is without masks or lies. For person x to be able to dare to be honest, person z being honest increases the probability of x being honest, since x can pick subconsciously the tension within z to build a story, mask or lie at times. We imitate others unconsciously often, so if z is not honest, x will imitate and become, without knowing, hesitant themselves to be honest, to accept themselves. We may need a global agreement on honesty cultivation in education. ☺☺☺

One way to bring World Peace is to realize that many people would rather live in happiness and peace for 400 years, without fame, wealth, etc than live a short 80 year life full of fame, wealth and war. If an Immortal Being from another dimension doing 500 miracles in front of us asks "I can grant you only one of two wishes: 1) fight in human wars, become famous, wealthy and live to 100 maximum in the usual boring stressful life of humans today. 2) fight no war, work for peace, maybe bring World Peace via the ideas in this chapter, be unknown to posterity as one of the major World Peace bringers, average income and live to 400 in a life of happiness and divine ecstasy states 1 million times happier than orgasm. Which one do you choose?" Most would prefer 2). If the Angel appeared to a world leader and asked him "I can grant you only one of two wishes: 1) conquer some "inhabitable land" of 500 square miles, and start so much war and friction on Earth, leading to much slower longevity progress, with your country knowing you as the president because of which the average lifespan increased 1 year and who fell behind other countries who went off-planet, or ☺☺☺ 2) no island conquering, no war and tension, building peace with this chapter ideas and posterity knowing you as the president under which the average lifespan increased 20 years and technology advanced so much, maybe if enough virtue builds leading to discovering other planets and receiving a gift from the Universe, a planet with not 500 square miles but 50 million square miles of inhabitable land?". The confusion of many rulers in history is evident: they don't realize that if God exists God will only help the most peaceful country to discover and colonize such planets and expand their Civilization of Immortals. The more people ponder on the fact many soldiers even would not fight for some cheap island conquering or whatever, the easier it is to build a World Peace and nonkilling agreement desire in all countries. ☺☺☺ "Peace reigns in my world" is a good song to recall/bring peace; our world is the heaven of Immortals where peace reigns forever.

13.16. Stick versus carrot methods of "bringing World Peace"

For millions of years, like chimps and other primates, humans have engaged in various conflicts

and the unfortunate wars associated with them. Humans developed clever ways to employ stick and carrot methods to inspire or "force" real or perceived misbehaving people into doing nobler things. Among primates, the ☺ matriarchal bonobos who use the stick method far less are far more peaceful and far less violent (maybe the equivalent of 50 times less "violent crime" if humans) than chimps and gorillas who use the stick method a lot.☺☺☺ Even in human society we see an interesting dynamic: ☺☺☺ a parent (big country) is faced with a misbehaving kid (small or medium country), due to the lack of parental supervision or some bad influence of some other kid (country) or adult (superpower country). The parent can use 2 methods or something in between: the stick method or the carrot educational empathy compassion method. The stick is a threat to do something or doing something like restricting his favorite hobby access, even if it would be listening to peaceful music. Worse, some parents in some countries spank their kid (sort of like going to war with the small country) or whatever, which builds up anger and negative emotions in the kid and teaches the kid by living example that stick and violent methods are OK. The memory of that invasion (by the big country) or spanking is not easily erased from kid's memory. Kids and countries imitate *behavior, not words* of parents or countries. The kid (or a misbehaving country) ends up disliking or avoiding his parent (big country) maybe and their relationship dives into a distant one. Another parent (or competing superpower) is using the carrot method much more in similar situations, taking the more energy consuming path, of first taking a warm bath while listening to peaceful music, organizing one's thoughts and tone, finding the ☺most healing empathetic *nurturing*☺ way of communicating without criticizing the kid or inflicting any emotional pain or stress on the kid, but explaining the huge benefits of stopping the misbehavior and the huge suffering the misbehavior can cause to other kids like him or her or adults with some creative example. The kid is amazed by the kindness of his parent and the suffering he causes, and complies and the two remain friends and no negativity builds up, with the big country (parent) getting an eternal ally (the kid), best friend. The kid will then copy the parent and do the same to others, instead of copying the stick/threat, intimidation or violent methods, helping to bring World Peace if a country. Kids imitate their parents often. So when the big country is more careful, it can build much better relationships with the small or medium countries, leading to a much more ☺☺☺peaceful☺☺ planet or galaxy. A parent can't use carrot and stick method hybrids without side effects, can't make a threat and offer a benefit, as that cancels the value of empathetic compassion as the main motivation for human action and glorifies toughness and violence, leading to a world of war.

Exactly as humans are able now to send a letter a million times faster, in one second, from Beijing to London, instead of 2 weeks as in 1700, humans will be able to use the carrot method a million times more than the stick method and achieve World Peace a million times faster, reducing the time people suffer due to stick methods (torture, wars, etc) by a million times,

effectively wiping out wars and violence on Earth. What stops us? ☺☺☺ First, to use carrot more, we may need more communication, so we could take advantage of this 1 million times faster ability to communication than before, to communicate with all humans and countries about World Peace, and this is easier now as all will be online soon. Initially if you told someone we will fly 1000 times faster with the space station than a human can run, they would think you're hallucianting, just as they would say if we said in 30 years we can have 1000 or a million times less war and violence if we really decided by international agreement this is indeed doable. Computers today are a billion times more powerful than 200 years ago, why could not our ability to bring global peace in 3 months be a billion times more effective now than 200 years ago? The main obstacles seem to include the historical inertia and the nature of the human mind, many are afraid of trying new things, why try "carrot methods" instead of the "always" (short-term only, perhaps never long term) working "stick method"? "After all, countries are not like kids and superpowers not like parents"; but is the hypothesis "countries are not like kids" really true? Countries are made of 2 day old babies compared to immortals, babies we call adult humans. Whatever hypothesis we may lean towards, perhaps we can consider like a neutral scientist without preconceived biases the possibility that more carrot methods and fewer stick methods could triple human lifespan 100 times or 10 times faster. ☺☺

One reason human adults (living 2 days compared to an Immortal) don't care about long-term, is because they won't live to see the effects in 100 or 30,000 years. Thus, because of that, humans are far more prone to use stick methods that "use far less energy, inner self-transformation effort, and often seem to work in the short term". However, we could hypothesize that as humans live longer and longer, they will shift towards the carrot methods as the side effects of stick methods (canceling out benefits in the short term) will become more apparent. Many are atheists who don't believe in any life after physical death or in caring about kindness for future generations, so the moral imperative or selfish incentive to care about the future is nonexistent, as no raise or social recognition from present peers is given for such lofty idealistic behavior of caring about one's country's or one's planet's future 900 or 40,000 years from now. Yet, if one is a true skeptic and scientist, one can't be 100% sure afterlife doesn't exist. ☺☺

Even if a person would think there is no afterlife, they can easily accept that just as humans know more than monkeys, mice and ants, there may be beings out there, in this or other dimensions, made of this or other types of matter (unknown to us), who're more "advanced". If a mouse or monkey tries to explain to a mouse or monkey algebra or biochemistry, it can't, no matter how hard they try to channel *the Holy Immortality Spirit* of Algebraic Knowledge of Humans, because mice/chimps don't have the language, writing complexity of humans. Likewise, when we present day humans would try to explain to present day humans a science that doesn't exist in present human civilization, such as the science of peace making and

maintenance without “negativity, negative feelings, insults, unetern i tone of ‘speech, feeling, thinking’, war, violence, torture, threat, intimidation, lies”, we would be unable to do so, as we lack the sophisticated language (and understanding stemming from that language) of “future humans or hypothetical aliens” who're more intelligent than humans by the same factor humans are more intelligent than chimps.☺☺☺ Skeptics will say this is all a nice imagination exercise, but it’s just a theory. We thought Earth is the center of the universe, and many today believe humans are the pinnacle or center of universal intelligence. But this belief is not necessarily true, even if it won’t be proven false maybe for eons. Leaving aside the alien comparison, if we would time travel and visit our planet 30,000 years ago and try to teach those people fast how to do what we can do today, it would be impossible, as they don’t have the science and the education, labs infrastructure to understand the much more complex language of the science literature today versus Neolithic language, etc. Initially they would think we're Gods, able to do these amazing & beautiful ☺☺☺ things, just as we today would think of humans of the future as Gods if they can achieve all peace without any negative method. A person from year 1800 can understand that “all humans in 2015 will be able to see on a device everyone owns the images another human sees in his location on another continent”, but he would be unable to detail the millions of science papers, labs, enterprises, infrastructure that made that cell phone device possible. Likewise, a person from year 2015 is able to understand that in year 2200 humans will be able to feel via a device everything another human feels in another location (not just what his eyes see), so this will herald an era of empathy that will remove 99% of conflict stemming from people not understanding how other people feel about an idea, and a world of compassion where there is no violence and war”, even if we can't explain the millions of papers, labs, enterprises, infrastructure that made that future cell phone possible, the phone that brought World Peace, a world where everyone is shown on the phone by artificial intelligence calculations if the thought, action, speech tone/content he's considering implementing will cause higher average lifespan for nearby (relatives and friends) or all humans or more/less happiness for all”, allowing everyone to make more science based decisions instead of whim based decisions of unaware chimps fighting and killing each other forever. Why do people and chimps fight? Many times because we have NO *IDEA what others feel, because others hide their emotions so well or try to be polite and not explain how horrible what “we just said” made them feel. A little argument here and there in each family creates a global tension when added up that leads to wars very rapidly, as the chain reaction of cruelty escalates to gigantic proportions.* One can see how our lack of neuroscience knowledge shortens lifespans as trillions are devoted to shortening others’ lifespan and killing instead of doubling everyone’s lifespan. This is similar to the way the *lack of* sanitation*, sewers, showering facilities and other principles led to much shorter* lifespan. We can tell humans in the future will discover many ways, besides this imaginary cell phone way, to achieve a world without terror, threats, torture, violence, war,

even if *we don't know exactly the sciences and ways it's done.* ☺☺☺

When 2 future people are married and this *"feel what my words made you feel" option is turned on their phones, they would be able to be a happy couple a million times easier, lowering divorce rate a million fold. The Immortality Nurturing Agency can detect* when a human suffers anywhere on Earth, *using* quantum tech for *places without phones or this phone tech and deploy the* Immortality *Healers (*Cosmic Police *to defend* Immortality *for* All*, end terror by thugs,* torture of 1 minute in the future era is equivalent to murder in our world) *there, who can see if* anyone is intentionally tortured using gadgets by spies/soldiers and "jail" those guys in a healing center away from civilization *for the rest of their lives, self-sustaining oasis* (grow, cook own food, etc, maintain buildings, experience self-mastery, no longer have slaves you torture like a brute to provide you with everything), with every emotion and intent measured and anything evil causing alert and new educational video to watch with headphones on to change violent psychopathic *(well, that's 10+ million people today, as satanism rules, the* violent "holy" bible *vibe, in spy agencies, police, militaries who torture, excluding the gangs and bad families extra 20+ million)* brain tendencies ☺☺☺. The same lowering of tension could happen in any workplace if "feel what my words made you feel" (turns on after/when speaking with someone, not all the time, as everyone would be exhausted, overwhelmed, dysfunctional to feel everyone's feelings all day) is enabled due to a situation or voluntarily for maximum happiness and minimal tension. Additionally, the cell phone can explain in much depth what the other person means by some verbal thought or speech in a much more detailed context that would take 45 minutes to explain verbally, but takes 3 seconds non-verbally to relate by the cell phone. This would remove a lot of fights which are 100% due to misunderstanding of meaning. One person says something, we hear something completely different due to different context assigning. Imagine if when watching news about a war zone or bad neighborhood with violence in it, you can zoom in with your eyes on a person or tap on that person, and feel what they feel as missiles and projectiles go around their area, as their house is brought to pieces and town is wiped off the map. For most, who have never fought and had their native house (they worked 30 years to build) and town erased, it brings a first time realization of what war or neighborhood violence is, since one gets first person emotional perspective, not third person by stander in safe area 3 continents away in a peaceful town, so it looks 90,000 times more horrific than video alone, as it feels it is happening to YOU, not to a group of people whose religion, nationality, beliefs, location, likes you don't share. It's feelings many people have never experienced, that will wake them up to what war does (even to people whose houses and town are not wiped off the map) and make them a lot more into World Peace and this book's ideas than they're now. For the first time in history, people would feel what others do, others whom they have never heard of perhaps or cared much or at all about. This will make everyone more compassionate

and make the world experience more peace. ☺☺☺

The generals/cops planning a "peace building, violent crime lowering by 50 million fold, operation using peaceful methods only" in a room have no idea about how their action will make billions of people feel. But by running AI simulations of 50 methods of peace bringing, they can see & FEEL that the least negative method brings the highest lifespan long-term and joy, least pain to all planetary inhabitants (cumulative decreases and increases in each scenario added up), so they can choose that via scientific evidence, not out of confirmation bias or historical inertia. Using quanta, as explained above, they can see as the operation proceeds and adjust accordingly, to minimize negative emotion and quantum field pollution that leads to more crime elsewhere as a side effect, canceling the operation effectiveness. Imagine a general trying 100 intervention scenarios, feeling what the planetary collective feels on average as a result of each and comparing. Imagine if all military colleges would teach that the purpose of "peace bringing or temporary 'military' intervention" is to bring peace permanently, while extending healthy lifespan and maximizing happiness of all. Both sides of a conflict would be able to feel via simulations what the "healing bliss operation" does, how negative the individual experience would be (making the military leaders unable to function for days as they recover from the emotional simulation effects), and become thus more motivated to achieve a diplomatic solution instead of war, violence. But this doesn't happen because people often don't care about how others feel, since it's been humanity's habit of eons to call "war" "war" and not worry about feelings. The AI can also predict how the general would feel himself 1 year after one of 100 forms of peaceful or violent interventions occurred. Everyone agrees that in today's world, an army that has just some Neolithic tools or swords doesn't have an edge or some superior force, since other people have nukes or explosives, etc. Some even agree that giving soldiers Neolithic tools, sticks or swords to carry is ineffective in "peace making missions". Thus, we don't see today armies equipping men with sticks, etc... But if we go back in time, and talk to people from 900 or 5,000 years ago, they would think swords are effective. Likewise, the people today have a hard time in realizing the negative methods of "peace bringing"☺☺☺ or "outcome bringing" today, which involve "torture, wars, etc" are like swords (that is ineffective, especially long-term, for creating a Civilization of Immortals), from the point of view of the future 150 or 900 year old humans who have been able to replace all such negative methods with *universal* loving kindness healing gentleness tenderness softness dialog, communication, empathy, and all kinds of pain-free methods of solving disputes and major or minor disagreements. Nobody would have thought in 1700 that in 2015 people would have cell phones and send letters in 1 second, 1 million times faster than 2 weeks, from one corner of the world to another. Likewise, nobody in militaries globally imagines today that in some near future *there will be no war and no pain or harm inflicted by any human on another human (intentionally),* since all negative

methods will be decreased by 1 billion times at least initially, since the end result is achieved 1 billion times faster via positive methods. ☺☺☺

Many so called "truths" of psychological science and the science of "war, terror, torture, coercion, intimidation" *are as solid as the alchemical knowledge of mages from thousands or hundreds of years ago before the chemistry era* or as unproven and vague as the conclusions of many "nutrition studies" with 0.1 million confounding factors not accounted for; the reason they appear true is confirmation bias; for example, alchemists noticed an *effect*: when people ate some plants they died, but today they know it's not the plant, but usually only 0.01% of the plant or even less; likewise, police and militaries worldwide notice an *effect*, but it's not caused by the negative method, but by 0.01% of something going on; moreover, they don't see long-term effects, only short-term, as they can't quantify the side effects of the violence that enters the mass consciousness field when negative methods are employed, side effects which over centuries might undo all good in the short term ("getting rid of some people who would have killed many more" appears good short-term, but long-term that negative method cancels out all good). Additionally, alchemists were often very wrong and ate poisons that shortened their lifespan; in the exact same way in recent decades or centuries, military leaders and police chiefs employed methods that did not benefit their country/city long-term or the world, even if in the short term it seemed OK or good; sometimes, even in the short term it turned out to be bad. Of course, anyone can agree today's knowledge (in any field, including peace making) is not the knowledge of the people from millennia in the future, so nothing new was actually said above. The disagreement lies in how much this realization is motivating people to consider creating by international agreements a planet that employs no "terror, torture, killing, war, any pain causing harm, negative methods" against fellow humans. ☺☺☺

13.17. War, violence, threats, intimidation, coercion are useless and slow progress

If we travel to some periods from 1 century or 1000 centuries before, and try to explain to those less aware or primitive people that they don't need to fight and kill other people to get enough food or land for their own group (since the planet is way bigger than their little area their tribe has and there are new methods of food production, etc and the peaceful and civilized will peacefully convince the more aggressive and expand the peaceful civilization of their group), they would believe we're liars and maybe "posessed by bad spirits". But today, with ten to a million times more people than in such past periods, spread over 10-50 times the area, we can see how human hypothesis formulation and testing, thru the wonders of science and gentle inquiry and study of nature, enabled us to feed and house a million times more people, which ancient people would have thought impossible. ☺☺☺ We can feed and house a million times more people today not because of the animal like (who attacks a prey) killing of others, but due

to the gentle tranquil meditative inquiry and hypothesis formulation and testing leading to amazing & beautiful ☺☺☺ inventions of science that made life possible in otherwise very hostile environments and also to some well-mannered civilized gentle tender people who were diplomatic and came up with trade as a solution to certain scarce resources, instead of war. Likewise today, if we try to explain to top military leaders that there is no need to have any violence and war to expand their civilization and their progress, they will say "our country will never be able to go into space, or other dimensions, and terraform 40 planets or create 50 parallel Earths, so we're going to make wars on earth" and other things like that. The food or land that they wanted to get a hold of are useless today with certain technologies, but this was hard for them to imagine. ☺☺☺But those wars they waged to plunder resources and impose beliefs by force led to an enormous slowing down of progress for their "country", as instead of developing neocortex and higher thinking and doing science, they were always in fight-flight-paranoia mode seeking to annihilate their self-created enemies. Many times in history, one side starts the war, and they do that by choosing to create an enemy, where none exists, the enemy just having a resource they ERRONEOUSLY (as history of science proves) believe they need no matter what. ☺☺☺ That war then leads to another 9,000 wars on the continent thru a cascade of events, delaying the progress of the human collective by quarter a million years as everyone is busy fighting with swords when by now they could have been civilized and exploring other galaxies. The country that started it all could have been in space on 500 planets in 10,000 years instead of sword fighting their neighbors for 50,000 years for stealing some food they could have planted in their home country (*today, with vertical farms and veganism, renewable energy, solar powered morning fog into irrigation without pipelines, desalinization plants,* any country can be self-sufficient). ☺☺ But perhaps this is the law of karma so to speak, those who stoop so low to kill by weapons (for a little water, resource they can get in an alternative way by nice discoveries or asking or trade, etc) often times remain in that stage for eons, as we humans did. ☺☺☺

Ancient people thought that swords are the only way to defend, but it was not always so (or ever, people just did not know the words and tone to use, due to limited intellect and emotional development, to turn around any situation, hence to bring lasting peace, we need more creativity and kindness? See the ideas of the immortalists); an angelic tone and infinite love from many, doubled with infinite patience, would have transformed the invaders and enabled the small conquered country's ideas (not people) to even take over the empire sort of (inspire by living example, co-manage the empire with those who follow the way of Immortality and make the violent empire a peaceful one, the world's savior) – but people lack that infinite universal compassion, so they resort to 'yelling, violence, killing'. See the Infinite Knowledge section. We could hypothesize that wars happen due to the fear and paranoia that runs thru our genes from our ape and mammal past, which lends us a very scarcity like mode of thinking where the belief

(like a collective hallucination or illusion) that "war has to happen for peace to arrive" becomes the accepted and then remanifested collective reality. Animals outumbered us when we emerged from apes, if that's how we came to be, and their mode (kill) of thinking impressed heavily on us. But now with science we see how unlike animals, humans can extend their lifespan and build a world of Immortals without needing to kill any human or animals or even plants some day (when agriculture is obsolete and new methods exist that are far cheaper and eco-friendly), where nobody ever thinks of harming another human Immortal, and all work to extend lifespan from 90 to 500, then from 7,000 to 90,000 etc. 500+ of mammal species never kill their own, why do humans then do that if humans have the technological means to create a Civilization of Immortals? It's historical inertia perhaps and we can cancel its influence via new scientific discoveries, a gentler culture and more tenderness. Fear runs our civilization, fear grips the brains of many people and they sometimes repeat history over and over, almost like "never" learning from history. ☺☺ We're terribly afraid of the unknown, of change, so are the leaders of countries and policies, and moving away from the old is frightening, how can a world with ☺ no war, no ☺ violent sports, ☺ no martial arts, ☺ no boxing, no shouting ☺☺ exist they wonder? Aware of this, we're filled with compassion,☺ understanding and patience, and work towards a more peaceful future, where overt or covert war or violence are no more. Likewise, countries often spend eons to try to convert another group of people to an ideology or religion, when in that time they could discover new science, so amazing & beautiful ☺☺☺, they would immediately realize the beliefs they tried to force on others were completely false too and they wasted 30 centuries with useless wars, delaying their building of a world of Immortals. Perhaps truth is self-evident evolving complexity, when true, needing no force to be arrived at; force only is needed to keep a lie alive, only works temporarily, since lies can't withstand eternal truth and the passing of eons? Is truth perhaps Grace, Gentleness, Tenderness, Sweetness? ☺☺☺

Today, every country, using solar panels, wind, hydro, water from air, desalinization, etc can be self-sufficient, especially since veganism can feed 10 times more people and 50 times with Eterni Foods of no agriculture of the far future. Yet, people war for material things they don't need to live to 300 in peace. Torture, negative methods, *wars* have no winners, they delay the Civilization of Immortals by eons. All *lose in a war*; some lose their life, so they lose everything, 100 times more than the little things they would lose by kind compromising for peace and Immortality *for* All . People are ilogical, risking losing everything for a little thing, as with dangerous sports, swims near sharks, wars. The ☺hero☺ is not he who deceives or who kills/tortures, but he who prevents all *killings* and brings peace without any violence, threats, lies, intimidation, but using loving kindness, universal compassion, gentle tender healing *nurturing* grace. Killing/torturing even 1 person 1 minute is the "least wise/smart" thing because it increases dramatically the chance of being killed oneself, and can start a cycle of violence that

kills a trillion, slowing down arrival of the Civilization of Immortals by 5 billion years. ☺☺☺

Almost every 15 year old will understand this, but many 70 year olds don't: if you spend a lot of time destroying enemies, you become an expert at such destructive lifespan shortening methods, which are *way easier* than constructive lifespan extending methods. Takes 100 years (*3.2* billion *seconds*) to *build* something big, *1 second to demolish it*. The time lost in destroying enemies, can't be used to help self and allies to increase lifespan. There are two ways of thinking: 1. destroy all "enemies" (helpless brainwashed humans) or 2. help the noblest more (extend their lifespan, so they develop nonkilling defense methods, and discover new ways to turn enemies into *friends of a trillion year living humanity*), while not killing enemies. The "destroy enemies" has been the number one mindset in popularity on Earth, taking all time from lifespan extension to lifespan shortening. The karmic, physics or logical consequence of that is obvious, we live to 100 max, as millennia ago; *forgetting* God's infinite *gentle tender soft* loving kindness comes at a price ► short lifespans FOREVER. ☺☺☺

13.18. Science increased letter sending speed a million times in 200 years, and even lifespan shortening capacity 1 million times in 50 years. Why not increase lifespan adding capacity a million times too?

People often times are pessimistic (due to historical inertia and history classes), and forgetful of how much human science can progress when enough dedication exists.☺ Unfortunately, people are often a thousand times more dedicated to creating destructive weapons, that wipe out 20,000 people in 1 second, or about 1 million lifespan years vanished in a second, than to creating creative healing technologies, a mist or some kind of "bomb" that once dropped would double the lifespan of everyone, adding 1 million lifespan years and make them very peaceful too perhaps as amazed at this divine grace. They don't seem to realize that exactly as human beings have gone, thru scientific dedication, from the capacity to destroy just a few people (19th century) to a few million (thermonuclear just 50 years later), i.e. to remove 1 million times more lifespan years, they could achieve, thru scientific dedication, in 50 years from today, the ability to extend human life 1 million times stronger. ☺☺☺ If we look at our culture, we're hardly pressed to see one video game or movie, book, etc where some noble civilization deploys an airplane that drops a mist or something over a city, enabling everyone to live double their lifespan or maybe 1000 times longer, and to bring peace. This simply doesn't cross our minds often, because we behave unconsciously as history imitators. Today we can accept reverse engineering things, we can accept that as humans can take out about 5,000 billion lifespan years thru current technology (wipe out 10 times the world population easily), we can by other technology or "bombs of Immortality dust" if we wish to use a metaphor, help every living human being live 10 times longer, i.e. add (not subtract), 5,000 billion lifespan years. Why are

we so biased to only perceive as possible to make scientific progress in 50 years to only subtract lifespan years from human beings a million times faster and stronger, instead of also the other way? Why aren't we giving Nobel Peace Prizes to people who want to invent a nanodust or eternifood that helps all people "bombed" that way to live 10 or 100 times longer? Some people are extremely easy to be duped: they would easily subtract lifespan years of "other humans" in wars, forgetting that those "other humans" and the *million times more negatively affected by the war* could have spent this "war" time to make the invention that would have enabled everyone, even the "guys busy starting wars and shortening in various ways the lifespan of other humans" to live to 200 or 500. We only need to discover a tech to double lifespan every few decades to enable everyone to make it to very long ages. Yet, nobody seems to realize that the moment they agree to go to war and wipe out other humans, partially or entirely, they wipe out themselves, the chance they had to live longer, if they created a world where instead of millions "trying to shorten everyone's lifespan" everyone tries to lengthen everyone's lifespan.☺

Because of scientific lack of understanding, of how much science can improve human condition, people become very self-centered and pessimistic, and if they don't believe in afterlife or some form of God, they fail to gather any strong motivation to build a peaceful world for this or future generations. One time people used to travel with chariots, today we use cars. Why is it so hard to imagine a world where there are no more wars or violence among humans? It's a new understanding that enabled moving beyond chariots as a way of transport, and a new way of understanding that can enable humans to move beyond war/violence/lifespan shortening (via threats, harassing other nations, etc) as a way to solve disputes among them. ☺☺☺This new way is more optimistic, it's based on the wonders of science which enabled us to do things we have never done before. We were able thru science, in just 80 years, to travel 900 times faster, at 17,000 miles an hour via ISS instead of 25 for a human runner. We were able to send a letter in 1 second (or much less today via email) not 4 weeks, in about 150 years, a million times faster. Why can't we thru science in just a few decades, figure out how to achieve a world with a million times less wars, violence and aging speed? We increased destructive power of our tech 1 million times, but we have not even tried to increase its creative power 1000 times. We have technologies to instantly (seconds) obliterate 1 billion lifespan years in any big city, but we have no tech to add a fraction of that 1 billion lifespan years, even in months, let alone seconds. We can build houses now in 2 days with 3D printing and new modular techs, it used to take years, why is it so hard to imagine we can build a world without any war and violence, where we put "humanity first in its entirety, with nobody being wiped out in any covert or overt means"? We see other people and think that they're different, but shortening their lifespan shortens everyone's lifespan indirectly, yet we keep repeating this pattern each century, and our lifespan has remained pretty much the same, living to 100 maximum for most (just like millennia ago),

usually 80. It's an illusion to think one gains by wiping out others. The moment a war starts, everyone loses, especially those who start the war (who raise the stakes enormously against them, by increasing anger of the attacked against them) because the war affects billions of people (who no longer work as one to discover that tech that triples everyone's lifespan). War or violence bring pessimism, fear, paranoia, selfish jungle behavior worldwide fast, all forget lofty ideals. War brings the very worst in humans and ends any hope of long-lived civilization to ever emerge among us humans. ☺ This goes back to the previous section ideas. ☺☺☺

It is mind blowing, how easy it is, for millions of people to be convinced that some "country is bad" and to go in full force starting a war that delays science progress by centuries, as everyone spends time to react to that war and heal from it. This may be precisely because our culture, music, etc don't have any strong focus on nonviolence, the very idea that "shortening others' lifespan shortens yours" doesn't register in their mind. Some people are so selfish (due to the illusion of not realizing others' lifespan relates and equates with one's own lifespan and health) and confident of their 'knowledge that they can't live to 200 (or slow down aging of everyone in 30 years, enabling everyone to live another 100 years or more) by any invention those 'bad people (they need to wipe out) can help them discover'", that, since "afterlife for sure doesn't exist and humans are the smartest species in the universe", there is no point, for any self-interest reason even, to care about the immense suffering of billions of people destroyed by every little war or single act of violence. Many don't give it a thought, so this type of thinking will end up badly, if in a million years we encounter some aliens who're way more advanced (technology to shorten lifespan, not to lengthen lifespan; technologically, not spiritually) than us and we attack them and they wipe us out by accident or out of caution or fear. But, many people are too stressed or preoccupied with the latest sports games, lotteries, liquor/vape stores sales to worry about living to 150, the end of human species or the suffering of billions of humans as a result of every single act of covert lifespan shortening or overt ones, like open violence or war.

What is the chance this type of idealistic thinking will replace the hypotheses or beliefs people operate on? I don't know, but this is the 1st time in history where we can reach all humanity via media and internet instantly, so it's the first time when peace desire and longevity ethics can be coordinated and created at every level. Instant communication was given to us by science or hypothesis formulation and testing, not by unquestioned beliefs Paleolithic men might have had or we still have from them. Leaders are gripped with fear, so they create wars to wipe out enemies, due to not believing they have the capacity to transform those "enemies" into friends who work for everyone's lifespan doubling. Sadly, negative beliefs create negative futures, so the negative thinking creates short lives: wars start and everyone loses in the long run, no winners exist. If people set their goal to 100 mph speed, that's what they achieve, but with 17,000 mph speed, they achieve that.☺☺ Our goals are so paltry in every nation when it comes

to ending violence in all its forms, our achievements only reflect that scarcity of vision. To even propose World Peace in 3 months or so, would be thought of as wishful thinking.

13.19. Infinity and Immortality remove all *war incentives*

Today all small medium nations can form 10-20 regional unions, to help them all be self-sufficient in resources and avoid any wars among themselves over resources, by creating a common identity or new nation, just like EU nations formed EU, which is as a whole smaller than USA. By realizing that religions were made up by spies, all religion wars end too and everyone is happy. This is the quickest way to World Peace. This helps nations without sea-ocean access to get water by desalinization. Today, solar panels allow any land locked nation to use morning fog to produce irrigation for crops. Nobody needs glaciers and rivers if you got desalinization plants, so wars over water in rivers has no meaning. Unlike animals, we realize, thanks to 20th century science, that there is infinite space, land, resources for all *nations* in outer space and food here (by recycling, *vegan* vertical farms, water lentils (duckweed) (ω3:6 ratio 2:1)), without war or need to kill anyone, but with advantages in helping one another to triple lifespan forever, with infinite time to develop infinite gentle soft tender kindness for all humans. We realize that every nation, using water from oceans, seas, etc can produce unlimited fuel, "oil", from water and CO_2 using sunlight, and that wars over oil or etc are not needed. We realize that the longest living people on Earth, Singapore, (since Monaco is a old 56 average age rich people town of 37000 living to 89) live with a population density of 8502 people/km^2, which is 1000 times more than Russia with 8.4 people/km^2, yet Russia wants more land from Georgia, Moldova, Ukraine, while their Russian citizens live to 72 on average, or 15 years less. Likewise, advanced humans in Singapore could easily live to a trillion, while violent thugs in Russia still live to 72. Knowledge and ethics give life, not land size. Eternal Life which is born only of *gentle tender soft nurturing* graceful *universal* loving kindness, not torture and theft of land by genocide: see Aussie colony. Americans live to 81 on average as trillions are wasted on bombing other nations into the stone age for more than a century, even if they got 37 people/km^2. We realize that if we had the tech, all people today could live to 9 billion no matter how dense the population is or is not, we realize that if we try get more land per capita via war, torture, violence, we postpone this era of long happy lifespans and may still live to 200 in a million years, as all we do is fight like baboons. Why do people need wars for? It's pure insanity. Singapore fought no wars, sent no weapons to others and they live the longest, it shows what is wrong with so many nations busy exporting weapons. Hong Kong lives longer than most nations, to 84 on average in 2024, even if many people live in ghetto apartments of 55 square feet, (British gift to Cantonese Chinese?) meaning 10 times smaller than the 550 sq ft of a 1 bedroom apartment. With science one doesn't need any resources, since all is made from raw atoms, from earth, dirt, infinitely available to all.☺☺☺

Eventually all will figure out how to live to a trillion years old and if we spend 100 times more energy in researching longevity, instead of 99% of human energy spent with spying and warfare, we will get there 100 times faster. A few extra tons of a given material or land won't get any nation immortality, only eternal war if these are stolen by war. There are trillions of techs to turn any dirt into the food that makes everyone in any nation live to a trillion. The human chimp will evolve to be a human and realize: every nation has the electrons, protons, neutrons, particles needed to grant all its citizens Eternal Immortality, Trillion Year Lifespans. The only Obstacle to that is the lack of Knowledge, Ethics, Anthem, not some materials, lands and goods they covet from other nations they want to invade, subjugate or slaughter. Knowledge of Immortality is arrived at via the Ethics of Immortality for All, embodied at all levels of a society, via the 11 companies and the Immortality Credit Score. No nation needs anything if that nation has virtue, ethics, dedication to science and knowledge of longevity gained via the scientific method, via ethical publishing. War and killing only delay the advent of trillion year lifespans for anyone, so no intelligent person starts a war. A war is the lazy man's rejection of science due to wrongly thinking that the only way to an outcome is a material. In reality, trillions of ways exist to million trillion year lifespans without that material, to Immortality. There is no need to murder millions to get it, as that destroys the human quantum field. This is the aristoc-rat mindset, of a rat, whose IQ is hardly above that of a mouse. The aristocratic elites of all nations have the IQ of bipedal rats, known for their cannibalism. They are not dedicated to nonkilling, nontorture, noninjury, to ethics, to kindness, only to murder, force, hooliganism, deception, torture, killings, robbery by genocide. Until the human chimp evolves past baboon stage, nothing can be done. This book aids in that development. God save the chimps. ☺☺☺

Perhaps, we can say the history of our "probable evolution from chimps" led to brains that are geared towards fear, violence and paranoia, so it may take 1-2 years to offload such "tiger-chimp thinking" software by changing the culture. Today's tech is a billion times more powerful, we can calculate things a billion times faster, we can overcome historical inertial chimp aggression tendencies in years, not millions of years it took to create them via "cultures born out of misperception of food and land as finite" that led to "eternal" warfare. Any disagreement over how to triple lifespan can be solved peacefully, in a win-win way that triples human lifespan ad infinitum, reaching billions of years. There is no need to conquer more land, change borders, torture, enslave others; on the contrary, these things only slow down the progress of all groups involved in this all consuming fight, as then almost every scientific big effort is employed to make better overt/covert war systems, instead of to make us live to a million years old (800 first maybe) or expand in outer space or build new dimensions or expand in inner space via dimensional transfer if it were possible. ☺☺☺ Together, *all nations* achieve 500 year lifespan possibly 1 million times faster than by war. A bright amazing & beautiful ☺☺☺ future awaits us

all, when we aim to be nonviolent, with gentle music healing and transforming into loving kindness our “chimp DNA” aggression, with nurturing grace tones of speech and intent, until we become Immortal Energy Beings living to 7 trillion years old.☺☺☺

For eons, humans have used violence, war, threat, intimidation, coercion, enslavement, etc to try to bring peace and a civilization of long lived people (some dreamed of Immortality even millennia ago), yet it never worked. If millions of people tried that, who joined militaries, spy agencies, etc how can an individual think (with confidence) that *he* (***the intergalactic expert on peace who saw 3 billion civilizations rise and fall?***) is going to bring permanent peace and amazing & beautiful ☺☺☺ lifespans using the same *failed* methods of millions before him, deceit/cruelty? The world is awash in weapon devices, how can one guy, who is ***smart and humble, honest*** and kind, think that one similar extra device will bring peace if 500 trillion devices (almost identical to his in function, some even shape) before did not? People think they're guided by God or human frail incorrect science if atheist, that they know best who is good and who is bad and who deserves to live and not live, and use this excuse to kill one “last bad guy”, because this is the “last war”, without trying seriously healing, loving kindness, trust building, etc methods described in this and thousands of other books. He justifies his act of violence as preventing a greater evil, becomes very prideful that he killed one “bad” guy (who may not have killed anyone if soft method was applied genuinely), but creates an even greater evil or equal evil without realizing due to the side effects of the chain reaction that starts from that violent act, but the result is not in his lifetime maybe, so he can't see it. The soft healing method, the reaching out for peace would create conditions for future bad guys to not do bad things, even if for that one guy it may have failed. The beginning of a big change (from hard to soft power) is often times the most difficult step. He thinks he's a guru/expert of the “Divinity or the Psychological Science if Atheist” (so called predictive behavior models) who decides who is holier and better than others and deserves to live and who is to be exterminated, enslaved or killed. This type of thinking, lacking any humility, playing God, inherently brings eternal warfare. It's the equivalent of people trying to use the same method of delivering a letter (that takes weeks by boat, horses, etc in ancient times) and hoping the speed (of peace/longevity bringing) increases 1 billion times (today by email). It took centuries to develop science thru humility, hypothesis thinking and formulation, discover the Internet and send that letter 1 billion times faster via email. It’s sort of like telling a cave man to achieve the speed of a 17,000 mph rocket using a cart, chariot or his legs, same method of millions of years. It's not possible, we need a new understanding, a new science, and we can easily hypothesize, a science of peace free from torture, pressure, cruelty, meanness and any violence. If we want to call ourselves human and civilized, fans of spirituality, we can easily argue that we can't accept as ethical any killing, torture and violence, overt or covert. But how often do we hear this from a preacher? ☺ Almost

never, instead, we hear them glorifying defending the country thru wars. This preaching seems to be due to our past as chimps fighting over *food and land, without realizing they're infinite*. Perhaps this chimp thinking is clouding the soul when it tries to evolve beyond the primate thinking, and ennoble the human form towards living to 150, later 900 or 80,000 much later in peace, changing its DNA and way of life, so we can manifest a peaceful civilization ready to become a Civilization of Immortals, which is not some " peaceful world that always will happen after a few centuries after we wipe out some bad guys", but can happen in 3 months. ☺☺☺

Infinite Resource Realization causes EVOLUTIONARY DIVERGENCE: A New Species Emerging

Cannibal chimps eat the kids of nearby chimps, with shocking frequency. Out of these chimps the peaceful chimps emerged that later became humans, who still engage in cannibalism in some tribes. However, most humans are past that level, preferring to do cannibalism in covert ways of war, slow genocide, extermination, etc, as shown in the 1000 genocides caused by the Jewish Bible. Most humans are inherently cannibalistic in their behavior, by supporting eternal violence and war due to the hyper violent scriptures and ideologies. Spy agencies focus on win-lose, how to steal something from others, the first place in this and that, the land, the resources, they never aim for how to make all Immortal, WIN-WIN of all nations. But a new species may emerge, like humans our of chimps. These clowns in power fail to get it, Singapore lives 15 years longer than Russia even if having 8000 times less land per capita. Fights over land continue unabated, as if these ☺abysmal IQ☺ folks have remained at the level of cannibal chimps. As such Earth is a field of eternal genocide. Every radio, TV station bombards us daily with images of war and ideas of Win-Lose, let's kill to steal, killing, wars are good, kill more, build more boxing gyms and UFC to train to hurt other humans, WIN-WIN is not possible to be expressed every 20 min on radio-TV as chimps rule the planet and their death worship is unchallenged, nobody dares to say "Immortality *for* All, TRILLION YEAR LIFESPAN FOR ALL IS POSSIBLE" every 20 minutes on TV-radio. It's a prison planet where a Cult of Death, Lynching and Violence has taken over and no alternative thought is allowed. We're not even talking about the hyper violent music lyrics and tone, totally against trillion year lifespan for all. In this infernal madness, realizing most humans are no different than wild beasts, a nonviolent species is emerging, that may diverge by moving off planet secretly. We live on a prison planet, where the news is always about war, we never hear any honest religious leader either, only conmen who act as puppets for the state who uses places of worship as military spy espionage bases, to subjugate, enslave everyone, keep all nations as low IQ as possible, as easy to enslave and milk as possible. When was the last time you heard someone calling for "All to wish trillion year lifespan to all" and World Peace in 3 months and 0 Violent Crime in 3 years? Never, even if this is the most basic level of good intentions, of ending genocidal covert war to drastically lower average IQ of other nations, to exterminate them. No win-win, only fraud, deception, conning everyone with empty

Jesus or other cults of "Peace comes in a trillion years when Jesus miracle staging expert comes back as a figment of your imagination". You look at wild dogs eating prey slowly and realize that they don't understand chemistry or math even if you want to teach them. You look at the world today, and sometimes you wonder if these people who rule the nations can even comprehend this idea of immediate peace being possible, of ending bad intent, of ending win-lose thinking. It seems the difference between Homo Immortalis and people today is bigger than between hyena and humans. The planet is ruled by mostly violent military generals who have cross bred to create the most ruthless fighters possible, via generations of spies, and this has removed any trace of Immortality *for* All intelligence in humanity. People often behave like the lowest IQ cows you can see, without realizing there exist 4 trillion planets out there for each human, so fighting over land or etc is low IQ, illogical, since all can have vegan food, vertical farming, desalinization plants and pipes from ocean or sea, or join with other countries to form bigger nations that share resources and strengths. It doesn't occur to these pathologically violent ants that they can become human and stop all wars. They behave like ants who kill each other with ferocious brutality over land they don't need, as traveling a little down, there is infinite space for all ants. Incredibly ☺abysmal IQ☺, many humans behave like the lowest IQ ants. People forget from the point of view of an Immortal who lived a trillion billion years, humans live as long as ants, having similar intelligence. Newton's third law of classical mechanics says action force equals reaction force. This law extends to many particles, energies, thought imprints, brain quanta of recently dead by 1-50 year torture people, it means all nations who use torture/killing/theft/slavery to achieve any end will eventually be destroyed. Thus, all nations today, who use torture will be destroyed effortlessly (without any human trying) by physics over time. The wise & patient who knows this, is protected by Tao, the Physics of Reality. Without force, wthe Tao never perishes. By yielding, the wise shapeshifts, overcomes.

13.20. Symbols, Parades, LanguAge of Immortality & lifespan tripling, not violence

13.20.1. Intro (11 pages on anti-Immortality and Immortality symbols in Earth 'cultures' ☺☺☺)

13.20.2. One Earth Language, symbol of Universal Peace, of 1 Family of shapeshifting Immortals

13.20.3. Special Eterni Tone speakers for all public persons to lift the vibe, extend lifespan☺☺☺

13.20.4. Ultra simple grammar, pronunciation, phonetic writing for English & other languages

13.20.5. The merger of 20 East EU nations into an English speaking nation named Eternia ☺☺☺

13.20.1. Intro: 11 pages on symbols in our nonexistent "cultures" (culture = no violence).

In eterni tone at parades (see next paragraph on the ethical way to do any military parade) or red (lavender) carpet visits section, where power to heal and triple lifespan is displayed at

leaders' visits, not the power to kill and shorten lifespans, we see the power of Immortality symbols, the weakness of death symbols. To kill is very easy, it takes a second, but to give people 150 year lifespan takes 4.7 billion seconds of tireless work by millions of scientists who figure out antiaging techs and try to diminish stress and pollutants. Empires have used swords as symbols of power, wikipedia describes the sword of state, as symbol of the power of state against enemies. This sword symbol views the reign or power as attained by destruction of enemies, instead of by lifting of oneself/allies, leading to taking a trillion times longer to achieve long lifespans. In human history we see people spending enormous energies destroying others, or keeping them low IQ, instead of lifting everyone up (lifting up the kindest most of course, and perhaps not lifting much at all the meanest, but not destroying them, just turning enemies into friends). Why not have a dove or infinite lifespan symbol ∞ (∞ made into a part of Royal jewels of the 26 monarchies on Earth or "∞ lifespan" or "Immortality *for* All" etc printed (2D or 3D, no swords, lions that disturb human quantum field, only kindness) on the hats, uniforms, suits of all soldiers, clergy, politicians)? This way power is equated with helping allies triple lifespan (instead of stagnate), not with killing or destroying enemies, but transforming enemies into longer lived partners of a longer lived humanity. Enemies can help triple one's lifespan if one is kind. In a second one can demolish something that took 100 years (3.2 billion seconds) to build. Using the symbols of death (sword etc) is unconsciously repeating the historical inertia, making it harder to bring a Civilization of Immortals. ☺☺☺ Few realize that the symbols of many parades, the tone and etc are connected with the horrific deaths that in the UK were banned in 1870 only. Other nations have similar symbols that 'we are told to love and deify each year', when they're an extension of the Bible 'ethics', of the horrific torture, organ/head removal, slicing in 4 pieces. These conmen pretending to be (*for profit*?) '*prophets*', like Jesus saying to cut people's arms and pluck their eyes out, have defiled the quantum field of humans for millennia, without realizing, since their psycho words have become scripture. Deaths need to be quick, so the pain doesn't pollute the quantum field, if savages still practice capital punishment. All cruelty needs to become illegal, all killing, all torture, to create Eternal Universal Peace. This needs centralized education that is free from cruelty and violence. Beheadings and the like were common in the times of Jesus, so the 'son of God' was simply using a normal advice that the people heard daily, sort of like today "if you have a headache, take Tylenol". He could not phantom that in the future this would be abolished, as it is today. Likewise, the 'last (*for profit*?) '*prophet*' in the Quran has given a lot of mutilation quotes and his sword symbols are 'holy'.

We see in many republics or kingdoms, swords, bayonetes (the sword like thing at the top of their weapons) displayed every time a foreign leader visits and they make it a big show. This can easily be interpreted by those watching (their brains get programmed into this thinking) as focusing on and, arguably even worshipping, death, eternal warfare among humans and

destruction; this is not focusing on or creating Immortality or valuing/worshipping the Healing Grace of future human Immortals and/or God who know a billion trillion ways to peace and power without threats, intimidation, violence, war. What do we want to create? Repetition of the past or eternal ∞ lifespan extension of a Civilization of Immortals? There are reportedly symbols like CE or the crown on beer glasses *(or all kinds of products for other symbols or words, without using that space to promote the idea of* Immortality *for* All*, wasting the opportunity to focus on* Life Immortal*, using weird letter combos that few relate to or understand, when it could say* Immortality *for* All *– ETL or UL or etc, because nothing is more important than* Immortality *for* All*),* when it could say 'Immortality *for* All' or Immortality *Nurturing* Agency the name of agency that certifies the size of the glass and have printed instead of a number a note about effects of alcohol and how nobody needs it to live to 110, etc; alcohol leads to a lot of violence and mistakes at work or even while driving, many cancers and birth defects; the European Union CE (or conformité européenne, European conformity, instead of eterni conformity or Immortality *for* All standards, which would be less "tribalistic, geographically limited", and much more Universal and apply to 200 galaxies the eternis expand to, nobody will know about a tiny EU, smaller than a big country, on one of 10 trillion planets part of the eterni or Immortality Union) or UK Crown symbols on alcohol containers, without stronger disclaimers on life shortening effects, degrade these institutions and shrink human lifespan, because wine, beer don't have positive effects only on society (due to antioxidants which are present in other foods at 100 times higher level). UK got UKCA to replace CE after Brexit. Seeing Immortality word (very colorful, to remind us better, if Immortality *for* All is too long for some products with small labels) on every product we buy is a good way to remind ourselves of what matters in life. 'We the People', democracy, is not about CE, UKCA, the crown, it's about *the people, their Immortality, longevity, health for all.* Some EU nations may decide to take fast steps towards Immortality *for* All and create the Eternia Union with English or a new eterni language as common unifying official language (still keep their present official language for a while) and use IFA (Immortality *for* All) or Immortality as the mark, though IFA would be meaningless to many who don't know its meaning. Talking about alcohol, did Jesus like alcohol? Is that why he turned 'water into wine' and told everyone to drink in memory of him? The God of the Universe chose a dangerous substance (which allows easy control, spying maybe on others when drunk, is that why they did mention Jesus being OK with drinking wine at Cana wedding?) that was for millennia after Him responsible for endless accidents, violence etc (3 million dead yearly), it's like a cult leader today would make a ritual with some vitamin or substance that once easily abused would cause disease, death decades early and unhealthy behavior; we know today we can make drinks 80 times healthier than the healthiest wine, that have included in them almost all the nutrients in Chapter 12, from various *vegan* juices combined even without added vitamins, nutrients (that now could be added to make it 900 times healthier) – isn't it odd that

instead of fruit juice or plain water he tempts people to indulge in alcohol to recall him? All the benefits of wine we can get from drinks without alcohol. Wine leads to severe malnourishment if used as a main drink with bread, but a living healthy drink would be something very different that offers at least all vitamins, etc that are absent in wine and many other nutrients. So, rituals or symbols offer cues as to what's acceptable. Did alcohol get him in trouble with authorities? So, we can see symbols are important. Some USA denominations Mormons, Adventists teach abstaining from alcohol, some don't even believe Jesus said those words about bread and wine.

The sword symbol became popular because of the primitive myths of "ArchAngel Michael" which conceptualized that God needs some sword to fight some "bad spirit", but the modern mind is subtler and more complex, knowing that God has infinite ways (without swords) to fight, to tame anyone and turn enemy into friend without torture and threat, but via many positive methods; with new tech one can immobilize anyone without killing, then transport them into a healing place, as in the Loving Grace of immortalist soldiers video section. There is no need to torture, threaten and intimidate anyone to achieve World Peace and harmony. Other symbols of death that can be let go of: all over the world, parliaments, courts, etc use the hammer (or rods to open doors by knocking) to make silence (communists used it as symbol too, odd, the sickle of the communists is evil too, since it can be used in violent crimes). They can use compassionate eterni tone recording of the "Immortality" word, sung slowly, to achieve the raly the left, the most angelic music in the background, and perfect tone nobody can do in a court or parliament, except after trying 900 times after weeks of rest and ☺☺☺ eterni *emotions* and states of consciousness, prerecorded to use technology to help us evolve our emotional brains. There is a huge difference between a wood hammer (US Capitol) or rod (UK Parliament) knocking vs singing "Immortality" in a female angelic tone. These are just some examples of symbols in our cultures from the infancy of our species, which will disappear as we evolve to a Civilization of Immortals where every sound is the healing sound of Immortal grace that extends lifespans and promotes the most eterni positive emotions. Millions of people find the image of the cross with the torture Jesus allegedly endured as a violence symbol too, as it brings that negative (and death) stuff into the psyche more, why not replace it with infinity sign, heart, smiley or some other positive sign for immortal life, since the main message is about eternal life, not about suffering, death and torturing others. Life is fluid, flexible, gentle like the eterni "Immortality" sung *over speakers,* death is rigid, violent, unyielding like the sound of hammer, or the gun salute people have used for centuries at "festive occasions", celebrating life or events with the sound of killing? How logical is that or how longevity building is that? Metal or wood hitting wood is just a mechanical sound of lifeless objects, it has no life in it, musical human gentle healing choirs have live sounds of live people. When wind blows, the plants that yield and bend (are flexible, gentle) survive, the other ones die, this metaphor is described in Tao Te Ching to

explain the basic idea of Immortality thru gentleness, *tenderness*, softness that imbues every aspect of society, even the tones and sounds at ceremonies, parades, formalities. Many symbols lack in *nurturing* healing compassionate grace, they amplify and create less *scientific* progress, thru exponential focus on destroying others instead of *healing*. We use symbols in the names of our parties too, we call parties "democratic" (people power). *What use is power without longevity or life of 900 years?* The political chapter talks about political party names. ☺☺☺

Torture is a symbol of death and short lives, that can be abandoned. Unfortunately, millions of people go thru police, military, etc traning where they're tortured, in the false hope of the torturers (who forgot there are trillions of positive healing methods to build "resilience"), not hope of the "trainees who didn't agree to it, in case of military draft etc", that this makes the "tortured" more "resilient", prepared if caught by the enemy. The trainee brains are damaged (from sleep deprivation, torture, yelling, like in some seconds in this clip of the ceremony of the keys, or this), becoming incapable of reaching the highest potential of eterni tone ☺☺☺ in intent, thought, healing capacity (which doubles resilience as enemy is kinder) achievable before the "training", which would enable them to turn enemy into friend and bring peace without negative methods. It is, in the view of millions, completely unethical for *militaries worldwide*, to display in their *parades*, changes of *guards* such violent yelling tones that pollute the mass consciousness field and that in family circumstances would be considered verbal violence and abuse thru yelling tone, a criminal act, which unfortunately, when repeated in a billion families shifts the planetary vibe towards world war.☺☺☺ It can be argued that it is thus an act of mini-genocide for a government, to display such yelling tones that pollute the vibe and brag about them, as their effects go on for centuries. Unfortunately, our planet is so violent, that nobody even notices the insanity of it and people are curious and willingly polluting themselves watching these insane parades, which are in every government, the evil has become good, and good has become evil. The militaries of the world can evolve too out of the jungle energy mentality, to that of the evolved eterni soldier and human, and replace these ground stomping violent displays of rage yelling with a peaceful song of defending the Immortality *for* All vibe, holding the vibe that prevents war, prevents intruders, instead of kicking them out or intimidating them by scary tones. We're trying to prevent violence not to deal with it after it happened, like a good doctor prevents disease instead of curing or managing it, so the 99% of military effort has to be prevention of violence and war via Immortality for All culture building worldwide, not dealing after the fact with issues in brutal killing ways. It's the infinifte love of that trillion year old Immortal that calms all and brings peace instantly without war☺☺☺, not the hyena/lion yelling behavior today. So, united in universal loving kindness and *nurturing* healing *gentle tender soft compassion* vibes, they sing "Immortality for All" types of songs, display no weapons, use mics to amplify eterni tone, praise the ways of the Immortalist Anthem,

while wearing colorful or shapeshifting uniforms with "Immortality for All", smileys ☺☺☺, with kindly smiling *faces* (showing their faces, not covering them with hats) not tensed ones like at many parades or events like Kremlin, "World Peace" written on them, gracefully move like in tai chi or healing, graceful ballerines ways at the tune of eterni *music* and tone that calm all and wage peace without violence; the ethical soldier wages peace, and prevents war; the unethical one wages war and prevents peace by his negative methods. If God exists, when spies, police and soldiers go to the afterlife, they will be asked: *which way did you defend peace*?☺☺☺

The ethical soldier is using the nonkilling nontorture ways of healing, and acts in a way wholly different from most soldiers of 21st century, brainwashed tortured robots, too afraid to think and speak their true opinions, drafted at gunpoint, forced to join militaries, terrorized by prokilling generals, turned into robotic "drones" who don't think at all about long-term consequences to human species quantum field. These helpless soldiers, even in volunteer armies, don't realize the generals, recruiters used brain influencing gadgets to write their thoughts and have them want to join, only to be disappointed later by the stuff going on, so their unethical behavior is forced. The British Army is obsessed with tradition, look at the super ugly 2 videos of the guards at the start of this paragraph, the dungeon like brick buildings like the grey exterior of Windsor Castle that recently hosted a very boring ceremony with stomping, frowns, booms, etc (compare that with Kremlin interior, which has only a few colors and is ugly compared to the future of many buildings when holograms, AI, etc make everything way more colorful) that by now, with all time wasted in ultra boring ceremonies around it (and other monochromatic buildings like Buckingham Palace exterior, etc) and unloving stomping on the Mother Earth, yelling, nuke explosion simulation by gun firings, etc, they could have made it using some spray paint (or pieces of plastic attached to the brick that never fade the paint) or colorful light projectors at night so colorful, with 100s or 1000s of colors, the top 20 eterni qualities names (*Gentleness, Nurturing Grace, ultra easy, since you can paint bricks in the same color to create huge letters of various words, each word a different color and various background colors from the bricks nearby etc, to expand the consciousness of the people, bring universal loving kindness and nurturing healing gentle tender soft compassion vibes to the center instead of* yelling guards, stomping, booms) that bring trillion year lifespans, Immortality for All Quotes, etc, way nicer than Disneyland with amazing peaceful music (not to mention everything is red, red carpets and red everything in Anglican church as if no other color or way of approaching reality and bringing Peace exists). can't see one World Peace ultra colorful alive thing, a sign of higher intelligence, nuance, complexity, like colorful☺☺☺ birds in nature, everything so cold and lacking in grace (vs spiritual music tone) bordering sometimes on 'a little (or more, depends on perception) cruel', tense and loveless, lacking in that infinite love for all beings vibe that brings infinite gentleness tenderness nurturing grace, how can it defend peace, it will only defend war? Unfortunately,

same thing happens in many places where Governments have headquarters.

No offense, sadly, every army seems very similar, but who knows, maybe some will change so fast after reading this book and bring World Peace in 7 months. The centuries of past are full of wars and these traditions are contaminated, carry the bad vibes of the eternal war of the past; to evolve out of the past, we need to discard yelling guard traditions and all other armies need to evolve, as they're doing similar stuff. We need discard selfish traditions like "the keys", etc, let it be about "Immortality for All" ceremonies, the health, longevity, Immortality of the *people*, not Queen only, the queen is just part of the *people*. This torture of soldier or spy trainee unfortunately is often done on purpose, not to build "resilience", as they want biological robots to execute commands without thinking. All this "training" does is make the country less secure, in the long term, because the planet is saturated with negative expectations, thought-feeling forms, descending into the chaos of the past repeating itself (eternal wars around or on the country). It's hard for top police, spy and military chiefs to let go and try something new, they find it hard to imagine (or feel, due to fear) that there are octillion positive methods to expand a civilization in the empty infinite space with trillions of times more land than now, without killing or torture of any animal or human. There is no incentive to behave, since many don't believe in God or afterlife, even if publicly they may say that, the only thing they fear is getting caught by a stronger enemy. "Resistance to enemy torture" training expects that negative future to happen, creates it subtly; it acts as if the bad will happe, brings it into reality, while depriving trainees of time to get far more intelligent☺☺☺ training. It won't make trainees less likely to switch sides if caught (but more likely to switch sides perhaps, or far more likely, as trainees are already used to torture and can think of negotiating the building of a Civilization of Immortals that the betrayed country didn't want to create, since it was a puppet colony of an 'evil' (misinformed) empire, focusing on "torture and killing" training) or to survive, because their brains will be stronger and more eterni in tone without the torture training. ☺☺☺

Will there ever appear on Earth, in the next million years, a civilization that doesn't use torture and negative methods, to break away from the millions of years of the past and try something new, as with aviation replacing chariots? The "historical inertia hypnosis" or magical thinking (no science needed, just *tradition*) of many military and spy chiefs is of such magnitude these days, these people are so lacking in *universal* loving kindness and *nurturing* healing *gentle tender soft* compassion, that they find it so hard to let go of their idea that "if we catch some enemy soldiers, we need to torture them to get their secrets", at least so "we get even for some torture they did 200 years ago", as if "you get even by using chariots because enemy country used chariots 200 years ago". What happened to the "kingdom of God is within" quote? ☺☺☺ *Greatest secret is within you*, not in others. This "torture gives secrets" idea is false, because people tell 900 times more secrets and become 700 times more cooperative if treated with

universal loving kindness that was absent in the "former country run by cruel military chiefs". Likewise, "torture gives resilience" is false as explained above. Think about how much we know now versus 80 millennia ago, we now know about 1 billion ways to prepare a specific chemical at 99.99% purity, by short synthetic steps or long synthetic steps. This was not available even 100 or 200 years ago, but people who had still a functioning brain (not destroyed by torture by their superiors), knew that such a billion ways exist. Likewise, today, the few (less than 50% perhaps, so "few", "few" and "many" are relative words, with a wide range, *30% and 0.001% can be* few, *99.999% or even 5% can be* many *in some contexts*) remaining independent thinkers in military/spy agencies (who're not brain damaged by torture and terror), don't realize daily that there are a billion ways to achieve an end, equal or much better (like 99.99% yield, not 4% and impossible to separate from the product mix), without using the primitive "torture and terror" methods of "training or secret finding" equivalent to alchemical hooey of the middle ages giving us stuff with 4% or 0.1% in the active component (unknown to them, just as today they don't know what brain process leads to change in behavior or "sharing secrets (false info many times, as memory gets blurred due to torture even when they intend do share)", they just assume the "mix" of torture did it, but often times it's not, he was going to say or do those things without it too, since the other country could, in theory, remotely control his every word almost (sometimes only, in theory possible, in practice much less) or due to something unknown (out of millions of possibilities) that happened at the same time of the torture months, just like millions of confounding factors in nutrition, and people think wrongly that person lived 1 year longer because of nutrient A). If you have brains intact, you realize torture is the worst way to get secrets (usually false info?), and much less to get secrets with precision (*our memory is so bad after just a few days of bad sleep alone, let alone torture added to that*), as torture alters the info stored in the brain (or info is remotely altered by country who trained the POW, without POW realizing the slight change that makes info useless). The POW knows some "torture" is not to get secrets (that he doesn't have many times, as low level POWs know often nothing), but to destroy brain to create a "mutant" that the country can "remote control from 5,000 miles away", so then the POW tries to just ignore it, because POW knows their experiment will fail, due to trillions of *confounding* factors that make *"900 miles away" (not a few feet due to gadgets disguised as everyday objects) remote control* ultra weak, including the factor of defense against such control by proper shielding discovered (in case the countries are real enemies and not role playing being so to control the public in both nations for their own profits). It's only with positive methods that you achieve 99.99% yield, not 0.1 or 4%. Torture likewise gives peace only with 0.001-4% yield at best, not 99.99%, usually by chance of other factors (*confounding*)☺☺☺, and always short term peace, as the torture is not erased from the memory, patterns of torturers and tortured, causing less harmony, since these torturers' brain patterns are picked up by quantum entanglement by other countries who then know what the

"covert torturing country" is all about (no need to see their body language, facial expressions or tones that give out their real feelings, although often the front spokespersons used are clearly anything but the embodiments of universal loving kindness in tone, body language, etc).☺☺☺

In science, in a sequence of 30 characters, one character wrong makes code useless, a few even more so. Most people are not aware of the levels of their mind, brain and how they can be influenced by gadgets. Among those who realize this, they can't speak, else their superior will kill them, because the whole structure is based on terror and violence. Imagine how many billions of positive methods to avert conflict (giving way better outcomes) next 100-200 years from now if people focus on discovering them as we did in discovering 1 billion ways to synthesize some things. But why bother to discover them, when they can just torture and kill and they have absolute power anyway? No incentive to change anything exists, as it implies a total self-transformation of the entire structure, every soldier, cop and spy, it's too daunting. Will anyone learn a fancy new language or skill if he sees no benefits in the short term (physical existence) for himself? Many won't. Even if there are short-term benefits, people don't even make small changes like quit eating bad foods, etc, let alone a deeper self change, part of it due to fear, stress, inertia, peer opinion, etc. The chemical synthesis analogy above alone could convince many to pause and consider alternatives to tradition and unscientific magical thinking based on the religion/cult of "torture brings World Peace". While a country may lack the tech of the sci fi movie to immobilize all enemy weapons in space to prevent any deaths, and may have to kill an invading enemy country soldiers, the invasion is not imminent in nuclear age. ☺☺☺ Thus, the country doesn't have to torture and destroy other countries covertly, to do trade with other countries and then acuse them of "unfair trade" or "imperialism", to use covert war, as these things take it away from the self-sufficiency and uncompromising eterni ethics that brings 7,000 times faster longevity science progress. A country gains a lot of time and progress, but not being so offensive, so destructive, since outright invasion is unlikely in the nuclear age of mutually assured destruction. The fools focus on destroying others, not lifting themselves and the whole humanity. Unfortunately, an honest look at Earth empires and kingdoms reveals this strong focus on destroying others, which is hard to let go of, when everyone does it.

Why be the 1st to let go, it's so scary, it's like the *generals* want soldiers to deal with the unknown, but *generals* never want to step into the unknown, it's like the clergy telling people about kindness but using a tone of speech that is wholly removed from any kind emotion, or people who don't practice what they preach, in this case generals to their soldiers and field agents. The habit of always undermining and destroying others covertly is not as harmless as it seems, it is a temptation that ultimately destroys the doer, as they remain in the low level mindset of not letting others develop, while not developing their empire. All they do is destroy, police and not let others develop, instead of developing themselves. This leads to an imploding

empire, due to the stagnation inherent in such empires of terror. Not developing, they remove the flexibility, *gentle tender softness* needed to survive and adapt to new challenges, any new idea is crushed, undermined, wiped out, simply because it was created by an "enemy country" or "colony". If an idea is deemed as good, it is forcefully taken, the authors forced to work for the empire, in the typical way of the empire's "loveless energy", leading to the complete dying out of the follow-up ideas (coming from the original, unknown to the empire or inventor, or inventions) as they were going to develop in their original circumstances without the brutality of the "turture brings World Peace" empire. There was an island of gentle tender kindness and hope☺ for humanity in one place and even that was crushed. Fossilization sets in, "yes sir, you're always 100% right and everyone else is 100% wrong" is the only acceptable phrase and soon after, centuries later, the empires vanishes, humanity remaining as primitive as ever, waging insane wars over language and land. Imagine treating "POWs or spies" as 2 day old babies, with loving kindness, as they don't know any better, having just lived a fraction of a second compared to an Immortal, loved and allowed to heal, to learn of a new way of life, instead of being tortured for doing what the torturer would have exactly done himself if he was born in that country☺☺☺ and been brainwashed that way by his parents, peers, etc. The Civilization of Immortals civilians, soldiers, spies radiate only loving kindness and healing energy towards all beings, it's just that the noblest beings would receive 100 times more healing energy and loving kindness than the meanest, so as to motivate people to improve. The eterni ethics, the Civilization of Immortals don't allow the torture of any being. Just when the Universe gives a country the chance to practice Godliness, they blow it, so instead of bringing the new, they perpetuate the old insanity. Being kind, these POWs or spies could actually help the nice country to bring peace between the 2 countries, discover new things about the "bad country", or discover new things in science. As the news of "USA treating POWs better than "bad country" treats vice presidents", spreads, all want to surrender and "bad country" has no soldiers left.

There are strategic military advantages to being a Civilization of Immortals that doesn't torture, that only become apparent when one thinks about it deeply. Being nicer and gentler in tone than anyone has ever been to the POWs in their whole life, will make POWs realize that an alternate reality and Civilization can exist and exists (nice country) and that it can be manifest to a higher degree on Earth by helping nice country to bring World Peace and a Civilization of Immortals. ☺ Being nicer is not possible, when all training is about being "tough, insensitive to fool language and fool tone and resistant to torture". That's why a country can choose God and Immortality or else, we can't choose both death and Immortality, both torture and kindness. Torture and spirituality have nothing in common, except perhaps in religious cults created by ancient or modern spies by fake stories to take over/destroy other countries. Torture, even if days/months, apparently causing no injury, shortens lifespan, ultimately leads to death

(indirectly, since it perpetuates the warfare, violence that will lead to death later via thoughtforms the torturers engaged in, amplified, spewed into mass consciousness), is incompatible with a Civilization of Immortals. ☺☺☺ The unfortunate adepts of torture are victims of a belief system that they have to do this to survive, when nothing could be further from the truth: it's like in a religious cult where they believe they have to do certain rituals or pray a certain way, direction to receive the best outcome. If you say anything against it, you're a heretic: may scientific thinking, intelligent objective awareness enlighten them. ☺☺☺

~*~ 13.20.2. ONE LANGUAGE REPLACING ALL OTHERS via ImmortalityTV.com ~*~

How can we eliminate wars and torture, invasions? The next 70+ pages patiently argue that a key aid to ~*~Eternal Universal Peace~*~ achieved in record time is having one global language (and one global tone), that we adopt or create via consensus, not 7000 languages, or at the minimum going to 100 languages, then 20, then 10, 5 and finally one. Skeptics forget in 1924, Mandarin, spoken by 90% of China in 2025, did not even exist, showing that one language created to replace 500 China languages can be adopted and become a unifying factor in a nation. Just as it happened in China, it can happen on Earth with some language. We see East/West EU folks (manipulated by China or Russia) say that "we can't unify with one English language, 11 companies, 3 agencies, and form a one billion nation EU-US-Aussie-Canada-NZ-UK". China is 500 languages and 100 ethnic groups, EU is 30 languages and 30 ethnic groups, why can't these "eternally fighting (like cannibal chimps almost, with gigantic egos)" Europeans choose English the language of science and have 1 nation, 1 bank, 11 companies, 1 government like China, NATO-Australia one nation, 11 companies? All opposing one language for humanity are lower in IQ than a rat is for humans vs advanced aliens. People are too proud of their ☺abysmal IQ☺ to unify, so they remain savage rats with high violent crime. Same issue exists on every continent. Without one language that *all nations* create or adopt, World Peace won't last long, this is a fact of life. *Peace requires preventing any reason to separate, fight and miscommunicate, and nothing is worse than 2 languages for lack of communication, of understanding. With 7000 languages, hell is guaranteed and we see it daily in the news.* We need to become one family, one language for all, for Peace to last millennia, one country too. What are small, medium nations able to do to avoid invasions by a huge neighbor, so as to keep World Peace in place? They could unite as one, stop fights over language, adopt ONE language *(not the language of words only, but also the EMOTIONAL tone language)* just like EU adopted one currency, the euro for almost 30 nations, (e.g. American accent English or one we create, replacing all others) to increase efficiency (by removing redundant institutions, ministries, ending translating trillions of books, websites), develop higher tech, by more centralized immortality capitalism. An example is 20 EU area *countries join to create* Eternia *big EU nation (see Eternia section below), as they got 19 useless languages no other countries speak*. Being one nation, not 20, makes it less likely

they get invaded one at a time, plus it gives longevity progress faster; efficiency means they do more R & D and are far more powerful than divided. One country means 11 or so state companies, no private companies, so no mafia gangsters in East EU. Using English gives us biggest strongest allies globally, the USA-Canada-UK-Australia-New Zealand-Ireland-India-etc 3 billion people alliance, while German, French, Russian, Italian, are not spoken by many. East EU youth already knows English very well. Ukraine requires government officials to know English more starting 2024, higher ranking police, customs and border officials, emergency services too, via a new law to increase its competitiveness. In 2021 the main Polish TV station, TVP launched TVPworld.com, Poland's first 24-7 English language channel to help Poles learn English, watch it on youtube. Ukraine gov has a youtube English channel too. The TV folks in East EU are too busy creating pure trash to be bothered to create a 24-7 positive news only, by the 20-30 year old (largest brain and most developed vocals able to produce most eterni tone) hosts who wear super colorful immortalist clothing (lilac, magenta, purple, fuchsia shades dominate the background, with gold, yellow, white, blue), have lavender lilac calming peaceful color and meditative music in the background in the studio with the Eternia Flag displayed 24-7 on the wall, with positive perspective (after each news, it is explained how this could lead to World Peace in 3 months), eterni tone music about Eternal World Peace in 3 months, single family housing for all, 11 companies that increase research jobs, innovation 100 fold) content mostly.

The future of this planet is created by the Youth, including the youth on ImmortalityTV.com. We got endless trash TV stations in every country and many are shutting down due to going bankrupt, perhaps we need quality, not quantity, and just 1-2 stations max, free of advertising, state owned too. The more one talks, the less one acts, and we notice worldwide a fascination with useless talk and repeating same news on 300000 TV channels in 300000 bad tones. The one language replacing all others in Eternia is the language of immortalist Eternal Youth, meaning that of a young 20-30 year old English. The Future we want is one of Eternal Youth, 1 billion times slower aging, so to entangle listeners with the molecular quantum info of Eternal Youth, voice of Eternal Youth and brainwaves of Eternal Youth, we mandate by Federal Law of Eternia to have the most perfect eterni tones among those aged 18-30 to be the only speakers (news updates, program presenters, etc) on TV, except when showing some video report about certain events which naturally may have people who're slightly older or even 70. For quantum field of humanity health, 85% of voices on TV, when all videos are taken into account, have to be under 30 years old. All Presidents, Senators, politicians, etc have to be under 45 when elected for 4 years, for maximum mental capacity, even if they get advisors and helpers who're older: the public ought to interact with younger people for the above reasons. The complete dictatorship of the old, the gerontocracy worldwide, is a primary force of regress, of stagnation. We can hardly see any young presenter on TV, let alone an angelic eterni voice. This is not only

destroying the quantum field, but it is totally undemocratic, since average age is 29 in some nations, yet the average age of TV voice is 57. The greed for attention, the self-adulation of the old has no bounds. It perpetuates their psychotic addiction to torture and violence. Only ego-maniacs with personality cults want to always appear on TV, old 70-100 year olds who want to let the world know how not to vibrate at molecular level quantum information level. Thus, monarchies have no place in immortalism: the smartest people to run a nation ought to pass a top secret TEST and those 30-45 year olds lead the nation unseen. 30-45 year olds know exactly what aging is, as they will experience it. The ideas of the old people (with the most expertise in a lot of fields) can be read by the kindest voices, in order to PROVIDE ROLE MODELS FOR OUR YOUTH, for an IQ so high, that it forces the quantum field to jump 100 years in a mere 5 years, as every young person will expect young people to talk like a 60 year old Nobelist. Young people are the future and they need to see on TV people of their age, their appearance, whom they can relate to, to explain to them the benefits of science, the scientific method, longevity research, sex for procreation only, of 0 alcohol, 0 smoking, 0 weed, 0 coffee, 0 gambling and volunteering with the happy Immortalist Youth. Let hot young eterni girls interview those who quit smoking, alcohol, etc. Greedy old men, give the youth a chance, give them a TV station free of senility and old age domination. The sage leads from behind, unseen on TV, so, the old people, who allege to be so wise and egoless, need to take a break from chest pumping and ego building, cults of personality and self-adulation, and let the Youth Lead into Immortal Virtue Building the youth the Zionist Media has destroyed. We need to recall in Immortalism, all diplomats are people aged 20-30 years old, and they alone need appear on TV, since in Immortalism the politicians have eterni tone speakers that read their ideas, young eterni tone folks. To ensure the best quantum info effects, we ban the use of AI voices or presenters on radio-TV, since they're computer holograms that live short, not young people with life giving information. All government cabinet ministers of Immortalist Party are science and engineering majors who're under 35, for maximum relating to the youth and boosting national innovation 1 million fold by deifying, rewarding 1. creative inventors, contributors to the scientific development of our nation, and 2. efficiency militant immortalists who centralized their companies, cities, states so as to increase tech jobs 75 fold. They appear on TV sometimes to fire up the youth, explain the latest advances in the science of eterni food ☺☺☺. With their impressive resumes, they attract young smart geek immigrants to the immortalist nations, causing the birth of the Universal One Nation, Eternia, as in the immortalist anthem. *World's Workers We Unify, Eternal Youth We Deify*, we let the Youth lead by example the fellow youngsters out of their addictions and trivial concerns to the lofty goals of immortalism. This TV will have people who studied healing speech tones since birth, also got a college degree in life sciences, as explained in the eterni high tech foods (to increase lifespan 4 fold to 40 billion fold) section about new matter and particles that form new far future diets of shimmering shapeshifting teleporting Immortals, our descendants.

This fresh, evidence based TV station is free from brainwashing and dissects, disproves every claim made by pastors about Jesus, Christianity, Islam, Judaism and other religions, to free the youth from the grip of charlatans, frauds and gangsters posing as clergy, who, without any real scientific evidence, brainwash billions of youngsters with images of torture, violence and thousands of violence filled quotes, while reducing national IQ, making everyone a low IQ person and endangering our national security. ImmortalityTV.com supports the freedom from the torture, beatings, scourging images of the Christian mythology (all focus on the torture of Jesus on the road to the cross, so workers accept daily abuse by aristocrats) that reinforces the slavery of the workers, low IQ cannon fodder dying like Jesus to expand the Roman empire who created this fantasy. It deprograms all adults, so nobody wishes to attend these "lowering of average IQ" cults called churches, mosques and synagogues, to see their subtle normalization of torture, violence thru "God's actions against Jesus", as if all God can do it bring more images of bloodshed and torture into the minds of men. Today, while USA youth is wasting the equivalent of 1 million jobs with religious brainwashing based on a fake religion, our country may disintegrate or vanish any day via a special attack that kills 55% to 100% of inhabitants of Europe, North America, etc without anyone knowing who did it, due to lack of World Peace the youth would achieve if it stopped wasting time with Zulu ritual like activities in the church. Add the 9 million jobs equivalent adults waste with this fake religion and others and we got a huge waste of energy that by now would have achieved World Peace, adults don't realize intelligent folks see them as you see these "zulu rituals" and Bible quotes like "traditions". The host or wafer rituals are as illogical, hilarious, time wasting, dangerous for national security, intellect development, national freedom and useless as these pygmy rituals or Gabon chicken sacrifice rituals that achieve nothing, just as ingesting wafers achieved no World Peace for 2000 years. Notice the guy role playing that he got influenced by a spirit to get money from the naive folks watching him, like in Christian services a guy is aid to pretend he was sick and cured. Men with college degrees ask for no evidence for the claims of miracles, assuming those charlatans who wrote the books are all honest. The Christian, Muslim, Judaic and many Hindu rituals are as illogical, violent, useless as these traditions of Africa, for those who understand the violence in scriptures today. By watching these, you realize how aliens view Christian low IQ hypocrites who laugh at the violent culture of beatings before marriage, but ignore the beatings deified in the Bible/Torah (kids, workers, sex slaves) or Quran (sex slaves, mutilated infidels, kids, wives). It's time to read Anthem Immortal after these sick videos and Bible quotes.

The Hindu "low IQ 'folks'" wearing endless jewelry, bangles and the Christian low IQ folks wearing endless crosses, veils and chains and medals, don't realize God can grace them directly, without material object and are as abysmal in IQ as these tribes who make their lips 5 times longer. Beauty is being kind, gentle in tone, and using labor and metals to increase lifespan, not

to shorten it. All time sent to make these toxic jewelry could be used to build hospitals or preventive biomarker monitoring free stations, better housing for better sleep. Look in the mirror ☺☺ and think before piercing or tattooing your body (it's an act of violence against the body to pierce it to get nose, belly or even earrings, causing infections, death or short life) and wearing useless objects that don't help you to live longer or bring the end of violence. These violent acts of stabbing ears, noses, lips, bellies to insert a nose ring, earring, etc are violent crimes that ought to be banned worldwide, as well as stabbing infant's penises during circumcision. The time wasted making all jewelry could be used to prevent violent crime, violent rituals, so common in thousands of towns worldwide. Other lowest IQ folks spit in public often, like this tribe who spits as a greeting and spreads germs. The big ego of religious folks and tattoo, piercing etc fanatics are hard to soften without graphic comparison videos that demolish the superiority complex or an occasional candid word like 'filif rat IQ folks', etc, to more correctly depict the low IQ waste of one's life. Thankfully we're all 0 IQ sometimes daily, we just try to move away from it as we can, and become kinder softer gentler more compassionate more nurturing ☺abysmal IQ☺ folks. Christians laugh about the tribe who drinks fresh animal blood, but they drink animal blood daily unless they're vegan, since meat contains .2 to .9% blood, as shown in the violent diet section. It's important to stop religious fanaticism and use science to discover amazing & beautiful ☺☺☺ high tech foods we make in labs that remove the need to inflict pain on animals or plants via agriculture. Asking Our Father to give us bread, is asking for gluten, amputations of diabetic folks, in the name of Jesus, when with science we can eat real food that gives us 9 billion year life, not 81 as poor clueless Jesus told us to eat. It's for these reasons too that ImmortalityTV.com or Immortality.TV or hundreds of other possible names, Eternity.int, Eternity.tv, Eternity.com etc is born: the end of violence, of bloodshed by human animal conflict or human human conflict. We bring ~*~Eternal Universal Peace~*~. We'll help all start think critically, question their beliefs. When Gentle Tender Soft Healing Nurturing Compassionate Universal Loving Kindness replaces violent scriptures, rituals, traditions, police training, etc World Peace becomes Eternal, so join us in this journey to bring The Eternal Civilization. The selfish callous royal festivity designers spend eons with thousands of men marching, using trumpets, etc at various pygmy tribe like rituals around their cherished Neolithic Traditions Centers in London, etc, while all this time on horses and such could be used to fix the 95% of London houses full of mold and other health issues. Every so often, near many "royal places", horses kick or attack visitors. What a waste of taxpayer money, while Harris estate has less mold in the dry imperial California. Why do churches get tax exempt status anyway? ☺☺☺

ImmortalityTV.com station will have 100% English content (on the bottom we show subtitles in the local EU language, in Latvia Latvian, same exact program, the hottest kindest tone young people dressed with "Immortality for All, Eternal World Peace in 3 months, Gentle Tone written

shirts", except when we broadcast it in one area, we show local language subtitles, and we create 50+ sections on the website for 35+ EU and top 15 most spoken languages in the world, so people can access archived programs from every day and learn about the fake quotes, immortalism ethics, immortalist end of all jails, the need for adopting or creating 1 language to replace all others within 20 years in *all nations* to promote lasting understanding and ~*~Eternal Universal (All Planets) Peace~*~, etc) and eterni tone free education (template for all education in the 20 former communist states) and news, immortalist culture, immortalist economic system for all EU or new East EU nation. The most important thing today, for *all nations*, is to overcome the savage cannibalistic murderous nature within man, which makes him indifferent to the millions killed each decade by differences in language, the inefficiencies, redundancies (translate etc) and waste of human labor, of innovation that replaces resource wars that 7000 languages bring. This genetic disease of the cannibal human chimp can be fixed with 1 global language. USA is run by the 'bad type of' Jews who encourage 7000 languages, turning US, China, Africa, Europe, India into a Babylonian (7000 languages) wasteland of depravity and fights, crime and chaos, we see too many states providing government services in dozens of languages. This can't be allowed anymore, if we care about humanity and want to prevent its 10 second end. Any immortalist does everything to reduce # of languages on Earth to 1-5 fast via the International One Language Treaty. The village of ImmortalityTV.com is gated, self-sufficient (solar, water, food, shops), hosts all producers, speakers, etc for maximum security and avoiding any lethal attacks by foreign spies. ***No visitors are allowed within 10 miles of it***. Nicest tones, youngest speakers on average (25 years average age) of any TV station globally (all under 30), to ensure the Eternal Youth of Brains Goals of the Immortality *for* All Government are achieved. No violence scenes on this TV. Any attack from the news is explained as a possibility of fake wars, as this book gives some examples, in order to not have people stress so much and question why war and fake or real bombing are still allowed. The TV helps the state of emergency too, with its special 12-20 hour daily programs during the first 6-12 months. The younger people are there to show all the best tone, best happy state and speak for 5 minutes max at one time, after a blissful state, to help all move into that state of bliss that reduces crime and stress 100 fold. We get those amazing & beautiful ☺☺☺ happy *younger* people, 30 of them, rotate, each reads some notes on a screen in front for 5 minutes and then they go back to meditate, breathe, relax, before speaking again. These breaks are there to ensure we get the absolutely highest vibe, and they can be edited to appear a continuous speech if we want 20 min with one person. The Ethics of the immortalist Nation is so High, that when these presenters on TV speak, they don't just Speak, ***they Paint, they Sculpt, they Modulate every Word, Tone*** into a gentle Song of Eternal Immortality *for* All, and surround all beings in that gentle tender soft... vibe ☺☺☺. Physics is this: people entangle with, become that which they focus on, they copy the biochemical reality, the quantum reality of those they see on TV, they imitate what TV hosts feel, what smile they

see, what vibe they get, what background letters, colors, qualities TV shows on the sides, what background music there is, all that tone, the echo etc like in some ancient alien world of Immortals, it is that edifying Immortality culture that transforms the audience and brings 1 billion times faster changes, as the lady explains the sins of smoking, alcohol or whatever state of emergency laws, in that most hypnotic smiley, attractive young gal or guy, tone, wisdom that shocks, transforms and deifies, amplifies, solidifies, with hypnotic power, with echo and grace, kindness and soft tact, in the quantum field the image that is remembered forever: Eternal Youth for All, Immortality *for* All, Immortalist Anthem for All. Let us Bring the Kingdom of Heaven on Earth, which is the Kingdom of Eternal Youth for All. As immortalists we focus on the Youth, the future of our nation, we let them lead, inspire and transform the Youth, so all are the sages of the Light Triumphant Eternal of Physical Immortality *for* All. ☺☺☺

Eastern EU is more pro-American and most native English speakers use American accent, so since we want one accent to dominate, we will choose the dominant one today, not the minority British English accent, since we immortalists want efficiency and speed in unification of global English. Not to mention, it is in the self-interest of Eastern Europeans to know American English, *since USA and Canada are much bigger and worth visiting or moving to, than the 90 times smaller UK. After all, East EU* can turn America into a more immortality capitalism nation and thus change the world. Due to the existence of low IQ nationalists that would be used by foreign powers to stir conflict and delay English language adoption, these 20 nations need a massive help from the 5 eyes, to help stave off these evil spies. The 20 nations need to realize that if they gradually replace the 19 languages with English until English alone is spoken/written in 30-50 years, the chance of nationalism and conflict would be 0, as the new identity is *eterni*, not *Polish, Ukrainian or Romanian*. It's the fight for humans' survival.☺☺☺

USA haters in East EU will say learning English is betrayal, but it is not. Most nations in Europe chose Italian when Romans became a major power and then that Latin (Italian) mixed with local languages to birth most European languages today. Likewise, today, people can choose English, go with the flow, since English is the language of science and society, in order to quickly enhance world communication and World Peace. Europeans chose Italian 2 millennia ago, now tthey choose English, no big deal. It's logical, Russia hates this idea, but that's their problem, every nation chooses its future, not Russia. Plus, you really need to know the language of your enemy, to understand his lies and methods of genocide, to infiltrate the enemy very well and bring World Peace, etc. A culture is the thought and vocal tone, priorities, technology, music rhythm, not the language, as explained in the 54 pages below. The literal language, is 1 billionth of a culture, while the emotional, vocal, intent tone, which keeps innovation and kindness high, fights 0 and unity 100%, is maybe 10% of the culture, but the vampires promote many literal languages because this keeps populations extremely backward and nations easy to enslave: they

focus on literal language not the tone: if people focus on learning useless languages, with 10000 times fewer science papers, they're super-easy to dominate by foreign bully powers who use agitators to encourage learning useless languages, while not giving said East EU countries any tech and what really helps increase lifespan, just low IQ ideas to keep them slaves. Malawi, Rwanda, Zimbabwe have English as official language, but they don't have the tech, culture of other English speaking nations that live longer. They're the most backward nations almost on Earth. So, we can see the language we speak in of itself is meaningless, it's what you do with that language, and what your defense against vampirizing forces who want to destroy your culture and keep everyone a chained dog. The point here is that speaking English gives you access to thousands of times more info than other languages, but that doesn't determine your culture, you could live 2 times shorter than the Brits or 1 million times longer, the shouting gorillas won't know the difference between normal English and eterni tone English. With a different culture, a country using eterni English could become 1 billion years ahead of current English speaking nations. The language is only a trillionth of one's culture, so once ☺low IQ☺ folks understand that, they're more likely to be OK with English use. It's all about survival, without science knowledge, no nation can survive. Some are low IQ, so they identify with a literal language, instead of with a culture of Immortality *for* All, science, no aristocratic religious lies/nonsense about "free market" theories made to steal everyone's labor, life, resources, 0 torture, freedom from daily laser beatings/torture by big power bullies. Literal language (not tonal, emotional, intentional) just a tool to communicate or access more info. English is only promoted for elites who're remotely controlled by Brits and Americans for the same reason, for keeping everyone a chained dog. You see that in all UK, USA colonies, states, migrants are not forced, or asked to learn English, since that way, the migrants can't know any science and can be manipulated, subjugated 5 times easier, by simply manipulating the local elites via endless mind control, sleep derivation, brain writing. When the rulers are leeches, bloodsuckers, chaos reigns, there is no unifying language on a planet, but endless languages for maximum fights among workers that benefit the evil aristocrats. The aristocratic parasites want docile☺☺☺ 0 IQ feeding sources to vampirize, suck the "blood" of. Those "ever lofty Freemason British spies".

Thus, recognizing this, the tiny East EU states need to wake up from the hypnotic trance and adopt the language of science, English, to bring civility to this planet, so ever lacking in USA, UK, Australia, Canada, etc. This is not because East EU would deify the UK-USA-Aussie ultra violent societies of banditry and blood sucking of the workers, but simply to adapt and provide a better example to the subjugated workers of those nations, by creating a resonance of fellow English speakers who can show a different way to organize society, not like British vampirism, but pure immortalism. You only need to watch UK Anglican fake church rituals, royal parades, fake miracles promoting, UK TV tones and anthem, rock music exported, the Beatles music, etc to

realize how far from immortalism it all is. Anyone who is having any brain left realizes you can live to 1 billion if you use English in an intelligent way, or to 98 if you use it in the British way. Out of love for the lost souls of UK, Australia, USA, Canada, etc the East EU would choose English, and to save the world from war, to increase East EU science literacy, its espionage literacy (fake papers being so common), not because we think it's the language itself that gives us billion year lifespan. Adopting English as our language allows us to better teach and assist the mentally troubled workers of these dictatorships where aristocrats rule with violent torture, terrorism and eternal police violence. It's not because we want to embrace their cultures and renounce our own immortalist cultures that we create, using good ideas from many societies past or present. We know our cultures are completely screwed too (by many bully imperial powers too who work 24-7 to screw us up, not screwed entirely locally) and similar to the UK+USA ones, but we can do better and would aim to do better, not copy their mistakes, but also use some of the good ideals of our East EU communist era, that were only ideals, rarely practiced, like "everyone helps everyone live a better life", or billion year life now in the new immortalist era. Once East EU understands that fully, then all resistance to switching to eterni (not British or USA tone) English vanishes. This thought ought to remove any concern of the East EU (or any nation worldwide who wants to know science and the way British fool everyone) nationalists, culturalists that switching to English would in any way diminish East EU cultures and nations, because it doesn't, we intone English the new way that heals all humans alive, and surrounds them in the most *gentle tender soft* Healing *Nurturing*☺☺☺ *Compassionate Universal* loving kindness, *much better* than these music samples eventually, fully being in the Eternal Bliss State of the immortalists. Australia homicides were 0.83 in 100000 in 2022 vs 1.1 in UK/New Zealand, Ireland 0.87, lower than the East EU (the 20 nations) average of 1.6 (the big East EU 3 with more people got 0.68 Poland, 1.26 Romania, 3.8 Ukraine), while in some lower (than 83.5 in Australia) life expectancy English speaking nations it is 20, with 7.5 in the USA. Other English speaking nations (official or co-official language, not the mother tongue of all, just government, education, etc) vary wildly in culture and homicide rates: India 2.8, Nigeria 22, Saint Lucia 37, Trinidad and Tobago 40, South Africa 45, US Virgin Islands 50, Jamaica 53, Turks and Caicos Islands 76. In these nations only a little English is used as native tongue. Singapore is where 50% speak English at home, so their homicide rate is 0.12, much lower than the countries above where English is spoken little as the main language at home. If East EU becomes more read, educated by reading English books, articles, etc, they will have homicide rate 0.12 too in 4 years, with this book implemented. The alcoholic Europeans would be kind and homicide rate would drop from 0.82 in Germany to 0.074 like in the 0 alcohol Qatar or 0.00 in the English speaking American Samoa & Isle of Man. The language is only a tiny % of a culture: USA adores killing as more have guns, 42% of households, vs 6% in Australia, so 9 times more homicides per capita. See, language is only part of culture. How can citizens understand science papers that help us

live to 9 billion if they don't know English? Once people understand that, their fanatical attachment to a useless language nobody speaks except 1 to 70 million people, dies down. At the end of the 50 pages, 4 pages explain in even more detail why you don't betray your nation by switching to English. Any language can lead to 1 million tones and cultures, as long as it's easy to learn and is known by 100 times more people than your tiny nation and is the international language of science of that time, it is a useful good language – since science can bring eternal World Peace fast, no more wars over resources and land we don't need. Singapore got 1000 times less land per capita, but live 15 years longer than Russians, so see, a different set of values: life not surface area. I would prefer to live happily to a trillion than have 1000 times more land in my name. Anyone would prefer that. All wars ought to cease now. Stop fighting over land. We lack technology to live to a trillion, not land. With the right culture, and science, a tiny nation could live to 800 trillion. Around 1960 Singapore decided to use English as the lingua franca, as the unifying language, decided to switch to English as the education, government, business language, to further access to science papers, to be able to easily interact with more people worldwide who know English, *since communication diffuses tension and conflict.*

As a result of that decision to choose English, 65 years later *the* Singapore *GDP/capita rose to 5 times* above world average vs equal to world average in 1960, and life expectancy increased 22 years, the most of any nation. That's why Russians (who finance far right *traitor* or 'Nazi scum' parties in Europe that promote local languages and ☺infinitesimal IQ☺ violent Bible quotes, pure fraud based miracles to lower European IQ and religion nonsense over scientific literacy) and Germans, French and others, *who're very jealous of East EU's big land mass, etc*, want to do everything to stop East EU from developing and choosing their destiny, to choose English and no longer be enslaved cows of German, French or Russian companies. Romania's 2024 President candidate Georgescu, # 11 on the ballot, won the 12-1 Dec 1st first round of elections, then they canceled it on Dec 6th when the voting was already happening for the 7 million Romanians outside Romania and he was winning 75% of those votes in the 2nd round. Donald Trump Jr tweeted that Marxists canceled Romania's election (to make Trump Jr look more like a fascist fighting Marxists) to hide that Trump Jr. may be a communist or feudalist Jew, like Trump himself might be (Trump is friendly with communist NYC mayor). Trump could be a leftist, who role plays being Republican or "fascist". India has always been a friend of USSR and Trump will open new hotels there, while Trump's wives are from the communist East EU bloc. Trump Jr tweet implied Georgescu is a right wing guy, which could be false, since Georgescu sounds more leftist, covert Jew (promotes the Jewish Bible like Trump does, though that may be a cover to hide his antisemitic communism) than any of the other candidates when you look deeper, he even said something like "privatizations of state companies after 1989 made no sense, they sold them at 50 times lower price to parasites". Leftists and feudal Jewish supremacists often create

a “right wing aura” around them to hide their leftism and disdain of gentiles. Many believe a “billionaire” is always so, they can be leftists from FBI *(regular CIA spy whose career is all made up and he oddly becomes a billionaire, like Elon Musk whose life is 100% scripted and choreographed to make it seem he's the super genius who creates endless good or sometimes, due to lack of regulation, temporarily bad companies)* role playing they're a billionaire, so try read the message behind the lines, not the words, meaning Trump could be the most leftist President we ever had, who prepares US for the 11 companies immortalism. Regardless, we need the immortalists, none of these ☺abysmal IQ☺ Marxist capitalist fascist dramas. The gov run by German spies, German President of Romania came up with a fake evidence that the vote was influenced too much by Tik-Tok (the actual data is that the # 3, the prime minister, for twice the number of TikTok views of # 1 Georgescu, so the TikTok stuff was a lie (a pro-EU party had a program that paid for all ads). This was another coup d’etat, as he says, like in 1860s when German Hohenzollern family took power from Romanians and ruled Romania until 1945 when Russian Jewish communists came to power. The gov stopped his electricity at his home on Dec 7th so that he could not sleep well in the cold weather. Georgescu got 2 million votes in 2024 aided by social media, in 2020-2022 he got 0.7 million views on many TV programs, and in 2014, German candidate and then president got 2 million extra votes (from 30% to 54% in 2nd round) in 2 weeks between the 1st and 2nd round via facebook, but no EU investigation existed into facebook as with TikTok in 2024, as Klaus was German who bought a villa in the highly German (Nazi) area of South Florida: nice climate if you have a high elevation house, resistant to hurricanes, heavier, better built, not like cheapest ones for slaves who die when it falls.

Georgescu is ultra known in Romania, so 23% of vote in first round is normal. No country canceled the 2nd round while it was taking place for the diaspora, only Germans running Romania can do that. Germany doesn’t want the slave colonies of East EU to regain freedom from Nazi rule. Georgescu, who speaks English (listen) & Romanian, spent 17 years in several countries outside Romania, moved to Izvorani before launching his electoral campaign, Izvorani meaning spring of years, Eternal Life. His wife is a naturopath into health/longevity for all with 4 certificates from USA. Georgescu explains that the largest multinational companies in Romania report 0 dollars profit with net loss of 0.1 to 4%, yet they somehow have money to expand everywhere each year. This fraud is only possible by the bribery of the corrupt government. They take advantage of the poorest EU nations like Romania, to maximize profits, pay 0 taxes. Georgescu explains his plan to stop all lending and that Romanians pay to foreign companies for products (water, food, gas) that they already have in their own country (prices equivalent to 35% of one's minimum salary or pension for 2 liters of water/day alone, when Romania got 60% of Europe's mineral waters and water would be free for Romanian citizens), how after 1989 the entire industry was sold for 20 times lower prices to enrich some EU, etc gangsters and enslave

Romanians with 200 billion in debt (from 0, see 43 min interview), just like Americans pay to Dutch-Belgian Ahold-Delhaize, a symbol of aristocratic terror for rotten watermelon and mismanaged Giant stores to sicken Americans and Romanians, owns the Giant supermarkets (ripoff vs American Walmart), German Aldi (very expensive some items vs American Safeway, glass in lentils), Americans are enslaved by Dutch Gaint Foods, German Aldi and other companies for groceries in USA, by Japanese and German car companies who install dubious devices in the cars that can write brains, increase heart rate while you sleep, attack you while you sleep from outside the house, write your emotions and cause pain, organ damage, as everything in communist East Europe that was important was sold off to France, UK, Austria, etc Germany while the music on radio-TV became ultra violent to destroy our youth, the drugs 10000 times more common, homicides and violent crime higher.

All Eastern Europe nations are viewed as inferior races, where they ship meat with 20% less actual meat and up to 90% fat. This meat is taken from the bones after Germans got the best, and pulverized bones are part of the meal, bones containing lead. Sort of similar to how Tesla cars microwave to death people on the 2nd seat, or on demand, depending on which people are to be exterminated slowly. Some people thought that Nazism and subjugation ended and that EU is a fair place, not only that, but the same product of much lower quality is sold at 50% higher price to increase national debt of East EU nations so Germans can buy and take over everything as the video explains. Just as Romanians and East EU were treated like garbage in Nazi Germany times, so are they today, since after all, the same exact Nazi aristocratic families of 1930s own all the mega companies. Sounds familiar to USA? The Italian fascists get the same label drink with 7x more orange juice than Romania, France/Germany get 2x the juice of Romania. 50% of Romanian arable land is in foreign hands, mostly West EU, that's why Georgescu won. Romania can be self-sufficient, but the West EU forbids it, all EU nations are to be slaves of Greater Germany. You know, Western Europe, USA exports to Eastern Europe churches, of various types to recruit spies to enslave local nations, just like Belgium King told clergy to "use the cover of religion" to distract locals from the riches in their own lands, so Belgians can steal them readily. Jesus is always used as a way to loot locals, they know it is a scam 'lie-kill-loot-rape' religion. Kindly recall the genocide of Congo folks by the "Christian" Beilgium missionaries busy looting. Then, always recall, the so called pastors, are usually parasites looking to defraud Americans, to steal their hard earned savings, employing the same tactics of the genocidal King Leopold. Some are naive low IQ folks believing some of the lies spread in 900 fake miracle, ritual books. Before you trust these con artists posing as clergy, it is useful to know how miracles were faked. Real religion is about true democracy, eterni ethics songs, max pay being 3 times the min, having 11 companies max instead of 500 million today, 1 language, not 7000, making all humans one family. Instead, today religion is a tool of 'divide and conquer' strategists, to make wars so they

can loot. These fraudulent pastors never talk about max pay 3 times the min, ending wars in 3 months, Eternal Universal Peace, basic right to a world free from violent crime in 3 years, anything, only phony low IQ stuff to keep masses docile and obedient to the aristocratic looters. Spirituality doesn't need clergy, spirituality or ethics is a natural quality anyone can nurture via youtube eternitone recordings, via actions or whatever, free of donations and scams.

So as you can see the purpose of European Union is the slow extermination of Eastern Europe and the takeover of all business, using toxic food as one of the 300 slow genocide methods. Got human rights? Sure, 14 million aborted babies were killed during 1989-2010 alone, more than twice the Holocaust, this is the example of a basic right, to be free, being used to depopulate. And defining happiness as sex to weaken the body and depopulate, instead of being free and independent, knowledge of blissful breathing, being able to rest, to make your own food, not export raw food and get junk poison in exchange, making all the basic necessities yourself, so that nobody can put poisons and spyware, hidden weapons in food or electronic devices. You know, in 1860s, they called the blacks or Russian serfs and others free after some emancipation decrees, but then you know, in reality they were still mostly enslaved. Its a semantic form, like you say "World War 2 has ceased, Nazism is gone," but it is not. You know Germany figured with Italy that genocide is a lot easier during peace time with regular products such as food, cars appearing identical, than making big waves in war. They get a lot less resistance when doing genocide in peaceful times, so they decided to continue Nazism in peace time.☺☺☺ Same for Dutch ultra Nazis in South Africa, USA, etc. That's why now the anti-EU or for EU reform candidate Georgescu won the 1st round of Romania election. Chocolate sold in East EU has double the fat that sold in West EU. Same company, same label. They noticed kid products are 30% higher in protein in West EU vs East. The irony is 45% of USA folks have some German ancestry and Nazism is actually a lot stronger in USA than most are aware, since many of these companies are not necessarily 100% German or Italian, even if the main European headquarters are in Nazi Italy or Nazi France, Nazi Germany. Many are American companies whose EU headquarters Nazis are in tune with USA based Nazis, all subscribing to the same religion: Nazism. This is why there is some anti-Americanism in East EU, they're seen as facilitators of German Nazism. Republicans are known to have financed the rise of Nazis in Germany. The criminal Brussels doesn't have the same education standard and product standard for all EU, since some are slaves. It's the same old story of USA: aristocrats versus slaves. 60% fat in meat in Romania, 20% in Germany. Take into account that Romania can produce all its meat, food, and not import anything from the so called "friendly West EU", but this is not allowed by the criminal governments of 35 years since the 1989 victory of Nazism over communism. How about creating immortalism in East EU, to be sovereign, use English as language instead of being slaves of Italy, France, Germany, Holland? The whole point was destroy all local industry so West EU

sells you poor quality products. So, having learned from the mistakes of communism and so called "free market" capitalism where choices are not free but imposed at gunpoint via brain writing gadgets, we can create a better thing. You know, 2000 years back we had chariots, now we got cars, so will our societies and systems improve.

Nazism is very common in many nations, even in China, where communism is a fiction. EU and USA will fail, unless super centralism replaces 20000 regulations for cities and states. One product standard in all nations, one law, known to be the best, not 40. Without that, EU will disintegrate, just like US is becoming a mumbo jumbo chaotic collection of loose states. USA needs to dissolve states and establish true democracy, one law for all. End Nazism now. ☺☺☺. West EU and USA give us Coca "Coal" *(Coke had cocaine in 1840s, then sugar, as sugar is very addictive and feeds cancer, hence East EU products have more saturated fat to cause strokes and heart disease and sugar to cause cancer and diabetes, brain shrinkage to faster takeover)* products with 7 times less orange juice than Italy, endless US/EU fake churches, $200 billion national debt from 0 in 1989, churches which are nothing but covert spy bases, covert military bases, recruiting and brainwashing centers to take over the country and drastically lower average IQ of the people ever deeper with the Jesus fraud religion. When Romanians or East EU in USA realize the scam, they're tortured to death almost, while they're in West EU or USA. This is the gift that keeps on giving, slavery, as aristocrats in USA give to Americans. Is it any wonder that there is some suspicion about NATO being cannon fodder for aristocratic looting? While some Romanians are homeless or overcrowded, many in West EU or North EU buy second or third homes in Romania, which are empty much of the year. The technique of genocide is similar to that US used, like Brits used too, in various areas they colonized. Exposing aristocratic thefts of trillions by US or West EU aristocrats from the 900 million slaves is unacceptable. Wake up slaves, declare your independence, in USA and EU.☺☺☺

Hear more stuff about the European Union (Western aristocrats enslaving all 500 million, like USA aristocrats enslave all 330 million in USA) so well in these 10 one minute tiktoks about: 1. resource wars and how big powers create wars to steal resources while locals fight civil wars 2. how to take resources (natural, like all empires), 3.0 maybe like 1.5 trillion stolen, 3.1. Romania (and all nations) could be debt free and self-sufficient, 3.2. banks enslave all nations with debt and 3.3. 13 more trillion they could steal from Ukraine 3.4. they use lies to brainwash, so to remove fear, listen to what is not said to understand how they enslave you 4. close down all Romanian/local companies, 5. get cheap salt, and never help local companies use their own resources (salt for 5000 years locally), just buy salt from Turkey or whatever nation to increase national debt to USA, IMF, etc 6. make all ☺abysmal IQ☺ slaves of church, big pharma, insurance companies, then destroy all jobs to depopulate by 20% of people moving as slaves in Western Europe as cheap labor, install puppet governments and use EU (German-French

invention to enslave all Europe?) funds to create 7. more useless businesses (car wash, not fish growing pool, waste water washing junk cars from Germany that mind control you) (see mind control by cars here) to depopulate and starve people with toxic foods (covert Nazi style extermination), check 8. Ukraine war resource theft, nobody talks about 8.1. World Peace when it should be the most important topic, as this book said since 2022 9. parasites make all profit from selling romanian produce or goods (sold in other nations 100s of miles away at 2-10 times the local price) while Romanians have no healthcare and some are homeless, living like rats without toilet even in some areas, the 10. eternal war of USA aristocrats on *all nations* (beat via war, as Bible says, all slaves in all nations to steal stuff, even after defeating the only rival superpower in 1991, the USSR, not ending wars in 1991, having no ethics of nonkilling or World Peace in 3 months, just "kill and steal, like British Empire, Muslim empires, Quran, invade only when stuff to steal is there, no ethics, all human rights talk used to steal, while torturing 2 billion with invisible devices, etc" all while claiming they're Christian or more ethical, then Russia started to fight back and try to invade former USSR republics to create frozen conflicts, etc, news never talk of Eternal World Peace: infinite thirst for power and subjugation of all races and nations, never any respect for the human quantum field, for nontorture, nonkilling, pure satanism right from the military aristocrats), and then take over everything, never freeing Eastern Europe or Western one: same scam like in USA, total slavery, just to German, British, American, French aristocrats. Then, the people who left, often are tortured to death if they see the scam, so they can steal everything. Only blacks understand this well in USA, as they were slaves for centuries, the other people in USA don't have a clue how they're slaves too. What happened to Romania (debt free in 1989, now owning 200 billion in debt, when they could have exported food, have 0 debts, produce many things, now deindustrialized) is what happened to 180 other nations: total subjugation by aristocrats in a few big nations (some of the same who enslaved blacks, exported slaves), using corporations that poison locals. ☺☺☺

The West EU simply want to annex East EU or, initially, steal resources to become rich and use East EU as periphery cheap labor countries. As a result of English choice and smart *peace above all else* policies, Singapore, with 5 million inhabitants, is the world's longest lifespan nation (Monaco alone lives longer, but that's a village of aristocrats with only 37000 people, not a real *nation*). *Can East EU* wake up, *wake* Americans *up too, and stop being such* fools? It's good for all Eastern EU nations to study English since age 1, so they can read longevity papers, since science papers are in English.☺☺☺ EU needs one language, one culture, otherwise, it will collapse like the Greek empire with 40 languages, Austrian empire (10 languages), Mongol (500 languages). It's OK if EU uses 19 fewer languages at first, East EU will never pressure the West EU to use English. The sooner the West EU awakens to immortalism and the need for 1 language the better for all. Now is the moment for East EU to graduate from millennia of conflict to the age of

~*~Eternal Universal Peace~*~ and brotherhood/sisterhood. Let the Ukraine conflict be the perfect catalyst to wake up from the war trance and bring unity. It's essential to create eterni tone prerecorded classes, as in the centralized free education & tone section and to teach the same exact chemistry, etc in English in all classes in all 20 nations, with the same immortalist educational system and 11 companies shared across the 20 nations. This gives East EU the ability to increase research innovation 100 fold and move towards better education, research and *development*. As the immortalism expands, nationalistic fervor subsides and we create the new pacifism of the Eternal Eternia Nation. Initially, only 5-15 countries may join, so let's first have the Immortalist Party win some % in every country to publicize on TV-radio the 'Nation' Building Project, the Nation Merging Process, for the Sake of World Peace, and merge *our* Education Ministries Fast, the Basis of Our Unity, the Foundation of it All. We need provide subtitles in all English programs, so people learn English by hearing it. Never use voice over English, so that people can hear the eterni tone of English of the new movies created by the Education and Culture Ministry of Eternia. Let's rename East EU 8 capitals to the qualities, like the proposed 8 USA states, let us have 8 rotating capitals (*1 for each 20 million people, more democratic, not like Brussels*) called the English names of the qualities we urgently need to bring World Peace in 3 months. Let's commit ourselves to the gentle eterni tone transformation of this corner of the world, to the Vision of Eternal Unity of Our Nations into one Eternia, and bring Eternal World Peace soon. Let's create our Unitary Flag, display it everywhere, with Eternal Universal Peace written on it. Let us rise above national/language differences, have a basic altruism to give up the pathological addiction to a language, in service to Eternal Universal Peace. ☺☺☺

We have a problem on Earth: 7,000 languages that slow down progress towards 900 year lifespans a lot. If we had 5 million languages, science progress would be almost non-existent, we would be savage cave men, *imagine having 5 million Windows operating systems, 5 million times fewer programmers for each, the redundancy is huge, everyone reinvents the wheel.* 5 billion people have poor access to education, since in their language, no youtubes exist on every topic as with English *(type any major chemical on youtube search and you get 500+ videos about its properties, structure, biology, etc),* nor endless educational sites that cover every topic, etc. Millions of teachers waste life teaching foreign languages, instead of the science of immortality, chemistry, physics; one language eliminates endless translators and teachers, gives us millions of new chemistry and physics majors for living to 900. Look at the ☺☺☺19 quadrillion trillion☺☺ freshman chemistry courses a little centralization can bring us. What? Also, given how many wars and genocides happened due to language conflicts (Russia Ukraine war is due to language rights according to the fake news), to be against 1 common global language, existing or that we create to replace all the rest, is to be against World Peace, to be for torture, war, genocide, cruelty. It's interesting how *due to the aristocrats' love of* MONEY, as seen in their mansions, the

entire planet wastes at least 90% *of GDP* and work hours in fights, acting busy, wars, spying, reinventing, translating between 7000 languages: every country's resources are prioritizing military and espionage, all else is secondary: they waste enormous resources with duplication due to the lack of immortality capitalism. If workers had any real freedom to choose, *all nations* would create and adopt a single language to end the terror of miscommunication, wars of language, inefficiency. This is because they realize the benefits of one language for all humans. But the aristocrats dislike it. Divide and conquer. Why have one company producing a 500 year lifespan for 8 billion, when they can have 800,000 and each owner makes 40x average income and they make 80 year lifespan products? ☺Abysmal IQ☺ for all, the system today, the *Age of* Aristocratic *Terror.* The liberation of humans from aristocrats will take time, meanwhile at least we get fewer nations. Solar panels prices went down 500 times since 1978, so can prices for the most flood earthquake fire proof raised (8 ft 1st floor garage only) houses for all via Immortality Building Inc like companies. This enables all to be so happy, motivated, to discover 500 year tech. All we hear is aristocrat lies that we can't end jails, can't give all single family houses.

With centralization of language and business, we discover how to make 10 times more materials 900 times cheaper that never rot, catch fire, etc from the same raw materials: no termites, mold, etc. We, the workers of the world, have all the power to lobby for fewer languages and free us all. The World Peace in 3 months section (pages 4,5) explains more advantages of knowing English, that appeal to people who dislike UK or USA, Canada, Australia, etc: it allows you to reach out to world citizens or, if you're brave enough, to immigrate there to be turned into a guinea pig for the latest torture device, or to simply give locals new ideas, besides the fake elections and political parties system in 200 nations. We don't really need political parties that punch each other in parliament or sometimes shout like Hitler in more than 100 parliaments, as a government of the people, not the rich. With English you can talk to locals in 200 nations, so it makes sense for the Immortalist Party candidates, leaders, etc in nations who don't have English as a native official language, to speak the same sentence in English and local language if they're really serious about World Peace in 3 months, thereby teaching everyone English, with TV showing subtitles and English writing, so they can bring a world of understanding and truly lasting peace, not of 3 months or years, but a trillion years. People who know English can read 1 million times more science papers than thousands of languages used today, so it's in the national interest for politicians to always speak same sentence in English and local language to move us towards global immortalism, instead of merely talking nonsense about peace. We gently need 1-5 languages max TO CREATE THE MOST EFFICIENT world of healthcare for all innovations, and ~*~Eternal Universal Peace~*~. Fake nationalists promote 7000 languages and all the insane level of translations, misunderstanding and enormous scientific illiteracy and ☺ abysmal IQ☺ that that brings globally. These far right parties are *sabotaging the* human right of

having access to 1 million *times* science *papers for all*. The far right parties in Europe for example are often paid by Russia, who wants to disintegrate Europe and make Russian the main foreign language taught in schools, instead of English. The identity of a nation is its tone of speech, its life expectancy, not the language used, its culture and its education, political system, how fair it is, or how feudal it is. Any language can be spoken in 10000 tones. The language spoken has no meaning in of itself, it is the tone that makes all the difference, as it brings 1 billion year lifespans of not. English is far easier to learn, so why not stick with it and bring it on TV daily, if it expands life expectancy via science papers, knowledge of nutrition, etc? The lifespan of Europe will be higher if they choose one language, instead of using 30. So, why can't they agree to one? If a language helps us to reach 500 faster, then we choose it.

Thus, it makes sense to talk every day on TV-radio about how to create fewer languages and nations, to minimize fights and arrive at one language. If you want nonkilling, 0 violence, 0 prisons, etc, Immortality *for* All, if you want to love all humans, you're naturally going to be 100% for giving up a language and replacing it with one planetary language we create or agree on, but the evil nature of man always places his clan or tribe above the species, and 100s of other goals above nonkilling, above having one language so we bring Peace fast, useless goals such as expanding their country, destroying in the process the quantum field of the entire human species and keeping everyone backwards, fighting like wolves and hyenas. To understand why we need fewer languages, let us look at the Ukraine war issues, in an area with 100s of wars in the last 3 centuries, fueled by linguistic differences to a great extent, an area (like USA, India, China before the countries became unified via one language) with untold suffering and bloodshed due to the "low IQ, lack of empathy for victims of war and stubbornness" of men, big ego,☺☺☺ or brainwashing by regional powers, unwilling to give up his language for the good of the entire species and planet, scientific progress, peace, etc that give everyone☺☺☺ 700 year lifespan 500 times faster etc. Notice how all talk about giving weapons to others, while not talking about everyone giving up their language for an eterni one we create for World Peace to last more than 3 years once we achieve it, to last for a trillion years. Their traditions are more important than nonkilling, the very first stage of spirituality. What spirituality is that?☺☺☺ Can we have more compassion for future generations and choose one world language soon, at least 5 max? People forget language is only 0.01% of a national identity and culture, 99% of a culture is almost perfectly reflected in its speech tone, eterni or less so, intellectually honest (this and that evidence suggests that the hypothesis of a causation link, not merely correlation link, exists between A and B and we can further test this hypothesis to see if true by designing a randomized interventional study, etc) content tone (*not 'We believe (without any evidence that is unfakable) in The Flying Spaghetti Monster, the Holy Spirit and Holy Sister of the Mother God of Antarctica, the 5th'*), which reflects exactly the emotional, intentional, thought tone, as

shown on MRI brain scans for areas related to compassion, ethics, gentleness, kindness, intelligence, hypothesis thinking, creativity, etc vs the opposite and MRI is a science fact. Thus, perhaps, you gently agree that literal (not emotional tone) language *is* irrelevant *in of* itself, unless *it gives* access to science papers *and* planetary *peace thru* ending language *fights*; it is the emotional language tone of immortality for all in music and TV-radio speech that defines 98% of a culture or national identity even (if one is really addicted to nationalism), not its language; all ethical behavior is learned by kids via the emotional tone of the parental and teacher language, so it's imperative, to the prevention of humanity's end in 10 seconds, to end millennia of shouting, insulting, cold speech with something truly kind, healing, nurturing that reminds the listeners of the qualities humans lack (mention them every 20 words, the 20 we lack the most) and of the tone needed to heal all negative emotion on Earth, so as to sustain the World Peace we attain in 3 months, so for this, Eternia can create *a 3 step process* of *public speaking for any politician*, in parliament or any public venue shown on TV-radio-Internet to others: ☺☺☺

13.20.3. Special eterni tone speakers for all public persons to lift the vibe, extend lifespan☺☺☺

The Immortality *Nurturing* Agency designates the 2nd speech writers *(politicians have bad tone usually, in writing and verbally, due to stress, yet can be good at their decisions, not really at public speech that heals millennia of trauma and genocide, we need division of labor to achieve perfection, like in a company we have one guy does plumbing, another electrical, for better results)* to do a *speech content* upgrade to eterni tone written language, with "gentle kind soft nurturing tender" ☺☺ happily included in *each 50 words required (1 per sentence)*, to ☺☺ *lovingly tenderly gently kindly*☺☺ infuse *speech content* with the most polite expressions and qualities we lack, and then it gets to a 3rd person who is not stressed, who sleeps very well always, doesn't deal with all the stress of writing the draft, decision making or the improving and is focused on delivering the speech for that Minister, Representative, Senator, official, since most people on the best day of their month can only deliver about 3 minutes of truly eterni tone, which is the most challenging multi brain areas task to do for the average human who has the 2 hemispheres very separated. Every sentence and vocal tone must abide by the tone, ethos and vibe of the first 2 pages of the Immortalist Anthem, the Universal immortalist code of conduct. To prevent making every parliament session a shouting match at the market or some kind of comedy show with primitive emotions of orangutans, it is perhaps better for the debate to not be made public and the final result to be recorded and broadcast on law.gov by a 3rd person speaker, including the reasons for the choice vs other choices presented. This is because it is not possible overnight, in 24 hours, to find all that many speakers for 300 legislators; in our society of every 'chimp' is a business manager, we get 33 million junk companies and tones and the same happens with our quality of tone in these legislative bodies. Senators and representatives can type or speak on a computer their thoughts remotely from Hawaii or

California, no longer having to fly so much, and the public speaker will see the text and read it, or they can submit it too, but you can do real time debates, whereby the speaker will say whatever the Senator X typed: "Senator X: We need to gently kindly end bilingualism in USA for enhanced national unity and security. Just as we banned German during and after WW1, we need to ban Spanish. As a Senator for the Immortalist Party, I'm dedicated to 11 companies, one culture, one language, one nation for all earthlings, and it makes more sense for that language to be English, the language of science, so why do we need any other language in USA if we want to bring World Peace in 3 months and 1 language in 5 years or 2 decades?" These speakers may not be public, but top secret and their voice will be played, to protect the quantum field of the English speaking world against quantum attacks as explained in the "Elect Policies not People" section of the fake elections chapter. One thing that people forget is that the reason we reached a *9000 times* faster transport speed over shouting Greeks in the 1st parliament, is the *division of labor,* so we basically will enable our society, for the first time, to speak in parliament via a designated speaker (assigned to 20 officials perhaps), so their 1 or 5 minute reply or position, is delivered by the speaker and the AI system maybe in the future who can do the upgrade to eterni content and tone by itself without humans involved. Thus, the inauguration and campaign speeches by a President or candidate can only be 2-5 min max, the max one can hold the most eterni vibe during live or recording it for later release; the rest of the 10 points are made by 10 speakers in angelic tones, 5 min max each, who present the 4 year (varies by nation) plan of the President; we don't need big crowds to make smog and gather in person, etc, make it small, White House lawn maybe, low key and use youtube to show it for the rest, to save the lungs of millions killed by the car smog to go to rallies, speeches one can see online. I'm shocked at the level of aggression and shouting by every speaker at inaugurations, as if our planet is unable to make a better microphone to enable something more like this, far more eterni than this in tone (but about peace), like a relaxing youtube speech that soothes and comforts, hear this lady. Or make the gathering smaller, stop shouting since shouting is the precursor to shooting, to wars and violence, show some grace and gentleness, not the loud thunder of bombs when speaking, be soft, tender, graceful, or Godly. ☺☺☺

For Peace to be real, crime has to go down from half a billion violent *incidents a year to 0*, and this can't happen with the *hidden, historical inertia, genetic inertia* level of brutality, cruelty or lack of '*grace*, *healing* *love* and compassion'☺☺☺ in most speeches worldwide, done by overworked ultra stressed officials who do the job of 2 people and are severely sleep deprived and lacking in vitamins; we need compassionate stress relief by delegation of some duties, so each can focus on their job well. Our speech needs to be musical, a work of art, a song to God in listeners or the Immortal within if atheist, half a billion times more loving, *gentle*, *healing*, spiritual, so we need low volume eterni instrumental (50 examples) meditative new age music in

the background too to calm the audience: like waves, flute, or this. We can let every 2-5 min inauguration angelic speaker use a different background music, to pacify all, expand emotional intelligence, and arouse the love for civil kind interaction, for gentleness, to give a gentle lift to the desire to transform and become something kinder, more *Nurturing,* Tranquil, Immortal, Eternal, Ethereal. God and any Immortal, are Loving Gentle Tender Soft Grace, not the loud shouting we heard for 234+ years at USA inaugurations *(04-30-1789, 03-04-1793->1933 (140 years, like 40 days in scriptures, 40 Romania area code, 03-04-1977* Romania earthquake *caused by nature or USA* ionosphere devices*), 01-20-1937->today),* so we can always use better microphones to enable public speakers to ☺☺*lovingly tenderly gently kindly*☺☺ choose the real, *spiritual*, eternal, trans cultural, beyond religions, Immortalist Anthem like nature and vibe of God (or the vibe of Immortals, our future kids who live in serene bliss for trillions of years, if atheist) because "*the* fruit of the Spirit is love*, joy,* peace*,* patience (not the *rushed* shouting*), kindness, goodness, faithfulness (to* Immortality *for* All*), gentleness, self-control*", and because God is not like the 1000+ horrific quotes of the 'holy' Bible that have defined our speech, ethics, tone and way of life for millennia. With each year, we become more telepathic and we understand the tone, the telepathy that accompanies the words the Spirit of the God of Immortality *for* All gives to us all thru all around us, be them high officials or common folks. More *important than what is said is the* tone*, what is said is ephemeral sometimes, a fleeting tech or goal to increase lifespan by 200 years, but the love that is radiated is verily* Immortal in its Eternal effects*, the same now as a billion years from now when that sci-fi tech today is pure garbage then when we live to 500 million; love creates quanta that benefit humans forever, their* soul collective*, and love leaves decent memories to our grand grandsons, not garbage stone age tech descriptions, but the vibe of* universal loving kindness*.*

The President, senator, governor, cop, FBI officer, University Professor, etc can speak 1 minute sometimes, if their tone passes the MRI, verbal test for *eterni*, but then he delegates the speech to *his* eterni *angel* tone *staff for the public, who, like an athlete,* who can do 400 pushups vs 10 for most people, can speak eterni tone 40 times longer daily (due to his 25 year training since age 0.1) as that's his job and it's very exhausting, it's harder than solving differential equations, or doing a regular 8 hour job, it's a mental effort that is all consuming for current DNA due to genetic inertia: hence these people need breaks and can't speak many minutes per hour, so each person who debates in public, may need 2 speakers after they texted their reply to the speaker; max 4 hours/day for a speaker, use echo (less effort) and the rest has to be a lot of meditation, rest, angelic meditative music, taking care to not speak and stress vocal chords. For police departments, they can select an employee (listen to the sample tone) of the Immortality *Nurturing* Agency Speaker Department, who sends a speaker once a year if they only have TV interviews once a year or public speeches, if they got only 5 people in their department; same

for all local and federal entities; schools create online videos using the top speakers that are shared with 5000 schools, unifying curricula as explained in the centralization of eterni education tone (one emotional language for all); this speaking with big microphone/echo, meditative background music will uplift the community 90 times more than any cop can usually and prevent violent crime way better; speakers will be healers, focused on aiding society to prevent violent crime. For all to have a benign universal loving kindness intent, they need to hear it via speech daily on radio-TV; this means a u-turn for all nations that join Eternia. ☺☺☺

Thus, the 'ever trying to be holier to inspire all to be holier too' all *gentle President* of the Land of Universal Freedom from death, torture and violence, is so bestowed by Congress, Parliament and the Supreme Court with the imperative holy duty, by Constitutional Amendment, to guide via his weekly speech to the nation, the Land of Immortals, Eternals, the Land of Eternia, Eterna towards the Ever Higher Expression of the Ethics of | | Immortality *for* All | |. This weekly speech, mandated on all TV-radio stations, can become every 2-3 days, and be made of 2-5 minute reports in the most healing tone by | | Immortality *for* All | |'s most healing voices *(younger to enable highest activation of MRI and* eterni tone *control of vocal patterns due to higher brain mass, less aging)* using the most serene background meditative music, about the Eternal Transformation of our Nation into the Abode of Peace, about achieving World Peace in 3 months that is maintained forever, for the fulfillment of eternal goal for all interested humans in all nations: | | Immortality *for* All | |. So, while the President may speak only 1 minute, the 2 hour program he co-designs with the | | Immortality *for* All | | Vibe Science Council, as a guardian of universal gentleness, kindness and eterni tone in public discourse on TV-radio, contains the reports about the use of Gentleness, Scientific Method of Hypothesis *Formulation* and *Testing*, Discernment, *Grace*, Eterni Tone, Music, Altruism to transform, resurrect the spiritual and physical life of various enterprises, towns, nations, etc, to reduce violent crime 500 fold, later 1 trillion fold in the nation, replace all broken devices, poor insulation, single pane windows (for noisy areas), jails with the Abodes of the *Immortalization* of the Civilization, for the Eternal Dance of Liberation from selfishness, aging, all causes of death, until there is no more violence, jails, only healing educational centers more beautiful, colorful, artistic, holier, with beatific more serene music not found in church today, the high tech for the Eternal Transformation into Saints.

In the New Age of Spiritual Renaissance and *Immortality* Tech, all interested residents are invited (see details) to become pastors, via their youtube channels, free PDFs, of the Eternal 'Religion' or Spirituality that none can have a monopoly on since God beats in every heart and connects with everyone directly, to become pastors and disciples of the Eternal Philosophy, Ways of Life, Champions of the Eternal Ethics, Human Right of | | Immortality *for* All | | in this and other dimensions, ways and rights that Belong to All, the People of Eternia, the Eternal Truth of Gentle Tender Soft Healing *Nurturing Compassionate Universal* loving kindness. The day when

every street vendor tone becomes music would be over. We can't evolve past blowing our planet up soon unless we change the way we intone our emotion, thought and speech; we're not there yet, but the 10 seconds end of 100% humans is ever closer. It's never too late to start the process of change and with so many wars in East EU, we need it fast, before WW3 ends 70-90% of humanity, in 'preparation' for the final event that can end us all in 10 seconds. All ethics teaching is canceled by the bad tone on TV-radio who is the real teacher of emotional and ethical intent behavior, so let's be ethical, spiritual always: hearing one person once a month speak eterni content and tone, if lucky to find such a pastor on his best day of the year, 1 in 10,000, will have 0 effect if that person hears 4 hours daily tones that cancel that effect, it's like you take 500 steps backward for every step forward: why do we do this? It's inefficient, a self-sabotage of the entire civilization; perhaps, a simple solution is to☺☺*lovingly tenderly gently kindly*☺☺ have WAY fewer "liquor stores, casinos, sports arenas, vape stores, redundant businesses (via centralization), HR, admin jobs" so we can hire the 5 million of the Immortality *Nurturing* Agency, that has about 90,000 eterni text/speech experts, MRI techs on payroll who also help create new movies (feedback), music, supervise, approve all books, TV-radio programs, lyrics/movies, etc for global reduction of violent crime a trillion fold in 10 years, from half a billion reported incidents a year, to only one max (99.9% of crimes unreported); then, the World Peace we reach in 3 months, will easily last forever. *What tone brings in half a billion☺ times more ☺loving kindness Nurturing grace healing tender softness, peace?* That is the tone we need to replace TV tone.☺ We need a little reality check, and realize crime comes from tone too.

Cultures of vastly different speech tone, music, can have same language, like English; it's the culture of eternal scientific discovery and peace, the emotional tone of language that determines lifespan, not the literary language, so giving up useless little spoken languages makes sense, since then all have equal access to science papers in English; the talk of *equal opportunity* to science papers is a lie, with few knowing English in many countries with English as second official language. Why not give all access to science papers, most of which are in English, so there you go, equal opportunity and social justice for all nations. For nationalists who adore God, the God of infinite love for all beings, or Buddha of infinite loving kindness, we say: when wars happen, the first thing is massive torture, killings for those resisting new language laws that replace old one with new one, going back and forth each century; this happened a lot in Eastern Europe and all over: thus, by all speaking one language, at least we eliminate these forced language changes that waste enormous amounts of human energy and lead to even more factionalism and desire for war; therefore, we can argue *supporting fewer languages is good karma as it reduces the gravity of suffering*. While a person can't bring World Peace in 2 months, humanity can bring it, if all try to support English and fewer languages. Talking about double standards, Spain is for Ukraine splitting from Russia areas (but against Catalonia splitting from

Spain) that were for 2 centuries part of Russia. Turks also occupied Ukraine for 300 years (1474 to 1774), before the Russian empire occupied most Ukraine. East Ukraine was part of Russia before Lenin and the 40% Jews, real Jews or their spy cover to hide true foreign state they spied for, per Wikipedia, of the Communist Party initial political bureau of the Central Committee gave it to Ukraine, per Putin too, to create more division, increase land where Jews were traditionally settled in (Pale of Settlement) maybe and make Crimea harder to get back by Russians (who were a bigger threat to Jews than small nations like the USSR republics), by 1954 giving of Crimea to Ukraine. Lenin and alleged Jews were trying to get as many people to join USSR, so they allowed and promoted local cultures of the republics that joined, without focusing on one language initially, since they had to do a lot of changes to the existing republics to unify the USSR. However, the problem with that it that this process started a decentralization and multiplication of languages or cultures, that led to extra inefficiency and helped the eventual collapse of USSR. The language multiplication, as opposed to reduction, leads to more translation jobs, instead of jobs to improve the lives of workers, to shorter lifespans, as we learn illogical conjugation of verbs, instead of the science of living to 500 in perfect health. This "drastic lowering of average IQ" then leads to less awareness of sabotage by spies. Later Stalin and others reversed some of these language multiplication programs, but the spies wanting USSR to fail may have won. Communists were simply trying to stop the slaughter of workers and their subjugation and didn't really think much about efficiency of research to help workers live to a trillion years old. Back then, the communists were trying to get workers have basic rights, instead of being eternal slaves, it was a stage of emancipation of the people from the aristocratic terror of 25 millennia.

All wars thruout history were caused by aristocrats (see their palaces) and their royal family friends, who in their infinite greed, hired mercenaries to loot and attack nearby lands. Winston Churchill was so brainwashed by the UK Royal family, he fought so hard to brainwash Stalin to stay out of Greece, in the hopes UK can preserve as many monarchies in Europe. It's easier to divide and conquer with nationalistic monarchies, so there was no idea of uniting with republics joining as one state. Why can't Europeans become one country speaking English? Why are the UK royals using their huge salaries to support monarchies? It seems the UK Royals are only interested in power. Churchill didn't care about the poor, homeless, etc, just like today, UK, Canada, USA, NZ, Aussie media are flooded with meaningless royal family fake news, but no change is made to remove violent crime, jails, wars and homeless. Royal families can be infiltrated and controlled by Brits, so it's a good scam for the UK. People are enslaved, as only elites know English, rest being slaves. ***Europe needs to learn English and become independent of British monarchy games.*** Having endless time on their hands, the royals and aristocrats simply worked the peasants, poor people and others to death and started wars to expand their wealth.

This happened in the Polish Empire too, not just British, with the zealous support of the Catholic champions of subjugation of the poor. Their atrocities are not talked about in the history of "aristocracy" or humanity or capitalism (capitalism has been the mainstay of humanity for 25 millennia, while immortalism has never existed), so in Florida for example, in public schools, they will present the evil and dangers of communism (the torture they did, etc) without talking about the atrocities of bankers, of capitalism, of aristocrats who started endless wars of greed using slaves as cannon fodder, thereby destroying the workers even more and even the entire humanity itself, since people fight instead of discovering how to achieve better healthcare for all, longer lifespan for all, etc. Immortalism is not communism, the immortalism focus is eternal happy life for all, for both formerly aristocrat, since aristocrats disappear, and workers. Immortalism is against war, any violence and torture, unlike communism or capitalism. The difference is big. Immortalism is a mortal enemy of random capitalism used by aristocrats to lower IQ and subjugate all. Aristocratism, also killed 300 million people, just like "communism" killed 50-120 million per estimates, communism made in and designed by aristocratic regimes to attack the feudal competitors in the Russian Empire, etc and to dismantle the Russian Empire. A few pages in the immortalism section explain how UK, US, etc have supported communists covertly, while publicly criticizing them in order to hide their financing the spies within these regimes: a typical scam run by foreign nations is to promise the workers amazing things via a new regime that actually the foreigners heavily control: the workers fall for it and happily kill millions of their fellow men to get rid of "so called bad guys". 90000 year lifespans for all means high efficient progress and are not feasible when aristocrats exploit the rest of humanity via war and covert social engineering, that slows progress in science 40000 times. Aristocrats can use pseudo communism to commit further genocides against the worker class, to hide the real genocide perpetrator (the spies who remotely control one guy to order mass killings), so it's not clear which communist movements were not hijacked or taken over, infiltrated or manipulated by the aristocrats themselves who used "communism" to destroy other nations via genocide, just as in the old times of fights among the feudal lords. Life was so hard, that they could not wrap their head around living to 1 billion and proving to all scientifically that the miracles were fake and there is no need to torture anyone, since there are 700 trillion ways to achieve the end of aristocratic terror of humanity, without any violence and torture. The big mistakes of communists were torture, killings and the lack of communication about the atrocities committed by aristocrats last 25 millennia, especially the Catholic Church and others. These Catholic, etc atrocities, combined with the Catholic pure fraud and destruction of human intellect and hypothesis testing and formulation ethos of modern science,☺☺☺ of the basis of honesty and progress in human civilization, would have been sufficient to convince the masses to abandon their evil baby torturing people enslaving rituals, without any need of torture of ☺abysmal IQ☺ clueless priests, who sometimes sincerely believed the lies of the crafty Jews and Italians who

took over the entire planet with the Christianity scam. The Pope isn't Holy, he rules over a vast empire of espionage and torture. When communists were constantly terrorized and beaten, like in the beatings in the evil Bible/Torah (kids, workers, sex slaves) or the evil Quran (sex slaves, mutilated infidels, kids, wives), Vatican torture, by the aristocrats creating new ways of achieving that, they didn't think much about living to 1 billion and being kind to barbaric aristocrats who commit genocide against the workers, only about surviving and making it alive.

You know, someone who has been hunted down by aristocrat secret police for simply asking for the end of serfdom, who had relatives killed, tortured by the Tsarist police, etc was not necessarily the most trusting person, so they were afraid that the fanatical supporters of the Tsarist regime would kill them. They were obviously mistaken, since lifetime service to Immortality *for* All in confined cities (to prevent violence that the Bible conditioned people to engage into for millennia) would have achieved more infrastructure projects than mass killings and made USSR stronger, but they did act out of fear, so they decided to kill first the serial killers, torturers of Tsarist regime (the Tsarist police shot 100s of people for protesting one time) before being killed by counterrevolution from the encampment areas of the violent thugs. It's hard to put oneself into other people's shoes, and we see today how people support killings in wars, so how legitimate was the killing in the war against genocidal aristocrats? For immortalists, the torture used by zealous communists or Russians/Jews having other ethnicities and using "not being communist enough" as a made up reason for exterminating other groups via torture, it was a mistake, needless, but humanity can't evolve suddenly from chariot to space rocket, or from genocidal aristocracy and monarchies with secret torturing police (MI5-MI6, etc in Britain, others elsewhere, shooting people in their own country for not being a slave obedient enough) to immortalism. All too often, spies and gangs torture people a lot, like USA often destroys a country covertly using 3rd party actors it controls, only to come in as a savior and be a parasite. Today, in USA often times, the bad type of Russians, Italians, etc, or even Jews gang up on a 'gentile' (someone of a different group or country), to destroy him: pretending to be gentile and a friend, all they do is trap him (in a house they rent to him or room or they sell him, fit with torture devices) and torture him 24-7, so as to then use one of their gang members, to "help" the newly disabled by torture guy (or lady), that is to feed off him like parasites (the doctors, lawyers, etc for some victims, all part of the gang), the gangster is posing as a friend of a newly destroyed and disabled person (country if on a national scale). The Jewish and Russian communists used 'not being communist enough' as an excuse to kill anyone with any trace of intelligence, to ensure complete control over the enslaved nation. This is seen in the relentless torture today by spy agencies whose only result is to destroy the human quantum field, due to the natural selfish drive to maintain their power over other nations at the expense of humanity's future of ~*~Eternal Universal Peace~*~ in 3 months, which is impossible with violence (torture).

We had chariots for 5000 years or so, and only recently the space rocket emerged, we had genocidal governments of torture and killing for millennia and only recently, the idea of immortalism emerged: 0 torture, 0 killing, 0 yelling, 0 violence. We can kindly recall the October weather and how impossibly difficult life was in ultra cold Russia in 1917 for the poorest people who only recently, in 1865, experienced the abolition of serfdom, of eternal slavery to the aristocratic rulers, abolition which was not that "total" in virtue of many lethal shootings by the Tsar of various protesters demanding basic rights, just like with the 1865 "end" of black slavery. The challenge is to convince people kindly, not to force them, that it is in the interest of the collective of nations to adopt one language, to increase everyone's lifespan, instead of 300 languages. Some spies however will try to promote separatism and many languages for their enemies, while suppressing many languages in their own country. People are being informed that the communists (not true communists, since a true communist tortures nobody, helping all to live happily in the utopia) did a lot of torture, which is true, but that's only half of the story. The torture was the unconscious reaction of starved, beaten, malnourished workers, peasants, serfs who have endured torture, subjugation for eons, as described in the historical accounts.

Today however, people who love decency and have any IQ left after CIA torture, are aware that the end, Immortality for All, true democracy, true opportunity for all, etc, decent shelter for all, etc can be achieved without torture, though the old style terrorists from both right and left leaning spy agencies, are just addicted to torture until the day of the quantum weapon may get rid of all of them in 10 seconds. The struggle of humanity is not against Nazi aristocrats only, but against all who torture others, be them religionists, spies, cops or leftists. The Bible has indoctrinated billions to love violence, punishment, cruelty, torture and using the most unethical means of terrorism to impose one's twisted views about Jesus or God on others, so it was very difficult for these starved workers to also inspire, reeducate, without youtube, mp3s, ultra serene music, healing music, etc, the wild beasts of the secret police doing terror for aristocrats, to behave and not start their typical violent activities. Today, immortalists have created the Immortalist Anthem to inspire all to give up torture and violence, shouting and yelling, especially the military, cops, spies so addicted to these heinous crimes against the human quantum field. The struggle is not over, today we see that same violent energy pervading all gyms and many stores, as the violent music void of gentle tender soft grace and World Peace in 3 months, Immortality *for* All Vibes, stirs up the devil within all, readying all to kill, war and beat others as commanded by the aristocracy. The entire planet is ruled by the military-spy agency aristocracy who is out of touch with human suffering and void of the *healing*☺☺☺ *gentle tender soft nurturing graceful compassionate* eterni *kindness,* tone and music. So, it is up to the citizens to create the quantum field that brings universal healing and peace and stop being a macho wild robot doing evil for the rich gunmen who use remotely controlled "celebrities" they destroy by

hidden or overt torture, to create violent music and make that music the most popular, in order to have endless armies ready to blow themselves up at the command of the generals creating our "music". Today, the aristocrats continue to torture as shown here.

A great video about Ukraine, Kievan Rus, Russia explains historical changes and how much energy is wasted in national identities and languages. Crimea was given to Ukraine by Khrushchev in 1954, the Soviet leader from Ukraine-Russia border who spent much of his life in what is now Ukraine, especially Donbas where Russia-Ukraine war started in 2014, and who was the protege of Kaganovich, the allegedly? Jewish official *(who lived to 97, so how come Soviets were anti-Semitic if he lived so long?)* who supervised or was forced to supervise *(via brainwashing by those controlling from behind, to frame Jews or whoever the world spies believed to be the real ethnic identity of Kaganovich, like with Hitler/Stalin, all world leaders being a puppet controlled by spies, etc)* the alleged? intentional genocide of 5 to 9 million Ukrainians during the forced collectivization and Holodomor famine (again in 2022?), indicating the "Ukraine enlarging" *secret doers* may have thought Khrushchev was their asset able to make a larger Ukraine for Jews or others who wanted to split USSR. Collectivization led to many deaths outside of Ukraine too, and Russians claim 31% of Kazakhs died, 23% of Volga Russians, 20% of Ukrainians thanks to the policies of Jewish/Russian communists eager to exterminate gentiles per the "holy" Torah/Bible: De 7:1-16 & De 20:10-17. Russians invaded many areas and wiped out locals, giving their houses to Russians, as they do now in Ukraine, check out the execution of Ukraine civilians, the forbidding of Ukraine textbooks: if caught reading Ukrainian language books, parents lose parental rights, people get 5 years prison, etc – so Russians complain Russian language is not allowed in schools after Crimea invasion in 2014 too much, but on the other they don't respect Ukrainian language in the annexed territories). *Why can't people be civilized and create one language for all nations to adopt and get along*? Judaized (Christianized) Russians, brainwashed by the unholy Torah-Bible *to become* unspeakable monsters *from Hell*, killed 1.5 million Circassians in one of many genocides that enabled them to expand land size 100 fold in 8 centuries. Thru methodical murder and genocide, encouraged and deified in the Bible or what Genocidal Churches/Synagogues call "The Word of God", the Russian state expanded with the same violence we saw in Ukraine in 2024 (Ukraine and Syria ruins the Bible and Quran caused). In Eastern Europe Russian KGB Russians and Jews killed or destroyed thru torture, starvation, sleep deprivation, like CIA-FBI do too, anyone with any intelligence, and we see today KGB and MI6 hard at work to encourage the lowest IQ things in East EU, like local folk traditions supported by King Charles foundation and his 10 properties in Romania, to keep locals as low IQ as possible. Drag is from Russian and a new dubious tradition came after the KGB assassinated Ceausescu in 1989, in order to keep Romanians lower in IQ than ever: Dragobete, some made up holiday where on the ultra cold day of Feb 24th, boys are supposed to

do something very dangerous in cold weather: expose their lungs and hands to cold weather, pick up flowers, run to a girl they like, increase their cortisol and then, in that clouded mental state after the run, try to kiss the girl, and if she doesn't want to be kissed, it means she doesn't like him and has to run to another girl. You never hear Mossad, MI6 or KGB created memes, trends, social engineering, teaching people to live to a trillion and to be self-sufficient… Why? It's like Valentine's day cult, to brainwash people into the Catholic fake miracles. This 'new' post-1989 Dragobete holiday from hell is anti-eterni, anti-gentleness. In the fascist Nazi dictatorship of Russia, USA, it is often frowned when one dares to criticize the Infernal Word of 'Satan', or Cannibal Chimp, the Bible that deifies slavery and eternal violence, so much so that even the Belgium King wanted to emulate the Russian interpretation of the Bible and did a genocide too. The Quran, the Bible rewritten, also caused endless genocides. Likewise, the Holodomor genocide of Ukrainians by Russians and Jews was slightly more complex of course, since many nationalities, not just 90% Jews/Russians were in the top bodies of implementation of kulak class destruction. It's was a boomerang process resulting from centuries of extermination by aristocracy of the poor peasants, and ***kulaks were subjugating the poor peasants too***, like real estate agents or mortgage brokers exterminate the poor in America today sometimes, providing mortgages, loans. The blood sucking mortgage brokers do the same kulak actions, so it was sort of a physics effect there: action (steal to build palaces via theft), reaction, killing met with killing. In classical mechanics, 3rd law of Newton: action force = reaction force: rich kill the poor, the poor will eventually kill the rich. That's why immortalists want to create a nonkilling society, to avoid the genocides of the past perpetrated by the rich or poor. The wealthy, who control all spy agencies, military, gang up to exterminate all who can end *feudalism* that didn't actually die at all in many nations, merely going covert. That is why we need Immortality *Nurturing* Agency to replace FBI-CIA and Eternium to replace the US military. It's for the good of World Peace. Once the drive to kill or destroy the oppressing kulak class started, old inter ethnic vendettas came to the fore and hard core Jewish, Georgian, Russian fanatics took advantage of the chaos to exterminate enemies: Russians, Ukrainians, Kazakhs. All immortalist reforms need to be done *tenderly gently,* out of universal *loving compassion* for all citizens, rich or poor. No violence. All these things coalesced to form motivations for the extreme events, with Georgian Stalin being eager, backed by Jews around him, to wipe out more Russians. This doesn't mean that KGB didn't have units (planning genocide of non-Russians using kulak dispossession as a cover), who were Russian controlled, not Jewish.

In addition, it is ***very possible that various spy groups (German, British, etc), not even Russian or Jewish,*** who infiltrated USSR government while pretending to be Jew or Russian, sometimes planned to manipulate this 'collectivization' as a way to ***exterminate millions and weaken the USSR itself***, meaning spies manipulating Jews, Russians to be low IQ, when it would have been

far smarter to use the 10 million dead as laborers to build amazing infrastructure and make USSR far stronger when Germany invaded in 1941, leading to far fewer deaths, maybe 10000 not 27,000,000. Once again, Stalin and KGB cruelty had negative down the line consequences, in their attempt to do fast industrialization to prevent complete occupation by industrialized Germany. The German masses were brainwashed by the atheist Jewish (who believed Nazis would send Jews to Israel, as they did in the beginning) and German aristocracy, ever greedier for more WEALTH, who supported Hitler's rise, with ample help from USA, UK, France and even USSR (some airplane knowledge). To destroy Germany, Jews had to support the destroyer regimes that financed WW1 and 2, who shrank German land 34%, while pretending to be against those regimes. It always works that way sometimes, they support the regime secretly that they criticize in public or vice versa, so as to fool Germans (9 million dead) into all out slaughter of other useful cannon fodder gentiles. The *kulaks, who were often spoiled and used to high prices to sustain their "imperial" lifestyle, and often Ukrainian, Polish, Jewish and hated by Russians, didn't want to sell food at cheap prices to feed USSR workers who were industrializing and thus defending the USSR against future German invasion Stalin knew was imminent* (since USSR trained the German troops at one USSR base, helping their Air Force to bomb Britain and other places USSR disliked), *so Stalin/KGB precursor, NKVD, got a little upset and went overboard to "teach the rebel kulaks a lesson"*. It's more than that, this paragraph touches only 0.01% of the complexity, to disintegrate the cliché that "Russians killed 5 million Ukrainians" and nothing else happened. This scapegoating removes any incentive for Ukraine, EU to create decent (not this anti-eterni tone) ~*~Eternal Universal Peace~*~ sustaining music for Eurovision, eterni tone in TV-radio and music, education, to reform its society towards immortalism and nonshouting nonviolence, for EU to stop creating dog barking like violent rock, heavy metal, pop, rap etc American like music and become civilized. It's very complex, and also related to the Bible quotes the Catholic, Lutheran, German, etc, Orthodox, Russian churches brainwashed people with, quotes which when even decent and not genocidal, are not like the Immortalist Anthem best verses 8-40. The zealous fanatical clergy energy has come down to crush them in the call to free the enslaved serfs of centuries of the USSR, just as the clergy has crushed the spirit of universal *gentle tender soft healing nurturing graceful soothing compassionate kindness* in the human race thru many Vatican sponsored (and others) genocidal wars. All feminine kind energy wiped out, replaced by the roaring sound of hollering (shouts of Protestant and Rabbi) or macho Catholic/Orthodox church songs. Joined by the military, they destroyed all feminine energy worldwide, all decency and kindness, to create a worldwide terror state of sheer fear and violence. Everything is far more complex than the official version of history events we learn in the 5th grade. Aristocrats wanted USSR to fail: it was not fun for them, so any undetectable subversion would be "fair game", a simple method to sustain an imperial lifestyle. *It's naive to believe all Chinese looking guys were Chinese*, many were half Korean or half Japanese (or other

Asians) aristocracy spies who had a vested interest to cause mass starvation thru similar policies, to shrink China to Japan or Asia population ratio over decades, etc. The poor need to gently understand that *the rich will use even a so called "for the poor" regime, to enslave the poor ever deeper*, by hiding and disguising the oppression so well, nobody almost sees it. That's why immortalists need to be discerning, and realize spies infiltrating Eternia can ruin it completely and destroy its nontorture nonkilling ethos, replacing it with average military torture, rape and murder demonism. Sadly, other nations copy the devil methods of USA, so we got some real reform to do globally. It's just historical inertia, fear of the chimp mind, who thinks of scarcity and not infinity. Rich gangsters also want depopulation, so they meet and plan wars and various events to do it. Ukraine will never prevail for long, until it evolves to immortalism, because the energy of anti-life can't prevail. All empires vanish, all big countries collapse like they did for Eternity so far, until they become the very essence of Eternal Life or immortalism: *gentle tender soft healing nurturing graceful soothing compassionate kindness*. So wake up USA, EU, you're much like the Mao, Hitler and Stalin you criticize all the time… Realize it and arise from darkness to the Light of God, break the chains of slavery to violent music and scriptures. Wake up USA and EU, declare your independence from aristocrats for the 1st time in 50000 years.

Kindly use Ctrl+F "Jew" to find all related info in this book. Kazakhstan Kazakh population was 82% in 1897, 30% in 1959 after USSR staged famines and relocation, 70% in 2021, etc, Russians 11% in 1897, 43% in 1959, 15% in 2021. We see the effect of Russification via genocide disguised as famine, relocation, labor camp. Paragraphs like these make some KGB guys want to kill me. The USSR, Russian Empire old policies of destroying people and then using them as puppets to lead countries into slave colony status are very much similar to British, French and US empire policies. Until the diabolical tendency to torture, destroy and kill, subjugate people ceases, there is no hope for any peace. Humans need to be honest and stop killings and torture by all spy agencies and militaries. Our enemy is aging and disease, not humans. The KGB culture of killing millions is still happening and KGB needs to evolve: homicide rate in 2018 Russia was 14 times greater than Italy, 11x > Poland, 7x > France/Uzbekistan, 9x > Germany, 6x > Bulgaria/Romania. Homicide rate varies a lot, in many areas with 90% Russians we get 10 to 14 times higher murder rate than Chechnya, which they bombed into the stone age in 1999 when Putin came to power as revenge for attacks on some Russians, some republics have 25 times the Chechnya and Balkaria homicide rate (the tiny Islamic republics). So much for Jesus' "amazing influence" who touched all souls and made them "nonviolent". Perhaps, it's time to just focus on kindness nontorture and nonkilling and leave fake miracles aside, since *nontorture is 1 trillion times more important than making signs of the cross*, rituals of ice cold bathing, etc. Why can't US, Russia stop the terror and torture methods? Why not use its genius to create peaceful methods to bring peace? Chechnya murder rate fell 7 times from 1990 to 2017 to reach the France-Germany-UK

level. Russian's rate in 2022 rose for the 1st time in 20 years, due to the Ukraine war.

We see how backward Russia is, the healthcare etc, since the Soviets killed a lot of specialists, who knew how to run factories, doctors, etc, or they fled: toothless ladies, (some of these may even be minorities who got deported from one republic to another, lived on grass for months or 200 calories, and were heavily tortured with the same tooth weapons) no care, just like on CNN Ukraine people we saw 30 times in 2022 alone, etc. It's not clear how precise these tables are or if some Russians declared themselves Kazakh or vice versa. Khrushchev found genocidal Gulag camps unprofitable and he ordered most of them closed in his anti-Stalin moves; *CNN showed in January 2023 on the main page about Ukraine (which is often the first one on their homepage), a video of a doctor who said Russians took some of her teeth out;* we got reports of torture of Ukrainians all over the web, that confirm this is a tactic used by psychopathic agencies, just like CIA tortures people's teeth. Are these Jews, Russians (or other spies) within spy agencies of Ukraine tipping Jews, Russians (or other spies) within KGB on any smart Ukrainian location to bring all Soviet states under Jewish, Russian (or foreign spy) control by typical KGB elimination of anyone with brains, like some Jews allegedly tried in 1920s USSR or are these real reports of Russians destroying Ukrainians teeth when caught by invaders as civilians not escaping? Is it disinformation sometimes? As the Messiah section explains in the Bible quotes, genocidal people still exist due to the deification of such violence as "holy" scripture, and it would not be a surprise if Ukraine is on a top secret extermination list of the bad type of rich people who profit from wars, Jews/Russians/etc, for not allowing complete enslavement, like Germany seemed to have been placed on a similar list in 1918 (*they created Nazis in 1919 to lead Germany to complete destruction and weaken some nations, Jews, etc?*) Syria in 2011, etc; the youtube has 100s of videos with Gulag torture and methods related to teeth, including teeth pulling. It's nothing new. All decent people support a move to 1 common language in 8 years, everyone learns it on youtube, but the whole planet is controlled by generals who hate peace, who love to stay in power, at any cost to the human quantum field. No compromise. When was the last time you heard the media they control talk about World Peace in 3 months and one common admin language in 7 years or 30? Never. The plan is eternal war over languages? Where is the compassion for millions dead in so many wars of language change?☺☺☺

When people tell me we need 7000 languages, we can look at the millions of wars they gave us; I recall an old man, looking like a skeleton, who managed to return alive from Siberia and was using a train to go some place, and he shared with us, the students on the same train going to some science contest, how people were frozen to death during Gulag labor camps by Stalin's KGB puppets and fell from the sledge and broke in 2 pieces, *in a typical ethnic replacement method of making Ukraine, Moldova (former Romania), Poland, Latvia, Lithuania, Estonia, Finland, etc areas Russian majority: pure genocide*; now Russians claim the Ukraine folks don't

respect the Russian invaders' language rights; the simplest way to solve these endless fights over language is to move towards fewer languages; since Eastern Europe has been decimated by Russians often, they share a common interest in English; ☺☺☺ *these days the spy agencies etc attack a tooth until it falls due to microwaves and other weapon systems (*no need to punch or use any physical tool as KGB did in 1930s to Eastern Europeans*), it's the same cruelty, just more discreet*. Khrushchev was the USSR leader, after Stalin died in suspicious circumstances after Stalin allegedly planned to deport Jews to Siberia and accused many allegedly Jewish doctors of trying to kill Russian leaders, like some Jews allegedly killed the Tsars, if the Tsars didn't fake their deaths. Khrushchev had a Poland born 2nd wife, a professional spy of course, she knew many languages, though not clear what kind of single or double agent she may have been. Ukraine is for no Russian language equal status to Ukraine language in areas where Russian was there for 2 centuries (Ukrainian was there for maybe 5-7 centuries) after the Russian Empire banned Ukrainian in 1804 in schools in much of Ukraine (which was part of the Russian empire for 200 years, USSR also repressed Ukrainian for decades, executed writers, etc). While immortalists totally oppose the invasion of Ukraine and all wars and violence, if real (read fake war section on how wars are faked and refugees are spies) and not staged with Ukraine, they do understand why the Russians are unhappy, though they're not being told the whole story by Putin of how Russians banned Ukrainian and imposed Russian at gunpoint, creating the Russian speaking areas that they want to annex. USSR and most Eastern Europe spoke 100s of languages many centuries ago, then Slavonic church language was created by some Greeks in 900, and this language interacted with local languages to create new languages, Slavic ones (except for Romanian, a product of Dacian plus Latin, *Georgian, a product of Greek? and local language*), Russian becoming the most spoken due to the military expansion of Muscovites; so initially, a theory alleges, Ukrainian was closer to Russian, but then became unique by 1500.

Most European languages today have a huge influence of Latin, due to the Roman empire, so Latin spread, via religion, like Slavonic did, and created new languages by interacting with local ones.☺☺☺ It's illogical to have many languages in Europe and anywhere, I don't see what Eastern Europe gains by having 20 languages for 150 million people and 20 nations instead of one, except remaining backwards; English is neutral in the area, is not native of any nation of the 20, and makes the most sense, it's the language of science. People need to understand the pros of one language and create it and adopt it, so all language fights end, or at least choose incentives to unify and have fewer languages in the short term, without violence and forcing choices. Ukraine is for splitting many republics from Russia or so they claim, undermining the idea of fewer languages and nations, or one language for truly lasting peace, etc, why not Basque country splitting from Spain and other areas from Ukraine that belonged to Slovakia, Poland, Romania, Hungary, etc before? Everyone, except the Russian public, knows Russia

invaded many nations nearby, occupied their lands, then started extermination via forced labor, sending locals to Siberia or other areas for ethnic balance shifts and calling existing languages new names, like Romanian was called Moldovan, and started creating new identities, like Moldovan, etc to create division and facilitate its ethnic extermination and replacement goals, this is contrary to their alleged "communist" goals of World Peace and one language for all workers, etc, since USSR was also a cover for Russian imperialism. Russians banned Romanian (spoken by 80% of population, while Putin claimed on 9-30-2022 that Russia defends the rights (see transcript of Putin's hypocritical speech of native languages, of African etc cultures looted of gold by Putin's gangsters while he invites African leaders to Moscow to dupe them, setup businesses to facilitate gold, etc theft) and many languages in lands they invaded since 900 AD to expand land 20 times. Check out how African 18-22 year old ladies are allegedly (unless a fabricated story) used by Putin as slave labor to make drones that fuel eternal war, though this could be a cover for training to become a KGB spy in Africa. Russia murders innocent civilians of 200 ethnic groups for 950 years, while its citizens freeze to death. We see homicide rate is now 3+ times higher in Moldova (former Romania) vs Romania, after being neglected and people having no school to go to in local language during Russian Empire occupation for decades that made Russian the only language in 90% of schools, another strategy of domination; initially everything was the same. This is why one language has to be implemented by understanding of advantages and gradually as people learn the language (kids who go to school, etc) and are allowed to learn the language (today it's easy with Internet and youtube). We can't keep 7000 languages to advance fast to longevity and Eternal Universal Peace, but can't use that "one language" to exterminate people, destroy cultures and etc. Russians knew what they were doing, they prevented people from learning Russian too. Now Russians cry "we are victims" when Ukraine wants more Ukrainian in their country, giving the Russian language second status to prevent Russia from taking over Ukraine, not just some areas that were mostly Russian speaking for 200 years thanks to the power of *"bombs and war, deportation, extermination via forced labor, economic incentives, 'involuntary' affairs with local women (under pressure) to 'produce offspring that are spies' methods"* used by empires (Russian included).

We need to unify via positive motivation, not under the threat of death, out of compassion for those suffering from wars over language, due to inefficient waste of resources, out of kindness, gentle tender mercy, desire to bless all humans with 7 trillion year lifespan. We can't solve things by force, or else nothing will be left of any country, except a war zone, we need to evolve to a peaceful mammal stage at least, if we dream to live to 8 trillion some day. Russia said 'Ukraine doesn't respect language rights of Russians'. Latvia is a country that wants Latvian only, no more Russian, since Russian was not there before the Russian invasions. To erase Ukrainian history, national identity, etc, Russians were reported in Nov 2022 to steal all museum art that

proved a non-Russian past, or perhaps also to save some of the Russian, USSR stuff there too, afraid some would get destroyed, like ISIS was paid to destroy stuff in Iraq, etc. See how CIA uses USAID and other venues, covert drug trade, etc, to fund their puppets. Replacing one mortalist culture with another mortalist culture is useless, we need immortalist cultures. ☺☺☺ Wars will never end if one starts to create all 900000 states and statelets that ever existed, many of which we don't know, so we need make 10 changes to an area, as ownership has shifted 10 times; we can agree to not torture and no war in all cases, but can't blame Russia only of being imperialistic, as 100s of nations have been thru history; Ukraine was enlarged by carving lands that belonged to other countries, so Romania, Slovakia, Hungary, Poland can call Ukraine "imperialistic" too, but they don't since they understand the madness of the Soviet Union and how it made Ukraine look bad, not Russia. If the Eastern Bloc become one Eternia country made of Warsaw pact and 6 other formerly Soviet republic communist European states, 20 nations, it's irrelevant how the borders were made by USSR, because the borders disappear and we can have rotating presidency to give all equal representation, with time as president based on the number of inhabitants, land area, all speaking English, it doesn't matter really, since we have 20 provinces or fewer of the new nation, it's like people from a province become president, who is a formal thing, since decisions are made by a lot more people. The wars never end once people start advocating for more languages, nations, we might as well revive 3000 old languages and go back to the 3rd century, stop using Internet, cars, technology, etc given to us by centralization and fewer languages. A solution to Eastern Europe wars is a neutral language that was not involved in the eternal wars there, as explained in the Eternia new nation section.

We either stop all wars and violent border changes or not and Russia needs to solve its issues with Ukraine peacefully and everyone needs to promote fewer languages always, not when talking of 'enemies only, that they want to split into 5 or 40 countries', Russia can't claim it is a saint, since all historians know what they did to nearby nations.☺☺☺ Could USA become 30 nations with 30 Native languages then and start fighting again among them? China has dozens of languages too, should China be also split in 40? ☺☺☺ India 600 states with its 600 languages, fighting like crazy (like Europeans) before Britain came and unified them all into India? We might as well ban cars and use horses. Undo all progress for the sake of 'language history'. Most EU countries in the East spoke at one time Slavonic dialects (but before Slavonic, they spoke different languages nobody knows), a sort of common language, now they got differences so they're no longer intelligible, so we see we could have a choice: unify Europe with English or a new language (English is most useful since most science of longevity papers are in English) in 20 smaller population (2 to 44 million) nations or get distracted with Ukrainian, Latvian and Russian fights; Ukrainian and Russian are so similar, it's almost like the same language. If we want Peace, we need apply the same standard everywhere, not pick and choose which country to split, being

so hypocritical as to when we apply some old maps. English is on 6 continents as a native or second language, more continents than any other language, it thus unifies the planet the most, so it makes more sense in Eastern Europe nations that have languages nobody else speaks, it helps them to establish a trans-continental shared identity, plus all longevity papers are in English, the language of science; if eastern EU 20 nations unify with English for example, then Russia may adopt English as second language later too, in 100 years; this will stop 900 years of wars in Eastern Europe, we can't solve issues by going around the bush, we need to face the horrible past of humanity and come up with practical LASTING solutions that reduce tension 900 fold and end the wars once and for all; World Peace won't last with so many languages and etc, we need centralize and unify. ☺☺☺ English is known by everyone in the science field all over the world, useful for longevity and immortality, Russian is pretty useless, except in the former USSR.

ALTERNATIVES TO SUDDEN REPLACING of 7,000 languages, for those nationalist enthusiasts who absolutely can't realize how destructive it is on our planet (and to their life, now everyone has to work 50h/week, reinvent stuff, translate, spy on the others etc, when with efficiency all work less, tech is far more advanced, all relax more, eat better, volunteer to help others and develop kindness happiness, there is less "stress, aging"), given our history, to have so many languages: *In the transition to 1 world* language*, it makes sense to make* each language simpler*, easier for all to learn it* so we achieve peace☺☺☺ thru communication instead of war:

13.20.4. Phonetization of English, simpler grammar makes it far easier to write and pronounce:

13.20.4.1. New writing/phonetics 13.20.4.2. Simpler logical grammar (3 pages below)

13.20.4.1. Phonetization allows English writing to become more concise, with pronunciation made simpler too (for kinder communication by higher cortex & emotional brain stimulation instead of the mechanical sounds area of the brain, the accent on words is placed☺☺ on what syllable is easier to pronounce, what takes fewer calories, less lip/jaw/tongue movement, so we focus on eterni tone modulation instead), most 3-9 letter words would lose 1-4 letters, becoming 11-67% shorter, *meaning it* would be way more efficient than any other language: ☺

1). sh ► ś efficiency > efiśnsi, shoes > śus, confession > confeśn, suppression > supreśn

cion, tion ► śn friction > fricśn, suspicion > suspiśn, fruition > fruiśn, demolition > demoliśn

accession/aggression > åcseśn/ågreśn, profession/corosion > profeśn/coróśn

sion ► jn collision > colijn, division > divijn, invasion > invėjn (j near n is j, notas in joy)

2). pus ► pąs shaman > śąmąn, charlatan > śąrlątąn, charade > śąrėd, car/far > cąr/fąr

but > bạt, tough > tạf, cough > cạf, laugh > lạf, glass > glạs, become > bicạm, duck > dạc, plug > plạg, pluck > plạc, half > hạf, upstairs > ạpstẻrs, fraction > frạcsn, faction > fạcsn, cart > cạrt, court > cort, country > cạntri

(any aa ► ạ)

3). toe ► tȯ

show > shȯ, sow/so > sȯ, dough > dȯ, shove > shȯv, goal > gȯl, low > lȯ, tomorrow > tumorȯ, borrow > bạrȯ, row > rȯ, crow > crȯ, yellow > ielȯ

(ou ► ȯ)

maul > mol, mall > mal, above > ảbạv, mole > mȯl, owl > ȯl, tow > tȯ

4). love ► lảv

under > andảr, bury > bảri, difference > difrảns, Eiffel > ífảl, allow > ảlụ, water > uạtảr, Pfizer > Fízảr, against > ảgenst

(low a ► ả, dot · is above a, not ,)

5). the ► dả

though > dȯ, th(d) sound becomes d: sticks tongue too much, wastes neurons

thus > dạs, soothing > suding, although > ảldȯ

th ► t: theology > teologi

path ► pat

cathode > catod, mouth > mụt, Katherine > Catrin, there > der , thou > dá

(th path sticks tongue between teeth, uses too many neurons/calories, so we remove it from English, to use neurons for good eterni tone: keep t only for a month/year max, but finally catod will be said catod, pat > pat, mouth mụt > mụt, fifth or fift > fift, sixt > sixt, fourteeth or fortint > fortint

ts ► ṭ (tz)

splits > spliṭ, spits > spiṭ, blitz > bliṭ, eats > iṭ, schizophrenia > sciṭofrenią,

bots > boṭ, rats/aristocrats > raṭ/aristocraṭ, tsar/czar > ṭạr, nuggets > nạgeṭ

6). eight ► ėt

freight/weight > frėt/uėt, airplane > earplėn, they lay clay > dė lė clẹ

(ei ► ė)

tame/shame > tėm/shėm, stair > stėr, main rain > mėn rėn, Kate > Cẹt,

great breaks > grėt brėx, laid paid > lėd pėd, cane > cẹn, face race > fės rės

7). ch ► ċ

chop > ċop, chin > ċin, chip > ċip, china > ċínạ

8). edge ► edj

orange > orảnj, merge > mảrj, change > ċėnj, agent > ẹjnt (ge ► j if as in joy)

9). cow ► cá

bow > bá, now > ná, plough > plá, hour > ár, tower > tár, flour > flár

flower > fláảr (though context clarifies flár), Bauman > Bámn, down > dán,

(au ► á)

dawn > don, sound.sand > sánd.sand, bowl/bowel > bȯl/báảl, however > háevr

10). you ► ụ

chew > ċụ, few > fụ, amuse > ảmụz, dew > dụ, urine > ụrin, cube > cụb

(iu ► ụ)

view.preview.review.strew.interview.skew > vụ.prevụ.revụ.strụ.intervụ.scụ

(· is above u)

New. Pew. Blew . Lieu. Phew . Sew. Sewer > Nụ. Pụ. Blụ. Lụ. Fụ. Sụ. Sụảr

11). k, ck, q ► c kilo > cilo, skew > scu, plaque > plac, keep > cip, wreck > rec, queue > cu

cs or cks ► x pricks.tricks.licks.bricks.sticks.flicks.clicks > prix.trix.lix.brix.stix.flix.clix, sucks > sux, fucsia > fuxia, ecstasy > extasy, sockets > socet, queer > cuiar

Later x becomes ċ with dot below, not above, to be consistent, as splits > spliṫ

Thus, x won't be needed anymore, making alphabet easier

ce ► s police.malice.mice.suffice > polis.malis.mís.sufis, mercenaries > mersenaris

farce.fence.force.fragrance.dance.trance > fars.fens.fors.fragrans.dans.trans

cis/juice/chemistry > sis/jius/cemistri, hence.place.price > hens.plės.prís

niece.ounce.peace.piece.sauce > nis.áns.pis.pis.sos (peace/piece via context)

se ► z appease.please.choose.cheese.because.raise > apiz.pliz.cuz.ciz.bicoz.rez

noise.phase.lose.suppose.compose.amuse > noiz.fez.luz.supoz.compoz.amuz

12). ps ► p flips.trips.polyps.camps.clips.chips.crops > flip.trip.polip.camp.clip.chip.crop

13). pee ► pi deep > dip, sweet > suit, peep > pip, bleep > blip, joy > joi, English > ingliš

(ee ► i) marry > meri, free > fri, coffee > cofi, Jesus > Jizas, see > si, tea/sea > ti/si

mommy > mami, suite > suit, spleen > splin, decision > desijn, needless > nidls

14). soot ► sut boot > but, cool > cul, suit > sut, true/glue > tru/glu, to > tu, two > tuo, too > tuu

(oo ► u) do > du, crude > crud, woo > u, wow > uá, moved > muvd, would/wood > ud

15). phi ► fi philantropy > filantropi, phlegm > flegm, alpha > alfa, photon > foton

16). bye ► bí I > i (ee), cry > crí, why > uí, Wyoming > uíoming, fly > flí, foreign > forin,

(ai ► i) by ► bi, spine > spín, mine > mín, drying > dríng, side/ze > síd/z, lie > lí, eye > i, rise > ríz, apologize > apologíz, finance > fínens, surprise > sarpríz, plight > plít, fright > frít, flight > flít, delight > dilít, might > mít, thine > dín, dine > dīn, hi > hi, pi > pí, align > alín, benign > binín, recent/resent > risnt/risent

í takes less effort to write and less character space in digital media than y. If we have 2 words pronounced the same, we can write verbs ai as ī with dash, noun lie > lí, but lie down > lī down or die > dī, dye > dí. If 2 nouns/adjectives/words are the same, the less common uses ī or ai or context: night > nít, knight > nait or light > lít, lite > līt or write > rīt, rite > rait, right > rít. Adding . after etc. is wasteful, so we need to write etc without a period, as I wrote it in this book. For sow

(female pig) and so, context immediately tells what kind of it's sȯ, as with lie & lie today. We can also have optional reign > rẹn (ei is ẹ when a verb to avoid confusion), rein > rein or rėn, rain > rėn, because rain is common uses the most common ė. We don't need ẹ because reign, rain, rein are clear from the context, but all are free to low dot (ẹ) to clarify reign. Aglycone > aglicon (stress on a, not gli) not ag*l**ai*con as today, same for 400,000 English words that needlessly, inefficiently add the a (or other vowels) vowel to waste time and diminish the eterni tone of speech. Too many words have an extra *useless* a vowel, when there is no need to, since no other word exists of similar spilling or pronunciation that we need to distinguish it from. The simpler, more mathematical/logical/easier to learn, more symmetric a language is, the higher its Radiant Beauty and use in Eterni Tone, the more it enriches the human Holy Spirit of Immortality for All. The most beautiful language is that with the simplest pronunciation, writing and grammar. Thus, the Radiant Immortals call us to Evolve our beautiful English to Bless All Nations with Truth. ☺☺

17). cat ► cat (all ae ► a)

pass.bat > pas.bat, gay/guy > gai/gí, ass > as, can > can, as > az, scalp > scalp, easier > esier, eat > ít (almost like it, but same sound), shared > śard, it > it, is > iz, ease > íz (iz sound), bred/bread > bred, jaw > jo, bath > bat, path > pat, wet > uet, rack > rac, character > caracter, canine > canín, cunning > cạning, happy > hapi, camera > camȧra, care > car, fare > far, fair > fair/far (context), pantry > pantri, and > and, tariff > tarif, many > meni, grass > gras

We won't capitalize for English, French and ethnic (Jewish, American) names, as it is silly and a waste of time to press shift character, etc. We change pronunciations to shorten/simplify sound/writing and eliminate useless sounds/vowels, so the brain focuses on kindness not opening mouth so much. English has many useless extra consonants and vowels that are not present in other languages. We create minimal variations of the infamous English vowels, to make writing and reading easy, so eterni tone kindness replaces tongue gymnatics. Cạt is a lot easier to pronounce than cat, because cat uses more muscles, opens mouth more, diminishes the eterni tone potential. However, since most English pages have the ae sound for a, not the a as in far, the change of all words pronunciation that are like cat to aa as in far is not going to be welcome initially, due to people's habits. Every sound, vowel or consonant, need to be reevaluated to ensure we choose the easiest to pronounce so we develop the eterni tone brain, not the tongue and jaw muscles, we become human, not chimps, the pub chimps humans obviously are as 1000s of genocides show. See more on this topic in chapter 8.

We thus eliminate w, y, k, q, x to free Earth's 11 companies workers from 5 characters, and move English to 21 characters, from 26 characters, with í, ī, ė, ȯ, c̀, ś, ạ, á, ụ (dot above, not below), ả (dot above, not comma), ṫ, ṗ, ṭ to avoid writing many h, g, a, i, o, u, e. This enables all to master English reading and writing in half the time for the eventual merger of all nations into

God's nation under the gentle divine Immortalist Anthem.☺☺☺ All instances of double consonants are removed, no more ss, ff or tt. A book of 900 pages will now be 600 at times, saving millions of workers who cut trees, transport them for paper, etc. This saves trillions of keyboard strokes and file size in documents, extending the lifespan of healthy wrists and fingers. Today English takes less than most languages to write a sentence, this will make it even shorter.

☺☺☺~*~ May all humans live to a trillion years in Eternal Universal Peace & Bliss ~*~☺☺☺

13.20.4.2. Simpler logical grammar:

you/they are > ụ/dė iz, you're > ụ'z, they're > dė'z, s/he is > s/hi iz, s/he's > s/hi'z, we are > ui iz, we're > ui'z, I am > i iz, I'm > I'z because I is no longer capitalized, no language does that ego act. Also: am, are, is > iz, have, has > hav, do, does > do.

Many languages have ONE form for all Pronouns. Time for 'stupid' English to get the memo☺?

We need to be logical math thinkers; most languages are 10-40 times harder to learn than this new phonetic English above with the optimized grammar below, it's like pure terrorism itself to force people to become so low in IQ by learning other languages, to force kids to have no place in neurons for physics or biochemistry of living to 4000, all your neurons store is forms of verbs and their Neolithic primitive pathetic writing system, endless conjugation, crazy grammar of useless complexity, etc. To say that most languages are incredibly stupid is be be truthful, they're traditions, maintained by low IQ literature and grammar experts (those "chicken IQ"☺☺☺ literature and language teachers worldwide, forcing their history (psychos killing each other nonstop, memorize dates, become a brute) and garbage literature on kids, instead of modern literature (like this book) about living to 5 trillion with science terms and techs to achieve that, including in the short-term eterni foods based living to 4000), "language teachers" with ultra low math scores, low intelligence, who have no concept of engineering, efficient use of human resources, neurons to achieve 4000 year lifespan, no concept of lego logical building of a language grammar (everything builds on itself, so you memorize 30 times less stuff) and words to minimize memorization and make it logical and 50 times easier to learn than most languages today, which are garbage. Let's have a 980 page book be written on 500 pages for less scientific terms; *efficiency* first. We take the most common vowel combos and make new characters via dot or etc. If you want English to be learned by *all nations*, of course, a phonetic ultra easy one that writes a German, Russian, French, Spanish sentence of 2 lines in 1 line or less is going to win and become global official language in all nations. Asian languages like Korean, which is way simpler than Chinese, are hard to write vs this immortalist English of Eternia; let alone to learn to pronounce Korean. World's simplest language is eterni English, the official language after World Peace. *Many languages have ultra complex rules of conjugation: the useless old traditions*

are no longer serving our Immortality goals to live to 900. Why have different ways of saying any verb for so many pronouns? Instead of learning the language of mitochondrial immortality, particle physics, etc kids waste neurons with illogical rules, if they learn foreign languages. Kids waste 1-2h/week on useless (easy to simplify and remove) extra grammar of native language, when they could take Immortality classes. *We travel at 17,000 mph (vs 20 mph before), we send letters in 1s (vs 1 billion sec before), but* language structure is like before. Even English, with the same form of verbs, except 3rd person singular "eats", can be simplified, no more s added, and a lot of arbitrary rules abandoned. Examples: 1. unhappy, happy, 2. unstable, instability (why not instable always?), 3. front yard and backyard (why can't both be one word, all languages have equally low in IQ rules that are anti-immortality), 4. insterile is not a word but unsterile, nonsterile are valid, 5. pronounce verb and pronunciation noun *instead of logical and intuitive* pronounciation, which oddly is incorrect. *Why not one rule for all? Why memorize all these 0 IQ rules? So many things about 'British US etc"* English. *Why not r*emove hyphens for anti-aging and all other words, to make writing easier, save energy when typing, printing, etc; it is ☺☺*lovingly gently* kinder☺☺ to not stuff people's heads with 0 IQ rules about which words to use hyphen, to be efficient. *What about* eterni English, *simpler and more logical than any English? If we want a language to be simpler, we ask non-native users, since they know things in which other languages are simpler, how illogical some things are and could be made simpler. Make it logical, like math.* Don't require saying "I am" or "you are, he is, they are" at the end of a sentence, allow people tosay and write the short "I'm, they're, you're". "What a beauty you're" is thought of as wrong, but in eterni English it's correct as it saves throats, calories, fingers typing. Eterni English is the simplest English, even phonetics and writing. Say all past tense is present tense with 2 letters added at the end: add added, etc. This way, nobody has to learn 100s of individual past tense forms, and that for each pronoun in some languages. For long verbs, the ending can be changed to ed, if it is easy, with a simple rule, while for very short words that can't be done as it would sound too odd or will be like another word, and it may be confusing. There are many ways to make existing languages much easier to learn, 10x so, but "not so high IQ as that of Immortals who live to 9 million some century" rules our planet. Expel word, expelsion should be the noun, not expulsion, plus 900 other examples. English needs to be improved (even if less than EU languages), made more logical. As more rules *get similar across 7,000* languages, *it will be 100x easier to learn new* languages *and to create world's simplest unifying* language *one day, most logical and* eterni in tone. What many people don't realize is that Chinese simply add a little word to indicate past or future and they don't have to change the verb, eat, ate, eaten, like in all European languages, they don't have 3 forms of each verb like in English, or 15 for other languages that have conjugation for each pronoun. The ☺abysmal IQ☺ of all EU language conjugation is funny, but they do have an easier alphabet, 26 characters, not 3000. *EU is busy preaching what they don't walk, instead of creating a simple pan European* language *that all*

use, easier than even Esperanto*, which is logical vs the rest*. If each country makes changes, their language would be easier to learn. ☺☺☺

Korean is odd, they got to memorize 7 verb endings and honorifics, or end up dead or beaten for not using them. This is due to people not focusing on the ethics of the Immortals and their tone, which is 100 times more important than the words used; we don't need so many forms, if we have *universal* loving kindness, these forms have not given us peace, the polite forms for pronouns are present in many languages, not in English *(1 form for all, like in true democracy, since soul age and wisdom is unknown)*, and they have not prevented those nations from doing big atrocities, showing the tone is 1 million times more important than the word form used: we're all 3 day old babies vs the Immortals, so why get so caught up in titles, instead of on using the words 'gently lovingly kindly sweetly' often and eterni tone with all people and achieving true democracy, i.e. not the pompous mindless adulation of kings or officials.

We are meant to love all beings and if form is the way to show respect, it removes the focus on the need for the *gentle tender soft healing* eterni tone of loving compassion for all, the realization everyone is like a 2 min old baby soul, just born in this universe, clueless and quite helpless too. This gentle call to love all beings with more *gentle tender softness* than the most loving mom had for her infant baby last decade, is in the Immortalist Anthem for all to see, so we replace endless titles with the simple tone of kindness and infinite tenderness. *A simpler language with one form for all is much more democratic* and less *caste like (where title, not virtue, biological age, not soul wisdom or age or tone (reflecting one's behavior last 5 decades), wealth not character, determine how one conjugates a verb or uses a pronoun)*: why not speak kindly, lovingly to all and then when someone uses a nicer tone or needs some help due to being down, mirror the nice tone back or use it to help that positive vibe amplify and bring World Peace and maintain it forever? It's much kinder to learn some science terms that bring lifespan up for all beings, than to learn thousands of forms and things for showing respect to those with egos so big, they have ordered their slaves (China enslaved Korea for centuries, is that Confucius influence due to the former Chinese rulers?) to address them in fancy ways, so that the emperor creates a fear, terror, punishment based order (like militaries on Earth use terror or 2022 US police state), due to not realizing they could have created order based on loving kindness, compassion, nonpunishment (democratic ethical healing of all areas in need of healing, not just 1 scapegoat), infinite tender healing grace, Immortality *for* All? ☺☺☺

People often say there is no money or time to teach people the language *in the top 5 that is most common in that continent, etc. But they forget we got* millions of places of worship, repeating unproven dogmas and fairy tales of 'miracles', doing endless rituals (are they enough?), often focusing minimally on creating World Peace in the services, yet war is everywhere, killing reigns

and is widely accepted to 'defend the country', so not even the most basic concept of spirituality (not killing) is mastered. Why can't these places, often times being empty for 90% of the week while others are homeless, be used to teach unifying languages like English? Religions and cultural philosophies of a civilization are neutral, like money, they can be used by societies or spies to bring peace, 900 or 4 billion year lifespans, unity, truth, IQ and SCIENCE of infinite lifespans, or the opposite: lies, oppression, subjugation by IQ lowering and repression of any questioning, fake stories, short lives thru science illiteracy and focus on rituals and fakery, brainwashing, dogmas repeated robotically, IQ lowering repression of hypothesis thinking, etc... Can religions and philosophies agree to one common language for World Peace and no "killing and violence"? They could use their millions of places of worship (war ship?) to create peaceships that ship or transmit peace, ships being eterni tones. Rituals didn't bring peace, so why not try unity via common language? It's very difficult to achieve peace with 7,000 languages; imagine if religions would team up to bring peace via reforms. At least we could have fewer languages each decade, with a real plan of integrating and if not *one* language can be created right away that *all nations* adopt as second official language right away, create 2-5 mega languages *(out of the top 20 in that area, or choose 2-9 existing languages with a few changes to make it easier to learn by the minority language speakers in that region and give incentives to learn the* ☺☺☺ language *faster)* that are used immediately as 2nd official language over vast areas to replace the 7,000 in the long run (75 years). We got youtube free language classes, time to stay at home, due to COVID19, might as well learn one of the top 5 most widely spoken languages. *Grammar is easy to change to unify, the pronunciation and writing is harder. But at least, we get closer. Comparative adverbs, adjectives, etc... For phonetic languages, that pronounce letters always the same and have easier pronunciation than English, learning that language would become even simpler than learning English.* ☺☺☺

Equally important is the SIMPLIFICATION OF ALL LANGUAGES, shorter words when possible, easier to pronounce sounds and among simple sounds, choosing sounds that activate the most immortalist *tone* favoring brain areas (see MRI etc). To increase immortalist tone, we may change some words that currently prevent the creation of the best eterni tone via activating more of the chimp brain, not the human higher brain functions. We change th to d, easier to write and say, stick tongue out less with t, save calories for kinder tone of emotion and intent to make them easier to pronounce (so that we use calories to grow the neocortex of the immortalist tone and immortalist greeting type of nirvana eternal bliss state and intent that prevents crime and violence: you can grow your brain or your vocal words, evolve or SHOUT), shorter, more gentle-*tender*-kindness brain areas activating sounds we make getting priority in designing new words to replace needlessly long or unmathematical illogical (not built from other words), etc so theft may become teft. This is only 1 of 10000 examples that can mean making

speech much simpler, kinder and designed to activate the empathy of the brain, as that prevents violence that makes humans incredibly savage, backward and low IQ, unable to innovate much, except how to kill other humans faster and better. A language reform can build a new civilization a lot faster, even if you change the depraved existing language, which is born of aristocratic terror, terror based adoption of illogical languages, conjugation rules and traditions at gunpoint, such as the Genocidal Anglican or Christian church. The abysmal IQ of the English is evident in their secular/religious rituals, royal guards chimp shouts, around the Royal Infernal Family palaces. The genocidal British aristocrats forget English could become simpler, easier to learn, a tool for spiritual development, for becoming human from bipedal cannibal chimp. Humans can evolve towards nontorture, nonkilling, noninjury of all. No worries, the Spanish or Blowing by Gun Portuguese have an even more atrocious language, endless conjugation, etc. Too many low IQ folks are linguists, we need math/science majors to create language, not traditionalists.

While the Chinese writing is terrible, their word building is quite logical and simple. *To create the language of global Eternal Universal Peace, we need to make it the simplest to learn langauge:* simplest grammar like English/Chinese (no conjugation), simplest writing like Spanish, Swahili, Hindi phonetic languages, most logical word creation to minimize memorization, build words from pieces, like the morphemes and words in Chinese or English built from legos words (from parts that make new meaning clear from the parts for easy recall, pure math, no memorization, everything builds on small units like Lego). *We're terrorizing and lowering IQ of kids with 100s of illogical rules they have to memorize* (not to mention the 1000s of verb conjugations in most non-English languages that have 10 times harder grammar), *when they could learn longevity, taking care of their health, math, physics, biochem and triple lifespan. No adult will have to adopt the simple version, it would be a gradual transition, kids learn it first the new way and use it so at school, etc. Imagine, all can learn your culture, poems, eterni values, etc in your language that has become 10 times easier to master, not getting lost in translation anymore. You win the Immortality Outreach faster, make a lot more friends, bring peace faster. In East EU high schools, many kids spent 2 hours with French, 4 hours with local language, 5 with English. They were forced to even learn the stone age Latin language too at times in the 8th or 9th grade for 1 hour, for what purpose, totally useless. Instead of scientists teaching literature or grammar professors to think and prioritize Immortality and change language to reflect modern tech and insight, we have stone age cave men who created language from millennia ago brainwash 21st century kids in the ways of backwardness and memorization of the most irrelevant and useless things (how 600 verbs have 7000 forms for pronouns in various past tense forms and others, then it could be only 1 ed added at the end and the rest spent learning biophysics and chemistry to think, to build immortality gadgets, tech, food), instead of critical thinking and building languages by lego as we do in physics and in engineering amazing things from small parts. That's

11 hours of the week with the language, when, if they were 5-10 times simpler, we would have spent only 2 hours, or twice simple only 5 hours, having 6 extra hours for Immortality sciences ☺☺☺. We learn literature of science in that language, which uses universal vocabulary. In other high schools, they spend a lot with foreign languages too, but that time would go to Longevity sciences if languages were simpler. So all lose when all languages are harder and more complex and 1st century like, instead of math 21st century like. *A reason we need so much time to learn many languages is because they have stone age structures, that are not made of similar 'building blocks' like in nature, like chemical elements, they're not uniform in rules; for every category we got 100s of grammar rules of how we form words.* The same insanity in the educational system that terrorizes and conditions kids to be ☺abysmal in IQ☺, happens globally, due to the historical inertia we're all victims of. A simple example: we have 7000 languages, 200 countries, with enormous redundancy, so we need 200 presidents, foreign ministers, translators, etc. ☺☺

We have 50,000+ contractors per country, often using pretty low tech, when we could have ultra advanced modular houses build like lego, with all stuff built in, electrical, window AC, etc... of such a quality, we would think we live in the 23rd century. Think about our stone age cooling and healing systems, a house with 5 rooms, 1 thermostat, in living room won't be able to 1. save electricity, by cooling one room only when only 1 at home. 2. be easy to clean the vents etc. 3. obtain perfect temp in each room for each person. We spend 2 trillion a year (more than enough to create 4 billion super quiet window AC units for the rooms of houses, hotels, etc) on drugs, smoking, drinking, and yet a simple portable quiet AC unit that is connected wirelessly or via a cord to 1-2 fans and a thermostat in each sleep/study area, that would enable the user to set: 1. humidity 2. CO_2 (<500 ppm) and O_2 level 3. temperature. Then he can set the thermostat in sleep area at night and desk area during daytime on a schedule, so all works seamlessly, let AI do the work and us focus on 300 year lifespan. With advanced AI, it can learn the weather and when to start cooling a lot on noise level so quiet (as quiet almost as a vent now of our stone age central AC systems), some soft background music will make it inadudible. When the weather changes outside, temp shifts a little and living room thermostat shifts 3 degrees up or down. However, that doesn't change temp in every sleep area of the house by 3 degrees when AC or central heat kicks in, in some areas the change is 2, others it's 5 or even 7 if the area was not heated much during the day to have wall radiative warmth warm it back, depending on wind, sun, shadow. Central heat allows cross room contamination and cross office contamination which creates issues too: a person doesn't like the smell of coffee, garlic or some fragrance the other uses etc. Each person has different needs, so a recipe for less ideal sleep emerges.☺☺☺ Why have 100s of companies make such lousy central and window AC systems when we could have just 5 really high tech ultra PhD staffed R & D companies making products 200 times better? See immortality capitalism discussion too on redundancy. Then for the 1st time in history, billions of people will

be able to have constant temp in their sleep area or work station, leading to far less far, anger, tiredness, mistakes and low productivity at work, etc. Sleep is when body repairs itself, so we need constant temp, comfortable one to repair body and sleep deeply, so body knows the routine, and goes into cycles increasing efficiency. Instead, we have trillions spent on the lowest IQ things and trillions on wars. It's like with languages,☺☺☺ our priorities are a little off.

With one language, we can improve and make it so much more advanced, with 7,000 they're all *'outdated' as we spend all time to fight others.* 7000 little companies and contractors (company with 4 family members, etc) can't hire 5000 PhDs to design space age AC system, plumbing, etc so quiet advanced and nice like one big company that paints house exterior and roof white (to reflect 98.1% of solar radiation, vs 80-90% for most white paints, and cool the roof, exterior vs surrounding temp reducing AC need, even lighter interior colors of rugs, walls can lower house temp, in rooms that get more sunlight, preventing dry eyes, or 98%) builds windows and aligns house so wind in the area reduces AC need by 10 times (central AC is very noisy, and sounds, EMF, etc from central AC may shorten our lifespan, since plants are very responsive to sound, and we may be too, our cells, even if we, in our brains, don't realize it), by opening the vent widely to let air (and outside noise) in and aerate (and window too can be opened remotely by the AI to let air in when windy, and colder than inside so the house cools very rapidly, since window would be above the AC unit that can still function as a mini-window in of itself, but quieter; window open and some doors in the house and house cools 20 times faster than if all window individual ac units go in super quiet mode wasting electricity: we use natural wind 'electricity' to cool house, not noisy AC units), creating a little extra window here and there, having 30 configurations for various wind directions of their modular house, etc that brings quiet neighborhoods without AC central unit so loud and with less use of window AC, since intelligent windows that open when it's windy and cold outside keep the house incredibly cool without AC, since strategic windows are placed in hallways etc to cool house even when people forget to leave some bedroom doors open to let it all cool and aerate by the time they return from work. New paints turn darker in cold weather, so house becomes 12°F cooler in the summer and 7°F warmer during winter, as color shifts from white to dark. Central AC is fine for big factories, but office buildings and houses can use window systems so nice, aesthetic. 1-2 fans in the room make bed area so oxygenated and constant in temp reducing body stress from ever adjusting to new temp each time. Helping us live longer. ☺☺☺

People are so focused on fancy cars, etc, but we don't have the most basic fundamental needs of a decent sleep, constant temp (determined individually in the most advanced sleep lab in every major city, each setting being determined with heavy science) – to live to 100 met for most people on Earth. All pills, etc antiaging therapies are useless if our sleep is bad, since repair is done then. We don't prioritize longevity, but we can start doing so. Bad sleep ages us far faster

than not taking some extra pills of this and that. One you mass produce a tech in 4 billion AC units, price comes down. It can be a project to eliminate climate change due to huge CO_2 made when whole houses are cooled for only 1 person inside. We have endless accountants, salesmen, payroll systems, managers, etc duplication in companies, and the scientific innovation? Not much, *so we have these stone age window/*central AC systems, when all houses could come by law prebuild on every bedroom window with the most advanced *only dreamed of today* units. All is about competition, creating 7,000 missile systems, languages, companies to 'fight, sell and do no real innovation, duplicate, redudant low IQ historical inertia', ad infinitum. We respect killing, wars, smoking, drinking way more than the basic shelter needs.☺

We also have a *problem* where some big powers loved to exterminate nearby small countries over time and incorporate them partially or totally into their land. This led to endless wars cascading from that and further genocides, slowing science longevity progress by eons.☺☺☺ Unfortunately, this type of thinking is not totally vanished. Some would say a solution to these 2 problems (too many languages and wars) can be this: some small countries, near or quite near a big threatening country, could make English as another official language, preventing a mass extermination and allowing redundancy to vanish over time as English replaces local language spoken by a few million, and become part of a far away country that is more like a Civilization of Immortals, that won't exterminate their people. The only issue with this is that it does a border change, and previous sections explained that the easiest way to World Peace within 1 year could be 5 billion (at least 100) year moratorium on border changes, unless done peacefully by people's will, without any war; if people are not serious about World Peace in 1 year by United Nations plan, by the steps outlined in the previous sections of this chapter, then naturally the slower 40 year process of fewer languages becomes more practical and of higher priority; some would argue that we can't end border changes by doing border changes, just as we can't end wars by doing wars. Border changes are not wars though. If border changes mean creating 3 to 20 times fewer nations and/or at least 5 to 80 times fewer languages thru intelligent understanding of the longevity and planetary benefits, without anyone being tortured, forced or injured covertly to adopt a new language, if it means everyone benefiting from this, wars decreasing 100 fold, as it's done slowly and lovingly, with gentle tender loving kindness and understanding of how much suffering 1000s of languages have brought us, then we could say that ultra peaceful border changes are bringing and *maintaining* World Peace faster; to bring temporary World Peace of a few years or decades is ultra easy, maintaining it for millennia or centuries is the 100 times harder part. Yet, in a borderless EU like structure, that doesn't have strong borders among states, border changes are not even needed; if *all nations* speak one or more common languages (English, French, German for example are the most learned foreign languages in the EU) besides local language, instead of many speaking only 1 language (dozens

of such languages, means 100 million know only 1 of these 40 less used languages), they become counties of the superstate in a deeper sense, eliminating redundancy. Likewise, a small nation doesn't have to be part of the US for example, just being so close to US (language in schools, government, etc) in every way would make US far more likely to defend it as if it's its most important ally. After all it often comes to this: do those tiny countries want to be living and still exist? Do big countries want to prevent massive border changes? Then something can be done, since many people don't even trust NATO would come to the defense of a tiny country. Let's face it, alliances don't work always in times of great stretching of forces.☺☺☺ History has proven allies don't come to your rescue in some cases (stretched too thin), unless you're part of their country or one of their closest allies, using the same language. Even unions like EU (but much smaller) have come and gone in history, groups of 3-5 nations made a union and 100-200 years later it vanished, as nationalism and language fights took over, delaying our living to 900 and space planets terraforming, as instead of science, we wage wars over language. Nobody fights for another country as they do for their own or brotherly people with the same language, plus military assistance is much easier when language is identical. On paper two countries are separate, but for all practical purposes they can be one country. Aware of this selfish nature of humanity (allies are not helped when stretched thin) and putting it to use can minimize wars and exterminations and help us move towards peace faster as one nation, earthlings. ☺☺☺

Do we really need 7,000 languages and 200 nations? Nations can be like counties, but do we really need that many languages? The world would be more peaceful with fewer languages at least, even if initially we still have about 200 nations. It's kind of odd, but peace and science progress is a lot harder and redundancy huge. Since *75% of* science *papers are in* English*, having average people not know* English means having the population of these countries less technogically aware, easier to conquer *and enslave by enemies, so if small vulnerable nations want to make their populations more scientifically literate, more longevity* Immortality *friendly, they could adopt* English *as official* language *besides their national language, to make citizen* immortalist science *widespread.* English is used by most scientists, by most of world's science *geniuses, so one can find the best* science content, *the highest number of highest IQ content only in* English*, not in a* language *spoken only by 2-9 million people. This makes* English knowledge *a national imperative if one wants to survive in challenging environments and not fall behind. It's not about national ego or pride, it's about being realistic and defending one's nation with latest technological and scientific knowledge, do smaller nations want to survive? It's also about economic growth.* Local businessmen knowing the international language of business makes foreign investment and economic growth easier. ☺☺ Economy and security are linked. How many papers are published in English versus some language spoken by 1 or 20 million people only? *Often times it's 90, 000 times difference. Does one want 90,000 times the knowledge to*

defend one's country, grow one's economy available to its citizens? Oh yeah, they would say, let's have citizens get a 20 points IQ boost by watching smart people talking in English, way more geniuses to listen to in English than in a language spoken by 1 million or even 70 million people only of one country. Then, do it, adopt English as official language to bring World Peace and 900 year lifespans 500 times faster to benefit *all nations*. In the vegan section, we saw going *vegan will mean having more people able to live on Earth,* i.e. to double ultra fast the number of scientists in every longevity field. Likewise, when we have 200 million extra longevity scientists, citizen scientists, and many more scientists in small nations know English, we have a similar effect of multinational research projects having way more scientists, speaking same language, getting data moved fast and researched in much bigger projects, studies, with less error, etc and we get longevity for everyone way faster, as no reinventing the wheel is done, no duplication of work, no translation, *etc.* Imagine how primitive and violent we would be *if we had 10* million languages, we wouldn't be able to know much of any discovery of millions of other groups; it's like having 10 million operating systems for computers, is that a good idea? Instead of 1 expert in the operating system or Windows 10 of the civilization or "tribe", we have 10 million experts with *one language/operating system, allowing a much faster science, software progress in every field, since we can specialize and communicate findings to a much higher degree. Yet some are against creating one language for all that all are happy with. Why? Inertia perhaps.* ☺☺☺

We can unify in the Light of Immortality, overcoming our linguistic differences, for our enemy is not language number 5035, but death and aging itself. United are stronger, divided we fall, dead before 120. *At least, until we agree on fewer languages, we use microphones to amplify voices, earphones that translate others' language into what we know best (amplifiers recognize the language others use via wireless reading); add an eternal moratorium on border changes or unpeaceful border changes; this eliminates the need to have borders in areas with tiny countries and anywhere later*; nationalism can be used by powers or mafia to divide/conquer, enslave groups of small countries. Romanian for example shares 75% of words with Spanish, Italian, Portuguese, French, 40% with German, 50% with English, so it's ultra easy to declare these 5 languages, or at least English, French, German (3 most learned foreign languages in the EU) as official to create more global unity. All EU languages share a high % of similar words with one of these 5 languages. English *grammar is by far the easiest of any EU language, the language of science, longevity* research, most spoken political language to bring World Peace, the alphabet is identical, half the words similar, so English *as the most used new official foreign language is a natural choice for Eastern European nations and* ☺☺☺*other countries. To avoid repeating "small EU, etc countries" I will use "Country E" (for English) in this paragraph to refer to things true for them.* Most top *Country E* politicians, professors and businessmen know English already. *People could do English as first co-official business language that is taught 4-5 hours a week in all*

schools, instead of 2 hours. The classes would include grammar, English literature, giving 50-70% of space to Immortality focused prose, poetry about science concepts, science fiction, science future, ethics of Immortals, building a Civilization of Immortals as explained in at least 80 other books (Ray Kurzweil, for ideas on living to 5,000 via nanobots, etc and the problems with each strategy in the science fiction of Immortality – like cancer from nanoparticles and nanobots, etc – while if you had an undiscovered particle hologram [a sort of astral body, as we may have 9 octillion of them already, invisible to human eyes, like a suit we put on and can upgrade any time) that is sliding inside the human body without any physical alteration, without Synchron jugular vein stent implanting a chip in a brain vessel to enable mobility for those paralyzed, Neuralink drilling of skull to put chips (today they use this in some paralyzed people enabling them to have some mobility and end their suffering (some of it from frustration of losing ability to move, some from pain signals fired by neurons), hence the video name *"Neuralink will end ~~suffering~~ for millions" - which is a misnomer, because war and torture is still happening and people can use new techs to manipulate "Neuralink or like techs to torture (start ~~suffering~~) for millions" in torture as done for millennia, and, even without torture, a few neurons having pain signals disappear is not 200 billion neurons, suffering is a lot harder to erase than the video and some books may make it sound like*; can you really do brain surgery daily as you can change hologram daily to update it with newest 20008.9 version?) and placing cancer giving nanobots in the blood, you could have the AI compute 5 trillion scenarios and offer a billion times faster path to living to 1 million or 5,000 than silicon, since it would be 1 octillion or quadrillion or trillion times faster than neuron firing, not 1 million as these nanobots of the fastest computers today, etc], not just this, *and 500 year and billion year lifespans.* ☺☺☺

The amazing & beautiful ☺☺☺ richness of science terms in immortalist poetry and prose raises everyone's IQ and ability to read and publish science and interdisciplinary science journals to extend human lifespan, enriching both literature and science, creative thinking. The national exams test the knowledge of key immortalist concepts in the English or Country E language literature classes, as *shown* in the Immortalist Anthem poem about the *GOALS of an interstellar* Civilization of Immortals earthlings are going to become, one Eternia *"country" of* Immortals. *Instead of focusing so much on memorization, they would focus more on the key* immortalist *ideas and more on creative thinking and* questioning everything *from many angles,* hypothesis thinking. The *Country E* language and literature classes would be reduced to 2-3 hours from 4-5 now, since much of the literature studied is sort of anti-immortalist, outdated or stagnant anyway. The *Country E* literature studied would also have 30-90% Immortalism literature or immortalist applications (building a world of Immortals) enriched literature, just as all science classes are infused with longevity applications. This "stagnant" aspect is true for much literature studied in most language classes in *all nations*; therefore, since small nations change language

classes lengths to adopt English and bring World Peace, they use this change to vastly improve awareness of Immortality sciences (chemistry, physics, biology) and Immortality ethics, tone of speech, culture of Immortality and drive innovation in literature ☺☺ (*Immortalism* literary genre, enrich *Country E* and English☺☺☺ literature with new immortalist poems) and science education globally, as they retool science classes to way higher longevity and Immortality focus too. To help kids fall in love with the science of tripling human lifespan forever, the Education Minister talks every other day (via radio, social media and TV) together with physics, chemistry, molecular biology teachers about amazing chemistry, physics and biology experiments that will be taught in the Immortality sciences classes of nursery, kindergarten thru 5th grade when advanced chemistry is taught, and also from 6th grade to college. ☺☺☺

New music groups and genres are made to sing about the Immortality ethics *and* sciences *in* eterni English*, especially ethics that talks of* eterni *emotions, intents.* The whole nation is excited about the wonders of knowledge. *Civic Education would include a lot of* eterni *ethics and ideas in this book*. This way everyone knows English 10 times better than now and then they can write laws, judicial decisions, shop and street signs in both English and *Country E* language. This enables people to gradually learn English and will increase in 70 years the % of adults knowing perfect eterni tone eterni English to 99% as 2-10 year olds today become 72-80 year olds who also know perfect English due to learning it from age 2-10, because kindergartens and schools having heavy English education, TV having more ☺☺☺ English science and Immortality Civilization building classes, more parliament and politician debates in English (Senators can go to recordings rooms made for English science classes nearby) to learn eterni tone (often easier to practice when trying a new language that the brain associates with eterni tone) and more science and raise the quality of parliament debates on which ways are better for tripling human lifespans. Kids study English from nursery to college; people can do college in *Country E* language if wanted, but English option would exist some day due to *Country E* language academia already knowing basic English and getting some help from perfect English recordings of science and engineering, done at Parliament Palace like places for example. Middle and high school classes would be some days in English (aided by eterni recordings), some days in *Country E* language in some future time, when all teachers know English, to increase English proficiency outside the 4-5 hours of weekly English. ☺☺☺ This way nobody will feel their *Country E* (or other country doing this) culture, heritage, language is vanishing, they're creating new culture in both languages first and then in English more when and if all education switches to English; it's a gradual process of making people great at English reading, writing, speaking, which takes decades of course. One can't expect everyone to learn English in 2 years. Then in 20 years when 50% speak fluent English or in 70 years when 99% of people know perfect English, they can decide the next step and how much *Country E* language will be used and taught in schools, politics, courts, universities, etc.

People can still learn French and German as foreign languages (even if now 90% of kids study English as main second language), but at first, due to the novelty and expenses this brings, it would be only 1 language, English, as the first co-official language. The expenses are minimal given the educational, national security, and economic benefits and the fact English is, quite often, by far the most known and taught (90+ times more than Spanish for example) foreign language in *Country E* already. The eterni youtube recordings allow fast expansion of English grammar, eterni tone and immortalist literature classes from 1-2 hours to 5 hours/week, without requiring hiring any new English teachers. The reason one needs no new teachers is that a teacher can use a cheap video camera to monitor a class that watches the eterni recording every few minutes (students will be quizzed on the contents), while being present and talking in another class for 20 minutes, so she can teach 2 or 2.5 classes in one paid hour. Some *Country E* language teachers who do intensive English courses to become English teachers can still have a language teacher job, if more teachers needed; they can help translate the English or *Country E* language works of scientists, Nobel laureates, (e.g. George Palade), any *Country E* language text that is more related to Immortality sciences and Immortality ethics and is more eternal in value, not outdated.☺ This also requires coordination of majors at Universities to increase phonetic eterni English majors and decrease *Country E* language ones. ☺☺☺

13.20.5. The merger of 20 former communist nations into an English speaking nation Eternia

Tiny, medium or small E countries can bring a Civilization of Immortals in infinite ways, one being creating a nation of immortalists, Eternia or Eterna with English as official language, for example 20 formerly communist (thus more open to centralization) Eastern European nations uniting as Eternia with 170 million people. Since 17 nations are small (0.6, 1.3, 1.8, 1.9, 2.0, 2.1, 2.7, 2.8, 3.0, 3.2, 3.7, 4.0, 5.8, 6.7, 7.0, 10.2, 10.5 million) and 3 are medium (19, 39, 42 million), incapable of producing the much bigger companies 170 million can produce (not to mention the research staff to produce high quality via efficient immortality capitalism) and nobody else speaks these 19 languages, it makes sense to adopt one common language that is WAY more useful, the language of 75% of science papers, so we discover how to live to 900 fastest and how to bring World Peace fastest. Asean is integrating, so can CEE. India had 50 kingdoms that became one nation with English for all, India is moving towards one nation, one election, tax, uniform, market, China is moving towards Mandarin Chinese only, not 50 languages, the entire world is moving towards immortalism centralization, the workers' best chance to not being divided and enslaved by palace dwelling aristocrats via eternal wars, banks, riots/protests and chaos. Plus, if you know English you can get around every nation pretty well, so it's a good way to get more to learn English in those 20 backward nations, so they may unify and emancipate from slavery to the 'progress' model of millennia that yielded 0 increase in maximum lifespan. It's funny how EU talks of unity, but there is no such thing as an European company, it's mostly German, French,

Italian, etc companies, so the inefficiency is huge: the formerly communist East can unite, centralize under one language with immortalist passion, to bring Europe out of the dark ages of empty talk towards true science. The 8 pages after this 5 page paragraph, describe in detail the pros of English as a language. Romania and Moldova speak the same language, Romanian *(some Russians speak Russian in Moldova, due to Moldova annexation by Russia in 1812 that made 'Romanian illegal, education mostly in Russian', while Romanians were decimated by Siberia deportation, etc forms of genocide)*, so Romania-Moldova can rejoin, dissolve their nations, creating Eternia or Eterna - an Etherial (spiritual)-Physical nation that invites others to join Eternia, as 1 ultra democratic centralized federation, *vastly different than USSR (we'll get to the terror, torture that led to its collapse later)*, with English as the co-official language until all common folks know English. ☺☺

The next 5 pages describe that universal, intergalactic perhaps, eterni tone, verbal and translinguistic telepathic language of honesty, *gentleness*, tenderness softness grace compassion *kindness sweetness*, the core qualities written on the Logo of the Immortality *Nurturing* Agency, the most important agency in our nation, with the highest budget, as the language of our TV-radio-internet-etc within this English language. It's this eterni tone language that sets it apart from all other federations, nations that have been created in World History, including the United States; this is not a tone as in Chinese or Vietnamese, but an emotional tone. 99.9% of communication is via non-linguistic methods, i.e. the most *important* communication is not literal language, but the language of emotions and intent as expressed in the chapter on eterni tone. *People who speak any one of 7000 languages know when you threaten them or when you're calm, by the emotional content of your sound, so they can understand loving grace vs anger even if they don't know how you call "gentle" in your 5000 languages*. Likewise, *99.9% of spirituality is not the religious beliefs and rituals*, but the intent and spiritual inner life, the living of the qualities. When a federation understands this, it promotes the language of *gentleness*, tenderness softness grace, so it can create a true bond between the nations and *finally convince all people of the benefits and compassion of efficiency in standard of living increase* (lifespan, etc, via redundancy elimination) *coming from one* advanced ethics or spirituality and one advanced culture and language for national unity of the new nation made of 20 nations. In our case, given the catastrophes of 2 World Wars, USSR, and 19 languages, this common official eterni ultra loving gentle healing nurturing tender soft tone English (not the shouting tone of Russian, all 19 languages on TV now or British/US English), until the loving tone eterni English *(slower speaking, more universal loving kindness, more telepathy)* becomes main spoken language in all 19 nations, is paramount and essential. It can be a federation first like EU for 2-7 months, then 1 immortality capitalism centralized country (*rotating capitals if we want*) with one language, one *all inclusive* eterni tone *(spoken very gently, lovingly, healingly, nurturingly,*

universal kindness radiating, *intoned emotionally VERY differently vs US/UK/etc English we hear in 99.9% of TV programs worldwide). This is not just the most loving, gentlest emotion language in existence on Earth, but also the language* of spirit, 'religion', one 'religion' inclusive of any world religion hypothesis or peaceful belief, or provable (proof sent to the government) claim about past miracles, to promote honesty, hypothesis thinking, ethics as explained in the immortality capitalism section on not monetizing religion or ethics in Eternia, in order to prevent fraud and make ethics, discernment available for free to all, and prevent various spies from torturing people using the cover of foreign "religion missionaries "who come to steal, rape, do genocides per these 900+ quotes", investors, tourists", so we have some freedom.ete *(the ETs from Eternia, the aliens as some will call us for our telepathic slower spoken language)* for reporting hidden forms of torture via tiny devices spies use, for the avoidance of the USSR torture and terror that led to collapse, since from the start USSR focus was on 'national identity and violence' as a means to impose communism, instead of kindness and Immortality *for* All, one language of *gentle tender soft healing nurturing graceful* loving kindness for all. We can ~*~*gently*~*~ ask ourselves, can countries with 0.6 million or 1.3, 2, 3, 4 million like 10 of the 20 nations, really produce, anything comparable to US, China, etc, with 900 or 80 times fewer people to choose from research engineers, scientists? ☺☺☺ No, they can't, any honest person knows it. So, why are we wasting resources to have 27 governments, 27 languages, 27 million companies, when we can have 11 much better than tiny stuff nobody has heard about?

The nationalists have invested trillions in defending the undefendable: languages become fewer daily. Defending our violent cultures and illogical languages (endless forms for conjugation, etc) is like spending $*4 trillion to prevent a snowflake in a garden from ever melting*. Instead of unifying to give everyone better living conditions, end all torture and war, they use the spy agencies to promote more division, more sabotage and lose-lose for all. Win-win is ignored. Today we have many countries speaking English, some primitive vs others, some with 20 times more violent crime. The language spoken doesn't matter much, more the tone and the culture, tech. Any language can be spoken in 10000 possible tones, from the meanest to the most eterni. People are so selfish, they don't want to make even 1 step towards sharing more, not even wanting to share the language spoken (which is 2 billion times easier than sharing the eterni tone), how will they even share the tone of action (far more than the tone of language), the 11 companies that improve efficiency of longevity tech discovery 1 million fold? Why can't people give up their selfishness and move towards having an infinitely small altruism, and willingness to listen to others, communicate easier, share some ideas easier, so that at least one day, when tone is eterni for all, the entire tech is shared? For 50 millennia the many human chimp groups killed others to promote their 0 IQ language, and now they cling to it, opposing one language for India (instead of 600 today), one for Europe (not 50), one for Asia, one for Africa. Everyone loses

when all humans fight and the science of living to a trillion doesn't even EXIST as a major. 0 IQ chimps fight to death, like ants, to defend their violent cultures and silly languages. Why? If you want efficiency, English got the simplest EU grammar, and is most used in science, most known by science geeks, so maybe phonetize writing, simplify writing and make it official EU language and the simplest language to learn on Earth. ***Why can't people realize in 500000 years nobody will even know the 27 languages of EU today?*** Why fight for that which will die anyway? ***The language you speak is less relevant***, the tone ***is everything***. Haters of English language will realize knowing English can help them bring World Peace by becoming a spy, so if some nations learn English, they can all become spies and turn by divine grace the 'evil' English into angels. Some don't even realize the language you speak is in the end irrelevant, can be even that of your oppressors, the spirit transforms all psychos and psycho languages into the immortalist versions of year 4 trillion when we live to a trillion. You're not your language, but 1 quadrillion times more than that, you're your tone, your culture, education, tech, system of government (aristocratic terror or real democracy), beliefs, health, DNA. For the language chosen, it's more whether the modified immortalist version is the easiest language to learn for all humans, most logical, least memory intensive, uses the fewest neurons to store the info, grammar rules, etc, is the most mathematical, etc. ***Why can't world linguists meet to create that world language?*** How many more people will die to promote their filif chimp IQ language?

The USSR Jews, Russians used identity, cultural, language differences to divide and conquer, like Putin promotes diverse mortalist cultures of short lifespan (low IQ) for enslaving them covertly, ***while*** playing '***liberator***', instead of one 90000 yr lifespan culture. Note how they didn't want ***200 kulaks, annd made 1 cooperative collective farm***, but also, ***how they did allow 200 languages***, instead of one language being promoted to replace all others by vote within 40 years. ***It's a half way centralization and fake communism to deny education to the poor not part of the Jewish Russian elites***. Why couldn't they invent a new language to make all happy? *Why can't humans today make a simple language for all? It's due to selfishness*. Communism has been turned into a terror that divides and removes equal opportunity for all (one language for all). The encouragement of 50 languages by Lenin and the Jews of the Central Committee etc was a covert method by ***spies within the revolution*** to restrict access to science and deeper knowledge to elites of the republics and ensure max subjugation of non Russians and gentiles under the guise of equal ***cultural*** rights for all (keep all ☺abysmal IQ☺, keep their backward culture alive and well). Today Brits play same game in India etc, Lenin wasn't a communist nor were the Bolsheviks, a family doesn't use 4 languages or 400. Son one, sister one, mom one, dad one. A family of humans with 0 violence can't use more than 1. What kind of brotherhood of nations uses 200 languages and avoids the World Peace Eternal in 3 months focus in all media? Only one controlled by killing enthusiasts who can't stop killing, torturing and mutilating? It's a fake union

to subjugate the ones with no access to Russian language texts, tech, etc, like today with English for the elites of subjugated countries only, not for the masses who can't read this book in their native tongue and understand the scam. Eternia can create unity with one identity, without the racist or violent quotes of German Engels (read it), Karl Marx (read it), Russian Lenin. The communist manifesto advocates the use of force, violence, see last line: "They openly declare that their ends can be attained only by the forcible overthrow of all existing social conditions". The *racist* German Engels + Jewish German alcoholic Karl Marx *(both died in London, after they lived there 13 (Marx) and 24 years) tone* is in Vol 1 too: "it batters down all Chinese walls, with which it forces the barbarians' intensely obstinate hatred of foreigners to capitulate." Vol 1 says: "Communists... have assembled in London.. (to write the manifesto in 1848)... they destroy imported wares..., they smash to pieces machinery, they set factories ablaze" (in non-UK nations?). Communism killed 120 million, *95% Slavs+Asians*, 100% *non-British*: 19 million East Europeans, 80 million Asians, 20 million Russians, 1 million Germans, as the German Engels and German Jew Marx advocated for 'genocide of *slavs*'. Immortalists believe humans (like Immortals did) can find the trillions of ways to World Peace, Longevity, gently, peacefully, without the terror of palatial aristocrats, fake religion *clerics, communists torturing millions of workers to death*. Were Karl Marx, F. Engels fathers of communism British spies trying to destroy the Russian empire, Chinese one, and any competitors? It requires spies to find out.

Thus, in contrast to the 'Jewish' USSR (Babylon?), we would, *tenderly gently,* out of universal *loving compassion* for all citizens, *to prevent our exploitation, destruction by clerics, communists or* aristocrats, have 1 language, 1 eterni or eterni peaceful gentle nurturing healing culture, 1000 times more loving than the USSR one, 500000 times more loving than the horrific racist genocidal Jewish Torah (part of Bible) quotes, that the entire gullible European continent has been brainwashed for 2 millennia at gunpoint to believe is the Word of God, when it is only angry people recycling ideas from bygone empires. Anyone, with any IQ, knows that Immortalist Anthem is kind, and the 1000+ quotes in the Bible, Quran, Torah violent and 100 of them truly horrific, hell creating, like Ukraine war zones today. We want to realize what true culture is. Thus, an immortalist Christianity or anything imbued with the language of honesty, humility is allowed, provided no statements are made that prevent people from realizing the 'miracles' were self-healing, plus 99.9+% were faked; all are taught how miracles are faked, religions made up. We don't teach in physics and chemistry all the comical☺ beliefs of science, like earth is flat the Church deified, from 1s3rd century, as we know the beliefs are false and unsupported by proof; likewise, we don't need to teach the comical☺ 'miracles', violent language of yore (horrific quotes) when we know it's fake, there is no evidence any of the events happened; we can look at the best and things that are true today, like kindness for all helps, gentleness helps, etc, and leave those better quotes there, but we can't turn Europe into hate preaching grounds,

the deification of violence as scripture and Word of God if we want lasting peace. If we want a civil serene society, the Bible, Quran, Torah contain extreme violence, to put it mildly; they also teach kids to emulate the very bad language of Jesus and others; they destroy the very basis of the civilization of *gentle tender soft* healing grace we're trying to establish, via a more elevated English expression (see Anthem) and musical tone, a world diametrically opposite to much of the 'Jihad like' Christian world vibe; to create a space rocket today, we have very clean rooms free of dust, 10,000 times cleaner than 1st century, millions of requirements, components, etc and we achieve *10,000 the speed of a chariot made in dirty places in Jesus times*; likewise, to create a world with 10,000,000x less 'violence, meanness and fraud' than in Jesus times, where Peace can manifest in 3 months, we need a filtering of junk, a much higher standard of evidence and kindness of writing of scriptures, to be at least as positive and nonviolent as the Immortalist Anthem; thus we publish only a part of the (un?)holy Bible. The rest is in some museum, history class for those curious about the savage cultures of yore.☺☺☺

We can't evolve only technologically, we need evolve ethically if we want humans to not disappear in 10 seconds some day; we need to be coherent, consistent, with what we want as a society: World Peace in 4 billion years or in 4 months, 0 prisons and violence or same junk as USA; military spies sometimes make up stories, etc; while any 'miracle' is possible via high tech we don't even have today for most miracles, the chance those guys had that high tech is 0, so for any miracle statement to be honest, it requires proof sent to the government, which they don't have probably (all evidence they offer is comical☺, usually, ultra easy to fake); this then changes it from a made up ascension and endless miracles one to a more kindness for all type of religion, without any name calling and violent passages. No peace, no ethics, no high speed science progress exists without basic honesty, humility; *everything depends on* honesty *the* language *of* honesty *in every* area *of society, without* honesty *a nation is* finished, *enslaved, ultra weak,* in danger of disappearing any day; we're so backward in Eastern Europe precisely because of not verifying 50 unfakable sources before believing stuff, in religions or life; corruption is rampant too, we lack a strong ethics of a language *of* honesty, SO ESSENTIAL TO SCIENTIFIC INNOVATION and preventing conflict; morality collapses when citizens see pastors being allowed to teach obvious fraud; citizens feel the government has no morals; thus, it is the duty of Eternia to not deify gullible scribes or charlatans, spies who may have made it up as explained here and even invented Jesus (meaning he didn't even exist at all or as described) and all the stones, Eucharist miracles, fake 1300 shroud of Turin, old books, fabricated too, and others in other religions, to create a strong myth for use as cover for spies setting up churches, mosques, temples, as spy recruiting centers etc in various locations (plus today it's easy to fake stuff using mind writing gadgets, like mind 'reading what they wrote' miracles, etc). ☺☺☺

Teaching all miracles religions talked about can be done in the future via advanced tech or mind

healing *the body is fine;* healing *as a result of positive thinking, visualizing yourself healthy or God blessing you directly,* if you believe in God and this helps your mind to heal faster, *due to God or Buddha or etc being 'all powerful in your belief system', without the need of wafers or a priest or "holy person with a* resume of staged healings *made up by spy agencies"* who creates illusion of healing by turning off the gadget harassing your organ, harassing which sent you to the healer *via spies manipulating your search engine typing and finding that church or "healer". Clergy would teach* 'miracles' (wild ones, like turning body into energy, ascension, materializing 5000 loaves of bread, curing endless diseases that nobody can today that quick even with high tech; not talking about telepathy miracles or junk headache disappearing, etc; telepathy miracles are explained easily via spies knowing everything or writing thoughts into brain) *are possible via magic tricks, distracting attention,* lies *(pay friends to pretend they got some disease, then junmp and claim they were healed and now can walk without cane, see without glasses, hear without etc, etc) or alien/human tech, holograms, brain writing tech, etc. However,* stating that miracles happened many centuries ago or even recently is fraud without unfakable evidence and thus discouraged, illegal, *as it acts as a manipulation technique to enslave the people and deceive them, making them 'ultra low IQ' puppets of conmen who may be even foreigners trying to pretend they got something amazing & beautiful ☺☺☺ that you can't get from God directly, unless you pay huge sums to their church or do their bidding.* The basis of health, national security*, 200 and later 7000 year lifespan for all* (not just the elites), kindness is *scientific progress via* the honesty of the scientific method, so to make sure *all are taught ethics of* the hypothesis testing and formulation and avoiding fraudulent claims, Eternia requires extraordinary ~*~*evidence*~*~ for extraordinary claims of events happening eons ago. This also reduces citizen gullibility when reading made up science papers published in foreign journals. Jesus in John 14:12 reportedly says "*What I have done you will also do and much more*", so definitely, while Jesus brought great genocides *due to gullible people taking things literally without seeking evidence*, we can do better and achieve World Peace in 3 months with enough international freedom from the Bible, Torah, Quran, etc brainwashing words on total war before Jesus or Messiah returns, or before 'peace arrives' in made up 'revelation', or Jesus words in Mat 10:34 "*I have not come to bring peace, but a sword*" and many other anti-peace quotes that are anti-life, anti-civility, anti-grace, anti-gentleness, anti-tenderness, anti-healing, anti-eterni, anti-social, anti-forgiveness and contradict his more benign words in beatitudes, etc. Jesus lovers can pick the best quotes and make it an immortalist Christianity of the *Jesus fantasy*, a *sci-fi Christianity* based on an edited Bible (free of 100s of subtle/direct calls to violence and genocide), on the civil reality of universal kindness for all☺☺☺ souls like an evolved being has and peace within 3 months achievable by a planet serious about it. Same for other religions with violent quotes, Islam, Judaism. Eternia will be free from genocidal, violent content, literature that instigates violence under the cover of "music", 'spirituality', "religion".

To educate all that World Peace is a simple choice, to promote a language of *loving soft* sweet *grace*,☺☺☺ and to help all know who Jesus, etc was, the government will require all TV-radio-internet-street ads to include Immortality *Nurturing* Agency hourly☺☺☺ads about World Peace in 3 months being possible, with meditative relaxing music (free to download from music.gov, to listen to headphones and evolve, or music.imm if imm is national domain) with natural ways to bring Peace, Bliss and gentleness tenderness kindness *nurturing* compassion while breathing, peaceful music to transport all to the vibe of the trillion year old serene Immortals, and *where and when needed, very rarely,* ads about *the* thousands *(see lists) of scripture* quotes clergy dishonestly avoids *(to not make the 'holy word' look bad)* etc in other countries, the original versions, not the ones illegal to publish in our nation, so people know, without a doubt, what kind of religions those are, if any are left believing in the 'infallability of the (un?)"holy" word'. Several TV-radio programs would elucidate the meaning of a language of honest *loving soft* sweet grace, the extreme contradictions in these texts and how any intelligent scientist can't take at face value any of the so called prophecies, miracles, etc that have led to so much violence and manipulation to wage wars in the name of God. We believe that if one nation is serious about *honesty*, nonkilling, nontorture, nonviolence, others will follow our living example and make a trillion year lasting World Peace far more likely, beyond a 3 week ceasefire. No monetization of religion, spirituality means people serve others live a better life in action, instead of talking about being good so much, when churches sit empty so much, people are overcrowded; use churches to sing Immortality *for* All songs or parctice whatever tone evolution and immortalist version of religion that is free from negative quotes; if we give all single family houses, each amazing & beautiful ☺☺☺ home is like a temple and people will love it so much, they need no church with online era anyway, since everyone becomes clergy who is teaching others via his/her spiritual songs (with or without voice, many artists create peaceful meditative music to help others relax and be kind, maybe add a lyric as text if no voice, etc) on youtube and living example of slightly eterni vocal or instrumental tone. This enables a true ethical renaissance to occur, to rejuvenate our souls, nation and planet, so distracted by the negative news. ☺☺☺ There will be 1 to 700 Immortality *for* All centers in every city where people can meet to discuss living to 9 million, measure biomarkers, learn about preventing aging and health issues, or chat about afterlife, immortality, sing to God or all humans, besides meeting online, no need of special tax free entities to brainwash while others are homeless and could use church materials to have housing, recording studios for all to share, to create eterni *music*, to help us evolve our ethics, tone, intent. This is the emancipation of the people from the torture of the Inquisition and other subtler forms of subjugation by using religion to degrade national scientific literacy, discernment, undermine national average tone progress, etc. ☺☺☺

We got endless social, health issues in our nations, *short lifespan*, so we need efficient use of

building materials, science progress, real care for all, not empty talk. We need honesty, unity, gentleness, kindness, grace, productivity. Religion was used for eons to make science illiterate nations, lower the IQ of the masses, to divide and create 100 sects, 100 languages to tear the country apart or enslave it. United we stand, divided by *"literal language or* language *of 'religion', brainwashing"* we fall. Thus, Eternia can help to gently unite all its citizens and all interested, into one language of "May all humans live happily to a trillion, and eternally in other dimensions. May we altruistically love, using the amazing tools of technology to help us evolve our tone of intent, action, speech, universally kind emotion, all humans more gently, healingly, nurturingly, tenderly, softly than the most loving mom loved her most loved baby in all human history.', that universal language of infinite compassion for all, not that of "Jesus alone saves". No donations should be legal for teaching evident stuff about kindness and forgiveness, basic qualities, stuff that is written a trillion times in 1 trillion books and poorly practiced. This is because ethics is the most important thing, so it is priceless, free for all, and because the language of spirituality comes from the heart, from true love, not from the 'get paycheck and money' survival need to comply with the dogmas forced by Popes, Patriarchs; the government ethics.gov, ethics.eternia, the colorful amazing & beautiful ☺☺☺ shimmering shapeshifting teleporting Immortals holograms in the Immortality City Centers that give free ethics lectures for all to listen to gentler softer more peaceful tones than in 99% of churches, and other centers, or etc and millions of spiritual websites people create to evolve and share their thoughts about how to achieve World Peace in 4 months and Immortality *for* All in 100 years (longer lifespans of 150 first, etc), are able to give that free "values education", besides civic education and Immortality *for* All classes since kindergarten, no need of lies about miracles that never happened or, for which we have no evidence or reason to believe they did. *All can listen to sermons online mostly or via AI holograms in the City* Immortality *Centers where* they go check biomarkers to make better choices, even 8 hours a day, of even online sci-fi Christianity, etc youtubes allowed by the government if immortalist (not life shortening) versions of it, in much nicer tones; thus, buildings are used to create facilities to provide housing and decent health care, 500 year lifespan to all, with no violence, no wars, no prisons, just civility and honesty, the audacity of gentleness, tenderness, humility. Perhaps, *we could gently and ever so* softly, *free all the people from short lives, war, prisons, violence, not just lie about miracles that most likely never happened, while being aware that with high tech we can do all those fake miracles some day anyway. ethics.imm or ethic.ete, (imm, ete country domain name maybe), has a 20,000 page* Ethics of Immortals *book to help start* the thought process *of the* 21st *century universal tender* honest soft healing *graceful* language *of spirituality and ethics or, 'religion'.* This 'religion' language is that musical tone of one intelligent proof only, for honesty building, based local spirituality-ethics that *frees* all from mental slavery, low IQ, ritual brainwashing, grants all the freedom of *healing*☺☺☺ *gentle tender soft nurturing* honest graceful language *and* personal

connection to God anytime you breathe via happy spiritual breathing if you want to, listening to or asking God, thinking, connecting *to* God anywhere via imagined or real astral travel; we need no wafers, rituals and blessed objects *(God can bless you directly, ask God) needed, no clergy intermediates acting* as spies *to* enslave the nation.

This *amazing, beautiful, graceful, nurturing, gentle* eterni *or* Immortality *for* All honest language *is a* democratic *evolving* fluid *free* honest *spirituality (not a rigid religion) that, unlike other ultra restrictive ones,* lets all citizens be clergy*, holy, happy,* ☺☺☺*healthy, ecstatic in developing* honesty and *the* qualities of the Immortals*, is OK with all citizens being part-time clergy to motivate them to speak* kindly and evolve the ethics*, lets all create an* Immortality *Nurturing* Agency *approved spiritual website and youtube to teach ethics via* ethical song and lyrics*. Universal immortalism* language *also ends the monopoly of ethics coming from foreign spies disguised as clergy*, ends the IQ destroying "ethics" (religion, ideology) as cover for taking over nations, imposed via the sword by foreign powers from Constantinople, Moscow, Rome, Mecca, and many other places, last millennia via fake miracles (no science proof) and deception, in order to enslave the locals. To be free, is to be free of obviously violent quotes, scriptures, Manifestos (communists advocated violent methods) or 1st century outdated language and tone of writing, fraudulent claims about miracles with 0 evidence in the era of science. We can't chain our people to the chemistry and physics textbooks of the 1st century, so why chain them with the ethics texts of 1st century, a little after or before, when with 50000 ethicists we create something so much more positive, healing and amazing than this, that has never been created in the English language? With such intellect freedom, we can finally think, no longer being terrorized to wage wars by clergy supporting wars, we can find a trillion nonviolent ways to ☺☺☺Eternal Universal (intergalactic) Peace☺☺☺ and physical | |Immortality *for* All| |, initially 150-500 year lifespan, much later 5 trillion. As a neutral country, friend to all peaceful ideologies and institutions, nations and alliances, we, Eternia, want World Peace and Immortality *for* All interested, be it spiritual or physical or both and we want a unifying | |Immortality *for* All| | ethics language and a unifying literal, emotional language. ☺☺☺ This helps us to free humanity from eons of torture, violence and killings in the name of religion, ideology, violent nationalism, etc.

These 20 Eternia nations can use euro as currency or eterni (the eternal currency, for those not in euro yet) or the immortali (initially, for weeks, they're a federation each with existing currency☺☺☺) and have 1 thing in common, super tiny or medium countries that over millennia got occupied by endless groups, empires, etc – so this gives them a chance to develop and become a unifier of humanity, inspire others to also adopt English and discard into the dustbin of history another 19 useless languages: *no other area on Earth has such tiny countries* with different languages that are useless, unknown to others, so English makes sense to help the 20 move out of poverty and ignorance; the 20 will serve as a model for others to move towards one

common language for all humans, so much needed to avoid Ukraine like wars, fought due to language issues. Having so much redundancy, makes scientific discovery and development in Eastern Europe pathetic at best, and the entire humanity suffers when this potential is not used. India united 50 kingdoms with 600 languages into one English speaking nation, why can't these 20 former communist countries unite as one Eternia under centralist immortality capitalism, a country to help further Immortality *for* All. Initially, each has 2 official languages, the original and English and over 20 years they bring their laws and societies in alignment and phase English in as the only language to keep population scientifically aware, integrate themselves as one nation, super-centralized, one indivisible unity for all, one immortalist culture, with Canada, Australia, US, UK as security guarantors, besides NATO and EU which Eternia would still be part of, making EU simple, as we have 1 team representing us instead of 20 teams, 19 languages. The 20 East Europe nations don't want to wait eons to join EU, NATO, Eternia, they can join Eternia Federation in 1 hr. *English is co-official first 5 years of transition, then next 5 years replaces original* languages, so we don't end up splitting like 20 other federations in history, USSR, Nordic, etc included, due to different languages *and cultures – so they also create one* eterni culture.

They thus declare their historical independence from Russia, the end of all wars among them too, their Universal Immortal Galactic Future, since *one big Federation (later to be country, totally one) of 170 million people, almost thrice larger than Ukraine, is a lot harder to invade than Ukraine with 44 million people*. They would aim to be the most peaceful country on Earth with the most peaceful constitution *("We the People of Eternia declare the founding of our* Universal Immortal Federation *for the liberation of its citizens from wars, violence, disease and aging, so that one day, all humans live to a trillion years old, in peace and bliss☺☺☺.", see* Anthem. To provide Russia with less reason to invade, we will have no nukes on the territory, focus on nontorture, nonkilling, nonviolence, all that USA failed to do 240+ years Eternia would do: like the Department of Peace (proposed in 1793 by Rush) with equal funding with Department of War/Defense etc to prevent wars not just wage them. We can set Eternia Alliance Day – World Immortality for All Day (maybe *Jan 1st when New Year starts, so people make resolution to longevity then)* as the national holiday of the federation, the victory over war, violence, killings, aging and all causes of death, instead of celebrating victory via murder over other humans, or celebrating killings in wars of independence like many nations do; let us become Angels and Celebrate eterni ways*, not killings that disturb the* human quantum entanglement field*). We will create the* most eterni (*gentle tender soft* healing nurturing healing peaceful) tone of speech of any administration, peace focused Immortalist Greeting, serene gentle Immortalist Anthem and tranquility themed Immortality for All Flag, with good relations with both China, Russia and NATO, a 'neutral' immortalist partially NATO member (only some

provinces initially are NATO members) initially, until all immortalist states/provinces join NATO, EU, perhaps. Ukraine joined USSR 3 months after some formation of the republic, so can Ukraine, Moldova join Eternia Federation at Its founding (or days, months later if skeptical) by Romania, Bulgaria, Poland (3 *poor EU-NATO members who got nothing to lose, only high tech progress to gain*) and all others interested. Ukraine feels somewhat betrayed by EU, they need wait "decades to join EU" per France President, the 20 need pragmatism and development in their poor backward South-East and Eastern Europe, so let's find a serene, happy solution. ☺☺☺ In 15 out of the 20 nations, many don't even have toilets and clean drinking water, they're like a third world country in some areas. The 2024 life expectancy per CIA: Kosovo-Georgia 73, Moldova 70, Ukraine 70 (due to Russia bombs), Serbia 75, Bulgaria-Latvia-Lithuania-Hungary 76, Romania-Poland-Slovakia-Macedonia 77, Bosnia-Estonia-Croatia-Montenegro 78, Czechia 79, Albania 80, Slovenia 82 vs English speaking: Singapore 87, Hong Kong 84 (China 78), Canada 84, Australia 83.5, New Zealand 83, UK-Ireland 82, USA 81. For the record, *Russia is 72,* Brazil 76. Romania, Moldova, Lithuania, Kosovo, Serbia, Poland, Slovakia, Hungary, Bulgaria, Ukraine, Latvia, the 11 with 70-77 lifespans, would be ecstatic to create Eternia Federation if others are skeptical initially. South Korea increased lifespan 20 years, *by choosing* English, *why can't* Eternia help All humans to live ☺☺☺happily to 400+ in 900 years? South Korea lives longer now than any Asian nation, except Japan, Hong Kong, Singapore. Once Eternia helps bring World Peace, every new invention is shared with all peaceful folks.

Naturally, those groups of people who placed longevity on a higher priority, or have genetics luck, will reach 400 faster and 0.000001% may live to 680 (70% above world average) when the average living human is 400, just as today 1 in 100 million lives to 122 or 70% above world average of 72; this is different than our world, where due to fear of misuse of tech, a valid fear, nations keep everything so secret and even have anthems saying "Our country above all" etc or is "more beautiful than any other" etc – when it is simply not true at all, it's a subjective notion that creates strife and conflict and can lead to species disappearing since "the species survival above all" or "Immortality *for* All above all" is not the priority that is higher than 'the personal like of a group/country because they seem to advance Immortality *for* All more than other groups, nations". Look objectively at the hills, mountains, etc they claim to be nicer and they're as nice or uglier than in many countries; to survive, we need a new ethics, since today, unlike in centuries of old when anthems were created, we have weapons that can end humanity fast; when we're one family, one language eventually, all we discover is used to help all, not just a nation or group – however, due to the fact that people are motivated materially via immortality tech given to those advancing humanity's lifespan the most, there may be certain differences in lifespan still – since without this, some find no incentive to improve anything, being content to die at 80 because the government takes care of everything; hence centralized immortality

capitalism ensures progress, happiness and yet efficiency. By humanity evolving to the level of wanting to help all always, evil intent disappears, true sharing happens, which speeds up progress 1 million fold. This evolution is not instant, but one day we will get there via the most *healing*☺☺☺ *gentle tender soft nurturing graceful compassionate* eternitone and music.

Romania got the largest building in EU (heaviest in the world, 2nd largest, BBC video) in their capital that can be one of the rotating government, parliament headquarters for Eternia. It can be named the Eternal Universal Peace and Immortality *for* All University Palace and thus refocus the Eternia on Eternal Learning and Immortality Universities as the Nicest Buildings in the country. Eternia can have a capital for each area of 20 million people, 8 moving capitals for the 160 million Eternia folks, like 1 the capital for 3 months or something, rotating in peace time to ensure maximum secrecy of where military assets are concentrated and to make all feel a true democracy exists without all power concentrated into one area, and in case of all out world war, they move to the 9th capital, the safest due to high altitude *(many cities in central Transylvania are above 2300', some 3300', Predeal, or 4500', 50 areas 8100+' for strategic assets and 0 satellites working advantage for drones, seeing, airplane takeoff, etc, vs <1400' for most of the city (most capitals are about 500' or less) for any current capital of the 20 nations)* making enemy underground tunnels hardest to build to spy in peacetime (so more sensitive stuff can be in the center of Romania, the geographical center of Eternia, the furthest away from border area listening devices) or to wage war during conflict, since it's the center of Eternia and they need to dig under the country the longest and then up another huge distance thru hard rock (vs soft earth) and be detected by sensors. Given that central Romania is surrounded by up to 8000 ft mountains and the most difficult to conquer in Europe, not just in Eternia, the only area in the 20 country Eternia area almost 300° surrounded by mountains, the only such area in Europe with tall mountains away from water (water allows navies to take Cuneo area in Italy that has mountains around 240°, though not as central Romania which is 300° surrounded by the Carpathian mountains) a town in central Romania could act as a backup Eternia capital, after Bucharest and the other 7, in case of wars. This town is built later, in the most impossible to conquer area where nearby areas are ultra freezing and hardest to conquer, colder than much of Alaska. Romania is the geographical center of this hypothetical Eternia, so that can help with the capital being equally distant, since to the west are *Hungary, Czechia, Slovakia,* south *Bulgaria, Albania, Yugoslavia*, east *Moldova, Ukraine*, north *Poland, Latvia, Estonia, Lithuania*. ☺☺☺

South Korea, living to 83.0 went from poor, short-lived (*North Korea is* 72) to developed in a few decades of intense English language, 58% Koreans can speak it, so, thanks to English, South Koreans live longer than all West Europeans: France-Italy-Spain-Norway 82.6, Sweden 82.7, Finland-Denmark 81.7, Austria 82.3, Netherlands 82.2, Germany-Greece-Portugal 81.5. Same for Israel, they went from short-lived vs West Europe to living longer, 83.3, than South Koreans,

West Europeans due to 85% Israelis knowing English. Why are these Eastern EU backward countries sticking to useless languages, instead of choosing the best, English, easiest to learn *and* the language with the largest amount of people living longest? Hong Kong is 84, Singapore 86, thanks to English, the language of science food tech, longevity, medical papers. The 20 backward former communist countries want real results, 0 redundancy, not promises of EU joining in 30 years or of reaching a level of development in 40 years. We need a world truly united against war/aging now, not in 30 years. World Peace can't wait 30 years, we had too many wars in Eastern Europe. The 20 can help eliminate EU bureaucracy too, as EU needs fewer officers. After so much time in EU, and so much capitalism, most former communist East (the 20) has the same housing, and in some areas, same poor quality of services etc; the miracle of capitalism never materialized fully and many even in the West live in ***ghetto areas***. Thus, with centralized immortality capitalism, the 20 can finally get the real education and research going, eliminate redundancy of millennia and become more modern and high tech, being a contributor to EU, not just a burden as some have called the 20, to help boost EU image and make France, Germany, Spain, Italy able to export more, since Made in EU gets a better image, happy that finally the backward communist countries are getting their act together and stop being so needy and dependent, diverting many EU funds to them, as UK was complaining of paying so much to EU. The 20 need no EU help, they just need to become one adult developed nation and take the destiny in their hands by eliminating redundancy and increasing efficiency 90 fold; the former 20 communists speak a different language than the big EU 4, so English will just be different too and make the rest of EU, plus the entire world save tons of cash lost in training spies, embassy staff etc 19 useless languages; it's a win win since stuff made in Eternia will raise EU prestige and also a lot of the big EU 4 joint projects; many East EU areas are frozen in time, with nothing changed since 1989; people go to work as farmers to get some money in the West, so they can build a wood house in the East; this keeps West and East EU backward, since with eterni food and robots, all veggie picking, food production can be automated. By speaking English we will attract funds and help, donations, from outside of EU, to help our backward ***third world country looking East or West areas*** to evolve, money from the rich English speaking nations (US, Canada, Australia, UK), so all EU nations can benefit from the influx of investment and knowledge into Eternia, the new EU nation replacing 20. Due to the more educated going to the Western EU, services, healthcare, etc in the East have become so poor, in some areas, lifespan is shorter now than in 1989 communist times per some studies – so we have created a capitalism that just focuses on profit, not life, capitalism having become as indifferent to ☺☺☺longevity as communism was (and sort of still is, the 'capitalistic Chinese communism', *since in China living to 9000 or* a trillion some day *is not even mentioned in every speech like* Eternia *would do*); we want to bring 800+ year lifespan globally, not to merely increase it by 5 years in some West EU areas. Junk food also led to Japanese Okinawa to shorter lifespan, we need healthier food

choices – now, with pressure cookers, people can make meals way healthier, 30 times faster than in communist times and way healthier than junk restaurant food. The junk fatty food meant the last 50 years overweight and obesity rates had gone up 3-10 times in most countries, canceling some of the lifespan gains from medical tech. Russia took over McDonalds, but the name "Tasty and that's it" is leading people away from eterni idea of eterni food (food is meant to help you live to 700, not to be tasty poison killing us by 80), healthy food, high tech eterni restaurants: fries are very toxic, as are burned burgers, due to toxic AGEs. This name change is not what Eastern Europe wants, they want change of substance and 100 fold reduction of toxic AGEs. The USA lifespan *is* 81 on average thanks to McDonalds etc that made obesity *go up 10 fold last 50 years;* Canada lifespan is 84, Australia's 83, less junk food. Did we have enough French fries in East EU? Do we want to advance and evolve past Neolithic cooking methods? ☺☺

We want EU to lift up the whole world, so the rest of EU, the other 11, will recognize the amazing & beautiful miracle that Eternia is. It will also help the English speaking world to eventually, possibly, if proven vastly superior to US thuggery, embrace immortality capitalism, instead of hooliganism... and help the 20 nations to offset the influence of Russians (not all, but still the majority as seen from their military methods and Russia TV One public tone of speech) who love the same hooligan type of methods like USA, meaning torture, force, war, killings, as we know from communist times. The less violent Canada, UK, New Zealand will also resonate with helping us to create a more benign vibe for the quantum field of English speakers than this music... product of US gangland. Eternia will cause many who work in Western Europe to return and build a more modern unified Europe. *France and Germany always called for a more unified Europe, an EU like USA, so* Eternia *is an* amazing step towards that unification, so they will support it. Germans and Germanic language speakers in 8 other EU nations would be happy the 20 choose English, a Germanic language with lots of words from Latin (French, Italian, Spanish got them too), way more Latin words than the 19 languages (except Romanian has more than English), so Italy, Spain, France, Germany will have a way easier time to understand these English speaking people, as well as all other EU members making EU far more unified as they understand each other; thus, proponents of a strong united EU would be the 1st to support us; the 20 Eastern states are either Catholic or Orthodox, which are almost identical, further helping their integration; 0 redundancy will enable new materials of construction to be discovered and used to create better housing (not wood), 100% renewable energy, etc; inventions in Eternia, the new ☺☺☺EU country will benefit all EU. Globally, lifespan increase has slowed dramatically last 50 years, coming to a halt almost last decade; something is not working. These 20 nations already use English among themselves to talk, so this is only a formalization of the reality on the ground. Eastern Europe is the closest to USA and the English speaking world part of EU anyway, always wanting US troops on the ground for security. Instead of being Bulgarian, Romanian,

Hungarian we're eterni, what a beautiful word, with many meanings, eterni tone, eterni food, eterni citizen, eterni music. Once successful, others will form their own federation and the world moves from 7000 to maybe 30 languages, then 10, 5 & later only one. Immortality *for* All. ☺☺☺

WHY ADOPTING ENGLISH IS NOT NATIONAL TREASON, WHY CULTURE IS NOT LANGUAGE:

First of all, if some think the "English speakers are the enemy", that's fine, but to defeat your enemy, you need to know his language, so the argument against learning English from age 1 collapses really fast. Secondly, some East EU people will call all East EU folks traitors if they *promote English as the language to replace the 19 languages in the name of "efficiency and increasing research jobs 100 fold via 11 companies in all East EU", so we kindly need to address this paradox to be clearer.* If you may gently allow us to present our hypothesis, we can easily argue that the true traitors are the supporters of divisions, such as language divisions and fake religions (Islam (Bible recycled with some additions), Christianity (fake miracles, 0 IQ religion based on 0 credible evidence), Judaism (read the Bible to see the lack of logic), etc) divisions *who facilitate the multi-millennia* subjugation of the poor by aristocratic *and royal families*. True to its egoistic anthem, "God bless the Queen/King", *"God bless the people" not present in anthem*, "Crush the Scots" present in the full poem", the UK Monarch (husband of Queen Elizabeth), who was born in Greece and met UK Queen in 1934 (Greeks did many genocides, as the alcoholic Alexander the Great promoted his ideas to future empires), and was lobbying USSR, using Churchill puppet, for keeping the Greek monarchy and splitting Europe in spheres of influence, instead of liberating all Europeans from *feudalism* (still present in UK even today, 70% of land owned by aristocrats) and granting all people the right to trillion year lifespan, as shimmering shapeshifting teleporting Immortals, not chained slaves worshiping royal families and being brainwashed daily into the UK Royal Family Personality Cult and other Royals UK controls. So, the 20 former communist nations, *finally republics after eons of royal brainwashing and terrorism*, have a chance now to free the world from the pure terrorism of monarchies (all wars in history are/were due to royal family or nobility aristocrats, who, having nothing to do, started wars to expand their lands) and establish a truly democratic East EU Nation, more democratic than USA in 2024 even, the renewed ultra unified, more unified than USA even due to centralist immortality capitalism East European State of Eternia, not based in monarchist Belgium, but in the rotating capitals of the East EU, World's first Eterni Tone English Speaking Nation. The murderous torture culture of violent Jewish Bible brainwashed USA, would be replaced in East EU with the eterni kindness culture of Immortalist Anthem. The blood of millions of peasants, workers subjugated by foreign empires would not have been wasted in vain. It would be useful for others in West, South, North EU to join the East EU unity, to join in making English the main language on TV-radio-news, with local language subtitles, and 10% of the most important content in local language until all learn English, but of course, egos are huge

and abysmal IQ common, so some may want to preserve their 'chimp' culture, which is honestly very violent compared to immortalist culture. Later, if Spain, Portugal are fed up with torturing bulls as sports, public displays of bloodshed of bulls in triumphant displays of pure cruelty, satanism and violence, praised by the Portuguese and Spanish monarchies thruout time, they can join the East EU wave of nonviolent transformation towards Eternal Universal Gentleness, Kindness. We immortalists care first and foremost about *liberating every human from the* oppression of the royals and aristocrats, and their partners in crime the clergy of fake miracles and brainwashing and IQ lowering, by establishing immortality capitalism, one language instead of 20 or 500 wherever possible, one educational tone, free education for all and standard for all, one equal access to housing with houses sold/bought in 2 days max, rentals obtained in 24 hours max, and a merit (immortality credit score) based access to the latest more expensive longevity technologies, based on the effort to promote 9 billion year lifespans for all, to prevent people doing nothing and waiting for 'the 11 companies to do everything for them without them making any effort to improve the system'. Thus, immortalists don't care what language they use, since as 500 year olds one day, we will have the intelligence of AI which can speak a trillion languages one day *(though we wouldn't waste our brains to develop such faculty, as it doesn't help us to live to a trillion the fastest). Ending subjugation, redundancy, 7000 languages* (used by monarchies and aristocrats to divide us), is more important than "tradition of a useless language with 40000 fewer science papers then English", as that eternal war over language stops all progress. At our filif chimp IQ today, it's more practical to have one language, just like it is to have 10 million programmers for 1 good Windows operating system, instead of 10 programmers for 1 million trash operating systems (languages). We will create a language of such efficiency, symmetry, ease of learning (as explained above), that today's English will be made even easier.

For ages, USA, Australia, Greek Empire, UK, Russian Empire, etc have been using subjugation via lack of imperial language knowledge as a strategy: the governments translate the same language in all kinds of languages, therefore perpetuating the divisions among the workers and people of the world, delaying scientific speed of light progress in communication and efficiency. The royals and parasites who took over USA, Australia, NZ, UK, California and many states, only allowed elites of puppet nations they controlled to know English or Greek, so the locals are enslaved, ignorant and clueless, so 200 languages were encouraged, the websites display endless languages on government sites even in their original 'English speaking nations', in order to undermine all and allow the few to control the masses by divide and conquer, very much like the Zion Protocols. Check out the endless news about royals, totally useless and irrelevant to the homeless and subjugated people of Australia, that are shown on the main Aussie website, such as this one that encourages people to use their phone and damage their body, instead of avoiding phone radiation by using a cable that diminishes it 1 million fold. Every day we're

bombarded with endless trash about royals or celebrities that holds 0 relevance to the issues of today: horrible food, housing and healthcare for 90% of USA, UK, Aussie and humanity. Such overt destruction of the world by Jewish and other opportunists is horrific, as these people don't want World Peace in 3 months, but Bible violence for a trillion years. We have a government of USA, Australia, Britain, Canada, NZ, etc who encourages people to never speak English, to turn every nation into a Babylon of 500000 languages, all slaves of Jewish lenders. The Vatican and all Christian clergy globally want us to believe the filth of the Bible is the Word of God, a God of hate and destruction indeed. Since 2000 the UK has been actively buying properties in East EU and supporting the revival of monarchies in East EU, *creating new cults of personality in East EU, to further the* subjugation *of East EU*. Under the cover of "encouraging local stone age culture of peasants (the filif ostrich IQ☺☺☺ folk music we find in 200 nations, etc)", they lower IQ of locals, establish spy bases disguised as churches, think tanks, companies, art institutes, gyms, etc, while keeping Eastern Europeans ignorant of English and what goes on, as the puppet government is *wholly run by puppets, incapable of having bilingual programs on every TV station, politicians who speak everything in both English and local language to teach all English, show the latest English science papers and discoveries, and liberate the World from Feudalism*, via written translation, subtitles, to bring knowledge of science and decent programs, about living to a trillion, instead of the recycled garbage they present, after copying mainstream TV stations pf Western Europe or USA. *We can't go back to the feudal age of slavery, so the best way to defeat UK Monarchy's 1000 years of terrorism is to* learn the enemy's (UK-USA-Australia-NZ-Canada government, not the people of English ancestry) language and use it in utter defiance, to liberate the Earth from the pathological addiction to "7000 languages" and state sponsored terrorism deified by spy agencies, when the real issue is the lack of immortality capitalism and basic human rights, not "protecting the trash culture foreign spies have created to subjugate your artificial polity, your "nation", created by the Italian (Roman) Empire genocides (kill until a nation becomes colony) who forced Italian language (Latin) to merge with local languages and create new languages. Wake up, the royals know how to dupe everyone, in every monarchy. The ideal way to counteract the UK Royal Cult of *Kill to Take Over, Violence to Spread the Empire (This Cult is the Cult of All Empires, not just UK)* is to learn English, then only you will see how *your culture is a carbon copy of UK trash*. They use the same exact methods and you copy everything from them, without any originality, just do it in your own useless to science language. We need no violence, UK could have said: hey all citizens of the world, did you know we can increase lifespan 10 fold 1 trillion times faster if we unify as one nation with one language in Eternal Universal Peace and that we could have avoided killing *millions to impose English on them by simply presenting the benefits of fewer languages?* World Peace *in 3 months + 0 jails/violent crime in 10 years, can be the daily topic on TV every 10 minutes, every song, etc until we manifest it. UK doesn't talk about it, nobody did for millennia, so let's* forget about UK

trash and bring immortalist culture now. Worker lives wasted as cannon fodder don't count for royals because royals don't fight, can't die, their military service is fake, they're never put in harms way. Thus, World Peace, *the end of the genocide of* workers, *soldier* slaves is never a goal, all we hear is weapons shipments, World Peace in 3 months is not heard even once every 5 minutes on TV, as it would be required by a truly kind culture who respects the cannon fodder workers dying on the altar of their abysmal IQ and slavery to Cruel Royals. Shame on UK and all nations, for 1000 years, the royals could not envision a World of Peace, as their IQ was too low and affected the Bible junk. We're called to have compassion for the low IQ folks, we see UK royals incite people to stone age sports (watch it), sports which are obviously absent in immortalist nations who practice immortalist 'service' exercising (no sports) instead. Do we want to devolve into UK Royalist emotions and gestures? Why not build a nice house like Habitat for Humanity charity, for the UK homeless? Why waste time in Germany watching low IQ sports? Bad example from UK Prince? Prince Harry in his book Spare talks about using cocaine, killing 25 people. Not the best example, though he could be joking.

How can we create/choose that nice language and adopt it globally, to end all fights forever, to end all torture and violence, etc, choose it out of free will, without being bombed and tortured to choose a language, as done by 900 empires already? The EU governments have betrayed the people, most nations there have a useless language (only Spanish is used in a few research papers, German too), used in 100 to 100000 times less scientific literature, all because of nationalists and big regional powers who dislike the idea of English as the EU language. The only solution is the East to create their own nation and stop being colonies of France and Germany, who simply use East EU to sell their products and open companies, without any real love for the non-German non-French worker, without any real reform of the EU and the implementation of a truly democratic government based on efficiency of 11-20 companies of the entire 500 million people EU. The interest of Germans and French are ignored by their government too by the aristocrat CEOs. EU would have 100 times more tech and efficiency, German and French would live much longer due to tech progress and the 11 companies only in EU that bring 100 times more research jobs, if all big EU powers would get along with the plan to switch to English. So, we need to educate people, to have them read ideas like in the 50+ pages above and make them ask questions about efficiency. Due to high ego of Greece, Italy, France and Germany, that is used by the Ashkenazi Jews to turn EU into a Babylon of 5000 languages they control, a change to liberate the European enslaved workers is not possible, so East EU need to declare their independence and create their own nation, give single family housing to all, stop having West EU telling us how to use our land and resources to protect wolves and bears instead of build houses for Eastern Europeans. East EU can always create eterni *local currency if needed to achieve true independence from German-French dictates coming from the* Ashkenazi Jews who rule UK,

Germany and France. Jews fight English as common language only because they want no language to dominate, so Hebrew can become the final common language. Later, we can even adopt the US dollar in East EU. *A great Way to end the* UK Royal Family Cult *of* Personality is simply to know English, make English eternI in tone and show the world we can be immortalists, speak English, in a kinder tone, and one day, if feasible, lobby for the unification of UK, USA, Canada, Australia, East EU into one English speaking Nation, Eternia, with just 11 companies for 650 million, run not by royals who deify blowing by gun all 'infidels in the Royalism Religion", but by a Council of 500 kind humble immortalists, each representing 1.3 million people (650 million inhabitants in the new tricontinental nation), with rotating capitals, and maybe the leader of the council is one of the 500, each gets to chair the council for 1 month (diplomats can be fewer, so foreign nations are used to one person), in a truly democratic immortality capitalism, instead of this "slavery and stagnation for all" system the UK Royals created in Australia, USA, Canada, UK, NZ and others created in the other nations. Sadly, USA is run by terrorists, whose main hobbies include destroying the brains of Eastern Europeans for fun, and trim the penis of 80% of males. Instead of taking care of the real needs, housing, food, healthy lifespan, they trim penises. The East EU nations are one group of enthusiastic passionate "Humanity First, Workers First, forgiven healed parasites second", former communists, who have evolved past the violence of communism, have seen the scam of predatory capitalism and the huge crime waves (10000 times more drug use, prostitution, brothels, casinos, gambling, etc) it brings, and now can march kindly carefully gently towards the future of Immortality for All and World Peace in 3 months, Eternal Universal Peace. The survival of humanity depends on having 5 languages max, so to be pragmatic, we need promote top 5. Sadly, EU is more like a Jewish French and Jewish German company promotion medium, where the ideals of one language and immortality capitalism are destroyed and every East EU nation is turned into a dysfunctional colony, in the hands of Jewish international finance (needs 20000 banks to loot) and its ultra violent Bible. EU is more like a scam, like USA, they can't even agree on one language to adopt, the very basic minimum of equal opportunity, via equal access to the same free education.

Romania Parliament Palace building,☺☺☺ world's heaviest and *largest* civilian building with an administrative function, could be one of 8 rotating possible future headquarters of Eternia (the new name for east EU) government and Parliament, could *become a symbol of* Immortality and host beautiful Immortality Museums, beautiful recordings *of* science classes, *Classes on* healing the world through *longer* lifespans due to more science and fewer languages as explained in the previous paragraphs, Immortality Universities and World Peace gatherings *in unused space*. The ☺☺☺Palace has *1100* rooms (allowing *800* recordings to happen at once for *800* classes) with tons of tall light wall space and upper inner space that can be used (like in any tall building) to display with a video projector science formulas, 3D holograms and slides from classes on

engineering of 7,000 year lifespans, so as to promote Civilization of Immortals in all countries whose visitors stop by. It could be world's largest science of Immortality Museum and University too. In 30-100 years, when holograms advance more, and are as cheap as a video projector to produce, 3D moving displays of molecules, cells, engineering devices, etc can be made, as well as the most stunning art (that hangs in the air, 10-20 feet above) with 1000s of shimmering colors. The huge amount of space and the fact you can change the 3D displays every 2 minutes, enables the viewer to have the experience of seeing 5,000 gigantic museums in one trip, being blown away by the sciences of Immortality and the future of World Peace that is imminent, if people want. This enables people who sit in an inclined or almost horizontal chair to relax and watch the amazing & beautiful ☺☺☺ "Disneyland like" chemistry lecture or cosmic bliss meditation lesson, and practice it, with the most elysian sounds with *cathedral like* effects due to the rooms and 3D holograms the world has ever seen, since the rooms are so tall, one looks upwards and sees it, the almost horizontal position allowing upon closing one's eyes to reach a state of super meditation. It would be like Disneyland indoors, for meditation and sciences of 5 *billion* year lifespans building. People would practice eterni singing or speaking, to record the *most* eterni voices (emotional healing intent notes not just musical notes) for teachers explaining math, science, longevity, ethics of Immortals, so as to enable teachers to play these "shimmering Disneyland of Immortality sciences youtubes with beautiful voices ☺☺ including eterni soprano, so colorful, all kids love science and meditation 700 times more than soccer, martial arts, etc" when the teacher tone is not ideal due to negative emotions of the daily stress, etc and speak less, but with 20 times higher eterni quality. Due to the evolution of AI tech, instant translation among languages would be possible, in the future, with exact precision, helping the permanent peace last *forever*. Hopefully countries with big buildings, auditoriums, cathedrals where most space is empty/unsued much of or all the time will find Immortality uses for them to advance progress towards a Civilization of Immortals. Gigantic palaces like this parliament could even host gatherings of the Universal or Infinite Immortality Peace Alliance. ☺☺☺

Skeptics will say, OK we have seen how as tech improved, we made our cities far more colorful, and beautiful, with neon signs, things that before were a fortune and how one day we will have higher IQ and have thousands of colors in the future, all shimmering and sign of a higher intelligence, instead of one color clothing, buildings, with people shapeshifting their attire, etc. Then they say, if so, how come having thousands of languages is not similar? Well, first of all, the history we have has shown people speak languages that don't transform their inner nature, meaning that the way we speak, write and intone languages has not been designed to be connected to noblest emotions/energies that benefit the whole species, to be gentle tender healing stimulating positive emotion brain regions (acoustic research needed, etc), to be tonally eterni and promote billion year lifespans. Our languages were a mixed bag, a quite random

“jungle, forest, hills, etc” collective fight for survival against the lions, snakes, droughts, mosquitos, floods, etc, a rather disorderly process of the infancy of our species, a process very skewed towards fight and flight, emergency and negative emotion signaling of immediate ultimate danger, totally opposite to the anxiety free life of Immortals and their language. *No* language *will die, we will* preserve millions of recordings and how to learn it, so we can use it later for inspiration in *designing much better* languages. While beauty exists in diversity of colors and languages, once we achive peace for a long time, we will evolve to have 800 years in our adolescence (lifespans of 8 millennia) to compose languages that are infinitely more beautiful than any existing now, that are built on a very deep knowledge of human brain that we lack now. Now, the priority is to become a basic civil human who doesn’t kill and torture others, and that is taking millennia as we see, people still wage wars over language. Then we can create 7 million languages of much higher harmony, intelligence and transforming power, that can be enriching our telepathy, emotional self-control and filtering, that can develop new neural networks, favor ☺☺ positive ☺☺ emotions, hypothesis thinking, loving kindness, universal☺ gentleness, infinite compassion, new languages that can become the basis of a harmonic telepathy of the future. Fewer languages to speed up longevity progress won’t happen overnight, perhaps some centuries will pass, but at least people can start thinking about it more often and doing small steps, introducing bilingual teaching and extra official languages. ☺☺☺ Naturally, for a big nation to win the Public Relations game and win the small country’s public trust, it would help to be more like a Civilization of Immortals, to champion for those values at the United Nations, with the kindest tone politicians who allow people to believe as they wish, who're filled with tact, grace and healing energy, presenting this process of transformation as human species’ best chance to a quicker peace and 200 year lifespan, in the most *nurturing* compassionate loving gentle tender soft way that is a win-win for *all nations*. Small countries far away from danger of disappearing don’t understand that for other countries this is a matter of life and death, so they will be the last ones to worry about this, perhaps wishing that they retain their language for now (as the only official one or only main spoken one) as benefits seem not that huge to them and they don’t care as much about others being wiped out, due to human nature. That’s fine. Seeing other small countries doing this is no reason to make them feel afraid, as nobody would force this on anyone, this is an intelligent discussion of the benefits of doing this as a civilization, as a species that minimizes risks of wiping out populations in the infancy of our species, do we lose more from having so many nations and languages than gain? If so, then, those who agree we lose more than gain, would be free to change, without being judged by others as having no more individual “culture”, because, while they speak the same language, each embodies a culture of a Civilization of Immortals slightly differently, just as counties in a nation have their own little personality, while enjoying full rights of being part of the nation, while enriching the whole, without millions of years of fights as Europe had before the EU sort of

“vanished” the borders. Ireland has a different culture than England, USA, Australia even if the same language. Culture doesn’t change by altering the main spoken-written language, it just helps us to focus on longevity more, on war less. New literature and poems focused on Immortality can spring up, enriching English, by authors from English adopting language nations to bring longevity fast and redefine our romantic/wedding songs. ☺

CHAPTER 14 - SPIRITUALITY of Immortals

14.1. Contemplative prayer, Immortality for All, meditation as acts of listening to God (4 pages)

14.2. Ritual versus kindness (60 pages) 14.3. Miracles of knowledge (5 pages)

14.4. Beliefs of Immortals (31 pages) 14.5. Messiahs & bad scriptures (123 pages)

14.6. Divine ecstasy states (57 pages) 14.7. Coincidences & torture (78 pages)

14.8. God for atheists (human quantum field), God could be the first Immortal (22 pages)

14.9. Why religions are anti-life, ultra low IQ like science was in the 1st century (2 pages)

Illiterate folks think they talk to God, but science proves they talk to their brain. A sentence of God would take a trillion to the power of a trillion repeated a trillion times all books written on Earth, to write, so, when humans claim they talk to God, they don't realize God is infinitely above their head. All they talk to is their own mind, and in the best cases of tuning into 'God', a mind that begins to grasp an infinitely small part of God's Infinite Immortality nature and the other natures. So, don't confuse Bible, Tao Te Ching, Vedas, Mahabharata, Quran hallucinations with God's Word that would take eternity to write a sentence of. Humans (nanosecond lived bacteria vs others) have a filif IQ, while Immortals have etlif IQ, $10^{9000000}$ times bigger. Now you understand why humans are so low in IQ, always fighting over Infinite Resources. That's why the Vatican banned so many books, and dislike this one too, as it exposes the use of organized religion fraud to loot continents and turn them into slave colonies.☺☺☺ From time immemorial, people of all religions have wished to stop aging, old age with its slow walking, suffering due to pain, lack of ability to do things so easy at 20, slower cognition, disease and death, so out of dislike of old age, in religions we see this survival programming as longing for physical Immortality *for* All beings, a little like in the New Testament C 15:44;51-4 "For our dying bodies must be *transformed into bodies that* will never die; *our mortal bodies must be transformed into immortal* bodies", where it talks about an instant transformation of a decaying short lived physical body into an immortal spiritual body (not physical), more on that later (this was a belief that predates Christianity, which was a made up religion based on old cults, like Zoroaster, Egyptian cults, etc). Well, this refers to spiritual immortal bodies, but people knew that they could live to a trillion years on some level, they just could not believe it was possible physuically, due to lack of knowledge. It wasn't really any big revelation or unique to Jesus or any prophet or religion, just scribes copying ideas of the Greeks (Immortals), Egyptians (rituals of immortality, 2 km of underground structures under the pyramids, 8 huge pillars of 700 meters, etc), etc, ancient immortality religions, which were a natural expression of the universal frustration with death, aging and the stinky smells, frailty, fractures, pills taking, etc aging brings. Thus, some

Christians, Greek myths fans, Hindus, Buddhists, Taoists, Muslims, etc believe that after the victory of God/Tao/science, humans will be physically Immortal. Immortalism is the continuation of that eternal spiritual or natural longing for happiness, wellbeing, good health of humanity. Political/spiritual immortalism is the longing's manifestation as a universal kindness expressed in a global family like society that brings that immortality for all tech progress. Likewise, immortalists believe as humanity wins over the aristocratic greed, good health or even trillion year lifespans will be a trillion times easier to achieve, via scientific progress☺☺☺. All realize the Bible, Quran, etc were made up, there is nothing special about Jesus, that miracles were staged and fake, and Christianity, like other religions, was created (as the 70 pages explain) by aristocrats to enhance the theft yield, the efficiency of subjugation of the gullible masses. The supreme head of the Christian Anglican Church, the King OKed laws to mutilate and kill the poor who could not find a job right away that the bastards didn't create for them as with the 11 companies ensuring all have a job, and "Religious" Kings approved publicly killing complaining slaves by artillery gun. The evil aristocrats always used the phony cover of being Religious to ENSLAVE the masses via empty promises of eternal life as a "spirit" in a fictional heaven they don't believe in. The phony Vatican waged endless wars, like Mohamed did. Vatican tortures too, like they did in the Spanish/Italian Inquisition, French Inquisition (it all started with Italy's extermination of French in 1184 by Italian psychopathic pope Lucius the 3rd Devil, who died in 1185). The Vatican wanted kings to be above the law and to have powers to execute millions, so the Vatican banned the Magna Carta document that guaranteed a fair trial for all before their sentence. To expand/create empires, fake religions were used by cruel kings to replace existing 'cults'. It's easier to control 1 than 10000 cults, so cunning sadistic emperors made Jesus up.☺☺

14.1. Contemplative prayer as listening to God, spirits and the universe

Souls are Immortals, so to speak, and a soul-centered civilization is a Civilization of Immortals, where Soul's Unique and possibly Central Nature, Immortality, expresses more and more as people live longer and emulate Immortality, living 300 years, then 500, then 900, etc. Can we listen to the call of *compassion?* Clergy go at great lengths to explain they want people to avoid a bad afterlife/reincarnation, an eternal or temporary hell. Immortality *for* All *gives eons to all to* become embodiments of *gentle tender soft* loving kindness, neutralize bad deeds by good deeds, and avoid eternal or temporary hell. Thus, Immortality *for* All as in life extension, is destined to become a or *the* central focus of all clergy. The focus of religious, Christian, etc ethics or compassion is to avert a bad afterlife (much longer than this "Immortal" life as 900 or 9 billion year old future human), so places of worship would need to be ultra supportive and focused on 50,000 year lifespans, science, tech, talking about living to 900 all the time, building Immortality Research Centers inside each church, instead of doing field trips to casinos with kids, like some do. In real life, we see most places of worship as among the most antiscience entities, because if

they valued Knowledge of Longevity and of the universe, they would talk about Physics and Chemistry (God's natural laws and design of this universe) in every sermon, host Immortality research centers in every church. The human lifespan length reflects the level of spiritual compassion and Godliness of a civilization.☺ Therefore, lifespan length, physical "Immortality", "Immortality *for* All and spirituality are inextricably linked; to belong to any religion is to support "Immortality *for* All", *since God is Infinite Knowledge and Grace who knows how to transform the worst into angelic beings via healing positive methods,* to bring peace without war, transformation without torture. God knows better than humans who is worthy of living. Why not require clergy to get a 2 year degree in Immortality Sciences (Physics, Engineering, Chemistry, etc of 900 year lifespans) or a 4 year degree in STEM? How can clergy know God's design of a trillion universes and they know nothing about physics laws of 1 universe? To discover afterlife mysteries we need centuries of study, living to 900 at least. Why entrust the moral and ethical education, about 7 trillion *universes* to people who know nothing about this universe and how God designed it? Wouldn't clergy ideally be people of highest knowledge and IQ, of highest gentleness tenderness softness evident in their tone of speech, so different than today? If so, wouldn't clergy be allowed to have kids so the highest IQ gets passed down? Tesla's father was a priest, reportedly, Milutin Tesla. Tesla was psychic reportedly too. No wonder nations often embrace civic education to teach ethics of building 90,000 year lifespans, doing away with religion classes, as religion often becomes so outdated, antiscience, that it's antilife, with clergy speaking in the past against electric cars that would extend healthy lifespans, etc. When a clergy is filled with *the Holy* Immortality *for* All *Spirit* of *gentle tender soft* loving kindness, s/he spends most of his/her energy to promote science, as with eterni food, science can alleviate the enormous suffering of animals on earth and of the people eating those animals, who're living short lives of disease. When the soft *nurturing grace* of compassion fills clergy, science is in every sermon. To be Godly is to have some of the knowledge of God, and science (knowledge) allows us to discover living without inflicting pain on animals, raising our civilization to a higher level of loving kindness. As we spare animals from suffering, we can discover how to live to 900 faster. How can young people trust religious or spiritual leaders who almost never talk about the suffering of livestock shot in the head (stunning) or killed in other even crueler ways (no stunning), who're not vegetarian at least, like Nikola Tesla who could become a saint and said eating meat damages our morals, to set an example and promote an eterni food future? Dairy cows are killed brutally too, so veganism would be the most basic expression of kindness for clergy who wants to be a model of universal *gentle tender soft* loving kindness. ☺

Religions and spirituality are always evolving and adapting to the times; for example world's biggest organized religion, the Catholic Church. They moved from the "earth is the center of universe" Aristotelian view (adopted by Saint Thomas of Aquinas and then by the whole

Church), to one based on scientific evidence. Many beliefs got updated and changed over time. Catholics removed the Bible from the church pews, replacing it with the daily quotes from the Bible and songs, that contain only nonviolent quotes, so that people don't get polluted by the stuff in the Old Testament (Torah is first 5 books of The Old) that is discussed in detail here. To listen to God, perhaps we need critical thinking skills, to discern human emotional baggage, fakery and negativity from the inspiration of the higher nobler aspect of humanity, our spirit or God connection. The daily liturgy format went through vast changes during Vatican II, so it's easy to see how a future Vatican III will implement even further changes, how religions will change as science discovers new things, and introduce meditation and require World Peace in 3 months talk by priest, and have 1 lyric minimum of any Mass song about World Peace and 0 violent crime until it is achieved, to make all passionate about 0 torture and war in 3 months. A true Pope, aware of the need for eterni food, requires all clergy to talk in every Mass about the need for compassion for animals, eterni tech to stop torturing plants and animals, appeals to all to go vegan meanwhile and stop animal bloodshed that causes wars indirectly, promotes nutrition education so all can move to veganism and get proper supplements; *the Pope ought to*, when veganism is easy for all due to 100x more products, *excommunicate all omnivores*. *Why? Because* to kill/eat an animal is bad even in the 'Word of the Lord', as the Pope calls it: "*He who kills an ox is as if he slew a person.*", Isai 66:3; more quotes here. To be true to the Word, they need veganism. After all, the greatest fake miracles of the Catholic saints are those of vegan saints.☺ St Frances of Rome 'materialized wine, corn out of air' (Ctrl+F "corn ", 2nd instance),☺ St Francis de Paola brought to life cooked, eaten animals (bones left only), made a river appear.☺ These fake miracles are taught by aristocratic clergy using the taxes paid by the poor. Is it ethical? Eternia or Eternity Capitalism may have an answer. A book of vegan fake miracles reveals the Vatican lying talent. Popes could fuel the desire for soul travel, so all know God's solar systems, restructure the Mass to enable meditative silence, soul travel, the immortalist greeting. Better yet, we realize Vatican lied to humans for 2 millennia, we don't visit.

Pope Francis said it's ok to believe in evolution and Big Bang because this not contradicting a belief in God. This could not be said by the Pope centuries ago before such concepts existed. One can see how a future Pope or leader of some religion could say that it's ok to believe in Living to 900 or in Physical Immortality, because this is not contradicting belief in God or Christianity in any way, especially since Methuselah reportedly lived to 969, ☺ if one takes that sentence in the Bible literally and not a mistranslation of the time period used for "year". 1 quote in the Gospel talks of spiritual immortality: C 15:44;51-3. That is why many Christians believe all will be physically immortal on the new Earth. There are a few groups that argue that Christianity teaches Longevity, Immortality. Living longer will make people more peaceful, spiritual, as they will have time to relax and there will be no violence, war or prisons, it will be *Heaven on Earth*.

That is why *clergy of all religions, as we evolve towards a* Civilization of Immortals*, will eventually talk far more about* Longevity *and* Immortality*, The* beauty *of* Hypothesis Formulation and Testing *(instead of belief without proof), of* Knowledge *and* Eternal Learning *(it was hard working scientists who cured scurvy by vitamin C, pellagra by vitamin* B_3*, infections by sanitation, managed Parkinson with* velvet beans *or* fava (broad) beans*, etc, not thru mechanized rituals but thru* Understanding *and Knowledge),* eterni and vegan diets (Chapter 11) in an eterni *music*al way explained in Chapter 8 (putting their whole being into it, this speech is so hard to do, they will need to rest after service, just like muscians do after a musical performance) as ways to *bring God's Heaven of* Immortal *Lifespans on Earth and about a spiritual duty or spiritual selfless service to humanity to help everyone live longer,* so it will be more spiritual to do sports as explained in Chapter 5.5 than as traditionally. People will get 5 PhDs, have a lot of time for studying many hypotheses about afterlife and test them, etc.

Due to this gradual shift towards hypothesis thinking, perhaps people will start looking at prayer more as a 2-way communication, instead of the traditional perception of prayer as a linguistic repetition of a request to God, which is a one-way communication. In monastic contemplative prayer, it's 2 way, but many people don't think of prayer that way. If prayer is supposed to be listening to God too, as it has always meant in contemplative prayer, then it becomes very much like listening to telepathy from God, spirits (Immortals) so as to understand the best way to proceed in regard to a topic. Many people associate prayer with asking for guidance, which is basically like a meditative passive state of listening for psychic impressions, as in telepathy exercises, that might give us a clue on the best next step. As a result of the more hypothesis testing and scientific mindset shift, people may form a much more complex perception of the words meditation, prayer, telepathy and be more keen to incorporate periods of silent listening during services. Right now, personal experience is almost completely taken out of services, as people listen to some linguistic formulas and songs, without much time to listen with eyes closed in silence to God's or spirits' non-linguistic or inner (not outer) visual-conceptual transmissions, as real prayer implies. If services are about praying to God and understanding God's will, would it not make sense to listen to God too, instead of always talking? We have a Mass of 0.5-3 hours, and yet there is hardly any 10-40% of the service period where people are asked to relax, listen to God, close their eyes, breathe gently, let go of worries, so they can have astral travel, ☺☺☺ spiritual realizations or some form of ESP communication about spiritual qualities, bringing *Heaven on Earth* today, science in service to 900 year lifespans, humanity, healing (priest whispers in a guided meditation about the healing being done and about listening to new ideas for science, because many diseases and conditions are psychosomatic, caused by the mind and once one believes one can be healed, healing occurs). When we talk to other people we don't talk non-stop while not listening to other people or not letting them talk, yet in

services often times we don't let God/spirits speak and perform precognitive telepathy miracles or ESP miracles, we talk non-stop or sing non-stop, as if we're not interested in listening to God, understanding God who knows infinitely more than us, or quandrillion times if a spirit. Usually, if we want to understand someone, we don't do all the talking, we let them talk half or most of the time. By not letting God or spirits speak in silence via telepathy personally, as they do to scientists during science discoveries, are we making understanding God/spirits even harder, more remote? How can we listen well, when the area is so noisy, but maybe some stadium or sports arena materials could be used to provide a really soundproof church, place of worship or some soothing music in the background could help the traffic noise be less of a hindrance until we discover levitating silent transportation. By not letting cosmic bliss meditation *experiences* occur in the place of worship, it's easier for teens to seek alcohol, drugs, etc to get into some form of happiness.☺☺☺ Meditation or contemplative listening prayer lowers cortisol.

Chapter 10.2 presents the scientific evidence about the longevity benefits of LISTENING IN SILENCE to God, spirits, or prayer/meditation as it's also called. The believers in certain hypotheses (beliefs of their spiritual path) might say "we don't listen to the lives of saints and anything that happened after Jesus or after whatever" because it's "not in the Bible (or the version or portion of the Bible that's the "true Bible", there is a discussion about which chapters are in which denomination, etc). Yet, where in the Bible (or any scripture for that matter) are computers, humans going to the moon, Mars, making worms live 10 times longer, using video phones, seeing anywhere on the planet from space or your phone, that earth is not flat as many believed? Exactly as people thought the moon is a metaphysical being, and planets too, and that going to the moon is not possible, some may not see how it is possible to become multi-dimensional (as we got to 2 planets, Mars and Earth, multiplanetary) and be able to go to another dimension and build a city there, that we could live to 900 or 90,000 years (Utah tree colony is estimated to be 80,000 years old). We all believe "some wild things are impossible to achieve" unless we get some proof, so it's part of human nature. All medical treatments, clothing, packaged prepared foods, are based on scientific discoveries and laws and ideas not in the Bible (or any scripture), but concepts that perhaps came to people via telepathy from the spirit world, just as ideas about how to extend lifespan to 900 or how to translate inter-~~dimensionally~~ thru a wormhole (ascend) might come in the future. Are these ideas, scientific discoveries false and of the "devil" because they're not in the Bible or some other scripture? No, of course not. Why use internet, cars, airplanes, trains, technology if it's "not from God or in my scripture"? Live like a cave man? What if the inventions come from God, via telepathy given to scientists? *The interesting question we can ask when people claim they know* how afterlife works *is this: how can we know the afterlife truths, when we can't even live to 500, when trees live for thousands of years, one of them* is 9,550 years old? *How can one claim to understand the*

much more complex infinite reality of other dimensions when one doesn't even comprehend the basics of this dimension and how to live to at least 900? Obviously to understand God one needs to first understand simpler things like this universe, created by God. Scientists practice prayer quite well, they listen to God's words written in the laws of the dimension God created, in the laws of perceived "nature". Prayer is supposed to be about listening to God, *not just asking God* to do this or that, telling God what to do. A saintly quality is humility, this ability to seek, discover God (and the universe, a creation of God) as God is, not as we hypothesize God is, the ability to pray as scientists do when they understand/discover reality. ☺☺☺

14.2. Ritual versus kindness, belief without evidence versus hypothesis formulation and testing

14.2.1. Ritualistic vs eterni speech 14.2.2. Baptism, communion ritual vs kindness: see the full immersion baby baptism, the 33 AD original Christian baptism (gentile baby drowning to lower IQ for easier gentile subjugation by rabbis disguised as pastors, do it more 'safely' with Jewish kids (no water in), & 'water in' with gentiles): Jews' water into baby lungs gift to Earth: JeRRoR that makes souls RRRot (1450 quotes Bible proof), Torah makes all Rot, see Tor. The video is proof the baptism ritual is not from God, that Christianity is a Jewish scam (slavery) 14.2.3. The biggest lie 14.2.4. Circumcision: God doesn't want babies to *suffer, hate mom*, but to love all. Spinoza, ancients before him showed organized religions were invented to control men.

14.2.1. Better *than* average *speech* (ritual, routine like) versus eterni healing speech

Tao Te Ching says *"It may be that goodness still remains, even when the natural way (infinite compassion) is lost, that kindness still exists when goodness is forgotten. It may be that justice still remains when the people are no longer kind, and when this is lost, that ritual still remains. However, ritual may be performed only as an act of faith, and may be the beginning of confusion, for even divination and the such are but the flowery trappings of the Tao, and are the beginning of great folly."* What does this quote mean? Perhaps, it can mean we often walk in a place of worship, and we see pastors who enter into their "ritual" or daily routine of talking about some scriptural quote on tenderness, kindness, ☺☺☺ love and his tone of speech, thinking, feeling, energy radiation is so mechanical and average person like, it is wholly removed from what a *healing* tender *soft nurturing graceful loving compassionate* tone would be like, fully contradicting the words he utters. The ritualistic mechanical "We believe in this and that fake miracle and this and that ascension and etc about Jesus, Mary etc" is so soulless and void of any of the important qualities to develop, all about fake events that never happened and fake unprovable beliefs, so unmusical and uneterni in tone, it's a pure waste of time; this is the time of day or week to practice some truly gentle emotion and universal radiation and it's just

mundane chimp speech with dogmatic ideas instead of developing the character traits, the Immortal qualities that bring peace and a world of kindness; look with amazement at the Nicene creed and Eucharist words, repeated daily at the Catholic Mass, at the content of most sermons everywhere, in all religions and no mention of *gentle tender soft* healing *nurturing graceful* loving kindness, tact etc the most important qualities to get to level 'kindergarten of spirituality' - no killing, no violence, no torture; how can anyone evolve their brain beyond tiger logic and create a world of the most loving Immortals who would never torture others for any reason, go to war with other humans, support any war when God knows trillions of ways to peace without war, support any punishment (a stone age concept, Immortals only heal, no prisons exist, only healing centers). This world of infinite loving kindness starts from our emotional life, the tone of speech. They could sing in the most beautiful tone (like the best spiritual song ever) something that, due to the musical filtered tone in which it is sung, due to the words used, elevates and magnifies the inner spiritual life (the vibe) instead of the daily repetition of fake Nicene creed and daily Mass cannibalism related imagery *(*Eucharist ritual *focused on eating Jesus body and blood, instead of the most important qualities we need to radiate in song during Mass and in daily life speech, aided by* prerecordings *and* eterni music *on headphones or played 24-7 in our living room, kitchen, alleys to evolve the gorilla DNA to something more refined).* The Nicene creed is so stone age, and so slightly North Korea communism like, cult like, (well, instead of Kim Il-sung in the 10 principles, you can replace with Pope and Jesus, many Popes have called for the faithful to wage wars, many clergy of religions; authority, obedience, no proof required, no thinking, belief in fake miracles/experiences of 'saints' instead of living personal honest (via tech or etc) experience (not reading fake experiences of saints), inner qualities development. Read it carefully and notice how the brainwashing happens. Analyze every sentence and the "proof" for it, versus the neuroscience proof that kind tone makes much better relationships and prevents conflict. All is Pope centered, Church centered, belief in wild unprovable stuff, instead of the inner life☺☺☺ centered, instead of the transforming grace *(grace depends on us creating it by hourly spiritual effort, learning to create it, learning from* God*, not just doing nothing and waiting for it to descend from the '*graceful quotes*' of 1st century stressed violent scribes)* activated by kind thought, emotion, speech, action, inner life, evolution, without clergy intermediates. The *uselessness of the Catholic Church* is evident when you realize the violent crime rates in *many non Catholic countries is lower than in Italy*, the most Catholic nation. The homicide rate in Orthodox Russia is 15 times higher than Italy, showing how bad Orthodoxy is.

We can, *lovingly grant freedom to all, free them from mental bondage*, and let all be a pastor, let every house be the temple of Immortality *for* All as immortality capitalism section explains, teaching all by living example, create their online temple and church if they wish to teach what they learned about developing a quality of the Immortals, let all attend 500 online

churches if they so wish to learn 500 perspectives and tones, let the spiritual *renaissance* begin, let the democratization of spirituality begin, let the sweet tone pervade their home way more than 99% of temples and places of worship today, ***because they can, God can grant them that, if they're sincere***. The Nicene creed is such a 3rd century creed, that today even many 2nd grade kids (who're way smarter than 3rd century kids) will find this hard to believe after reading and watching the fake miracles section and spies one. To force it on kids would lower their IQ, and even endanger national security. Many would argue that we need the inner transformation of our brains, not mechanically repeating obviously fake stuff. Why are we keeping ourselves in the 3rd century Nicene creed, why can't we evolve? Chemistry changed a lot since the 3rd century, why can't spirituality? The hypothesis many agree on is that at our level of violence on Earth, we need a more loving tone, a focus on inner transforming grace by self-effort "*We infinitely gently believe in radiating every hour gentle tender soft healing nurturing graceful loving kindness for all beings thru our tone of speech and thought, discerning the speech tones, music styles, trends and millennia old rituals/traditions that prevent World Peace within a year (this is not said, this is an explanation: so that All can live long lives, not just top clergy, monarchs ordering wars to expand territory and holdings of the organized religion)* and working to filter them out via the most eterni healing☺☺☺ speech, emotion, action, thought tone in our civilization*. We ever so tenderly believe trillion year lifespan and ecstatic Immortality for All in this and other dimensions are possible thru hypothesis formulation and testing,* physics, chemistry, the scientific method (proof based ever refined hypotheses)*, in a happy world of infinitely soothing comforting* bliss *for all, where everyone feels infinitely loved by all humans*". Of course, each online group (no donations to avoid dishonesty) can make their own little song.

Ritualization (as if they're soldiers loading missiles to kill a million at once with analytical coldness and precision, *no filtering to remove aggression, negative emotion subtle background and convey the gentlest* healing *vibe, create perfect* healing*) doesn't apply only to Nicene creed repetition, it also can mean*, many priests, even when they talk or ask God to bless the bread and wine, during the Eucharist blessing, do it so mechanically, that the tone lacks the tender soft *nurturing* qualities that are essential to exist if we want to emulate God's Grace. Today, for the first time in history, it is ultra cheap for any clergy of 20 people of any denomination to use a recording (especially easy for Catholics since Mass is the same words for 1 billion people) in the most eterni speech one can find, not necessarily of oneself. The Vatican could launch a project to find the most eterni voices of all millions of pastors and nuns and have those people read the updated Immortality infused "creed", the Eucharist (updated, no wafer, just blessing all in audience and all bless all via radiations of happy energies, *any intelligent human knows one day humans won't have blood inside them, to live to a billion years old, we may get upgraded bodies using totally different systems able to switch between matter types and dimensions, so these*

antiquated prayed "Blood of Jesus" etc are simply out of touch with reality and narrowing our minds), "I believe in ever questioning everything I hear in this service and everywhere, in *universal* loving kindness, in formulating new hypotheses daily, in questioning stories of "easy to fake" miracles and pondering on the *miracles* of experience, *gentleness, patience* and *knowledge* that build the (*impossible to fake, everyone retires at 650 not 65 etc*) *miracle of living to age 800 or 1 trillion years* and a Civilization of Immortals, thereby learning by doing, how to sustain a Heaven like world, and being ready to live in an Immortal world". The music, radio, TV are usually so bad, that the last place where tone would have a chance to teach the infinite tenderness of God, it's not there; the Catholics have lost the beatific gentle music, and have shifted to more rock and roll like music, pastors employing more soccer stadium tones. When we see that, we often ask, why in all these churches, places of worship they talk so much about this and that, but never do they use these daily prerecorded words: "tender gentle soft kind *forgiving merciful compassionate graceful nurturing healing"* in every service? *These words* can be spoken, by the most angelic voices on Earth, 1 out of a million, after trying 365 days for one year to reach the highest level of eterni tone (meditation, rest, no negativity to aid humanity in escaping historical inertia and produce real *healing* for the first time in history, since pastors are humans, too tired and incapable of speaking eterni like for 30 minutes). Then, after hearing these other worldly tone, the people are invited by the most *healing* voice recorded, to practice this in public and put their whole being into it, with maximum filtering out of "improper emotion", with eterni tone as instructed by the priest who reminds people the way 800 year humans of the future who know no anxiety talk (not rushed and packed, but in a slower eterni way), in order to give people a daily chance to practice. ☺☺☺

The above highlighted words carry a *different vibe* than *many words* and at no worship place have I seen them included in every service at least once. People could use their whole beings to slowly sing together in the gentlest kindest slowest most eterni tone something using the gentlest music that contains a request to God to practice eterni speech and wake up from the trance of imitating the bad tone on TV-radio-etc: "*Infinitely* tender Mother-Father God, we *gently* ask that as we *tenderly* speak/sing this, Your Infinite Electric Soothing *Calming* Grace Energy descends into us, that you bless our bodies and souls (*directly, no wafers or wine intermediaries needed, see next few pages*), with the courage, patience and determination to change the tone of our *verbal speech, of our inner speech, thoughts, feelings, intents, energies radiated*, so they become filled with your *most* tender gentle *soft forgiving compassionate merciful sweet healing graceful infinite* kindness *and helpfulness* towards all beings, and we're transported closer to the Ineffable Bliss of Thy Limitless Loving Tender Soft Healing Mercy". This general template can be updated by clergy into a very poetic and rhythmic song or prayer that is sung or spoken SO differently and so very slowly, that it completely transforms the brains of the

audience. To maintain the highest healing vibe, it is humanly impossible, due to the stress of daily life impacting pastor tone, for a pastor to talk more than 2-10% of the service, the rest needing to be meditative listening to the most healing prerecordings of voices (younger, this speech is like most difficult math, professors don't do hardest science at age 103, brain is slower, this speech requires younger brains too) trained to produce the tones linked to best radiations and emotions; we're living in a hell world in 21st century, and this impacts pastors, the only way to disconnect from these historical inertia energies is to speak much slower, much less, since this healing speech is so exhausting, this filtering, for most pastors, they would become ultra exhausted after 5 minutes and lose healing tone; and even if trying, they can't do it, since they would have to be stress free relaxed for 1 month and practice to reach higher levels of healing. How can we expect a world of kindness to emerge when many clergy almost shout at services or speak in average tone and emotional filtering? Pastor energy goes so much to this imperfect speech (he has not rested 1 month like in a prerecording, pollutes all with his daily stress), that he has no energy left to bless the wafer, the people, to radiate the best emotions and thoughts.

The pastor is expected by God, his Parent, to learn by doing, to take part in this blessing by God, to radiate happiness and be flooded with bliss☺☺☺ and thus entrain by contagion the other brains and teach them to do it, to know God is Infinite happiness, Healing (*not commanding a truth, but gently suggesting by healing* whispering *a hypothesis*), Grace, Tenderness not suffering-torture-punishing-yelling, a happiness so much Higher, that it transforms all desire to jump, dance and shout into a desire to become the gentlest being ever that brings World Peace in 3 months by his tone of speech, his divine ecstasy happening while silent walking more and more often. God doesn't want a pastor suffering/straining or torturing himself to say the mechanical formula (many strain to raise voice), to stand, sometimes when giving the sermon even yelling like on soccer stadiums, but to learn by doing, to experience God in the service; it's not about holding the wafer, chalice and physical exercise of standing or mouth moving, (this monkeys can do too) but about the gentle profound inner transformation of the pastor and audience *(who meditate half of the service at least with eyes closed focused on higher brain functions, not standing, looking outside, but looking inside)* when they bless each other (all can relax in inclined chairs) and ask God to help them bless each other, the ecstatic trance like divine ecstasy of true communion with God, so joyous,☺☺☺ that the pastor would appear dramatically different and change his service format altogether and his speech tone too, the music at the service too (lower the volume, the adrenaline rush, soft healing music, don't make everyone semi-deaf without realizing, don't excite audio neurons too much, let the new neurons of eterni *emotion, radiation, divine ecstatic bliss be formed),* so peace manifests in two decades, because God doesn't want anyone to suffer in wars, only "other spirits..." want. It's important to not confuse physical movement motor neurons (standing, holding material objects to bless, no

intermediates needed, bless each other directly too, not just asking God to bless the others) with the higher neocortex functions of eterni inner tone, emotion radiation and healing energy, they're different brain regions, that's why it may be good, with new churches to have semi or very inclined chairs, not straight, to be able to relax deeper and learn about Immortality, in its fullness (physical and astral), inclined chairs are explained here. People don't go to church to stand or exercise only, even though a part of service at the end could be about "help us live to a trillion" prayer and BMI, WC, WHR, and nutrition and some gentle moving 2 minutes; people go mainly to have an inner transformation (not muscles building as in dancing or standing, but new neuron muscles building to learn new skills), so this implies, we need to relax and to not stand and focus on that inner stuff, since our brains are not so advanced to multi task when doing such a complex thing that many never did in 4-8 decades ever until this becomes common. Soft voices and songs relax people, see this example of whispering. Once we're good at it, at radiating and entering divine ecstatic trance, we can do it any time, while standing, but initially, it's hard. If people don't practice even 3 minutes a month in a service invocation eterni speech, how can the world become any different? The invocations they use in all religions that are always identical can be prerecorded, using the most healing and eterni speech tones and voices on Earth, which will be vastly better than the daily tone of clergy, because that's the best recording of someone in a year when they feel best, but the clergy have ups and downs and this is reflected in the tone. We have AI and tech, we can use them to change our beings, to transform our brains from panic fight-flight tones of millions of years to anxiety free tones, of Immortals. ☺☺☺

We can argue that the tone and content of speech is 900 times more important than communion wafers and many rituals in various religions, because speech is how we practice universal loving kindness for hours *daily*, while the wafer ritual takes minutes a year for many when they go to a service that offers bread. *10 minutes wafer ritual once a week/month/year and then 20 hours a week of* uneterni tone imitating the clergy tone? Isn't that contradictory? Not to mention, the music in many places of worship is lacking in the qualities of grace, gentleness, softness, healing, *nurturing*, therapeutic energies most people need in order to connect with this speech tone. When a guy dates a girl he likes a lot for the first time, his tone is very tender soft gentle eterni, he doesn't yell like on a soccer stadium while uttering "I love you" or anything. Yet, in some places of worship, the clergy talk about "God loving us" etc or about God's compassion, etc in a tone that is worse than the guy at first date. The clergy tone, since it's God's love, trillions of times more tender than the love of a guy for a girl at first date, *would need be the most* eterni tone *of the whole day or week that anyone has ever heard, even the pastor himself*. There is no need to raise the voice. People dealt with human eating tigers in ancient times, so they had to yell and fight or flight, so these patterns don't disappear overnight. Computers today use a million times less power per computation than decades ago, being smaller too, much better;

likewise, bigger and louder voice, more shouting or masculine tone, more powerful is not always better, it just uses more energy that could be spent wiser in filtering improper emotions, it doesn't give more authority or respectability. ☺☺☺ Many girls would never date again a guy who used the tone some pastors use in their speeches. It's not just words, words are only 3% of the communication, 97% is in the tone of speech which encodes the emotions, thoughts, intent, energies radiated. Anyone who is humbler, aware all their beliefs are hypotheses has a gentler linguistic expression tone too, as they know they don't know it all. Thus, these clergy use "We *hypothesize* that x may be true, based on this evidence" instead of "We believe x".

14.2.2. Do we really *need the communion, baptism* (legal drowning, torture of babies disguised as "religion" video 1 and drowning video 2, & baptism slap) rituals or more eterni speech?

Before we go into wafers and such, check out 4 videos: 1. out how women were tortured on the first day of wedding and how impossibly low IQ society was thanks to the filif IQ clergy at the Vatican who believed in stuff without any proof, 2. Church's endless genocides against females, burning their vagina with red hot metal and killing them via infection, 3. Christian Church enslaved tens of millions of whites in Europe (like aristocrats enslaved most people who were their serfs in every EU nation and Russia), 4. Christian churches praised slavery, owning slaves, used fear to extract money and obedience from the naive masses. The wafers were another tool to enslave the people: come to church to get the wafer, but then you got to donate there to make Italian Jews at the Vatican who took over the Roman Empire very rich. The Italian Jews didn't give a dime about anyone, except money and power, like selling indulgences to get rich by promising short purgatory. The Church was created by Emperors as the state religion in 325 after heavy lobbying from the 10% of Jews in Rome, as a tool for global conquest, spreading the Torah via the Bible, global looting and espionage via confession. The "God is a Jew" Jesus mythology was simply a cover to fool the gentiles. This 35+ page chapter will shock Christians who have been totally brainwashed by the clergy masters of endless lies and endless torture.

King David allegedly took the holy bread from the temple, as this ritual of bread was a Judaic tradition. After millennia of pretty useless rituals of "eating the blood and body of Jesus at Eucharist" (*simulated* cannibalism *sort of*), we have not achieved even the animal stage 500+ species of mammals already achieved, i.e. the stage of not killing their own species. Christians are too ☺abysmal IQ☺ to realize baptism is a filif chimp IQ tradition coming from the Jews, a ritual no human ever needs to connect to God as explained below. Christian baptism comes from the Jewish full immersion called t*evil*ah, which morphed into *evil* bath terror (watch 40 seconds) of gentile babies as in Russia, perhaps well *designed for non-Jews for maximum brain, lung damage of conquered lands.* Please, open your unholy Bible (the "God" of Israel has no positive methods to change people, to transform them by grace, only commands to exterminate

people: Deut 7:16: "You must destroy all the peoples the Lord (Satan?) your God gives over to you" (in other *words*, avoid Jews like the plague, because God might give you to them?), God builds, heals, Satan destroys) and watch 1 min of the Jewish gift to *non*-Jews: satanic ritual abuse (so called baptism) of gentile children for maximum damage and trauma, watch 1 min of Syria and Ukraine ruins, the gift of Israel to gentiles, Bible and Quran genocidal quotes in action lived by Christian and Muslim armies, both made from Torah, spreading Jewish Supremacy values in Syria and Ukraine. Jesus was a Rabbi who used the cover of a new religion, the 80% of the Bible called Torah required by the new Christian fake religion scripture, to spread Judaism worldwide, the worship of Jews, Israel, God of Israel and unquestioning adulation of Jewish Supremacy. The whole Christianity is a pure fraud, Jesus faked all miracles. After millennia of military conquest using Jewish fraud based religion as cover, *we have not had one religion talk* daily (or even once 2000 years) *in their service (like Catholics do the 10-15 min Eucharist cannibalism like ritual* daily, *we could replace that with something about Gentle Soft Nurturing Healing Grace of* World Peace *in 3 months, and ideas of 14.2.1. and eternal kindness like* verses 8-40 of the Immortalist Anthem*) of* how to create World Peace within 3 months, *how to do it, by what kind of tone, behavior and etc, since apparently,* religions were usually military enterprises using spirituality as cover to expand empires, using killings and wars too, often wars blessed by clergy the emperor appointed. It's interesting to question why there is so much focus on the Eucharist or communion ritual in some places, 365 days a year at Catholic services for example, but 3-4 times a year at 7th day Adventist Protestant churches or 0 times at Quaker Protestant churches. Millennia before people live on energy (after growing up as adults) one century, as Tesla predicted, reaching a lifespan of 9000 years, they will abandon this cannibalism imagery Eucharist (already most Protestants do it only monthly, quarterly or never), since God doesn't need material intermediate molecules in some "wheat wafer", "toxic incense, candles", "amulets and talismans", "religious jewelry, objects, scapulars", "fruit juice or wine" (matter) to reach and bless our bodies (matter) or souls (not material), God *or spirits can do it directly*, *blessing our material and immaterial bodies* while we practice eterni speech and invoke the tenderness gentleness of God as explained above.

Incense smoke has carcinogenic compounds, also see EPA; likewise, wood stove burning, that people used for eons to warm huts and dwellings hours daily, much like smoking daily in the cold months, dying 1-4 decades earlier due to lung cancer they caused [just as today, in our ignorance, we humans do things that shorten our lifespan that we won't know for millennia], or even campfires have these toxic compounds, priests/Wicans/shamans inhaling incense or campfire smoke daily may have lived 30 years shorter because of that alone, showing their human imperfect knowledge about longevity, healing, Immortality and a doubtfully "perfect" connection to the God of Immortality. *God* doesn't need psychological crutches, just like we

don't need crystals to manifest our reality, think positive☺☺☺, amplify positive thinking or astral travel. That is why Quakers *don't even use water* matter *to bless people, they don't use water* baptism *or* communion *at all, because they focus on personal experience* and loving kindness, not rituals and ceremonies. We see churches who give church members food gifts once a month or during 3 main yearly holidays and people end up trashing the food. Some churches collect food donations, while others help trash food depriving poor starving malnourished people of much needed nutrition. Don't trust the Pope with his Jewish kippah, he lies to us all.

Many were *shocked to find youtube videos where babies suffer during baptism* due to the lack of training, empathy of the priest: 1 min Georgia clip, 1 min French priest slaps baby during baptism (maybe got angry at the baby, if not a fake video (playing hand near cheek moving away fast in reverse to mimic slap), as he may have slapped other kids, older, and the habit came to surface due to 'God complex'), 1 min Romania clip (baby supposedly died after inhaling 100 mL of water, if not a fake incident (no death), created to inform priests of dangers of inhaling water and permanently damaging lungs of babies) or Moscow clip *(they removed it, but it was a very luxurious font, with precious stones, gold, and super adorned cruel heartless macho priest yet the baby was so unhappy, crying – outer riches, not many inner, though that one was way way better than* this Voice of America one from some Russian city *– guess what: priest was banned only for 1 year from doing baptism)* or USA orthodox clip show this ritual can become suffering (crying) of helpless beings (1000s of orthodox videos show a lot more crying, the *Moscow one has little compared to others. The Moscow clip showed a* typical Orthodox *priest, a champion on male machoness, and could have been a Jew* pretending to be a priest in order to enslave Russians fast with the Jesus cult Putin, the probable half Jew (watch the tone), so kindly pretends to Adulate and Glorify in order to subjugate Russians and lower their IQ with Epiphany bath in icy water rituals that cause strokes and heart attacks via blood vessel constriction, just like the "ostrich IQ" Australians do it naked in cold water achieving the same outcome on June 21st, the shortest day of their year: a shorter life☺. Khazaria Jewish Empire spread over an area bigger than India, many in Russia elites look like Khazarian Jews. In order to avoid polluting you with the bad way these priests handle the babies, etc I won't include them all here, but feel free to search youtube, it happens in half the full immersion rituals at least that the baby is crying – this is more like child abuse *(similar to the* rape of infants by *rabbis, more* details here *& in the 3* "scriptures" *invented by the* Jewish rapists of 3 year olds*, who inspired* 900 '*prostitutes'/900 travels in Quran)*. Some scary head immersion baptisms of babies risk baby getting water into lungs that may cause some permanent lung damage (unsterile water) without anyone knowing, not to mention the baby is so unhappy, watch this, if they use the head immersion (these rituals will turn many away from organized religion lacking empathy, like most religions today). "Religious bondage shackles and debilitates the mind and unfits it for every noble enterprise,

every expanded prospect" James Madison, 'father of the US contitution', main adviser to George Washington's presidency, 4th US President 1809-1817. Well, he was referring to the bad aspects of some religions or denominations, like useless rituals that remind us of the youtube video on the Inquisition killings (some statistics say more or less died) and many other murders in other religions, etc – not the spiritual idea of kindness for all that was not practiced always, or the nice music created by the good natured people (not power hungry guys at the top). Fortunately, a minority of Orthodox priests have some empathy and handle the baby very gently, avoid head immersion, allowing mom to make eye contact and be very close, so baby doesn't cry, but that is a minority of cases – the priest is free to not do immersion and only sprinkle, but most don't do it due to pressure from higher ups, who seem void of compassion for babies, as Catholics seemed too before they moved to sprinkling only after the 12th century. These rituals make us understand why 20 million or less died in Catholic-Protestant wars alone: rigidity, ritual, power, etc were strong forces then and remnants still exist in various traditions, rituals, etc of various religions; this is how separation of church and state came to be, people were fed up with the insanity. Billions would agree that if anyone is doing baptism, the experience is OK with God only if the baby is all happy☺☺☺ thru the experience, and doesn't cry; perhaps, a little holy water sprinkled on his head would suffice, without the rather risky whole immersion (see clip) (out of many full immersion baptisms, one can go be a traumatic brain injury, if the old priest is not careful and his motor neurons are not working right), which is stressful for babies.

After watching these clips, millions of people are way more against baptism (mostly infant baptism done unsafely, they could just spray, pour a little or sprinkle water on clothed baby or adult head, due to issues below, lack of sanitation even for adult immersions, wikipedia lists protestants who don't do infant baptism) than before, unless baby is fully clothed and some holy water is sprinkled on his head 3 times as in a Catholic baptism, most Protestant denominations like this Anglican, Lutheran, Presbyterian, Methodist baptism where the oil anointing is also done fully clothed to avoid the baby feeling cold (it is sickening to see babies being cold during oil anointing); the full immersion (even without head) baptisms on youtube cause the baby to cry very often, due to cold temp of church air and water; why can't religions or denominations (like most Orthodox except some Serbian churches that do it clothed, some Latin Rite Catholic, Eastern Rite Catholic) who baptize use the "head only water sprinkling or pouring" procedure and "head only oil anointing" to avoid stressing the baby? The standard operating procedure in the Catholic video (water sprinkled 3 times) is baby is held by parents, Godparents and priest and only some water on the head: this is 10,000 times better, safer than priest only holding baby (10 hands to hold baby, not just 2, and prevent something going wrong if some natural event happens (earthquake, sudden noise etc that distracts priest) or priest faints or has some health issue, or has not done baptisms recently, is old and only holds babies 3 minutes a

month on average (1 priest/1000 people, 9 births/year, 9 baptisms a year on average per priest in many countries, so 3 baptisms a year in more remote areas), instead of 9000 minutes/month for parents (3000 times more experience), so his neurons may be old and malfunction). Governments must require crying free baptism (or any ritual) that raise no cortisol and stress hormones, and more safeguards during baptism, *requiring at least one parent to hold the baby;* but even that may be stressful for baby, even with warm water and warm air, so immersion baptism seems odd when legal, *due to water inhaling risks*. How on Earth can any nation legalize full immersion baptism within its borders? Pure Violent Crime, Pain Infliction, Molestation of Babies who always cry due to cold water and discomfort, water inhalation, etc. If a Catholic latin Rite, Eastern Rite or Orthodox insists on immersion, you would think at least, the mom and dad would be ultra close to the baby, avoid head immersion which can lead to water inhalation, smile and mom make eye contact with baby (maybe hold his hand too) like in this video where baby doesn't cry since mommy is close and smiling, the air temp very warm (use portable heater so it's very comfy near where baby is, warm up the holy water to ideal temp baby is used to when mommy gives bath, disinfect container strongly after each baptism since baby immune system is undeveloped and could catch bacteria from people visiting the church, etc). *The priest holding the baby and rough handling it is a major contributor to baby suffering, why can't he allow parent to hold baby, soak him up to chest level to give a safety distance from nose? She washes him daily and has more experience by a factor of 5,000 than the priest.* It's *cruelty* to soak babies in a new environment, it's too stressful, *a little sprinkling is enough.*

The eterni Government *can't encourage torture or useless suffering of any citizen in the name of 'freedom of religion'*. If it allows it, it will get far worse, as the history of inquisition showed, religious fanatics will use ultimate torture and death to impose their religion of ' loving kindness and free thought'. However, the law would make it clear to the priest that if anything goes wrong, baby suffers, gets a bump if priest makes a mistake or a flu due to bacteria from container, the priest would be liable for his wish to do immersion against government suggestion of mommy holding baby and only water being sprinkled, as this avoid contamination of babies with the baptismal container bacteria (not all bacteria and viruses die after disinfection). To me, it's unhygienic to do it even the safe 5 people holding baby Catholic way, since priest washes baby hair and pours viruses, bacteria into the container that others use to baptize other babies. *The Methodist or Presbyterian wetting of priest fingers only (grabbing water only once is safer if priest holds baby and enough) or pouring some water over back of head or top (when tilted) and catching water in a disposable 2 cent plate to discard to avoid bacterial cross contamination* (every baby private parts soak in that container contaminating it with urine-feces bacteria, even when adults are fully clothed, some of those bacteria can contaminate the pool), *seems the only safe way the government would be OK with the "water*

handling part or bacterial contamination part" with in the age of COVID19, etc. **Even so, the Vatican approved way or hand sprinkling water on head seems 900 times better than the Orthodox as far as bacteria contamination. The Protestant way smaller water containers, way easier to clean and disinfect after priest gets some water from them, seem 5,000 times safer bacteria contamination wise than Vatican non-immersion way, if water is caught in a disposable plate and used to bless the church grounds to avoid trashing the water; due to the 100 times smaller water container and water pouring container, even as it is, the Protestant bacteria contamination risk is 10-100 times lower; the Methodist video is really good since there is no pouring container used, the priest simply wets his hand and touches the baby, so he removes the risk of the water container falling on baby; however I find the Protestant disconnection of mother-baby or dad-baby bond in some videos an unsafe choice, the mom or dad can hold the baby, while the other parent holds the head and makes eye contact to diminish anxiety. The gross, insensitive, disrespectful way some priests talk and pick up and handle the baby in many immersion videos (immersion is only done for babies by a few Eastern & Latin Rite Catholics not 100% aligned with the Vatican who insist on immersion against Vatican suggestions, a minority of them, and by most Orthodox, Coptics) I didn't link to is so shocking, it shows the heads of these mini-churches seem unaware of what's happening or are out of touch with basic human kindness. It makes people far less likely to trust they're a representative of kindness, let alone God's infinite kindness, billions of times greater than human kindness, if God exists in your view.**

If you're a parent, definitely watch the priest☺☺☺ and state clearly that he can't immerse baby past the neck or get any water around the nose (as in the scary videos above), to avoid damaging the baby – or avoid baptism, just choose another denomination, among 100s that does sprinkling, it's the same beliefs anyway or teach him ethics yourself and the tone with no religion (many or all were made up). Some priests may be intentionally getting water into kids' nose, if they're using a spy cover as a priest, but are out to undermine a local population's IQ, health thru cruel or useless rituals that lower IQ of parents and kids and do nothing to create longer lifespan, high IQ, discernment and vitality for a nation; this can be done by remote control of priests from nearby buildings too, even without the priest's knowledge, i.e. remote control of his moves so he accidentally gets water into the baby's nose. ***If you watch some of the so called 'good' immersion baptism videos, where no crying happens, sometimes the priest is so clumsy, he gets some water into the baby nose, which can cause lung issues due to infection, especially if someone put something into the water, from a foreign spy agency.*** **Who makes sure no virus is placed into the wafers, wine and holy water? On youtube it's** ***very rare to not cry when a rough speaking, too loud deep chanting scares babies, stranger grabs you and soaks you in cold water and mommy makes no eye contact and is not nearby.*** **What are they doing in confessionals and monasteries? Who would let their kid attend a religious school after seeing**

these videos? The wafer is a placebo, take a piece of bread at home or food, ask God to bless it, imagine the light of God enveloping you, meditate like this or in any way, and achieve even higher bliss and deeper oneness with God without even blessing any food, but asking God to bless you via a change of your tone, a true living not mechanical prayer, born of whole brain whole being effort and true desire to ask. You may not believe me or you may when I say it's auto-suggestion: I tried, I went to communion many times, sometimes multiple times a day, or 50 times a month, and saw how powerful the mind is to auto-suggest itself and move into bliss, thinking it's the wafer, but it's your brain. To let your baby drown partially in baptism due to clumsy priests handling him while you're many feet away, or to have him cry as in most immersion baptisms (because priest forbids mom from being around and making contact with baby, like some could hold baby hand, etc, smiling, etc and the water is too cold and cruel, it would have to be warm so no stress hormone is released in baby) is cruel and an act that, in my view, is offensive to God, God is not organized neolithic rituals made by men incapable of feeling the immense twice neuron density (priest 100 billion neurons, baby 200 billion) of baby's emotional complexity, incapable of using gentle tender tone around babies, of handling babies like a gentle tender mom can, very slowly, tenderly, sweetly. Parents can learn how to avoid baby crying at home, not realizing they make many mistakes some priests make in the better (minimal or no crying, but obvious stress and discomfort) videos sometimes.

Babies are used to mom and dad only handling them, so when a strange priest handles them and yells also in a big place with others his masculine chants void of any tender soft healing *nurturing* grace of a female or feminine filter male voice and higher pitch, he often scares the hell out of the baby who starts to cry. *Baby never heard such a tone perhaps so close, so loud, the church echo, etc.* Unfortunately, before the 11th or 12th century, all baptisms were like immersion – so we're *to believe this is inspired by* God. Why can't people be honest and realize it's man made, due to the habits of people washing before entering temples, since in old times people took months to get a shower and smelled so bad? Today we don't need that. *Even teens, young adults who do immersion are anxious and stressed many times, I saw it in the 100s of youtubes.* Pastors need to talk in a very gentle and high pitch way like babies like and mom can hold baby's hand during immersion ideally to feel safe. *Ideally though, the immersion (the one with head* immersion definitely, if videos are not fake) would be banned due to the risk of priest doing this rarely and having a slip or mistake moment and there being no safeguard against water entering nose or other events. In a world that values life, not ritual rigidity, the parent holds the baby (tons of recent experience) and the parent would be at least the mother if she's present (but can be dad too if mom wants or dad is single etc), since she has a stronger bond first few months, having been 9 months in the womb with the baby, and the baby needs mommy near him to feel safest. The priest would not be allowed to hold the baby (Anglican parent holds, priest pours

water), but can if he wants and signs a government doc that parents can request $90 million in damages if the priest make mistakes that bring a bump to the baby or inhales water (the baby may have inhaled water in this baptism, if not a fake video). Another Anglican video has the baby sitting and being held in the safest way I have seen a pastor only do it (*when no parent holding, but baby not very happy*☺☺☺*, so perhaps mom holding is better*?), with a tiny water container – but it's not always good to have baby facing away from mom, the baby would better be allowed to hold mommy or daddy hands and maintain eye contact, see *how this girl is unhappy and almost starts crying even if no immersion*? Babies are happy in the presence of mom and dad, seeing them, especially when doing something unusual. Ideally, like Anglicans, priest could just pour water on head while parents hold the baby or one parent does, with baby remaining vertical, not tilting 90°, maximum 20°, to reduce anxiety and suffering that parents are oblivious to, even though baby is not crying, baby sometimes suffers due to anxiety of such wild tilting near a stranger couple of Godparents and/or a stranger priest, even if mommy still holds the Catholic baby primarily). If the baby is already sort of horizontal in mommy's lap, then no tilting is needed, priest comes with the cup and gently ours water.

I personally find this Anglican baptism video procedure more comfortable for the baby, less bacteria contaminating than Catholic, since he's not made extra anxious by suddenly 5 adults around him (3 of them strangers), & tilting 90° & then water on his head & 3 strangers touching and holding him, & so many strangers in the church around starting at him or talking and mixing with his energies and making him more nervous & priest massaging his head: *he's already sort of horizontal and just gets some water, minimum stress, as priest and strangers don't touch the baby, and let him relax, sleep or enjoy* smiling.☺☺☺ A mistake in the Anglican video is mom is not holding the baby's head (while dad holds the baby body really well or viceversa), as they do in Catholic video, thus stressing the baby to hold head horizontal against gravity. Sometimes in Catholic baptism they don't have 5 people holding the baby, only the mom, but too much tilting (since water can touch the back of head with 7 times less tilting) or they use too big of a water container (unlike Anglican video), which may increase risks (depending on weight or material of container, glass seems unsafe if handle breaks). The ideal is mommy or both parents holding baby (one the baby, another gently holds the head if baby is not mostly vertical, while they sing the soothing lullaby or play it from amplifier, Immortalli, or Immortali, Eternia, angel baby), or only 1 parent if held vertical (vertical is ideal, with only a tiny tilt so ***water barely touches the back of the head***, so no stress from having head held by the other parent), and priest only pours water, no wild gymnatics and tiltings, plus everyone in the church would smile, those around baby especially smile big and even laugh a little perhaps if they want, and be loving, soft, gentle (not loud, don't scare the baby) in tone or reach bliss to encourage the baby brain to go into cosmic bliss state too, cheer the baby to reduce anxiety of cold water on head, to make it a nice

very pleasant experience for the baby, while Godparents cheer, smile, wave at the baby from a few feet away to give the baby some space, play relaxing music to calm him *(daddy brings amplifier or phone with music mp3 from his pocket).* What I saw in most Orthodox, Eastern Rite Catholic videos was the kid crying, suffering (cold water, naked body; it's a known fact cold water raises cortisol and could be illegal for small babies with developing immune systems; since no perfect decontamination from baby to baby occurs, cortisol weakens immune system), as he doesn't know the priest and mom/dad are away, air is cold too sometimes and they're naked; so, if you live in mostly Orthodox, Latin Catholic or Eastern Rite Catholic countries with immersion, just baptize in a non-immersion church, like Roman Catholic and then go to that church or to your nearby Orthodox if much closer than the Catholic, it doesn't matter, God doesn't reside in buildings, it's where a real seeker exists; travel extra miles once a lifetime to avoid torturing your baby in Orthodox etc rituals so you have a decent non-crying video to share and save; *or* just sprinkle some *holy water* (like many Protestant baptisms) on the head *or invisible light*,☺☺☺ at home with some relaxing spiritual music in the background, asking the divine light to bless the baby and maybe taking the eterni vow; compare an immersion free Catholic baptism with these Orthodox immersion baptisms to see the huge difference in baby reaction, as well how the Catholic priest tone of speech is more *eterni*, gentler than most Orthodox, Coptic, etc; the Orthodox patriarchs give the option to baptize without immersion for health conditions, so use that option *even if the baby is not weak or premature etc, since parents will tell the priest the baby is too weak for such brutal immersion; nobody will verify how priests do it in every church, give a donation to the priest, and kindly say baby is weak and ask if he's willing to do full immersion before you setup appointment for the baptism and have it done with few around, only family perhaps,* to not make fanatical villagers or people think priest is doing all baptism without full immersion, even if he does it to protect human quantum field from the 0 IQ patriarchs that would fire him if they found out he's doing sprinkling for all kids like Catholics and Protestants do; however, the best is to realize the ritual itself is useless and you're wasting time with baptism, since God can baptize the baby directly in the privacy of your home; if you want to do it, to avoid villagers or town people from hating your kid, etc, then just sprinkle, find a priest willing to do that in some church within 20 miles; 1 minute won't change anything, babies only change when parents have an eterni tone for 500,000 minutes around the baby, so they learn eterni tone; *with 'not so empathetic' patriarchs who don't care about baby's suffering as much as about 'tradition', it is the moral duty of priests to go around the rules and do what is ethical;* God will protect these priests while the pathiarch is busy with others holding his garment, while he allows continued baby torture in the name of religious ritual rigidity; of what use are all the things he wears if his heart has no compassionor baby suffering?

The Orthodox covering of the nose of the baby (official procedure) etc doesn't always prevent

water going in and many don't even cover properly or at all. Perhaps, bishops, patriarchs wearing the heavy head mitre (Orthodox is much heavier than Catholic), made of metal partially sometimes (cross, the gold or silver fiber, etc), uses too many brain neurons to keep head inflexible (and rituals inflexible too), straight, undermining the flexibility needed to be present, to use brain resources to interact with people in a compassionate and eterni tone that transforms the soul of clergy, the rituals used. A simple cloth 5 times lighter head gear (like Catholics or even lighter, or same shape but much lighter, tighter sitting on head to allow easy head bending without falling) with 'Gentleness & Immortality *for* All' written would be better, $ store has artificial plastic jewels and materials one can use to make a colorful light head gear with "May our tone be *eterni*' written for only $5, instead of thousands some cost; this enables the church money to go towards buying high quality microphones (50-800 for each expensive head mitre, mass produced) instead, so the real transformation of pastors and lay people begins, a true reformation the Orthodox need. They can get rid of water altogether, use prerecordings, let God's Light of Immortality baptize the baby, with priest bringing hands from up towards the baby (in mom's lap, stopping the hands going down 10-20 inches above the baby head; mom relaxes and meditates on a chair, not stressing to hold the baby and stand, we want mommy to go into divine breathing bliss so she entrains baby to go into it too and becomes a truly memorable way of mom and baby, kid, etc recalling the Infinite Bliss and Light Immortal of *the* Holy Tone *of* God) as if the light comes down and transforms the baby; this allows priest to be silent, to focus on inner tone of energy radiation, thought and feeling and connect with the baby nonlinguistically, to help the baby feel relaxed and happy; make priest robes more colorful and complex, and lighter colors to prevent wearing dirty robes (all black prevents seeing dirt, at least use 10 colors and patterns, not just all black); it's ultra cheap to use 20 colors to write nice things 'Immortality *for* All' 'gentleness' etc on the robes or special shirts and jeans (very special, more colorful and immortality words printed than anything) for those disliking robes; at least, they go to church to learn a useful skill: instant breathing bliss, healing speech, emotion tone, hypothesis thinking, future techs imitating astral travel (way faster than space) in the science labs in every reformed church, instead of hanging out at a bar inhaling smoke that shortens lifespan. With babies we're meant to be the gentlest, and yet, in immersion baptism videos, we often see nearby people face change towards horror, disbelief, fury as they see the priest's brutality or lack of grace, gentleness, care; if the church is a moral leader teaching us how to be gentle, kind and loving to adults, 100 times more so with babies, what kind of example is this? If the Holy Immortality for All Spirit enters the baby as they claim, isn't this supposed to be the happiest experience of a mom, where she learns how to be happy, peaceful? ☺☺☺

Babies only feel safest (when water pours on them) around parents, so parents need be near baby, holding him, while a stranger (the clergy) touches their head with some water from his

fingers or from a little container. It's not loving in my opinion, to immerse the baby naked in water that is cold and make him cry. It could be done while playing the baby's favorite music (well, the one that seems to calm him, parents can see that), so he never experiences any discomfort. Even better would be to replace or compliment the head only baptism with the "gentle tender healing nurturing tone of speech vow" the parents, Godparents, priest make while reciting *"May I recall to always talk in your presence (the baby, or the wife if the pledge is not at baptism, but at the engagement or wedding) like in the presence of a trillion year old Immortal, Angel, or God, with eterni tone, for this would change you far more than using water 1 minute, water that God doesn't need to bless the baby, for God is infinite and not limited by a molecule of this universe to bless the baby. The baby is the Avatar of Immortality, his real self is in the future world of trillion year lifespans, and this human self is its '2nd life avatar of tht higher Immortality self', the savior of our mini-world, the savior of the parents too in a sense, giving them an opportunity to change their tone, bliss☺☺☺ and emotion more than any other event, the baby is the Teacher in Disguise, the baby is connecting the future Immortality world of Trillion year lifespan humans with this present, the most open minded vehicle for God's energy or Infinite Immortality Lifespan humans of the future energy for atheists, the human with the most plastic brain around parents, twice the neurons of parents, the fastest learner who emulates parental tone and becomes the embodiment of higher eterni grace and music as parents live in bliss ☺☺☺ and musical healing speech, emotion and thought tone. Daily eterni speech and bliss tone (30 min/day * 365 days * 20 years = 219,000) teaches the baby 200,000 times more than 1 minute of water sprinkling, aware of this and of the uselessness of this vow if not kept, we pledge to be true eterni parents, pastors, Godparents who speak in the presence of this soul like we have never done before with any human, with more gentleness, tenderness and respect than ever, so we reach an even higher level of eterni tone given this opportunity to evolve. We're aware of the huge effort needed to modulate speech this way, using the whole brain, and the need to thus speak less, lower volume, to enable other brain areas of feeling to get involved, new 'neocortex of merged feeling, thinking, speaking tone' to thicken or appear, and the brain areas of frequent cosmic bliss, which can influence the graceful bliss quality of the tone and the compassion of the tone, compassion fully proportional with the smiling happy bliss we choose to create via communion with God or the ☺☺☺Bliss of Immortality every day.*

A ritual a few times a day, a mechanical prayer is not really going to change us much, but building a new set of neurons to create a ☺☺☺bliss state (with any inhale and exhale we want to use to reshape the brain) with almost every breathing act while awake when needed, is something so transformational, it would make us so happy and so able to be kind as a result, since we can't be kind unless we're happy. We're aware for millions of years we talked so much, during sermons, prayers and life, not letting our brain evolve outside the speech center, leaving

us emotionally unfeeling and weak, lacking empathy, unable to perceive the intent, emotion of our thoughts, tone or others' tone. Now, with advent of neuroscience, we realize a 3 hour or 30 minute baptism with the Invisible ☺☺☺ Blissful Water of Immortality service can be mostly very deep bliss meditative smiling, with few words with gaps between, so we get to experience bliss, the ☺☺☺bliss of the soothing calming music in the background, of our inner music, of silence, of telepathy, of whole brain function, where the speech center doesn't receive so much oxygen but other areas too, more oxygen since speaking (especially speaking very loud due to not using microphones), dancing wildly deprives the brain of highest possible oxygenation, just like standing and eyes open deprive us of energy for developing this new 'neocortex of universal bliss☺☺☺ and kind tone born of higher empathy, telepathy' - so we can relax, take a seat, relax and give our tired eyes, legs a rest, go inwards and give our brains a chance to develop a truer connection with God or the Infinite Bliss of Immortals for atheists. We don't need speak loud, repeat long formulas taking 30-200 minutes, just a few minutes is enough with a pledge like this (or much better version you create saying the same thing) replacing a long service, the rest can be just being, feeling, in bliss, one with the baby, God and opening eyes to smile only while speaking with the baby. This helps the baby brain to experience the bliss, due to his brainwave resonating with pastor (any friend can be the pastor, no need of church baptism in the church of infinite freedom to be immortal and flexible), mom and dad brainwaves, it allows us to be in the present moment more, to feel how the baby feels much more, to be much happier in daily life, to handle the baby/kid and do only things that never cause any baby/kid crying, to be much better parents, citizens, who really can cope with the daily life in a more positive smiley way, instead of the negative emotion way that brings discomfort and war on global scale. Let all who attend this simple ceremony, relax, meditate and be, so all brainwaves unite and create a stronger field of peace and infinite bliss☺☺☺. If parents, teachers, etc don't smile, don't reach bliss, don't speak kindly, who will be the living example for the kids to emulate? *We pledge to renew this vow every few years or even year if we feel like, to bring deeper awareness in the baby and child of the power of tone of speech to create universes, to heal, to create miracles of Civilizations of Immortals. Amen*". Otherwise, if baby feels stressed during baptism, he may end up hating the religion, parents (for *allowing the incompetent clergy to do it, easily seen in videos where the clergy lacks the grace and loving care to prevent crying*), church, priest if his subconscious memory is good, a subconscious hate, not to mention he will cry when parental tone is bad every day after baptism and then baptism didn't really do much. The water founts where people immerse hands to get holy water are not hygienic and could be replaced by a spray device (by government order perhaps one day), which sprays water (10$ each on Amazon, it detects hand, like soap dispenser, so no touching ever), to avoid bacteria contamination from people who didn't wash hands and carry very bad flu, COVID19, etc viruses (*many touch private parts, use toilet, or very dirty church toilet doors after washing hands if they did (many do not),*

etc and then immense hands into that holy water holder, making it an extremely contaminated place with tons of bacteria and viruses).

Many are shocked the churches still use these unsanitary methods that put ritual rigidity above longevity of their parishioners. God doesn't want churches to become spreaders of disease and suffering. This is very important, the way priests teach moms to handle babies, because if moms learn the roughness of an uneducated priest, that baby will be treated roughly and cry more each time mom gives him baths and become an angry citizen of the country, ruining societal harmony and Immortality sciences progress or delaying it. Therefore, my opinion is that it is the government's duty to require places of worship to set the most affectionate, kind, loving procedures and training of priests handling babies, so rough moms from rough upbringing can learn the divine way of interacting with a baby and come better from a church visit, a better kinder person, not a severely angry (if priest was obviously disgusting to the mother, but she kept quiet about it) or contaminated without knowing parent (oblivious to the fact the priest was doing it wrong). Not to mention, Mother Teresa says God is in every baby, so how would a priest treat God incarnate, not with much more care and love, reverence and gentleness, tenderness and compassion than thousands of these youtube videos? The baby soul could also be 1 trillion times older than the priest soul, so where is the respect? ☺☺☺

Quakers hypothesize (are they right? perhaps they are?) that God*'s* Grace flows in proportion with the self-effort *to* change *and* be kind to others, not if or in proportion with how much water is poured on the body at baptism or how much wafers one has ingested. Why can't people replace rituals with true inner transformation, being blessed by the invisible holy water of *universal* loving kindness in our tone of thinking, emoting and speaking? God is infinite, doesn't depend on water, wafers, and real transformation happens easily when we change our tone of speech. Imagine if instead of the less ideal average tone of clergy in places of worship, they have eterni tone and less or 0 water, so they focus on inner change, not outer material objects like water (used in so many religions, God or spirits need no water to bless anyone, they can bless all who exert real effort to attain a more eterni tone every minute they want, without needing to be near 'holy water' or temples – God *is* anywhere *people try to* improve and *enrich in* loving gentle *tender* kindness *their* tone *of* thought, feeling *and* speech *and possibly (probably) much more so than in any gigantic worship place where nobody changes* tone *but do many rituals;* when we change the tone, the whole universe, galaxy, planet changes. *Instead of (or in addition to if they don't agree with me that* God doesn't need water, made of 1 type of matter, out of trillions, to bless immaterial spirits) *gigantic full immersion areas in a church, they could use that money to create good* recording studio or area, so parents record their eterni tone pledge (see above) when they baptize infants *with the* Holy Tone *of* God*, the* Invisible Holy Water *of self-transformation, or when adults or older kids enter that church.* Instead of (or in addition to if

they don't agree with me that we don't need water) small water containers in the sprinkling/pouring water churches, they could have beautiful *microphones for each parent to sing in* eterni tone *the* vow or promise of loving tone to the baby*: this would motivate parents to change far more than sprinkling or pouring water because it is the parental* tone *that influences the kid the most to change his* tone *daily, instead of using holy water once a year: do we want* real *change or* superficial *one?* Well, people will only use that tone if the pastors do all the time in service, so that's going to take a while. They would give parents a video recording of this vow and a set of 3 frames with the vow and picture of them and the baby mailed to them to place around the house to *recall this* tone *pledge*, the most amazing frame with 20+ font colors like this book, etc, shimmering glittery *frame* colors. *Why do we need adult or baby immersion baptisms for, when sprinkling water on head like many do would suffice?* Perhaps, like a trillion year old Immortal, we can be understanding and realize that maybe 4000 before Christinity appeared, people washed in the river before attending some religious ceremony and back then nobody had shower at home, so they did this out of respect for the holy gathering and chat about God that preceeded the 1st religious gathering. People would stink badly if no washing, so this is how beliefs emerged; but in the modern era, we have baths at home, we can clean before going to an important church event, so the need for full immersion is not there anymore.

People say water is needed for living and it's everywhere, and some thought all was made of water, hence they thought it's so important. Perhaps, due to the fact many stank and to ward off mosquitos, they invented incense eons ago, to help deepen their respect for their idea of God*. But today, we* know incense smoke is carcinogenic and we don't need incense. Today, we know the bacteria contamination from one person to next can spread disease, since often times they baptize many adults in the same pool at the same time or in sequence. Not to mention, some even baptize (if these videos are genuine not made to ridicule or make some laugh) in unsafe ways in baths *or* muddy water *(he expels a lot of air while in for 1 sec, so no water gets in, but unsafe unless training to be a cop saving lives of people trapped in water). The naked babies or clothed adults immersed in water contaminate the container/pool, and then others get viruses if disinfectant doesn't remove it (babies got weak immune systems, people didn't know that then); recall how it says 99.9% bacteria, fungi, viruses removed only on disinfectant bottles?* We can appreciate why atheists and those who dislike immersion baptisms make fun of these things via staged or fake videos, but a compassionate understanding of human evolution and how such currently redundant rituals emerged gives us the capacity to allow everyone to be and do whatever they wish, as long as they're aware of the risks and better alternatives, that God actually may like so much more: *pouring a little water and sprinkling some water (fully clothed), the way most (80-90% or more) Christians are actually baptized today and have been for a long time*. Peace comes thru respect, one can't hope for others to change, if one ridicules others for

not understanding right away that God doesn't have limits and simply has no need of matter, much less our matter, to bless souls not made of matter. If you ever talk to someone you could say "Hey, I was just thinking about this ritual, and a question popped into my mind: if God is the creator of trillions of matter types and *universes*, why would he need one molecule and one matter type to bless a soul that is independent of matter and immaterial?" instead of "this ritual is so useless, look at that". While the body is made of 70% water, the soul is not water and needs no water. And then mention the discomfort of babies, adults and hygiene/disease spread issue, in a loving tone, the most loving☺☺☺ ever you had with that person perhaps, low, soft, so that he may realize your statement may contain some or 100% truth. We all have unquestioned beliefs others may find comical☺, but we don't know them. So, it's not kind to make fun of others because nobody has time to question each of the 3 million beliefs they got. But when asked, definitely consider sharing an honest opinion. ***However, some people are not having their emotional brain very developed***, so they don't perceive others' suffering or anxiety, discomfort, etc in adult or baby immersion baptism. So, employ extra compassion filtering in the tone, when conveying that to such people, who may need a non-immersion video and the typical crying immersion one to see stark contrast. People's brains like contrast to learn new things, hence I included some video links above, out of compassion for those people who support these genocidal 0 IQ rituals. Most Christians don't do infant immersion baptism today.

Initially everyone used to do full immersion, but then they evolved out of that. Now, we can see why many find organized religion as comical☺ filif IQ mind control, why unethical spy agencies or groups can use denominations or religions to create robots (they use even traumatic or unpleasant torture) – so one wonders, do all clergy/people really believe the fake rituals they do, attend or are rituals at times just a form of ritual mind control or a cover they use as spies? Also, what can a 5 month old baby understand from someone giving him a water soak, or sprinkling water on his head? The Pope says if we doubt infant baptism, we don't trust the Holy Spirit can enter the baby, but why can't the Holy | Immortality for All | Spirit bless the kid via parents asking the Holy Spirit directly and by parents invoking the spirit to modulate their tone so they may inspire the kid to emulate the Holy Spirit inspired tone? Why does everyone have to depend on the Pope and church when God is everywhere?☺☺☺ The baby will recall and learn parental tone, but the sprinkling of water won't do much, in 2 minutes. If asteroids or something threatens humanity, do we just make a 2 minute ceremony asking God to take care of everything for us, deflect asteroid for us, as we ask Holy Spirit to 'enter baby and do everything for the parents'? Or do we have an actual defense system against 'evil' or something in case we need it, using science, logic, etc? The tone is based on neuroscience of human behavior, to prevent anger, negative emotions, to promote kindness that implies hours of effort every day or at least 30 minutes. *The baby won't recall anything anyway later on, since most people don't*

recall stuff from a few months old or even 1-2 years old, since it's not something they understand or value emotionally. And the Holy | Immortality for All | Spirit can bless the baby so 'Holy Spirit enters the kid' before birth or within weeks of birth via parents asking for God to bless the kid, and they can wait until kid is mature to be sprinkled; but they can also reenact the tone promise, (done online if no temples as in a truly spiritual church) even yearly after birth, at home in the eterni (or your favorite name for a church you create in your town) Gentle Church of Everlasting Freedom of Worship, Beliefs, Spirituality and Thinking, because Jesus reportedly said "The kingdom of God is within". God is Infinite intelligence, loving kindness and this means God and a decent modern church allows space for freedom, not behaving like a cult organization where this and that has to be done, all superficial rituals, without any actual change of parents, which is essential for the teen, kid or infant's transformation. It seems many religious organizations are concerned with superficial formalities and rituals, not with a real substance, a real transformation that is easy to scientifically validate by self via comparing one's average tone of a song each week with another ideal recording of self to see if at least we maintained that kindness level, that wholeness level; or with trying to achieve same cosmic bliss state ☺☺☺ via breathing, etc. Let these be private, let not the church interfere with one's personal experiences and understanding so much, to the point of stifling any independent thought and discovery.

Let people say "We believe we can't believe without 50 sources of genuine validation" instead of believing in unproven things. It's irrelevant if one comes to a physical building to sprinkle water on an infant, one can do that at home, or if one takes a tone pledge or blissful communion with God pledge at baptism, important is if one does that daily and is self-motivated without needing "baby-sitting" of adults by clergy. How will your kid learn to be happy, if you don't meditate and your voice is so full of negative emotion? God didn't create asteroid shields or natural disaster protection systems, we did it thru millennia of science and work, maybe ideas on how to do it came from God, but God leaves 99.999% of work to us, so we can grow to adult souls not remain baby souls. Likewise, God is not going to suddenly change kids if we sprinkle water on our kids or us, nor will the 'Holy Spirit'. *Enter many religious places: what do we find often? A tone so poor in gentle tender nurturing compared to the better recordings of spiritual music, people so sad (no ☺☺☺), they never meditate obviously or are too tired.*

We could add to Quaker Protestant denomination hypotheses that to be kind to others can mean to discover via science ways to cure diseases, create "eterni" food technology that harms no animal and plant and postpones aging by 500 years and moves us as further away from the Catholic emphasis on Eucharist 'cannibal like' phrases. Quakers argue God doesn't need us to eat wafers and wine, the body and blood of anyone, be them Jesus, and such cannibalistic symbology. God *is Infinite loving kindness and loves all people and animals, he needs to torture nobody, not even his "only special Son" to redeem the rest of his kids, because there are* Trillions

of Ways to achieve peace without torture *and God knows them. If you're a parent, don't you think there are ways to inspire your kids to be holy without torturing one kid? If* God is Almighty, can't he ask some aliens *to send a mothership and make no human capable to torture or kill the 'special son of god' who can't even defend himself? Reminds me of* aristocrats beating slaves*, as if this whole thing was created to soothe slaves and imagine they have to accept being tortured and enslaved because* "after all 'Jesus was too' (did he even exist or was it all made up?), and suffering is the way of life for you, a true disciple of a fake religion we created to enslave you". *Why are some churches free of Eucharist, baptisms or doing Eucharist once a year or quarter, while others do Eucharist daily? I don't have the answers, but to me, these rituals are unsanitary and filled with the wrong words and symbols, and many unproven claims about* 'Jesus being this and that'. Why not say "The Infinitely Loving Grace of Eternal Tenderness and Gentleness of God flows in our soul when we're speaking, thinking and feeling in an eterni or *gentle tender soft* way as we speak now, since this tone changes our minds and brains to become builders of infinite kindness in this universe." *instead of Eucharist 12 minute stuff? And let people meditate, breathe,* achieve bliss*, true* eterni tone *of thought, feeling and then practice* tone *with some* beautiful words like these. As we say this slowly together, we're transformed, need to ingest nothing, for spirit doesn't need matter, God doesn't need material objects to bless us or food as fools believed with their 'gifts to Gods'; the greatest gift to God is to be kind internally, in our thought, feeling, speech tone and to other people, animals, plants. *Wafers can spread disease too, not just the wine cups or kissing icons (Orthodox); to be kind☺☺☺ is to not spread germs.*

Other religions have unsanitary rituals (Jain monks naked always near clothed people, poor tone, but ritual there, search youtube for videos of rituals mentioned here if curious), or rituals that simulate torture (Filipinos simulate Jesus nailing, Shia Muslims torture themselves during Ashura, etc Bulgarian males half soaking in icy water, Russian males & females (sometimes kids) soaking in bikini 90% naked in freezing water on Epiphany 3 times to 'wash sins' and celebrate 'Jesus baptism' *(*one can create placebos with rituals that don't raise cortisol, cause her to feel shock in water and joy later at home, possibly shorten lifespan, cause hypothermia (emergency doctors present in some videos of these soaks), possible shorter offspring lifespan (eggs, ovaries or sperm generating cells damaged, so some sperm cells generated every month from then on may be damaged, not just the sperm used to make babies next 3 months after Epiphany? Science could find out using sperm/egg donors if after Epiphany, they're more damaged; Russians already live sort of shorter lives*). Cold plunges* raise blood pressure and cause brain bleeds via hemorrage or strokes. Putin's IQ is low*, so he plunges to in cold water (*this video shows no ice in water, so it may be secretly far warmer so Putin can deceive Russians *with "God is a* Jew, Jesus the Fraud*" scam, if he's a Jew) taking the whole Russia with him,* like most KGB*. These 3 useless mini or big torture rituals don't come from a sense of* Infinite loving kindness *of*

an advanced intelligence, but the overactive imaginations of people, sometimes even spy agencies who wanted to keep a group of people controlled via pain. It's useful to develop discernment, since we can't write next 900 pages all rituals in religions. God doesn't torture anyone, by definition of God (Infinite Intelligence able to achieve any end without torture), nor does God need painful rituals or any simulation of pain. However, aristocratic haters of slaves would want that, to make slaves used to abuse. We need healing music. The world got enough cruelty, torture, any extra pain simulation is lacking kindness, damaging humanity, encouraging "heroic" acts of cruelty, such as killing which end species later on. "A soul who tortures self or people today, later on can blow up a galaxy or planet". Many variations of this exist in many cultures "he who steals a tiny thing today, can steal a huge thing"... This is why, if reincarnation exists, God is careful where each soul goes. ☺☺☺ Also, these Neolithic era containers for baby immersion (not Vatican Catholics) which are rusty in some youtubes and trapping bacteria in that rust very hard to clean, unsanitary (can't really remove all microbes in between infants), they remind some of the more sinister stuff in the Bible about the Baal (Satan) worshippers who were burning babies or boiling them etc, human sacrifice – see quotes. How inspiring is that? Bible has many quotes about Moses being against or fighting the Baal worshippers. This may help some understand why the language of the Bible is so 'angry' at times, in that context, because some were simply so cruel, war was so present. This is made worse by Catholics focus of half of the weekly service on Eucharist part, the eating of blood and body of Jesus, reminding us of cannibals. Why would they use those words, when God needs no matter to bless? Is the priest (*not all or perhaps not even most may do it consciously, being puppets themselves*) brainwashing or subliminally programming church goers when he repeats daily the Eucharist ritual 'Jesus quote' "This is my body/blood and will be given up for you, etc" so they're OK with being tortured, enslaved or even 'eaten' (figuratively, slave labor, worked to death, or literally, sacrifice) due to identifying with the Jesus image and the sentence? Is this mind control?

Is USA free? Are we allowed to ask questions? Yes, they say, priests say Jesus said that to prevent people killing animals or people in sacrifice to 'wash sins', since humanity (1500 years before printing press and Bibles published in local languages) was 'low IQ' and believed in the weirdest things. But why do we have to remain in the 1st century IQ and language? Why set the standard so low to 'not kill animals or people'? Another odd thing is how in this, seemingly made up religion, God can only save his children, us, by torturing and sacrificing his 'only begotten son' whatever that is, so we see here a programming of the masses that God can only save people, do good, via torture and killing of Jesus; notice that the real God, not the imaginary one made up by the inventors of this religion, may actually know a trillion ways to save people without any torture and killing, as as God may know, and obviously knows, because God has infinite knowledge, trillions of ways to bring peace on Earth without any war and torture. We

can be watchful and see subtle ways in which they program people intentionally or due to believing the stuff invented by 1st century folks is best for this world. They take kids and adults and have them repeat like parrots certain creeds, without explaining alternative possibilities, how all miracles could have (and most likely were) been faked, etc, so it's not freeing, more like a form of mental enslavement and 'brainwashing'. The means and the end are to match to prevent the means from causing so many side effects that they cause the end to not be achieved (as a stable reality, i.e. lasting peace, for example), i.e. to bring good, we do it with good, to bring peace we do it with peaceful methods, not imaginary God methods (war, etc). We see the obsession of these religion inventors with sacrifice, due to the influence of the Old Testament: sacrifice, Baal worshippers were reportedly doing something similar, sacrificing people to their gods - so perhaps they want to say that God sacrificed himself, so no need of sacrifice, so intent can be good. However, it can be reverted, and can be a form of brainwashing that "if Jesus sacrificed himself and he's a role model, so could church goers sacrifice for the guys who want them to do that" (in war, as slave labor or in rituals perfomed by those who pretend to be Christian), so it can get very twisted and used for both evil and good intent. Regardless of what intent is there, it's still odd many (Catholics etc) Christians have to carry over all these imagery and enact these strange Eucharist rituals at daily Mass, as if people can't move beyond that to intelligence and the 21st century. Instead of freeing the people, they make them dependent on the wafer the priest disposes, so they can better mind control the people?

No wonder Protestants do Eucharist 3 times, not 365/year in some denominations. God can bless us directly if we ask. In places of worship, notice the tone and gaze of clergy (any religion) since tone alone tells 50,000 times more about who they're than the words used. Pastors claim God is this infinitely forgiving being, yet they also say Jesus is tortured by God, suffers infinitely more than a human, since 'Jesus expiates the sins of all', so he suffers way more than a human, so where is the forgiveness if God tortures and punishes his only son so much for our 'sins' and those of all lifeforms yet to be born thruout the galaxies, wow, big suffering there for Mr. Universal Son? This seems more of a *strategy to lower self-esteem, make people feel sinful, worthless, doomed,* unworthy of love unless they accept the rituals that bring salvation, fees of church and mind control the theocratic state brings to the newly converted country - no wonder the Catholic Church was at one time richest country on Earth, a state within many states. Give all wealth and political power to priests, and you get a crumb of bread and drop of wine and some blessing that we also can get alone by asking or using a kind tone, 100 times more every day?☺☺☺ Granted, some pretended to be Christian and setup churches to have a place (free from bar smoke, drunk people) to socialize and have some social support, help each other and the poor around in a weird world, role playing they believed in Jesus, since violence against non-Christians was common. Why can't they free people from limiting concepts that "they need

matter to bless their soul, to be with God in a special way they need wafer or holy wine, water"? A church of God, the Infinite loving kindness of Infinite Freedom, Immortality, offers Infinite Freedom not limitation. *Introduction into a kind*er way of life can be free from fear, free from stress, free from any anxiety, the way of Immortals, pleasant wonderful – not the 'torture almost' and stress like experience I see many people perceive it as in some kids or adult baptism videos made by factory workers who're 'priests 2 hours on a sunday'. Some videos show pastor using a towel and holding the nose of the older kids or adults, to avoid water *inhalation by mistake. But that's not always the case, many times, they do it without that, see* this clip*, and if they forget to inhale and then exhale when in water, they may get that dirty bacteria inside.* They ask 'Did you or do you accept Jesus as your Lord and Savior?' and let me ask people this, supposedly we go to a planet where people are a little bigger, say like we're compared to mice or bacteria, and live to the age of 5 billion years old or much longer, having come from another universe by translation and being already a trillion billion times older than this universe. *Will we go to their planet and ask them if they want obe baptized, as Pope said we would do with aliens, ask these huge aliens if they accept Jesus, as their savior, a guy that to them is a nanosecond lived mouse or bacteria? Think about it.* Now that doesn't mean that we can't do that, but what does a kid understand about dimensions, saving, souls, etc? ☺☺☺

To me it is a diservice to young people to make them believe water washes sins or gives them grace, because water is matter and doesn't change even their brain and neuronal pathways via a 1 second water soak. Perhaps, in the hyperuniverse the mega savior could be bacteria or mice we saw recently; yet it is a high burden of proof on those who claim Jesus saves all souls in all realms, planets, etc... or a mouse or worm they saw saves all humans. Why can't we be more honest? Back in old times, people had no telescopes to see how big the universe is, nor much understanding on how afterlife could be so complex, etc, but today we know this, so we can make less absolutist steatements like "we believe in kindness, helping others to live longer, 'immortal lifespans' so they may really understand reality as it is. We also believe Jesus may have had some good ideas, if words are his, like helping others, in our case to live to a trillion". Aliens might be killed by water, so you see, they can't be baptized, only some Christian ☺filif IQ ☺ buffoons think baptism is universal and a required or even needed part of a real faith. Can people see how illogical their rituals are and how lacking any universal application they are? There is nothing special about the matter type our bodies are made of and the 65-70% content of water of our bodies. Not everyone has the same type of body. If they're aquatic, then water baptism is like air baptism for us, pretty uneventful. If they're made of other types of matter in other realms, they don't have water, we can't go there to baptize them. So what will the pastors do then, how will baptism be done? ☺☺☺

Quaker Protestants go one step further beyond 'no baptism, no wafers, no wine, no need to

pray to saints": they even avoid taking part in war, making every effort to bring World Peace. If wearing a medallion or religious object was so powerful a lot of mafioso would become nonviolent really fast, but they never do. Some people like medallions or objects because they remind them of their beliefs and it works as a placebo, that's fine. But it has yet to be proven scientifically that a blessed wafer or medallion has more than 0.0001% of the effect (effect outside placebo effect that can be induced by unblessed wafer) of one's daily effort hours daily to improve oneself by proper reflection, tone of speech, thinking, emotion, etc... How can you prove a blessed medallion is better than an unblessed one? ☺☺☺ *We need randomization and people not knowing if it's blessed or not.* We may find it's all (99.99%) placebo, if any difference exists between wearers and those who don't wear it and that self-effort (*even just visualizing wearing an astral medallion or shimmering ovoid of light that surrounds you from a trillion year old Immortal or God that helps you bring a world of Immortals*) is 5,000 times more effective as you do that hours (each hour is 3600 seconds) daily invoking blessing upon blessing with each tone of speech change, but the wafer or medallion is blessed once for a few seconds. *10* seconds or *10,000*, which one is more effective? It's expensive to design placebo controlled double blind (neither the study doers nor the wearers know which ones are blessed and which ones are not) studies like that, but not impossible. But since placebos cure diseases in medical science, placebo religious objects are fine, if it helps people. I'm not against any of these things. I'm just saying that those who want freedom are free to give up physical placebos, and do it all mentally and imagine (that's what a physical placebo does, it helps us imagine God's Grace is with us) they're getting better because God loves their efforts to triple human lifespan and bring World Peace, a paradise on Earth, no prisons, no violence, no deaths before age 500, a first tiny step towards the world of Immortals. We can ask God to bless us, and it may often work 7,000 times better than blessed water we get from a church or temple, if we aid God by changing our tone of speech 2 hours daily. Mafioso can use blessed water but their inner self doesn't change, nor does their speech tone or energies radiated. We don't need buildings to connect to God, God doesn't need material objects to connect to us, be them amulets, stones, buildings, wafers, water. Jesus reportedly said in Luke 17:21 "The Kingdom of God is found within you", when we seek it a lot via decades long daily real efforts to change ourselves. The reason people feel nicer in some places of worship is because of the placebo effect, better acoustics and more silence sometimes, and also, in some cases, because the people who visit a church or temple restrain their negative thoughts a lot more (than in other places, depending on teachings too), having more positive and optimistic thoughts while there. These cumulative effects from thousands of people *alter the energy of the place.* But we don't need temples/churches to become better, we can make the physical "temple" of our body (through angelic tones of thinking, feeling, speaking, writing) and every home a "monastery", and bring World Peace 100 times faster, because we have nicer thoughts 100 times more often (about 100 awake hours in a week) than

the hour at church once a week or once a year for others (that's 5,200 times faster).

Back to the Eucharist, even some Catholic saints who took Eucharist explained that one doesn't need the wafer to commune with God, but that when one is away from church, sincere prayer to commune with God's Infinite Mercy and tender Grace is sufficient and equivalent. One can receive astral wafer if one really wants from spirits anyway, but the energy of spirits or God can come without the wafer form factor astrally. Future humans creating planets may be a little bit beyond "end times of planet Earth and rituals". Matthew 9:13 says "Then he added, "Now go and learn the meaning of this Scripture: 'I want you to show mercy, not offer sacrifices.' [Hosea 6:6] For I have come to call not those who think they're righteous, but those who know they're sinners" (at least imperfect people, not always graceful *gentle tender soft* wise like future 900 year old humans or angelic Immortals). First of all, *there is no video or strong scientific evidence* ☺☺☺ Jesus wanted the Eucharist ceremony to be done daily or ever at services, or that he said at the last supper the words the Gospel attribute to him, like "do this in memory of me", not God Luke 22:19-20 as that is very egocentric and *his praise of alcohol to be drunk daily to recall Jesus and his claim of turning water into wine* led to an estimated 0.25 to 1 billion dead people, and 90 billion beatings by drunk folks so far, which sounds like Jesus was a demon possessed person, not a holy man. Let's not be deceived by smooth talking fraudster clergy. The greater the being, the higher the humility they say. Second of all, we also lack strong scientific evidence (and no videos) that the Eucharistic miracles, Marian apparitions, and many other miracles in many religions occurred as reported. Hear say or embellishments during oral transmission occurs as zealous people want things they believe to be true, exaggerating, making stories into facts. In science, we have 500 research teams publish 3,000 papers to support one hypothesis and another 500 publish another 3,000 to support the opposite hypothesis. Then we're left with a decision to make: which papers have conflict of interest (companies wanting to sell products, picking, choosing what data to look at and how) and which have methodological flaws, which correlations are not causation, what are the missed confounding factors, etc.

But with Eucharitic miracles, we have sometimes, only sometimes☺☺☺, in more recent times, just one study done by one team, that may be independent, or several teams and that is not a very strong science. For the FDA or some agency to make a decision about the safety of a chemical, they usually look at 5,000 studies. Regardless of how the Eucharist ritual came to be, it seems that sacrificing some bread may have replaced animal sacrifice to elevate people's consciousness and make them more tender, gentler, softer, kinder, which *at that time* was a huge breakthrough. But, *in modern times*, many gave up the Eucharist ritual completely or do it only 3 times a year. In the future humans will probably go a step further and realize true Mercy means not killing animals for food or going vegan, and later, as science evolves, not killing plants for food, becoming 500 year old "Immortal" beings living on eterni food and later Pure Energy as

Tesla said and as the stories of some saints. Therefore, there will no longer be a need to do the Eucharist ritual to recall to be kind, but only a need to recall the Eternal Immortalizing Grace of Infinite Gentleness Kindness tenderness and Mercy itself, of our tone of speech and thinking, content of speech and thought, feeling, energy radiation, because God is our Mother and Father, the most Motherly Being there is. The Eucharist itself is a ritual of sacrifice (God needs mercy not sacrifice as Jesus and Hosea explain), where Jesus is "sacrificed" and people eat the bread (symbolically Jesus body in Catholic theology) and the wine (the blood of Jesus) to have their "sins taken away". This over emphasis on a material wafer washing sins, instead of self-effort to change and transform oneself, limits the engagement of the person and their desire to change their tone of speech, thinking, behavior, not to mention that the symbology of eating body and blood is not very uplifting, reminding people of cannibalism (*well, even when we grow plants, tractors kill endless mice and insects, when we breathe, we kill millions of bacteria, etc, we're eons away from being evolved enough to not kill any living being*); not only that, but people are called to emulate Jesus and the Catholic mass dedicates 10-15 minutes to the Eucharist ceremony in each mass, where Jesus says "This is my body and blood, etc... given for remission of sins" that people are to eat, his body... and blood.... etc as if they re brainwashing people to want to emulate Jesus and offer themselves as Jesus did symbolically, to cannibals or vampires. Then we wonder why Protestants often find this very suspect and repulsive. First, there is no evidence Jesus said that. The over obsession on blood miracles in the Catholic church is also suspect, since there is no independently verified by truly neutral scientists study that the wafer into flesh and wine into blood miracles happened - since this is a church about uplifting spirit, not about blood drinking (well, wine tasting, that's the blood of Jesus). This is a serious brainwashing issue that is not uplifting and in deep contrast with the Protestant services that do bread offering 1-4 times a year, not 365. God doesn't need matter to bless us, so we need not eat any wine or bread to be blessed, God wants kindness from us, perhaps a nicer eterni tone ceremony of inner transformation, not simulating drinking Jesus's blood and eating his body, as if we would be 'cannibals' – so people can now understand some of the reasons Protestantism emerged, besides the fees to avoid purgatory: money can't prevent a hypothetical 400 year purgatory stay – they had no evidence of that expiation of a learning journey – money we give in 1 minute, but 400 years is a long period in which we can learn more.

May Catholics lobby the Vatican (or other rigid outdated religions) to change their rituals, outdated antiscience, antihypothesis thinking service structure, elevate human mind, spirit to freedom, expansion and less rigid beliefs and interpretations. We can go beyond 1st century thinking. As Protestantism appeared, there was more freedom of thought and less rigidity of interpretation, though I don't subscribe to most of their ideas either, yet we're aware that Martin Luther only possibly proposed a mini-reformation since if he would have gone too deep

into issues, he would have been called a heretic by all and would have been 100% rejected. "He who kills an ox is as if he slew a person." says the Bible or Torah, Isai 66:3. We see that God values mercy, not sacrifice in Isai 1:11-6: rituals, incense, Sabbath, new moons, incantations, etc are meaningless and unpleasant, the fake Judaic or Fake Christian or Wicca traditions have no kindness for animals and that God won't answer prayers of those who're not kind. People will perhaps sing one day "This is the Light of Infinite Mercy, who helps us to Think and Question every story we're told, so we're less credulous but kinder. For it is in questioning that we avoid being manipulated to move away from deepest kindness, sweetness, tenderness, gentleness, compassion." As Chapter 2 explains, one day we might become a bidimensional civilization living in 2 star systems and 2 dimensions too, just as we now are on Mars with a rover and in ancient times, Mars was a metaphysical being and nobody thought we would be there. Such future human "Immortal" beings are a little ahead of many beliefs & rituals. It's very possible that a scientist who takes humanity forward and cures disease by his inventions, working 12 hours daily or 16 like Tesla who slept 3 hours on average or less, and goes to Eucharist 3 times in his life, is dearer to God and closer to God from God's point of view, than someone who goes weekly at Eucharist but fails to take humanity forward in knowledge that cures many diseases, fails to speak kindly and to radiate loving energies during speech, reads horror literature or watches violent movies or music that pollute mass consciousness and bring war and chaos, etc. Jesus said "cure the sick", "you will do greater things than I did" John 14:12, but this requires knowledge, as with stem cells or tech that cured the blind, deaf or paralyzed, or some mutation that postpones all diseases of aging by centuries, this requires hypothesis formulation and testing, Knowledge, Understanding, Discovery, not ritual. The Last Supper sharing of bread by Jesus (which became Eucharist ritual later) may have become a ritual of people who wanted to recall universal loving kindness for all living breathing beings, who knows. That ritual was a reminder to be merciful towards animals and all beings, but the ritual is not Mercy or *Knowledge* Itself. Jesus may even have been vegetarian part or all his life, some hypothesized that because a text said James, his brother, was vegetarian.

The texts have been so edited and changed, that it's evident some of the language, expression and events didn't occur as presented in the scriptures of many religions. In one place it says "this is *my* commandment, Love one another as *I* loved you", but God is Love and Love doesn't command, so it's clear here that the translation is not accurate or the scribe didn't use right words. ☺☺☺ "I have a hypothesis to share with you, which you don't have to accept as true: God is loving Gentle Tender Soft Grace honoring all free will, and God loves it when people love one another selflessly" might be a more accurate way of someone intelligent and *egoless* saying that. Perhaps God is Infinite Love Grace Sweetness Healing *Nurturing* Elysian Bliss, Tact and Diplomacy, Extreme Beauty, and thus a real son of God (not Jesus conman) would have said

"The Way It seems to me, but maybe not the ideal or only way, we discover God's Infinite Grace and Immortality, Knowledge and Bliss is thru loving one another infinitely". *Without adding "how I loved you", as that is too egocentric.* Scriptures are very allegorical at times and scribes often twist words to impress a point on readers thru the filter of their belief of what is trying to be communicated by some event or words or someone. Scriptures are not videos of events. In other Gospels we find Jesus saying "Love your enemy, pray for them", Jesus followers saying "With all humility and gentleness, with patience, bearing with one another in love", 1 Thes 2:7 "*gentle* among you, as a nursing mother *tenderly* cares for her own children", "The Lord's servant must not be quarrelsome but kind to everyone, able to teach, patiently enduring evil, correcting his opponents with gentleness", "To speak evil of no one, to avoid quarelling, to be gentle, and to show courtesy towards all people", meaning these people saw that in Jesus and emulated it which contradicts some of the statements attributed to Jesus, possibly by scribe twisting or oral hear say mistransmission. There are thousands of possibilities for all events depicted and words attributed to Jesus and any other person in all scriptures, and when we realize that, we become less zealous or focused on ritual miracles or unprovable things and go for the substance, the kindness that is proven to bring peace. In the absence *of true evidence (videos, or thousands of historical records) it seems sensible to assume the best possible for all involved in any scripture, take with a grain of salt all negativity coming from scribes and hear say scribes heard, as we don't see things as God sees them* as explained in Chapter 2, Quadrillion year old Immortals see 1 trillion times *more about every human than we humans* do. Magnify others' strengths not weaknesses. While we can't know whose energy is there at times, the scribes, religion editors/creators or Jesus/Buddha/Krishna, we can discern easily that the energy conveyed was not always that of God, but human negativity too. This discerning knowing about complex actors, motives, the fact the "worst could be the best" (in real events, not changed accounts of events), when practiced in life too, not just when evaluating scriptural persons, helps manifest faster a Civilization of Immortals. The 20 habits enhance telepathy with angelic spirits, the spiritual life of future human "Immortals".☺☺☺☺

Scriptures will probably be refined over time to remove all negative expressions and words, as people live to 900 etc. If people are in a room and they try ESP, it may be proven by randomized controlled studies that the telepathy/ESP precision is higher if they have spiritualized (editing out bad things) scriptures in the room (as opposed to normal versions), free of all negative emotions, actions, insults, etc, with only uplifting expressions versus same scriptures with all less graceful words (which many people misinterpret without proper scribe editing and historical context understanding). Our subconcious minds read everything around us and the noise of certain emotions and actions in a printed or electronic text can probably interfere with accurate telepathy. Similarly, services content will probably improve to include only the most uplifting

gentlest softest quotes and readings, that transport us into a world of Gentle Tender Soft Grace of the Civilization of Immortals as it is in Heavens, subuniverses. Services will probably have a special Hypothesis Formulation and Testing part, Seeking Proof and avoiding being too credulous, to make us question everything, every miracle story (for example out of hundreds of weeping or bleeding statues reports, only one was approved as genuine by the Vatican, the Akita one) out there (especially since many similar ones exist in many religions, past and present and many charlatans exist who use magic tricks to claim some powers, sometimes even devotees add some fiction to convert people to their belief), etc. ☺
